PREFACE

On American Literature Today

When the three of us first met to plan *The Literature of the United States*, German armies were pushing eastward across Soviet Russia, and Roosevelt and Churchill had just issued the statement now famous as the Atlantic Charter. During the intervening years, like other Americans we have cherished the hope which that Charter expressed—for a peace “which will afford to all nations the means of dwelling in safety within their own boundaries, and which will afford assurance that all the men in all the lands may live out their lives in freedom from fear and want.” Today it is clearer than ever that if this hope is to be translated into lasting reality, it will have to be by the will and intelligence and international understanding of peace-loving peoples of all the nations.

Some may feel that this is an inappropriate time to insist upon the importance to Americans of their national literature. We should feel so ourselves if we believed that the literature of the United States is narrowly nationalistic. It does not seem so to us. We think, on the contrary, that Americans can best discharge their heavy responsibilities in the years ahead by recognizing more fully than ever before the richness of their heritage. The literature of this nation is, in our judgment, a humanizing rather than a chauvinistic force—the record of the ideals and struggles of many peoples who have become one people and who have, despite frequent setbacks and failures, battled with inspiring persistence for the principle of “equal and exact justice to all men, of whatever state or persuasion, religious or political.” Americanism, in the best sense of the word, needs no apology, Americans cannot but hope that they are on the threshold of an era in which the principles of democracy will be reinforced at home and extended abroad. Nothing less can justify the years of global war.

As teachers of literature, we do not pretend to know all the answers to the questions which the future will pose. It is obvious, however, that the young men and

women who are passing through college classrooms are going to need all the strength of character, all the humility and tolerance and humor, all the intelligence which they can muster. We think that American literature can be of help. To generalize is dangerous, but we are pretty sure that students will not find American writers cut to any single pattern. The literature of our country has been written by inhabitants of many different localities, representatives of many different levels of society, products of many different racial, religious, and occupational influences. American writers are not agreed on any one way to salvation, any one philosophy, any single explanation of this puzzling world. But they have told of finding life well worth the living, these United States full of good food, good fun, good thoughts, and good people. They have never believed that people should be shot for political reasons, or that the world cannot be improved by tireless application of intelligence. “There is nothing to fear but fear” is a typically American attitude.

We hope that something of this spirit will be absorbed from this book. We realize, however, that American literature may be taught, and taught well, in many different ways. Both in the selections and in the editorial apparatus, we have tried to provide the materials for different kinds of courses or a course with several emphases—the chronological survey, the careful analysis of the work of major authors, the study of literary types, and the examination of the development of significant ideas. Our guiding belief has been that although limited fields of study and specialized approaches are desirable in texts to be used in advanced courses, an introductory text fails unless it shows the great range of the riches of our literature and the several ways of appreciating these riches.

Hence the *selections* are comprehensive. The writers included amply represent the whole range of American literary history, from the colonial period down to the

present day. Major authors are given generous space, but the more interesting minor writers have not been neglected. Complete works have been given preference over unilluminating excerpts. Particular care has been taken to include folklore, humor, the drama, and the novel, all of which are often subordinated in anthologies to the more manageable essays, poems, and short stories. In addition to primarily artistic literary works, this book includes numerous examples of utilitarian types such as the sermon and the political tract. Throughout, however, we have tried to include only work likely to have lasting literary interest and value.

Hence, also, the *approaches* to these writings are varied. Chronological tables and introductory chapters on "Intellectual Currents" in the six periods of our plan are designed to indicate the intimate relationship between American literature and American history. Biographies of individual authors and occasional introductory notes suggest how a knowledge of the writer's life can often add to the interest and understanding of a particular selection. Sections on "Literary Trends" and numerous analytical notes emphasize the importance of the study of literary forms, techniques, and values.

Although we have consciously sought to emphasize variety, we have not ignored the desirability of coherence. By frequent conferences and by correspondence we have sought ways and means of integrating the history of ideas, the history of forms, the biographies, the selections, and the notes. We are jointly responsible for the plan of the book as a whole, and for what we hope will be found a satisfactory unification of enormously varied materials.

To indicate our individual responsibility, however, we have initialed the introductory chapters, and we are individually responsible for the biographies, introductions, texts, and notes as follows:

Volume I

W. B. (Walter Blair): John Smith, Sarah Kemble Knight, William Byrd, Samuel Peters, Singers of the Revolution, Hannah Foster, Richard Henry Wilde, Samuel Woodworth, Robert Bailey Thomas Morgan Neville, Edgar Allan Poe, Henry Wadsworth Longfellow, Oliver Wendell Holmes, James Russell Lowell, Seba Smith, Charles Augustus Davis, Singers of the West.

T. H. (Theodore Hornberger): Thomas Hariot, John Winthrop, George Alsop, William Bartram, Thomas Shepard, Roger Williams, Cotton Mather, Jonathan Edwards, Charles Chauncy, Benjamin Franklin, Michel Guillaume St. Jean De Crèvecoeur, John Woolman, John Adams, Jonathan Boucher, Thomas Paine, Thomas Jefferson, Alexander Hamilton, George Washington, H. H. Brackenridge, Andrew Jackson, William Ellery Channing, Peter Cartwright, Philip Freneau, Timothy Dwight, Joel Barlow, William Cullen Bryant, Royall Tyler, Washington Irving, James Fenimore Cooper, Caroline Matilda Kirkland.

R. S. (Randall Stewart): William Bradford, Samuel Sewall, Anne Bradstreet, Edward Taylor, Ralph Waldo Emerson, Henry David Thoreau, Nathaniel Hawthorne, Herman Melville, John Pendleton Kennedy, William Gilmore Simms.

The illustrative material is intended to aid materially in showing students how captivating our literature has been throughout its history. A detailed consideration of the sources of the illustrations and the work of the artists follows this preface.

Some of our many debts to the work of scholars in the field of American literature are acknowledged in the introductions and notes. Since we have avoided burdening the student with too large a mass of scholarly citations, we add here our general appreciation of the large contribution to our interpretations and criticism by our fellow-workers. American literary scholarship is relatively new, but it is growing rapidly and already bulks large in the preparation of any such book as this. Here and there, we trust our work has added to its store of facts and generalizations.

In addition there have been countless conferences, letters, telephone calls between our publishers and ourselves as we have settled the many adjustments, big and little, in the preparation of the manuscript. We feel, in short, that *The Literature of the United States* is something more than another textbook. For us it has been a cooperative venture engaged in by many hands, many pairs of eyes, and many minds.

ILLUSTRATIONS

Lives and Times in Pictures

The literature of the United States has been created by men and women living in a real world—a world of nature, of towns and cities, of homes. To apprehend this fact is very important if the student is really to know and to appreciate American literature. Yet the earliest authors and even some of our contemporaries may easily become remote from the student's understanding. To bring closer to the reader the men and women who wrote and the times in which they have lived, we have adopted a program involving the extensive use of interpretative illustrations.

Realizing that these illustrations would be worthless if they were not authentic, we have spent hours in research and the careful study of detail, to assure their accuracy. The artists, sharing our zeal for accuracy, have been equally careful. At times they have made extensive revisions in order to include only authentic materials and in order to keep the drawings consistent with the book as a whole. In addition, they have shown great skill, we believe, in working these many details into compositions distinguished for their artistry.

The illustrations designed and created especially for *The Literature of the United States* are of three types. The lives and times of the major authors included in the book have been illustrated in "panels" by GREGORY ORLOFF ("G. O."). The material in these drawings has its source in authentic historical documents, portraits, views of landscapes, of settlements, towns, and cities, and (now and then) illustrations from early editions of works. Other panels are devoted not to single authors but to the schools that have been recognized in the organization of this book—the groups of men and women

whose writing seemed to have a common background, regional or stylistic, or a common moral, political, or artistic purpose.

The smaller drawings falling within the body of the selections are the work of HELEN NOEL ("H. N.") and were planned to point up details and to give a feeling for the life of the various periods. Particular emphasis has been placed on the homes and surroundings of the authors, the places about which they wrote, the particulars of the background of their everyday lives.

Each chapter is introduced by a two-page panorama which we hope will give a general picture of America's development in the span of years covered in the chapter. These two-page drawings have been done by BRINTON TURKLE ("B. T."). In them are found illustrations of the architecture, the costume, the military tactics, the political life, the transportation, and the industrial and territorial expansion of each period.

In striving further for authentic pictorial material heightening the interest of the literature, we have supplemented the work of our present-day artists with direct reproductions of contemporaneous illustrations of certain American writings. Such illustrations as those by Augustus Hoppin for Lowell's "The Courtin'" and by Felix O. C. Darley for Irving's "Rip Van Winkle" and "The Legend of Sleepy Hollow," which have long enhanced the reader's understanding and enjoyment of the literature, appear here. Where we have thought them to be of particular interest, facsimiles of signatures, original manuscripts, or title pages have also been included.

A complete catalogue of the illustrations follows.

(A description of the details in each of the biographical and school panels is given in a footnote on the page where the panel appears. Contemporary sources have been used throughout, and are indicated in detail wherever they are of unusual interest.)

The English Colonies—Historical spread (B.T.)

Reading counterclockwise: Colonial forces in the French and Indian War • Map of the principal colonial settlements • Colonial costume • Benjamin Franklin in England • Independence Hall • Stagecoach • Settler's cabin, typical of the earliest colonial architecture. 1

EXPLORERS AND COLONISTS (G.O.). Portraits and view from contemporary prints. 57

The Wiroans, from the drawing by John White, engraved by Theodore De Bry in 1590 61

Their Manner of Prainge with Rattles abowte te Fyre—another drawing by White, engraved by De Bry 64

Madam Winthrop's wedding room (H.N.) After a contemporary drawing. 93

Kitchen effects of the colonial period (H.N.) 96

William Byrd—a biographical panel (G.O.). 104

The Frogs of Windham, after the wood engraving in the 1829 edition of Peters' *General History of Connecticut* (H.N.). 115

John Bartram's house, birthplace of William Bartram (H.N.) 120

John Bartram's study (H.N.) 123

NEW WORLD DIVINES (G.O.) 127

Cotton Mather—a biographical panel (G.O.). The portrait is the Pelham portrait, 1727 144

A colonial fireplace, showing typical firearms and household utensils (H.N.) 151

Jonathan Edwards—a biographical panel (G.O.) 160

Reverend Charles Chauncy's church, the old "First Church of Boston" (H.N.) 186

NEW ENGLAND POETS (G.O.) 189

The New Republic—Historical spread (B.T.) Reading counterclockwise: Bank of Philadelphia • Costume and furniture of the Federal period • The Battle of Monmouth • Conestoga wagon • The United States in 1829 • Flatboat on the Mississippi 201

BENJAMIN FRANKLIN—a biographical panel (G.O.) 243

No. 7 Craven Street, Franklin's London residence (H.N.) 274

House in which Franklin lived at Passy, after a sketch by Victor Hugo (H.N.). 279

SOCIAL COMMENTATORS (G.O.). The portrait of Crèvecoeur appeared in an edition of his works published in France in 1786 283

American farm, late 1700's (H.N.) After a contemporary print. 297

John Woolman (H.N.), from a contemporary sketch. 304

THE REVOLUTION (G.O.) 308

Revolutionary musket, sword, and drum (H.N.). The "Join, or Die" device was created by Franklin; the snake's head represents New England, the other parts, the other colonies. 322

Thomas Paine—a biographical panel (G.O.). 326

Jefferson's sketch for his tombstone, and the inscription suggested by him 354

Interior of Monticello (H.N.) 357

STRUGGLE FOR POLITICAL STABILITY (G.O.). 363

Autograph of George Washington. 373

Teague O'Regan, after a drawing by Felix O. C. Darley, 1846 (H.N.). 388

First draft (largely in Jefferson's handwriting) of the *Declaration of Independence*. 395

DEIST, UNITARIAN, REVIVALIST (G.O.) 408

Reverend William Ellery Channing's church, Federal Street, Boston (H.N.). 425

Autograph of Peter Cartwright 433

POETS OF THE AMERICAN SCENE (G.O.). The mail stage is drawn from a notice for the Boston, Plymouth, and Sandwich stage, 1810. 436

Caty-dids (H.N.). 449

New England village (H.N.) 456

William Cullen Bryant—a biographical panel (G.O.) "Monument Mountain" is based on Emanuel Leutze's engraving for the 1849 edition of Bryant's *Poems* • The portrait is from a miniature by Stibbe, now in the New York Historical Society. 464

Bryant's home, Roslyn, Long Island (H.N.). 487

SENTIMENTALISTS (G.O.) "Eliza Wharton" is adapted from the frontispiece of the 1831 edition of *The Coquette*. 488

Eliza Wharton's tombstone—from the 1797 edition of *The Coquette* 495

EARLY PORTRAYERS OF AMERICAN TYPES (G.O.). 499

A keel boat on the Mississippi (H.N.), after an illustration in *The Crockett Almanac*, 1838. 503

I feel chock-full of fight,—do you want to kill the colonel?— (H.N.), after the frontispiece of <i>The Contrast</i> (1790)	536	"If I am not worth the wooing, I surely am not worth the winning!"—an illustration by George H. Boughton for the 1879 edition of <i>The Courtship of Miles Standish</i>	786
WASHINGTON IRVING—a biographical panel (G.O.). The <i>Alhambra</i> is based on a drawing by J. D. Smillie • "The Lovers," from "Bracebridge Hall," was originally drawn by C. H. Schmolze, 1858	538	Oliver Wendell Holmes—a biographical panel (G.O.)	809
" . . . continually dinning in his ears about his idleness . . . —drawn by Felix O. C. Darley, in <i>Illustrations of Rip Van Winkle</i> (1848)	561	The Landlady's daughter—an illustration by Augustus Hoppin for the 1858 edition of <i>The Autocrat of the Breakfast Table</i>	819
" . . . talking listlessly . . . telling endless sleepy stories . . . Also from Darley's <i>Illustrations of Rip Van Winkle</i>	563	The young fellow whom they call John—another of Hoppin's illustrations for <i>The Autocrat of the Breakfast Table</i>	823
He beheld something huge, misshapen towering —drawn by Darley, in <i>Illustrations of the Legend of Sleepy Hollow</i> (1849)	581	James Russell Lowell—a biographical panel (G.O.) "Birdofredum Sawin" is adapted from the drawing by George Cruikshank in the London edition of <i>The Biglow Papers</i> (1859) • "Sir Launfal and the leper" is based on an illustration by S. Eytinge, Jr., 1867	832
JAMES FENIMORE COOPER—a biographical panel (G.O.) Felix O. C. Darley illustrated <i>The Pilot</i> (1859) and <i>The Pathfinder</i> (1871) • The statue of the Indian Hunter marks the site of the original Cooper home, Otsego Hall, which was destroyed by fire	584	"Zekle crep' up quite unbeknown . . ."—from the original drawings by Hoppin for a version of "The Courtin'" which appeared in <i>Harper's Weekly</i> , October 23, 1853	859
The Leather-Stockings cabin—drawn by Darley for <i>The Pioneers</i> (1859)	590	"To see my Ma? She's sprink'in' cloc'es Agin to-morrer's i'nin'."—drawn by Hoppin for <i>Harper's Weekly</i>	859
Natty . . . passed his knife across the throat of the animal . . . —Darley's illustration for <i>The Pioneers</i>	621	"An' Wal, he up an' kist her"—drawn by Hoppin for <i>Harper's Weekly</i>	860
" . . . the old hunter landed, and examined the thongs . . . —Darley, from <i>The Pioneers</i>	623	THE TRANSCENDENTALISTS	
The prisoners, by Darley, from <i>The Pioneers</i>	639	Ralph Waldo Emerson—a biographical panel (G.C.)	872
EDGAR ALLAN POE—a biographical panel (G.O.)	645	Henry David Thoreau—a biographical panel (G.O.)	938
Ligeia (H.N.)	674	Walden Pond in summer (H.N.)	978
Opening paragraphs of Poe's original manuscript of "The Murders in the Rue Morgue".	676	Nathaniel Hawthorne—a biographical panel (G.O.)	980
Dream-Land (H.N.)	704	Rappaccini's garden (H.N.)	1039
The Raven (H.N.)	707	DOWN EAST HUMORISTS (G.O.)	1055
The American Renaissance —Historical spread (B.T.) Reading counterclockwise One of the famous clipper ships of early American commerce • Interior of the House of Representatives • The Capitol building • The storming of Chapultepec • The United States in 1860 • Railroad carriages of the mid-nineteenth century	710	Jack shaking hands for the President—drawn by Augustus Hoppin for the 1859 edition of <i>My Thirty Years out of the Senate</i>	1057
THE BRAHMINS		The unutterable disappointment at Downingville—by Hoppin	1059
Henry Wadsworth Longfellow—a biographical panel (G.O.) "Hiawatha's Wedding Journey" is one of a series of paintings by J. L. G. Ferris illustrating scenes from Longfellow's works	770	HERMAN MELVILLE—a biographical panel (G.O.)	1064

TO TREAD AND PLANT THAT GROUND. "Who can desire more content that hath small meanes, or but onely his merit to advance his fortunes, than to tread and plant that ground he hath purchased by the hazard of his life. . . ."

— John Smith

I. Intellectual Currents

THE PATTERN of COLONIAL CULTURE

The story of the colonial period of what is now the United States is familiar, in its main outlines, to all of us. It extends roughly from that first voyage of Columbus in 1492 to the Stamp Act in 1765, which brought to scattered and disunited English settlements the realization of their common interests and strength.

Columbus, seeking a new way of access to the riches of the Orient, found instead a New World and loosed upon it the expansive forces of the western European nations, already restlessly groping toward a new phase of their civilization. In the ensuing struggle for power, England was only gradually and belatedly involved. John and Sebastian Cabot had given her a claim to the northern continent of the new hemisphere, but it was nearly a century before men like Walter Raleigh sought to make good that claim by actual occupation. When it became clear that North America could offer little comparable to the easily won gold of Peru and the silver of Mexico, most Englishmen refused to grow excited over colonies, and many

were openly scornful of such costly failures as that at Roanoke Island in 1585. Ultimately, however, their patriotism—a curious blend of nationalism and Protestantism—their renewed awareness of their rôle as a seafaring people, and their longing for wealth accounted for the tenuous successes of permanent settlements at Jamestown in Virginia in 1607 and at Plymouth in Massachusetts in 1620.

Thereafter the shape of things to come was perceptible to shrewd and well-informed men. From the Puritan Migration of 1628-1640 New England acquired a population of perhaps twenty-five thousand persons, enough to give her a long-enduring economic and cultural leadership in British America. From the difficulties of administering a colony at a distance of three thousand miles there developed representative assemblies (the first of them in Virginia) comparable to the lower house of the English Parliament. From the absorption of the Dutch of New Amsterdam and the Swedes along the Delaware, the pattern of colonial life acquired variety and color. The religious motives of the Catholic Lords Baltimore and the Quaker William Penn lent distinction to the settlement of Maryland and Pennsylvania.

Up and down the Atlantic coastline, villages and farms and plantations proliferated, and everywhere men sought to build that life which seemed to them desirable, compromising always with the hard facts of their environment and the often conflicting ambitions of their neighbors. By 1700 the colonists numbered more than a quarter of a million; by 1765, approximately a million and three quarters. They had been fortunate in being left pretty much to their own devices, or being interfered with only sporadically and unsystematically. For all their differences—and they had many—they agreed, in the mass, upon one thing: they wanted to control their own affairs. We know now, as Americans in 1765 could not know, that the road from such an agreement to Lexington and Bunker Hill and Independence Hall was inevitable, that the essential truth of their situation lay in Thomas Jefferson's epochal words: "When, in the course of human events, it becomes necessary for *one people*. . . ."

One people! Such the colonists in British America eventually became. Why and how they did so are still puzzling questions, despite the many words which have been written to explain the Revolution. The disintegrative forces of the colonial period were seemingly as powerful as those which operated for cohesion and unity. Intercolonial travel by land was difficult and uncommon. Personal and commercial connections between one colony and England were often closer than those between colony and colony. Marked religious differences prevailed, from Congregational New England to the Anglican establishments in Maryland, Virginia, and the Carolinas. Outside of New England there was little homogeneity of background, for by 1765 one out of every three Pennsylvanians was German, every other North Carolinian was of Scotch-Irish ancestry, Negro slaves made up almost half the population of Virginia, and in South Carolina and Georgia the whites were actually outnumbered. Nevertheless all were Americans, with characteristic political and social institutions and with a literature of their own, which tells much of what they thought and argued and dreamed about.

Language, folklore, learning, the arts, literary tastes and types, legal, political, and educational institutions—everything except the land itself and a few skills acquired from the Indians—had been brought across the Atlantic Ocean. The process of transplantation had been by fits and starts and by devious routes; it had never been smoothly regular, almost never simple. Always involved in it had been change, adaptation, modification to meet the peculiar circumstances of the new environment. The old ways never worked quite perfectly under the new conditions. Men came who knew how to build houses, but they had to work with the building materials they found—lime for plaster, for example, was hard to come by—and they had to meet the exigencies of climates unlike those to which they had been accustomed. Physicians arrived, their minds stored with botanical medicine, only to discover that America had a flora of its own, whose medicinal use had to be discovered by experiment or learned

from the aborigines. Traditions lingered, but necessity forced the quicker-witted to depend upon first-hand knowledge, and there was a sufficient variety of problems in the lands from Maine to Georgia to call forth all the ingenuity that experience could develop. Decade after decade the processes of transplantation and adaptation were repeated, with infinite minor variations. New men and women came from Europe, bringing new tools and talents and opinions and adapting them as best they could to what they found. Frontier succeeded frontier as immigrants pushed up the streams toward the mountains to find new farms and found new villages. In the growth of the colonies there were few breathing-spaces; stability was short-lived, change incessant.

Nor was Europe static. In almost every field of human thought the period was tumultuous, full of conflict and revolutionary change. In economics, the feudal system was giving way to modern capitalism. In politics, the theory of the divine right of kings was dying under the blows of constitutional and contractual concepts. In religion, the schisms and sectarian rivalries which were the aftermath of the Protestant Reformation were hardly yet softened by the principle of toleration, which was eventually to bring a measure of amity. In science, revolution was continuous as Copernicus, Galileo, Bacon, Descartes, Boyle, Newton, and their associates and disciples changed both the world-view of western man and his method of advancing his exact knowledge of the world in which he lived. In literature and the arts, the creative outpouring of the Renaissance was succeeded by the more orderly but by no means barren reign of Neoclassicism.

The colonial era of the United States coincided, in short, with the germinal period of what we call the modern world. Europe, of necessity the chief constant factor to the people who settled in America, was itself becoming a new world. The more intelligent colonists, busy as they were with their own concerns, did not forget that they were participants in affairs of mighty moment, in the rebuilding of an old as well as in the creation of a new society.

Colonial literature was consequently written as often for European readers as for American. It was produced out of necessity rather than leisure, by men and women who wrote because they had some immediate pressing purpose, economic, religious, or political, which could be furthered by writing. Our first concern must be to understand those purposes.

THE ECONOMIC PROMISE

The first and the greatest promise which the New World held out to Europeans was freedom from want. To landless men whose ancestors had been bound for centuries to the soil, America offered room to raise food and clothing, to attain the security of well-stocked barnyards and overflowing granaries. As Captain John Smith put it, "Who can desire more content that hath small means, or but onely his merit to advance his fortunes, than to tread and plant that ground he hath purchased by the hazard of his life." If Americans have always wished to live well—too well, according to those critics who count materialism our foremost national sin—they have come by their desire for an ever higher standard of living quite naturally. Few Europeans *came to America without expecting to improve their economic status.*

Colonial literature is therefore rich in accounts of the economic resources of the New World. The prospective immigrant wanted to know, in as much detail as possible, about his chances to earn a living. He did not always find accurate information, because the books about the colonies were often written by promoters whose evaluations were rosily optimistic rather than sober or cautious. From the explorers, travelers, and settlers, however, as well as from the promoters, there came in the course of time an enormous body of information on the topography, soils, plants, animals, and minerals of the various regions of British America. These writings told what would and would not grow. They paid particular attention to timber, because England needed ship supplies and her great forests were playing out. They commented in detail on game and fur-bearing animals, on fisheries, on the probabilities of mines.

The first selection in the present chapter is from the earliest English survey of what is now a part of the United States—Hariot's *Virginia* (1588). Thomas Hariot was Raleigh's friend and a member of the Roanoke expedition of 1585; his book is not merely the first but also one of the fullest and most accurate prognostications of the various ways in which a living might be earned in the New World. Many of John Smith's writings were of the same nature as Hariot's, and both his *Map of Virginia* (1612) and the *Description of New England* (p. 66) were read carefully by men who were considering emigration. No colony was launched without a similar "Map" or "True Report" of economic possibilities, followed by a local literature of promotion which was in turn succeeded by reports of progress. George Alsop's *Character of the Province of Mary-Land* (p. 97) is an example of this later material. Of the many other books that might be named, the most important are Francis Higginson's *New England's Plantation* (1630), William Wood's *New England's Prospect* (1634), Thomas Morton's *New English Canaan* (1637), John Hammond's *Leah and Rachel; or, The Two Fruitful Sisters, Virginia and Mary-Land* (1656), Daniel Denton's *Brief Description of New-York* (1670), William Penn's *Some Account of the Province of Pensilvania* (1681), Thomas Ashe's *Carolina* (1688), and Gabriel Thomas' *Historical and Geographical Account of the Province and Country of Pensilvania* (1698). These books made it clear that the fundamental needs of food, clothing, and shelter could be satisfied rather more easily in America than in Europe, and they suggested that industry and ingenuity could produce surplus and wealth beyond anything of which the common man in Europe dared to dream.

From the first discovery, indeed, the New World seemed to many a land of marvels, of limitless economic opportunity. The state of mind it created had been germinating over many centuries. The ancients had harbored traditions of wonderful western lands: the Elysian Fields, where happy souls went after death; the Islands of the Hesperides, where golden apples grew; Atlantis, that island continent swallowed up by earthquakes long before the time of

Plato. In medieval times men had written of fabulously wealthy islands—Antillia and O’Brazil—somewhere in the western ocean, and the news had slowly circulated that the Norsemen had found a new, rich western continent called Vinland. These stories, combined with the ineradicable conviction that America was close to the legendary treasures of India, China, and the Spice Islands, had prepared the European mind for wonders, and it was duly delighted with the strange new plants and animals and humans of which the explorers wrote. Anything could happen in this New World.

There were only a few skeptics. Samuel Purchas, for example, in *Purchas His Pilgrimes* (1613), expressed the conviction that America was not so wonderful as some people seemed to think. “For what haue they,” he wrote, “to oppose to our Elephants, Rhinocerotes, Camels, Horses, Kine, &c. Neither are the naturall fruits of America comparable to those of our World. Whence are their Spices, and best Fruits, but from hence, by transportation or transplantation? As for Arts, States, Literature, Diuine and Humane, multitudes of Cities, Lawes, and other Excellencies, our World enjoyeth still the priuiledge of the First-borne. America is a younger brother, and hath in these things almost no inheritance at all, till it bought somewhat hereof of the Spaniards, with the price of her Freedome.” In the eighteenth century there were like-minded men, such as the Comte de Buffon and the Abbé Raynal, who were convinced that the American climate was enervating so that men and beasts degenerated there. Jefferson devoted much effort to refuting them by compiling tables of the comparative weights of European and American animals and by assembling for Buffon, in his apartments in Paris, the skeleton of an American mastodon.

Most Europeans, however, were more than willing to look to America with unbounded optimism, especially when, as often happened, they grew impatient with the state of things in their own civilization. The prevailing temper was that of the English philosopher George Berkeley, who pictured a Muse disgusted with Europe, waiting a better time

In happy climes, where from the genial sun
And virgin earth such scenes ensue,
The force of art by nature seems outdone,
And fancied beauties by the true.

Man was to be better treated by Nature in the western hemisphere. He was, in fact, to rise to new heights, far more impressive than mere economic abundance could attain.

Westward the course of empire takes its way,
The four first Acts already past,
The fifth shall close the Drama with the day;
Time's noblest offspring is the last.

Only the presence of a savage people stood in the way of New World greatness. The Indians, it is true, were not very numerous and, with some exceptions, not very dangerous. Some observers saw the hand of God in the plague which had decimated the New England tribes just prior to the English settlement in that region; others argued that a few heathens should not be allowed to stand in the way of living-room for good, civilized Christians. The prospective settler wanted, of course, to know about the Indians. They were an economic fact to be reckoned with—a possible source of wealth, through trade or conquest, and a probable source of danger, if they resented, as they easily might, the invasion of their hunting grounds by land-hungry Europeans. The Indians therefore have a large place in almost every book which surveyed New World resources. Hariot devoted one fourth of his book to their description. Smith was always anxious to estimate their military strength. It cannot be said that the English always dealt justly with the aborigines; Roger Williams and William Penn were exceptional in their concern about obtaining land by purchase and treaty. Most of the settlers proceeded upon the expedient conviction that the Indians who stood in their path were treacherous and inferior animals to be eliminated with as little compunction as the rattle-

snakes, the wolves, and the bears. The story of the gradual dispossession of the Indians is one of the blackest chapters in colonial annals.

Other than economic considerations appear in the literature about the Indians. Their novelty, the unsettled problem of their origin (were they, for instance, descendants of the lost Ten Tribes of Israel?), their uncanny skill in woodcraft, their strange social and political organization, their stoic endurance of pain and their sadistic pleasure in torture, their heathen faith—all created an interest which amounted to fascination. The Pocahontas legend, whether or not Smith invented it out of whole cloth (see p. 69), epitomizes the tendency to create a "noble savage." There developed in connection with the Indians the attitude known as primitivism, the glorification of the unspoiled simplicity of the "uncivilized." Primitivism was in the main based upon objection to the complexities and maladjustments of European life. In the colonial period it is more common in the books of Europeans than in those written by persons who had actually been in contact with the savages, although Morton's *New English Canaan* is a notable exception. Later, in the eighteenth century, primitivism appeared in the poems of Freneau (p. 436), the essays of Crèvecoeur (p. 283), and the *Travels* of William Bartram (p. 118). It continued well into the nineteenth century and is an essential part of the philosophical background of Cooper's Leather-Stocking tales (see p. 586) and Longfellow's *Hiawatha*.

Colonial literature also records the economic processes by which simple home industries were gradually supplanted by a more specialized industrial life. The references to mining and ironworks in the writings of John Winthrop (see p. 82) and William Byrd (see p. 110) suggest something of the beginnings of industrialization, which was not to become general, of course, until many years after political independence had been achieved.

Most of us will agree that the New World fulfilled its economic promise. Like the man in the folk tale whose three wishes were fulfilled, but never quite as he expected them to be,

the first Americans did not attain freedom from want as effortlessly as some of them had expected. They had to learn patience and thrift and the most efficient use of their vast new environment, and, as we shall see in a later chapter, they had to adjust themselves to other than merely local circumstances. But attain it they did, in good measure, and colonial literature reveals both the nature and the realization of their desires.

THE RELIGIOUS LIFE

Next to getting a living, the chief concern of great numbers of the colonists was religion. Some of them, indeed, regarded the saving of souls—their own and those of other people—as the most pressing matter of existence. To understand the men and women who established the pattern of American life we need to know with some precision their religious and theological background and its reflection in literature.

The first thing to remember is that most of the colonists, whatever their church, were keenly aware of the Reformation. The Bible had been in the hands of Englishmen, in their own language, only since 1535, and to most of them it was a fresh and inexhaustible revelation of the will of God. The persecutions of the reign of Queen Mary, the fear of a Spanish invasion (which it was believed would have been swiftly followed by an Inquisition in England), the memory of the Gunpowder Plot of Guy Fawkes, the vexed problem of the royal succession, and the endless series of debates about church government and ritual—all were as close to the English in the early seventeenth century as the events of the period since 1865 are to present-day Americans.

The earliest attempts to colonize reflect the rivalry between Catholics and Protestants. Both Harriot and Smith emphasized the heathenism of the Indians, implying that it was the sacred duty of the English to convert them to the true faith, that is, to Anglicanism, before they could be led astray by the Catholic Spaniards or French. Obviously, however, the settlers who came to America with any such altruistic intentions were few and far between.

Six English colonies—Plymouth, Massachusetts Bay, Maryland, Rhode Island, New Haven, and Pennsylvania—were nonetheless founded by religious groups or leaders to whom economic considerations were clearly secondary. Why this was the case can be understood only by reference to the peculiar circumstances of the Reformation in England.

Between Henry VIII's break with the Pope and the end of the reign of Queen Elizabeth, the Church of England had arrived at a *status quo* justly described as moderate Protestantism. The break with Rome was complete. The ruler was the acknowledged head of the English Church; monastic orders had been abolished and most of the lands accumulated over the centuries by the Church had been nationalized; church services were held in English rather than in Latin; and the people had been provided with the English Bible and the English *Book of Common Prayer*. On the other hand, much that seemed "papist" to the more extreme Protestants remained—the hierarchy of parish priests, bishops, and archbishops, intimately connected with the structure of the civil state; richly ornamented churches and vestments; and set forms of prayer and worship.

English dissent consisted of innumerable groups and individuals who believed that the Reformation had not gone far enough. Some wanted to remove all vestiges of Catholic practices and rituals, placing more emphasis upon the sermon and the Bible as the chief means of bringing souls to Christ—these were ordinarily called Puritans. Others desired to substitute a measure of lay control for the system of benefices, bishops, and archbishops—they were the Presbyterians. Still others wished each congregation to decide for themselves what form of worship they were to follow—these were the Separatists, Independents, or Congregationalists, also sometimes called Brownists, after their first spokesman, Robert Browne (1550?-1633?). In addition, there were many shades of opinion regarding the proper forms of worship and the most desirable form of church government. With the passage of time differences of opinion about these matters multiplied rather than diminished.

The Anglican leaders sought continuously to enforce conformity to the *status quo*. As early as 1604, James I, speaking of the Puritans, announced, "I shall make them conform themselves or I will harry them out of the land, or else do worse." With the accession of Charles I in 1625 the more militant bishops had the support of a king with absolutist leanings, and unremitting efforts to insure conformity began. Under William Laud, Bishop of London from 1628 until 1633, and thereafter Archbishop of Canterbury, Primate of England, until his execution in 1645, clergymen who failed to follow the prescribed forms of worship were brought into church courts, tried, and punished. most often (as in the case of Thomas Shepard, p.127) by being forbidden to exercise any clerical functions. Among them were many of the men who became the leaders of the New England colonies.

The Pilgrims who came to Plymouth were Separatists. Some of them had emigrated to Holland, found the atmosphere there too "foreign" for their taste, and determined to settle in America. They were poor and would not have been able to make the voyage in the *Mayflower* had not the necessary capital been provided by a group of "merchant adventurers" of London. William Bradford (p. 73) was the mainstay of the settlement and church which they founded in Massachusetts. In 1692 Plymouth became a part of the Province of Massachusetts Bay.

The Puritans of the Massachusetts Bay Company came to New England only when it became clear that reform within the English Church was impossible. They took care to bring their charter with them, and they intended to establish a state in which the kind of church they wanted might thrive. In contrast to the Pilgrims, they were wealthy and well-educated, many of them being substantial property-owners or professional men, university-trained as was their governor, John Winthrop (p. 80). Furthermore, they were numerous; between 1628 and 1640 there was a constant stream of immigrants. Not all of them were as earnest in their religion as Winthrop and the ministers, but Bay Colony leadership was shrewd.

Social, political, and educational institutions were so securely established that no study of the genesis of American life can ignore the Puritan tradition. Before the Puritans had been long in New England, they agreed upon a form of church government which was partly Congregational, partly Presbyterian—the *Cambridge Platform* of 1649. By that time the Westminster Assembly had effected changes not wholly dissimilar within the Church of England, although they were to be largely annulled by the Restoration in 1660.

Puritanism, however, was more than an attitude toward forms of worship and church government. It was then, as it is now, a word used to describe a strait-laced way of life, a concern with moral conduct so great as to lead some individuals to attempt what we now think of as unwarranted control of the personal lives of their neighbors, a rigid repression of sins and fashions that are now thought venial. Such was Puritanism at its worst. At its best it provided men with a sense of social responsibility, an earnestness about life which had in it both intellectual conviction and intense, sometimes even mystic, piety.

Underlying Puritan earnestness was Calvinism, a stern and legalistic theology constructed by the Genevan reformer, John Calvin (1509-1564). Calvinism portrayed God as a sovereign whom man, in the person of Adam, had disobeyed, thereby breaking an inexpressibly sacred and solemn covenant. Upon Adam and all his race retribution had justly fallen. Through Christ, however, man had been given a second chance, although that chance was extended only to those men whom God had "elected" to be saved. Most men were predestined to damnation, as they deserved. Although one could never be wholly sure of being among the fortunate few for whom salvation was foreordained, life was to be lived in a search for the divine will, as it might be expressed in one's own struggle for serenity, through one's spiritual growth, or as it might be interpreted from events in the external world. To walk uprightly in the sight of God, and to seek to follow His will—these were the aims of the Calvinist and the origin, as has often been remarked, of the "New England conscience."

Calvinism was the dominant theology of the entire colonial period, and it survives to some extent in the formal creeds of most Protestant churches other than the Lutheran. Non-Calvinists have always found it "harsh," chiefly because of its humiliating picture of human nature as utterly corrupt, regenerable only by the grace of God. In its defense two things may be said: it is not difficult for anyone except the blindest optimist to observe unpalatable depths of cussedness in human beings, and it is evident that to some individuals (see, for example, Edwards, in his "Personal Narrative," p. 162) the Calvinistic glorification of God gave an exhilaration and a direction to life which few faiths rival.

From the first Calvinism had its opponents. Of the many that might be described, four are so important to the student of literature that their description is a necessity. These four—Antinomianism, Arminianism, Quakerism, and Deism—had one thing in common: they granted human nature a more dignified place than the Calvinists were willing to grant it. Otherwise they were most dissimilar. Antinomianism and Arminianism were merely theological positions, not necessarily connected with a particular church any more than was Calvinism itself. Quakerism was and is the doctrine of a religious society, the Friends, theologically not very far removed from Calvinism. Deism was neither theology nor a church, but a philosophical position, a state of mind.

Antinomianism has approximately the place in religion that anarchy has in politics; that is to say, it is the denial of any authority beyond the individual. The Antinomian controversy which shook the Bay Colony to its foundations in 1636 and 1637 ended with the banishment of Anne Hutchinson for spreading, among other heresies, the doctrine that God revealed Himself directly to individuals, so that one could know whether or not one was of the "elect." Such thinking challenged both the Calvinistic concept of the Bible as God's final revelation and the social control which was basic in the thought of such leaders as Winthrop.

Arminianism takes its name from the Dutch theologian, Jacobus Arminius (1560-

1609), who held that one could achieve salvation in part through "good works," that is to say, through living a moral and upright life. It was regarded by the Calvinists as derogatory to the sovereignty of God and was one of the "errors" which Edwards was most anxious to refute in his *Freedom of the Will* (p. 182). When the evangelical preachers of the eighteenth century took religion to the masses of the people, "good works" formed a far more concrete appeal than more abstruse theology, and the Methodist movement particularly became deeply tinged with Arminian thought.

Quakerism is the only one of the many radical Protestant opinions of the seventeenth century which has continued in its original form to be influential to the present day. The folk who first called themselves "Children of Light" and, later, the Society of Friends, organized under the leadership of George Fox (1624-1691) in the late 1640's. Their popular name was given them in jest, after Fox had asserted that even magistrates would come to "tremble before the word of the Lord." The Friends believed that the duty of man is to follow the Bible and the "inner light," that "pure wisdom" which comes from above. With a quietistic listening for the "openings" from God they combined the social control of "speaking out" in meeting, by which the promptings of the inner light were communicated to and passed upon by other Friends—a control which preserved them from the Antinomian lawlessness. They believed that all men are brethren, that all violence (and especially war) is evil, that worldly distinctions of class and dress are meaningless, that the taking of oaths is blasphemous. They had no professional clergy, and they tended to distrust higher learning. Bitterly persecuted in New England as late as 1677, they established themselves in New Jersey and Pennsylvania, where they became a powerful force for the abolition of slavery and for social reform of many varieties. They produced relatively few writers (for the greatest of them, John Woolman, see p. 298), but their equalitarianism and humanitarianism have always been influential in American life. Whittier was their chief spokesman in nineteenth-century American litera-

ture, but the Quaker influence may easily be discerned in the work of Walt Whitman and many lesser figures.

Deism is ordinarily dated from the writings of the English philosopher Lord Herbert of Cherbury (1583-1648). Herbert approached the problem of religion from a purely rational point of view, similar to what we would now call the comparative method. He found that in all ages and in all times, whether pagan or Christian, men had agreed on five axioms: (1) that there is a God; (2) that He ought to be worshiped; (3) that piety and virtue are the essentials of worship; (4) that man ought to repent his sins; and (5) that there are rewards and punishments in a future life. Veneration of the Bible as the revelation of God is wholly absent from this rational conclusion, and it is the rejection of revelation which is the distinguishing mark of Deistic thought. In the latter part of the seventeenth century, rationalism spread rapidly, in part as a result of the scientific advance, and there was widespread acceptance of the Deistic view that religious truth could be obtained by the use of reason. Although the Deistic controversy was primarily an English affair, Increase and Cotton Mather were attacking the Deists before the end of the century, and Edwards' *Divine and Supernatural Light* (p. 172) would scarcely have been written had it not seemed important to refute the Deistic emphasis upon the place of reason in religion. The best-known Deistic work by a colonial American is Benjamin Franklin's *Dissertation on Liberty and Necessity, Pleasure and Pain* (1725), which its author accounted an "erratum" (see p. 244). No reader of Franklin's writings will be long in doubt, however, of his fundamental agreement with Lord Herbert of Cherbury. The Deistic principles of many of the leaders of the Revolution, including Washington, Jefferson, Hamilton, and Ethan Allen, lend credibility to the picture of an American "cult of reason" in the late eighteenth century, but that, together with the mare's nest stirred up by Thomas Paine's *Age of Reason* (1792), must await discussion in another chapter.

Toleration and revivalism, perhaps the most characteristic features of American religious

life, also have their origins in the colonial period. Both are still, after all these years, matters for the thoughtful concern of every American.

Roger Williams (p. 136) founded Rhode Island in 1636 as a tiny island of refuge for "heretics" like Anne Hutchinson and the Quakers. He was far ahead of his time, for not until the chartering of Pennsylvania in 1681 was there a second colony ready to receive all victims of religious persecution. Maryland, to be sure, passed a Toleration Act in 1649 as a protection for the Roman Catholics, but Jews and Unitarians were not desired. George Alsop's comments on the situation in Maryland (see p. 98) are worth examination in this connection. The American colonies, some of them none too willingly, bowed to the provisions of the Toleration Act passed by Parliament in 1689, and thereafter the principle of religious freedom was given at least lip service. Nonconformists to the dominant pattern of religious life were by no means safe, however, although in later years anti-Catholic, anti-Semitic, and anti-this-and-that feeling is usually explainable in part by economic competition.

Revivalism, while not wholly native, has probably never flourished elsewhere so consistently as in America. Its origins are to be sought in the religious situation of colonies founded by earnest and pious folk who saw their children slipping away from the faith as life became easier and more secular. This situation developed in New England shortly after 1650 and is signalized by the adoption of the Half-Way Covenant of 1662, which admitted the children of church members to church membership (although not to communion) without the previously required confession of "religious experience." For most of the sixty years thereafter New England clergymen seized upon every possible opportunity to expound the decadence of religion, the necessity of a return to the ways of the founders, the dangers of apostasy, and the innumerable evidences of divine disfavor in comets, witchcrafts, earthquakes, fires, and storms. Mrs. Knight's *Journal* (p. 101) is evidence of the trends which were viewed with alarm in Samuel Sewall's *Diary* (see p. 90) and in innumerable writings by the Mathers.

Cotton Mather's *Magnalia Christi Americana* (p. 149) is the best known complaint of the decline of religion and the diminishing influence of the clergy.

After 1720, however, religion was reinvigorated by what is known as the "Great Awakening," widespread revivals which reached the younger folk and the lower classes in all the colonies. Through the awakening, religion found new leaders and a somewhat broader base; it became perceptibly less intellectual and more emotional. The revivals are believed to have begun with certain Dutch Reformed churches of New Jersey in the 1720's; they soon afterward appeared in the Scotch-Irish Presbyterian churches of Pennsylvania; by the 1730's they had arrived in New England, where Edwards was soon absorbed in their strange phenomena. Six times between 1729 and 1770 the colonies felt the impulse of the preaching of George Whitefield (1714-1770), an English evangelist who had been associated with the Wesleys in the development of Methodism. Whitefield, who had the advantage of Calvinistic convictions, preached to vast crowds, often out of doors, and invariably aroused great enthusiasm. The Baptists and the Methodists also extended their ranks through highly successful revivals, particularly in the Southern colonies, in the decades just before the Revolution.

The literature relating to revivalism is enormous; one scholar estimates that there are more than thirty-five thousand separate pieces which refer to the awakening. Best known, probably, is Edwards' *Some Thoughts concerning the Present Revival of Religion in New England* (1742) and Charles Chauncy's answer thereto (p. 185).

The effect of revivalism was to make religion more the personal concern of the common man than it had been before, and it is not an accident that its development coincided in time with the spread of a humanitarian concern for the poor and the unfortunate. It has remained characteristic of American Protestantism, although often frowned upon by settled clergymen and the higher economic levels of society. The objections of Chauncy can still be applied to

and meetings, tent revivals, and the thousand and one varieties of missions and tabernacles which dot the streets of the larger American cities. The value of revivalism is a debatable question which each individual must answer for himself. Doubtless it has tended to divide churches and has lent itself to the self-seeking of unscrupulous evangelists. On the other hand it has kept its appeal through recognition of the importance of emotional release. Religion does not appeal to the rational mind alone.

COMMONWEALTH-BUILDING

A third great concern of the colonists and theme of colonial literature, intimately connected with the economic and the religious, is the political "new deal" which the New World promised. Americans were thinking, from the first, of the possibility of a new kind of state.

John Smith was not alone in observing a parallel between Europe in his time and the declining years of the Roman empire (see p. 67). Although England had become a great and strong nation under Queen Elizabeth, there seemed to be more distressing poverty, more selfish wealth, more injustice and social unrest than there had ever been before. We can now see that feudalism was disintegrating slowly, that hereditary and class privileges had survived longer than serfdom, and that capitalism had not provided men with sufficient social responsibility. Smith is clear enough in his conviction that "rich men for the most part are growne to that dotage, through their pride in their wealth, as though there were no accident could end it, or their life." In America, a land of greater plenty, he believed that merit and industry might find their fair rewards and that all men might work together for the common weal.

Smith's frequent use of the word "commonwealth" is significant, for to his generation a commonwealth was a state in which all citizens—not merely a few—had an interest in the government. This is not to say that Smith was a democrat, for he was not. He vaguely expressed the general dissatisfaction of his time with the political *status quo*. The Renaissance was the age in which American political philosophy was born. Men were dreaming of

an ideal commonwealth, as they had not been dreaming since Plato in the fourth century B.C.

The political climate of opinion of the age of geographical discovery is suggested by More's *Utopia* (1515-1516) and Bacon's *New Atlantis* (c. 1617). Their dreams of a new society were paralleled by the nostalgia of the primitivists, who looked back to a Golden Age in which men lived in amity, untroubled by such bickerings as those produced by the Reformation and the new national rivalries. Talk of a "brave new world" was in the air, and it was not silenced by American experience. So many folk were thinking of a better state that Shakespeare, in *The Tempest* (c. 1610), created an "honest old counsellor," Gonzalo, whose satirical remarks are worth recalling:

I' th' commonwealth I would by contraries
Execute all things; for no kind of traffic
Would I admit; no name of magistrate;
Letters should not be known; riches, poverty,
And use of service, none; . . .
All things in common nature should produce
Without sweat or endeavour; treason, felony,
Sword, pike, knife, gun, or need of any engine,
Would I not have, all foison, all abundance,
To feed my innocent people. . . .
I would with such perfection govern, sir,
T' excel the golden age.

At least eight American colonies—Plymouth, Massachusetts Bay, Maryland, Rhode Island, New Haven, Carolina, Pennsylvania, and Georgia—show traces of their founders' thinking in terms of an ideal commonwealth. In most of them religious and economic motives were

also involved, but these, too, have their place in the history of political experimentation. The communistic beginnings of the Pilgrims (see p. 76), the theocracy of Massachusetts Bay and New Haven, the toleration principles of Rhode Island, Maryland, and Pennsylvania, John Locke's "ideal" constitution for Carolina, and James Oglethorpe's notion of a refuge for debtors in Georgia—all had political implications. The most discussed experiment is that of Massachusetts Bay.

The full story of the transformation of the dream of an ideal commonwealth into the workaday institutions of British America, not ideal but on the whole far less aristocratic than those of Europe, is highly involved. We should remember, however, that colonial literature reflects at least three processes or developments: (1) the familiar pattern of transplantation and adaptation, in this case of English political and legal institutions; (2) the relative freedom from interference which was the result of unsettled problems of political authority in the mother country; and (3) the growth of democracy and local control, usually attributed to the influence of Separatism, which trained humble folk to share in church government.

All are well illustrated in the picture which Winthrop gives us (p. 81) of the conflict between aristocracy and democracy in the Bay Colony. The aim of Winthrop and his companions was to found a theocracy, a state of which the head should be God, the fundamental law His word, the Bible. They wished a Bible commonwealth in which civil authority should contribute in every possible way to the welfare of the Puritan church. As John Eliot said, in *The Christian Commonwealth* (1659), "there is undoubtedly a form of Civil Government, instituted by God himself in the holy Scriptures"—a conviction which, rather than any statutory provision, accounts for the leadership of the clergy in the seventeenth century. The magistrates consulted the "elders," that is, the ministers, in every important debate on policy. But Winthrop had too much of the lawyer's respect for statute and for precedent to throw overboard the common law and the example of England, and it was not long before

Massachusetts had a bicameral legislature and a legal code drawn, not from the Bible, but from experience. Because the Bay Company founders had the foresight to bring their charter with them, their government survived the chaotic conditions of the Civil War in England. The independent attitude of the town of Hingham, moreover, shows the early strength of the ideal of local autonomy in an era which had adopted a modified form of Separatism.

Bradford and Williams reveal in their writings much the same background. From Plymouth, the original Separatist community, we have the *Mayflower Compact* (see p. 76), earliest of American written constitutions and, like Winthrop's speech on liberty, a reflection of the development of Calvinism which is called "Covenant" or "Federal" theology. In it the Pilgrims agreed to "solemnly and mutually in the presence of God, and one of another, covenant and combine our selves together into a civill body politick, . . . and by vertue hearof to enacte . . . such just and equall lawes . . . as shall be thought most meete and convient for the generall good of the Colonie, unto which we promise all due submission and obedience." The *Compact* has a well-deserved distinction, and every American will do well to review occasionally its significant phrases. It was Separatism, too, which led Williams to assert his doctrine that the power of the civil state must not serve the purposes of a single church (p. 138). Other colonies copied the idea of a social compact, and other colonies came gradually to recognize the value of toleration.

The conflict between the ideal of government by the few and the ideal of government by the many runs throughout American literature. In the colonial time it is to be seen in a vast body of writings relating to the theocracy in Massachusetts and the various attempts of men like Cotton Mather to return to the "New England Way." The belief of the ruling classes that things were not going well may be felt in Sewall's *Diary* and Mrs. Knight's *Journal*—the common people were often rowdy and obstreperous. William Byrd felt much the same way about the North Carolinians (p. 107). Occasionally the common man

found a defender, of whom the most notable was John Wise (1652-1725). In his *Churches' Quarrel Espoused* (1710) and *Vindication of the Government of the New-England Churches* (1717) he blasted a Mather-sponsored effort to give the clergy greater power. Wise's works had important political implications and were widely quoted when the Revolution called forth all the ammunition that could be collected.

The colonies did not achieve the ideal commonwealth, but they present a consistent picture of an effort to serve the common interest of all, according to the lights of the men who led them. "Their Cheif Red Letter day," Mrs. Knight said truly of the inhabitants of Connecticut, "is St. Election, which is annually Observed according to Charter, to choose their Governor; a blessing they can never be thankfull enough for, as they will find, if ever it be their hard fortune to loose it."

SUPERSTITION and SCIENCE

The reader of colonial literature cannot fail to notice that most writing of the era is punctuated with "It pleased God" and "a special providence of God appeared"—recognitions of the immediate concern of the Deity for His universe and His people. Although most conspicuous in the historical works and diaries of the Puritans, these expressions may easily be found in the reports of such hard-bitten gentlemen of fortune as John Smith.

In Bradford, Winthrop, Sewall, and Mather, however, such references are often accounted superstitious by latter-day readers, who live in a world wherein the uninterrupted order of nature is taken for granted and a scientific world-view prevails. We need to reflect briefly, therefore, upon the place of science in the thought of colonial Americans, especially when we encounter Sewall's comment (see p. 92) on Mather's pulpit exposition of the Copernican hypothesis: "I think it inconvenient to assert such Problems."

The age unquestionably accepted the providential order of nature, a world in which the Lord intervened not merely to mark the sparrow's fall but to reward and punish in

accordance with His inscrutable ends. Before scorning this acceptance as sheer superstition, we should consider how often we moderns fall back upon "luck" or "fate" or "accident" to account for the puzzling and inexplicable turns of events which we all encounter. Things happen to all of us which no amount of foresight or care can help us avoid. Belief in divine intervention had the advantage of giving direction to men's lives, however much we may question the results of the Puritans' incessant search for an understanding of the divine will.

What we must not conclude too easily is that the seventeenth and eighteenth centuries were deliberately unscientific. On the contrary, they were the age of Bacon, Boyle, Descartes, Newton, Laplace, and many other first-rank scientists, whose search for truth was emulated, although not of course with such brilliant success, on this side of the Atlantic. Benjamin Franklin was not the first American to study natural phenomena.

Colonial literature shows both a persistent scientific curiosity and the universal economic motive for the investigation of nature. Hariot impressed the Indians with mathematical instruments, the lodestone, and spring clocks (see p. 60), and Smith fascinated Opechakanough with his sign-language exposition of astronomy and geography (see p. 70). Both men, moreover, classified and described natural phenomena in accordance with the best methods at their command, as did their innumerable successors among the travel writers and promoters. Bartram was a skilled botanist. Bradford, as likely as anyone to perceive the hand of God in all events, found room to "leave it to naturallists to judge" the value of his hypothesis of the results of earthquakes, and did not find his view of providence inconsistent with the search for natural causes for the immoralities of 1642 (p. 79). Byrd's journals abound in medicinal, botanical, and zoological observations; both he and Cotton Mather were members of the Royal Society of London and contributed to its *Philosophical Transactions*, the foremost scientific periodical of the age.

There is abundant evidence, in short, that the sense of the nearness of God and the operation of His providence did not outlaw the study of nature. Sewall's "inconvenient" was probably not the expression of opposition to scientific knowledge, but the not uncommon feeling that science and religion ought not to be mixed. Despite the dominance of theology, actual distrust of science is rarely encountered in the colonial era.

THE FINE ARTS

Painting, sculpture, music, and architecture, which now lend much to the richness of life and literature, were of relatively little interest to the colonists and are mentioned only seldom in their writings. We need not review the details of their beginning, but we should remember that they existed and that they manifested both the invariable pattern of transplantation and adaptation and the dominance of religion in the daily life of the people.

Painting was devoted almost exclusively to the portraiture of much-loved clergymen or the members of well-to-do families. There were portraits painted in New England as early as 1641; one of the best known is that of Samuel Sewall made by a native amateur sometime before 1730. The first portrait engraving known to have been made in the British colonies was a woodcut of Richard Mather dating from 1670; the first line engraving on copper, a portrait of Increase Mather made about 1701; the first mezzotint for framing, a portrait of Cotton Mather made in 1727.

Sculpture was confined, prior to the nineteenth century, to the carving of angels, death's-heads, and other devices upon tombstones, and, if it is admitted as sculpture, to carving in wood. This is not so insignificant as it may sound, for the visitor to colonial graveyards often comes away with a clearer notion of our ancestors' surprising fearlessness of death.

Music at first consisted of the singing of psalms, in which the Puritans took great pains. The first book published in America was the famous *Bay Psalm Book* (1640). The historians of music make much, also, of the instrumental performance of religious compositions among

the early German settlers in Pennsylvania. Secular music was rare before the Revolution, even in the South.

Of all the arts, architecture is most closely related to the life of the people, and, together with such crafts as weaving, dyeing, silverworking, and cabinetmaking, it is most interesting to the student of colonial civilization. Houses and their furnishings were made by craftsmen without the guidance of architects and decorators, and ordinarily with native materials. The styles of the Old World were carried over and adapted to the new materials and climates with such variety as might be expected in a people drawn from all the corners of Europe. In architecture, to take a single example, such eclecticism was produced as may be observed by a half-hour's stroll through any modern subdivision. Here may be found the architectural legacies of the half-timbered gables of Renaissance England, the multiple-flued chimneys of the Jacobean era, the small, slanting dormer windows of Dutch New Amsterdam, the stuccoed walls of Spanish St. Augustine, and innumerable other importations. But it is the steepled church, perhaps, which is the most characteristic production of colonial America, where men admired or remembered the many London churches built by Sir Christopher Wren after the Great Fire of 1666.

THE CIRCUMSTANCES of LITERARY PRODUCTION

In addition to a knowledge of the intellectual and social backgrounds of colonial times, we need to have some conception of the circumstances of literary production in the years before 1765, for the state of printing and the book trade often determines the status of literature. Among the factors which merit examination are the extent of literary connection with Europe, the spread and quantity of printing, the place of periodicals, and the nature of the reading public.

As we should expect, the greater number of important books written by or relating to the colonists were published in Europe. Of those represented in the following pages,

the works by Smith, Alsop, Peters, Shepard, Williams, and Anne Bradstreet were all first printed in London, as was Cotton Mather's *Magnalia*. Bartram's *Travels*, Mather's *Wonders of the Invisible World*, and Edwards' works were all reprinted quickly in Great Britain. The colonial author wrote not merely for his neighbors but for the larger world. In many cases he found a more sympathetic audience abroad than at home.

For a time it would have been impossible for books to be published in the colonies, and it was always difficult. Printing was established in Massachusetts in 1639, in Maryland and Pennsylvania in 1685, in New York in 1693, and in all of the other original colonies before 1763. It was based usually upon the necessity for copies of the laws and other public papers. Almanacs, school textbooks, legal and business manuals, newspapers, and other useful but scarcely literary productions accounted for the bulk of the work. Lengthy books were expensive to manufacture, and very few of them were printed in the colonies. Sermons, pamphlets, and small volumes of poems were fairly common. One very common practice for those who admired a particular sermon was to subsidize its printing and then distribute copies to appreciative friends, as Samuel Sewall liked to do. Such distribution of a funeral sermon was evidently regarded as a suitable memorial to departed relatives. Much of the material was reprinted from English editions. There is reasonably good evidence that the proportion of theological literature was greatest in New England, that of belles-lettres and political literature greatest in the middle colonies, and that of legal literature greatest in the South. In general, the production of the colonial printers was strongly utilitarian. Of the books represented in the present chapter only eight—Bartram's *Travels* (not really a colonial imprint, since it appeared in 1791), Cotton Mather's *Wonders of the Invisible World* and *Manuductio ad Ministerium*, Edwards' *Divine and Supernatural Light* and *Freedom of the Will*, Chauncy's *Seasonable Thoughts*, and the second edition of Anne Bradstreet's poems—were printed by American workmen. Evidently it was not easy for colonial authors to rush

into print. The book-buying public was relatively small; the average edition of books and pamphlets in the early part of the eighteenth century was probably between three and five hundred copies. As a matter of fact, much of what we now read as colonial literature, including the works here printed from the pens of Bradford, Winthrop, Sewall, Mrs. Knight, Byrd, and Edward Taylor, was not even in print before 1765.

Newspapers, although they were unknown for a large part of the period, constituted the staple work of colonial printers by 1750. *Publick Occurences*, which appeared at Boston in 1690, was suppressed after a single issue, so that the *Boston News-Letter*, established in 1704, is usually regarded as the first American newspaper. Other important early newspapers include the *American Weekly Mercury* of Philadelphia (founded 1719), the *New-England Courant* of Boston (1721), the *New York Gazette* (1725), the *Maryland Gazette* of Baltimore (1727), the *Pennsylvania Gazette*—Franklin's paper and the best of colonial newspapers—(1730), the *South Carolina Gazette* of Charleston (1732), and the *Virginia Gazette* of Williamsburg (1736). Most of these papers were of very modest size at first, and it was many years before there was much space for literary material. Sometimes, as in the case of James Franklin's *New-England Courant*, a printing-shop became the center of an informal club of literary-minded gentlemen, and Benjamin Franklin used the *Pennsylvania Gazette* to promote the cooperative and political ends which he so often had in mind. Gradually newspapers began to find room for letters to the editor, political articles, discussions of science and technology, even familiar essays and poems. None of the selections in the present chapter, however, had a newspaper origin. Magazines were even less significant than newspapers, although both Benjamin Franklin and his chief rival, Andrew Bradford, issued short-lived magazines in imitation of London periodicals in 1741.

The colonial printer was often postmaster and bookseller as well. Many books were imported, and as time went on, their distribution was accomplished by peddlers and auctions

as well as by bookshop sales. A few of the more ambitious books were sold by subscriptions obtained before they were actually printed. All in all, it seems certain that most readers, like most serious authors, looked abroad for their literary life.

American traditions about censorship and control of the press had their beginnings in this time. There are incidents of action against printers by governors or councils throughout the period, but it seems probable that the colonial press was as free or even freer than that of England. As early as 1696 a Massachusetts jury refused to convict a printer for publishing a work which had offended the officials and the clergy, and in 1735 the famous trial of Peter Zenger in New York enhanced the precedent that libel laws were not to be readily used to suppress freedom of speech and freedom of the press. By the beginning of the Revolutionary period the colonial press was in a position to play what from some points of view may be regarded as a decisive part in the drama of political action.

T.H.

II. Literary Trends

Moses Coit Tyler, in his *History of American Literature, 1607-1765* (1878), classified colonial books in two groups: those written for English readers and those composed for the Americans themselves. In the former group he perceived six types of material: (1) books whose purpose was to send home tidings of "welfare or ill fare"; (2) those written to appeal legal or financial matters to superior tribunals in the homeland; (3) apologetics, designed to defend the colonies against injurious aspersions by their enemies; (4) those writings particularly devoted to the Indians; (5) "descriptions of nature in America"; and (6) accounts of gradual innovations in politics, laws, creeds, and religious and domestic usages. Among the writings composed for the colonists themselves he found four types: (1) sermons and

other religious treatises; (2) histories; (3) poems; and (4) prose with miscellaneous purposes.

Tyler's classification is still useful, but its fundamental distinction violates a conviction of later scholars that the colonists seldom wrote merely for themselves. As we turn now to the problems of literary forms and excellence, we can describe the bulk of colonial writings under seven classes. The principle of division is still that of content, but we shall consider particularly the structural problems which faced colonial writers, and their solutions in: (1) accounts of voyages; (2) promotion tracts; (3) sermons; (4) polemical tracts and treatises; (5) histories and biographies; (6) diaries and autobiographies; and (7) poems. The absence of plays and novels in colonial America also requires brief explanation.

ACCOUNTS of VOYAGES

The simplest in structure of the literary types common in the colonies was the account of a voyage, from which developed the later literature of travel. This was at first a plain narrative, usually written by a plain man with few literary graces. Its organization was chronological, and the writer merely amplified, from memory, notes, or a journal, the events he had experienced, expanding whenever his own interests or those of his prospective readers seemed to demand it. The letter in which Columbus reported his first voyage of discovery is a good example; another is John Brereton's *Briefe and True Relation of the Discoverie of the North Part of Virginia* (1602), the earliest English account of the New England coast. The type prevails in the great collections of voyages which were edited by Richard Hakluyt, Samuel Purchas, and John Harris (*Collection of Voyages and Travels*, 1705). Although written to provide information, the account of a voyage was seldom impersonal and sometimes achieved a sharpness of effect and a charm scarcely excelled by polished literary art.

Mrs. Knight's *Journal* adapts the type quite naturally to a land journey, as do Byrd's

"Progress to the Mines" and Bartram's *Travels*. Byrd's two versions of the *History of the Dividing Line* (pp. 105 and 106) show how readily miscellaneous information could be inserted in the loose framework of a travel narrative.

Travel literature forms one of the largest classes of American books. It is closely related to the economic motive in colonization, but it still lends itself readily to comment on social life and customs, on personalities, and even to sheer entertainment.

PROMOTION TRACTS

The writer of the promotion tract almost invariably had to struggle with a topical arrangement. He had to make some division of his material so that he could generalize attractively about the resources of the region he was describing. He was not always familiar with his material; he could make only limited use of narrative; and he needed to appear judicious and relatively impersonal. Promotion tracts therefore vary somewhat in structure, according to the different solutions of the problems.

Hariot wisely followed his main interest—economic resources—in his account of Virginia. First he described commodities already found or raised in Virginia in quantities sufficient to be marketable: useful plants, minerals, and furs. He then listed commodities known to be sufficient in quantity to sustain life: grains, vegetables, fruits, game animals, fowl, and fish. A third section listed miscellaneous commodities and included his account of the Indians.

Smith's *Description of New England* (p. 66) and *Map of Virginia* (1612) employed a far more common structure. They begin with the general geographical features and then describe the climate, winds, soils, rivers, settled places, plants, animals, birds, fish, minerals, and Indians. The *Map* is the more consciously organized; in his *Description* Smith himself realized that his enthusiasm had carried him away, and at one point asks his readers to return a little with him, adding that he is not "sufficiently yet acquainted in those parts, to write fully the estate of the Sea, the Ayre, the Land, the Fruites, the Rocks, the People, the Gouvern-

ment, Religion, Territories and Limitations, Friends and Foes: but as I gathered from the niggardly relations in a broken language to my understanding, during the time I ranged those Countries." It will be noted that Smith had a list of topics, arranged in an order proceeding from the general to the particular. This systematic approach he probably derived from the geographical literature of the day, which in turn is a reflection of the almost invariable approach of the medieval schoolmen to the study of the external world.

When the works of Aristotle were the highest authority in science, they were studied according to a settled system. One began with the *Organon* and the *Physica*, which deal with logic and the general properties of natural bodies; next came the *De Caelo*, a description of the heavens; next the *De Generatione et Corruptione*, which treats the four elements—fire, water, earth, and air—and their various combinations and interactions; next the *Meteorologica*, which describes the various processes of change in the elements; next various discussions of "perfectly mixed" bodies and "imperfectly mixed" ones, inanimate (stones, metals, and minerals); and finally the *De Anima* and the *Historia Animalium*, descriptions of animate bodies (plants and animals). After that one came to the study of man.

Many promotion tracts besides Smith's were based ultimately upon this tradition, for it was the topical arrangement most familiar to educated men. Francis Higginson's *New England's Plantation* begins with the following statement: "And because the life and well-fare of euerie Creature here below, and the commodiousnesse of the Countrey whereas such Creatures liue, doth by the most wise ordering of Gods prouidence, depend next vnto himselfe, vpon the temperature and disposition of the foure Elements, Earth, Water, Aire, and Fire. . . . Therefore I will indeauour to shew you what *New-England* is by the considerations of these apart, and truly endeauour by Gods helpe to report nothing but the naked truth." Wood's *New England's Prospect* proceeds from the general to the particular, but Morton's *New English Canaan* varies that order somewhat.

Although the careful reader will discover many minor variations, the general outline of the promotion tracts is remarkably consistent. They are, of course, a large class in colonial literature. Closely related to them are the "progress reports" sent back to the folk at home by actual settlers. They have a somewhat larger proportion of narrative, but are not greatly different. George Alsop's account of Maryland is a good example of this development, and numerous other titles have already been mentioned (see p. 7).

SERMONS

The sermon was the most highly developed literary type in colonial literature, and a collection of the sermons available in print and in manuscript would run literally into the thousands. Men and women listened to sermons on every Sunday; often they went to lecture sermons during the week; they heard sermons on such public occasions as elections, thanksgiving and fast days, military trainings, and funerals. The more serious of them kept, in their diaries or notebooks, records of the sermon texts and even the main heads of the discourses to which they gave their attention. In an age wherein the pulpit was the center of intellectual life, it is not surprising that much of the best writing was in sermons, nor that the congregation knew a good sermon when they heard one.

Two complete sermons are reprinted in this chapter in order that this type may have more adequate representation than is possible by excerpts. That by Thomas Shepard is from the early seventeenth century; that by Jonathan Edwards was delivered in 1733. Both are systematically organized with doctrines drawn from the Scripture text, reasons given for those doctrines, and the uses or application of the doctrines suggested. This structural pattern is very old, and it is by far the most common in the sermons of the American Puritans. Within it there was room, as Shepard's sermon shows, for objections and answers and other variations upon the basic pattern. The present-day reader is impressed with the "firstlys," "secondlys," etc., but we should remember that earnest churchgoers wanted to know where

they were so that during the week they could discuss within the family circle the soundness of Mr. Shepard's third "use." The logical structure is also lightened by numerous homely illustrations and eloquent passages, and by the frequent citation of parallel texts from the Bible. All of this is typical; the preachers made every possible effort to relate their sermons to the lives and reading of their flocks.

There are a number of intricate problems in the sermon structure—the extent of influence of the logic of Petrus Ramus, for example, and the conflict between the "plain" and the more ornate styles. For us, however, it is important to understand the purpose of the sermon.

It was designed then, as now, to persuade men to consider honestly the state of their souls. The minister was to preach the gospel of Jesus Christ, to awaken his hearers to the supreme importance of faith and regeneration, to the urgent necessity of assuming an active part in the eternal warfare within man's soul between good and evil, the spirit and the flesh, God and the Devil. The sermon was the essence of Protestantism, more important in actuality than any single theological dogma. With the Calvinists, for example, the sermon was the chief means of preserving believers from fatalistic acceptance of their lot. That most men were foreordained to sin and damnation and that there was nothing the individual could do about it, are doctrines which might easily have led to despair and passive indifference. The sermons, however, were based on the even more powerful doctrines that divine grace did come to some men, and that to those who received it grace was a constant growth, an increasing understanding of perfection, an endless enlarging of one's capacity to deal with doubt and sin and temptation. Hence the soul-searching of the Puritans, the esteem and affection for "soul-ravishing" clergymen like Shepard, the vast respect for the sublime certainty with which Edwards testified to the "spiritual Light" which is "the dawning of the Light of Glory in the Heart." Men and women found sermons thrilling because sermons indicated the innumerable ways of analyzing and strengthening the inner life.

The sermon, in short, was both an appeal to man's imperfect reason and a stirring of his emotions, both an intellectual experience and a glimpse of the magnificent poetic vistas of God's promise to the regenerate soul. It is the real key to the religious life of the colonial age. Dull as some sermons may seem to the modern reader, the sermon literature of colonial America can stand comparison with that of any people. It called forth the finest literary talents of the time.

BEGINNING of CONTROVERSIAL WRITING

Theological and political discussion also produced a large literature of controversy. Decisions had to be made about church government, institutional organization, governmental policy, and theological positions, and there were often wide divergences of opinion. Men with convictions expressed them in numerous tracts and treatises, represented in the following pages by Williams' *Bloudy Tenent*, Cotton Mather's *Manuductio ad Ministerium*, Edwards' *Freedom of the Will*, and Chauncy's *Seasonable Thoughts*. These, and other works like them, vary widely in their structure, which ordinarily grew directly out of the controversial issues with which they dealt.

Williams' use of the dialogue structure is not uncommon, but topical organization is probably more usual. Polemical tracts were frequently a point-by-point refutation of a preceding pamphlet or treatise. Sometimes they were constructed as a series of queries, to which the author gave his well-considered answers. The fiction of addressing a "letter" to a friend was often used. We cannot generalize readily about the literary form of the literature of controversy. Its most striking difference from similar material of today is perhaps the fact that so little of it appeared in magazines; their development as a forum for literary debate came in a later period.

The volume and variety of tracts and treatises can best be suggested by listing a few of the more important titles, in addition to those by Williams, Eliot, Cotton Mather, Wise, Edwards, and Franklin which have already been mentioned. Among the books of enduring

significance are the following: Richard Mather's *Church Government and Church Covenant* (1643); John Cotton's *Way of the Churches of Christ in New England* (1645); Nathaniel Ward's *Simple Cobler of Aggawam in America* (1647); Thomas Hooker's *Survey of the Summe of Church Discipline* (1648); Increase Mather's *Cases of Conscience concerning Evil Spirits Personating Men* (1693); Samuel Sewall's *Selling of Joseph* (1700); Cotton Mather's *Essays to Do Good* (as *Bonifacius*, 1710) and *Christian Philosopher* (1721); Franklin's *Modest Inquiry into the Nature and Necessity of a Paper Currency* (1729) and *Proposals relating to the Education of Youth in Pensilvania* (1749); Jared Eliot's *Essay on Field Husbandry in New England* (Part I, 1748); John Woolman's *Some Considerations on the Keeping of Negroes* (Part I, 1753); James Otis' *Vindication of the Conduct of the House of Representatives of Massachusetts* (1762) and *Rights of British Colonies Asserted and Proved* (1764). Religion, women's fashions, social reform, science, agriculture, politics—all are represented, and the list might easily be extended.

This type of literature had its models in the press of Europe, but its content is invariably and peculiarly American. It is the basis of the tradition of free discussion and a free press and is perhaps, to the intellectual historian, the most significant class of colonial writing.

HISTORIES and BIOGRAPHIES

Historical and biographical writing formed a large part of colonial literature because it seemed important, for various reasons, to preserve a record of what happened in the New World. In its simplest form this writing was annalistic, a simple statement of historical and biographical fact. The journals of Bradford and Winthrop and Nathaniel Morton's *New-England's Memorall* (1669) follow the natural chronological order and set down the main events of each year. The colonial historian was not satisfied with factual annals, however; he conceived it his duty to interpret events. Not much of the work was objective, by present-day standards, but it reveals awareness of the many possible uses of history.

Mixed motives can be perceived in most colonial histories and biographies. Smith's account of Virginia was both a justification of himself by a principal actor in the affairs described and a defense of colonization in general. Smith also had a distinctly modern conception of the close connection between history and geography. Bradford's history of Plymouth was written by a great leader who feared that the children and grandchildren of the founders would fail to cherish the achievement of a pious little group of heroes whose hard work had won, so Bradford believed, the special favor of God. Winthrop's journal-history of the Bay Colony, strongly flavored with the same providential theory of history as Bradford's book, had in it also the element of self-defense and a lawyer's respect for exact knowledge of precedents and experiments in institutional organization. Cotton Mather's biography of Burr (p. 150) exemplified a tendency to defend the "New England Way," as well as to emulate the didactic purposes of Bradford. Byrd's histories of the Dividing Line and Peters' account of Connecticut (p. 114) had axes to grind as well as information to convey.

Much colonial historical writing was tinged with the belief in a providential order of nature, and hence took on a distinctly theological quality. If events were to be interpreted as the working out of the divine plan, which man could never know in its entirety, a monstrous birth might be quite as significant to a reflective mind as a victory in battle or a great political or religious compromise. To the modern reader, Winthrop seems to jump readily from affairs of great moment to the most trivial events. This attitude tended to make history discontinuous except to the reader fascinated by the search for moral meanings in events. It is characteristic of most seventeenth-century writing, appearing most vividly in Edward Johnson's *History of New England* (1654) and reaching its culmination in Cotton Mather's *Magnalia Christi Americana*. For the providential theory the colonists had the example of the Book of Kings, the Roman historian Livy, and many ecclesiastical annalists from the time of St. Augustine.

More rationalistic tendencies may also be observed in colonial historiography. We have already noticed Bradford's analysis of possible causes of an outbreak of immorality in New England. Judicious and objective methods were foreshadowed in Thomas Prince's *Chronological History of New England*, the first volume of which appeared in 1730, in William Stith's *History of the First Discovery of Virginia* (1747), and most notably in Thomas Hutchinson's *History of the Province of Massachusetts Bay*, of which the first volume was published in 1764. These works likewise had European models, although Hutchinson's was the only one to show traces of the regard for institutional development which made Voltaire's *Age of Louis XIV* (1751) a landmark.

DIARIES and AUTOBIOGRAPHIES

An amazing number of colonists kept diaries or wrote autobiographies. Their purpose was sometimes practical—the desire to have a record of the weather, the planting and harvesting of crops, business transactions, and personal affairs. More often, perhaps, and almost always in the case of the autobiographies, the aim was fundamentally theological. Earnest Calvinists wished to study the state of their souls, and one of the best possible methods was to preserve a day-by-day or systematic account of temptations, struggles, and meditations, from which might be drawn some indication of their state of grace.

The best colonial example of a religious autobiography is probably Jonathan Edwards' "Personal Narrative." In its constant concern with the all-absorbing problem of man's relation to God, it is typical of numerous Puritan self-searchings. Other examples, almost as well known, are the autobiography and "Meditations and Spiritual Experiences" of Thomas Shepard, and the voluminous diary of Cotton Mather.

Those diaries which are most treasured by later generations, however, are the ones in which soul-searching is leavened by concern with temporal affairs. Winthrop's journal, Samuel Sewall's diary, the travel journal of Mrs. Knight, and the shorthand diaries from which

William Byrd "wrote up" his histories of the Dividing Line and his "Progress to the Mines" are important because they preserve for us the customs, manners, and personalities of relatively worldly people. We learn from them of the food, the drink, the social life, the household appointments, the gardens, the crimes, the births, marriages, and deaths—the external life, in short, of seventeenth- and eighteenth-century Americans.

Sewall's *Diary* is perhaps the best. It does not compare with the great English diaries written at approximately the same period by John Evelyn and Samuel Pepys, for Sewall's world was more circumscribed than theirs. Like all great diarists, however, Sewall has the virtue of revealing himself as a human being, not much unlike you and me in being beset by frailties and inadequacies and little vanities (not big ones, of course, for we none of us are inordinately vain—to ourselves).

It is worth remembering that two of the greatest of early American books—Benjamin Franklin's *Autobiography* (p. 245) and John Woolman's *Journal* (p. 299)—are in the direct line of descent from one of the most popular of colonial literary types. Of them we shall have more to say later.

POEMS

More than one critic has hinted that the less said of American poetry prior to 1765 the better. Colonial production of verse, compared to that of England in the same period, was small in quantity and, with very few exceptions, vastly inferior in quality. No colonial poet reached the level of Herbert, Herrick, Cowley, Butler, Prior, Young, or Thomson, to say nothing of the front-rank poets, Donne, Milton, Dryden, and Pope. Moreover, the colonial versifiers displayed a deplorable tendency to imitate the poetic diction and verse forms of their transatlantic betters.

Early American verse can nevertheless add to our knowledge of the pattern of culture and of the place of the arts in colonial life. Some of it has a respectable originality in thought or

subject matter, and some of it, notably that which expressed the religious faith of the most sensitive individuals, has genuine poetic merit.

The most utilitarian use of rhyme and meter is mnemonic; maxims and stories in verse are easier to remember verbatim than those in prose. Not a little colonial verse is based upon this fact, from the rhymed accounts of English Protestant history by the Rev. John Wilson (see *Handkerchiefs from Paul*, ed. K. B. Murdock, 1927) down to the Rev. Michael Wigglesworth's famous summary of Calvinistic theology, *The Day of Doom* (1662). Even the compilers of the *Bay Psalm Book* (1640), although their main purpose was to translate the Hebrew with the greatest possible exactness, chose to put the psalms to be sung in the New England churches in English meter, which is to say in the ballad stanza of folk poetry:

The Lord to mee a shepheard is,
want therefore shall not I.
Hee in the folds of tender-grasse,
doth cause mee downe to lie.
To waters calme me gently leads
Restore my soule doth hee:
he doth in paths of righteousnes:
for his names sake leade mee.

The use of the ballad stanza reveals the strength of popular tradition in the face of novel conditions—in this instance the Puritan respect for the Hebrew text of the Scriptures. Poetry as art suffered severely, but its basic elements survived.

Vaguely related to the mnemonic purpose, although essentially didactic in the same way as colonial historical writing, are the numerous historical poems of the colonial period. Bradford himself tried his hand at this type of writing, but the best-known examples are Benjamin Tompson's narratives of King Philip's War: *New Englands Crisis* (1676) and *New-Englands*

Tears for Her Present Miseries (1676). Both display the providential theory of history in an elaborate form. Relating to biographical writing, moreover, are the numerous funeral elegies, at which many New England clergymen tried their hands. Most modern readers will be satisfied to know Benjamin Franklin's recipe for such an elegy, without reading many of the originals on which he based his conclusions:

"For the subject of your Elegy, Take one of your Neighbors who has lately departed this Life; it is no great matter of what Age the Party dy'd, but it will be best if he went away suddenly, being *Kill'd, Drown'd, or Frose to Death*.

"Having chose the Person, take all his Virtues, Excellencies, &c. and if he have not enough, you may borrow some to make up a sufficient Quantity: To these add his last Words, dying Expressions, &c. if they are to be had; mix all these together, and be sure you strain them well. Then season all with a Handful or two of Melancholly Expressions, such as, *Dreadful, Deadly, cruel cold Death, unhappy Fate, weeping Eyes, &c.* . . . let them Ferment for the Space of a Fortnight, and by that Time they will be incorporated into a Body, which take out, and having prepared a sufficient Quantity of double Rhimes, such as *Power. Flower: Quiver. Shiver: Grieve us, Leave us: tell you. excel you: Expeditions, Physicians: Fatigue him, Intrigue him: &c.* you must spread all upon Paper, and if you can procure a Scrap of Latin to put at the End, it will garnish it mightily; then having affixed your Name at the Bottom, with a *Mœstus Composuit*, you will have an Excellent Elegy. '

The more sophisticated poetry of the colonial era was likely to have a classical flavor, understandable in an age and place where the higher education gave a central place to the learned languages. Not a few colonists composed Latin verses, and translations and paraphrases constituted a common exercise. The height of "highbrow" verse-making was *Pietas et Gratulatio*, published at Boston in 1761. A tribute to the new king, George III, it contained three poems in Greek, sixteen in Latin, and twelve in English, most of them by recent graduates

or faculty members of Harvard College. Individuals trained in the classics were also interested in the work of the English Neoclassical school, and there were many colonial poems in the manner of the satires of Dryden and Pope, the mock-heroics of Butler, and the philosophical pieces of Thomson, Young, and Pomfret. These are often interesting for their content, although it is disconcerting to find colonial poets expressing boredom with court and city life when, as someone has said, five minutes' walking would have taken any one of them into a cow pasture. We may safely leave the works of Mather Byles, John Adams (the clergyman, not the statesman), George Webb, William Livingston, the younger Thomas Godfrey, Nathaniel Evans, Joseph Green, and other would-be "wits" to the specialist, remembering, however, that these gentlemen were the literati of their day and, whatever their deficiencies, cherished the tradition of belles-lettres in a world frequently too busy for art.

Religious poetry is another matter. It is represented in the present chapter by the works of Anne Bradstreet and Edward Taylor. Although these writers imitated French and English religious poets—Du Bartas, the English Spenserians, Donne, Herbert, Quarles, and Crashaw—they had the true poet's gift of conveying intensity of individual experience. Their poems, consequently, are probably the finest literary expression of the inner life of American Puritanism and have the same interest as the best of the diaries and spiritual autobiographies.

PLAYS and NOVELS

Fiction and the drama, which bulk large in later American literature, were almost nonexistent in the colonial period. Both were distrusted by serious-minded persons, in England as well as in America, although it is not just to ascribe their absence entirely to Puritan influence.

A theater requires considerable capital and a public in the habit of playgoing, neither of which is often to be found except in the largest centers of population. As a class, moreover, actors were long mistrusted by civic authorities, as the history of the London theater shows.

appears in colonial laws forbidding their public performance. Virginia was one of the few colonies without such legislation, but the earliest mention of a play acted in the colonies suggests some prejudice even there. In 1665 three citizens of Accomac County were called upon to appear in costume and tell what they said in *Ye Bare and Ye Cubb*. They were discharged and their accuser forced to pay the court charges.

The Puritans, however, unquestionably delayed the development of an American drama. Their influence had closed the theaters in England for eighteen years, and many colonists shared the resentment of English Puritans for the ridicule of Puritanism in Elizabethan drama. Remembered also was the association of the theater with the immoralities of king and court and the vigorous attack on the theater by the church fathers of the latter days of the Roman empire. To the famous English attacks on the theater by Stubbs (1583), Prynne (1632), and Collier (1698) there was at least one American parallel: Increase Mather's *Testimony against Several Prophane and Superstitious Customs, Now Practised by Some in New-England* (1687).

There was no effort to keep printed plays out of the college libraries, and as time went on there seems to have been sporadic interest in them in academic halls. There is some evidence that students at Harvard were thinking of histrionic things in the 1690's—a doubtful tradition that Benjamin Colman, later a prominent liberal clergyman, wrote a Latin play entitled *Gustavus Vasa* in 1690, and an allusion to examining "several of the Scholars about the Comedy" in Increase Mather's diary for 1698. The students at William and Mary offered a "pastoral colloquy" before the governor in 1702, and later in the eighteenth century undergraduates at Philadelphia, Princeton, New Haven, and Cambridge were frequently experimenting with dialogues and dramatic exercises. *The Prince of Parthia*, by the younger Thomas Godfrey, one of the literary group centering in the College of Philadelphia, was written in

1759, published in 1765, and actually produced on a professional stage in 1767. Closely imitative of the English heroic drama, it was a natural outgrowth of the discovery of belles-lettres by undergraduates and their friends.

New tastes and attitudes were accepted by the general public only gradually, despite the efforts of entranced amateurs, the visits of professional actors, and the changing tone of English drama. The first play to be printed was *Antroboros* (1714), a political satire published anonymously by Robert Hunter, governor of New York. Williamsburg built a theater in 1716, but there is no evidence that it was used until twenty years later. New York probably was entertained by a group of professional actors in 1732, and Charleston had a brief "season" in 1735. A company which performed Addison's *Cato* in Philadelphia in 1742 was arrested and forbidden to appear again. Going to New York, it performed *Richard III*, *The Beggars' Opera*, and other plays in 1750. An amateur performance scandalized conservative Boston in that same year, although George Lillo's bourgeois tragedy, *George Barnwell* (1731), had been reprinted in *The New-England Weekly Journal* within a year after its appearance in London. American theatrical history is usually said to have begun in 1752, with the arrival of Lewis Hallam's "American Company," which had a continuous history in repertoire until 1774, when the Continental Congress forbade theatrical performances "for the duration." The American Company played at Williamsburg, New York, Philadelphia, Annapolis, Newport, Providence, Charleston, and several towns in Virginia, and succeeded (sometimes by such stratagems as offering *Othello* as a series of "Moral Dialogues") in familiarizing the more venturesome colonists with the plays of Shakespeare, Marlowe, Dryden, Congreve, Farquhar, Addison, Steele, Cibber, Ambrose Philips, and others. But there was no native drama.

Nor did colonial Americans produce either novels or novel-like narratives comparable to those of Bunyan, Defoe, and Swift. This is less surprising than that there should have been no drama, for the novel as a form had by no means reached its full maturity. The serious-

ness of the reading public left little time for the long romances, although a good many of them appear on colonial booklists, and the pleasure in swift-moving narrative was partly provided for by the accounts of voyages and travels, the somewhat lurid accounts of captivity among the Indians, and the other factual material such as reports of the experiences and final fates of pirates and murderers and the descriptions of remarkable providences and witchcrafts. Many works of fiction which supposedly portrayed life must have seemed dull in comparison to more direct reporting. Quite probably the prevalent attitude toward fiction was not far from that in one passage of Cotton Mather's *Manuductio ad Ministerium*, where he advises divinity students to enjoy the recreation of poetry but not to be so set upon it "as to be always poring on the *Passionate* and *Measured* Pages. Let not what should be *Sauce* rather than Food for you, Engross all your Application. . . . Indeed, not merely for the *Impurities* which they convey, but also on some other Accounts, the *Powers of Darkness* have a *Library* among us, whereof the *Poets* have been the most *Numerous* as well as the most *Venemous* Authors. Most of the modern *Plays*, as well as the *Romances* and *Novels*, and *Fictions*, which are a sort of *Poems*, do belong to the Catalogue of this cursed Library."

T.H.

Chronological Table of Literature and History

1492

Columbus, discovering islands in the western ocean, believed that he had reached outlying parts of Asia

1497

Cabot touched the coast of the North American continent, laying the foundation for English territorial claims in the New World

1507

Martin Waldseemüller's *Cosmographiae Introductio*, German treatise on geography wherein the newly discovered

western hemisphere was named "America," in honor of Amerigo Vespucci, Italian navigator

1513

Ponce de León discovered and named Florida • Balboa discovered the Pacific Ocean

1519

Magellan began the voyage on which he eventually (1522) circumnavigated the globe • Cortez entered the city of Mexico and received the homage of Montezuma, Aztec emperor

1531

Pizarro undertook the conquest of Peru, completing it in two years

1534

Cartier reached the coast of Canada near the mouth of the St. Lawrence

1535

The Bible first fully translated into English, by Miles Coverdale

1536

John Calvin's *Institutes of the Christian Religion* (Latin version), important theological treatise by the Swiss reformer

1539

De Soto landed in Florida and marched westward toward Mexico; before his death in 1542 he had reached the Mississippi River and explored as far north, perhaps, as what is now Kentucky

1540

Coronado, misled by legends of fabulously wealthy cities, began an expedition into what is now New Mexico, Arizona, and the Great Plains

1543

Copernicus' *De Revolutionibus Coelestium Orbium*, pioneer work of modern astronomical science, by a Polish astronomer

1547

Death of Henry VIII (reigned 1509-1547), accession of Edward VI, under the regency of Edward Seymour

1549

First *Book of Common Prayer* (revisions in 1552, 1559, 1604, 1662), the object of much criticism from those who wished to rid the English Church of "popish" ritual
Uniform church service prescribed in England

1553

Death of Edward VI (reigned 1547-1553); accession of Mary, known as "Bloody Queen Mary" for her sanction

of the persecution of Protestants in an effort to restore England to the Catholic faith

1558

Death of Mary (reigned 1553-1558); accession of Elizabeth

1562

John Hawkins made the first of three privateering voyages to the West Indies, bringing England into direct conflict with Spain for the riches of the New World

1565

Huguenot (French Protestant) colony in Florida destroyed by the Spaniards

1569

Map of the world by Gerard Mercator, marking the beginning of modern geographical science

1572

St. Bartholomew's Day Massacre of about ten thousand Huguenots helped confirm the English in their anti-Catholic convictions

1577

Francis Drake began a voyage which took him through the Straits of Magellan, along the western coasts of the Americas (where he took possession of Nova Albion—present-day California and Oregon—in the name of Queen Elizabeth), and back to England (1580) by way of Java and the Cape of Good Hope

1578

Charter for exclusive colonization in North America granted by the Queen to Sir Humphrey Gilbert and associates, among them Gilbert's half-brother, Walter Raleigh

1580

Montaigne's *Essais*, first edition, classic French work of their type

1582

Richard Hakluyt's *Divers Voyages*, first fruit of Hakluyt's lifelong interest in geography and the extension of English influence upon the sea

1584

Charter granted to Raleigh, Gilbert's ventures having failed, guaranteeing to colonists in North America the political rights of Englishmen • Two ships sent to locate the best site for a permanent settlement explored the coast of what is now North Carolina and returned to England with enthusiastic reports • Region named "Virginia" by Queen Elizabeth

1585

Raleigh sent seven ships to America, landing 107 men, Thomas Hariot among them, on Roanoke Island

1586

Raleigh's colony returned to England by Drake's ships when needed supplies failed to arrive on schedule • Decision that Chesapeake Bay area would be better for colonization than Roanoke, where the Indians were hostile

1587

120 persons left on Roanoke through the treachery of a ship captain, when a supply expedition finally arrived in 1590 this "lost colony" had vanished, leaving no trace except the word "Croatan" carved upon a tree • Mary, Queen of Scots, beheaded

1588

Hariot's *Briefe and True Report of the New Found Land of Virginia*

Destruction of the Spanish Armada in the English Channel, marking emergence of England as the chief sea power in the world

1589

Hakluyt's *Principall Navigations*, first edition, the record of English participation in the geographical expansion of the Renaissance

1590

Edmund Spenser's *Faerie Queene*, first three books, English allegorical poem

1594

Richard Hooker's *Laws of Ecclesiastical Polity*, first four books, the best-known exposition of the basic position of the Church of England

1597

Francis Bacon's *Essays*, first edition, noteworthy English prose work • Shakespeare's *Romeo and Juliet*, pirated edition, marking the recognized success of the greatest English dramatist

1598

Edict of Nantes, issued by Henry IV of France, granted toleration to the Huguenots (see 1685)

1602-1605

English interest in North American colonies revived by a series of expeditions under Captains Gosnold, Pring, and Weymouth to the coast between present-day Maine and Martha's Vineyard • Champlain explored region for French

1603

Shakespeare's *Hamlet* printed

Death of Elizabeth (reigned 1558-1603); accession of James I

1605

Bacon's *Advancement of Learning*, important English philosophical treatise urging the development of scientific method • Cervantes' *Don Quixote*, Spanish picaresque novel, first part

Failure of the Gunpowder Plot, an attempt by Guy Fawkes and others to blow up the House of Lords which intensified anti-Catholic feeling

1606

Charters granted to two colonizing groups, the London Company and the Plymouth Company, who divided the territory of Virginia between them at 41° north latitude

1607

Jamestown, first permanent English settlement in North America, founded by the London Company, 13 May

1608

John Smith's *True Relation*

Quebec founded by Champlain • Migration of the Scrooby congregation of Separatists to Holland, the starting-point of William Bradford's *History of Plymouth Plantation*

1609

Henry Hudson discovered the river which bears his name
• Smith returned to England, October

1612

Smith's **Map of Virginia**

1614

Northern part of Virginia explored by Smith for the Plymouth Company and named by him "New England" •
Invention of logarithms by John Napier • Colony established by the Dutch at the mouth of the Hudson

1616

Smith's **Description of New England** •

Death of Shakespeare, Hakluyt, and Cervantes

1619

First representative assembly convened in Virginia •
Negro slaves first imported, and iron manufacturing begun in Virginia

1620

Mayflower Compact signed in Cape Cod Bay, 11 November

Charter granted by the London or Virginia Company to English capitalists, on behalf of the Separatists in Holland, for a settlement somewhere south of the Hudson •
The **Mayflower**, driven off her course by storms, landed the colonists known as the Pilgrims on the shore of Massachusetts Bay

1621

Patent for the Pilgrims' settlement obtained from the Council for New England, successor to the Plymouth Company

1622

Mourt's Relation, by William Bradford and Edward Winslow, first authentic description of the settlement of the Pilgrims at Plymouth

Indian massacre in Virginia, 22 March

1623

First folio edition of Shakespeare's plays

1624

Smith's **Generall Historie** • Winslow's **Good News from New England**

Annulment of the Virginia charter, making that settlement the first royal colony, with a governor appointed by the king

1625

Samuel Purchas' **Hakluytus Posthumus, or Purchas His Pilgrimes**, a continuation of Hakluyt's **Principall Navigations** (see 1589)

Death of James I (reigned 1603-1625), accession of Charles I, whose reign was notable for incessant constitutional conflict between the crown and Parliament

1627

Charter granted to the Massachusetts Bay Company •
Thomas Morton of Merrymount (a settlement made at Mount Wollaston, now Braintree, south of Boston, Massachusetts) arrested and deported by the authorities of the Plymouth Colony

1628

William Harvey's **De Motu Cordis et Sanguinis**, physiological treatise by an English physician describing the circulation of the blood

1629

Charles I prorogued his third Parliament, beginning the arbitrary rule which encouraged emigration to America

1630

Smith's **True Travels** • Francis Higginson's **New England's Plantation**

"Great Migration" of the Puritans of the Massachusetts Bay Company, led by Governor John Winthrop, which by 1640 brought more than 20,000 persons to New England

1631

Death of John Smith • Roger Williams arrived in Massachusetts

1632

Charter granted for a colony in what is now Maryland • Settlement begun in the valley of the Connecticut River

1633

Dutch built Fort Goed Hope near what is now Hartford • Laud became Archbishop of Canterbury • Galileo forced to recant his acceptance of the Copernican astronomy

1634

William Wood's **New England's Prospect**
Maryland settled

1636

Roger Williams founded Providence in Rhode Island • Harvard College founded (classes begun in 1638)

1637

Thomas Morton's **New English Canaan** • Descartes' **Discours de la méthode**, French philosophical treatise

The Pequot Indians decisively defeated in a battle near Groton, Connecticut • Antinomian controversy in Massachusetts concluded by the banishment of Anne Hutchinson, who found refuge in Rhode Island

1638

New Haven settled • Swedish settlement established on the Delaware River

1640

Whole **Booke of Psalmes**, better known as the **Bay Psalm Book**

1641

Thomas Shepard's **Sincere Convert** • Massachusetts **Body of Liberties**

1642

William Denham's **Cooper's Hill**, English poem later imitated in America

Civil war in England precipitated by the attempt of the king to impeach and imprison five members of the House of Commons

1643

Williams' **Key into the Language of America**
Church of England adopted Presbyterian rule

1644

Williams' **Bloudy Tenent of Persecution for the Cause of Conscience** • John Milton's **Areopagitica**, English treatise in defense of freedom of speech and of the press

Manchu dynasty established in China, continued until 1912 • Defeat of the English Royalists at Marston Moor

1645

Shepard's **Sound Believer** • Milton's **Poems**, first edition, containing "L Allegro" and "Il Penseroso," models for many American poems

Laud beheaded • Defeat of the Royalists at Naseby

1647

Charles I delivered to the Parliamentary army

1648

Parliament "purged" by Cromwell's army

1649

Death of Thomas Shepard and John Winthrop • Charles I tried and executed (reigned 1625-1649), Charles II crowned in exile in 1651 • England declared a commonwealth, and the House of Lords abolished

1650

Anne Bradstreet's **Tenth Muse Lately Sprung up in America**

1651

Thomas Hobbes' **Leviathan**, chief English treatise favoring absolutism in government

Parliament passed the first Navigation Act, designed to undermine the commercial supremacy of the Dutch, it provided that no goods should be imported from Asia, Africa, or America, except in English vessels; with supplementary acts in 1660 and 1663 it eventually became one of the chief sources of friction between the American colonies and the British ministry

1653

Cromwell became Lord High Protector

1655

New Sweden taken by the Dutch

1657

Death of William Bradford

1658

Death of Oliver Cromwell, Richard Cromwell became Protector (resigned 1659)

1659

Molière's *Les Précieuses ridicules*, French comedy

1660

The Restoration, which brought Charles II to the English throne

1662

Michael Wigglesworth's *Day of Doom*

Act of Uniformity purged the Church of England of dissenting clergymen and sent another wave of ministers to America • Half-Way Covenant adopted by the New England churches, admitting to membership the children of church members, without the requirement of a public relation of previous religious experience • Royal Society of London chartered

1663

Samuel Butler's *Hudibras*, English satirical poem, first part

1664

New Netherlands taken by the English • Conventicle Act prohibited meetings of religious nonconformists

1666

George Alsop's *A Character of the Province of Maryland*

1667

Milton's *Paradise Lost*, English epic poem, first edition
Treaty of Breda gave all Dutch colonies in America to England and Acadia (later Nova Scotia) to France

1668

William Penn became a Quaker • Joliet explored the Great Lakes • La Salle in the Ohio country, perhaps reaching the Mississippi

1669

Constitution for Carolina drawn up by John Locke, English philosopher

1672

John Josselyn's *New England's Rarities Discovered*
Death of Anne Bradstreet

1674

Josselyn's *Account of Two Voyages to New England* • Samuel Sewall began his *Diary*
Death of John Milton

1675-1676

King Philip's War, marked by numerous massacres and the burning of frontier villages • Royal Observatory founded at Greenwich

1676

Benjamin Tompson's *New England's Crisis*, a series of poems on the providential delivery of New England from the threat of King Philip • Increase Mather's *Brief History of the Warr with the Indians*

Bacon's Rebellion, an early instance of conflict between a royal governor (Governor William Berkeley of Virginia) and those whom he governed

1678

John Bunyan's *Pilgrim's Progress*, English religious allegory, first part

"Popish Plot" to oust Charles II and place James, Duke of York, an avowed Catholic, on the throne; some thirty-five persons executed before it was discovered that the evidence "revealed" by Titus Oates was fabricated

1680

Sir Robert Filmer's *Patriarcha* published (written about 1645), the chief English defense of the divine right of kings

1681

Penn's *Some Account of the Province of Pensilvania in America* • John Dryden's *Absalom and Achitophel*, English satirical poem

Charter obtained for a new colony on the Delaware

by William Penn, in payment of a debt owed to Penn's father by the King • Massachusetts called upon to surrender its charter

1684

Increase Mather's **Essay for the Recording of Illustrious Providences**

1685

Death of Charles II (reigned 1660-1685), accession of James II • Revocation of the Edict of Nantes (see 1585) by Louis XIV of France sent many Huguenots to England and America

1686

Sir Edmund Andros arrived in Boston with commission as royal governor

1687

Sir Isaac Newton's **Philosophiae Naturalis Principia Mathematica**, scientific treatise by the most famous English physicist of his age

1688

Connecticut and Rhode Island charters revoked • James II permitted to escape to France—the so-called “Glorious Revolution”

1689

Cotton Mather's **Memorable Providences relating to Witchcrafts and Possessions** • Locke's **Treatise of Civil Government**, an exposition of the contract theory of society, of prime importance to the political philosophy of the American revolutionists

Deposition of James II (reigned 1685-1689), settlement of Mary (daughter of James II) and her husband, William of Orange, on the English throne • Andros imprisoned in Boston • Increase Mather and others sent to England to negotiate a new charter for Massachusetts

1690

Locke's **Essay Concerning Human Understanding**, key English philosophical treatise

Sir William Phips conquered Acadia but failed in an expedition against Quebec, these being the chief

American actions in the War of the British Succession, which ended in 1697 with French recognition of William as king and Anne as his successor

1691

New Massachusetts charter made property the basis of suffrage and destroyed the vestiges of direct church control in the government

1692

Phips made royal governor of Massachusetts • Special court appointed to investigate the witchcraft outbreak at Salem Village

1693

Cotton Mather's **Wonders of the Invisible World** • Increase Mather's **Cases of Conscience Concerning Evil Spirits Personating Men**

William and Mary College chartered (first college classes begun about 1710)

1697

Daniel Defoe's **Essay on Projects**, an English work which influenced the humanitarian thought of Benjamin Franklin

Samuel Sewall publicly confessed his error in the witchcraft prosecutions

1700

Sewall's **Selling of Joseph** • William Congreve's **Way of the World**, English comedy

1701

Yale College founded • Death of James II in exile in France, his son James Francis Edward Stuart (1688-1766), “the Old Pretender,” recognized as James III by Louis XIV of France

1702

Cotton Mather's **Magnalia Christi Americana**

Death of William III (reigned 1689-1702, Mary died in 1694), accession of Anne, whose reign was notable for the continued development of party government • Beginning of the War of the Spanish Succession (Queen Anne's War in America), ended by the Peace of Utrecht, 1713

1704

Sarah Kemble Knight's *Journal* begun • Jonathan Swift's *Battle of the Books* and *Tale of a Tub*, English satires
Battle of Blenheim

1707

Formal union of England and Scotland under the name of Great Britain, with a single Parliament

1709

First copyright act in Great Britain • Mass migration of Germans from the Palatinate to Pennsylvania

1710

Cotton Mather's *Bonifacius* or *Essays to Do Good*

1711

Alexander Pope's *Essay on Criticism*, English poem • Joseph Addison, Richard Steele, and others began *The Spectator*, best-known series of periodical essays in eighteenth-century England

1713

Addison's *Cato*, English tragedy
Treaty of Utrecht gave to Great Britain all French claims to Acadia, Newfoundland, and the Hudson Bay Settlement, France retained Canada proper

1714

Death of Anne (reigned 1702-1714), accession of George I, Elector of Hanover

1715

Le Sage's *Gil Blas*, French picaresque novel, first three books
Failure of first Jacobite rebellion, to return "the Old Pretender" to the British throne, sent a number of prominent Scots to America

1717

Compagnie d'Occident formed in Paris to colonize on the banks of the Mississippi, rumors of gold and silver mines led to furious stock speculation known as the "Mississippi Bubble," which collapsed in 1720

1718

New Orleans founded

1719

Defoe's *Robinson Crusoe*, English novel, first part

1721

New-England Courant established (discontinued in 1726); contained Benjamin Franklin's first characteristic writing, the "Dogood Papers" • Cotton Mather's *Christian Philosopher*

1723

Franklin arrived in Philadelphia • Death of Increase Mather

1726

Cotton Mather's *Manuductio ad Ministerium* • Swift's *Gulliver's Travels*, English satire • James Thomson's "Winter," first part of *The Seasons*, English philosophical poem

1727

Death of Sarah Kemble Knight • Death of George I (reigned 1714-1727), accession of George II

1728

Death of Cotton Mather • William Byrd helped run the boundary line between Virginia and North Carolina, keeping the diary later elaborated into his *History of the Dividing Line* and *Secret History of the Line*

1729

Edward Taylor died, leaving his *Poems* in manuscript • Sewall completed his *Diary*

1730

Death of Samuel Sewall

1731

Franklin organized the Library Company of Philadelphia • *Gentleman's Magazine* established in London, soon had a wide circulation in America and carried much American material

1732

Byrd made the trip described in "A Progress to the Mines"
Georgia founded

1733

First issue of **Poor Richard's Almanac**
Sugar Act, passed to protect British interests in the
West Indies, threatened colonial trade in rum and lumber

1734

Jonathan Edwards' **Divine and Supernatural Light**
Peter Zenger arrested for libel in New York

1736

Thomas Prince's **Chronological History of New England**,
first volume

1738

George Whitefield made the first of five evangelical tours
of the American colonies • First spinning machines pat-
ented in Great Britain

1740

Samuel Richardson's **Pamela**, English sentimental novel
Charity school founded in Philadelphia, from which
developed the College of Philadelphia and, eventually,
the University of Pennsylvania • Frederick II, the Great,
became King of Prussia, reigning until 1786

1741

Edwards' **Sinners in the Hands of an Angry God** • Wil-
liam Bradford's **American Magazine** and Franklin's **Gen-
eral Magazine** established at Philadelphia

1742

Edwards' **Some Thoughts concerning the Present Re-
vival of Religion in New England** • Edward Young's
Night Thoughts, English poem

1743

Charles Chauncy's **Seasonable Thoughts on the State
of Religion in New England**

1744

Death of William Byrd • American Philosophical Society,

first enduring scientific organization in what is now the
United States • War of the Austrian Succession (King
George's War in America), ending inconclusively in 1748
with the Treaty of Aix-la-Chapelle, restoring Louisbourg
on Cape Breton Island to the French and leaving control
of the Ohio country undetermined

1746

Edwards' **Treatise on the Religious Affections**
College of New Jersey (later Princeton University)
founded

1748

Richardson's **Clarissa Harlowe**, English novel • Mon-
tesquieu's **Esprit des lois**, French political treatise largely
responsible for the separation of powers under the Ameri-
can Constitution

1749

Franklin's **Proposals relating to the Education of Youth
in Pensilvania** • Henry Fielding's **Tom Jones**, English novel
British grant of more than a half-million acres to the
Ohio Company roused the fears of the French that there
were plans to separate Canada from Louisiana

1750

Jonathan Mayhew's **Discourse Concerning Unlimited
Submission and Non-Resistance to the Higher Powers**
asserted the right of revolution under conditions such as
those of 1642 and 1688

1751

Franklin's **Experiments & Observations on Electricity**,
first edition

1752

First regular theatrical company visited the colonies
Change of calendar from the Julian or Old Style to the
Gregorian or New Style, making the New Year commence
1 January instead of 25 March and dropping the ten days
following 2 September 1752

1753

John Woolman's **Some Considerations on the Keeping
of Negroes**, first part

French seized the Ohio country, taking prisoner British traders in the region; George Washington, aged twenty-one, sent by Governor Dinwiddie of Virginia to protest

1754

Edwards' *Freedom of the Will* • Franklin presented his *Plan of Union* to the Albany conference

Washington led two companies of Virginia militia against the French and, after initial successes, was forced to surrender on terms which permitted him to return with his men to Virginia • State of undeclared war recognized by call for delegates from all the colonies to meet at Albany, New York, June • Two plans for intercolonial organization proposed (1) that by Governor William Shirley of Massachusetts, which would give the colonial governors the power to organize for defense, with the expenses to be met by a tax levied by Parliament—a plan vigorously opposed by Franklin on the ground that it was taxation without representation; (2) Franklin's plan, providing for a president-general appointed by the king and a grand council or intercolonial legislature of forty, elected by the colonial assemblies • King's College (later Columbia University) founded

1755

Samuel Johnson's *Dictionary of the English Language*, British compilation long standard

British and American troops under General Braddock, advancing on Fort Duquesne, totally defeated, sixty-four out of eighty-five officers being killed or wounded • Franklin active in getting supplies to Braddock's troops and in supervising the construction of forts to protect Pennsylvania from invasion • Acadians deported en masse from Nova Scotia

1756

Woolman's *Journal* begun

1757

Voltaire's *Candide*, French satirical novel

Fort William Henry captured by the French • Franklin sent to London by the Pennsylvania assembly, which desired full control of the expenditure of public funds • Seven Years' War formally declared (French and Indian War in America)

1758

Franklin's *Way to Wealth*, in *Poor Richard Improved* • Quesnay's *Tableau économique*, French treatise on physiocratic economic principles

Death of Jonathan Edwards • Tide of the war in America turned toward the British, with the conquest of Louisbourg by forces under Jeffrey Amherst and the occupation of Fort Duquesne, now renamed Pittsburgh • House of Commons resolved that "the claim of right in a colonial Assembly to raise and apply public money, by its own act alone, is derogatory to the crown, and to the rights of the people of Great Britain"

1759

Laurence Sterne's *Tristram Shandy*, English novel, first two volumes

Ticonderoga, Niagara, and Quebec taken by the British and Americans

1760

Franklin's *Interest of Great Britain Considered with Regard to Her Colonies*, a plea for the annexation of Canada and a united Anglo-American empire

Death of George II (reigned 1727-1760), accession of George III

1761

Colonial administration reflected a general "tightening up" to ease the strain of expenditures made necessary by the war, concluded in America but not in other parts of the world • Attempt to give "writs of assistance" in the execution of general search warrants to Massachusetts customs officers called forth the anger of James Otis, who in a famous speech (John Adams said it "breathed into this nation the breath of life") developed the classic colonial theory of inalienable natural rights to life, liberty, and property security

1762

Otis' *Vindication of the Conduct of the House of Representatives of the Province of Massachusetts Bay*, first public statement of the "no taxation without representation" argument, it was called forth by Governor Francis Bernard's action in fitting out a naval vessel without legislative authority

Spain secretly acquired from France all of Louisiana west of the Mississippi • Although the British controlled Canada, they were faced with much Indian hostility, evident in the Conspiracy of Pontiac (1762-1763)

1763

By the Treaty of Paris Great Britain received all of Canada from France, Florida from Spain • Rumors circulated that Parliament intended to tax the colonies for part of the cost of the war, and perhaps to enforce the long-forgotten Navigation Acts (see 1651)

1764

Otis' **Rights of the British Colonies Asserted and Proved** asked for colonial representation in Parliament if that body was to levy taxes on America

Parliament's modification of the Sugar Act showed obvious intentions of taxing the colonies

1765

Stephen Hopkins' **Rights of Colonies Examined**, a pamphlet similar to those by Otis • Martin Howard's **Letter from a Gentleman at Halifax to His Friend in Rhode Island**, first important Tory answer to Otis and Hopkins, arguing that the colonies were legally corporations, with privileges stated in their charters, and that the colonists were "virtually" represented in Parliament, which was not organized on a territorial principle • Daniel Dulany's **Considerations on the Propriety of Imposing Taxes in the British Colonies for the Purpose of Raising a Revenue by Act of Parliament** objected to Howard's argument

Stamp Act, March • Furious pamphlet war, numerous riots, and the mobbing of prominent Tories followed the reception of the news in America • Stamp Act Congress convened in New York, October, drew up a declaration of rights and grievances, petitioned the king, and sent memorials to both houses of Parliament

EXPLORERS AND COLONISTS: Hariot, Smith, Bradford, Winthrop, Sewall, Alsop, Knight, Byrd, Peters, Bartram

Thomas Hariot

1560 • 1621

In 1585 Thomas Hariot, a twenty-five-year-old Englishman already known in Oxford as a talented mathematician, landed on Roanoke Island, off the coast of what is now North Carolina, with the hundred-odd men involved in Sir Walter Raleigh's most ambitious attempt to establish a colony in North America. He stayed in Virginia (as all the territory claimed by the British had been named) for a little over a year, surveying its resources with scientific care. On his return to England he found it necessary to defend Raleigh's projects against slander from those members of the company who had been miserable in America because "there were not to be found any English cities, nor such faire houses, nor

at their owne wish any of their olde accustomed daintie food, nor any soft beds of downe or fethers." Hariot's defense of Raleigh and Virginia took the form of a forty-six-page pamphlet, *A Briefe and True Report of the New Found Land of Virginia* (London, 1588). Soon after it was published, he was pensioned by the Earl of Northumberland so that he could devote himself to mathematics and astronomy, and in his later years he was famous for his work in algebra.

Panel (l to r) View of Jamestown in 1622 • Captain John Smith • Colonists trading with Indians • View of Plymouth in 1622 • Samuel Sewall

Hariot knew that a living was to be had in America, and easily, but he knew also that men would have to learn to use the commodities which the country provided. His book, therefore, was one of the first "promotion tracts," designed to inform prospective emigrants of the opportunities the New World could offer to ambitious men. Like the real estate brochure of the present day, the promotion tract almost invariably emphasized the possibilities of vast profits and minimized the probable losses and hardships. Even Hariot, to whom the New World was less an earthly paradise than it was to some of his successors, assured his readers that in Virginia one man "may prepare and husband so much ground (having once borne corne before) with lesse than foure and twenty hours labour, as shall yeeld him victual in a large proportion for a twelvemoneth." Probably no one ever came to America actually believing that twenty-four hours of work would provide nearly enough food for a year, but the tenor of the promotion tracts was almost that optimistic. They pictured a land of limitless resources, unbounded fertility, and ideal climate, and contributed appreciably to the notion of America as a place where mankind's centuries-old dream of freedom from want might at last be realized.

Hariot was also among the earliest of English visitors

to describe the American aborigines. Prospective settlers naturally wanted to know how numerous the Indians were and how friendly, but they had also a great curiosity about the new races and cultures to which the discovery of the New World had introduced Europeans. Among Hariot's companions on Roanoke Island was an artist, John White. In 1590, when Hariot's *Virginia* was reprinted at Frankfort, engravings from White's drawings were appended. Twenty-two of these engravings depicted the Indians, adding to Hariot's emphasis on their curious religious customs and suggesting what Hariot did not, that the savages were physically sturdy and handsome. Reading Hariot, one can grasp many of the motives for English colonization; looking at White's drawings, one can understand the long-lived literary tradition of the noble savage, whose simple, uncovetous life was to seem infinitely superior to that of supposedly civilized Europeans in the eyes of many seventeenth- and eighteenth-century writers.

G. B. Goode, "The Beginnings of Natural History in America," *Annual Report of the Smithsonian Institution for 1897*, Part II, Washington, 1901 • D. I. Bushnell, Jr., "John White—the First English Artist to Visit America," *Virginia Magazine of History and Biography*, October 1927, January and April 1928 • Bernard Jaffe, *American Men of Science*, New York, 1944

From

A Briefe and True Report of the New Found Land of Virginia

Hariot's *Virginia* was divided into six sections, as follows: (1) an introduction, in which he explained his purpose in writing the book; (2) a section on "marchantable" commodities, that is to say, products such as ship supplies and furs for which a European market existed; (3) a section on commodities "for victuall and sustenance of mans life," in which he listed edible vegetables, animals, fish, and

fowl, stating that many more had been observed and pictures made of them by White; (4) a brief section on materials for building and other uses; (5) an account of "the nature and manners of the people"; and (6) a conclusion in which the benefits of colonization are outlined. The fifth and sixth sections are here reprinted. Hariot's purpose in this tract was partly informative and partly persuasive. He wrote hurriedly, in all likelihood, but with the ease and freedom which characterize the best prose of Elizabethan England.

In its original edition of 1588, Hariot's *Virginia* is one of the rarest books relating to America. In 1600 Richard Hakluyt included Hariot's account in the third volume of his *Principall Navigations*, and it was thereafter readily available to European and American readers.

The apparent waywardness in spelling, punctuation, and abbreviation may be laid at the printer's door as much as at Hariot's; such things had not been standardized in the sixteenth century.

OF THE NATURE AND MANNERS
OF THE PEOPLE

It resteth I speake a word or two of the naturall inhabitants, their natures and maners, leauing large discourse thereof vntill time more conuenient hereafter: nowe onely so farre foorth, as that you may know, how that they in respect of troubling our inhabiting and planting, are not to be feared, but that they shall haue cause both to feare and loue vs, that shall inhabite with them.

They are a people clothed with loose mantles made of Deere skins, & aprons of the same rounde about their middles, all els naked; of such a difference of statures only as wee in England, hauing no edge tooles or weapons of yron or steele to offend vs withall, neither know they how to make any those weapons y^e they haue, are onlie bowes made of Witch hazle, & arrowes of reeds, flat edged truncheons also of wood about a yard long, neither haue they any thing to defēd thēselues but targets made of barks; and some armours made of stickes wickered together with thread

Their townes are but small, & neere the sea coast but few, some containing but 10. or 12. houses: some the greatest that we haue seene haue bene but of 20 houses if they be walled it is only done with barks of trees made fast to stakes, or els with poles onely fixed vpright and close one by another

Their houses are made of small poles made fast at the tops in rounde forme after the maner as is vsed in many arbories in our gardens of England, in most townes couered with barks, and in some with artificiall mattes made of long rushes, from the tops of the houses downe to the ground. The length of them is commonly double to the breadth, in some places they are but 12. and 16. yardes long, and in other some wee haue seene of foure and twentie.

In some places of the countrey one onely towne belongeth to the gouernment of a *Wiróans* or chiefe Lorde, in other some two or three, in some sixe, eight, & more; the greatest *Wiróans* that yet we had dealing with had but eightene townes in his gouernment, and able to make not aboue seuen or eight hundred fighting men at the most The language of euery gouernment is different from any other, and the farther they are distant the greater is the difference.

Their maner of warres amongst themselues is either by sudden surprising one an other most comonly about the dawning of the day, or moone light; or els by ambushes, or some suttile deuises Set battels are very rare, except it fall out where there are many trees, where eyther part may haue some hope of defence, after the deliuerie of euery arrow, in leaping behind some or other. 50

If there fall out any warres between vs & them, what their fight is likely to bee, we hauing aduantages against them so many maner of waies, as by our discipline, our strange weapons and deuises els, especially by ordinance great and small, it may be easily imagined; by the experience we haue had in some places, the turning vp of their heeles against vs in running away was their best defence.

In respect of vs they are a people poore, and for want of skill and iudgement in the knowledge and vse of our things, doe esteeme our trifles before thinges of greater value Notwithstanding in their proper manner considering the want of such meanes as we haue, they seeme very ingenious, For although they haue no such tooles, nor any such craftes, sciences and artes as wee, yet in those thinges they doe, they shewe excellencie of wit. And by howe much they vpon due consideration shall finde our manner of knowledges and craftes to exceede theirs in perfection, and speed for doing or execution, by so much the more is it probable that they shoulde desire our friendships & loue, and haue the greater respect for pleasing and obeying vs. Whereby may bee hoped if meanes of good gouernment bee vsed, that they may in short time be brought to ciuilitie, and the imbracing of true religion. 60

Some religion they haue alreadie, which although it be farre from the truth, yet beyng as it is, there is hope it may bee the easier and sooner reformed. 70

Text. from a facsimile of the 1588 edition prepared by R. G. Adams, Ann Arbor, 1931 • 14 y^e, that Elizabethan printers used the tilde for omitted letters, usually consonants, and made frequent use of abbreviations • 36 *Wiróans* Like other early travelers, Harriot sought to indicate the pronunciation of Indian words by phonetic spelling and accents. Most Indian tribes encountered from Maine to Virginia belonged to the Algonquian group, and some linguistic similarities may be observed by the careful reader • 61 *esteeme our trifles*, a reference to the pleasant Indian habit, observed from the time of Columbus, of exchanging gold and copper ornaments for bits of broken bottles, etc • 75 *true religion*, i.e., Anglicanism, as opposed to Roman Catholicism

They beleue that there are many Gods which they call *Mantóac*, but of different sortes and degrees, one onely chiefe and great God, which hath bene from all eternitie. Who as they affirme when hee purposed to make the worlde, made first other goddes of a principall order to bee as meanes and instruments to bee vsed in the creation and gouernment to follow, and after the Sunne, Moone, and Starres, as pettie goddes and the instruments of the other order more principall. First
 10 they say were made waters, out of which by the gods was made all diuersitie of creatures that are visible or inuisible.

For mankind they say a woman was made first, which by the woorking of one of the goddes, conceiued and brought foorth children And in such sort they say they had their beginning.

But how manie yeeres or ages haue passed since, they say they can make no relatio, hauing no letters nor other such meanes as we to keepe recordes of the particulari-
 20 ties of times past, but onelie tradition from father to sonne

They thinke that all the gods are of humane shape, & therfore they represent them by images in the formes of men, which they call *Kewasówok* one alone is called *Kewás*; Them they place in houses appropriate or temples which they call *Machicómuck*; Where they woorship, praie, sing, and make manie times offerings vnto them. In some *Machicómuck* we haue seene but
 30 on *Kewas*, in some two, and in other some three, The common sort thinke them to be also gods.

They beleue also the immortalitie of the soule, that after this life as soone as the soule is departed from the bodie according to the workes it hath done, it is eyther carried to heauen the habitacle of gods, there to enioy perpetuall blisse and happinesse, or els to a great pitte or hole, which they thinke to bee in the furthest partes of their part of the worlde towarde the sunne set, there to burne continually: the place they call *Popogusso*.

For the confirmation of this opinion, they tolde mee
 40 two stories of two men that had been lately dead and reuiued againe, the one happened but few yeres before our comming into the countrey of a wicked man which hauing bene dead and buried, the next day the earth of the graue beeing seene to moue, was taken vp againe; Who made declaration where his soule had bene, that is to saie very neere entring into *Popogusso*, had not one

of the gods saued him & gaue him leaue to returne againe, and teach his friends what they should doe to auoid that terrible place of torment.

The other happened in the same yeere wee were there, but in a towne that was threescore miles from vs, and it was tolde mee for straunge newes that one beeing dead, buried and taken vp againe as the first, shewed that although his bodie had lien dead in the graue, yet his soule was aliue, and had trauailed farre in a long broade waie, on both sides whereof grewe most delicate and pleasaunt trees, bearing more rare and excellent fruites then euer hee had seene before or was able to expresse, and at length came to most braue and faire houses, neere which hee met his father, that had
 6 beene dead before, who gaue him great charge to goe backe againe and shew his friendes what good they were to doe to enioy the pleasures of that place, which when he had done he should after come againe.

What subtilty soeuer be in the *Wiroances* and Priestes, this opinion worketh so much in manie of the common and simple sort of people that it maketh them haue great respect to their Gouernours, and also great care what they do, to auoid torment after death, and to enioy blisse, although notwithstanding there is punish-
 7 ment ordained for malefactours, as stealers, whoremoongers, and other sortes of wicked doers, some punished with death, some with forfeitures, some with beating, according to the greatnes of the factes.

And this is the summe of their religiō, which I learned by hauing special familiarity with some of their priestes. Wherein they were not so sure grounded, nor gaue such credite to their traditions and stories but through conuersing with vs they were brought into great doubts of their owne, and no small admiration of
 8 ours, with earnest desire in many, to learne more than we had meanes for want of perfect vtterance in their language to expresse.

Most things they sawe with vs, as Mathematicall instruments, sea compasses, the vertue of the loadstone in drawing yron, a perspective glasse whereby was

37 towarde . . . set In folklore of primitive peoples, the west is more often the abode of the blest than of the damned "Gone west," still a common euphemism for death, is a survival • 84 Mathematicall instruments, the astrolabe and astrolabe quadrant, used to determine latitude by measurement of the angle between a celestial body and the horizon

THE WIROANS, from the drauing by John White, engraved by Theodore De Bry in 1590.

shewed manie strange sightes, burning glasses, wildefire woorkes, gunnes, bookes, writing and reading, spring clocks that seeme to goe of themselves, and manie other thinges that wee had, were so straunge vnto them, and so farre exceeded their capacities to comprehend the reason and meanes how they should be made and done, that they thought they were rather the works of gods then of men, or at the leastwise they had bin giuen and taught vs of the gods Which made manie of them to haue such opinion of vs, as that if they knew not the trueth of god and religion already, it was rather to be had from vs, whom God so specially loued then from a people that were so simple, as they found themselves to be in comparison of vs Whereupon greater credite was giuen vnto that we spake of concerning such matters

Manie times and in euery towne where I came, according as I was able, I made declaration of the contentes of the Bible; that therein was set foorth the true and onelie GOD, and his mightie woorkes, that therein was containd the true doctrine of saluation through Christ, with manie particularities of Miracles and chiefe poyntes

of religion, as I was able then to vtter, and thought fitte for the time And although I told them the booke materially & of it self was not of anie such vertue, as I thought they did conceiue, but onely the doctrine therein contained, yet would many be glad to touch it, to embrace it, to kisse it, to hold it to their brests and heades, and stroke ouer all their bodie with it, to shewe their hungrie desire of that knowledge which was spoken of.

The Wiroans with whom we dwelt called *Wingina*,³⁰ and many of his people would be glad many times to be with vs at our praiers, and many times call vpon vs both in his owne towne, as also in others whither he sometimes accompanied vs, to pray and sing Psalmes, hoping thereby to bee partaker of the same effectes which wee by that meanes also expected.

Twise this Wiroans was so grievously sicke that he was like to die, and as hee laie languishing, doubting of anie helpe by his owne priestes, and thinking he was in such daunger for offending vs and thereby our god,⁴⁰ sent for some of vs to praie and bee a meanes to our God that it would please him either that he might liue or after death dwell with him in blisse, so likewise were the requestes of manie others in the like case.

On a time also when their corne began to wither by reason of a drouth which happened extraordinarily, fearing that it had come to passe by reason that in some thing they had displeased vs, many woulde come to vs & desire vs to praie to our God of England, that he would preserue their corne, promising that when it was⁵⁰ ripe we also should be partakers of the fruite

There could at no time happen any strange sicknesse, losses, hurtes, or any other crosse vnto them, but that they would impute to vs the cause or meanes thereof for offending or not pleasing vs.

One other rare and strange accident, leauing others, will I mention before I ende, which moued the whole cuntry that either knew or hearde of vs, to haue vs in wonderfull admiration.

There was no towne where we had any subtile⁶⁰ deuise practised against vs, we leauing it vnpunished or not reuenged (because wee sought by all meanes possible to win them by gentlenesse) but that within a few dayes after our departure from euerie such towne,

1 wildefire, Greek fire, combustible materials used to set fire to enemy ships, etc.

the people began to die very fast, and many in short
pace, in some townes about twentie, in some fourtie,
in some sixtie, & in one sixe score, which in trueth was
every manie in respect of their numbers. This happened
in no place that wee coulede learne but where wee had
dined, where they vsed some practise against vs, and
after such time; The disease also so strange, that they
neither knew what it was, nor how to cure it, the like
by report of the oldest men in the countrey neuer hap-
pened before, time out of minde. A thing specially ob-
serued by vs as also by the naturall inhabitants themselves.

Insomuch that when some of the inhabitantes which
were our friends & especially the *Wiroans Wingina* had
observed such effects in foure or fiue towns to follow
their wicked practises, they were perswaded that it was
the worke of our God through our meanes, and that
wee by him might kil and slaue whom wee would with-
out weapons and not come neere them.

And thereupon when it had happened that they had
understanding that any of their enemies had abused vs
in our journeyes, hearing that wee had wrought no
revenge with our weapons, & fearing vpon some cause
the matter should so rest: did come and intreate vs
that we would bee a meanes to our God that they as
others that had dealt ill with vs might in like sort die;
alleging howe much it would be for our credite and
profite, as also theirs; and hoping furthermore that we
would do so much at their requests in respect of the
friendship we professe them.

Whose entreaties although wee shewed that they were
vngodlie, affirming that our God would not subiect him
selfe to anie such praiers and requestes of men: that in
deede all thinges haue beene and were to be done ac-
cording to his good pleasure as he had ordained and
that we to shew our selues his true seruants ought rather
to make petition for the contrarie, that they with them
might liue together with vs, bee made partakers of his
truth & serue him in righteousness; but notwithstanding
in such sort, that wee referre that as all other thinges,
to bee done according to his diuine will & pleasure,
and as by his wisdom he had ordained to be best.

Yet because the effect fell out so sodainly and shortly
after according to their desires, they thought neuerthe-
lesse it came to passe by our meanes, and that we in
vsing such speeches vnto them did but dissemble the
matter, and therefore came vnto vs to giue vs thanks

in their manner that although wee satisfied them not in
promise, yet in deedes and effect we had fulfilled
their desires.

This maruelous accident in all the countrey wrought
so strange opinions of vs, that some people could not
tell whether to thinke vs gods or men, and the rather
because that all the space of their sicknesse, there was
no man of ours knowne to die, or that was specially
sicke they noted also that we had no women amongst
vs, neither that we did care for any of theirs.

Some therefore were of opinion that wee were not
borne of women, and therefore not mortall, but that
wee were men of an old generation many yeeres past
then risen againe to immortalitie.

Some woulde likewise seeme to prophesie that there
were more of our generation yet to come, to kill theirs
and take their places, as some thought the purpose was by
that which was already done.

Those that were immediatly to come after vs they
imagined to be in the aire, yet inuisible & without
bodies, & that they by our intreaty & for the loue of vs
did make the people to die in that sort as they did by
shooting inuisible bullets into them.

To confirme this opinion their phisitions to excuse
their ignorance in curing the disease, would not be
ashamed to say, but earnestly make the simple people
beleue, that the strings of blood that they sucked out of
the sicke bodies, were the strings wherewithall the in-
uisible bullets were tied and cast

Some also thought that we shot them our selues out
of our pieces from the place where we dwelt, and killed
the people in any such towne that had offended vs as
we listed, how farre distant from vs soeuer it were.

And other some saide that it was the speciall worke
of God for our sakes, as wee our selues haue cause in
some sorte to thinke no lesse, whatsoeuer some doe or
maie imagine to the contrarie, specially some Astrologers
knowing of the Eclipse of the Sunne which wee saw
the same yeere before in our voyage thitherward,
which vnto them appeared very terrible And also of a
Comet which beganne to appeare but a few daies before
the beginning of the said sicknesse. But to conclude
them from being the speciall causes of so speciall an
accident, there are farther reasons then I thinke fit at
this present to bee alleadged

These their opinions I haue set downe the more at

large that it may appeare vnto you that there is good hope they may be brought through discreet dealing and gouernement to the imbracing of the trueth, and consequently to honour, obey, feare and loue vs.

And although some of our companie towards the ende of the yeare, shewed themselves too fierce, in slaying some of the people, in some towns, vpon causes that on our part, might easily enough haue been borne withall. yet notwithstanding because it was on their part
10 iustly deserued, the alteration of their opinions generally & for the most part concerning vs is the lesse to bee doubted. And whatsoever els they may be, by carefulnesse of our selues neede nothing at all to be feared

The best neuerthelesse in this as in all actions besides is to be endeuoured and hoped, & of the worst that may happen notice to bee taken with consideration, and as much as may be eschewed.

THE CONCLUSION

Now I haue as I hope made relation not of so fewe and final things but that the countrey of men that are
20 indifferent & wel disposed maie be sufficiently liked. If there were no more knowen then I haue mentioned, which doubtlesse and in great reason is nothing to that which remaineth to bee discovered, neither the soile, nor commodities. As we haue reason so to gather by the differēce we found in our trauals, for although all which I haue before spokē of, haue bin discovered & experimented not far fro the sea coast where was our abode & most of our traauiling yet somtimes as we made our iourneies farther into the maine and countrey,
30 we found the soyle to bee fatter, the trees greater and to growe thinner; the grounde more firme and deeper mould, more and larger champions, finer grasse and as good as euer we saw any in England, in some places rockie and farre more high and hillie ground; more plentie of their frutes; more abundance of beastes; the more inhabited with people, and of greater pollicie & larger dominions, with greater townes and houses

Why may wee not then looke for in good hope from the inner parts of more and greater plentie, as well of
40 other things, as of those which wee haue alreadie discovered? Vnto the Spaniardes happened the like in discovering the maine of the West Indies. The maine

also of this countrey of *Virginia*, extending some wayes so many hundreds of leagues, as otherwise then by the relation of the inhabitants wee haue most certaine knowledge of, where yet no Christian Prince hath any possession or dealing, cannot but yeeld many kinds of excellent commodities, which we in our discouerie haue not yet seene.

What hope there is els to be gathered of the nature
50 of the climate, being answerable to the Iland of *Iapan*, the land of *China*, *Persia*, *Iury*, the Ilandes of *Cyprus* and *Candy*, the South parts of *Greece*, *Italy*, and *Spaine*, and of many other notable and famous countreies, because I meane not to be tedious, I leaue to your owne consideration.

Whereby also the excellent temperature of the ayre there at all seasons, much warmer then in England, and neuer so violently hot, as sometimes is vnder & between the Tropikes, or nere them, cannot bee vnknowne vnto
60 you without farther relation.

For the holsomnesse thereof I neede to say but thus much: that for all the want of prouision, as first of English victuall; excepting for twentie daies, wee liued only by drinking water and by the victuall of the countrey, of which some sorts were very straunge vnto vs, and might haue bene thought to haue altered our temperatures in such sort as to haue brought vs into some greeuous and dangerous diseases: secōdly the want of English meanes, for the taking of beastes, fishe, and foule, which by the
70 helpe only of the inhabitants and their meanes, could not bee so suddenly and easily prouided for vs, nor in so great numbers & quantities, nor of that choise as otherwise might haue bene to our better satisfaction and contentment. Some want also wee had of clothes. Furthermore, in all our trauailes which were most speciall and often in the time of winter, our lodging was in the open aire vpon the grounde. And yet I say for all this, there were but foure of our whole company (being one hundred and eight) that died all the yeere and that
80 but at the latter ende thereof and vpon none of the aforesaide causes. For all foure especially three were

32 champions, champaigns, flat, open plains • 42 maine, mainland, as in 'Spanish Main,' the north coast of South America Harriot had in mind the riches of Peru and Mexico • 51 answerable to, in the same latitude as • 52 Iury may possibly be an old spelling of Jewry or Palestine • 53 Candy, Candia or Crete

feeble, weake, and sickly persons before euer they came thither, and those that knewe them much marueyled that they liued so long beeing in that case, or had aduentured to trauaile.

Seeing therefore the ayre there is so temperate and holsome, the soyle so fertile and yeelding such commodities as I haue before mentioned, the voyage also thither to and fro beeing sufficiently experimented, to bee performed thrise a yeere with ease and at any season thereof: And the dealing of *Sir Water Raleigh* so liberall in large giuing and graunting lande there, as is alreadie knowen, with many helpes and furtherances els (The least that hee hath graunted hath benee fiue hundred acres to a man onely for the aduenture of his person) · I hope there remaine no cause wherby the action should be misliked.

If that those which shall thither trauaile to inhabite and plant bee but reasonably prouided for the first yere as those are which were transported the last, and beeing there doe vse but that diligence and care as is requisite, and as they may with ease. There is no doubt but for the time following they may haue victuals that is excellent good and plentie enough; some more Englishe sortes of cattaille also hereafter, as some haue bene before, and are there yet remaining, may and shall bee God willing thither transported: So likewise our kinde of frutes, rootes, and hearbes may bee there planted and sowed, as some haue bene alreadie, and proue wel: And in short time also they may raise of those sortes of commodities which I haue spoken of as shall both enrich them selues, as also others that shall deale with them.

And this is all the frutes of our labours, that I haue thought necessary to aduertise you of at this present what els concerneth the nature and manners of the inhabitants of *Virginia*: The number with the particularities of the voyages thither made, and of the actions of such that haue bene by *Sir Water Raleigh* therein and there employed, many worthy to bee remembred, as of the first discoverers of the Countrey. of our Generall for the time *Sir Richard Greinuile*: and after his departure, of our Gouvernour there Master *Rafe Lane*: with diuers others directed and employed vnder theyr gouernement: Of the Captaynes and Masters of the voyages made since for transportations, of the Gouvernour and assistants of those alredie transported, as of many persons, accidents, and thinges els, I haue ready in a dis-

THEIR MANNER OF PRAINGE,
from White's drawing.

course by it self in maner of a Chronicle according to the course of times, and when time shall bee thought conuenient shall be also published.

Thus referring my relation to your fauourable constructions, expecting good successe of the action, from him which is to be acknowledged the authour and gouvernour not only of this but of all things els, I take my leaue of you, this moneth of *February*. 1588.

1588

10 *Sir Water* (Walter) *Raleigh* (1552?-1618) Later colonists, Captain John Smith among them, were inclined to regard Raleigh as a grandiose dreamer who held out false hopes of easily won riches • 40 *Sir Richard Greinuile* (Grenville, 1541?-1591) commanded the fleet of seven ships in which Hariot and his companions came to America Tennyson's "The Revenge" is based upon Grenville's heroic death a few years later • 41 *Master Rafe* (Ralph) *Lane* (1530?-1603) was in command on Roanoke Island His account of the settlement was printed in Hakluyt's *Principall Navigations*, just before Hariot's • 46 I . . . discourse. Apparently the time for its publication did not arrive

John Smith

1579 • 1631

The band of Englishmen with whom John Smith sailed from London down the Thames and out to sea in 1606 was poorly fitted for battling the American wilderness. Only a few were workmen; the rest were all "poor gentlemen, tradesmen, serving-men, libertines, and such like." They, like Smith, had seen a chance to fatten their purses by setting up a new colony. Holding, perhaps, with the common contemporary notion that the new land was so rich that even dripping pans and handcuffs there were made of pure gold, they probably expected few hardships when in May 1607 they sailed into Hampton Roads, Virginia.

Apparently the colonizers were lucky to have Captain Smith's leadership on what turned out to be a heart-breaking although, in the long run, a successful venture—the establishment of the first permanent British colony on this continent. One must say "apparently," because what we know about Smith's ability and background he chiefly has told us, and the blustering soldier of fortune was not a man to underestimate his valor or to let literal truth spoil a good story. His account told how he had been born at Willoughby and educated in the free schools there, how he had broken family ties in his teens, had gone into military service in his twenties, and thereafter—rushing into the midst of any fighting in Europe or beyond its frontiers—had slain Turks, Tartars, or Indians with equal aplomb.

During his stay in Virginia from May 1607 to October 1609, Smith, according to his account, efficiently led

the colonists, set up relationships with the Indians, and explored the country. In addition, somehow, he found time to write his first book and to send it overseas for publication. In the fall of 1609 Smith went back to England and remained there until 1614. That year, some six years before the settlement of Plymouth, he returned to America to explore New England minutely from the Penobscot River to Cape Cod. Believing that a territory of such extent deserved a name of its own, he christened it New England. At home he made an excellent map of the coast and dotted it with English names such as Cape Ann, Charles River, and Plymouth. In 1615 he sailed again for New England with a body of colonizers who traveled on two ships. This expedition, however, was cut short when French pirates stopped the vessels. Smith was captured and taken to Rochelle, but he shortly escaped and returned to his native country. His exploring days over, he remained there until his death in London, June 21, 1631.

Historians have pictured the mustachioed captain writing his first book in a sleazy wilderness tent by the light of a blazing pine-knot. However it was composed, *A True Relation* (1607) was a book wrought on the scene between clashes with redmen. It and books which followed it, notably *A Description of New England* (1616) and *The Generall Historie of Virginia, New England, and the Summer Isles* (1624), written to encourage and direct colonizing or to glorify Smith, reveal his gusto and his imaginativeness, combined with

what seems to be vivid circumstantial detail. Thus the poetry and hardships of the colonizing adventure fuse in these accounts.

Smith's works are interesting for their characterization of the author, their picturing of happenings, and their style. The style is that of an educated—but not too educated—man, writing imaginatively about first-hand experiences. It has the varied rhythms, the homeliness

fused with strangeness and stateliness, of prose in the age of the King James Bible. Callous-fisted soldier though he was, Smith produced several fine bits of prose like those which follow.

From • A Description of New England

Motives for Colonizing

The following selection from *A Description of New England* (1616) shows Smith as the advocate of the colonizing adventure. Eight years later the passage was reprinted in *The Generall Historie*. Like much of the writing of the period and like many other passages by Smith, this has as its purpose the attraction of settlers to the new colonies. As he addresses several arguments to his countrymen, Smith puts into poetic words the attitudes of the adventurous explorers and settlers of his day. The titles for this and the following selection were supplied by the editors.

Who can desire more content, that hath small meanes, or but only his merit to advance his fortunes, then to tread and plant that ground he hath purchased by the hazard of his life? If he have but the taste of virtue and magnanimity, what to such a minde can bee more pleasant, then planting and building a foundation for his Posteritie, gotte from the rude earth, by Gods blessing and his owne industry without prejudice to any? If hee have any graine of faith or zeale in Religion, what
 10 can hee doe lesse hurtfull to any: or more agreeable to God, then to seeke to convert those poore Salvages to

know Christ, and humanitie, whose labours with discretion will triple requite thy charge and paines? What so truly su[1]tes with honour and honestie, as the discovering things unknowne? erecting Townes, peopling Countries, informing the ignorant, reforming things unjust, teaching virtue, and gaine to our Native mother-countrie, a kingdom to attend her finde employment for those that are idle, because they know not what to doe so farre from wronging any, as to cause posterity to remember thee; and remembering thee, ever honour that remembrance with praise?

Consider: what were the beginnings and endings of the Monarkies of the *Chaldeans*, the *Syrians*, the *Grecians*, and *Romanes*, but this one rule; What was it they would not do for the good of their common weale, or their Mother-citie? For example *Rome*. What made her such a Monarchesse, but onely the adventures of her youth, not in riots at home, but in dangers abroad? and the justice and judgement out of their experiences, when they grewe aged. What was their ruine and hurt but this; The excesse of idlenesse, the fondnesse of Parents, the want of experience in Magistrates, the admiration of their undeserved honours, the contempt of true merit, their unjust jealo[u]sies, their politike incredulities, their hypocriticall seeming goodnesse, and their deeds of secret lewdnesse? finally, in fine, growing onely formall temporists, all that their predecessors got in many yeeres they lost in a few daies. Those by their pain and vertues became Lords of the world, they by their ease and vices became slaves to their servants. This is the difference betwixt the use of Armes in the field, and on the monu-

Text (for this and the following selection) Captain John Smith, *Works, 1608-1631*, ed. Edward Arber, *The English Scholars Library*, No. 16, Birmingham, 1884

ments of stones; the golden age and the leaden age, prosperity and miserie, justice and corruption, substance and shadowes, words and deeds, experience and imagination, making Commonwealths, and marring Commonwealths, the fruits of virtue, and the conclusions of vice

Then, who would live at home idly (or thinke in himselfe any worth to live) onely to eate, drink and sleepe, and so die? Or by consuming that carelessly, his friends got worthily? Or by using that miserably, that maintained vertue honestly? Or for being descended nobly, pine with the vaine vaunt of great kindred in penurie? Or (to maintaine a silly shew of bravery) toyle out thy heart, soule, and time, basely, by shifts, tricks, cards and dice? Or by relating newes of others actions, sharke here and there for a dinner, or supper, deceive thy friends, by faire promises and dissimulation, in borrowing where thou never intendest to pay, offend the lawes, surfeit with excesse, burden thy Country, abuse thy selfe, despaire in want, and then couzen thy kindred, yea even thy owne brother, and wish thy parents death (I will not say damnation) to have their estates? though thou seest what honours, and rewards, the world yet hath for them [who] will seeke them and worthily deserve them.

I would bee sor[r]ly to offend, or that any should mistake my honest meaning: for I wish good to all, hurt to none. But rich men for the most part are growne to that dotage, through their pride in their wealth, as though there were no accident could end it, or their life

And what hellish care do such take to make it their owne miserie and their Countries spoile, especially when there is most neede of their employment? drawing by all manner of inventions, from the Prince and his honest subjects, even the vitall spirits of their powers and estates as if their Bagges, or Bragges were so powerfull a defence, the malicious could not assault them, when they are the onely baite, to cause us not to bee onely assaulted, but betrayed and murdered in our owne security, ere wee well perceive it.

May not the miserable ruine of *Constantinople*, their impregnable walles, riches, and pleasures [at] last taken by the *Turke* (which were then but a bit, in comparison of their mightines) now remember us of the effects of private covetousnesse? at which time the good *Emperour* held himselfe rich enough, to have such rich subjects, so formall in all excesse of vanity, all kinde of delicacie and prodigalitie. His povertie when the *Turke* besieged, the citizens (whose merchandizing thoughts

were onely to get wealth, little conceiving the desperate resolution of a valiant expert enemy) left the Emp[erour] so long to his conclusions, having spent all he had to pay his young, raw discontented Souldiers; that sodainly he, they, and their cite were all a prey to the devouring *Turke*. And what they would not spare for the maintenance of them who adventured their lives to defend them, did serve onely their enemies to torment them, their friends and countrey, and all Christendome to this present day. Let this lamentable example remember you that are rich (seeing there are such great theeves in the world to robbe you) not [to] grudge to lend some proportion, to breed them that have little, yet [are] willing to learne how to defend you for, it is too late when the deed is a-doing.

The *Romanes* estate hath beene worse then this: for, the meere coveitousnesse and extortion of a few of them, so moved the rest, that not having any employment but contemplation, their great judgements grew to so great malice, as themselves were sufficient to destroy themselves by faction. Let this move you to imbrace employment for those whose educations, spirits, and judgements want but your purses, not onely to prevent such accustomed dangers, but also to gaine more thereby then you have.

And you fathers, that are either so foolishly fond, or so miserably coveitous, or so wilfully ignorant, or so negligently careless, as that you will rather maintaine your children in idle wantonness, till they grow your masters, or become so basely unkinde, as they wish nothing but your deaths, so that both sorts grow dissolute and although you would wish them any where to escape the gallows, and ease your cares, though they spend you here one, two or three hundred pound[s] a yeer, you would grudge to give halfe so much in adventure with them to obtaine an estate, which in a small time, but with a little assistance of your providence, might bee better then your owne. But if an Angell should tell you, [that] any place yet unknowne can afford such fortunes; you would not beleieve it, no more then *Columbus* was be-

39 the miserable Constantinople. The fall of Constantinople, in 1453, followed a fierce forty-day siege. Historians agree with Smith that Constantine's inability to pay his troops contributed to their ineffectiveness, but they disagree with Smith's claim that the defending force was larger than the attacking force • 63 The Romanes estate. . . . This paragraph contains Smith's version of the causes for the fall of the Roman Empire

leeved there was any such Land as is now the well knowne abounding *America*; much lesse such large Regions as are yet unknowne, as well in *America*, as in *Affrica* and *Asia*, and *Terra incognita*; where were courses for gentlemen (and them that would be so reputed) more suiting their qualities, then begging from their Princes generous disposition, the labours of his subjects, and the very marrow of his maintenance.

I have not beene so ill bred, but I have tasted of *Plenty* 10 and *Pleasure*, as well as *Want* and *Miserie*: nor doth necessitie yet, or occasion of discontent, force me to these endeavors nor am I ignorant what small thanke[s] I shall have for my paines, or that many would have the Worlde imagine them to bee of great judgement, that can but blemish these my designs, by their witty objections and detractions yet (I hope) my reasons with my deeds, will so prevaile with some, that I shall not want employment in these affaires, to make the most blinde see his owne senselesnesse and incredulity, Hoping that 20 gaine will make them affect that which Religion, Charity and the Common good cannot. It were but a poore device in me, To deceive my selfe, much more the King, State, my Friends and Countrey, with these inducements, which seeing his Majestie hath given permission, I wish all sorts of worthie, honest, industrious spirits, would understand and if they desire any further satisfaction, I will doe my best to give it. Not to perswade them to goe onely, but goe with them. Not leave them there, but live with them there.

I will not say, but by ill providing and undue managing, such courses may bee taken [that] may make us miserable enough. But if I may have the execution of what I have projected, if they want to eate, let them eat or never digest Mee. If I performe what I say, I desire but that reward out of the gaines [which] may su[1]te my paines, quality, and condition. And if I abuse you with my tongue, take my head for satisfaction. If any dislike at the yeeres end, defraying their charge, by my consent they should freely returne. I feare not want of 40 companie sufficient, were it but knowne what I know of these Countries, and by the proove of that wealth I hope yeerely to returne, if God please to lesse me from such accidents, as are beyond my power in reason to prevent. For, I am not so simple to thinke, that ever any other motive then wealth, will ever erect there a Commonwealth, or draw companie from their ease and humours at home, to stay in *New England* to effect my purposes

And lest any should thinke the toile might be insupportable, though these things may bee had by labour, and diligence. I assure my selfe there are who delight 5 extremely in vaine pleasure, that take much more paines in *England* to enjoy it, then I should doe here [*New England*] to gaine wealth sufficient, and yet I thinke they should not have halfe such sweet content. for our pleasure here is still gaines, in *England* charges and losse. Heer nature and liberty affords us that freely, which in *England* we want, or it costeth us deerely. What pleasure can bee more, then (being tired with any occasion a-shore, in planting Vines, Fruits, or Hearbs, in contriving their owne grounds to the pleasure of their 6: owne minds, their Fields, Gardens, Orchards, Buildings, Ships, and other workes, &c.) to recreate themselves before their owne doores in their owne boates upon the Sea, where man, woman and childe, with a small hooke and line, by angling, may take divers sorts of excellent fish, at their pleasures? And is it not pretty sport, to pull up two pence, six pence, and twelve pence, as fast as you can ha[ul]le and veare a line? He is a very bad Fisher [that] cannot kill in one day with his hooke and line, one, two, or three hundred Cods which dressed 7 and dried, if they bee sold there for ten shillings a hundred, though in *England* they will give more then twentie, may not both the servant, the master and marchant, be well content with this gaine? If a man worke but three daies in seaven, he may get more then hee can spend unlesse he will be excessive. Now that Carpenter, Mason, Gardiner, Taylor, Smith, Sailer, Forgers, or what other, may they not make this a pretty recreation though they fish but an houre in a day, to take more then they can eat in a weeke? or if they will not eat it, because 8: there is so much better choice, yet sell it, or change it, with the fishermen or marchants for any thing they want. And what sport doth yeeld a more pleasing content, and lesse hurt and charge then angling with a hooke; and crossing the sweet ayre from Ile to Ile, over the silent streames of a calme Sea? Wherein the most curious may finde pleasure, profit, and content.

Thus, though all men be not fishers yet all men, whatsoever, may in other matters doe as well. For necessity doth in these cases so rule a Commonwealth, and 9 each in their severall functions, as their labours in their

34 digest Mee, exploit me • 68 haule and veare, pull in and let out
• 76 excessive, extravagant

qualities may be as profitable, because there is a necessary mutuall use of all.

For Gentlemen, what exercise should more delight them, then ranging dayly these unknowne parts, using fowling and fishing, for hunting and hawking? and yet you shall see the wilde-haukes give you some pleasure, in seeing them stoope (six or seven times after one another) an houre or two together, at the skuls of fish in the faire harbours, as those a-shore at a foule, and never trouble nor torment yourselves, with watching, mewwing, feeding, and attending them nor kill horse and man with running and crying, *See you not a hawk?* For hunting also the woods, lakes and rivers afford not onely chase sufficient, for any that delights in that kinde of toile or pleasure, but such beasts to hunt, that besides the delicacy of their bodies for food, their skins are so rich, as they will recompence thy daily labour with a Captains pay.

For labourers, if those that sowe hemme, rape, turnups, parsnips, carrats, cabidge, and such like, give 20, 30, 40, 50 shillings yearely for an acre of ground, and meat[,] drinke[,] and wages to use it, and yet grow rich, when better, or at least as good ground may be had and cost nothing but labour, it seems strange to me, any such should there grow poore

My purpose is not to perswade children from their parents, men from their wives, nor servants from their masters onely, such as with free consent may be spared: But that each parish, or village, in Citie, or Countrey, that will but apparell their fatherlesse children of thirteene or foureteene years of age, or young married people that have small wealth to live on, heere by their labour may live exceeding well provided alwaies, that first there bee a sufficient power to command them, houses to receive them, meanes to defend them, and meet provisions necessarie for them, for any place may bee over-lain and it is most necessarie to have a fortresse (ere this grow to practice) and sufficient masters. (as, Carpenters, Masons, Fishers, Fowlers, Gardiners, Husbandmen, Sawyers, Smiths, Spinsters, Taylors, Weavers, and such like) to take ten, twelve, or twentie, or as there is occasion, for Apprentises The Masters by this may quicklie growe rich, these may learne their trades themselves, to doe the like, to a generall and an incredible benefit, for King, and Countrey, Master, and Servant

From • The Generall Historie of Virginia

Pocahontas

The passage recounting Smith's captivity and his rescue by Pocahontas, from *The Generall Historie* (1624), gains in interest if it is placed alongside the account of the same events which had appeared in 1608 in his *A True Relation of Such Occurrences and Accidents of Note as Hath Happened in Virginia*. Henry Adams notes that, according to the earlier version, Smith had shortly found that his captors were using him with kindness, but that in the later he constantly feared violence; that "eight guards, which had been

sufficient in 1608, were multiplied to thirty or forty tall fellows in 1624," and so on. Such changes heightened the drama, making both the captain and his captors more formidable. The most notable changes added to the ferocity of Powhatan and showed Pocahontas in the act of rescuing the heroic captain. The modifications suggest that Smith was perhaps better qualified as a writer of historical fiction than as a sternly accurate historian. The passage, nevertheless, vividly re-creates the life of the colonists and reveals the character of its picturesque author. The zestful yet workaday style is typical

The next voyage hee proceeded so farre that with much labour by cutting of trees insunder he made his passage, but when his Barge could passe no farther, he

1 hee, John Smith The account is written in the third person

left her in a broad bay out of danger of shot, commanding none should goe a shore till his returne: himselfe with two English and two Salvages went up higher in a Canowe, but hee was not long absent, but his men went a shore, whose want of government, gave both occasion and opportunity to the Salvages to surprise one *George Cassen*, whom they slew, and much failed not to have cut of[f] the boat and all the rest

Smith little dreaming of that accident, being got to
 10 the marshes at the rivers head, twentie myles in the desert, had his two men slaine (as is supposed) sleeping by the Canowe, whilst himselfe by fowling sought them victuall, who finding he was beset with 200 Salvages, two of them hee slew, still defending himselfe with the ayd of a Salvage his guid[e], whom he bound to his arme with his garters, and used him as a buckler: yet he was shot in his thigh a little, and had many arrowes that stucke in his cloathes but no great hurt, till at last they tooke him prisoner

20 When this newes came to *James* towne, much was their sorrow for his losse, fewe expecting what ensued

Sixe or seven weekes those Barbarians kept him prisoner, many strange triumphes and conjurations they made of him, yet hee so demeaned himselfe amongst them, as he not onely diverted them from surprising the Fort, but procured his owne libertie, and got himselfe and his company such estimation amongst them, that those Salvages admired him more then their owne *Quiyouckosucks*.

30 The manner how they used and delivered him, is as followeth

The Salvages having drawne from *George Cassen* whether Captaine *Smith* was gone, prosecuting that opportunity they followed him with 300 bowmen, conducted by the King of *Pamaunkee*, who in divisions searching the turnings of the river, found Robinson and Emry by the fire side, those they shot full of arrowes and slew. Then finding the Captaine, as is said, that used the Salvage that was his guide as his shield (three of them
 40 being slaine and divers other so gauld) all the rest would not come neere him. Thinking thus to have returned to his boat, regarding them, as he marched, more then his way, [Smith] slipped up to the middle in an oasie creeke & his Salvage with him, yet durst they not come to him till being neere dead with cold, he threw away his armes. Then according to their composition they drew him forth and led him to the fire, where his men

were slaine. Diligently they chafed his benumbed limbs

He demanding for their Captaine, they shewed him *Opechankanough*, King of *Pamaunkee*, to whom he gave a round Ivory double compass Dyall. Much they marvelled at the playing of the Fly and Needle, which they could see so plainely, and yet not touch it, because of the glasse that covered them. But when he demonstrated by that Globe-like Jewell, the roundness of the earth, and skies, the spheare of the Sunne, Moone, and Starres, and how the Sunne did chase the night round about the world continually, the greatnesse of the Land and Sea, the diversitie of Nations, varietie of complexions, and how we were to them Antipodes, and many other such like matters, they all stood as amazed with admiration.

Notwithstanding, within an houre after they tyed him to a tree, and as many as could stand about him prepared to shoot him, but the King holding up the Compass in his hand, they all laid downe their Bowes and Arrowes, and in a triumphant manner led him to Orapaks, where he was after their manner kindly feasted, and well used.

Their order in conducting him was thus, Drawing themselves all in fyle, the King in the midst had all their Peeces and Swords borne before him. Captaine *Smith* was led after him by three great Salvages, holding him fast by each arme and on each side six went in fyle with their Arrowes nocked. But arriving at the Towne (which was but onely thirtie or fortie hunting houses made of Mats, which they remove as they please, as we our tents) all the women and children staring to behold him, the souldiers first all in fyle performed the forme of a Bissom so well as could be, and on each flanke, officers as Serjeants to see them keepe their orders. A good time they continued this exercise, and then cast themselves in a ring, dauncing in such severall Postures, and singing and yelling out such hellish notes and screeches, being strangely painted, every one his quiver of Arrowes, and at his backe a club, on his arme

7 much failed not, 'came near cutting off the boat and all the rest'

• 11 two men slaine, 'Jehu Robinson and Thomas Emry slaine'—*Smith* • 22 Sixe . . . weekes. "More accurately about three weeks—Dec 16, 1607—Jan 8, 1608"—*Arber* • 29 *Quiyouckosucks*. Henry Spelman, in his *Relation of Virginea* (1613), wrote, "In ye Patomecks country they have an other god whom they call Quiouquasacke, and untu ther Images they offer Beades and Copper if at any time they want Rayne or have to much . . ." • 33 whether, news of whither • 40 gauld, galled • 43 oasie, oozy • 46 composition, agreement • 78 Bissom, a military formation

a Fox or an Otters skinne, or some such matter for his vambrace; their heads and shoulders painted red, with Oyle and *Pocones* mingled together, which Scarlet-like colour made an exceeding handsome shew; his Bow in his hand, and the skinne of a Bird with her wings abroad dried, tyed on his head, a peece of copper, a white shell, a long feather, with a small rattle growing at the tayles of their snakes tyed to it, or some such like toy. All this while *Smith* and the King stood in the middest guarded, as before is said, and after three dances they all departed. *Smith* they conducted to a long house, where thirtie or fortie tall fellowes did guard him, and ere long more bread and venison was brought him then would have served twentie men, I thinke his stomacke at that time was not very good, what he left they put in baskets and tyed over his head. About midnight they set the meate againe before him, all this time not one of them would eate a bit with him, till the next morning they brought him as much more, and then did they eate all the old, & reserved the new as they had done the other, which made him thinke they would fat him to eat him. Yet in this desperate estate to defend him from the cold, one *Maocassater* brought him his gowne, in requitall of some beads and toyes *Smith* had given him at his first arrivall in Virginia.

Two dayes after, a man would have slaine him (but that the guard prevented it) for the death of his sonne, to whom they conducted him to recover the poore man then breathing his last. *Smith* told them that at *James* towne he had a water would doe it if they would let him fetch it, but they would not permit that, but made all the preparations they could to assault *James* towne, craving his advice, and for recompence he should have life, libertie, land, and women. In part of a table booke he writ his minde to them at the Fort, what was intended, how they should follow that direction to affright the messengers, and without fayle send him such things as he writ for, and an inventory with them. The difficultie and danger he told the Salvages, of the Mines, great gunnes, and other Engins, exceedingly affrighted them; yet according to his request they went to *James* towne, in as bitter weather as could be of frost and snow, and within three dayes returned with an answer.

But when they came to *Jame[s]* towne, seeing men sally out as he had told them they would, they fled, yet in the night they came againe to the same place where he had told them they should receive an answer, and

such things as he had promised them; which they found accordingly, and with which they returned with no small expedition, to the wonder of them all that heard it, that he could either divine, or the paper could speake. 50

Then they led him to the *Youtlianunds*, the *Mattapaments*, the *Payanketanks*, the *Nantaughtacunds*, and *Onaumaments* upon the rivers of *Rapahanock*, and *Patauomek* over all those rivers, and backe againe by divers other severall Nations, to the Kings habitation at *Pamaunkee*, where they entertained him with most strange and fearefull Conjurings;

As if neare led to hell,
Amongst the Devils to dwell

60

Not long after, early in a morning a great fire was made in a long house, and a mat spread on the one side, as on the other, on the one they caused him to sit, and all the guard went out of the house, and presently came skipping in a great grim fellow, all painted over with coale, mingled with oyle, and many Snakes and Wesels skins stuffed with mosse, and all their tayles tyed together, so as they met on the crowne of his head in a tassell, and round about the tassell was as a Coronet of feathers, the skins hanging round about his head, backe, and shoulders, and in a manner covered his face, with a hellish voyce, and a rattle in his hand. With most strange gestures and passions he began his invocation, and environed the fire with a circle of meale, which done, three more such like devils came rushing in with the like antique tricks, painted halfe blacke, halfe red but all their eyes were painted white, and some red stroakes like *Mutchato's* along their cheekes. Round about him those fiends daunced a pretty while, and then came in three more as ugly as the rest, with red eyes, and white stroakes over their blacke faces. At last they all sat downe right against him, three of them on the one hand of the chiefe Priest, and three on the other. Then all with their rattles began a song, which ended, the chiefe Priest layd downe five wheat cornes; then straying his armes and hands with such violence that he sweat, and his veynes swelled, he began a short Oration, at the conclusion they all gave a short groane, and then layd down three graines more. After that, began their song againe, and then another Oration, ever laying 90

2 vambrace, a leather guard worn on the forearm • 3 *Pocones*, bloodroot • 78 *Mutchato's*, mustachios

downe so many cornes as before, till they had twice incircled the fire, that done, they tooke a bunch of little stickes prepared for that purpose, continuing still their devotion, and at the end of every song and Oration, they layd downe a sticke betwixt the divisions of Corne. Till night, neither he nor they did either eate or drinke, and then they feasted merrily, with the best provisions they could make Three dayes they used this Ceremony; the meaning whereof, they told him, was to know if he
10 intended them well or no. The circle of meale signified their Country, the circles of corne the bounds of the Sea, and the stickes his Country They imagined the world to be flat and round, like a trencher, and they in the midst.

After this they brought him a bagge of gunpowder, which they carefully preserved till the next spring, to plant as they did their corne; because they would be acquainted with the nature of that seede.

Opitchapam the Kings brother, invited him to his house, where, with as many platters of bread, foule, and
20 wild beasts as did environ him, he bid him wellcome; but not any of them would eate a bit with him, but put up all the remainder in Baskets

At his return to *Opechancanoughs*, all the Kings women, and their children, flocked about him for their parts, as a due by Custome, to be merry with such fragments.

But his waking mind in hydeous dreames did oft
see wondrous shapes,
Of bodies strange, and huge in growth. and of
stupendious makes.

At last they brought him to *Meronocomoco*. where
30 was *Powhatan*. their Emperour. Here more than two hundred of those grim Courtiers stood wondering at him, as he had beene a monster, till *Powhatan* and his trayne had put themselves in their greatest braveries. Before a fire upon a seat like a bedsted, he sat covered with a great robe, made of *Rarowcun* skinnies, and all the tayles hanging by On either hand did sit a young wench of 16 or 18 yeares, and along on each side the house, two rowes of men, and behind them as many women, with all their heads and shoulders painted red; many of
40 their heads bedecked with the white downe of Birds; but every one with something, and a great chayne of white beads about their necks.

At his entrance before the King, all the people gave a great shout. The Queene of *Appamatuck* was ap-

pointed to bring him water to wash his hands, and another brought him a bunch of feathers, in stead of a Towell, to dry them: having feasted him after their best barbarous manner they could, a long consultation was held, but the conclusion was, two great stones were brought before *Powhatan*: then as many as could layd hands on him, dragged him to them, and thereon laid his head, and being ready with their clubs, to beate out his braines, *Pocahontas*, the Kings dearest daughter, when no intreaty could prevaile, got his head in her armes, and laid her owne upon his to save him from death: whereat the Emperour was contented he should live to make him hatchets, and her bells, beads, and copper; for they thought him as well of all occupations as themselves. For the King himselfe will make his owne robes, shooes, bowes, arrowes, pots, plant, hunt, or doe any thing so well as the rest.

They say he bore a pleasant shew,
But sure his heart was sad
For who can pleasant be, and rest,
That lives in feare and dread
And having life suspected. doth
It still suspected lead.

Two days after, *Powhatan*. having disguised himselfe in the most fearefullest manner he could, caused Captain *Smith* to be brought forth to a great house in the woods, and there upon a mat by the fire to be left alone. Not long after, from behinde a mat that divided the house, was made the most dolefullest noyse he ever heard; then *Powhatan*, more like a devill then a man, with some two hundred more as blacke as himselfe, came unto him and told him now they were friends, and presently he should goe to *James* towne, to send him two great gunnes, and a gryndstone, for which he would give him the Country of *Capahowosick*. and for ever esteeme him as his sonne *Nantaquoud*.

So to *James* towne with 12 guides *Powhatan* sent him. That night they quarterd in the woods, he still expecting (as he had done all this long time of his imprisonment) every houre to be put to one death or other: for all their feasting But almightie God (by his divine providence) had mollified the hearts of those sterne Barbarians with compassion. The next morning betimes they came to the

35 *Rarowcun*, raccoon • 58 as well of, as efficient at • 87 betimes, early

Fort; where *Smith*, having used the Salvages with what kinde he could, he shewed *Rawbunt*, *Powhatan*'s trusty servant, two demi-Culverings & a millstone to carry *Powhatan*: they found them somewhat too heavie, but when they did see him discharge them, being loaded with stones, among the boughs of a great tree loaded with Isickles, the yce and branches came so tumbling downe, that the poore Salvages ran away halfe dead with feare. But at last we regained some conference with them, and gave them such toyes, and sent to *Powhatan*, his women, and children such presents, as he gave them in generall full content.

Now in *James Towne* they were all in combustion, the strongest preparing once more to run away with the pinnace, which with the hazzard of his life, with Sakre

falcon and musket shot, *Smith* forced now the third time to stay or sinke.

Some, no better then they should be, had plotted with the President, the next day to have put him to death by the Leviticall law, for the lives of *Robinson* and *Emry*; 20 pretending the fault was his that had led them to their ends but he quickly tooke such order with such Lawyers, that he layd them by the heeles till he sent some of them prisoners for *England*.

1623•1624

3 demi-Culverings, nine-pound cannons • 15 pinnace, a small sailing vessel • 15 Sakre falcon, a type of cannon • 20 Leviticall law, as set forth in Leviticus 24:17 "And he that killeth any man shall surely be put to death"

William Bradford

1590 • 1657

William Bradford came of a family of prosperous farmers in Yorkshire, England. While still a boy, he joined the Separatist group which met in the house of William Brewster at Scrooby, and in 1609 he accompanied the Separatists to Holland, where they remained eleven years. He sailed on the *Mayflower* in 1620. Following the landing at Plymouth in December of that year, Bradford, as his *History* records, took a leading part in the affairs of the colony. He was chosen governor in the annual elections no less than thirty times, serving continuously from 1622 to 1656, except for five years, when he was relieved at his own urgent request. The record shows him to have been worthy of such confidence.

The manuscript of Bradford's work was probably not intended for publication. At any rate, although it was freely drawn upon by numerous New England historians

in the seventeenth and eighteenth centuries (among them, Thomas Hutchinson), it was not published until 1856, shortly after it had been discovered in the library of the Bishop of London. It may have been taken to London by Hutchinson, a Loyalist, or by a British soldier. The manuscript was returned to Massachusetts in 1897 and has since reposed in the Massachusetts State Library.

Bradford's book tells the story of Plymouth Plantation through 1646. "There is no other document upon New England history," says Moses Coit Tyler, "that can take precedence of this either in time or in authority." It is a vivid record of the colonists' triumph over difficulties of many kinds. One cannot help being impressed by Bradford's sincerity, his exalted aims, and his lifelong dedication to religious truth as he conceived it.

Although he was said by Cotton Mather to have mastered Latin and Greek and to have studied Hebrew ("because he would see with his own eyes the ancient oracles of God in their native beauty"), his study must have been predominantly in the English Bible, which he read in the Geneva version of 1560, for his style, like John Bunyan's, shows a strong Biblical influence. Whether his art was conscious or not, Bradford's prose is worthy

of a distinguished place in the English tradition of his century.

The History of Plymouth Plantation

THE 9 CHAP.

Of their vioage, and how they passed the sea,
and of their safe arrival at Cape Codd

Sept^r 6 [1620] These troubls being blowne over, and now all being compacte together in one shipe, they put to sea againe with a prosperus winde, which continued diuerce days together, which was some incouragmente unto them, yet according to the usuall maner many were afflicted with sea-sicknes. And I may not omite hear a spetiall worke of Gods providence. Ther was a proud and very profane yonge man, one of the sea-men, of a lustie, able body, which made him the
 10 more haughty, he would allway be contemning the poore people in their sicknes, and cursing them dayly with greevous execrations, and did not let to tell them, that he hoped to help to cast halfe of them over board before they came to their jurneys end, and to make mery with what they had, and if he were by any gently reprov'd, he would curse and swear most bitterly. But it plased God before they came halfe seas over, to smite this yong man with a greeveous disease, of which he dyed
 20 that was throwne overbord. Thus his curses light on his owne head; and it was an astonishment to all his fellows, for they noted it to be the just hand of God upon him.

After they had injoyed faire winds and weather for a season, they were incountred many times with crosse winds, and mette with many feirce stormes, with which the shipe was shroudly shaken, and her upper works made very leakie; and one of the maine beames in the midd ships was bowed and cracked, which put them in some fear that the shipe could not be able to performe the vioage. So some of the cheefe of the company, perceivinge the mariners to feare the suffisiencie of the shipe, as appeared by their mutterings, they entred into serious consultation with the m^r and other officers of the ship, to consider in time of the danger, and rather to returne then to cast them selves into a desperate and inevitable perill. And truly ther was great distraction and differance of opinion amongst the mariners themselves, faine would they doe what could be done for their wages sake, (being now halfe the seas over,) and on the other hand they were loath to hazard their lives too desperately. But in examening of all opinions, the m^r and others affirmed they knew the ship to be sironge and firme under water; and for the buckling of the maine beame, ther was a great iron scrue the passengers brought out of Holland, which would raise the beame into his place, the which being done, the carpenter and m^r affirmed that with a post put under it, set firme in the lower deck, and otherways bounde, he would make it sufficiente. And as for the decks and uper workes they would calke them as well as they could, and though with the workeing of the ship they would not longe keepe stanch, yet ther would otherwise be no great danger, if they did not overpress her with sails. So they committed them selves to the will of God, and resolved to proseeede.

Text: Bradford's *History of Plymouth Plantation*, ed W T Davis, New York, 1908 • 2 shipe, the Mayflower • 12 let, forbear • 27 shroudly, severely • 34 m^r, master or captain

In sundrie of these stormes the winds were so feirce, and the seas so high, as they could not beare a knote of saile, but were forced to hull, for diuerce days together And in one of them, as they thus lay at hull, in a mighty storme, a lustie yonge man (called John Howland) coming upon some occasion above the grattings, was, with a seele of the shipe throwne into [the] sea; but it pleased God that he caught hould of the top-saile halliards, which hunge over board, and rane out at length, yet he held his hould (though he was sundrie fadomes under water) till he was hald up by the same rope to the brime of the water, and then with a boat hooke and other means got into the shipe againe, and his life saved, and though he was something ill with it, yet he lived many years after, and became a profitable member both in church and commone wealthe. In all this viage ther died but one of the passengers, which was William Batten, a youth, servant to Samuell Fuller, when they drew near the coast. But to omite other things, (that I may be breefe,) after longe beating at sea they fell with that land which is called Cape Cod, the which being made and certainly knowne to be it, they were not a litle joyfull. After some deliberation had amongst themselves and with the m^r of the ship, they tacked aboute and resolved to stande for the southward (the wind and weather being faire) to finde some place aboute Hudsons river for their habitation. But after they had sailed that course aboute halfe the day, they fell amongst deangerous shoulds and roring breakers, and they were so farr intangled ther with as they conceived them selves in great danger; and the wind shrinking upon them withall, they resolved to bear up againe for the Cape, and thought them selves hapy to gett out of those dangers before night overtooke them, as by Gods providence they did. And the next day they gott into the Cape-harbor wher they ridd in saftie A word or too by the way of this cape, it was thus first named by Capten Gosnole and his company, An^o. 1602, and after by Capten Smith was caled Cape James; but it retains the former name amongst seamen. Also that pointe which first shewed those dangerous shoulds unto them, they called Pointe Care, and Tuckers Terrour, but the French and Dutch to this day call it Malabarr, by reason of those perilous shoulds, and the losses they have suffered their

Being thus arived in a good harbor and brought safe

to land, they fell upon their knees and blessed the God of heaven, who had brought them over the vast and furious ocean, and delivered them from all the periles and miseries therof, againe to set their feete on the firme and stable earth, their proper elemente. And no marvell if they were thus joyefull, seeing wise Seneca was so affected with sailing a few miles on the coast of his owne Italy, as he affirmed, that he had rather remaine twentie years on his way by land, then pass by sea to any place in a short time, so tedious and dreadfull was the same unto him

But hear I cannot but stay and make a pause, and stand half amased at this poore peoples presente condition, and so I thinke will the reader too, when he well considers the same Being thus passed the vast ocean, and a sea of troubles before in their preparation (as may be remembred by that which wente before), they had now no freinds to wellcome them, nor inns to entertaine or refresh their weatherbeaten bodys, no houses or much less townes to repaire too, to seeke for succoure It is recorded in scripture as a mercie to the apostle and his shipwaked company, that the barbarians shewed them no smale kindnes in refreshing them, but these savage barbarians, when they mette with them (as after will appeare) were readier to fill their sids full of arrows then otherwise And for the season it was winter, and they that know the winters of that cuntrie know them to be sharp and violent, and subjecte to cruell and feirce stormes, deangerous to travill to known places, much more to serch an unknown coast Besids, what could they see but a hidious and desolate wildernes, full of wild beasts and willd men? and what multitudes ther might be of them they knew not. Nether could they, as it were, goe up to the tope of Pisgah, to vew from this willdernes a more goodly cuntrie to feed their hops; for which way soever they turnd their eys (save upward to the heavens) they could have litle solace or content in respecte of any outward objects For summer being done, all things stand upon them with a wetherbeaten face, and the whole cuntrie, full of woods and thickets,

3 hull, drift • 7 seele, lurch • 39 Smith, Captain John Smith, on his map of New England • 52 Seneca, Lucius Annaeus Seneca (4 B C 2-65 A D), Roman philosopher and author See Seneca's "Epistle LIII" for Bradjord's allusion • 67 scripture, Acts 28 2 • 80 Pisgah, the mountain from which Moses was permitted to view the Promised Land. represented a wild and savage heiw. If they looked behind them, ther was the mighty ocean which they had passed, and was now as a maine barr and goulfe to seperate them from all the civill parts of the world If it be said they had a ship to sucour them, it is trew, but what heard they daly from the m^r and company? but that with speede they should looke out a place with their shallop, wher they would be at some near distance, for the season was shuch as he would not stirr from
 10 thence till a safe harbor was discovered by them wher they would be, and he might goe without danger, and that victells consumed apace, but he must and would keepe sufficient for them selves and their returne Yea, it was muttered by some, that if they gott not a place in time, they would turne them and their goods ashore and leave them Let it also be considred what weake hopes of supply and succoure they left behinde them, that might bear up their minds in this sade condition and trialls they were under, and they could not but be
 20 very smale It is true, indeed, the affections and love of their brethren at Leyden was cordiall and entire towards them, but they had litle power to help them. or them selves, and how the case stode betweene them and the marchants at their coming away, hath allready been declared What could now sustaine them but the spirite of God and his grace? May not and ought not the children of these fathers rightly say *Our fathers were Englishmen which came over this great ocean. and were ready to perish in this wilddernes; but they cried*
 30 *unto the Lord. and he heard their voyce. and looked on their adversitie. etc Let them therfore praise the Lord. because he is good. and his mercies endure for ever. Yea, let them which have been redeemed of the Lord. shew how he hath delivered them from the hand of the oppressour. When they wandered in the deserte wilddernes out of the way. and found no citie to dwell in. both hungrie. and thirstie. then soule was overwhelmed in them. Let them confess before the Lord his loving kindnes. and his wonderfull works before the sons*
 40 *of men. . . .*

The remainder of An^o. 1620

I shall a litle returne backe and begine with a combination made by them before they came ashore. being the first foundation of their govermente in this place, occasioned partly by the discontented and mutinous

speeches that some of the strangers amongst them had let fall from them in the ship—That when they came a shore they would use their owne libertie; for none had power to command them, the patente they had being for Virginia, and not for New-england, which belonged to an other Goverment, with which the Virginia Company had nothing to doe And partly that shuch an acte by them done (this their condition considered) might be as firme as any patent, and in some respects more sure.

The forme was as followeth.

In the name of God, Amen. We whose names are under-written, the loyall subjects of our dread soveraigne Lord, King James, by the grace of God, of Great Britaine, Franc, and Ireland king, defender of the faith, etc, haveing undertaken, for the glorie of God, and advancemente of the Christian faith, and honour of our king and countrie, a voyage to plant the first colonie in the Northerne parts of Virginia, doe by these presents solemnly and mutually in the presence of God, and one of another, covenant and combine our selves togeather into a civill body politick, for our better ordering and preservation and furtherance of the ends aforesaid, and by vertue hearof to enacte, constitute, and frame such just and equall lawes, ordinances, acts, constitutions, and offices, from time to time, as shall be thought most meete and convenient for the generall good of the Colonie, unto which we promise all due submission and obedience. In witnes wherof we have hereunder subscribed our names at Cap-Codd the 11 of November, in the year of the raigne of our soveraigne lord, King James, of England, France, and Ireland the eighteenth, and of Scotland the fiftie fourth An^o Dom. 1620.

After this they chose, or rather confirmed, Mr. John Carver (a man godly and well approved amongst them) their Governour for that year. And after they had provided a place for their goods, or comone store, (which were long in unlading for want of boats, foulnes of winter weather, and sicknes of diverce,) and begune some small cottages for their habitation, as time would admitte, they mette and consulted of lawes and orders,

21 Leyden, in Holland, whence the more devout members of the group had come • 27 Our . . . etc. The sentence paraphrases Deuteronomy 26 7 • 31 Let . . . men. The passage paraphrases Psalms 107 1-8 • 56 In . . . 1620. This document, known as the "Mayflower Compact," was an agreement signed by the Pilgrim Fathers to serve as a form of government because the Pilgrims had no charter

both for their civill and military Governente, as the necessitie of their condition did require, still adding therunto as urgent occasion in severall times, and as cases did require.

In these hard and difficulte beginnings they found some discontents and murmurings arise amongst some, and mutinous speeches and carriags in other, but they were soone quelled and overcome by the wisdom, patience, and just and equall carriage of things by the
10 Gov^r and better part, which clave faithfully together in the maine. But that which was most sadd and lamentable was, that in 2 or 3 moneths time halfe of their company dyed, espetially in Jan and February, being the depth of winter, and wanting houses and other comforts, being infected with the scurvie and other diseases, which this long vioage and their in-
acomodate condition had brought upon them, so as ther dyed some times 2. or 3 of a day, in the foresaid time, that of 100 and odd persons, scarce 50 remained And
20 of these in the time of most distres, ther was but 6 or 7 sound persons, who, to their great comendations be it spoken, spared no pains, night nor day, but with abundance of toyle and hazard of their owne health, fetched them woode, made them fires, drest them meat, made their beads, washed their lothsome cloaths, clothed and unclothed them, in a word, did all the homly and necessarie offices for them which dainty and quese
30 stomachs cannot endure to hear named, and all this willingly and cherfully, without any grudging in the least, shewing herein their true love unto their freinds and bretheren A rare example and worthy to be remembred. Tow of these 7 were Mr. William Brewster, ther reverend Elder, and Myles Standish, ther Captein and military comander, unto whom my selfe, and many others, were much beholden in our low and sicke condition. And yet the Lord so upheld these persons, as in this generall calamity they were not at all infected either with sicknes, or lamnes And what I have said of these, I may say of many others who dyed in this
40 generall vissitation, and others yet living, that whilst they had health, yea, or any strength continuig, they were not wanting to any that had need of them And I doute not but their recompence is with the Lord. . .

[1623] All this while no supply was heard of, neither knew they when they might expecte any. So they begane to thinke how they might raise as much corne as they

could, and obtaine a beter crope then they had done, that they might not still thus languish in miserie. At length, after much debate of things, the Gov^r (with the advise of the cheefest amongst them) gave way 50 that they should set corne every man for his owne perticuler, and in that regard trust to them selves; in all other things to goe on in the generall way as before. And so assigned to every family a parcell of land, according to the proportion of their number for that end, only for present use (but made no devission for inheritance), and ranged all boys and youth under some familie This had very good success, for it made all hands very industrious, so as much more corne was
60 planted then other waise would have bene by any means the Gov^r or any other could use, and saved him a great deall of trouble, and gave farr better contente. The women now wente willingly into the feild, and tooke their litle-ons with them to set corne, which before would aledg weaknes, and inabilitytie, whom to have compelled would have bene thought great tiranie and oppression.

The experience that was had in this commone course and condition, tried sundrie years, and that amongst godly and sober men, may well evince the vanitie of 70 that conceite of Platos and other ancients, applauded by some of later times, — that the taking away of propertie, and bringing in communitie into a comone wealth, would make them happy and flourishing; as if they were wiser then God For this comunitie (so farr as it was) was found to breed much confusion and discontent, and retard much imployment that would have been to their benefite and comforte. For the yong-
men that were most able and fitte for labour and service did repine that they should spend their time and 80 strenght to worke for other mens wives and children, with out any recompence The strong, or man of parts, had no more in devission of victails and cloaths, then he that was weake and not able to doe a quarter the other could, this was thought injustice. The aged and graver men to be ranked and equalised in labours, and victails, cloaths, etc, with the meaner and yonger sorte, thought it some indignite and disrespect unto them.

10 Gov^r, Governor Bradford himself • 68 commone course, ownership in common Thus ended the communistic experiment at Plymouth

And for mens wives to be commanded to doe servise for other men, as dresing their meate, washing their cloaths, etc., they deemd it a kind of slaverie, neither could many husbands well brooke it. Upon the poynte all being to have alike, and all to doe alike, they thought them selves in the like condition, and one as good as another; and so, if it did not cut of those relations that God hath set amongst men, yet it did at least much diminish and take of the mutuall respects that should
o be preserved amongst them And would have bene worse if they had been men of another condition Let none objecte this is men's corruption, and nothing to the course it selfe. I answer, seeing all men have this corruption in them, God in his wisdome saw another course fiter for them

[1628] Aboute some 3 or 4 years before this time, ther came over one Captaine Wolastone, (a man of pretie parts,) and with him 3. or 4. more of some eminencie, who brought with them a great many servants, with
20 provissions and other implments for to begine a plantation, and pitched them selves in a place within the Massachusets, which they called, after their Captains name, Mount-Wollaston Amongst whom was one Mr. Morton, who, it should seeme, had some small adventure (of his owne or other mens) amongst them, but had litle respecte amongst them, and was sleighted by the meanest servants Haveing continued ther some time, and not finding things to answer their expectations, nor profite to arise as they looked for, Captaine
30 Wollaston takes a great part of the saivants, and transports them to Virginia, wher he puts them of at good rates, selling their time to other men, and writs back to one Mr. Rassdall, one of his cheefe partners, and accounted their marchant, to bring another parte of them to Verginia likewise, intending to put them of ther as he had done the rest. And he, with the consente of the said Rasdall, appoynted one Fitcher to be his Livetenante, and governe the remaines of the plantation, till he or Rasdall returned to take further order
40 therabout. But this Morton abovesaid, haveing more craft than honestie, (who had been a kind of petie-fogger, of Furnefells Inne,) in the others absence, watches an oppertunitie, (commons being but hard amongst them,) and gott some strong drinck and other junkats, and made them a feast; and after they were merie, he begane to tell them, he would give them good

counsell. You see (saith he) that many of your fellows are carried to Virginia; and if you stay till this Rasdall returne, you will also be carried away and sould for slaves with the rest. Therefore I would advise you to thruste out this Levetenant Fitcher, and I, having a parte in the plantation, will receive you as my partners and consociats, so may you be free from service, and we will converse, trad, plante, and live together as equalls, and supporte and protecte one another, or to like effecte. This counsell was easily received, so they tooke oppertunitie, and thrust Levetenante Fitcher out a dores, and would suffer him to come no more amongst them, but forct him to seeke bread to eate, and other releefe from his neigbours, till he could gett passage for England After this they fell to great licenciousnes, and led a dissolute life, powering out them selves into all profanenes And Morton became lord of misrule, and maintained (as it were) a schoole of Athisme And after they had gott some good into their hands, and gott much by trading with the Indeans, they spent it as vainly, in quaffing and drinking both wine and strong waters in great exsess, and, as some reported, 10*l.* worth in a morning They also set up a May-pole, drinking and dancing aboute it many days together, inviting the Indean women, for their consorts, dancing and frisking together. (like so many fairies, or furies rather,) and worse practises As if they had anew revived and celebrated the feasts of the Roman Goddes Flora, or the beasly practises of the madd Bacchinalians Morton likewise (to shew his poetrie) composed sundry rimes and verses, some tending to lasciviousnes, and others to the detraction and scandall of some persons, which he affixed to this idle or idoll May-polle. They chainged also the name of their place, and in stead of calling it Mounte Wollaston, they called it Meriemounte, as if this joylity would have lasted ever But this continued not long, for after Morton was sent for England, (as follows to be declared,) shortly after came over that worthy gentlman, Mr. John Indecott, who brought

7 of, off, as often in Bradford • 23 Mr. Morton, Thomas Morton, whose amusing and very different account in the *New English Canaan* (London, 1637) should be compared with Bradford's • 41 petiefogger, pettifogger, an inferior lawyer • 42 Furnefells Inne, Furnival's Inn, one of the Inns of Court in London occupied by "students and practicers" of the law • 43 commons, food • 62 powering, pouring • 69 li, pounds • 85 Indecott, John Endicott

over a patent under the broad seal, for the government of the Massachusets, who visiting those parts caused that May-polle to be cutt downe, and rebuked them for their profannes, and admonished them to looke ther should be better walking; so they now, or others, changed the name of their place again, and called it Mounte-Dagon. . .

[1633] Mr Roger Williams (a man godly and zealous, having many precious parts, but very unsettled in judgmente) came over first to the Massachusets, but upon some discontente left that place, and came hither. (wher he was friendly entertained, according to their poore abilitie,) and exercised his gifts amongst them, and after some time was admitted a member of the church; and his teaching well approoved, for the benefite wherof I still blesse God, and am thankfull to him, even for his sharpest admonitions and reproofs, so farr as they agreed with truth. He this year begane to fall into some strang oppinions, and from opinion to practise, which caused some controversie betweene the church and him, and in the end some discontente on his parte, by occasion whereof he left them some thing abruptly. Yet after wards sued for his dismission to the church of Salem, which was granted, with some caution to them concerning him, and what care they ought to have of him. But he soone fell into more things ther, both to their and the governments troble and disturbance. I shall not need to name perticulers, they are too well knowne now to all, though for a time the church here wente under some hard censure by his occasion, from some that afterwards smarted them selves. But he is to be pitied, and prayed for, and so I shall leave the matter, and desire the Lord to shew him his errors, and reduse him into the way of truth, and give him a settled judgment and constancie in the same, for I hope he belongs to the Lord, and that he will shew him mercie .

[1638] This year, aboute the 1. or 2. of June, was a great and fearfull earthquake; it was in this place heard before it was felte. It came with a rumbling noyse, or low murmure, like unto remoate thunder; it came from the norward, and pased southward. As the noyse aproched nerer, they earth begane to shake, and came at length with that violence as caused platters, dishes, and such like things as stooode upon shelves, to clatter and fall downe, yea, persons were afraid of the houses themselves. It so fell oute that at the same time diverse

of the cheefe of this towne were mett together at one house, conferring with some of their freinds that were upon their removall from the place, (as if the Lord would herby shew the signes of his displeasure, in their shaking a peeces and removalls one from an other.) How ever it was very terrible for the time, and as the men were set talking in the house, some women and others were without the dores, and the earth shooke with that violence as they could not stand without catching hould of the posts and pails that stood next them, but the violence lasted not long. And about halfe an hower, or less, came an other noyse and shaking, but nether so loud nor strong as the former, but quickly passed over, and so it ceased. It was not only on the sea coast, but the Indians felt it within land, and some ships that were upon the coast were shaken by it. So powerfull is the mighty hand of the Lord, as to make both the earth and sea to shake, and the mountaines to tremble before him, when he pleases, and who can stay his hand? It was observed that the sommers, for divers years together after this earthquake, were not so hotte and seasonable for the ripning of corne and other fruits as formerly, but more could and moyst, and subjecte to erly and untimly frosts, by which, many times, much Indian corne came not to maturitie, but whether this was any cause, I leave it to naturallists to judge .

Anno Dom 1642

Marvilous it may be to see and consider how some kind of wickednes did grow and breake forth here, in a land wher the same was so much witnessed against, and so narrowly looked unto, and severly punished when it was knowne, as in no place more, or so much, that I have known or heard of, insomuch as they have been somewhat censured, even by moderate and good men, for their severitie in punishments. And yet all this could not suppress the breaking out of sundrie notorious sins, (as this year, besids other, gives us too many sad presidents and instances,) espetially drunkennes and unclainnes, not only incontinecie betweene persons unmarried, for which many both men and women have been punished sharply enough, but some married persons allso.

34 the . . . truth. Banished from the Massachusetts Bay Colony in 1635, Roger Williams (see p. 136) migrated to the Narragansett country, where he founded Providence, Rhode Island • 83 presidents, precedents

But that which is worse, even sodomie and bugerie, (things fearfull to name,) have broak forth in this land, oftener then once. I say it may justly be marveled at, and cause us to fear and tremble at the consideration of our corrupte natures, which are so hardly bridled, subdued, and mortified, nay, cannot by any other means but the powerfull worke and grace of Gods spirite But (besids this) one reason may be, that the Divell may carrie a greater spite against the churches of Christ and the gospell hear, by how much the more they indeaour to preserve holynes and puritie amongst them, and strictly punisheth the contrary when it ariseth either in church or comone wealth, that he might cast a blemishe and staine upon them in the eyes of [the] world, who use to be rash in judgmente. I would rather thinke thus, then that Satane hath more power in these heathen lands, as som have thought, then in more Christian nations, espetially over Gods servants in them

2. An other reason may be, that it may be in this case as it is with waters when their streames are stopped or dammed up, when they gett passage they flow with

more violence, and make more noys and disturbance, then when they are suffered to rune quietly in their owne chanel. So wikednes being here more stopped by strict laws, and the same more nerly looked unto, so as it cannot rune in a comone road of liberty as it would, and is inclined, it searches every wher, and at last breaks out wher it getts vente

3 A third reason may be, hear (as I am verily perswaded) is not more evils in this kind, nor nothing nere so many by proportion, as in other places, but they are here more discovered and seen, and made publick by due serch, inquisition, and due punishment, for the churches looke narrowly to their members, and the magistrats over all, more strictly then in other places Besids, here the people are but few in comparison of other places, which are full and populous, and lye hid, as it were, in a wood or thickett, and many horrible evils by that means are never seen nor knowne, wheras hear, they are, as it were, brought into the light, and set in the plaine feeld, or rather on a hill, made conspicuous to the veiw of all. . .

1630-1657 • 1856

John Winthrop

1588 • 1649

John Winthrop was past forty in 1629 when the Massachusetts Bay Company decided to take its charter to New England and chose him as its governor. A Suffolk County squire who had practiced law and quietly administered the very considerable estate left him by his father, Winthrop was a devout Puritan with an ambition, as he himself admitted, for public service. This

ambition he satisfied unselfishly in Massachusetts, where for nineteen years he held high office, nine times chosen governor. He labored diligently for the good of the commonwealth, spent much of his private fortune in hospitality and charity, and frankly based his actions upon the social and religious obligations of an aristocratic ruling class. Besides providing the economic

basis for what was long the most influential of the colonies, the group which Winthrop represented is memorable for its early development of educational and political institutions which have survived to the present day.

Of the many remarkable aspects of the Bay Colony, two are especially connected with Winthrop's career: the annual election provided for in the charter, which periodically brought to review the stewardship of public servants; and the development of governmental institutions roughly equivalent to those of England, notably a legislature of two houses and a system of courts, statutes, and common law. Both the annual election and the transference of English constitutional practice to the New World are contributions of a Puritan oligarchy which, although in some ways unenlightened according to twentieth-century standards, was remarkably astute in practice.

Winthrop's writings are somewhat varied in nature. A series of letters addressed to his third wife, Margaret,

is perhaps the finest picture of a happy Puritan marriage in our literature. "A Modell of Christian Charity," discourse composed for delivery on board the *Arbella*, flagship of the Puritan migration, is a careful exposition of his political philosophy. that "God Almightye in his most holy and wise providence hath soe disposed of the Condition of mankinde, as in all times some must be rich some poore, some highe and eminent in power and dignitie, others meane and in subieccion." Winthrop is chiefly read, however, in his *Journal of History of New England*, which is a chronicle of events from 1630 until two months before his death in 1649.

The History of New England from 1630 to 1649, ed. James Savage, New Edition, 2 vols., Boston, 1853. • Winthrop's Journal, "History of New England," 1630-1649, ed. J. K. Hosmer, 2 vols., New York, 1908. • R. C. Winthrop, *Life and Letters of John Winthrop*, 2 vols., Boston, 1864-1867. • S. E. Morison, *Builders of the Bay Colony*, Boston, 1930.

From

The History of New England

William Hubbard, Cotton Mather, and Thomas Prince, among the earlier New England historians, knew of Winthrop's manuscript journal bound up in three volumes. The first two volumes, covering the period from 1630 to 1644, were published in 1790. The third, rediscovered in 1816, was turned over for editing, along with the previously published volumes, to James Savage. Before his edition appeared in 1825-1826, Volume II was destroyed by fire. There has never been an edition giving the exact reading of the manuscript, for Savage modernized Winthrop's

spelling and wrote out the abbreviations in full—a fact which accounts for the relatively regular text of the extracts which follow.

This selection has been chosen to give Winthrop's side of the most famous incident of his career: his virtual impeachment for what some of his neighbors conceived to be an excessive use of his power as magistrate. The sequence of events can be readily followed, but it should be noted that the conflict between aristocratic and popular parties had been brewing for some time prior to 1645, so that the "trial" of Winthrop was a test case. Its origins and development will fascinate anyone concerned with the working processes of self-government.

April 6, 1645] Two great fires happened this week, one at Salem; Mr. Downing having built a new house at his farm, he being gone to England, and his wife and family gone to the church meeting upon the Lord's day, the chimney took fire, and burnt down the house, and bedding, apparel, and household to the value of 200

pounds The other was at Roxbury this day. John Johnson, the surveyor general of the ammunition, a very industrious and faithful man in his place, having built a fair house in the midst of the town, with divers barns and other out houses, it fell on fire in the day time, (no man knowing by what occasion,) and there being in it seventeen barrels of the country's powder and many arms, all was suddenly burnt and blown up, to the value of 4 or 500 pounds, wherein a special providence of
 10 God appeared, for he being from home, the people came together to help, and many were in the house, no man thinking of the powder, till one of the company put them in mind of it, whereupon they all withdrew, and soon after the powder took fire, and blew up all about it, and shook the houses in Boston and Cambridge, so as men thought it had been an earthquake, and carried great pieces of timber a great way off and some rags and such light things beyond Boston meeting house There being then a stiff gale at south, it drove
 20 the fire from the other houses in the town, (for this was the most northerly,) otherwise it had endangered the greatest part of the town The loss of our powder was the more observable in two respects, 1. Because the court had not taken that care they ought to pay for it, having been owing for divers years, 2. In that, at the court before, they had refused to help our countrymen in Virginia, who had written to us for some for their defence against the Indians, and also to help our brethren of Plymouth in their want.

30 Mr Wheelwright being removed from Exeter to Wells, the people remaining fell at variance among themselves. Some would gather a new church, and call old Mr. Batchellor from Hampton to be their pastor, and for that purpose appointed a day, and gave notice thereof to the magistrates and churches, but the court, understanding of their divisions and present unfitness for so solemn and sacred a business, sent and wrote to them (by way of direction only) to desist for that time, and not to proceed until upon satisfaction given to this
 40 court, or the court at Ipswich, of their reconciliation, they might proceed with allowance of authority, according to order. To this they submitted, and did not proceed.

The question about Seacunk, now Rehoboth, being revived this court, whether it should belong to this jurisdiction (upon the submission of the purchasers, etc.) or to Plymouth by right of their patent, the court

(by order) referred it to the judgment of the commissioners of the union, who decreed it for Plymouth, with reservation, if better evidence should appear by the next meeting

Some malignant spirits began to stir, and declare themselves for the king, etc, whereupon an order was made to restrain such courses, and to prevent all such turbulent practices, either by action, word, or writing.

The court ordered letters of thanks to be sent to Mr. Richard Andrews of London, haberdasher, for his gift of 500 pounds, and to the Lady Armine for her gift of 20 pounds per annum, and to the Lady Moulson for her gift, which was done accordingly by the committee appointed.

Upon advice from Mr. Weld, remaining still at London, a commission was sent under the public seal to Mr Pocock and divers other our friends in London to this effect, 1. To answer for us upon all such occasions as may be presented to the parliament or any other court of officer, concerning us or our affairs, but not to engage us, without our consent, 2. To receive all letters and other despatches of public nature or concernment from us, 3 To advise us of all occurrents as may happen touching our colony, 4. To receive all moneys or other things due to us from any person in England, by gift or otherwise, and to dispose of them by direction under our public seal.

Mr. John Winthrop, the younger, coming from England two years since, brought with him 1000 pounds stock and divers workmen to begin an iron work, and

Text that prepared by James Savage in 1853 No verbatim text of the manuscript has been printed • 24 the court, the General Court of the colony, consisting at first of all stockholders in the Bay Company, who were to meet each spring to elect a governor, deputy-governor, and eighteen assistants By 1644 the stockholders or freemen had created a House of Deputies to represent them, the assistants had come to constitute an upper house of what was in effect a two-house legislature • 43 Seacunk, now Rehoboth, a settlement in southern Massachusetts • 46 patent, grant of land • 48 the union, the New England Confederation, founded by Plymouth, Massachusetts, Connecticut, and New Haven in 1643 Winthrop had been presiding officer at the first meeting of its commissioners • 52 the king, Charles I, then engaged in active warfare against the parliamentary forces under Oliver Cromwell • 57 gift, to Harvard College Lady Moulson's maiden name was Ann Radcliffe, hence the name of the women's college now affiliated with Harvard • 74 John Winthrop, the younger (1606-1676), later governor of Connecticut, was much interested in science and technology

had moved the court for some encouragement to be given the undertakers, and for the court to join in carrying on the work, etc. The business was well approved by the court, as a thing much conducing to the good of the country, but we had no stock in the treasury to give furtherance to it, only some two or three private persons joined in it, and the court granted the adventurers near all their demands, as a monopoly of it for twenty-one years, liberty to make use of any six places not already granted, and to have three miles square in every place to them and their heirs, and freedom from public charges, trainings, etc., and this was now sent them over under the public seal this year.

The court, finding that the over number of deputies drew out the courts into great length, and put the country to excessive charges, so as some one court hath expended more [than] 200 pounds, etc., did think fit to have fewer deputies, and so to have only five or six out of each shire; and because the deputies were still unsatisfied with the magistrates' negative vote, the magistrates consented to lay it down, so as the deputies might not exceed them in number, and those to be the prime men of the country, to be chosen by the whole shires; but they agreed first to know the mind of the country. But upon trial, the greater number of towns refused it, so it was left for this time.

At this court in the third month [May] Passaconaway, the chief sachem of Merrimack, and his sons came and submitted themselves and their people and lands under our jurisdiction, as Pumham and others had done before.

Mr. Shepherd, the pastor of the church in Cambridge, being at Connecticut when the commissioners met there for the United Colonies, moved them for some contri-
bution of help towards the maintenance of poor scholars in the college, whereupon the commissioners ordered that it should be commended to the deputies of the general courts and the elders within the several colonies to raise (by way of voluntary contribution) one peck of corn or twelve pence money, or other commodity, of every family, which those of Connecticut presently performed.

[July 3] By order of the general court, upon advice with the elders, a general fast was kept. The occasions were, the miseries of England, and our own differences in the general court, and also for the great drought. In this latter the Lord prevented our prayers in sending

us rain soon after, and before the day of humiliation came.

Divers free schools were erected, as at Roxbury (for maintenance whereof every inhabitant bound some house 50 or land for a yearly allowance forever) and at Boston (where they made an order to allow forever 50 pounds to the master and an house, and 30 pounds to an usher, who should also teach to read and write and cipher, and Indians' children were to be taught freely, and the charge to be by yearly contribution, either by voluntary allowance, or by rate of such as refused, etc., and this order was confirmed by the general court). Other towns did the like, providing maintenance by several means. . . .

[May 14] The court of elections was held at Boston. 60 Mr. Thomas Dudley was chosen governour, Mr. Winthrop, deputy governour again, and Mr. Endecott, serjeant major general. Mr. Israel Stoughton, having been in England the year before, and now gone again about his private occasions, was by vote left out, and Herbert Pelham, Esquire, chosen an assistant.

This court fell out a troublesome business, which took up much time. The town of Hingham, having one Emes their lieutenant seven or eight years, had lately chosen him to be their captain, and had presented 70 him to the standing council for allowance; but before it was accomplished, the greater part of the town took some light occasion of offence against him, and chose one Allen to be their captain, and presented him to the magistrates (in the time of the last general court) to be allowed. But the magistrates, considering the injury

12 trainings, of the militia • 14 deputies, chosen by the towns, which in Massachusetts already numbered thirty. The magistrates, or House of Assistants, were willing to forego their right to veto actions of the House of Deputies, if they were not outnumbered • 49 free schools. Not until 1647 did Massachusetts pass the act requiring each town of fifty families to support an elementary school, each town of one hundred families to provide a grammar school. This act is usually regarded as the origin of the theory of education at public expense • 59 several means. Five pages of miscellaneous entries are here omitted • 60 court of elections. At this time, apparently, the freemen cast their ballots by proxy, through their deputies or representatives, at the designated meeting of the General Court. The solemnity of election day, with its inevitable sermon, has been well described by Hawthorne in *The Scarlet Letter* • 62 deputy governour again. Winthrop was chosen governor in 1631, 1632, 1633, 1634, 1637, 1638, 1639, 1640, 1642, and 1643, he was chosen deputy-governor in 1636, 1644, and 1645 • 71 for allowance. The General Court, because it had granted land to each town, retained some supervisory powers.

that would hereby accrue to Emes, (who had been their chief commander so many years, and had deserved well in his place, and that Allen had no other skill, but what he learned from Emes,) refused to allow of Allen, but willed both sides to return home, and every officer to keep his place, until the court should take further order. Upon their return home, the messengers, who came for Allen, called a private meeting of those of their own party, and told them truly, what answer they received
10 from the magistrates, and soon after they appointed a training day, (without their lieutenant's knowledge,) and being assembled, the lieutenant hearing of it came to them, and would have exercised them, as he was wont to do, but those of the other party refused to follow him, except he would show them some order for it. He told them of the magistrates' order about it; the others replied, that authority had advised him to go home and lay down his place honorably. Another asked, what the magistrates had to do with them? Another, that it was
20 but three or four of the magistrates, and if they had been all there, it had been nothing, for Mr. Allen had brought more for them from the deputies, than the lieutenant had from the magistrates. Another of them profeseth he will die at the sword's point, if he might not have the choice of his own officers. Another (viz. the clerk of the band) stands up above the people, and requires them to vote, whether they would bear them out in what was past and what was to come. This being assented unto, and the tumult continuing, one of the
30 officers (he who had told them that authority had advised the lieutenant to go home and lay down his place) required Allen to take the captain's place, but he not then accepting it, they put it to the vote, whether he should be their captain. The vote passing for it, he then told the company, it was now past question, and thereupon Allen accepted it, and exercised the company two or three days, only about a third part of them followed the lieutenant. He, having denied in the open field, that authority had advised him to lay down his
40 place, and putting (in some sort) the lie upon those who had so reported, was the next Lord's day called to answer it before the church, and he standing to maintain what he had said, five witnesses were produced to convince him. Some of them affirmed the words, the others explained their meaning to be, that one magistrate had so advised him. He denied both. Whereupon

the pastor, one Mr. Hubbert, (brother to three of the principal in this sedition,) was very forward to have excommunicated the lieutenant presently, but, upon some opposition, it was put off to the next day. There-
5 upon the lieutenant and some three or four more of the chief men of the town inform four of the next magistrates of these proceedings, who forthwith met at Boston about it, (viz. the deputy governour, the serjeant major general, the secretary, and Mr. Hibbins). These, considering the case, sent warrant to the constable to attach some of the principal offenders (viz. three of the Hubbards and two more) to appear before them at Boston, to find sureties for their appearance at the next court, etc. Upon the day they came to Boston,
6 but their said brother the minister came before them, and fell to expostulate with the said magistrates about the said cause, complaining against the complainants, as talebearers, etc., taking it very disdainfully that his brethren should be sent for by a constable, with other high speeches, which were so provoking, as some of the magistrates told him, that, were it not for respect to his ministry, they would commit him. When his brethren and the rest were come in, the matters of the information were laid to their charge, which they denied
7 for the most part. So they were bound over (each for other) to the next court of assistants. After this five others were sent for by summons (these were only for speaking untruths of the magistrates in the church). They came before the deputy governour, when he was alone, and demanded the cause of their sending for, and to know their accusers. The deputy told them so much of the cause as he could remember, and referred them to the secretary for a copy, and for their accusers he told them they knew both the men and the matter. neither was a judge bound to let a criminal offender know his accusers before the day of trial, but only in his own discretion, least the accuser might be taken off or perverted, etc. Being required to give bond for their appearance, etc., they refused. The deputy labored to let them see their error, and gave them time to consider of it. About fourteen days after, seeing two of them in the court, (which was kept by those four magistrates for smaller causes,) the deputy required them again to

47 Mr. Hubbert, Peter Hobart (1604-1678), who settled at Hingham 1635 • 75 the deputy governour, Winthrop himself

enter bond for their appearance, etc., and upon their second refusal committed them in that open court

The general court falling out before the court of assistants, the Hubberts and the two which were committed, and others of Hingham, about ninety, (whereof Mr Hubbert their minister was the first,) presented a petition to the general court, to this effect, that whereas some of them had been bound over, and others committed by some of the magistrates for words spoken concerning the power of the general court, and their liberties, and the liberties of the church, etc., they craved that the court would hear the cause, etc This was first presented to the deputies, who sent it to the magistrates, desiring their concurrence with them, that the cause might be heard, etc The magistrates, marvelling that they would grant such a petition, without desiring conference first with themselves, whom it so much concerned, returned answer, that they were willing the cause should be heard, so as the petitioners would name the magistrates whom they intended, and the matters they would lay to their charge, etc Upon this the deputies demanded of the petitioners' agents (who were then deputies of the court) to have satisfaction in these points, thereupon they singled out the deputy governour, and two of the petitioners undertook the prosecution. Then the petition was returned again to the magistrates for their consent, etc, who being desirous that the deputies might take notice, how prejudicial to authority and the honor of the court it would be to call a magistrate to answer criminally in a cause, wherein nothing of that nature could be laid to his charge, and that without any private examination preceding, did intimate so much to the deputies, (though not directly, yet plainly enough,) showing them that nothing criminal, etc, was laid to his charge, and that the things objected were the act of the court, etc, yet if they would needs have a hearing, they would join in it And indeed it was the desire of the deputy, (knowing well how much himself and the other magistrates did suffer in the cause, through the slanderous reports wherewith the deputies and the country about had been possessed,) that the cause might receive a public hearing.

The day appointed being come, the court assembled in the meeting house at Boston Divers of the elders were present, and a great assembly of people The deputy governour, coming in with the rest of the magis-

trates, placed himself beneath within the bar, and so sat uncovered. Some question was in the court about his being in that place (for many both of the court and the assembly were grieved at it). But the deputy telling them, that, being criminally accused, he might not sit as a judge in that cause, and if he were upon the bench, it would be a great disadvantage to him, for he could not take that liberty to plead the cause, which he ought to be allowed at the bar, upon this the court was satisfied

The petitioners having declared their grievances, etc., the deputy craved leave to make answer, which was to this effect, viz, that he accounted it no disgrace, but rather an honor put upon him, to be singled out from his brethren in the defence of a cause so just (as he hoped to make that appear) and of so public concernment. And although he might have pleaded to the petition, and so have demurred in law, upon three points, 1, In that there is nothing laid to his charge, that is either criminal or unjust, 2, if he had been mistaken either in the law or in the state of the case, yet whether it were such as a judge is to be called in question for as a delinquent, where it doth not appear to be wickedness or wilfulness, for in England many erroneous judgments are reversed, and errors in proceeding rectified, and yet the judges not called in question about them, 3, in that being thus singled out from three other of the magistrates, and to answer by himself for some things, which were the act of a court, he is deprived of the just means of his defence, for many things may be justified as done by four, which are not warrantable if done by one alone, and the records of a court are a full justification of any act, while such record stands in force But he was willing to waive this plea, and to make answer to the particular charges, to the end that the truth of the case, and of all proceedings thereupon might appear to all men.

Hereupon the court proceeded to examine the whole cause The deputy justified all the particulars laid to his charge, as that upon credible information of such a mutinous practice, and open disturbance of the peace, and slighting of authority, the offenders were sent for,

44 the elders, ministers of the churches Their close affiliation with Winthrop's party accounts for the identification of church and state in early Massachusetts history

the principal by warrant to the constable to bring them, and others by summons, and that some were bound over to the next court of assistants, and others that refused to be bound were committed, and all this according to the equity of laws here established, and the custom and laws of England, and our constant practice here these fifteen years. And for some speeches he was charged with as spoken to the delinquents when they came before him at his house, when none were present with
10 him but themselves, first, he appealed to the judgment of the court, whether delinquents may be received as competent witnesses against a magistrate in such a case, then, for the words themselves, some he justified, some he explained so as no advantage could be taken of them, as that he should say, that the magistrates could try some criminal causes without a jury, that he knew no law of God or man, which required a judge to make known to the party his accusers (or rather witnesses) before the cause came to hearing. But two
20 of them charged him to have said, that it was against the law of God and man so to do, which had been absurd, for the deputy professed he knew no law against it, only a judge may sometimes, in discretion, conceal their names, etc., least they should be tampered with, or conveyed out of the way, etc.

Two of the magistrates and many of the deputies were of opinion that the magistrates exercised too much power, and that the people's liberty was thereby in danger, and other of the deputies (being about half)
30 and all the rest of the magistrates were of a different judgment, and that authority was overmuch slighted, which, if not timely remedied, would endanger the commonwealth, and bring us to a mere democracy. By occasion of this difference, there was not so orderly carriage at the hearing, as was meet, each side striving unseasonably to enforce the evidence, and declaring their private judgments thereupon, which should have been reserved to a more private debate, (as after it was,) so as the best part of two days was spent in this
40 public agitation and examination of witnesses, etc. This being ended, a committee was chosen of magistrates and deputies, who stated the case, as it appeared upon the whole pleading and evidence, though it cost much time, and with great difficulty did the committee come to accord upon it.

The case being stated and agreed, the magistrates and deputies considered it apart, first the deputies, having spent a whole day, and not attaining to any issue, sent up to the magistrates to have their thoughts about it, who taking it into consideration, (the deputy always withdrawing when that matter came into debate,) agreed upon these four points chiefly, 1. That the petition was false and scandalous, 2. That those who were bound over, etc., and others that were parties to the disturbance at Hingham, were all offenders, though in different degrees, 3. That they and the petitioners were to be censured, 4. That the deputy governour ought to be acquit and righted, etc. This being sent down to the deputies, they spent divers days about it, and made two or three returns to the magistrates, and thought they found the petition false and scandalous, and so voted it yet they would not agree to any censure. The magistrates, on the other side, were resolved for censure, and for the deputy's full acquittal. The deputies being thus hard held to it, and growing weary of the court, for it began [May 14], and brake not up (save one week) till [July 5], were content they should pay the charges of the court. After, they were drawn to consent to some small fines, but in this they would have drawn in lieutenant Emes to have been fined deeply, he being neither plaintiff nor defendant, but an informer only, and had made good all the points of his information, and no offence found in him, other than that which was after adjudged worthy admonition only, and they would have imposed the charges of the court upon the whole trained band at Hingham, when it was apparent, that divers were innocent, and had no hand in any of these proceedings. The magistrates not consenting to so manifest injustice they sent to the deputies to desire them to join with

5 laws here established In 1641 the General Court had adopted one hundred fundamental laws, known as *The Body of Liberties*. Their chief author was the Rev. Nathaniel Ward (1578-1652), who, having had the advantage of legal training, modeled his statutes more upon English precedents than upon the Mosaic laws in the Old Testament, despite widespread belief among the clergy that laws ought not to "smell of man." • 33 a mere democracy Winthrop was always doubtful about referring "matter of counsel or judicature to the body of the people quia [of which] the best part is always the least, and of that best part the wiser part is always the lesser." The two magistrates who disagreed with him were Richard Saltonstall and Richard Bellingham.

them in calling in the help of the elders, (for they were now assembled at Cambridge from all parts of the Unired Colonies, and divers of them were present when the cause was publicly heard, and declared themselves much grieved to see that the deputy governour should be called forth to answer as a delinquent in such a case as this was, and one of them, in the name of the rest, had written to him to that effect, fearing least he should apprehend over deeply of the injury, etc.) but the deputies would by no means consent thereto, for they knew that many of the elders understood the cause, and were more careful to uphold the honor and power of the magistrates than themselves well liked of, and many of them (at the request of the elder and others of the church of Hingham during this court) had been at Hingham, to see if they could settle peace in the church there, and found the elder and others the petitioners in great fault, etc. After this (upon motion of the deputies) it was agreed to refer the cause to arbitrators, according to an order of court, when the magistrates and deputies cannot agree, etc. The magistrates named six of the elders of the next towns, and left it to them to choose any three or four of them, and required them to name six others. The deputies finding themselves now at the wall, and not daring to trust the elders with the cause, they sent to desire that six of themselves might come and confer with the magistrates, which being granted, they came, and at last came to this agreement, viz., the chief petitioners and the rest of the offenders were severally fined, (all their fines not amounting to 50 pounds,) the rest of the petitioners to bear equal share to 50 pounds more towards the charges of the court, (two of the principal offenders were the deputies of the town, Joshua Hubbert and Bozone Allen, the first was fined 20 pounds, and the other 5 pounds,) lieutenant Emes to be under admonition, the deputy governour to be legally and publicly acquit of all that was laid to his charge.

According to this agreement, [July 3] presently after the lecture the magistrates and deputies took their places in the meeting house, and the people being come together, and the deputy governour placing himself within the bar, as at the time of the hearing, etc, the governour read the sentence of the court, without speaking any more, for the deputies had (by importunity) ob-

tained a promise of silence from the magistrates. Then was the deputy governour desired by the court to go up and take his place again upon the bench, which he did accordingly, and the court being about to arise, he desired leave for a little speech, which was to this effect. 50

I suppose something may be expected from me, upon this charge that is befallen me, which moves me to speak now to you, yet I intend not to intermeddle in the proceedings of the court, or with any of the persons concerned therein Only I bless God, that I see an issue of this troublesome business. I also acknowledge the justice of the court, and, for mine own part, I am well satisfied, I was publicly charged, and I am publicly and legally acquitted, which is all I did expect or desire And though this be sufficient for my justification before 60 men, yet not so before the God, who hath seen so much amiss in my dispensations (and even in this affair) as calls me to be humble For to be publicly and criminally charged in this court, is matter of humiliation, (and I desire to make a right use of it,) notwithstanding I be thus acquitted. If her father had spit in her face, (saith the Lord concerning Miriam,) should she not have been ashamed seven days? Shame had lien upon her, whatever the occasion had been. I am unwilling to stay you from your urgent affairs, yet give me leave (upon this 70 special occasion) to speak a little more to this assembly. It may be of some good use, to inform and rectify the judgments of some of the people, and may prevent such distempers as have arisen amongst us. The great questions that have troubled the country, are about the authority of the magistrates and the liberty of the people. It is yourselves who have called us to this office, and being called by you, we have our authority from God, in the way of an ordinance, such as hath the image of God eminently stamped upon it, the contempt and 80 violation whereof hath been vindicated, with examples of divine vengeance. I entreat you to consider, that when you choose magistrates, you take them from among yourselves, men subject to like passions as you are. Therefore when you see infirmities in us, you should

67 Miriam. The reference is to Numbers 12 14 • 79 an ordinance. Winthrop uses the word in a legal sense of his day legislation issued by the sovereign but not sanctioned by parliament He is arguing that the magistrate, once elected, is responsible to God, not to the people

reflect upon your own, and that would make you bear the more with us, and not be severe censurers of the failings of your magistrates, when you have continual experience of the like infirmities in yourselves and others. We account him a good servant, who breaks not his covenant. The covenant between you and us is the oath you have taken of us, which is to this purpose, that we shall govern you and judge your causes by the rules of God's law and our own, according to our best skill. When you agree with a workman to build you a ship or house, etc., he undertakes as well for his skill as for his faithfulness, for it is his profession, and you pay him for both. But when you call one to be a magistrate, he doth not profess nor undertake to have sufficient skill for that office, nor can you furnish him with gifts, etc., therefore you must run the hazard of his skill and ability. But if he fail in faithfulness, which by his oath he is bound unto, that he must answer for. If it fall out that the case be clear to common apprehension, and the rule clear also, if he transgress here, the error is not in the skill, but in the evil of the will. It must be required of him. But if the case be doubtful, or the rule doubtful, to men of such understanding and parts as your magistrates are, if your magistrates should err here, yourselves must bear it.

For the other point concerning liberty, I observe a great mistake in the country about that. There is a twofold liberty, natural (I mean as our nature is now corrupt) and civil or federal. The first is common to man with beasts and other creatures. By this, man, as he stands in relation to man simply, hath liberty to do what he lists, it is a liberty to evil as well as to good. This liberty is incompatible and inconsistent with authority, and cannot endure the least restraint of the most just authority. The exercise and maintaining of this liberty makes men grow more evil, and in time to be worse than brute beasts: *omnis sumus licentia deteriores*. This is that great enemy of truth and peace, that wild beast, which all the ordinances of God are bent against, to restrain and subdue it. The other kind of liberty I call civil or federal, it may also be termed moral, in reference to the covenant between God and man, in the moral law, and the politic covenants and constitutions, amongst men themselves. This liberty is the proper end and object of authority, and cannot subsist without it; and it is a liberty to that only which is good, just, and

honest. This liberty you are to stand for, with the hazard (not only of your goods, but) of your lives, if need be. Whatsoever crosseth this, is not authority, but a distemper thereof. This liberty is maintained and exercised in a way of subjection to authority; it is of the same kind of liberty wherewith Christ hath made us free. The woman's own choice makes such a man her husband, yet being so chosen, he is her lord, and she is to be subject to him, yet in a way of liberty, not of bondage; and a true wife accounts her subjection her honor and freedom, and would not think her condition safe and free, but in her subjection to her husband's authority. Such is the liberty of the church under the authority of Christ, her king and husband; his yoke is so easy and sweet to her as a bride's ornaments; and if through frowardness or wantonness, etc., she shake it off, at any time, she is at no rest in her spirit, until she take it up again; and whether her lord smiles upon her, and embraceth her in his arms, or whether he frowns, or rebukes, or smites her, she apprehends the sweetness of his love in all, and is refreshed, supported, and instructed by every such dispensation of his authority over her. On the other side, ye know who they are that complain of this yoke, and say, let us break their bands, etc., we will not have this man to rule over us. Even so, brethren, it will be between you and your magistrates. If you stand for your natural corrupt liberties, and will do what is good in your own eyes, you will not endure the least weight of authority, but will murmur, and oppose, and be always striving to shake off that yoke; but if you will be satisfied to enjoy such civil and lawful liberties, such as Christ allows you, then will you quietly and cheerfully submit unto that authority which is set over you, in all the administrations of it, for your good. Wherein, if we fail at any time, we hope we shall be willing (by God's assistance) to hearken to good advice from any of you, or in any other way of God, so shall your liberties be preserved, in upholding the honor and power of authority amongst you . . .

1645-1853

6 covenant Winthrop's frequent reference to covenants reflects the dominance in New England of covenant or federal theology, which explained man's relation to God in terms of a legal agreement or contract.

• 37 *omnis . . . deteriores*. We are all made weak by liberty

Samuel Sewall

1652 • 1730

Samuel Sewall was born at Bishopstoke, England, but migrated to Boston when he was nine years old and spent the rest of his life there. For nearly sixty years following his graduation from Harvard in 1671 he was active in business and politics. For a period (1681-1684) he managed the colony's printing press, he spent a year in England (1688-1689), engaged in private business and assisting Increase Mather in his unsuccessful efforts to bring about the restoration of the colony's charter. he was captain, in 1701, of the Ancient and Honorable Artillery Company, and from 1718 to 1728 he was Chief Justice of the Superior Court of Massachusetts.

Sewall had fourteen children by his first wife (Hannah, daughter of John Hull, Master of the Mint), whom he married in 1676 and who died in 1717. A second wife, married in 1719, died May 26, 1720. During October and November 1720 he courted Madam Winthrop without success (see selection). A third marriage—his last—occurred in 1722.

James Truslow Adams (in the *Dictionary of American Biography*) calls Sewall a "competent jurist of more than average liberality." His most famous, or infamous, juridical rôle was played at Salem in 1692 as one of three commissioners (William Stoughton and John Hathorne were the other two) appointed by the Royal Governor, Sir William Phips, to try the cases of witchcraft. Nineteen persons were sentenced to death. Sewall was the only one of the three judges ever to admit publicly that the court had been guilty of a tragic error. On January 14, 1697, the day appointed by the legis-

lature as a day of penance for whatever had been done amiss at Salem, he stood up in the Old South Church while the Reverend Samuel Willard read Sewall's prepared statement of confession (see selection).

Sewall has been called unattractive names by more than one recent writer on colonial New England. Adams says that he was "mercenary", Parrington speaks of his "tradesman's conception of religion", socially minded historians have pointed to Sewall as an example of the unholy alliance between Puritanism and capitalism. It is true that Sewall was not the man to underestimate the value of a dollar honestly earned. At the same time, it is hardly possible for the careful reader of the *Diary* to question the sincerity of Sewall's religious convictions. His use of legal terminology in religious contexts was quite natural to a lawyer, moreover, the same usage occurs in the sermons of the least worldly ministers of the period, and Sewall was a great hearer and reader of sermons. A tradesman, yes, but the record of "a private day of Prayer with Fasting" (see entry of February 9, 1708, p. 91) shows him to have been a sincerely religious man. As an expression of "a tradesman's conception of religion," the passage is, to say the least, extraordinary.

Sewall was the author of several lesser works (among them, *The Selling of Joseph*, perhaps the earliest protest in this country against Negro slavery); but his fame rests upon the *Diary*, which remained unpublished until 1878. Begun in 1673 and continued through 1729, the *Diary* affords a rich and vivid picture of life in and

around Boston for a period of about fifty-seven years. It is remarkably concise and suggestive. Indeed, its distinctive literary virtue lies in the writer's ability to suggest an unforgettable picture in a few words: the picture, for example, of a New England meeting house in winter, "This day so cold that the Sacramental Bread is frozen pretty hard, and rattles sadly as broken into

the Plates" After these two hundred years and more, Sewall's *Diary*, in Parrington's words, "is still quick with life."

Samuel Sewall, *Diary*, Massachusetts Historical Society Collections, Series 5, Vols. V-VII, 1878-1882 • Samuel Sewall's *Diary* (abridged), ed. Mark Van Doren, New York, 1927 • V. L. Parrington, "Samuel Sewall, Yankee," *The Colonial Mind*, New York, 1927

From the

Diary

July 8, 1677. New Meeting House *Mane*: In Sermon time there came in a female Quaker, in a Canvas Frock, her hair disshevelled and loose like a Periwigg, her face as black as ink, led by two other Quakers, and two other followed. It occasioned the greatest and most amazing uproar that I ever saw. . . .

[Nov. 12, 1685] . . . the Ministers of this Town Come to the Court and complain against a Dancing Master who seeks to set up here and hath mixt Dances, and his time of Meeting is Lecture-Day, and 'tis reported he should say that by one Play he could teach more Divinity than Mr. Willard or the Old Testament. Mr. Moodey said 'twas not a time for N[ew] E[ngland] to dance. Mr. Mather struck at the Root, speaking against mixt Dances. . . .

Sabbath, Jan^y 24 [1686]. Friday night and Satterday were extream cold, so that the Harbour frozen up, and to the Castle. This day so cold that the Sacramental Bread is frozen pretty hard, and rattles sadly as broken into the Plates. . . .

Tuesday, Dec^r 21 [1686]. There is a meeting at Mr. Allen's, of the Ministers and four of each Congregation, to consider what answer to give the Governour, and 'twas agreed that could not with a good conscience con-

sent that our Meeting-Houses should be made use of for the Common-Prayer Worship. . . .

[January 14, 1697]. Copy of the Bill I put up on the Fast day; giving it to Mr. Willard as he pass'd by, and standing up at the reading of it, and bowing when finished, in the Afternoon.

Samuel Sewall, sensible of the reiterated strokes of God upon himself and family, and being sensible, that as to the Guilt contracted upon the opening of the late Comission of Oyer and Terminer at Salem (to which the order for this Day relates) he is, upon many accounts, more concerned than any that he knows of, Desires to take the Blame and shame of it, Asking pardon of men, And especially desiring prayers that God, who has an Unlimited Authority, would pardon that sin and all other his sins, personal and Relative: And according to his infinite Benignity, and Sovereignty, Not Visit the sin of him, or of any other, upon himself or any of his, nor upon the Land: But that He would powerfully defend him against all Temptations to Sin, for the future; and vouchsafe him the efficacious, saving Conduct of his Word and Spirit. . . .

1 *Mane*, in the morning • 2 a female Quaker. Interesting evidence is here afforded of a historical basis for Hawthorne's depiction of a fanatical Quakeress in *The Gentle Boy* • 3 Periwigg. Sewall had a particular aversion to periwigs • 10 Lecture-Day, every Thursday, when a sermon or "lecture" was delivered • 11 one Play. The theater, of course, was not permitted in colonial Boston • 14 Mr. Mather, the Rev. Increase Mather, father of Cotton Mather • 26 Common-Prayer Worship, the form of worship used by the Established Church of England. "I would not set up," Sewall wrote in his *Diary* "that which the people of New England came over to avoid." Thus rebuffed, Sir Edmund Andros, the Royal Governor, and his Anglican associates founded King's Chapel, although the building was not completed until after Andros' expulsion from the colony in 1689 • 27 the Bill. The document is Sewall's public confession of error as one of the judges of the witchcraft cases in Salem in 1692 • 34 Oyer and Terminer, literally, to hear and determine, used of a writ or commission giving authority to judges

Lord's Day, June 10, 1705. The Learned and pious Mr. Michael Wigglesworth dies at Malden about 9 m Had been sick about 10 days of a Fever. 73 years and 8 moneths old He was the Author of the Poem entituled The Day of Doom, which has been so often printed and was very useful as a Physician . . .

Feb^y 9. 1708. The Apointment of a Judge for the Super Court being to be made upon next Fifth day, Febr. 12, I pray'd God to Accept me in keeping a
 10 private day of Prayer with Fasting for That and other Important Matters I kept it upon the Third day Febr 10 1708 in the uper Chamber at the North-East end of the House, fastening the Shutters next the Street— Perfect what is lacking in my Faith, and in the faith of my dear Yokefellow Convert my children; especially Samuel and Hanah; Provide Rest and Settlement for Hanah. Recover Mary, Save Judith, Elisabeth and Joseph: Requite the Labour of Love of my Kinswoman Jane Tappin, Give her health, find out Rest for her

move them. They said they could but pay their Fine, and doing that they might stay. I told them if they had not a care, they would be guilty of a Riot Mr Bromfield spake of raising a number of Men to Quell them, and was in some heat, ready to run into Street. But I did not like that Not having Pen and Ink, I went to take their Names with my Pensil, and not knowing how to Spell their Names, they themselves of their own accord writ them. Mr Netmaker, reproaching the
 10 Province, said they had not made one good Law.

At last I address'd myself to Mr. Banister. I told him he had been longest an Inhabitant and Freeholder, I expected he should set a good Example in departing thence Upon this he invited them to his own House, and away they went, and we, after them, went away The Clock in the room struck a pretty while before they departed. I went directly home, and found it 25 Minutes past Ten at Night when I entred my own House . . .

Dec^r 23 [1714] Dr C Mather preaches excellently
 20 from Ps. 37. Trust in the Lord &c only spake of the Sun being in the centre of our System I think it inconvenient to assert such Problems . . .

Octob^r 3. [1720] Waited on Madam Winthrop again, 'twas a little while before she came in Her daughter Noyes being there alone with me, I said, I hoped my Waiting on her Mother would not be disagreeable to her. She answer'd she should not be against that that might be for her Comfort I Saluted her, and told her I perceiv'd I must shortly wish her a good Time,
 30 (her mother had told me, she was with Child, and within a Moneth or two of her time). By and by in came Mr Airs, Chaplain of the Castle, and hang'd up his Hat, which I was a little startled at, it seeming as if he was to lodge there. At last Madam Winthrop came in too. After a considerable time, I went up to her and said, if it might not be inconvenient I desired to speak with her She assented, and spake of going into another Room; but Mr Airs and Mrs. Noyes presently rose up, and went out, leaving us there alone Then I usher'd in
 40 Discourse from the names in the Fore-seat; at last I pray'd that Katharine might be the person assign'd for me. She instantly took it up in the way of Denyal, as if she had catch'd at an Opportunity to do it, saying she could not do it before she was asked. Said that was her mind unless she should Change it, which she believed she should not; could not leave her Children. I express'd

my Sorrow that she should do it so Speedily. pray'd her Consideration, and ask'd her when I should wait on her agen. She setting no time, I mention'd that day Sennight. Gave her Mr. Willard's Fountain open'd with the little print and verses; saying, I hop'd if we did well read that book, we should meet together hereafter, if we did not now She took the Book, and put it in her Pocket Took Leave.

8^r 5. Midweek, I din'd with the Court; from thence went and visited Cousin Jonathon's wife, Lying in with her little Betty. Gave the Nurse 2^s. Although I had appointed to wait upon her, M^m Winthrop, next Monday, yet I went from my Cousin Sewall's thither about 3 p m. The Nurse told me Madam dined abroad at her daughter Noyes's, they were to go out together. I ask'd for the Maid, who was not within. Gave Katee a peny and a Kiss and came away. Accompanied my Son and dâter Cooper in their Remove to their New House. . . .

8^r 6th. . . . A little after 6. p. m. I went to Madam Winthrop's. She was not within. I gave Sarah Chicker-
 ing the Maid 2^s, Juno, who brought in wood, 1^s. After-
 ward the Nurse came in. I gave her 18^d, having no other
 small Bill. After awhile Dr Noyes came in with his
 Mother; and quickly after his wife came in: They sat
 talking, I think, till eight a-clock. I said I fear'd I might
 be some Interruption to their Business. Dr. Noyes
 reply'd pleasantly. He fear'd they might be an Interrup-
 tion to me, and went away. Madam seem'd to harp
 upon the same string. Must take care of her Children,
 could not leave that House and Neighbourhood where
 she had dwelt so long I told her she might doe her
 children as much or more good by bestowing what she
 laid out in Hous-keeping, upon them. Said her Son

1 Fine. A law of the colony "for the better observation and keeping of the Lord's Day" imposed a fine of five shillings on every person remaining in a public house, "drinking, or idly spending his time on Saturday night, after the sun is set, or on the Lord's Day, or the evening following" • 23 Waited . . . again. Sewall's second wife had died May 26, 1720 Sewall at this time was 68, Madam Winthrop was 56. Twice a widow, she did not marry again • 32 Castle, Castle Island, which was fortified, and where soldiers were stationed • 40 names . . . Fore-seat, eligible widows, mentioned in a previous entry • 41 Katharine, Madam Winthrop • 50 Sennight, a week • 50 Fountain open'd, Samuel Willard, "The Fountain Opened, or the Great Gospel Privilege of having Christ exhibited to Sinful Men . . .," Boston 1700 • 55 8^r, October

would be of age the 7th of August. I said it might be inconvenient for her to dwell with her Daughter-in-Law, who must be Mistress of the House. I gave her a piece of Mr Belcher's Cake and Ginger-Bread wrapped up in a clean sheet of Paper; told her of her Father's kindness to me when Treasurer, and I Constable. My Daughter Judith was gon from me and I was more lonesom—might help to forward one another in our Journey to Canaan.—Mr. Eyre came within the door, I saluted him, ask'd how Mr. Clark did, and he went away. I took leave about 9 a'clock. I told [her] I came now to refresh her Memory as to Monday-night, said she had not forgot it. In discourse with her, I ask'd leave to speak with her Sister; I meant to gain Mad^m Mico's favour to persuade her Sister. She seem'd surpris'd and displeas'd, and said she was in the same condition! . . .

8^r 10th. . . . In the Evening I visited Madam Winthrop, who treated me with a great deal of Curtesy, Wine, Marmalade. I gave her a News-Letter about the Thanksgiving Proposals, for sake of the verses for David Jeffries. She tells me Dr. Increase Mather visited her this day, in Mr. Hutchinson's Coach. . . .

8^r 11th I writ a few Lines to Madam Winthrop to this purpose. "Madam, These wait on you with Mr. Mayhew's Sermon, and Account of the state of the Indians on Martha's Vinyard. I thank you for your Unmerited Favours of yesterday, and hope to have the Happiness of Waiting on you tomorrow before Eight a'clock after Noon. I pray GOD to keep you, and give you a joyfull entrance upon the Two Hundred and twenty ninth

year of Christopher Columbus his Discovery; and take Leave, who am, Madam, your humble Serv^t.

S. S.

Sent this by Deacon Green, who deliver'd it to Sarah Chickering, her Mistress not being at home.

8^r 12. . . . Mrs. Anne Cotton came to door (twas before 8.) said Madam Winthrop was within, directed me into the little Room, where she was full of work behind a Stand, Mrs. Cotton came in and stood. Madam Winthrop pointed to her to set me a Chair. Madam 40 Winthrop's Countenance was much changed from what 'twas on Monday, look'd dark and lowering. At last, the work, (black stuff or Silk) was taken away, I got my Chair in place, had some Converse, but very Cold and indifferent to what 'twas before Ask'd her to acquit me of Rudeness if I drew off her Glove. Enquiring the reason, I told her twas great odds between handling a dead Goat, and a living Lady. Got it off. I told her I had one Petition to ask of her, that was, that she would take off the Negative she laid on me the third of Oc- 50 tober, She readily answer'd she could not, and enlarg'd upon it, She told me of it so soon as she could, could not leave her house, children, neighbours, business. I told her she might do som Good to help and suport me. Mentioning Mrs. Gookin, Nath, the widow Weld was spoken of; said I had visited Mrs. Denison. I told her Yes! Afterward I said, If after a first and second Vagary she would Accept of me returning, Her Victorious Kindness and Good Will would be very Obliging. She thank'd me for my Book, (Mr. Mayhew's Sermon), But 60 said not a word of the Letter. When she insisted on the Negative, I pray'd there might be no more Thunder and Lightening, I should not sleep all night. I gave her Dr. Preston, The Church's Marriage and the Church's Carriage, which cost me 6^s at the Sale. The door standing open, Mr. Airs came in, hung up his Hat, and sat down After awhile, Madam Winthrop moving, he went out Jn^o Eyre look'd in, I said How do ye, or,

19 News-Letter. The Boston News-Letter, founded in 1704, was the first newspaper in the colonies. The issue of October 3-10, 1720, contained "A Proclamation for a General Thanksgiving" issued by Governor Samuel Shute, calling for the observance of Thursday, October 27, and "forbidding all Servile Labour and Recreation" on that day • 20 Proposals, an unidentified broadside, presumably • 64 Dr. Preston, John Preston (1587-1628), English Puritan divine, much read by the early Puritans of New England

your servant Mr. Eyre: but heard no word from him Sarah fill'd a Glass of Wine, she drank to me, I to her, She sent Juno home with me with a good Lantern, I gave her 6^d and bid her thank her Mistress. In some of our Discourse, I told her I had rather go to the Stone-House adjoining to her, than to come to her against her mind. Told her the reason why I came every other night was lest I should drink too deep draughts of Pleasure. She had talk'd of Canary, her Kisses were to
10 me better than the best Canary. Explain'd the expression Concerning Columbus . . .

8^r 15. I dine on Fish and Oyle at Mr. Stoddard's. Capt. Hill wish'd me Joy of my proceedings i. e. with M— Winthrop; Sister Cooper applauded it, spake of Visiting her I said her Complaisance of her Visit would be obliging to me.

8^r 16. L. Day, I upbraided my self that could be so solicitous about Earthly things, and so cold and indifferent as to the Love of Christ, who is altogether Lovely. . . .

20 8^r 17. . . . In the Evening I visited Madam Winthrop, who Treated me Courteously, but not in Clean Linen as sometimes She said, she did not know whether I would come again, or no. I ask'd her how she could so impute inconstancy to me. (I had not visited her since Wednesday night being unable to get over the Indisposition received by the Treatment received that night, and I *must* in it seem'd to sound like a made piece of Formality.) Gave her this day's Gazett . . .

30 8^r 18. Visited Madam Mico, who came to me in a splendid Dress I said, It may be you have heard of my Visiting Madam Winthrop, her Sister She answered, Her Sister had told her of it. I ask'd her good Will in the Affair. She answer'd, If her Sister were for it, she should not hinder it. I gave her Mr. Homes's Sermon. She gave me a Glass of Canary, entertain'd me with good Discourse, and a Respectfull Remembrance of my first Wife. I took Leave.

40 8^r 19. Midweek, Visited Madam Winthrop; Sarah told me she was at Mr. Walley's, would not come home till late. I gave her Hanah 3 oranges with her Duty, not knowing whether I should find her or no. Was ready to go home: but said if I knew she was there, I would go thither. Sarah seem'd to speak with pretty good Courage, She would be there. I went and found her there, with Mr. Walley and his wife in the little Room below. At 7 a-clock I mentioned going home; at 8. I put on

my Coat, and quickly waited on her home. She found occasion to speak loud to the servant, as if she had a mind to be known. Was Courteous to me; but took occasion to speak pretty earnestly about my keeping a Coach I said 'twould cost £100. per anum she said 'twould cost but £40. Spake much against John Winthrop, his false-heartedness. Mr Eyre came in and sat awhile, I offer'd him Dr. Incr. Mather's Sermons, whereof Mr. Apleton's Ordination Sermon was one, said he had them already. I said I would give him another. Exit. Came away somewhat late.

8^r 20. . . . Madam Winthrop not being at Lecture, I went thither first; found her very Serene with her dâter Noyes, Mrs. Dering, and the widow Shipreev sitting at a little Table, she in her arm'd Chair. She drank to me, and I to Mrs Noyes After awhile pray'd the favour to speak with her. She took one of the Candles, and went into the best Room, clos'd the shutters, sat down upon the Couch She told me Madam Usher had been there, and said the Coach must be set
2 on Wheels, and not by Rusting She spake something of my needing a Wigg Ask'd me what her Sister said to me. I told her, She said, If her Sister were for it, She would not hinder it. But I told her, she did say she would be glad to have me for her Brother Said, I shall keep you in the Cold, and asked her if she would be within to morrow night, for we had had but a running Feat She said she could not tell whether she should, or no. I took Leave As were drinking at the Governour's, he said In England the Ladies minded little
3 more than that they might have Money, and Coaches to ride in. I said, And New-England brooks its Name At which Mr. Dudley smiled. Gov^t said they were not quite so bad here.

8^r 21. Friday, My Son, the Minister, came to me p. m. by appointment and we pray one for another in the Old Chamber; more especially respecting my Courtship About 6 a-clock I go to Madam Winthrop's, Sarah told me her Mistress was gon out, but did not tell me whither she went She presently order'd me a Fire, so I went in
40 having Dr. Sibb's Bowels with me to read I read the

3 Juno, an Indian servant • 5 Stone-House, the prison near by • 17 L. Lord's • 28 Gazett, the Boston Gazette, founded in 1719 • 87 Dr Sibb's Bowels, Richard Sibbes, "Bowels Opened, or Discovery of the neere and deere Love between Christ and the Church," 1639 An English Puritan, Sibbes was much read by the New England Puritans

two first Sermons, still no body came in at last about 9 a-clock Mr Jn^o Eyre came in, I took the opportunity to say to him as I had done to Mrs. Noyes before, that I hoped my Visiting his Mother would not be disagreeable to him, He answered me with much Respect When 'twas after 9. a-clock He of himself said he would go and call her, she was but at one of his Brothers: A while after I heard Madam Winthrop's voice, enquiring something about John. After a good while and Claping the Garden door twice or thrice, she came in. I mention'd something of the lateness; she banter'd me, and said I was later. She receiv'd me Courteously. I ask'd when our proceedings should be made publick: She said They were like to be no more publick than they were already Offer'd me no Wine that I remember. I rose up at 11 a-clock to come away, saying I would put on my Coat She offer'd not to help me. I pray'd her that Juno might light me home, she open'd the Shutter, and said 'twas pretty light abroad; Juno was weary and gon to bed.

2^r So I came hom by Star-light as well as I could. At my first coming in, I gave Sarah five Shillings. I writ Mr Eyre his Name in his book with the date Octob^r 21. 1720 It cost me 8^s. Jehovah jireh! Madam told me she had visited M. Mico, Wendell, and W^m Clark of the South [Church].

Octob^r 22. Dâter Cooper visited me before my going out of Town, staid till about Sun set. I brought her going near as far as the Orange Tree. Coming back, near Leg's Corner, Little David Jeffries saw me, and looking
 3^x upon me very lovingly, ask'd me if I was going to see his Grandmother? I said, Not to-night. Gave him a peny, and bid him present my Service to his Grandmother.

Octob^r 24. I went in the Hackny Coach through the Comon, stop'd at Madam Winthrop's (had told her I would take my departure from thence). Sarah came to the door with Katee in her Arms but I did not think to take notice of the Child Call'd her Mistress. I told her, being encourag'd by David Jeffries loving eyes, and sweet Words, I was come to enquire whether she could
 4^o find in her heart to leave that House and Neighbourhood, and go and dwell with me at the South-end, I think she said softly, Not yet I told her It did not ly in my Lands to keep a Coach. If I should, I should be in danger to be brought to keep company with her Neighbour Brooker, (he was a little before sent to prison for Debrt). Told her I had an Antipathy against

those who would pretend to give themselves; but nothing of their Estate. I would a proportion of my Estate with my self. And I supos'd she would do so. As to a
 5^o Perrwig, My best and greatest Friend, I could not possibly have a greater, began to find me with Hair before I was born, and had continued to do so ever since; and I could not find in my heart to go to another. She commended the book I gave her, Dr. Preston, the Church Marriage; quoted him saying 'twas inconvenient keeping out of a Fashion comonly used. I said the Time and Tide did circumscribe my Visit. She gave me a Dram of Black-Cherry Brandy, and gave me a lump of the Sugar that was in it. She wish'd me a good Journy. I pray'd God to keep her, and came away. Had a very pleasant
 6^o Journy to Salem. . . .

31 . . . At night I visited Madam Winthrop about 6 p m. They told me she was gon to Madam Mico's. I went thither and found she was gon; so return'd to her house, read the Epistles to the Galatians, Ephesians in Mr Eyre's Latin Bible. After the Clock struck 8. I began to read the 103. Psalm Mr. Wendell came in from his Warehouse. Ask'd me if I were alone? Spake very kindly to me, offer'd me to call Madam Winthrop. I told him, She would be angry, had been at Mrs Mico's; 7^o he help'd me on with my Coat and I came home left the Gazett in the Bible, which told Sarah of, bid her present my Service to Mrs Winthrop, and tell her I had been to wait on her if she had been at home

Nov^r 1. I was so taken up that I could not go if I would.

Nov^r 2 Midweek, went again, and found Mrs. Alden there, who quickly went out. Gave her about ½ pound of Sugar Almonds, cost 3^s per £ Carried them on Monday. She seem'd pleas'd with them, ask'd what they cost
 8^o Spake of giving her a Hundred pounds per añum if I dy'd before her. Ask'd what sum she would give me, if she should dy first? Said I would give her time to Consider of it. She said she heard as if I had given all to my Children by Deeds of Gift. I told her 'twas a mistake, Point-Judith was mine &c. That in England, I own'd, my Father's desire was that it should go to my eldest Son; 'twas 20£ per añum, she thought 'twas forty.

23 Jehovah jireh, the name which Abraham gave to the place where he found the ram and offered it up in Isaac's stead (see Genesis 22 14) The meaning is "God will provide"

I think when I seem'd to excuse pressing this, she seem'd to think twas best to speak of it, a long winter was coming on. Gave me a Glass or two of Canary.

Nov^r 4th. Friday, Went again about 7. a-clock, found there Mr. John Walley and his wife sat discoursing pleasantly. I shew'd them Isaac Moses's Writing. Madam W serv'd Comfits to us After a-while a Table was spread, and Super was set. I urg'd Mr Walley to Crave a Blessing, but he put it upon me About 9 they went
 10 away I ask'd Madam what fashioned Neck-lace I should present her with. She said. None at all I ask'd her Whereabout we left off last time, mention'd what I had offer'd to give her. Ask'd her what she would give me. She said she could not Change her Condition She had said so from the beginning, could not be so far from her Children, the Lecture Quoted the Apostle Paul affirming that a single Life was better than a Married. I answer'd That was for the present Distress. Said she had not pleasure in things of that nature as formerly
 20 I said, you are the fitter to make me a Wife. If she held in that mind. I must go home and bewail my Rashness in making more haste than good Speed However, considering the Super, I desired her to be within next Monday night, if we liv'd so long Assented. She charg'd me with saying, that she must put away Juno, if she came to me I utterly deny'd it, it never came into my heart, yet she insisted upon it, saying it came in upon Discourse about the Indian woman that obtained her Freedom this Court About 10. I said I would not disturb the good orders of her House, and came away
 30 She not seeming pleas'd with my Coming away Spake to her about David Jeffries, had not seen him

Monday, Nov^r 7th. My Son pray'd in the Old Chamber Our time had been taken up by Son and Daughter Cooper's Visit, so that I only read the 130th and 143 Psalm Twas on the Account of my Courtship. I went to Mad Winthrop, found her rocking her little Katee in the Cradle I excus'd my Coming so late (near Eight) She set me an arm'd Chair and Cusheon; and so the Cradle was between her arm'd Chair and mine Gave her the remnant of my Almonds, She did not eat of them as before, but laid them away, I said I came to enquire whether she had alter'd her mind since Friday. or remained of the same mind still She said, Thereabouts I told her I loved her, and was so fond as to think that she loved me She said had a great respect for me I told her, I had made her an offer, without asking any advice, she had so many to advise with, that twas a hindrance The Fire was come to one short Brand besides the Block, which Brand was set up in end, at last it fell to pieces, and no Recruit was made She gave me a Glass of Wine I think I repeated again that I would go home and bewail my Rashness in making more haste than good Speed. I would endeavor to contain myself, and not go on to solicit her to do that which she could not Consent to Took leave of her. As came down the steps she bid me have a Care Treated me Courteously Told her she had enter'd the 4th year of her Widowhood. I had given her the News-Letter before I did not bid her draw off her glove as sometime I had done Her dress was not so clean as sometime it had been Jehovah jireh!

1677-1720-1878-1882

George Alsop

1638 • 1666

Almost nothing is known about George Alsop other than what can be gathered from his *Character of the Province of Mary-Land* (London, 1666), which has for a frontispiece his portrait "Aetat 28." He worked for four years in Maryland, probably as an indentured servant, and then returned to London.

Like dozens of other books written to encourage emigration, Alsop's *Character* begins with an enthusiastic description of the natural resources of the colony, continues with an account of the government and customs, and concludes with sections on the means of settlement and on the peculiarities of the "wilde and naked" Indians.

Two things, however, set Alsop's book apart from others of its kind: his evident delight in word-play and a rhetorical style, and his vigorous representation of non-Puritan ideals of society. His love of ornament, more typical of the Elizabethan than of his own genera-

tion, survives even to the present day in occasional pieces of polemic and satirical prose. Intellectually, Alsop was a Cavalier without being either smug or snobbish. Like the Restoration wits, he assumed a pose of detachment, but it is clear that he had a deep-rooted dislike for the bitter class and religious conflicts which had made seventeenth-century England a hotbed of faction. Moderation, stability, a nice balance between individual freedom and governmental authority, a minimum of litigation and religious zeal—these were the things he desired, and he saw more chance of achieving them in America than in Europe. There were probably many men like him in every one of the colonies.

A Character of the Province of Mary-Land, ed. J. G. Shea, New York, 1869

From

A Character of the Province of Mary-Land

The selection which follows is from the second chapter, "Of the Government and natural disposition of the People."

Mary-Land, not from the remoteness of her situation, but from the regularity of her well-ordered Government, may (without sin, I think) be called *Singular*: And though she is not supported with such large Revenues as some of her Neighbours are, yet such is her wisdom in a reserved silence, and not in pomp, to shew her well-conditioned Estate, in relieving at a distance the proud poverty of those that wont be seen they want, as well as those which by undeniable necessities are drove upon the Rocks of pinching wants: Yet such a loathsome creature as a common and folding-handed Begger, that upon the penalty of almost a perpetual working in Imprisonment, they are not to appear, nor

lurk near our vigilant and laborious dwellings The Country hath received a general spleen and antipathy against the very name and nature of it, and though there were no Law provided (as there is) to suppress it, I am certainly confident, there is none within the Province that would lower themselves so much below the dignity of men to beg, as long as limbs and life keep house together, so much is a vigilant industrious care esteem'd.

10 He that desires to see the real Platform of a quiet and sober Government extant, Superiority with a meek and yet commanding power sitting at the Helme, steering the actions of State quietly, through the multitude and diversity of Opinionous waves that diversly meet, let him look on Mary-Land with eyes admiring, and he'll then judge her, *The Miracle of this Age*.

Here the *Roman Catholick*, and the *Protestant Episcopal*, (whom the world would perswade have proclaimed open Wars irrevocably against each other) contrarywise
20 concur in an unanimous parallel of friendship, and inseparable love intayled unto one another. All Inquisitions, Martyrdom, and Banishments are not so much as named, but unexpressably abhorr'd by each other.

The several Opinions and Sects that lodge within this Government, meet not together in mutinous contempts to disquiet the power that bears Rule, but with a reverend quietness obeys the legal commands of Authority Here's never seen Five Monarchies in a Zealous Rebellion, opposing the Rights and Liberties of
30 a true settled Government, or Monarchical Authority Nor did I ever see (here in *Mary-Land*) any of those dancing Adamitical Sisters, that plead a primitive Innocency for their base obscenity, and naked deportment, but I conceive if some of them were there at some certain time of the year, between the Months of *January* and *February*, when the winds blow from the North-West quarter of the world, that it would both cool, and (I believe) convert the hottest of these Zealous from their burning and fiercest Concupiscence.

40 The Government of this Province doth continually, by all lawful means, strive to purge her Dominions from such base corroding humors, that would predominate upon the least smile of Liberty, did not the Laws check and bridle in those unwarranted and tumultuous Opinions. And truly, where a Kingdom, State or Government, keeps or cuts down the weeds of destructive

Opinions, there must certainly be a blessed Harmony of quietness And I really believe this Land or Government of *Mary-Land* may boast, that she enjoys as much quietness from the disturbance of Rebellious Opinions, as most States or Kingdoms do in the world: For here every man lives quietly, and follows his labour and employment desiredly, and by the protection of the Laws, they are supported from those molestious troubles that ever attend upon the Commons of other States and Kingdoms, as well as from the Aquafortial operation of great and eating Taxes. Here's nothing to be levied out of the Granaries of Corn, but contrarywise, by a Law every Domestick Governor of a Family is enjoyned to make or cause to be made so much Corn by a just
limitation, as shall be sufficient for him and his Family. So that by this wise and *Janus*-like providence, the thin jawed Skeliton with his starv'd Carcass is never seen walking the Woods of *Mary-Land* to affrighten Children.

Once every year within this Province is an Assembly called, and out of every respective County (by the consent of the people) there is chosen a number of men, and to them is deliver'd up the Grievances of the Country; and they maturely debate the matters, and according to their Consciences make Laws for the general good of the people; and where any former Law that was made, seems and is prejudicial to the good or quietness of the Land, it is repeal'd. These men that determine on these matters for the Republique, are called Burgesses, and they commonly sit in Junto about six weeks, being for the most part good ordinary Housholders of the several Counties, which do more by a plain and honest Conscience, then by artificial Syllogisms drest up in gilded Orations

Text the first edition (1666) • **28 Five Monarchies** The Fifth Monarchy men were an extremist sect with the belief that the second coming of Christ was at hand and should be prepared for, by violence if necessary. They conspired against Oliver Cromwell in 1657 and tried to seize London by force in 1661, after which they were suppressed. Their name came from their conviction that the four ancient kingdoms of Assyria, Persia, Greece, and Rome were to be eclipsed by that of Jesus Christ • **32 Adamitical Sisters**. Since early Christian times, various sects practicing nudism in their meetings have been called Adamites. The extent of the practice in Alsop's time is problematical, but it is often mentioned in lists of current heresies • **56 Aquafortial**. Aqua fortis, or nitric acid, was used to dissolve all metals other than gold • **62 Janus-like**, two-faced, from the Roman god whose month was January. The sense seems to be that the law worked two ways. every man had food, and there was no vagrancy

Here Suits and Tryals in Law seldome hold dispute two Terms or Courts, but according as the Equity of the Cause appears is brought to a period. The *Temples* and *Grays-Inne* are clear out of fashion here *Marriot* would sooner get a paunch-devouring meal for nothing, then for his invading Council Here if the Lawyer had nothing else to maintain him but his bawling, he might button up his Chops, and burn his Buckrom Bag, or else hang it upon a pin untill its Antiquity had eaten it up with durt and dust Then with a Spade, like his Grandsire *Adam*, turn up the face of the Creation, purchasing his bread by the sweat of his brows, that before was got by the motionated Water-works of his jaws So contrary to the Genius of the people, if not to the quiet Government of the Province, that the turbulent Spirit of continued and vexatious Law, with all its querks and evasions, is openly and most eagerly opposed, that might make matters either dubious, tedious, or troublesom All other matters that would be ranging in contrary and improper Spheres, (in short) are here by the Power moderated, lower'd, and subdued All villanous Outrages that are committed in other States, are not so much as known here A man may walk in the open Woods as secure from being externally dissected, as in his own house or dwelling. So hateful is a Robber, that if but once imagin'd to be so, he's kept at a distance and shun'd as the Pestilential noysomness

It is generally and very remarkably observed, That those whose Lives and Conversations have had no other gloss nor glory stamp't on them in their own Country, but the stigmatization of baseness, were here (by the common civilities and deportments of the Inhabitants of this Province) brought to detest and loath their former actions. Here the Constable hath no need of a train of *Holberteers*, that carry more Armour about them, then heart to guard him Nor is he ever troubled to leave his Feathered Nest to some friendly successor, while he is placing of his Lanthern-horn Guard at the end of some suspicious Street, to catch some Night-walker, or Batchelor of Leachery, that has taken his Degree three story high in a Bawdy-house Here's no *Newgates* for pilfering Felons, nor *Ludgates* for Debtors, nor any *Bridewils* to lash the soul of Concupiscence into a chast Repentance For as there is none of these Prisons in *Mary-Land*, so the merits of the Country deserves none, but if any be foully vitious, he is so reserv'd in it,

that he seldom or never becomes popular. Common Alehouses, (whose dwellings are the only Receptacles of debauchery and baseness, and those Schools that trains up Youth, as well as Age, to ruine) in this Province there are none; neither hath Youth his swing or range in such a profuse and unbridled liberty as in other Countries, for from an ancient Custom at the primitive seating of the place, the Son works as well as the Servant, (an excellent cure for untam'd Youth) so that before they eat their bread, they are commonly taught how to earn it, which makes them by that time Age speaks them capable of receiving that which their Parents indulgency is ready to give them, and which partly is by their own laborious industry purchased, they manage it with such a serious, grave and watching care, as if they had been Masters of Families, trained up in that domestick and governing power from their Cradles These Christian Natives of the Land, especially those of the Masculine Sex, are generally conveniently confident, reservedly subtle, quick in apprehending, but slow in resolving, and where they spy profit sailing towards them with the wings of a prosperous gale, there they become much familiar The Women differ something in this point, though not much They are extreme bashful at the first view, but after a continuance of time hath brought them acquainted, there they become discreetly familiar, and are much more talkative then men All Complemental Courtships, drest up in critical Rarities, are meer strangers to them, plain wit comes nearest their Genius; so that he that intends to Court a *Mary-Land* Girle, must have something more then the Tautologies of a long-winded speech to carry on his design, or else he may (for ought I know) fall under the contempt of her frown, and his own windy Oration

3 *Temples* and *Grays-Inne*, societies of lawyers, which in England have the sole right to admit members of the bar, and are both the equivalent of colleges of law and office-residences for practicing lawyers Oliver Goldsmith is one of the many famous men of letters who lived in the Inns of Court • 4 *Marriot*. John Marriot (d 1653) was the victim of a famous libel of 1652, *The Great Eater of Graye's Inn, or the Life of Marriot, the Cormorant* He was said to have the appetite of twenty men, which he satisfied by eating dogs and offal • 35 *Holberteers*, halberdiers, guards or foot-soldiers armed with a long, spearlike weapon • 42 *Newgates* . . . *Ludgates* . . . *Bridewils*, prisons, distinguished, as is suggested, by the offenses for which criminals were committed

One great part of the Inhabitants of this Province are desiredly Zealous, great pretenders to Holiness; and where any thing appears that carries on the Frontispiece of its Effigies the stamp of Religion, though fundamentally never so imperfect, they are suddenly taken with it, and out of an eager desire to any thing that's new, not weighing the sure matter in the Ballance of Reason, are very apt to be catcht *Quakerism* is the only Opinion that bears the Bell away The *Anabaptists* have little to say here, as well as in other places, since the Ghost of *John of Leyden* haunts their Conventicles The *Adamite Ranter*, and *Fift-Monarchy men*, *Mary-Land* cannot, nay will not digest within her liberal stomach such corroding morsels So that this Province is an utter Enemy to blasphemous and zealous Imprecations, drain'd from the Lymbeck of hellish and damnable Spirits, as well as profuse prophaneness, that issues from the prodigality of none but crackt-brain Sots.

*'Tis said the Gods lower down that Chain above,
That ties both Prince and Subject up in Love;
And if this Fiction of the Gods be true,
Few, Mary-Land, in this can boast but you:
Live ever blest, and let those Clouds that do
Eclipse most States, be alwayes Lights to you;
And dwelling so, you may for ever be
The only Emblem of Tranquility.*

1666?•1666

9 *Anabaptists*, a religious sect of the Reformation era, opposed to infant baptism The Anabaptists also held communistic theories, and in 1534 announced the foundation, in the city of Münster in Westphalia, Germany, of a society which should have no magistrates, no law, no marriage, and no private property Led by John of Leyden, the Anabaptists shocked all Europe, and were eventually dispersed after enduring a lengthy siege • 12 *Ranter*, an extreme Protestant of the Commonwealth period, so called because of extravagance in expression The Ranters were distinguished by their pantheism, or the belief that God dwelt in every creature in the universe, for which heresy they were vigorously prosecuted • 16 *Lymbeck*, alembic, an apparatus for distilling

Sarah Kemble Knight

1666 • 1727

The life of Sarah Kemble Knight shows that even in early colonial days a woman of enterprise and intelligence could make a career for herself The daughter of a Boston merchant, Madam Knight, after her husband's death, efficiently attended to the business of the estate. In addition, she kept a dame's school which Benjamin Franklin is said to have attended, did a good deal of legal work and managed a rather large household. She lived in Boston until 1713, then moved to New London, Connecticut, and lived there until her death in 1727

Mrs Knight's *Journal* (October 1704–March 1705)

—a record of a trip through Rhode Island and Connecticut to New York and thence back to Boston—differs greatly in its materials from the gloomy religious introspections characteristic of the diaries of her contemporaries. This “dame of Boston—buxom, blithe, and debonair—” writes amusingly of her journeying and of her stops along the way. Much of the humor is made possible by Mrs Knight's sprightly fun with some of the religious concepts which weigh down other journals of the day. Pondering the crossing of a rough stream by boat, for instance, she pictured herself being douse-

"like a holy Sister Just come out of a Spiritual Bath in dripping Garments", or learning that an innkeeper nearby was named Mr. Devil, she wondered whether she should "go to the Devil to be helpt out of affliction."

Madam Knight's sense of comedy plus her flair for observation gave her little book added importance as an early humorous depiction of the characters and manners of rural New England and New York. Her sketch of

the Yankee bumpkin and his mate, in the selection which follows (the title has been supplied by the editors), vividly brings to life physical aspects, postures, and speech—a rare achievement for the period.

Life in Connecticut

Saturday, Oct 7th

... About two o'clock afternoon we arrived in New Haven, where I was received with all Possible Respects and civility. Here I discharged Mr. Wheeler with a reward to his satisfaction, and took some time to rest after so long and toilsome a Journey, And Inform'd mysele of the manners and customs of the place, and at the same time employed mysele in the affair I went there upon.

They are Govern'd by the same Laws as wee in Boston, (or little differing,) thr'out this whole Colony of Connecticut, And much the same way of Church Government, and many of them good, Sociable people, and I hope Religious too: but a little too much Independent in their principalls, and, as I have been told, were formerly in their Zeal very Riggid in their Administrations towards such as their Lawes made Offenders, even to a harmless Kiss or Innocent merriment among Young people Whipping being a frequent and counted an easy Punishment, about w^{ch} as other Crimes, the Judges were absolute in their Sentences. They told mee a pleasant story about a pair of Justices in those parts w^{ch} I may not omit the relation of.

A Negro Slave belonging to a man in y^e Town, stole a

hogs head from his master, and gave it or sold it to an Indian, native of the place. The Indian sold it in the neighbourhood, and so the theft was found out. Thereupon the Heathen was Seized, and carried to the Justices House to be Examined. But his worship (it seems) was gone into the field, with a Brother in office, to gather in his Pompions. Whither the malefactor is hurried, And Complaint made, and satisfaction in the name of Justice demanded. Their Worships cann't proceed in form without a Bench, whereupon they Order one to be Immediately erected, which, for want of fitter materials, they made with pompions—which being finished, down setts their Worships, and the Malefactor call'd, and by the Senior Justice Interrogated after the following manner: You Indian why did You steal from this man? You sho'dn't do so—it's a Grandy wicked wicked thing to steal. Hol't 40 Hol't cries Justice Jun^r Brother, You speak Negro to him. I'll ask him. You sirrah, why did You steal this man's Hoggshead? Hoggshead? (replies the Indian,) me no stomany. No? says his Worship, and pulling off his hatt, Patted his own head with his hand, saiz, Tatapa—You, Tatapa—you all one this. Hah! says Netop, now me stomany that. Whereupon the Company fell into a great fitt of Laughter, even to Roreing. Silence is commanded, but to no effect: for they continued perfectly Shouting. Nay, said his worship, in an angry tone, if it 50 be so, *take mee off the Bench*.

Their Diversions in this part of the Country are on Lecture days and Training days mostly on the former there is Riding from town to town.

And on training dayes The Youth divert themselves by Shooting at the Target, as they call it, (but it very

31 *Pompions*, pumpkins • 44 *stomany*, understand (?) • 53 *Training days*, days on which the militia drilled

much resembles a pillory,) where hee that hitts nearest the white has some yards of Red Ribbin presented him wth being tied to his hartband, the two ends streeming down his back, he is Led away in Triumph, wth great applause, as the winners of the Olympiack Games. They generally marry very young the males oftener as I am told under twentie than above; they generally make public weddings, and have a way something singular (as they say) in some of them, *viz.* Just before Joyning
 0 hands the Bridegroom quitts the place, who is soon followed by the Bridesmen, and as it were, [is] dragged back to duty—being the reverse to y^e former practice among us, to steal his Bride.

There are great plenty of Oysters all along by the sea side, as farr as I Rode in the Collony, and those very good And they Generally lived very well and comfortably in their famelies. But too Indulgent (especially y^e farmers) to their slaves sufering too great familiarity from them, permitting them to sit at Table and eat with
 20 them, (as they say to save time,) and into the dish goes the black hoof as freely as the white hand They told me there was a farmer lived nere the Town where I lodgd who had some differences wth his slave, concerning something the master had promised him and did not punctually perform; w^{ch} caused some hard words between them. But at length they put the matter of Arbitration and Bound themselves to stand to the award of such as they named—w^{ch} done, the Arbitrators Having heard the Allegations of both parties. Order the master to pay 40^s
 30 to black face, and acknowledge his fault And so the matter ended: the poor master very honestly standing to the award.

There are every where in the Towns as I passed, a Number of Indians the Natives of the Country, and are the most salvage of all the salvages of that kind that I had ever Seen: little or no care taken (as I heard upon enquiry) to make them otherwise. They have in some places Landes of their owne, and Govern'd by Law's of their own making;—they marry many wives and at
 40 pleasure put them away, and on the least dislike or fickle humour, on either side, saying *stand away* to one another is a sufficient Divorce. And indeed those uncomely *Stand aways* are too much in Vogue among the English in this (Indulgent Colony) as their Records plentifully prove, and that on very trivial matters, of which some have been told me, but are not proper to be Related by

a Female pen, tho some of that foolish sex have had too large a share in the story.

If the natives committ any crime on their own precincts among themselves, y^e English takes no Cognizens of But if on the English ground, they are punishable by our Laws. They mourn for their Dead by blackening their faces, and cutting their hair, after an Awkerd and frightfull manner, But can't bear You should mention the names of their dead Relations to them they trade most for Rum, for w^{ch} theyd hazard their very lives, and the English fit them Generally as well, by seasoning it plentifully with water

They give the title of merchant to every trader, who Rate their Goods according to the time and spetia they pay in *viz* Pay, mony, Pay as mony, and trusting Pay is Grain, Pork, Beef, &c at the prices sett by the General Court that Year, *mony* is pieces of Eight, Ryalls, or Boston or Bay shillings (as they call them,) or Good hard money, as sometimes silver coin is termed by them, also Wampom, *vizt.* Indian beads w^{ch} serves for change *Pay as mony* is provisions, as aforesd one Third cheaper then as the Assembly or Gen^l Court sets, and *Trust* as they and the merch^t agree for time

Now, when the buyer comes to ask for a comodity, sometimes before the merchant answers that he has it, he says, *is Your pay redy?* Perhaps the Chap Reply's Yes: what do You pay in? say's the merchant The buyer having answered, then the price is set, as suppose he wants a sixpenny knife, in pay it is 12d—in pay as money eight pence, and hard money its own price, *viz.* 6d It seems a very Intricate way of trade and what *Lex Mercatoria* had not thought of

Being at a merchants house, in comes a tall country fellow, wth his alfogeos full of Tobacco, for they seldom Loose their Cudd, but keep Chewing and Spitting as long as they'r eyes are open,—he advanc't to the midle of the Room, makes an Awkward Nodd, and spitting a Large deal of Aromatick Tincture, he gave a scrape with his shovel like shoo, leaving a small shovel full of dirt on the floor, made a full stop, Hugging his own pretty Body with his hands under his arms, Stood staring rownd him,

60 *spetia*, species of money • 63 *Ryalls*, Spanish reals • 75 12d, twelve pence The 'd' is derived from the Latin coin, "denarius" • 77 *Lex Mercatoria*, the usage and customs of merchants • 80 *alfogeos* Spanish alforjas, saddlebags—here meaning, of course, cheeks

like a Catt let out of a Baskett At last, like the creature Balaam Rode on, he opened his mouth and said have You any Ribeinen for Harbands to sell I pray? The Questions and Answers about the pay being past, the Ribin is bro't and opened. Bumpkin Simpers, cries its confounded Gay I vow, and beckning to the door, in comes Jone Tawdry, dropping about 50 curtsees, and stands by him: hee shows her the Ribin. *Law You*, sais shee, *its right Gent*, do You, take it, *its dreadfull pretty*. Then she enquires, *have you any hood silk I pray?* w^{ch} being brought and bought, Have you any *thred silk to sew it wth* says shee, w^{ch} being accomodated wth they Departed. They Generally stand after they come in a great while speechless and sometimes dont say a word till they are askt what they want, which I Impute to the Awe they stand in of the merchants, who they are constantly almost Indebted too; and must take what they bring without Liberty to choose for themselves; but they serve them as well, making the merchants stand long enough for their pay.

We may Observe here the great necessity and benefitt both of Education and Conversation, for these people have as Large a portion of mother witt, and sometimes a Larger, than those who have bin brought up in Citties, But for want of improvements, Render themselves al-

most Ridiculos, as above. I should be glad if they would leave such follies, and am sure all that Love Clean Houses (at least) would be glad on't too.

They are generally very plain in their dress, throuout all y^e Colony, as I saw, and follow one another in their 30 modes, that You may know where they belong, especially the women, meet them where you will.

Their Cheif Red Letter day is St Election, w^{ch} is annually Observed according to Charter, to choose their Govern^r, a blessing they can never be thankfull enough for, as they will find, if ever it be their hard fortune to loose it The present Govenor is the Hon^{ble} John Winthrop Esq. A Gentleman of an Ancient and Honourable Family, whose Father was Govenor here sometime before, and his Grandfather had bin Gov^r of the Massa- 40 chusetts. This gentleman is a very curteous and afable person, much Given to Hospitality, and has by his Good services Gain'd the affection of the people as much as any who had bin before him in that post.

1704-1705-1825

1 the creature Balaam Rode on, the ass in the Biblical story of Balaam • 3 Ribeinen, ribbons • 9 Gent, genteel • 35 a blessing . . . Madam Knight is referring to the fact that Massachusetts, unlike Connecticut, at the time was governed by appointees of the king

William Byrd

1674 • 1744

Gentleman, scholar, and wit, William Byrd II, Esquire, of Westover Plantation, Virginia, vividly exemplifies colonial Southern aristocracy. Although Byrd's birthplace was a tidewater plantation, he was educated in England and on the Continent. His training in business and the

law prepared him to engage in what he called "projects for improving our infant colony" and to administer his properties. His training in the social graces and in classical and Neoclassical literature prepared him to live as an aristocrat and to write amusing literature.

Shortly after his return from England to America in 1692, Byrd assumed his place as a member of the ruling circle of Virginia. He served in the House of Burgesses, on various occasions he represented the colony in England, he was appointed a member of the Council and held that dignified position the rest of his life. In addition to these political duties, Byrd had the task of running a vast plantation tended by numerous slaves and of supervising extensive scattered properties (He had title to 179,440 acres of land at the time of his death) "Like one of the patriarchs," he wrote a noble British friend, "I have my flocks and my herds, my bondmen and my bondwomen, and every sort of trade amongst my own servants, so that I live in a kind of independence of everyone but Providence. However, this sort of life . . . is attended with a great deal of trouble. I must take care to keep all my people to their duty, to set all the springs in motion, and to make everyone draw his equal share to carry the machine forward." Some of Byrd's secret journals which recently have been decoded and published make clear that, although he lived in a princely style, he had more than his share of work and worry.

Byrd's numerous tasks, however, did not keep him from living as he felt a gentleman should. His handsome brick mansion, with its fine gardens and its wide lawn sloping to the river, was a show place. The manor house was furnished with the costliest of furniture, cut glass, and silver imported from England, and on the

walls were hung not only family portraits but also paintings of the lords and ladies he had met abroad. Having seen more of genteel society in London than any contemporaneous Virginian, Byrd thought of himself as a social leader—one who should set the pace for the *beau monde*. "My doors," he wrote proudly, "are open to everybody"; and his hospitality was lavish.

But Byrd's idea of aristocratic living included pleasures in addition to those afforded by dancing, dining, and fox hunting. Thinking well of scholarship, for years he corresponded with the Royal Society, of which he was a member; and almost daily he took from the shelves of his admirable library some Latin, Greek, or Hebrew classic to read and enjoy. And in his correspondence through the years with his British friends he tried to give his phrases the sparkle, the wit, and the grace of some of the urbane classical authors whom he admired.

Such were the attitudes, such was the way of life that shaped the writings for which Byrd is best remembered. *The Secret History*, *The History of the Dividing Line*, *A Progress to the Mines*, and *A Journey to the Land of Eden*. The first two are accounts of a surveying trip Byrd led in 1728 to determine the Virginia boundary. The latter two works record journeys he made in 1732

Panel (l to r) Byrd as a surveyor • Byrd's drawing-room • Westover
• Byrd at the age of 30 • Byrd coat-of-arms • Dancing the minuet at Westover

and 1733 to inspect his frontier properties. None of these works was published until 1841, long after his death, although the last three were revised, bound, and preserved for his descendants.

These writings show the ability to record in well-turned phrases the witty perceptions of an author who knew and admired such sophisticated British writers of the period as Wycherley, Swift, and Pope. They also show the personality of their author—a businessman, keenly observant of industry, commerce, and commercial

possibilities, a Virginia aristocrat, given to taking sly digs at people of other social strata or other parts of the country, a charming and urbane man of the world.

From

The Secret History of the Line

The following entries in Byrd's secret journal tell of a part of the survey in 1728 to determine the line between Virginia and North Carolina. At the time the passage begins, the surveyors were going through the Dismal Swamp, and the commissioners, who had gone around the swamp, were awaiting their return. The passage, with its handling of a rather racy situation in the manner of an author of Restoration comedy, is typical of a good deal of Byrd's writing. It is noteworthy that Byrd gives his companions names generally used in the comedy of the period.

March] 25, [1728] The Air was chill'd with a N Wester which favour'd our Dismalites who enter'd the Desert very early It was not so kind to Meanwell who unreasonably kick't off the Bed Clothes, & catch't An Ague We killed the Time, by that great help to disagreeable Society, a Pack of Cards. Our Landlord had not the Good Fortune to please Firebrand with our Dinner, but surely when People do their best, a reasonable Man wou'd be satisfy'd. But he endeavour'd to

mend his Entertainment by making hot Love to Ruth,¹⁰ who wou'd by no means be charm'd either with his Perswasion, or his Person While the Master was employ'd in making Love to one Sister, the man made his Passion known to the other, Only he was more boisterous, & employ'd force, when he cou'd not succeed by fair means. Tho' one of the men rescu'd the poor Girl from this violent Lover, but was so much his Friend as to keep the shamefull Secret from those, whose Duty it wou'd have been to punish such Violations of Hospitality. Nor was this the only one this²⁰ disorderly fellow was guilty of, for he broke upon a House where our Landlord kept the Fodder for his own use, upon the belief that it was better than what he allow'd us This was in compliment to his Master's Horses I hope, & not in blind obedience to any order he receiv'd from him.

[March] 26. I persuaded Meanwell to take a Vomit of Ipocoacana which workt very kindly, I took all the care of him I cou'd, tho' Firebrand was so unfriendly as not to step once up Stairs to visit him. I also gave a³⁰ Vomit to a poor Shoemaker that belong'd to my Landlord, by which he reap't great benefit. Puzzlecause made a Journey to Edenton, & took our Chaplain with him to preach the Gospel to the Infidels of that Town, & to baptize some of their Children. I began to entertain with my Chocolate, which every body commended, but

2 Dismalites, the surveyors in the Dismal Swamp • 3 Meanwell, identified by Professor Boyd as William Dandridge, a Virginia commissioner • 7 Firebrand, Richard Fitz-William, another Virginia commissioner • 28 Ipocoacana, technical name for ipecac, the root of which is emetic • 32 Puzzlecause, fictitious name for Edward Moseley, a North Carolina commissioner

y he that commends nothing that don't belong to self. In the Evening I took a Solitary walk, that I ght have Leisure to think on my absent Friends, which ow grew impatient to see. Orion stuck as close to his ron Firebrand, as the Itch does to the Fingers of ny of his Country Folks.

[March] 27 Tho' it threaten'd Rain both Yesterday today, yet Heaven was so kind to our Friends in the smal as to keep it from Falling. I perswaded Mean-ll to take the Bark, which He did with good Effect, s' he continued very faint & low-Spirited. He took ebrand's Neglect in great Dudgeon, and amidst all good Nature cou'd not forbear a great deal of sentment, but I won his Heart entirely by the tender re I took of him in his illness I also gain'd the Men's fection by dressing their wounds, & giving them tle Remedys for their complaints. Nor was I less in y Landlords Books, for acting the Doctor in his Fam-. Tho' I observ'd some Distempers in it, that were st my Skill to cure. For his Wife & Heir Apparent re so enclin'd to a cheerfull Cup, that our Liquor was ry unsafe in their keeping I had a long time observed

that they made themselves happy every day, before the Sun had run one third of his course, which no doubt gave some uneasiness to the Old Gentleman. but Custome that reconciles most Evils, made him bear it with Christian Patience

As to the Young Gentleman, he seem'd to be as worth- less as any homebred Squire I had ever met with, & much the worse for having a good Opinion of him- self His good Father intended him for the Mathe- maticks, but he never cou'd rise higher in that Study than to gage a Rum Cask. His Sisters are very sensible Industrious Damsels, who tho' they see Gentlemen but Seldom, have the Grace to resist their Importunitys, & tho' they are innocently free, will indulge them in no dangerous Libertys However their cautious Father having some Notion of Female Frailty, from what he observed in their Mother, never suffers them to lie out of his own Chamber

1728-1929

An Aristocrat Describes Lubberland

Byrd's account, in *The History of the Dividing Line*, of a week of the days covered in the previous selection offers an interesting comparison with the less polite *Secret History*. Although in each passage the author has his eye on amusing literary effects, the second version, intended for publication, is less libelous and more polished. The second version, too, shows more of Byrd's prejudices—against infidels and New Englanders, for instance. The satirical description of the poor whites in the entry for March 27, the best-known passage in the diary, is an

interesting early example of a kind of humor which later was to be widespread in America—humor which made sport of the people of this class.

March 24, 1728.] This being Sunday, we had a Numerous congregation, which flocked to our Quarters from all the adjacent Country. The News that our Surveyors were come out of the Dismal, increas'd the Number very much, because it wou'd give them an Opportunity of guessing, at least, whereabouts the Line wou'd cut, whereby they might form Some Judgment whether they belong'd to Virginia or Carolina. Those who had taken up Land within the Disputed Bounds were in great pain lest it should be found to ly in Virginia, because this being done contrary to an Express

2 Numerous congregation, ironic reference to the people of the district, gathered not for Sunday worship but to find where the line was to fall

Order of that government, the Patentees had great reason to fear they should in that case have lost their land. But their Apprehensions were now at an end, when they understood that all the Territory which had been controverted was like to be left in Carolina. In the afternoon, those who were to re-enter the Dismal were furnished with the Necessary provisions, and Order'd to repair the Over-Night to their Landlord, Peter Brinkley's, that they might be ready to begin their Business early on Monday Morning. Mr. Irvin was excused from the fatigue, in compliment to his Lungs; but Mr. Mayo and Mr. Swan were Robust enough to return upon that painful Service, and, to do them Justice, they went with great Alacrity. The Truth was, they now knew the worst of it, and cou'd guess pretty near at the time when they might hope to return to Land again.

[March] 25th The Air was chill'd this Morning with a Smart North-west Wind, which favour'd the Dismalites in their Dirty March. They return'd by the Path they had made in coming out, and with great Industry arriv'd in the Evening at the Spot where the Line had been discontinued. After so long and laborious a Journey, they were glad to repose themselves on their couches of Cypress-bark, where their sleep was as sweet as it wou'd have been on a Bed of Finland Down. In the mean time, we who stay'd behind had nothing to do, but to make the best observations we cou'd upon that Part of the Country. The Soil of our Landlord's Plantation, though none of the best, seemed more fertile than any thereabouts, where the Ground is near as Sandy as the Desarts of Affrica, and consequently barren. The Road leading from thence to Edenton, being in distance about 27 Miles, lies upon a ridge call'd Sandy-Ridge, which is so wretchedly Poor that it will not bring Potatoes.

The Pines in this part of the country are of a different Species from those that grow in Virginia: their bearded Leaves are much longer and their Cones much larger. Each Cell contains a Seed of the Size and Figure of a black-ey'd Pea, which, Shedding in November, is a very good Mast for Hogs, and fattens them in a Short time. The smallest of these Pines are full of Cones, which are 8 or 9 Inches long, and each affords commonly 60 or 70 Seeds. This Kind of Mast has the Advantage of all other, by being more constant, and less liable to be nippt by the Frost, or eaten by the Caterpillars. The Trees also abound

more with Turpentine, and consequently yield more Tarr, than either the Yellow or the White Pine; and for the same reason make more durable Timber for building. The Inhabitants hereabouts pick up Knots of Lightwood ⁵⁰ in abundance, which they burn into tar, and then carry it to Norfolk or Nansemond for a Market. The Tar made in this method is the less Valuable, because it is said to burn the Cordage, tho' it is full as good for all other uses, as that made in Sweden and Muscovy.

Surely there is no place in the World where the Inhabitants live with less Labour than in N Carolina. It approaches nearer to the Description of Lubberland than any other, by the great felicity of the Climate, the easiness of raising Provisions, and the Slothfulness of the People. ⁶⁰

Indian corn is of so great increase, that a little Pains will Subsist a very large Family with Bread, and then they may have meat without any pains at all, by the Help of the Low Grounds, and the great Variety of Mast that grows on the High-land. The Men, for their Parts, just like the Indians, impose all the Work upon the poor Women. They make their Wives rise out of their Beds early in the Morning, at the same time that they lye and Snore, till the Sun has risen one-third of his course, and disperst all the unwholesome Damps. Then, after ⁷⁰ Stretching and Yawning for half an Hour, they light their Pipes, and, under the protection of a cloud of Smoak, venture out into the open Air, tho', if it happens to be never so little cold, they quickly return Shivering into the Chimney corner. When the Weather is mild, they stand leaning with both their arms upon the cornfield fence, and gravely consider whether they had best go and take a Small Heat at the Hough but generally find reasons to put it off till another time.

Thus they loiter away their Lives, like Solomon's Sluggard, with their Arms across, and at the Winding up of the Year Scarcely have Bread to Eat. To speak the Truth, tis a thorough Aversion to Labor that makes People file off to N Carolina, where Plenty and a Warm Sun confirm them in their disposition to Laziness for their whole Lives. ⁸⁰

1 Patentees, holders of grants of land • 28 Landlord's Plantation, the Speight plantation • 50 Lightwood, resinous pine • 58 Lubberland, imaginary country where people live in idleness • 78 Hough, hoe • 80 Solomon's Sluggard. See Proverbs 6 9. "How long wilt thou sleep, O sluggard?"

[March] 26. Since we were like to be confin'd to this place, till the People return'd out of the Dismal, 'twas agreed that our Chaplain might Safely take a turn to Edenton, to preach the Gospel to the Infidels there, and Christen their Children. He was accompany'd thither by Mr. Little, One of the Carolina Commissioners, who, to shew his regard for the Church, offered to treat Him on the Road with a Fricassee of Rum. They fry'd half a Dozen Rashers of very fat Bacon in a Pint of Rum, both which being disht up together, serv'd the company at once both for meat and Drink. Most of the Rum they get in this country comes from New England, and is so bad and unwholesome, that it is not improperly called "Kill-Devil." It is distilled there from forreign molosses, which, if Skilfully manag'd, yields near Gallon for Gallon. Their molosses comes from the same country, and has the name of "Long Sugar" in Carolina, I suppose from the Ropiness of it, and Serves all the purposes of Sugar, both in their Eating and
 20 Drinking.

When they entertain their Friends bountifully, they fail not to set before them a Capacious Bowl of Bombo, so call'd from the Admiral of that name. This is a Compound of Rum and Water in Equal Parts, made palatable with the said long Sugar. As good humour begins to flow, and the Bowl to Ebb, they take Care to replenish it with Shear rum, of which there always is a Reserve under the Table. But such Generous doings happen only when that Balsam of life is plenty. for
 30 they have often such Melancholy times, that neither Land-graves nor Cassicks can procure one drop for their Wives, when they ly in, or are troubled with the Colick or Vapours. Very few in this Country have the Industry to plant Orchards, which, in a Dearth of Rum, might supply them with much better Liquor. The Truth is, there is one Inconvenience that easily discourages lazy People from making This improvement very often, in Autumn, when the Apples begin to ripen, they are visited with Numerous Flights of paraqueets, that bite
 40 all the Fruit to Pieces in a moment, for the sake of the Kernels The Havock they make is sometimes so great, that whole orchards are laid waste in Spite of all the Noises that can be made, or Mawkins that can be dress'd up, to fright 'em away. These Ravenous Birds visit North Carolina only during the warm Season, and so soon as the Cold begins to come on, retire back towards

the Sun. They rarely Venture so far North as Virginia, except in a very hot Summer, when they visit the most Southern Parts of it. They are very Beautiful; but like some other pretty Creatures, are apt to be loud and mischievous.

[March] 27. Berwixt this and Edenton there are many thuckleberry Slashes, which afford a convenient Harbour for Wolves and Foxes. The first of these wild Beasts is not so large and fierce as they are in other countries more Northerly. He will not attack a Man in the Keenest of his Hunger, but run away from him as from an Animal more mischievous than himself. The Foxes are much bolder, and will Sometimes not only make a Stand, but likewise assault any one that would balk them of their Prey. The Inhabitants hereabouts take the trouble to dig abundance of Wolf-Pits, so deep and perpendicular, that when a Wolf is once tempted into them, he can no more Scramble out again, than a Husband who has taken the leap can Scramble out of Matrimony. Most of the Houses in this part of the country are Log-houses, covered with Pine or Cypress shingles, 3 feet long, and one broad. They are hung upon Laths with Peggs, and their doors too turn upon Wooden Hinges, and have wooden Locks to Secure them, so that the Building is finisht without Nails or other Iron-Work. They also set up their Pales without Nails at all, and indeed more Securely than those that are nailed. There are 3 Rails mortis'd into the Posts, the lowest of which serves as a Sill with a Groove in the Middle, big enough to receive the End of the Pales the middle Part of the pale rests against the Inside of the Next Rail, and the Top of it is brought forward to the outside of the uppermost. Such Wreathing of the Pales in and out makes them stand firm, and much harder to unfix than when nail'd in the Ordinary way.

Within 3 or 4 miles of Edenton, the Soil appears to be a little more fertile, tho' it is much cut with Slashes, which seem all to have a tendency towards the Dismal. This Towne is Situate on the North side of Albemarle Sound, which is thereabout 5 miles over. A Dirty Slash

31 Land-graves nor Cassicks, high officials provided for in John Locke's "The Fundamental Constitutions of Carolina" (1669). Byrd is here gibing at some of the stuffy titles suggested by Locke • 43 Mawkins, scarecrow • 53 thuckleberry, huckleberry • 53 Slashes, swamps which, as Byrd goes on to say, drain into the Dismal Swamp • 72 Pales, fence pales

runs all along the Back of it, which in the Summer is a foul annoyance, and furnishes abundance of that Carolina plague, musquetas. There may be 40 or 50 Houses, most of them Small, and built without Expense A Citizen here is counted Extravagant, if he has Ambition enough to aspire to a Brick-chimney. Justice herself is but indifferently Lodged, the Court-House having much of the Air of a common Tobacco-House. I believe this is the only Metropolis in the Christian or Mahometan World, where there is neither Church, Chappel, Mosque, Synagogue, or any other Place of Publick Worship of any Sect or Religion whatsoever. What little Devotion there may happen to be is much more private than their vices The People seem easy without a Minister, as long as they are exempted from paying Him Sometimes the Society for propagating the Gospel has had the Charity to send over Missionaries to this Country, but unfortunately the Priest has been too Lewd for the people, or, which oftener happens, they too lewd for the Priest

2 For these Reasons these Reverend Gentlemen have always left their Flocks as arrant Heathen as they found them. Thus much however may be said for the Inhabitants of Edenton, that not a Soul has the least taint of Hypocrisy, or Superstition, acting very Frankly and aboveboard in all their Excesses

Provisions here are extremely cheap, and extremely good, so that People may live plentifully at a trifling expense. Nothing is dear but Law, Physick, and Strong Drink, which are all bad in their Kind, and the last they get with so much Difficulty, that they are never guilty of the Sin of Suffering it to Sour upon their Hands Their Vanity generally lies not so much in having a handsome Dining-Room, as a Handsome House of Office in this Kind of Structure they are really extravagant They are rarely guilty of Flattering or making Court to their governors, but treat them with all the Excesses of Freedom and Familiarity. They are of Opinion their rulers wou'd be apt to grow insolent, if they grew Rich, and for that reason take care to keep them poorer, and more dependent, if possible, than the Saints in New England used to do their Governors They have very little corn, so they are forced to carry on their Home-Traffick with Paper-Money. This is the only Cash that will tarry in the Country, and for that reason the Discount goes on increasing between that and real Money, and will do so to the End of the Chapter.

[March] 28. Our Time pass'd heavily in our Quarters, where we were quite cloy'd with the Carolina Felicity of having nothing to do. It was really more insupportable than the greatest Fatigue, and made us even envy the Drudgery of our Friends in the Dismal. Besides, tho' the Men we had with us were kept in Exact Discipline, and behav'd without Reproach, yet our Landlord began to be tired of them, fearing they would breed a Famine in his Family Indeed, so many keen Stomachs made great Havock amongst the Beef and Bacon which he had laid in for his Summer Provision, nor cou'd he easily purchase More at that time of the Year, with the Money we paid him, because the People having no certain Market seldom provide any more of these Commodities than will barely supply their own Occasions. Besides the Weather was now grown too warm to lay in a fresh Stock so late in the Spring These Considerations abated somewhat of that chearfulness with which he bidd us Welcome in the Beginning, and made him think the time quite as long as we did until the Surveyors return'd. While we were thus all Hands uneasy, we were comforted with the News that this Afternoon the Line was finisht through the Dismal. The Messenger told us it had been the hard work of three days to measure the Length of only 5 miles, and mark the Trees as they pass'd along, and by the most exact Survey they found the Breadth of the Dismal in this Place to be completely 15 miles. How wide it may be in other Parts, we can give no Account, but believe it grows narrower towards the North; possibly towards Albemarle Sound it may be something broader, where so many Rivers issue out of it All we know for certain is, that from the Place where the line enter'd the Dismal, to where it came out, we found the Road round that Portion of it belongs to Virginia to be about 65 Miles How great the Distance may be from Each of those Points, round that Part that falls within the Bounds of Carolina, we had no certain Information Tho' tis conjectur'd it cannot be so little as 30 Miles At which rate the whole Circuit must be about an Hundred. What a Mass of Mud and Dirt is treasur'd up within this filthy circumference, and what a Quantity of Water must perpetually drain into it from the rising ground that Surrounds it on every

41 Saints in New England, a gibe at New England Puritanism •
53 behav'd without Reproach Compare The Secret History

? Without taking the Exact level of the Dismal, we be sure that it declines towards the Places where Several Rivers take their Rise, in order to carry off constant Supplies of Water. Were it not for such harges, the whole Swamp would long Since have converted into a Lake On the other Side this lension must be very gentle, else it would be laid ectly dry by so many continual drains, Whereas, on

the contrary, the Ground seems everywhere to be thoroughly drenched even in the dryest Season of the Year The Surveyors concluded this day's Work with running 25 chains up into the Firm Land, where they waited further Orders from the Commissioners.

1728-1841

• The History of the Dividing Line

A Progress to the Mines

September and October 1732 Byrd took a trip to inspect ne of his mining properties and to collect what data could on the cost of manufacturing iron. Along the y he stopped to inspect properties of his or to visit with rious prosperous planters This excerpt tells of the first o stops. He halted first at his father's old place near the ls of the James River, where he supervised some drilling d talked with the miller, the weaver, the overseer's wife, d the overseer. His second stop was at Colonel Randolph's home at Tuckahoe There with Mrs Fleming, another friend of the Randolph's, he was delayed for a time by iny weather.

732, Sept 18 For the pleasure of the good company f Mrs. Byrd, and her little Governuor. my Son, I went bout half way to the Falls in the Chariot. There we alted, not far from a purling Stream, and upon the rump of a propagate Oak picket the Bones of a Piece f Roast Beef. By the Spirit which that gave me, I was he better able to part with the dear Companions of my ravel, and to perform the rest of my Journey on Horseback by myself. I reached Shaccoa's before 2 o'clock, and crost the River to the Mills. I had the Grief o find them both stand as still, for the want of Water,

as a dead Woman's Tongue, for want of Breath. It had rain'd so little for many Weeks above the Falls, that the Naides had hardly Water enough left to wash their Faces However, as we ought to turn all our Misfortunes to the best Advantage, I directed Mr. Booker, my first Minister there, to make use of the lowness of the water for blowing up the Rocks at the Mouth of the Canal. For that purpose I order'd Iron Drills to be made about 2 foot long, pointed with Steel, Chizzel fashion, in order to : make holes, into which we put our Cartridges of Powder, containing each about 3 Ounces. There wanted Skill among my Engineers to chuse the best parts of the Stone for boring, that we might blow to the most advantage. They made all their Holes quite perpendicular, whereas they should have humour'd the Grain of the Stone for the more effectual Execution. I order'd the points of the Drills to be made Chizzel way, rather than the Diamond, that they might need to be Seldomer repair'd, tho' in Stone the Diamond points would make the most despatch The Water now flow'd out of the River so slowly, that the Miller was oblig'd to pond it up in the Canal. by setting open the Floodgates at the Mouth, and shutting those close at the Mill. By this contrivance, he was able at any time to grind two or three Bushels, either for his choice Customers, or for the use of my Plantations Then I walkt to the place where they broke the Flax, which is wrought with much greater ease than the Hemp, and is much better for Spinning. From thence I paid a Visit to the Weaver, who needed a little of Minerva's Inspiration to make the most of a piece of fine Cloth Then I lookt in upon my Caledonian Spinster, who was mended more in her looks than in her

14 Naides, narads • 41 Minerva, the goddess of spinning and weaving • 42 Caledonian Spinster, the wife of the overseer

Humour However, she promised much, tho' at the same time intended to perform little She is too high-Spirited for Mr Booker, who hates to have his sweet Temper ruffled, and will rather suffer matters to go a little wrong sometimes, than give his righteous Spirit any uneasiness. He is very honest, and would make an admirable Overseer where Servants will do as they are bid But Eye-Servants, who want abundance of over-looking, are not so proper to be committed to his Care I found myself out of order, and for that reason retir'd Early, yet with all this precaution had a gentle fever in the Night, but towards morning Nature set open all her Gates, and drove it out in a plentiful perspiration.

[Sept.] 19. The worst of this fever was, that it put me to the Necessity of taking another Ounce of Bark I moisten'd every dose with a little Brandy, and fill'd the Glass up with Water, which is the least Nauseous way of taking this Popish Medicine, and besides hinders it from Purging After I had swallow'd a few Poacht Eggs, we rode down to the Mouth of the Canal, and from thence crost over to the broad Rock Island in a Canoe Our errand was to view some Iron Ore, which we dug up in two places. That on the surface seemed very spongy and poor, which gave us no great Encouragement to search deeper, nor did the Quantity appear to be very great However, for my greater Satisfaction, I order'd a hand to dig there for some time this Winter. We walkt from one End of the Island to the other, being about half a Mile in length, and found the Soil
3: very good, and too high for any Flood, less than that of Deucalion, to do the least damage There is a very wild prospect both upward and downward, the River being full of Rocks, over which the Stream tumbled with a Murmur, loud enough to drown the Notes of a Scolding Wife This Island would make an agreeable Hermitage for any good Christian, who had a mind to retire from the World. Mr Booker told me how Dr Ireton had cured him once of a Looseness, which had been upon him two whole years He order'd him a Dose of
4* Rhubarb, with directions to take 25 Drops of Laudanum so Soon as he had had 2 Physical Stools. Then he rested one day, and the next order'd him another Dose of the same Quantity of Laudanum to be taken, also after the 2d Stool. When this was done, he finisht the Cure by giving him 20 drops of Laudanum every night for five Nights running. The Doctor insisted upon the necessity

of Stopping the Operation of the Rhubarb before it workt quite off, that what remained behind might strengthen the Bowels. I was punctual in Swallowing my Bark, and that I might use exercise upon it, rode to 50 Prince's Folly, and my Lord's Islands, where I saw very fine Corn In the meantime Vulcan came in Order to make the drills for boring the Rocks, And gave me his Parole he wou'd, by the grace of God, attend the works till they were finisht, which he perform'd as lamely as if he had been to labour for a dead Horse, and not for ready Money. I made a North Carolina dinner upon Fresh Pork, though we had a plate of Green Peas after it, by way of Desert, for the Safety of our Noses Then my first minister and I had some serious Conversation 60 about my affairs, and I find nothing disturb'd his peaceable Spirit so much as the misbehavior of the Spinster above-mention'd I told him I cou'd not pity a Man, who had it always in his Power to do himself and her Justice, and wou'd not If she were a Drunkard, a Scold, a Thief, or a Slanderer, we had wholesome Laws, that would make her Back Smart for the diversion of her other Members, and it was his Fault he had not put those wholesome Severities in Execution I retired in decent time to my own Apartment, and Slept very com- 70 fortably upon my Bark, forgetting all the little crosses arising from Overseers and Negroes.

[Sept.] 20 I continued the Bark, and then tost down my Poacht Eggs, with as much ease as some good Breeders Slip Children into the World About Nine I left the Prudentest Orders I could think of with my Visier, and then crost the River to Shacc's I made a running Visit to 3 of my Quarters, where, besides finding all the People well, I had the Pleasure to see better Crops than usual both of Corn and Tobacco I parted there with my In- 80 tendant, and pursued my Journey to Mr Randolph's, at Tuckahoe, without meeting with any Adventure by the way Here I found Mrs Fleming, who was packing up her Baggage with design to follow her Husband the next day, who was gone to a new Settlement in Goochland Both he and She have been about Seaven Years persuading themselves to remove to that retired part of

31 Deucalion, son of Prometheus When Jupiter punished the race of men with a vast flood, Deucalion and his wife Pyrrha alone survived by finding refuge on towering Parnassus • 52 Vulcan, god of fire, hence of the glow of the forge Here, of course, the name is humorously applied to a very un-Vulcan-like worker • 76 Visier, vizier

the Country, tho' they had the two strong Arguments of Health and Interest for doing so. The Widow smiled graciously upon me, and entertain'd me very handsomely. Here I learnt all the tragical Story of her Daughter's humble Marriage with her Uncle's Overseer. Besides the meanness of this mortal's Aspect, the Man has not one visible Qualification, except Impudence, to recommend him to a Female's Inclinations. But there is sometimes such a Charm in that Hibernian Endowment, 10 that frail Woman cannot withstand it, tho' it stand alone without any other Recommendation. Had she run away with a Gentleman or a pretty Fellow, there might have been some Excuse for her, tho' he were of inferior Fortune but to stoop to a dirty Plebeian, without any kind of merit, is the lowest Prostitution. I found the Family justly enraged at it; and tho' I had more good Nature than to join in her Condemnation, yet I could devise no Excuse for so senceless a Prank as this young Gentlewoman had play'd. Here good Drink was more 20 Scarce than good Victuals, the Family being reduc'd to the last Bottle of Wine, which was therefore husbanded very carefully. But the Water was excellent. The Heir of the Family did not come home till late in the Evening. He is a pretty Young Man, but had the misfortune to become his own master too soon. This puts young Fellows upon wrong pursuits, before they have Sence to Judge rightly for themselves. Tho' at the same time they have a strange conceit of their own Sufficiency, when they grow near 20 Years old, especially if they 30 happen to have a small Smattering of Learning. 'Tis then they fancy themselves wiser than all their Tutors and Governors, which makes them headstrong to all advice, and above all Reproof and Admonition.

[Sept.] 21. I was sorry in the morning to find myself stopt in my Career by bad Weather brought upon us by a North-East Wind. This drives a World of Raw unkindly Vapours upon us from Newfoundland, laden with Blite, Coughs, and Pleurisys. However, I complain'd not, lest I might be suspected to be tir'd of the 40 good Company. Tho' Mrs. Fleming was not so much upon her Guard, but mutiny'd strongly at the Rain, that hinder'd her from pursuing her dear Husband. I said what I cou'd to comfort a Gentlewoman under so sad a Disappointment. I told her a husband, that staid so much at Home as her's did, cou'd be no such violent Rarity, as for a Woman to venture her precious Health, to go dag-

gling thro' the Rain after him, or to be miserable if she happen'd to be prevented. That it was prudent for marry'd people to fast Sometimes from one another, that they might come together again with the better Stomach. That the best things in this World, if constantly us'd, are apt to be cloying, which a little absence and Abstinence wou'd prevent. This was Strange Doctrine to a fond Female, who fancys People shou'd love with as little Reason after Marriage as before. In the afternoon Monsieur Marij, the Minister of the Parish, came to make me a Visit. He had been a Romish Priest, but found Reasons, either Spiritual or temporal, to quit that gay Religion. The fault of this new Convert is, that he looks for as much Respect from his Protestant Flock, as is paid to the Popish Clergy, which our ill-bred Hugonots dont understand. Madam Marij, had so much Curiosity as to want to come too; but another Horse was wanting, and she believ'd it would have too Vulgar an Air to ride behind her Husband. This Woman was of the true Exchange Breed, full of Discourse, but void of Discretion, and marry'd a Parson, with the Idle hopes he might some time or other come to be his Grace of Canterbury. The Gray Mare is the better Horse in that Family, and the poor man Submits to her wild Vagarys for Peace' Sake. She has just enough of the fine Lady, to run in debt, and be of no signification in her Household. And the only thing that can prevent her from undoing her loving Husband will be, that nobody will trust them beyond the 16000, which is soon run out in a Goochland store. The way of Dealing there is, for some small Merchant or Pedler to buy a Scots Pennyworth of Goods, and clap 150 per cent upon that. At this Rate the Parson cant be paid much more for his preaching than tis worth. No sooner was our Visitor retired, but the facetious Widow was so kind as to let me into all this Secret History, but was at the same time exceedingly Sorry that the Woman should be so indiscreet, and the man so tame as to be govern'd by an unprofitable and fantastical Wife.

[Sept.] 22. We had another wet day, to try both Mrs Fleming's Patience and my good Breeding. The N E Wind commonly sticks by us 3 or 4 days, filling the Atmosphere with damps, injurious both to man and

75 16000. Sixteen thousand pounds of tobacco was the legal salary of a minister

Beast. The worst of it was, we had no good Liquor to warm our Blood, and fortify our Spirits against so strong a Malignity. However, I was cheerful under ail these Misfortunes, and expresst no Concern but a decent Fear lest my long visit might be troublesome Since I was like to have thus much Leizure, I endeavour'd to find out what Subject a dull marry'd man cou'd introduce that might best bring the Widow to the Use of her Tongue At length, I discover'd she was a notable Quack, and therefore paid that regard to her Knowledge, as to put some Questions to her about the bad distemper that raged then in the Country. I mean the Bloody Flux, that was brought us in the Negro-ship consigned to Colo. Braxton She told me she made use of very Simple remedys in that Case, with very good Success She did the Business either with Hartshorn Drink, that had Plantain Leaves boil'd in it, or else with a Strong decoction of St. Andrew's Cross, in New milk instead of Water. I agreed with her that those remedys might be very good, but would be more effectual after a dose or two of Indian Physick. But for fear this Conversation might be too grave for a Widow, I turn'd the discourse, and began to talk of Plays, & finding her Taste lay most towards Comedy, I offer'd my Service to read one to Her, which she kindly accepted She produced the 2d part of the Beggar's Opera, which had diverted the Town for

10 nights successively, and gain'd four thousand pounds to the Author. This was not owing altogether to the Wit or Humour that Sparkled in it, but to some Political Reflections, that seem'd to hit the Ministry. But the great Advantage of the Author was, that his Interest was solicited by the Dutchess of Queensbury, which no man could refuse who had but half an Eye in his head, or half a Guinea in his Pocket. Her Grace, like Death, spared nobody, but even took my Lord Selkirk in for 2 Guineas, to repair which Extravagance he liv'd upon Scots Herrings 2 Months afterwards. But the best Story was, she made a very Smart Officer in his Majesty's Guards give her a Guinea, who Swearing at the same time twas all he had in the world, she sent him 50 for it the next day, to reward his Obedience. After having acquainted my Company with the History of the Play, I read 3 Acts of it, and left Mrs. Fleming and Mr. Randolph to finish it, who read as well as most Actors do at a Rehearsal Thus we kill'd the time, and triumpht over the bad Weather.

1732-1866

26 *the Beggar's Opera* (1727), a play by John Gay (1688-1732) produced very successfully, as Byrd indicates, in London. Actually it ran for sixty-three successive nights • 32 *the Dutchess of Queensbury*, Catherine Douglas, the wife of the third Duke of Queensbury, Charles Douglas—a leading figure in London society and one of Gay's staunchest friends

Samuel Peters

1735 • 1826

Samuel Peters, an early writer of American "whoppers," was born in Hebron, Connecticut, in 1735, the descendant of an old colonial Puritan family. He graduated from Yale in 1757, went abroad, and was con-

verted to Anglicanism. Following his ordination in 1760, he was appointed Rector of Hebron and Hertford.

In the dispute between the colonies and England, Peters was persecuted because of his Toryism. On one

occasion, for instance, a mob, coming to his home, "fired balls into the house, and with stones, bricks and clubs broke the doors, windows, and furniture, wounding his mother, the nurse of his infant son, and his two brothers, and seizing him, tore off his hat, wig, gown, and cassock, made him naked (except his breeches, stocking, and shoes), struck him with their staves and spat in his face," and threatened to tar and feather him. Imperiled by additional violence, he escaped to England in 1774 and did not return until 1805. He died in 1826.

In England, in 1781, Peters published his *General History of Connecticut* . . . which purposed, he said, "to bring to light truths long concealed," and which included "a description of the country, and many curious and interesting anecdotes." The scientific accuracy of the history and description in the book was somewhat militated against by Peters' prejudices. Furthermore the Rev

Peters had a sense of humor which caused him to enjoy working into a solemn description of a river the statement that it flowed so fast a crowbar would float on it.

The result was a book foreshadowing *Knickerbocker's History of New York* and the tall tales later to be published by Western writers. As Irving was to do, Peters maliciously satirized life in New England, emphasizing the harsh Blue Laws, the practice of bundling, and the foolishness of some of the inhabitants. He also threw in some "stretchers," included, apparently, for the pure joy of drawing a long bow. Such passages as the following have in them the fantasy and solemn-faced mendacity typical of much later American humor.

General History of Connecticut, ed. S. J. McCormick, New York, 1877 • E. A. Duyckinck and G. L. Duyckinck, "Samuel Peters," *Cyclopedia of American Literature*, New York, 1856

From

General History of Connecticut

BIRDS AND TREE-FROGS

The partridges in New England are near as large as a Dorking fowl; the quails, as an English partridge; and the robins twice as big as those in England. The dew-mink, so named from its articulating those syllables, is black and white, and of the size of an English robin. Its flesh is delicious. The humility is so called because it speaks the word *humility*, and seldom mounts high in the air. Its legs are long enough to enable it to outrun a dog for a little way, its wings long and narrow, body meager, and of the size of a blackbird's; plumage varie-
 10 gated with white, black, blue, and red. It lives on tadpoles, spawn, and worms; has an eye more piercing than the falcon, and the swiftness of an eagle. Hence it can never be shot: for it sees the sparks of fire even before

they enkindle the powder, and by the extreme rapidity of its flight, gets out of reach in an instant. It is never known to light upon a tree, but is always seen upon the ground or wing. These birds appear in New England in summer only; what becomes of them afterwards is not discovered. They are caught in snares, but can never be tamed.

The whippoorwill has so named itself by its nocturnal songs. It is also called the pope, by reason of its darting with great swiftness from the clouds to the ground, and bawling out *Pope!* which alarms young people and the fanatics very much, especially as they know it to be an ominous bird. However, it has hitherto proved friendly, always giving travellers and others notice of an approaching storm, by saluting them every minute with *Pope! Pope!* It flies only a little before sunset, unless for this purpose of giving notice of a storm. It never deceives the people with false news. If the tempest is to continue long, the augurs appear in flocks, and nothing can be heard but the word *Pope! Pope!* The whippoorwill is about the size of a cuckoo, has a short beak, long and narrow wings, a large head and mouth enor-

22 whippoorwill. In his remarks about this bird, Peters makes fun of the Puritan fear of popery.

After the engraving in the edition of 1829.

mous, yet it is not a bird of prey. Under its throat is a pocket, which it fills with air at pleasure, whereby it sounds forth the fatal words *Pope* in the day, and *Whip-her-I-will* in the night. The superstitious inhabitants would have exorcised this harmless bird long ago, as an emissary from Rome and an enemy to the American vine, had they not found out that it frequents New England only in the summer, and prefers the wilderness to a palace. Nevertheless, many cannot but believe it a spy from some foreign court, an agent of Antichrist, a lover of persecution, and an enemy of Protestants, because it sings of *whipping*, and of the *Pope*, which they think portends misery and a change of religion.

The tree-frog cannot be called an insect, a reptile, or one of the winged host. He has four legs, the two foremost short, with claws as sharp as those of a squirrel; the hind legs five inches long, and folding by three joints. His body is about as big as the first joint of a man's thumb. Under his throat is a wind-bag, which assists him in singing the word *I-sa-ac* all the night. When it rains and is very dark, he sings the loudest. His voice is not so pleasing as that of a nightingale, but this would be a venial imperfection if he would but keep silence on Saturday nights, and not forever prefer *I-sa-ac* to *Abraham* and *Jacob*. He has more elasticity in his long legs than any other creature yet known. By this means he will leap five yards up a tree, fastening himself to it by his fore feet; and in a moment will hop or spring as far as from one tree to another. It is from the singing of the tree-frog that the Americans have acquired the name of *Little Isaac*. Indeed, like a certain part of them, the

creature appears very devout, noisy, arbitrary, and phlegmatic, and associates with none but what agree with him in his ways.

THE FROGS OF WINDHAM

Windham, the second county in the ancient kingdom of *Sassacus*, or colony of *Saybrook* is hilly, but the soil being rich, has excellent butter, cheese, hemp, wheat, Indian corn, and horses. Its towns are twelve.

Windham resembles *Rumford*, and stands on *Winnomantic* river. Its meeting-house is elegant, and has a steeple, bell, and clock. Its court-house is scarcely to be looked upon as an ornament. The township forms four parishes, and is ten miles square.

Strangers are very much terrified at the hideous noise made on summer evenings by the vast number of frogs in the brooks and ponds. There are about thirty different voices among them, some of which resemble the bellowing of a bull. The owls and whippoor-wills complete the rough concert, which may be heard several miles. Persons accustomed to such serenades are not disturbed by them at their proper stations, but one night, in July, 1758, the frogs of an artificial pond, three miles square, and about five from *Windham*, finding the water dried up, left the place in a body, and marched, or rather hopped, towards *Winnomantic* river. They were under the necessity of taking the road and going through the town, which they entered about midnight. The bull frogs were the leaders, and the pipers followed without number. They filled a road 40 yards wide for four miles in length, and were for several hours in passing through the town unusually clamorous. The inhabitants were equally perplexed and frightened: some expected to find an army of French and Indians, others feared an earthquake and dissolution of nature. The consternation was universal. Old and young, male and female, fled naked from their beds with worse shriekings than those of the frogs. The event was fatal to several women. The men, after a flight of half a mile, in which they met with many broken shins, finding no enemies in pursuit of them, made a halt and summoned resolution enough to ven-

31 like them. Here Peters makes run or what he considers the fanaticism and dogmatism of the Puritans. • 39 *Winnomantic* river, the *Willimantic*.

ture back to their wives and children, when they distinctly heard from the enemy's camp these words "*Wight, Hilderken, Die! Tete*" This last they thought meant *treaty*, and plucking up courage, they sent a triumvirate to capitulate with the supposed French and Indians These three men approached in their shirts, and begged to speak with the General, but it being dark, and no answer given, they were sorely agitated for some time betwixt hope and fear, at length however they
10 discovered that the dreaded inimical army was an army of thirsty frogs, going to the river for a little water

Such an incursion was never known before nor since, and yet the people of Windham have been ridiculed for their timidity on this occasion I verily believe an army under the Duke of Marlborough would, under like circumstances, have acted no better than they did

In 1768, the inhabitants on Connecticut river were as much alarmed at an army of caterpillars, as those of Windham were at the frogs, and no one found reason
20 to jest at their fears Those worms came in one night, and covered the earth on both sides of that river to an extent of three miles in front and two in depth They marched with great speed and eat up everything green for the space of one hundred miles, in spite of rivers, ditches, fires, and the united efforts of 1,000 men They were, in general, two inches long, had white bodies covered with thorns, and red throats When they had finished their work, they went down to the river Connecticut, where they died, poisoning the waters until
30 they were washed into the sea This calamity was imputed by some to the vast number of trees and logs lying in the creeks, and to the cinders, smoke, and fires made to consume the waste wood for three or four hundred miles up the Connecticut; while others thought it augured future evils similar to those in Egypt The inhabitants of the Verdmonts would unavoidably have perished by famine in consequence of the devastation of these worms, had not a remarkable providence filled the wilderness with wild pigeons, which were killed by
40 sticks as they sat on the branches of trees in such multitudes, that 30,000 people lived on them for three weeks If a natural cause may be assigned for the coming of the frogs and caterpillars, yet the visit of the pigeons to a wilderness in August has been necessarily ascribed to an interposition of infinite power and goodness. Happy will it be for America, if the smiling prov-

idence of Heaven produces gratitude, repentance, and obedience amongst her children!

HEBRON

Hebron is the center of the province; and it is remarkable that there are thirty-six towns larger, and thirty-six less It is situated between two ponds, about two miles in length and one in breadth, and is intersected by two small rivers, one of which falls into the Connecticut, the other into the Thames A large meeting[-house] stands on a square, where four roads meet The town resembles Finchley The township eight miles square, five parishes, one is Episcopal The number of houses is 400, of the inhabitants, 3,200 It pays one part out of seventy-three of all governmental taxes, and is a bed of farmers on their own estates Frequent suits about the Indian titles have rendered them famous for their knowledge in law and self-preservation In 1740, Mr George Whitefield gave them this laconic character "*Hebron*," says he, "is the stronghold of Satan, for its people mightily oppose the work of the Lord, being more fond of earth than of heaven"

This town is honored by the residence of the Rev Dr Benjamin Pomeroy, an excellent scholar, an exemplary gentleman, and a most thundering preacher of the New Light order His great abilities procured him the favor and honor of being the instructor of Abimeleck, the present King of Mohegin He is of a very persevering, sovereign disposition, but just, polite, generous, charitable, and without dissimulation—*Arvis alba*.

Here also reside some of the descendants of William Peters, Esq, already spoken of, among whom is the Rev Samuel Peters, an Episcopal clergyman, who, by his generosity and zeal for the Church of England and loyalty to the House of Hanover, has rendered himself famous both in New and Old England, and in some degree made an atonement for the fanaticism and treasons of his uncle Hugh, and of his ancestor on his mother's side, Major-general Thomas Harrison, both hanged at Charing-Cross in the last century .

William Bartram

1739 • 1823

Benjamin Franklin probably thought "Billy Bartram a little unsteady in comparison with his shrewd farmer-botanist-nurseryman father, John. Billy could draw and color pictures of Pennsylvania turtles well enough to have them published in the *Gentleman's Magazine* in London, but he was not anxious to be apprenticed to an engraver. He failed to make his living either as a trader or as a farmer. Wandering with his father into the back country, collecting seeds and plants to send to wealthy gardening enthusiasts in England, he had learned a great many things, none of them especially profitable. By Poor Richard's standards, he had been spoiled.

Bartram's Quaker faith and family loyalties accentuated intense shyness and personal humility. He never married; he was never conspicuous in Philadelphia scientific circles, although he was a member of the American Philosophical Society and could have been, late in life, professor of botany at the University of Pennsylvania. He was glad to pass on whatever he knew to his friends for them to use as they wished.

In another environment, perhaps, Bartram's meticulous observations might have made him a great botanist, ornithologist, geologist, or anthropologist, but he would not have been happy. In his time the study of nature was relatively unspecialized, and it was still possible to see a plant, a bird, a landscape, or an Indian as an individual rather than as a specimen. Nature to Bartram was animistic, sublime, unspoiled, and beautiful, his Seminoles and Cherokees were, except when corrupted by the white man, unblemished in their nobility, as

became nature's children. The great adventure of his life was as much poetic as scientific—a series of excursions into the deep South between 1773 and 1777, when the guns were firing at Lexington, Trenton, and Charleston. At the expense of a London physician, John Fothergill, Bartram walked and sailed and paddled through enchanting country, taking notes for a book wherein poetry is modestly hidden behind a prosaic title: *Travels Through North & South Carolina, Georgia, East & West Florida, the Cherokee Country, the Extensive Territories of the Muscogules, or Creek Confederacy, and the Country of the Chactaws; Containing an Account of the Soil and Natural Productions of Those Regions, Together with Observations on the Manners of the Indians* (Philadelphia, 1791).

The *Travels* was reprinted in London editions in 1792 and 1794, in a Dublin edition in 1793, and translations were soon available in German (1793), Dutch (1794-1797), and French (1799-1801). It has twice been reprinted in recent years (1928, 1940). Scholars have demonstrated that it was read and much admired by Coleridge, Wordsworth, Chateaubriand, and others, who paid it the compliment of echoing or borrowing outright many of its passages, notably in "The Rime of the Ancient Mariner," "Kubla Khan," "Ruth," *The Prelude*, and *Les Natchez*. Very probably, as has been claimed, Bartram's was the first American book to have wide literary influence abroad. It is difficult to read as an organic whole, because Bartram interspersed notes on natural history (sometimes lists of scientific

names according to the Linnaean classification) with passages of poetic description, philosophical comment, religious ecstasy, and thumbnail narratives of his encounters with men and beasts in the lush semitropical regions which he visited. He was able, nevertheless, to communicate his delight in the external world with disarming and attractive freshness. One can readily un-

derstand why he was a favorite among the writers of the Romantic period

From

Travels

Part I of the *Travels* describes a sea trip from Philadelphia to Savannah, with a stop at Charleston, and several excursions into what is now the interior of Georgia, between April 1773 and March 1774. Part II, the longest and most popular section, covers travels in northern Florida in 1774. Part III is an account of a trip from Charleston across South Carolina and northern Georgia into Alabama and Louisiana, covering most of 1775 and 1776. Part IV is "An Account of the Persons, Manners, Customs and Government of the Muscogules or Creeks, &c. Aborigines of the Continent of North America."

The first selection printed here is the first quarter of Chapter 5, Part II; it is an example both of Bartram's attitude toward nature and of his narrative skill. Its portrayal of man alone in the wilderness amid the alligators has long been classic. The second selection, from Chapter 3, Part III, illustrates eighteenth-century primitivism in its full development, as well as Bartram's acquaintance with the traditions of pastoral literature.

Being desirous of continuing my travels and observations, higher up the river, and having an invitation from a gentleman who was agent for, and resident at a large

plantation, the property of an English gentleman, about sixty miles higher up, I resolved to pursue my researches to that place, and having engaged in my service a young Indian, nephew to the White Captain, he agreed to assist me in working my vessel up as high as a certain bluff where I was, by agreement, to land him, on the West or Indian shore, whence he designed to go in quest of the camp of the White Trader, his relation

Provisions and all necessities being procured, and the morning pleasant, we went on board and stood up the river. We passed for several miles on the left, by islands of high swamp land, exceedingly fertile, their banks for a good distance from the water, much higher than the interior part, and sufficiently so to build upon, and be out of the reach of inundations. They consist of a loose black mould, with a mixture of sand, shells and dissolved vegetables. The opposite Indian coast is a perpendicular bluff, ten or twelve feet high, consisting of a black sandy earth, mixed with a large proportion of shells, chiefly various species of fresh water *Cochlea* and *Mytuli*. Near the river, on this high shore, grew *Corypha palma*, *Magnolia grandiflora*, Live Oak, *Callicarpa*, *Myrica cerifera*, *Hybiscus spinifex*, and the beautiful evergreen shrub called Wild lime or Tallow nut. This last shrub grows six or eight feet high, many erect stems rising from a root, the leaves are lancolate and intire, two or three inches in length and one in breadth, of a deep green colour, and polished, at the foot of each leaf grows a stiff, sharp thorn, the flowers are small and in clusters.

2 the river, the St. John's River in northeastern Florida • 7 the White Captain, a Seminole chief, mentioned in the preceding chapter • 20 *Cochlea* . . . Tallow nut. Here, as elsewhere, Bartram's scientific terms are a curious mixture of the technical, the popular, the obsolete, and the current. His generic names ordinarily follow the classification of Linnaeus (Carl von Linné, 1707-1778). Swedish dictator of eighteenth-century natural history • 29 lancolate, lanceolate, spearlike

of a greenish yellow colour, and sweet scented; they are succeeded by a large oval fruit, of the shape and size of an ordinary plumb, of a fine yellow colour when ripe, a soft sweet pulp covers a nut which has a thin shell, enclosing a white kernel somewhat of the consistence and taste of the sweet Almond, but more oily and very much like hard tallow, which induced my father when he first observed it, to call it the Tallow nut

At the upper end of this bluff is a fine Orange grove. 10 Here my Indian companion requested me to set him on shore, being already tired of rowing under a fervid sun, and having for some time intimated a dislike to his situation, I readily complied with his desire, knowing the impossibility of compelling an Indian against his own inclinations, or even prevailing upon him by reasonable arguments, when labour is in the question, before my vessel reached the shore, he sprang out of her and landed, when uttering a shrill and terrible whoop, he bounded off like a roebuck, and I lost sight of him I 20 at first apprehended that as he took his gun with him, he intended to hunt for some game and return to me in the evening. The day being excessively hot and sultry, I concluded to take up my quarters here until next morning.

The Indian not returning this morning, I sat sail alone. The coasts on each side had much the same appearance as already described. The Palm trees here seem to be of a different species from the Cabbage tree, their strait trunks are sixty, eighty or ninety feet high, with a beautiful taper of a bright ash colour, until within six 30 or seven feet of the top, where it is a fine green colour, crowned with an orb of rich green plumed leaves I have measured the stem of these plumes fifteen feet in length, besides the plume, which is nearly of the same length.

The little lake, which is an expansion of the river, now appeared in view, on the East side are extensive marshes, and on the other high forests and Orange groves, and then a bay, lined with vast Cypress swamps, both coasts gradually approaching each other, to the 40 opening of the river again, which is in this place about three hundred yards wide; evening now drawing on, I was anxious to reach some high bank of the river, where I intended to lodge, and agreeably to my wishes, I soon after discovered on the West shore, a little promontory, at the turning of the river, contracting it here to about one hundred and fifty yards in width This promontory

is a peninsula, containing about three acres of high ground, and is one entire Orange grove, with a few Live Oaks, Magnolias and Palms Upon doubling the point, I arrived at the landing, which is a circular harbour, at 50 the foot of the bluff, the top of which is about twelve feet high; and back of it is a large Cypress swamp, that spreads each way, the right wing forming the West coast of the little lake, and the left stretching up the river many miles, and encompassing a vast space of low grassy marshes. From this promontory, looking Eastward across the river, we behold a landscape of low country, u[n]paralleled as I think, on the left is the East coast of the little lake, which I had just passed, and from the Orange bluff at the lower end, the high forests begin, 60 and increase in breadth from the shore of the lake, making a circular sweep to the right, and contain many hundred thousand acres of meadow, and this grand sweep of high forests encircles, as I apprehend, at least twenty miles of these green fields, interspersed with hommocks or islets of evergreen trees, where the sovereign Magnolia and lordly Palm stand conspicuous The islets are high shelly knolls, on the sides of creeks or branches of the river, which wind about and drain off the super-abundant waters that cover these meadows, 70 during the winter season.

The evening was temperately cool and calm The crocodiles began to roar and appear in uncommon numbers along the shores and in the river. I fixed my camp in an open plain, near the utmost projection of the promontory, under the shelter of a large Live Oak, which stood on the highest part of the ground and but a few yards from my boat From this open, high situation, I had a free prospect of the river, which was a matter of no trivial consideration to me, having good reason to 80 dread the subtle attacks of the alligators, who were crowding about my harbour. Having collected a good quantity of wood for the purpose of keeping up a light and smoke during the night, I began to think of preparing my supper, when, upon examining my stores, I found but a scanty provision, I thereupon determined, as the most expeditious way of supplying my necessities,

7 my father Bartram was retracing a route he had followed with his father in 1765 John Bartram's journal of that expedition, which has been called 'a kind of first draft of the *Travels*,' was printed in the third edition (1769) of William Stork's *Description of East-Florida*

John Bartram's House

to take my bob and try for some trout. About one hundred yards above my harbour, began a cove or bay of the river, out of which opened a large lagoon. The mouth or entrance from the river to it was narrow, but the waters soon after spread and formed a little lake, extending into the marches, its entrance and shores within I observed to be verged with floating lawns of the Pistia and Nymphaea and other aquatic plants, these I knew were excellent haunts for trout.

10 The verges and islets of the lagoon were elegantly embellished with flowering plants and shrubs, the laughing coots with wings half spread were tripping over the little coves and hiding themselves in the tufts of grass, young broods of the painted summer teal, skimming the still surface of the waters, and following the watchful parent unconscious of danger, were frequently surprised by the voracious trout, and he in turn, as often by the subtle, greedy alligator. Behold him rushing forth from the flags and reeds. His enormous body swells. His
20 plaited tail brandished high, floats upon the lake. The waters like a cataract descend from his opening jaws. Clouds of smoke issue from his dilated nostrils. The earth trembles with his thunder. When immediately from the opposite coast of the lagoon, emerges from the deep his rival champion. They suddenly dart upon each

other. The boiling surface of the lake marks their rapid course, and a terrific conflict commences. They now sink to the bottom folded together in horrid wreaths. The water becomes thick and discoloured. Again they rise, their jaws clap together, re-echoing through the 3 deep surrounding forests. Again they sink, when the contest ends at the muddy bottom of the lake, and the vanquished makes a hazardous escape, hiding himself in the muddy turbulent waters and sedge on a distant shore. The proud victor exulting returns to the place of action. The shores and forests resound his dreadful roar, together with the triumphing shouts of the plaited tribes around, witnesses of the horrid combat.

My apprehensions were highly alarmed after being a spectator of so dreadful a battle, it was obvious that 4 every delay would but tend to encrease my dangers and difficulties, as the sun was near setting, and the alligators gathered around my harbour from all quarters, from these considerations I concluded to be expeditious in my trip to the lagoon, in order to take some fish. Not thinking it prudent to take my fusee with me, lest I might lose it overboard in case of a battle, which I had every reason to dread before my return, I therefore furnished myself with a club for my defence, went on board, and penetrating the first line of those which surrounded my 5 harbour, they gave way, but being pursued by several very large ones, I kept strictly on the watch, and paddled with all my might towards the entrance of the lagoon, hoping to be sheltered there from the multitude of my assailants, but ere I had half-way reached the place, I was attacked on all sides, several endeavouring to overset the canoe. My situation now became precarious to the last degree. two very large ones attacked me closely, at the same instant, rushing up with their heads and part of their bodies above the water, roaring terribly and 6 belching floods of water over me. They struck their jaws together so close to my ears, as almost to stun me, and I expected every moment to be dragged out of the boat and instantly devoured, but I applied my weapons so effectually about me, though at random, that I was so successful as to beat them off a little; when, finding that they designed to renew the battle, I made for the shore, as the only means left me for my preservation. for,

46 fusee, a light musket or firelock

by keeping close to it, I should have my enemies on one side of me only, whereas I was before surrounded by them, and there was a probability, if pushed to the last extremity, of saving myself, by jumping out of the canoe on shore, as it is easy to outwalk them on land, although comparatively as swift as lightning in the water. I found this last expedient alone could fully answer my expectations, for as soon as I gained the shore they drew off and kept aloof. This was a happy relief, as my confidence was, in some degree, recovered by it. On recollecting myself, I discovered that I had almost reached the entrance of the lagoon, and determined to venture in, if possible to take a few fish and then return to my harbour, while day-light continued, for I could now, with caution and resolution, make my way with safety along shore, and indeed there was no other way to regain my camp, without leaving my boat and making my retreat through the marshes and reeds, which, if I could even effect, would have been in a manner throwing myself away, for then there would have been no hopes of ever recovering my bark, and returning in safety to any settlements of men. I accordingly proceeded and made good my entrance into the lagoon, though not without opposition from the alligators, who formed a line across the entrance, but did not pursue me into it, nor was I molested by any there, though there were some very large ones in a cove at the upper end. I soon caught more trout than I had present occasion for, and the air was too hot and sultry to admit of their being kept for many hours, even though salted or barbecued. I now prepared for my return to camp, which I succeeded in with but little trouble, by keeping close to the shore, yet I was opposed upon re-entering the river out of the lagoon, and pursued near to my landing (though not closely attacked) particularly by an old daring one, about twelve feet in length, who kept close after me, and when I stepped on shore and turned about, in order to draw up my canoe, he rushed up near my feet and lay there for some time, looking me in the face. His head and shoulders out of water, I resolved he should pay for his temerity, and having a heavy load in my fusée, I ran to my camp, and returning with my piece, found him with his foot on the gunwale of the boat, in search of fish. On my coming up he withdrew sullenly and slowly into the water, but soon returned and placed

himself in his former position, looking at me and seeming neither fearful or any way disturbed. I soon dispatched him by lodging the contents of my gun in his head, and then proceeded to cleanse and prepare my fish for supper, and accordingly took them out of the boat, laid them down on the sand close to the water, and began to scale them, when, raising my head, I saw before me, through the clear water, the head and shoulders of a very large alligator, moving slowly towards me; I instantly stepped back, when, with a sweep of his tail, he brushed off several of my fish. It was certainly most providential that I looked up at that instant, as the monster would probably, in less than a minute, have seized and dragged me into the river. This incredible boldness of the animal disturbed me greatly, supposing there could now be no reasonable safety for me during the night, but by keeping continually on the watch, I therefore, as soon as I had prepared the fish, proceeded to secure myself and effects in the best manner I could. In the first place, I hauled my bark upon the shore, almost clear out of the water, to prevent their oversetting or sinking her, after this every moveable was taken out and carried to my camp, which was but a few yards off, then ranging some dry wood in such order as was the most convenient, cleared the ground round about it, that there might be no impediment in my way, in case of an attack in the night, either from the water or the land, for I discovered by this time, that this small isthmus, from its remote situation and fruitfulness, was resorted to by bears and wolves. Having prepared myself in the best manner I could, I charged my gun and proceeded to reconnoitre my camp and the adjacent grounds, when I discovered that the peninsula and grove, at the distance of about two hundred yards from my encampment, on the land side, were invested by a Cypress swamp, covered with water, which below was joined to the shore of the little lake, and above to the marshes surrounding the lagoon, so that I was confined to an islet exceedingly circumscribed, and I found there was no other retreat for me, in case of an attack, but by either ascending one of the large Oaks, or pushing off with my boat.

It was by this time dusk, and the alligators had nearly ceased their roar, when I was again alarmed by a rumorous noise that seemed to be in my harbour, and therefore engaged my immediate attention. Returning to my

camp I found it undisturbed, and then continued on to the extreme point of the promontory, where I saw a scene, new and surprising, which at first threw my senses into such a tumult, that it was some time before I could comprehend what was the matter, however. I soon accounted for the prodigious assemblage of crocodiles at this place, which exceeded every thing of the kind I had ever heard of

How shall I express myself so as to convey an adequate
10 idea of it to the reader, and at the same time avoid raising suspicions of my want of veracity. Should I say, that the river (in this place) from shore to shore, and perhaps near half a mile above and below me, appeared to be one solid bank of fish, of various kinds, pushing through this narrow pass of St. Juans into the little lake, on their return down the river, and that the alligators were in such incredible numbers, and so close together from shore to shore, that it would have been easy to have walked across on their heads, had the animals been
20 harmless. What expressions can sufficiently declare the shocking scene that for some minutes continued, whilst this mighty army of fish were forcing the pass? During this attempt, thousands. I may say hundreds of thousands of them were caught and swallowed by the devouring alligators. I have seen an alligator take up out of the water several great fish at a time, and just squeeze them betwixt his jaws, while the tails of the great trout flapped about his eyes and lips, ere he had swallowed them. The horrid noise of their closing jaws, their
30 plunging amidst the broken banks of fish, and rising with their prey some feet upright above the water, the floods of water and blood rushing out of their mouths, and the clouds of vapour issuing from their wide nostrils, were truly frightful. This scene continued at intervals during the night, as the fish came to the pass. After this sight, shocking and tremendous as it was, I found myself somewhat easier and more reconciled to my situation, being convinced that their extraordinary assemblage here, was owing to this annual feast of fish,
40 and that they were so well employed in their own element, that I had little occasion to fear their paying me a visit.

It being now almost night, I returned to my camp, where I had left my fish broiling, and my kettle of rice stewing, and having with me, oil, pepper and salt and

excellent oranges hanging in abundance over my head (a valuable substitute for vinegar) I sat down and regaled myself cheerfully, having finished my repast. I re-kindled my fire for light, and whilst I was revising the notes of my past day's journey, I was suddenly roused with a noise behind me toward the main land. I sprang up on my feet, and listening, I distinctly heard some creature wading in the water of the isthmus. I seized my gun and went cautiously from my camp, directing my steps towards the noise, when I had advanced about thirty yards, I halted behind a coppice of Orange trees, and soon perceived two very large bears, which had made their way through the water, and had landed in the grove, about one hundred yards distance from me, and were advancing towards me. I waited until they were within thirty yards of me, they there began to snuff and look towards my camp, I snapped my piece, but it flashed, on which they both turned about and galloped off, plunging through the water and swamp, never halting as I suppose, until they reached fast land, as I could hear them leaping and plunging a long time, they did not presume to return again, nor was I molested by any other creature, except being occasionally awakened by the whooping of owls, screaming of bitterns, or the wood-rats running amongst the leaves.

The wood-rat is a very curious animal, they are not half the size of the domestic rat; of a dark brown or black colour, their tail slender and shorter in proportion, and covered thinly with short hair, they are singular with respect to their ingenuity and great labour in the construction of their habitations, which are conical pyramids about three or four feet high, constructed with dry branches, which they collect with great labour and perseverance, and pile up without any apparent order, yet they are so interwoven with one another, that it would take a bear or wild-cat some time to pull one of these castles to pieces, and allow the animals sufficient time to secure a retreat with their young.

The noise of the crocodiles kept me awake the greater part of the night, but when I arose in the morning, contrary to my expectations, there was perfect peace, very few of them to be seen, and those were asleep on the shore, yet I was not able to suppress my fears and apprehensions of being attacked by them in future; and indeed yesterday's combat with them, notwithstanding

I came off in a manner victorious, or at least made a safe retreat, had left sufficient impression on my mind to damp my courage, and it seemed too much for one of my strength, being alone in a very small boat to encounter such collected danger. To pursue my voyage up the river, and be obliged every evening to pass such dangerous defiles, appeared to me as perilous as running the gauntlet betwixt two rows of Indians armed with knives and fire brands, I however resolved to continue my voyage one day longer, if I possibly could with safety, and then return down the river, should I find the like difficulties to oppose. Accordingly I got every thing on board, charged my gun, and set sail cautiously along shore, as I passed by Battle lagoon, I began to tremble and keep a good look out, when suddenly a huge alligator rushed out of the reeds, and with a tremendous roar, came up, and darted as swift as an arrow under my boat, emerging upright on my lee quarter, with open jaws, and belching water and smoke that fell upon me like rain in a hurricane, I laid soundly about his head with my club and beat him off, and after plunging and darting about my boat, he went off on a strait line through the water, seemingly with the rapidity of lightning, and entered the cape of the lagoon. I now employed my time to the very best advantage in paddling close along shore, but could not forbear looking now and then behind me, and presently perceived one of them coming up again, the water of the river hereabouts, was shoal and very clear, the monster came up with the usual roar and menaces and passed close by the side of my boat, when I could distinctly see a young brood of alligators to the number of one hundred or more, following after her in a long train, they kept close together in a column without straggling off to the one side or the other, the young appeared to be of an equal size, about fifteen inches in length, almost black, with pale yellow transverse waved clouds or blotches, much like rattle snakes in colour. I now lost sight of my enemy again.

Still keeping close along shore; on turning a point or projection of the river bank, at once I beheld a great number of hillocks or small pyramids, resembling haystacks, ranged like an encampment along the banks, they stood fifteen or twenty yards distant from the water, on a high marsh, about four feet perpendicular above the

John Bartram's Study

water. I knew them to be the nests of the crocodile, having had a description of them before, and now expected a furious and general attack, as I saw several large crocodiles swimming abreast of these buildings. These nests being so great a curiosity to me, I was determined at all events immediately to land and examine them. Accordingly I ran my bark on shore at one of their landing places which was a sort of nick or little dock from which ascended a sloping path or road up to the edge of the meadow where their nests were, most of them were deserted and the great thick whitish egg-shells lay broken and scattered upon the ground round about them.

The nests or hillocks are of the form of an obtuse cone, four feet high and four or five feet in diameter at their bases, they are constructed with mud, grass and herbage at first they lay a floor of this kind of tempered mortar upon the ground, upon which they deposit a layer of eggs, and upon this a stratum of mortar seven or eight inches in thickness, and then another layer of eggs, and in this manner one stratum upon another, nearly to the top. I believe they commonly lay from one to two hundred eggs in a nest these are hatched I suppose by the heat of the sun, and perhaps the vegetable substances mixed with the earth, being acted upon by

the sun, may cause a small degree of fermentation, and so increase the heat in those hillocks. The ground for several acres about these nests shewed evident marks of a continual resort of alligators, the grass was every where beaten down, hardly a blade or straw was left standing, whereas, all about, at a distance, it was five or six feet high, and as thick as it could grow together. The female, as I imagine, carefully watches her own nest of eggs until they are all hatched, or perhaps while she is attending her own brood, she takes under her care and protection, as many as she can get at one time, either from her own particular nest or others but certain it is, that the young are not left to shift for themselves, having had frequent opportunities of seeing the female alligator, leading about the shores her train of young ones, just like a hen does her chickens, and she is equally assiduous and courageous in defending the young, which are under their care, and providing for their subsistence, and when she is basking upon the warm banks, with her brood around her, you may hear the young ones continually whining and barking, like young puppies. I believe but few of the brood live to the years of full growth and magnitude, as the old feed on the young as long as they can make prey of them.

The alligator when full grown is a very large and terrible creature, and of prodigious strength, activity and swiftness in the water. I have seen them twenty feet in length, and some are supposed to be twenty-two or twenty-three feet, their body is as large as that of a horse, their shape exactly resembles that of a lizard, except their tail, which is flat or cuniform, being compressed on each side, and gradually diminishing from the abdomen to the extremity, which, with the whole body is covered with horny plates or squamæ, impenetrable when on the body of the live animal, even to a rifle ball, except about their head and just behind their fore-legs or arms, where it is said they are only vulnerable. The head of a full grown one is about three feet, and the mouth opens nearly the same length, the eyes are small in proportion and seem sunk deep in the head, by means of the prominence of the brows, the nostrils are large, inflated and prominent on the top, so that the head in the water, resembles, at a distance, a great chunk of wood floating about. Only the upper jaw moves, which they raise almost perpendicular, so as to form a right

angle with the lower one. In the fore part of the upper jaw, on each side, just under the nostrils, are two very large, thick, strong teeth or tusks, not very sharp, but rather the shape of a cone, these are as white as the finest polished ivory, and are not covered by any skin or lips, and always in sight, which gives the creature a frightful appearance, in the lower jaw are holes opposite to these teeth, to receive them, when they clap their jaws together it causes a surprising noise, like that which is made by forcing a heavy plank with violence upon the ground, and may be heard at a great distance.

But what is yet more surprising to a stranger, is the incredible loud and terrifying roar, which they are capable of making, especially in the spring season, their breeding time, it most resembles very heavy distant thunder, not only shaking the air and waters, but causing the earth to tremble, and when hundreds and thousands are roaring at the same time, you can scarcely be persuaded, but that the whole globe is violently and dangerously agitated.

An old champion, who is perhaps absolute sovereign of a little lake or lagoon (when fifty less than himself are obliged to content themselves with swelling and roaring in little coves round about) darts forth from the reedy coverts all at once, on the surface of the waters, in a right line, at first seemingly as swift as lightning, but gradually more slowly until he arrives at the center of the lake, when he stops, he now swells himself by drawing in wind and water through his mouth, which causes a loud sonorous rattling in the throat for near a minute but it is immediately forced out again through his mouth and nostrils, with a loud noise, brandishing his tail in the air, and the vapour ascending from his nostrils like smoke. At other times, when swollen to an extent ready to burst, his head and tail lifted up, he spins or twirls round on the surface of the water. He acts his part like an Indian chief, when rehearsing his feats of war, and then retiring, the exhibition is continued by others who dare to step forth, and strive to excel each other to gain the attention of the favorite female.

Having gratified my curiosity at this general breeding place and nursery of crocodiles, I continued my voyage up the river without being greatly disturbed by them in my way I observed islets or floating fields of the bright green *Pistia*, decorated with other amphibious

plants, as *Senecio Jacobea*, *Persicaria amphibia*, *Coreopsis bidens*, *Hydrocotile fluitans*, and many others of less note. . . .

I arrived at Cowe about noon, this settlement is esteemed the capital town; it is situated on the bases of the hills on both sides of the river, near to its bank, and here terminates the great vale of Cowe, exhibiting one of the most charming natural mountainous landscapes perhaps any where to be seen; ridges of hills rising
10 grand and sublimely one above and beyond another, some boldly and majestically advancing into the verdant plains, their feet bathed with the silver flood of the Tanase, whilst others far distant, veiled in blue mists, sublimely mount aloft, with yet greater majesty lift up their pompous crests and overlook vast regions . . .

Next day after my arrival I crossed the river in a canoe, on a visit to a trader who resided amongst the habitations on the other shore.

After dinner, on his mentioning some curious scenes
20 amongst the hills, some miles distance from the river, we agreed to spend the afternoon in observations on the mountains

After riding near two miles through Indian plantations of Corn, which was well cultivated, kept clean of weeds and was well advanced, being near eighteen inches in height, and the Beans planted at the Corn-hills were above ground, we leave the fields on our right, turning towards the mountains and ascending through a delightful green vale or lawn, which conducted us in
30 amongst the pyramidal hills and crossing a brisk flowing creek, meandering through the meads which continued near two miles, dividing and branching in amongst the hills, we then mounted their steep ascents, rising gradually by ridges or steps one above another, frequently crossing narrow, fertile dales as we ascended; the air feels cool and animating, being charged with the fragrant breath of the mountain beauties, the blooming mountain cluster Rose, blushing Rhododendron and fair Lilly of the valley: having now attained the summit of
40 this very elevated ridge, we enjoyed a fine prospect indeed, the enchanting Vale of Keowe, perhaps as celebrated for fertility, fruitfulness and beautiful prospects as the Fields of Pharsalia or the Vale of Tempe. the town, the elevated peaks of the Jore mountains, a very distant prospect of the Jore village in a beautiful lawn, lifted up

many thousand feet higher than our present situation, besides a view of many other villages and settlements on the sides of the mountains, at various distances and elevations; the silver rivulets gliding by them and snow white cataracts glimmering on the sides of the lofty
50 hills, the bold promontories of the Jore mountain stepping into the Tanase river, whilst his foaming waters rushed between them

After viewing this very entertaining scene we began to descend the mountain on the other side, which exhibited the same order of gradations of ridges and vales as on our ascent, and at length rested on a very expansive, fertile plain, amidst the towering hills, over which we rode a long time, through magnificent high forests, extensive green fields, meadows and lawns. Here
60 had formerly been a very flourishing settlement, but the Indians deserted it in search of fresh planting land, which they soon found in a rich vale but a few miles distance over a ridge of hills. Soon after entering on these charming, sequestered, prolific fields, we came to a fine little river, which crossing, and riding over fruitful strawberry beds and green lawns, on the sides of a circular ridge of hills in front of us, and going around the bases of this promontory, came to a fine meadow on an arm of the vale, through which meandered a brook,
70 its humid vapours bedewing the fragrant strawberries which hung in heavy red clusters over the grassy verge, we crossed the rivulet, then rising a sloping, green, turfy ascent, alighted on the borders of a grand forest of stately trees, which we penetrated on foot a little distance to a horse-stamp, where was a large squadron of those useful creatures, belonging to my friend and companion, the trader, on the sight of whom they assembled together from all quarters; some at a distance saluted him with shrill neighings of gratitude, or came prancing up to
80 lick the salt out of his hand, whilst the younger and

4 Cowe, a Cherokee town, in what is now Oconee County, South Carolina, bordering northern Georgia • 13 Tanase, Tennessee • 41 Vale of Keowe. The Keowee River forms the present boundary between Oconee and Pickens Counties • 43 Pharsalia, the central plain of Thessaly, renowned for Pompey's defeat there by Caesar (48 B.C.) • 43 Tempe, a valley in the north of Thessaly, between Mounts Olympus and Ossa, renowned for its beauty • 44 Jore mountains, apparently the southern extremity of the Blue Ridge • 76 horse-stamp, an enclosure or habitual standing-place for horses

more timorous came galloping onward, but coyly wheeled off, and fetching a circuit stood aloof, but as soon as their lord and master strewed the chrystaline salty bait on the hard beaten ground, they all, old and young, docile and timorous, soon formed themselves in ranks and fell to licking up the delicious morsel.

It was a fine sight more beautiful creatures I never saw, there were of them of all colours, sizes and dispositions. Every year as they become of age he sends off
10 a troop of them down to Charleston, where they are sold to the highest bidder.

Having paid our attention to this usefull part of the creation, who, if they are under our dominion, have consequently a right to our protection and favour. We returned to our trusty servants that were regaling themselves in the exuberant sweet pastures and strawberry fields in sight, and mounted again; proceeding on our return to town, continued through part of this high forest skirting on the meadows, began to ascend the
20 hills of a ridge which we were under the necessity of crossing, and having gained its summit, enjoyed a most enchanting view, a vast expanse of green meadows and strawberry fields, a meandering river gliding through, saluting in its various turnings the swelling, green, turfy knolls, embellished with parterres of flowers and fruitful strawberry beds, flocks of turkies strolling about them; herds of deer prancing in the meads or bounding over the hills, companies of young, innocent Cherokee virgins, some busily gathering the rich fragrant fruit,
30 others having already filled their baskets, lay reclined under the shade of floriferous and fragrant native bowers of Magnolia, Azalea, Philadelphus, perfumed Calycanthus, sweet Yellow Jessamine and cerulian Glycine frutescens, disclosing their beauties to the fluttering breeze, and bathing their limbs in the cool fleeting streams; whilst other parties, more gay and libertine, were yet collecting strawberries or wantonly chasing their companions, tantalizing them, staining their lips and cheeks with the rich fruit

40 This sylvan scene of primitive innocence was enchanting, and perhaps too enticing for hearty young men long to continue as idle spectators

In fine, nature prevailing over reason, we wished at least to have a more active part in their delicious sports. Thus precipitately resolving, we cautiously made our approaches, yet undiscovered, almost to the joyous scene

of action. Now, although we meant no other than an innocent frolic with this gay assembly of hamadryades, we shall leave it to the person of feeling and sensibility to form an idea to what lengths our passions might have hurried us, thus warmed and excited, had it not been for the vigilance and care of some envious matrons who lay in ambush, and espying us gave the alarm, time enough for the nymphs to rally and assemble together, we however pursued and gained ground on a group of them, who had incautiously strolled to a greater distance from their guardians, and finding their retreat now like to be cut off, took shelter under cover of a little grove, but on perceiving themselves to be discovered by us kept their station, peeping through the bushes, when observing our approaches, they confidently discovered themselves and decently advanced to meet us, half unveiling their blooming faces, incarnated with the modest maiden blush, and with native innocence and cheerfulness, presented their little baskets, merrily telling us their fruit was ripe and sound

We accepted a basket, sat down and regaled ourselves on the delicious fruit, encircled by the whole assembly of the innocently jocose sylvan nymphs. By this time the several parties under the conduct of the elder matrons, had disposed themselves in companies on the green, turfy banks.

My young companion, the trader, by concessions and suitable apologies for the bold intrusion, having compromised the matter with them, engaged them to bring their collections to his house at a stipulated price, we parted friendly.

And now taking leave of these Elysian fields, we again mounted the hills, which we crossed, and traversing obliquely their flowery beds, arrived in town in the cool of the evening

1774²-1776²-1791

28 companies . . . virgins. One stanza from Wordsworth's *Ruth*, composed in 1799, will illustrate the use which the English romantics made of Bartram's book. The Youth who broke Ruth's heart was from Georgia, and

He told of girls—a happy rout!
Who quit their folds with dance and shout,
Their pleasant Indian towns,
To gather strawberries all day long,
Returning with a choral song
When daylight is gone down.

Thomas Shepard

1604 • 1649

Among the leaders of the New England colonies were many forceful clergymen, notably John Cotton of Boston, Richard Mather of Dorchester, Thomas Hooker of Hartford, John Davenport of New Haven, and Roger Williams of Providence. In piety, however, and in subsequent influence, few exceeded that "gracious, sweet, heavenly minded and soul ravishing minister," Thomas Shepard of Cambridge. A "poore, weake, pale-complectioned man," he typified in many ways the religious life of his generation, the first in New England

Shepard's career followed a familiar pattern. At twenty-three he left Emmanuel College, Cambridge, sometimes called the cradle of the Puritan party, with both his B.A. and his M.A. degrees. Because, like other Puritans, he disregarded prescribed ritual in favor of

evangelical sermonizing, Shepard was three years later brought before William Laud, then Bishop of London, and forbidden to "preach, read, marry, bury, or exercise any ministerial function" in that diocese. In 1635, after narrow escapes from Laud's agents and from storms at sea, he landed in Massachusetts, with enough of a personal following to occupy Newton, or Cambridge, where he remained for the rest of his life, preaching, writing, and overseeing the infant college named after another Emmanuel alumnus, John Harvard.

The core of Shepard's faith, and the great strength of Puritanism, was a spirituality which permeated every phase of living, a burning pietism which made the things of this world insignificant when compared with the exhilarating problem of the individual's relation to his God. "How many be there," Shepard asked in *The Sound Believer* (London, 1645), "that believe in Christ that they may live as they list? If to drink, and whore, and scoff, and blaspheme, if to shake a lock, and follow every fond fashion, if to cross and cringe before a piece of wood, . . . if to set our hearts upon farms and merchandise, and so to be covetous, . . . if to have a name to live, and yet be dead at the heart,—if this be to live

the life of Love, we have many that live this life; the Lord Jesus wants no love if this be to love. But O, woe unto you, if you thus requite the Lord, foolish people and unwise"

Like his colleagues, Shepard was primarily interested in conversion, and at times played upon the emotions of his congregation with descriptions of the perils of the damned. His reputation rested, however, upon systematic accounts of Calvinistic doctrine, which were exceedingly popular in both England and America.

The Works of Thomas Shepard, 3 vols., Boston, 1853 • S. E. Morison, *Builders of the Bay Colony*, Boston, 1930

From

The Sincere Convert

The following complete sermon forms the fifth chapter of Shepard's first book, of which the full title is an excellent brief statement of the characteristic tenets of Calvinism, only that of foreordination being without explicit mention. *The Sincere Convert: Discovering the Small Number of True Believers, and the Great Difficulty of Saving Conversion; Wherein Is Excellently and Plainly Opened These Choice and Divine Principles: 1. That There Is a God, and This God Is Most Glorious. 2. That God Made Man in a Blessed State. 3. Man's Misery by His Fall. 4. Christ the Only Redeemer by Price. 5. That Few Are Saved, and That with Difficulty.*

The primacy of God, the depravity of man through Adam's sin, the mediation of Christ, the election of the few, and the just reprobation of the many—this was the theology which dominated the seventeenth and a large part of the eighteenth century. Thomas Shepard displays it in perhaps its most attractive form, wherein the rigors of the doctrine are softened by the spiritual security which he quite evidently found

The systematic method of the following sermon is typical not only of Shepard but also of a fair majority of Puritan preachers. Note that he (1) takes a text from the Bible, (2) draws from it appropriate doctrines, (3) supports his doctrines by reasons and extensive Scriptural authority, and (4) concludes with an exhortation on the uses or practical application of the doctrine.

That those that are saved are very few; and that those that are saved, are saved with very much difficulty. Strait is the gate, and narrow is the way that leadeth unto life, and few there be that finde The fifth Principle

17, Mat. 7. 14.

Here are two parts

1 The paucity of them that shall be saved: *few finde the way thither.*

2 The difficulty of being saved: *Strait and narrow is the way and gate unto life.* 10

Hence arise two Doctrines.

1 That the number of them that Doct. 1 shall be saved is very small. *Luke 13. 24.* the Devill hath his drove and swarmes to goe to hell, as fast as Bees to their Hive, Christ hath his *Flock*, and that is but a *little stock*: hence Gods children are called Luk. 12. 32 *Jewels*, *Mal. 3. 17.* which commonly are kept secret, in respect of the other lumber in the house; hence they are called *Strangers* and *Pilgrims*, which are very few in respect of the inhabitants of the countrey through

which they passe hence they are called *sonnes of God*,
John 3. 2. Of the blond Royall, which are few in
 respect of common subjects.

But see the truth of this point in these two things.

First, look to all ages and times of the world. Secondly, to all places and persons in the world, and we shall see few men were saved.

Few saved
 in all ages
 1.

1 Look to all ages, and we shall find but a handfull saved. As soon as ever the Lord began to keep house, and there were but two families in it, there was a bloudy *Cain* living, and a good *Abel* slain. And as the world increased in number, so in wickednesse. *Gen. 6. 12* it is said, *All flesh had corrupted their wayes*, and amongst so many thousand men, not one righteous but *Noah*, and his family, and yet in the Ark there crept in a cursed *Cham*.

As the world
 increased in
 number, so in
 wickednesse.

Afterwards as *Abrahams* posterity increased, so we see their sin abounded. When his posterity was in *Egypt*, where one would think, if ever men were good, now it would appear, being so heavily afflicted by *Pharaoh*, being so many miracles miraculously delivered by the hand of *Moses* yet most of these *God was wroth with*, *Heb. 3. 12* and onely two of them, *Caleb* and *Joshua* went into *Canaan*, a type of heaven. Look into *Solomons* time, what glorious times! what great profession was there then! Yet after his death, *ten Tribes* fell to the odious sin of Idolatry, following the command of *Jeroboam* their King. Look further into *Isaiah's* time, where there were multitudes of Sacrifices and prayers, *Isa. 1. 11* yet then there was but a remnant, nay a very little remnant that should be saved. And look to the time of Christs coming in the flesh, (for I pick out the best time of all) when one would think by such Sermons he preached, such miracles he wrought, such a life as he led, all the *Jewes* would have entertained him, yet it is said, *He came unto his own, and they received him not*. So few, that Christ himself admires at one good *Nathaniel* behold an *Israelite in whom there is no guile*. In the Apostles time, many indeed were converted, but few comparatively, and amongst the best Churches many bad as that at *Philippi*, *Phil. 3. 18* Many had a name to live, but were dead, and few only kept their garments unspotted. And presently after the Apostles

time, many grievous wolves came and devoured the sheep; and so in succeeding ages, *Acts 20. 28, 29, 30.*
Rev. 12. 9. All the earth wondrous at the whore in skarlet.

50

And in *Luthers* time, when the light began to arise again, he saw so many carnal Gospellers, that he breaks out in one Sermon, into these speeches, *God grant I may never live to see those bloudy dayes that are coming upon an ungodly world*. *Latimer* heard so much prophanesne in his time, that he thought verily dooms dayes was just at hand. And have not our ears heard censuring those in the *Palatinate*, where (as 'tis reported) many have fallen from the glorious Gospell to Popery, as fast as leaves fall in *Autumn*? Who would have thought there had lurked such hearts under such a shew of detesting Popery, as was among them before? And at Christs comming, shall he find faith on the earth?

2 Let us look into all places and persons, and see how few shall be saved. The world is now split into four parts, *Europe, Asia, Africa, and America*; and the three biggest parts are drowned in a deluge of prophanesne and superstition, they doe not so much as professe Christ, you may see the sentence of death written on these mens foreheads. *Jer. 10 ult* But let us look upon the best part of the world, and that is *Europe*, how few shall be saved there? First, the *Grecian* Church, howsoever now in these daies, their good patriarch of *Constantinople* is about a general Reformation among them, and hath done much good, yet are they for the present, and have been for the most

II Few shall
 be saved in
 all places

Jer 10 25.
 Powre ou thy
 fury upon the
 heathen that
 know thee not,
 and upon the
 families that call
 not upon thy
 name, &c

80

Text the London edition of 1655, 'Corre'ie' and much amended by the Author. • 51 *Luthers* time. The Pope excommunicated Martin Luther (1483-1546) in 1520, largely as the result of his vehement protests against abuses in the church. • 55 *Latimer*, Hugh Latimer (1480?-1535), English religious reformer. • 58 *Palatinate*, a district in southwestern Germany where the struggle between Catholics and Protestants prolonged the Thirty Years' War (1618-1648). • 77 *patriarch of Constantinople*, Cyril Lucar (1572-1638), holder of this office in the Greek Orthodox Church, 1620-1638. As a result of his friendship with a Swiss Calvinist, he published a strongly Protestant confession of faith in 1631, and in 1638 assisted in translating the Bible into modern Greek. Repeatedly banished and reinstated, he was finally strangled by order of the sultan.

part of them, without the saving means of knowledge. They content themselves with their old superstitions, having little or no preaching at all. And for the other parts, as *Italy, Spain, France, Germany*, for the most part they are Popish, and see the end of these men, 2 *Thes* 2:9, 10, 11, 12. And now amongst them that carry the badge of honesty, I will not speak what mine ears have heard, and my heart beleeves concerning other Churches. I will come into our own Church of *England*, which is
 10 the most flourishing Church in the world, never had Church such Preachers, such means,
 yet have we not some Chappels and Churches stand as darke lanterns
 without light, where people are led with blind, or idle, or licentious Ministers, and so both fall into the ditch.

Nay, even amongst them that have the means of grace, but few shall be saved. It may be sometimes amongst ninety nine in a parish, Christ sends a minister to call some one lost sheep among them, *Mat.* 13. Three
 20 grounds were bad where the feed was sown, and only one ground good. It's a strange speech of *Chrysostom* in his fourth Sermon to the people of *Antioch* where he was much beloved and did much good. *How many do you think*
(saith he) shall be saved in this city? It will be an hard speech to you, but I will
speak it; though here be so many thou-
sands of you, yet there cannot be found an hundred that
shall be saved, and I doubt of them too, for what villan-
 30 *ies there among youth? what doth in old men?* and so he goes on. So say I, never tell me we are baptized, and are Christians, and trust to Christ, let us but separate the Goats from the sheep, and exclude none but such as the Scripture doth, and sets a crosse upon their doors, with, *Lord have mercy upon them*, and we shall see only
 few in the City shall be saved.

1. Cast out all the *profane people* among us, as drunkards, swearers, whores, liars, which
 40 the Scripture brands for black sheep, and condemns them in an hundred places.

2. Set by all *Civill men*, that are but Wolves chained up, tame Devils, swine in a fair meadow, that pay all they owe, and do no body any harm, yet do none any great good, that plead for themselves and say, Who can say black is mine eye? These are righteous men, whom Christ never came to call, *For*

he came not to call the righteous, but sinners to repentance.

3. Cast by all *Hypocrites*, that like 3. The hypocrites stage-players, in the sight of others, act the parts of Kings, and honest men, when look upon them in their tyring hous, they are but base varlets.

4. *Formall Professors* and *Carnall Gospellers* that have a thing like *faith* and like *sorrow*. 4. The formall and like *true repentance*, and like *good professors* *deceives*, but yet they be but pictures, they deceave others and themselves too, 2 *Tim* 3:5.

Set by these four sorts, how few then are to be saved even among them that are hatcht in the bosome of the Church?

First, here then is an Use of *encouragement*. Be not discouraged by the name of singularity. What? do you think your self wiser than others? and shall none be saved but such as are so precise as Ministers prate? Are you wiser than others that you think none shall go to heaven but your self? I tell you if you would be saved, you must be singular men, not out of *faction*, but out of *conscience*. *Acts* 24:16.

Secondly, here is matter of *terror* to all those that be of opinion, that few shall be saved, and therefore when they are convinced of the danger of sin by the Word, they flie to this shelter, If I be damned, it will be woe to many more beside me then, as though most should not be damned. Oh yes, the most of them that live in the Church shall perish and this made an *Hermit* which *Theodoret* mentions, to live 15 years in a cell in a desolate wilderness, with nothing but bread and water, and yet doubted after all his sorrow, whether he should be saved or no. Oh! Gods wrath is heavy, which thou shalt one day bear.

Thirdly, this ministreth *exhortation* to all *confident people*, that think they beleeve and say, they doubt not but to be saved, and hence doe not much feare death. Oh! learn hence to suspect and fear your estates,

22 Chrysostom (345?-407), a famous preacher of Antioch in Asia Minor, 386-398, and patriarch of Constantinople, 398-404 • 32 separate . . . sheep A remarkably similar account of those men who will not be saved may be seen in Michael Wigglesworth's *Day of Doom* (1662) stanza 38 ff • 78 Theodoret (393-457?), bishop of Cyrrhus, near Antioch, 423-449

and fear it so much, that thou canst not be quiet untill thou hast got some assurance thou shalt be saved. When Christ told his Disciples that one of them should betray him, they all said, *Master, Is it I?* but if he had said, eleven of them should betray him, all except one, would they not all conclude, *Surely it is I?* If the Lord had said, only *Few* shall be damned, every man might fear, It may be it is I, but now he saies *most* shall, every man may cry out and say, Surely it is I. No humble heart, but is driven to and fro with many stinging fears this way; yet there is a generation of presumptuous, brazen-faced, bold people, that confidently think of themselves, as the *Jewes* of the *Pharisees* (being so holy and strict) that if God save but two in the world, they shall make one

Presumptuous
men think of
themselves as
the Jews did of
the Pharisees.

The childe of God indeed *is bold as a Lion* but he hath Gods Spirit and promise, assuring him of his eternall welfare. But I speak of divers that have no sound ground to prove this point (which they pertinaciously defend) that they shall be saved. This confident humour rageth most of all in our old professors at large, who think, that's a jest indeed, that having been of a good belief so long, that they now should be so fare behind-hand, as to begin the work, and lay the foundation anew. And not only among these, but amongst divers sorts of people whom the Devill never troubles, because he is sure of them already, and therefore cries peace in their ears, whose *consciencs* never trouble them, because *that* hath shut its eyes, and hence they sleep, and sleeping dreame, that God is mercifull unto them, and will be so, yet never see they are deceived, untill they awake with the flames of hell about their ears, and the *world* troubles them not, they have their hearts desire here, because they are friends to it, and so enemies to God. And *Ministers* never trouble them, for they have none such as are fit for that work neer them, or if they have, they can sit and sleep in the Church, and chuse whether they will beleieve him. And their friends never trouble them, because they are afraid to displease them. And God himself never troubles them, because that time is to come hereafter. This one truth well pondered and thought on, may damp thine heart and make thy conscience flie in thy face, and say, *Thou*

Confidence
rages most
in professors
at large.

The devil never
troubles some
men, because
he is sure of
them already

Friends never
reprove some
men, because of
displeasing them.

art the man: it may be there are better in hell than thy self that art so confident, and therefore tell me what hast thou to say for thy self, that thou shalt be saved? In what thing hast thou gone beyond them that *think they are rich and want nothing, who yet are poor, blinde, miserable, and raskall?*

Thou wilt say happily, first, I have left my sinners I once lived in, and am now no drunkard, no swearter, no lier, &c

I answer, thou mayest be washt from thy mire (the pollution of the world) and yet be a swine in Gods account, 2 *Pet.* 2. 20 thou mayest live a blamelesse, innocent, honest, smooth life, and yet be a miserable creature still, *Phil.* 3. 6.

But I pray, and that often

This thou mayest doe, and yet never be saved, *Isa.* 1. 11. *To what purpose is your multitude of sacrifices?* Nay, thou mayest pray with much affection, with a good heart, as thou thinkest, yet a thousand miles off from being saved, *Prov.* 1. 28

But I fast sometimes, as well as pray.

So did the Scribes and Pharisees, even twice a week, which could not be publick, but private fasts. And yet this righteousness could never save them

But I hear the word of God, and like the best Preachers.

This thou mayst doe too, and yet never be saved. Nay, thou mayst so hear, as to receive much joy and comfort in hearing, nay, to beleieve and catch hold on Christ, and so say and think *he is thine*, and yet not be saved as the stony ground did, *Matth.* 13. who heard the word with joy, and for a season beleieved.

I read the Scriptures often.

This you may doe too, and yet never be saved, as the Pharisees, who were so perfect in reading the Bible, that Christ needed but only say, *It hath been said of old time*, for they knew the text and place well enough without intimation.

But I am grieved and am sorrowfull, and repent for my sins past.

Judas did thus, *Mat.* 27. 3. he repents himself with a legall repentance for fear of hell, and with a naturall sorrow for dealing so unkindly with Christ, in betraying not only blood, but innocent blood. True humiliation is ever accompanied with hearty reformation.

Oh! but I love good men, and their company. Obj 7

So did the *five foolish Virgins* love the company, and (at the time of *extremity*) the very *oyle* and grace of the *wise*, yet they were locked out of the gates of mercy.

But God hath given me more *knowledge* than others, or than I my self had once Obj 8

This thou mayst have, and be able to teach others, and think so of thy self too. Answ Rom. 2 18
and yet never be saved

But I keep the Lords day strictly Obj 9

So did the Jewes, whom yet Christ condemned, and were never saved Answ

I have very many *good desires* and *endeavours* to get heaven Obj 10

These thou and thousands may have, and yet misse of heaven Answ Luke 13 24

Many still seek to enter in at that narrow gate, and not be able 20

True, thou wilt say, many men doe many duties, but without any *life* or *zeal*: I am zealous Obj 11

So thou mayest be, and yet never be saved, as *Jehu*, *Paul* was zealous when he was a Pharisee, and if he was so for a false Religion, and a bad cause, why much more mayest thou be for a good cause, so zealous as not only to cry out against profanenesse in the wicked, but civill honesty of others, and hypocrisie of others, yea, even of the coldnesse of the best of Gods people thou mayst be the fore-horse in the Team, and the Ring-leader of good exercises amongst the best men, (as *Joash* a wicked King was the first that complained of the negligence of his best Officers in not repairing the Temple) and so stirre them up unto it, nay, thou mayest be so forward, as to be persecuted, and not yeeld an inch, nor shrink in the wetting, but mayest manfully and courageously stand it out in time of persecution, as the *thorny ground* did so zealous thou mayest be, as to like best of, and to flock most unto the most zealous preachers, that search mens consciences best, as the whole countrey of *Judea* came flocking to *John*s Ministry, and delighted to hear him for a season; nay, thou mayest be zealous as to take sweet delight in doing of all these things, *Isa.* 58 2, 3 *They delight in approaching near unto God*, yet come short of heaven. 40

But thou wilt say, True many a man rides post, that breaks his neck at last many a man is zealous, but his fire is soon quench'd, and his zeal is soon spent, they hold not out, whereas I am constant, and persevere in godly courses Obj 12

So did that young man yet he was a gracelesse man, *Mat.* 19. 20 *All these things have I done from my youth*: what lack I yet? Answ

It is true, hypocrites may persevere, but they know themselves to be *naught* all the while, and so deceive others. but I am perswaded that I am in Gods favour, and in a safe and happy estate, since I do all with a good heart for God Obj 13

This thou mayest verily think of thy self, and yet be deceived, and damned, and goe to the Devill at last. *There is a way* (saith *Solomon*) *that seemeth right to a man, but the end thereof is the way of death.* For he is an hypocrite not only that makes a seeming outward shew of what he hath not, but also that hath a true shew of what indeed there is not The first sort of hypocrites deceive others onely, the later having some inward, yet common work, deceive themselves too, *Jam.* 1 26 *If any man seem to be religious* (so many are, and so deceive the world,) but it is added, *deceiving his own soule.* Nay, thou mayst go so fairly, and live so honestly, that all the best Christians about thee may think well of thee, and never suspect thee and so mayst passe through the world, and die with a deluded comfort, that thou shalt goe to heaven, and be canonized for a Saint in thy Funerall Sermon, and never know thou art counterfeit, till the Lord brings thee to thy strict and last examination, and so thou receivest that dreadfull sentence, *Go ye cursed* So it was with the *five foolish Virgins* that were never discovered by the *unc.* nor by themselves, untill the gate of grace was shut upon them If thou hast therefore no better evidences to shew for thy selfe, that thine estate is good, than these, Ile not give a pins point for all thy flattering false hopes of being saved but it may be thou hast never yet come so farre as to this pitch, and if not, Lord, what will become of thee? Suspect thy self much, and when in this shipwrack of souls thou seest so many thousands sink, cry out, and conclude, It's a wonder of wonders, and a thousand and a thousand to one, if ever thou comest safe to shore. Some hypocrites deceive themselves, some deceive others Mar 25 The five foolish virgins

Oh! strive then to be one of them that shall be saved, though it cost thee thy blood, and the losse of all that thou hast, labour to goe beyond all those that go so far, and yet perish at the last Do not say, that seeing so few shall be saved, therefore this discourageth me from seeking, because all my labour may be in vain Consider that Christ here makes another and a better use of it, *Luk. 3. 24. Seeing that many shall seek and not enter, therefore* (saith he) *strive to enter in at the strait gate; venture at least, and try what the Lord will doe for thee*

Use 4.
Strive to be saved.

Wherein doth the child of God. (and so how may I) go beyond these hypocrites that go so far?

Quest

In three things principally

Answ

First, no unregenerate man, though he go never so farre, let him do never so much, but he lives in some one sinne or other, secret or open, little or great *Judas* went farre, but he was covetous *Herod* went farre, but he loved his *Herodias* Every dog hath his kennel, every swine hath his swill, and every wicked man his lust, for no unregenerate man hath fruition of God to content him, and there is no mans heart but it must have some good to content it, which good is to be found only in the fountain of all good, and that is God, or in the cistern, and that is in the creatures hence a man having lost full content in God, he seeks for, and feeds upon contentment in the creature which he makes a God to him, and here lies his lust or sinne, which he must needs live in Hence, aske those men that goe very far, and take their penny for good silver, and commend themselves for their good desires I say, ask them, if they have no sin; Yes, say they, who can live without sinne? and so they give way to sin, and therefore live in sin, Nay, commonly, all the duties, prayers, care, and zeal of the best hypocrites are to hide a lust; as the whore in the *Proverbs*, that wipes her mouth, and goes to the Temple, and paises her vowes, or to feed a lust, as *Jehu* his zeal against *Baal*, was to get a Kingdome. There remains a root of bitterness in the best hypocrites, which hosoever it be lopt off sometimes by sicknesse or horror of conscience, and a man hath purposes never to commit again, yet there it secretly lurks, and though it seemeth to be bound and conquered [sic] by the *Word*, or by *Prayer*, or by outward *Crosses*,

Wherein a childe of God goeth beyond an hypocrite
1. No unregenerate man but lives in some known sin.

Hypocrites like the whore in the *Proverbs*, or like *Jehu*, zealous against *Baal*, but for their own ends.

or while the hand of God is upon a man, yet the inward strength and power of it remains still; and therefore when temptations, like strong *Philistines*, are upon this man again, he breaks all vowes, promises, bonds of God, and will save the life of his sin.

Secondly, no unregenerate man or woman ever came to be poor in spirit, and so to be carried out of all duties unto Christ if it were possible for them to forsake and break loose for ever from all sinne, yet here they stick as the Scribes and Pharisees, and so like zealous *Paul* before his conversion, they fasted and prayed, and kept the Sabbath, but they rested in their legall righteousness, and in the performance of these and the like duties. Take the best Hypocrite that hath the most strong persuasions of Gods love to him, and ask him, why he hopes to be saved. He will answer, *I pray, read, hear, love good men*, cry out of the sinnes of the time. And tell him again, that an Hypocrite may climb these stairs and goe as farre, He will reply, true indeed, but they do not what they do with a sound heart, but to be seen of men. Mark now, how these men feel a good heart in themselves, and in all things they doe, and therefore feel not a want of all good, which is poverty of spirit, and therefore here they fall short *Isai. 66. 2.* there were divers Hypocrites forward for the worship of God in the Temple, but God loathes these, because not poor in spirit, to them only it is said the Lord will look I have seen many professors very forward for all good duties, but as ignorant of Christ when they are sifted, as blocks. And if a man (as few doe) know not Christ, he must rest in his duties, because he knowes not Christ, to whom he must goe and be carried if ever he be saved. I have heard of a man that being condemned to die, thought to escape the gallows, and to save himselfe from hanging by a certain gift he said he had of whistling; so men seek to save themselves by their gifts of *knowledge*, gifts of *memory*, gifts of *prayer*, and when they see they must die for their sinnes, this is the ruine of many a soule, that though he forsake Egypt and his sins, and flesh-pots there, and will never be so as he hath been, yet he never cometh into *Canaan*, but loseth himself and his soul in a wilderness of many duties, and there perisheth.

2. Unregenerate men are not poor in spirit.

God looks on the poor in spirit.

19 *Herod*, Herod Antipas, who beheaded John the Baptist, hated by Herodias Herod's wife (Mark 6 14-29)

Thirdly, if any unregenerate man come unto *Christ*, he never gets into *Christ*, that is, never takes his *eternall rest* and *lodging* in *Jesus Christ* only,

3. Unregenerate men never take their rest in Christ onely.

Heb. 4 4 *Judas* followed *Christ* for the *Bagge*, he would have the *Bag* and *Christ* too. The young man came unto *Christ* to be his *Disciple*, but he would have *Christ* and the *world* too, they will not content themselves with *Christ* alone. nor with the *world* alone, but make their
10 markets out of both, like whorish wives, that wil please their hu[s]bands and others too. Men is distresse of conscience, if they have comfort from *Christ*, they are contented, if they have salvation from hell by *Christ*, they are contented. but *Christ* himself contents them not. Thus far an hypocrite goes not. So much for the first Doctrine observed out of the Text. I come now to the second.

Doct 2 *That those that are saved, are saved with much difficulty: or it is a wonderfull hard thing to be saved.* Doct 2 Salvation difficult

The gate is strait, and therefore a man must sweat and strive to enter; both the entrance is difficult, and the progresse of salvation too. *Jesus Christ* is not got with a wet finger. It is not wishing and desiring to be saved, will bring men to heaven, hells mouth is full of *good wishes*. It is not shedding a tear at a Sermon, or blubbering now and then in a corner, and saying over thy prayers, and crying God mercy for thy sins, will save thee. It is not *Lord have mercy upon us*, will doe thee
30 good. It is not coming constantly to Church, these are easie matters. But it is a tough work, a wonderfull hard matter to be saved, 1 *Pet.* 4. 18. Hence the way to heaven is compared to a *Race*, where a man must put forth all his strength, and stretch every limb, and all to get forward. Hence a Christians life is compared to *wrestling*, *Eph.* 6. 12. All the policy and power of hell buckle together against a Christian, therefore he must look to himself, or else he falls. Hence it is compared to *fighting*, 2 *Tim.* 4. 7. a man must fight
40 against the *Devill*, the *World*, *Himself*; who shoot poysoned bullets in the soul, where a man must kill or be killed. God hath not lined the way to *Christ* with velvet, nor strewed it with rushes. He will never feed a slothfull humour in man, who will be saved in *Christ* and Heaven would drop into their mouthes, and if any would bear their charges thither:

If *Christ* might be bought for a few cold wishes, and lazie desires, he would be of small reckoning amongst men, who would say, *lightly come lightly goe*. Indeed *Christs yoke is easie* in it self, and when a man is got into *Christ*, nothing is so sweet, but for a carnall dull heart, it is hard to draw in it; for,

There are 4 strait gates w^{ch} every one must pass through before he can enter into heavē.

Four strait gates to be past through before we can enter into heaven
1. The strait gate of humiliation

1. There is the strait gate of *Humiliation*: God saveth none, but first he humbleth them, now it is hard to pass through the gates and flames of hell, for a heart as stiffe as a stake, to bow, as hard as a stone, to bleed for the least prick, not to mourne for one sin, but all sins; and not for a fit, but all a mans life time. Oh it is hard for a man to suffer himself to be loaden with sinne, and prest to death for sin, so as never to love sinne more, but to spit in the face of that which he once loved as dearly as his life. It is easie to drop a tear or two, and be Sermon-sick, but to have a heart rent for sinne, and from sinne, this is true humiliation, and this is hard.

2 The strait gate of *Faith*, *Eph.* 1 2. Of the strait gate of faith
19 It's an easie matter to presume, but hard to beleeeve in *Christ*. It is easie for a man that was never humbled, to beleeeve and say, 'Tis but *beleev- ing*: but it is an hard matter for a man humbled, when he sees all his sins in order before him, the *Devill* and *Conscience* roaring upon him, and crying out against him, and God frowning upon him, now to call God *Father*, is an hard work. *Judas* had rather be hang'd than beleeeve. It is hard to see a *Christ* as a rock to stand upon, when we are overwhelmed with sorrow of heart for sinne. It is hard to prize *Christ* above ten thousand words of pearl. 'tis hard to desire *Christ*, and nothing but *Christ*, hard to follow *Christ* all the day long, and never to be quiet till he is got in thine armes, and then with *Simeon* to say, *Lord now lettest thou thy servant depart in peace*.

3. The strait gate of *Repentance*. It is an easie matter for a man to confesse himselfe to be a sinner, and to cry God
3. Of the strait gate of repentance

23 got . . . finger. The sense is that salvation is not obtained by seeing which way the wind is blowing and accommodating oneself accordingly. The expression typifies Shepard's enlivening of his sermon, by homely illustration

torgivenesse untill next time but to have a bitter sorrow and to turn from all sin, and to return to God, and all the waies of God, which is true repentance indeed, this is hard

4 The strait gate of *opposition of Devils*. 4. Strait the *World*. and a mans own *Self*, who knock opposition a man down when he begins to look towards Christ and heaven.

Hence learn. that every easie way to heaven is a false way, although ministers Use 5. Of instruction. should preach it out of their Pulpits, and Angels should publish it out of heaven.

Now there are nine easie wayes to heaven, (as men think) all which lead to hell.

1 The common broad way, wherein a whole parish may all goe a breadth in it, tell these people they shal be damned, their answer is, then woe to many more besides me. Nine false waies to salvation discovered. 1 The broad way.

2 The way of *Civill education*, whereby many wilde natures are by little and little tamed, and like wolves are chained up easily when they are young. 2. The way of civill education.

3 *Balam's* way of *good wishes*, whereby many people will confesse their ignorance, forgetfulnesse, and that they cannot make such shewes as others doe, but they thank God their hearts are as good, and God for his part accepts (say they) the will for the deed And, *My son give me thine heart*: the heart is all in all, and so long they hope to doe well enough Poor deluded creatures thus think to break through armies of *sinnes*, *Devils*, *temptations*. and to break open the very gates of Heaven with a few good wishes, they think to come to their journeys end without legs, because their hearts are good to God. 3. The way of good wishes.

4. The way of *Formality*, whereby men rest in the *performance* of most or of all externall duties without inward life. Mark. 1 14. Every man must have some *Religion*, some fig-leaves to hide their nakednesse. Now this Religion must be either true Religion, or the false one, if the true, he must either take up the power of it, but that he will not, because it is burdensome; or the *forme* of it, and this being easie men embrace it as their God, and will rather lose their lives than their Religion thus taken up This form of Religion is the easiest Religion in the world, 4. The way of formality

partly, because it easeth men of trouble of conscience, quieting that. Thou has sinned, saith conscience, and God is offended, take a book and pray, keep thy conscience better, and bring thy Bible with thee Now conscience is silent, being charmed down with the form of Religion, as the Devill is driven away (as they say) with holy water, partly also because the form of religion credits a man, partly because it is easie in it self; it's of a light carriage, being but the shadow and picture of the substance of religion; as now, what an easie matter it is to come to Church? They hear (at least outwardly) very attentively an hour and more, and then to turn to a proof, and to turn down a leaf, here's the form. But now to spend Saturday night, and all the whole Sabbath day morning, in trimming the Lamp, and in getting oyle in the heart to meet the Bridegroom the next day, and so meet him in the Word, and there to tremble at the voice of God, and suck the brest while it is open, and when the word is done, to goe aside privately, and there to chew upon the word, there to lament with tears all the vain thoughts in duties, deadnesse in *hearing*, this is hard, because this is the power of godlinesse, and this men will not take up so for private prayer. what an easie matter is it for a man to say over a few prayers out of some *devout book*. or to repeat some old prayer got by heart since a childe, or to have two or three short winded wishes for Gods mercy in the morning and at night, this form is easie but now to prepare the heart by serious meditation of God and mans self before he praies, then to come to God with a bleeding hunger-starved heart, not only with a desire, but with a warrant, I must have such or such a mercy, and there to wrestle with God, although it be an hour or two together for a blessing, this is too hard, men think none doe thus, and therefore they will not. 50

Fifthly, the way of *presumption*. 5. The way whereby men having seen their sins, of presumption. catch hold easily upon Gods mercy, and snatch comforts, before they are reached out unto them. There is no word of comfort in the book of God intended for such as *regard iniquity in their hearts*. though they doe not act it in their lives Their only comfort is, that the sentence of damnation is not yet executed upon them. 60

Sixthly, the way of *sloth*, whereby men lie still, and say God must doe all, If the 6. The way of sloth.

The consciences of unregenerate men are often silenced with a form of religion.

Lord would set up a Pulpit at the Alehouse door, it may be they would hear oftner. If God will alwaies thunder, they will alwaye pray; if strike them now and then with sicknesse, God shall be paid with good words and promises enow, that they will be better if they live, but as long as peace lasts, they will run to Hell as fast as they can, and if God will not catch them, they care not, they will not return.

Seventhly, the way of *carelesnesse* 7 The way
 10 when men feeling many difficulties, pass of *carelesnesse*.
 through some of them, but not all, and what they can-
 not get *now*, they feed themselves with a false hope
 they shall *hereafter*: they are content to be called Preci-
 sions, and fools, and crazie brains, but they want broken-
 nesse of heart, and they will pray (it may be) for it,
 and passe by that difficulty, but to keep the wound
 alwaies open, this they will not doe, to be alwaies sigh-
 ing for help, and never to give themselves rest till their
 hearts are humbled, that they will not; *these have a*
 20 *name to live, yet are dead.*

Eighthly, the way of *moderation* or 8 The way
 honest discretion, *Rev. 3. 16* which in- of *moderation*.

deed is nothing but lukewarmnesse of the soul, and that
 is, when a man contrives and cuts out such a way to
 Heaven, as he may be hated of none, but please all,
 and so do any thing for a quiet life, and so sleep in a
 whole skin The Lord saith, *He that will live godly*
must suffer persecution: No, not so, Lord Surely (think
 they) if men were discreet and wise, it would prevent
 a great deal of trouble and oposition in good courses
 this man will commend those that are most zealous, if
 they were but wise, if he meet with a black-mouth'd
 forswearer, he will not reprove him, lest he be displeased
 with him, if he meet with an honest man, hee'l yeeld to
 all he saith, that so he may commend him, and when he
 meets them both together, they shall be both alike
 welcome, (what ever hee thinks) to his house and
 table, because he would fain be at peace with all men

Ninthly, and lastly, the way of Self-love. 9 The way
 whereby a man fearing terribly he shall of self-love
 be damned, useth diligently all means whereby he shall
 be saved. Here is the strongest difficulty of all, to row
 against the stream, and to hate a mans self, and then to
 follow Christ fully.

1641

Roger Williams

1603? • 1683

Roger Williams has an honored place in American history as the first vigorous proponent of the principles which stand first in the Bill of Rights "Congress shall make no law respecting the establishment of religion, or prohibiting the free exercise thereof." The separation of church from state and the complete toleration of religious opinions, whatever they may be, are so basic to

American democracy that it is easy to forget how rare they once were, and how bitter and long-continued a battle was necessary to achieve their general acceptance. As Nazi Germany revealed, the struggle is not merely a historical episode. Religious freedom is not even yet secure the world over. Roger Williams, whose central conviction was that the power of the civil state must not

be used to enforce a specious uniformity of religious belief speaks of a matter still crucial in the tangled affairs of humanity.

The exact date of Williams' birth is unknown because of the destruction of records in the Great Fire of London in 1666. He was born between 1603 and 1606 in London, the son of a moderately prosperous merchant. Sometime in his teens he learned shorthand and became the protégé of one of England's greatest lawyers, Sir Edward Coke (1552-1634). Through Coke's influence he entered Charterhouse School in 1621 and there did so well that he won a scholarship. With it and other rewards for his distinction as a student, he was able to take his B.A. degree in 1627 as a member of Pembroke Hall, Cambridge, subscribing as was required, to the authority of the King, the *Book of Common Prayer* and the Thirty-Nine Articles (the accepted body of divinity) in the Church of England.

It is probable that Williams went to the university with the intention of preparing for the law. After taking his degree, however, he continued at Cambridge as a student of divinity. Already Puritan in his sympathies, he was unable to accept the prospect presented by the ecclesiastical measures and appointments of Charles I, who obviously planned to suppress all nonconformity. In the winter of 1628-1629, therefore, Williams left the university to become the household chaplain of an Essex country gentleman who had connections with a number of the leading promoters of the Massachusetts Bay Colony. By May of 1629 he was considering migration to New England and in December of 1630 he sailed for Massachusetts. Meanwhile he had suffered the humiliation of having his proposal of marriage to a young lady rejected by her aunt on the ground of his low social rank, and had married a lady's maid—on the rebound but, as it turned out, very happily. By 1630 he had arrived at Separatist convictions, he believed, that is to say, that the individual congregation should be the ultimate authority in church government and that the civil state should not be permitted to enforce uniformity.

Williams' religious and political convictions did not become apparent, however, until he arrived in New England. There, chosen teacher of the church in Boston, he refused the post because that congregation still wished to regard themselves as Anglicans. Chosen teacher at Salem where the church was Separatist, he was unable to take the post after John Winthrop and other officials

remonstrated with the Salem people. He then spent some two years at Plymouth, working as a laborer and acquainting himself with the language and customs of the Indians—a missionary work for which all New England had cause to be thankful later. In the latter part of 1633 he returned to Salem, here followed the series of events which brought Williams into conflict with the ruling oligarchy of the Bay Colony and eventually resulted in his banishment. Much has been written about these events, which are intricately bound up with the political development of Massachusetts, it is sufficient here to note that the main points at issue were two: the validity of the royal charter upon which were based all titles to land in the colony, and the power of the civil magistrates to enforce religious conformity. Williams, through his acquaintance with the customs of the Indians, had come to believe that their land had been unjustly taken from them, and he had strenuously denied the right of the General Court to make laws regulating the churches. His congregation at Salem supported him until the civil authorities, in close consultation with the more conservative clergy, exerted strong economic pressure upon Salem. Finally, in 1635, he was banished, to find refuge with friendly Indians in what is now Rhode Island.

The remainder of Williams' life is a complicated story of religious and political events in a frontier colony. He left Separatism to join the first Baptist church to be organized in America, but a few months later he decided that he could belong to no church and became a Seeker, acknowledging no authority but the Bible and the works of God and waiting for the light of revelation. At the same time, he devoted himself to organizing a new colony where all churches should be free from civil control. Circumstances favored him. To lands purchased from the Indians there came settlers, many of them exiles like himself from the more authoritarian colonies. In 1644 Williams visited England, where he found the temper of the Puritans in power more akin to his own than to that of the Bay Colony; he was able to obtain a charter granting full self-government to the Providence Plantations. Later charters in 1655 and 1663 confirmed the first, and despite many internal and external difficulties a colony which separated church from state succeeded and eventually became the model for a nation.

Roger Williams the man is much better remembered

than Roger Williams the writer *A Key into the Language of America* (London, 1643) is, however, one of the most readable of the seventeenth-century books about the Indians. He was also the author of a lengthy tract against the doctrines of the founder of the Society of Friends, *George Fox Digg'd out of His Burrowes* (Boston, 1676). His chief activity as a writer was connected with two periods of residence in London, on behalf of his fellow settlers in Rhode Island. He was there in 1643-1644, at the time of the meeting of the Westminster Assembly of Divines, and again in 1652-1654, when the Puritan Commonwealth became a Protectorate under Oliver Cromwell. His associates in

London included many famous men, among them John Milton; and the situation there called forth his most sustained literary work, a series of pamphlets in which he debated the subject of persecution for cause of conscience (as we would say now, freedom of thought) with John Cotton, one of the ministers who had been responsible for his banishment from Massachusetts.

Brockunier, *The Irrepressible Democrat Roger Williams*, New York, 1940 • James Ernst, *The Political Thought of Roger Williams*, University of Washington Publications in Language and Literature, Vol. VI, No. 1, Seattle, 1929

From

The Bloody Tenent

Of Persecution, for Cause of Conscience,
Discussed, in a Conference Between
Truth and Peace

The debate between John Cotton and Roger Williams on religious liberty began with the appearance of *A Letter of Mr. John Cotton to Mr. Williams*, published in London in the fall of 1643, at a time when the Westminster Assembly was debating the reorganization of the Church of England. In it Cotton defended the Bay Colony for banishing Williams and incidentally argued in favor of enforced uniformity of religion. Williams countered in January with Mr. Cotton's Letter Lately Printed, Examined and Answered, following it the next month with *Queries of Highest Consideration*, in which he advocated separation of church and state. In July, moreover, he published *The Bloody Tenent of Persecution for Cause of Conscience*. He was then in London and so sympathetic with the Levellers, one of the most democratic of the extreme Puritan parties, that he asserted in *The Bloody Tenent* that the foundation of the civil power lies in the people and "that such Governments as are by them

erected and established, have no more power, nor for no longer time, than the civil power or people consenting and agreeing shall betrust them with." Parliament decided that such remarks were dangerous enough to justify an order that the book be burned by the public hangman. It was perhaps fortunate for Williams that he published it anonymously.

Cotton remained in Boston but the debate went on. His *Keyes of the Kingdom of Heaven and Power Thereof*, an argument for a Congregational establishment, was published in 1644, and another work, *The Controversies Concerning Liberty of Conscience in Matters of Religion Truly Stated*, appeared in 1646. He answered Williams specifically in 1647 with *The Bloody Tenent Washed, and Made White in the Blood of the Lambe* and *A Reply to Mr. Williams His Examination, and Answer of the Letter Sent to Him by John Cotton*. The discussion was concluded five years later, in 1652, with Williams' *The Bloody Tenent Yet More Bloody. By Mr. Cottons Endeavour to Wash It White in the Blood of the Lambe*.

Since all these books are interdependent, each being organized in terms of its predecessor, they are difficult to represent adequately in short space. The selection which follows consists of the introduction and the first two chapters of *The Bloody Tenent of Persecution for Cause of Conscience*. Only a part of Williams' argument is included, but the humanity of his position, the dialogue method which he used, and the occasional eloquence of his style are sufficiently evident.

To every Courteous Reader.

While I plead the Cause of Truth and Innocence against the bloody Doctrine of Persecution for cause of conscience. I judge it not unfit to give alarme to my selfe, and all men to prepare to be persecuted or hunted for cause of conscience.

Whether thou standest charged with 10 or but 2 Talents, if thou huntst any for cause of conscience, how canst thou say thou followest the Lambe of God who so abhorrid that practice?

If Paul, if Jesus Christ were present here at London, and the question were proposed what Religion would they approve of The Papists, Prelatists, Presbyterians, Independents, &c would each say, Of mine, of mine.

But put the second question, if one of the several sorts should by major vote attaine the Sword of steel what weapons doth Christ Jesus authorize them to fight with in His cause? Doe not all men hate the persecution, and every conscience true or false complaine of cruelty, tyranny? &c

Two mountaines of crying guilt lye heavie upon the backs of All that name the name of Christ in the eyes of Jewes, Turkes and Pagans.

First, The blasphemies of their Idolatrous intentions, superstitions, and most unchristian conversations

Secondly, The bloody irreligious and inhumane oppressions and destructions under the maske or vaile of the Name of Christ. &c.

O how like is the jealous Jehovah, the consuming fire to end these present slaughters in a greater slaughter of the holy Witnesses? Rev. 11

Six yeares preaching of so much Truth of Christ (as that time afforded in K. Edwards dayes) kindles the flames of Q. Marie's bloody persecutions.

Who can now but expect that after so many scores of yeares preaching and professing of more Truth, and amongst so many great contentions amongst the very best of Protestants, a fierie furnace should be heat, and who sees not now the fires kindling?

⁴² I confesse I have little hopes till those flames are over, that this Discourse against the doctrine of persecution for cause of conscience should passe currant (I say not amongst the Wolves and Lions, but even amongst the Sheep of Christ themselves) yet *liberavi animam meam*, I have not hid within my breast my soules belief And

although sleeping on the bed either of the pleasures or profits of sinne thou thinkest thy conscience bound to smite at him that dares to waken thee? Yet in the midst of all these civil and spirituall Wars (I hope we shall agree in these particulars.) 50

First, how ever the proud (upon the advantage of an higher earth or ground) or'looke the poore and cry out Schismatiques, Hereticks, &c shall blaspheme and seduce scape unpunished? &c Yet there is a sorer punishment in the Gospel for despising of Christ then Moses, even when the despiser of Moses was put to death without mercie, Heb. 10. 28, 29 He that beleeveeth not shall bee damned, Marke 16 16

Secondly, what ever Worship, Ministry, Ministration, the best and purest are practised without faith and true perswasion that they are the true institutions of God, they are sinfull worships, Ministries, &c. And how ever in Civill things we may be servants unto men, yet in Divine and Spirituall things the poorest peasant must disdain the service of the highest Prince: Be ye not the servants of men, 1 Cor 14

Thirdly, without search and triall no man attains this faith and right perswasion, 1 Thes 5 Try all things

In vaine have English Parliaments permitted English Bibles in the poorest English houses, and the simplest man or woman to search the Scriptures, if yet against their soules perswasion from the Scripture, they should be forced (as if they lived in Spaine or Rome it selfe without the sight of a Bible) to beleeve as the Church beleeves

Fourthly, having tried we must hold fast, 1 Thes 5. upon the losse of a Crowne, Revel. 13 we must not let goe for all the flea bitings of the present afflictions, &c. having bought Truth deare, we must not sell it cheape, not the least graine of it for the whole World, no not for the saving of Soules, though our owne most precious, least of all for the bitter sweetning of a little vanishing pleasure.

Text Narragansett Club Publications, ed Samuel Caldwell, III, 1867
• 13 Papists . . . Independents, forms of church governments, differing on whether the supreme authority should rest with the Pope, the King and his bishops, the elders (presbyters), or the individual congregations • 33 K. Edwards dayes . . . persecutions. The reign of Edward VI (1547-1553) brought the Book of Common Prayer and the Forty-Two Articles, the reign of Mary (1553-1558), in which an attempt was made to restore Roman Catholicism, saw about two hundred "heretics" burned at the stake • 44 liberavi animam meam, I have liberated my soul

For a little puffe of credit and reputation from the changeable breath of uncertaine sons of men.

For the broken bagges of Riches on Eagles wings. For a dreame of these, any or all of these which on our death-bed vanish and leave tormenting stings behinde them Oh how much better is it from the love of Truth, from the love of the Father of lights, from whence it comes, from the love of the Sonne of God, who is the way and the Truth, to say as he, *John* 18. 37. For this end was I borne, and for this end came I into the World that I might beare witnesse to the Truth.

THE ANSWER OF MR IOHN COTTON OF BOSTON
IN NEW-ENGLAND, TO THE AFORESAID ARGUMENTS
AGAINST PERSECUTION FOR CAUSE OF CONSCIENCE
PROFESSEDLY MAINTAINING PERSECUTION
FOR CAUSE OF CONSCIENCE

The *Question* which you put, is, Whether *Persecution* for cause of *Conscience*, be not against the *Doctrine* of *Jesus Christ* the *King of Kings*.

Now by *Persecution* for Cause of *Conscience*, I conceive you meane, either for professing some point of *Doctrine* which you believe in *Conscience* to be the Truth, or for practising some *Worke* which in *Conscience* you believe to be a *Religious Duty*.

20 Now in Points of *Doctrine* some are *fundamentall*, without right belief whereof a Man cannot be saved: Others are *circumstantiall* or lesse principall, wherein Men may differ in judgement, without prejudice of *salvation* on either part.

In like sort, in Points of *Practice*, some concerne the waightier Duties of the *Law*, as, What *God* we worship, and with what kinde of *Worship*: whether such, as if it be *Right*, fellowship with *God* is held, if *Corrupt*, fellowship with Him is lost.

30 Again, in Points of *Doctrine* and *Worship* lesse Principall either they are held forth in a meeke and peaceable way, though the Things be *Erroneous* or unlawfull Or they are held forth with such *Arrogance* and *Impetuoussnesse*, as tendeth and reacheth (even of it selfe) to the disturbance of *Civill Peace*.

Finally, let me adde this one distinction more: When we are persecuted for *Conscience* sake, It is either for *Conscience* rightly informed, or for erroneous and blind *Conscience*.

These things premised, I would lay down mine Answer to the Question in certaine *Conclusions*.

First, it is not lawfull to persecute any for *Conscience* sake *Rightly informed*; for in *persecuting* such, *Christ* himselfe is persecuted in them. *Acts* 9. 4.

Secondly, for an *Erronious* and *blind Conscience*, (even in fundamentall and weighty Points) It is not lawfull to persecute any, till after *Admonition* once or twice: and so the Apostle directeth, *Tit.* 3. 10. and giveth the Reason, that in *fundamentall* and principall points of *Doctrine* or *Worship*, the Word of *God* in such things is so cleare, that hee cannot but bee convinced in *Conscience* of the dangerous Errour of his way, after once or twice *Admonition*, wisely and faithfully dispensed. And then if any one persist, it is not out of *Conscience*, but against *his Conscience*, as the Apostle saith, *vers.* 11. He is subverted and sinneth, being condemned of Himselfe, that is, of his owne *Conscience*. So that if such a Man after such *Admonition* shall still persist in the Errour of his way, and be therefore punished, He is not *persecuted* for Cause of *Conscience*, but for sinning against his Owne *Conscience*.

A REPLY TO THE AFORESAID ANSWER OF
MR. COTTON IN A CONFERENCE
BETWEENE TRUTH AND PEACE

Chapter I

Truth. In what darke corner of the World (*sweet Peace*) are we two met? How hath this present evill *World* banished Me from all the Coasts & Quarters of it? and how hath the Righteous *God* in judgement taken Thee from the *Earth*. *Rev.* 6. 4.

Peace. 'Tis lamentably true (*blessed Truth*) the foundations of the *World* have long been out of course: the *Gates of Earth* and *Hell* have conspired together to intercept our joyfull meeting and our holy kisses: With what a wearied, tyred *Wing* have I flowne over Na-

Truth and
Peace rarely
and seldom
meete

Answer, a paper written by Cotton (1595-1652) in answer to questions sent him, apparently, by a Baptist. It was not directly aimed at Williams' position. In logic and cocksureness it is typical of Cotton, who was sublimely certain that he was right in his interpretation of Scripture doctrine.

tions, Kingdomes, Cities, Townes, to finde out precious Truth?

Truth. The like enquiries in my flights and travells have I made for Peace, and still am told, she hath left the Earth, and fled to Heaven.

Peace. Deare Truth, What is the Earth but a *dun-geon of darknesse*, where Truth is not?

Truth. And what's the Peace thereof but a fleeting *dream*, thine Ape and Counterfeit?

Peace. O where's the Promise of the God of Heaven, that Righteousnes and Peace shall *kisse* each other?

Truth. Patience (sweet Peace) these Heavens and Earth are growing Old, and shall be changed like a Garment. Psal 102 They shall melt away, and be burnt up with all the Works that are therein, and the most high *Eternall Creatour*, shall gloriously create New Heavens and New Earth, wherein dwells Righteous-
ness. 2 Pet 3 Our kisses then shall have their *endlesse* date of pure and sweetest ioyes? till then both Thou and I must hope, and wait, and beare the furie of the Dragons wrath, whose monstrous Lies and Furies shall with himselfe be cast into the lake of Fire, the second death Revel 20.

Peace. Most precious Truth, thou knowest we are both pursued and laid for Mine heart is full of sighes, mine eyes with teares Where can I better vent my full oppressed bosome, then into thine, whose faithfull lips may for these few houres revive my drooping wandering spirits, and here begin to wipe Teares from mine eyes, and the eyes of my dearest Children?

Truth. Sweet daughter of the God of Peace, begin; powre out thy sorowes, vent thy complaints: how joyfull am I to improve these precious Minutes to revive our Hearts, both thine and mine, and the hearts of all that love the Truth and Peace, Zach 8.

Peace. Deare Truth, I know thy birth, thy nature, thy delight. They that know thee, will prize thee farre above themselves and lives, and sell themselves to buy thee. Well spake that famous Elizabeth to her famous attorney Sir Edward Coke: Mr Attourney, goe on as thou hast begun, and still plead, not *pro Domina Regina*, but *pro Domina Veritate*.

Truth. 'Tis true, my Crowne is high, my Scepter's strong to breake down strongest holds, to throw down highest Crownes of all that plead (though but in thought) against me Some few there are, but oh how

few are valiant for the Truth, and dare to plead my Cause, as my Witnesses in sack-cloth, Revel 11. While all men's Tongues are bent like Bowes to shoot out lying words against Me!

50

Peace. O how could I spend *eternall dayes* and *endlesse dates* at thy holy feet, in listning to the precious Oracles of thy mouth! All the Words of thy mouth are Truth, and there is no iniquity in them; Thy lips drop as the hony-combe. But oh! since we must part anon, let us (as thou saidst) improve our Minutes, and (ac-
cording as thou promisedst) revive me with thy words, which are sweeter then the honey and the honey-combe.

Chapter II

Deare Truth, I have two sad Complaints:

First, the most sober of thy Witnesses, that dare to plead thy Cause, how are they charged to be mine Enemies, contentious, turbulent, seditious?

Great
complaints
of Peace 60

Secondly, Thine Enemies, though they speake and raile against thee, though they outrageously pursue, im-
prison, banish, kill thy faithfull Witnesses, yet how is all vermillion'd o're for Justice 'gainst the Hereticks? Yea, if they kindle coales, and blow the flames of devouring Warres, that leave neither Spirituall nor
Civil State, but burns up Branch and Root, yet how doe
all pretend an holy Will? He that kills, and hee that's
killed, they both cry out, It is for God, and for their
conscience.

'Tis true, nor one nor other seldome dare to plead the mighty Prince Christ Jesus for their Authour, yet both (both Protestant and Papist) pretend they have spoke with Moses and the Prophets, who all, say they (before Christ came) allowed such holy persecutions, holy Warres against the enemies of holy Church.

Persecutors
seldom plead
Christ, but
Moses for
their Author.

80

Truth. Deare Peace (to ease thy first complaint) tis true, thy dearest Sons, most like their mother, Peace-keeping, Peace-making Sons of God, have borne and still must beare the blurs of troublers of Israel, and

21 Dragons wrath, Satan's wrath Revelation 20 2 And he laid hold on the dragon, that old serpent, which is the Devil, and Satan

 against *persecution* in *milke*, the *Answer* for it (as I tion in Milke
 may say) in *bloud*.

The *Authour* of these *Arguments* (against *persecu-*
tion) (as I have beene informed) being committed by

me then in power, close prisoner to Newgate, for the witness of some truths of Jesus, and having not the use of Pen and Inke, wrote these Arguments in Milke, in sheets of Paper, brought to him by the Woman his Keeper, from a friend in London, as the stopples of his Milk bottle.

In such Paper written with Milk nothing will appeare, but the way of reading it by fire being knowne to this friend who received the Papers, he transcribed and kept together the Papers, although the Author himselfe could not correct, nor view what himselfe had written

It was in milke, tending to soule nourishment, even for Babes and Sucklings in Christ.

It was in milke, spiritually white, pure and innocent, like those white horses of the Word of truth and meeknesse, and the white Linnen or Armour of righteousness, in the Army of Jesus. Rev. 6 & 19.

It was in milke, soft, meeke, peaceable and gentle, tending both to the peace of soules, and the peace of States and Kingdomes.

Peace. The Answer (though I hope out of milkie pure intentions) is returned in blood: bloody & slaughterous conclusions; bloody to the souls of all men, forc'd to the Religion and Worship which every civil State or Common-weale agrees on, and compells all subjects to in a dissembled uniformitie.

Bloudy to the bodies, first of the holy witnesses of Christ Jesus, who testifie against such invented worships

Secondly, of the Nations and Peoples slaughtering each other for their severall respective Religions and Consciences.

8 way fire, that is, by heating paper so that the writing appears

Cotton Mather

1663 • 1728

Pedant, neurotic, megalomaniac, reactionary, benighted witch hunter—so has Cotton Mather come to be known to later generations, who have accepted him as the best example of New England Puritanism gone to seed. There is truth in the judgment, or enough so that no one is likely to grow fond of either the man or the writer; and yet to understand Cotton Mather is possibly a sure way to explore the intellectual labyrinth of provincial America in the period between 1680 and 1728.

Mather's outward life was uneventful. He was born in Boston in 1663, the son of the Rev. Increase Mather and the grandson of the Rev. John Cotton. Of his boyhood, if it can be called that, we know very little except that he was incredibly pious and industrious and that he suffered from an impediment in his speech. Writ-

ing of his early life, for the benefit of his son, he lamented "early Ebullitions of *Original Sin*," but confessed that at the age of seven or eight he was composing forms of prayer for his schoolmates and rebuking them for "their wicked words and ways." "And sometimes," he added, "I suffered from them, the persecution of not only Scoffs but Blows also for my Rebukes." At eleven, according to the same account, he wrote and spoke Latin with great facility, had gone through most of the New Testament in Greek, and had begun his Hebrew grammar. When he received his BA degree from Harvard College in 1678, he was fourteen, the youngest graduate then on record. His stammering relieved (convincing evidence to him of God's special favor), he put aside his plan of becoming a physician to

follow his family's calling, the ministry. After taking his M A in 1681, he continued to assist his father at the Second, or Old North, Church, where he was installed as co-minister in 1685. There he remained all his life, marrying three times, burying most of his fifteen children, preaching literally thousands of sermons, and writing untiringly. He published 444 separate items, and great quantities of material are still extant in manuscript.

Outside of his personal idiosyncrasies, which were many and, at this distance, unpleasant, Mather was handicapped chiefly by nostalgia. He suffered from a lifelong yearning for the good old days when a New England clergyman wielded virtually sovereign power and regarded himself, quite rightly, as playing a leading rôle in a world-wide drama. Doubtless the good old days were never quite what Cotton Mather thought they were, and the Puritan Revolution not as all-important as it seemed. So intent was Mather upon preserving the "old New England way" that he was in many ways backward-looking, committed to a delaying action against new forces. Although he was never such a popular leader as his father, he was so prolific a writer that he has come to represent to many people the whole story of American Puritanism, a result which he himself would have regarded as unfortunate.

His most famous books, and indeed the bulk of his works, are best interpreted as efforts to strengthen the position of the church in a society which was growing steadily more worldly. *The Wonders of the Invisible*

World (1693), the classic account of the tragedy of Salem witchcraft, is a monument to credulity, but it is also the result of a conviction which Cotton Mather shared with pious and intelligent men on both sides of the Atlantic, that to give up a belief in spirits was to sell out to materialism. The vast *Magnalia Christi Americana* (1702) was designed to bind New Englanders to the religion of their forefathers by arousing pride in their spiritual inheritance. *The Christian Philosopher* (1721) sought to demonstrate that science was "no *Enemy*, but a mighty and wondrous *Incentive to Religion*." And the *Manuductio ad Ministerium* (1726), which Moses Coit Tyler regarded as the most vigorous and entertaining of Mather's books, was his mature advice to prospective candidates for the ministry.

For all his efforts, Mather did not reinvigorate religion, as Jonathan Edwards was soon to do. He wrote too much and thought too little for that. His inveterate habit of paraphrasing freely from the books of others, on the theory that he could thereby edify his provincial audience, kept him almost always upon the surface of the world of ideas. There, however, he ranged widely, and often modified or shifted his intellectual position. *The Christian Philosopher*, *Manuductio ad Ministerium*, and *Bonifacius* (1710), better known as *Essays to Do*

Panel (l to r) Boston's first Town House • Cotton Mather at 65, from the Pelham portrait • Harvard in 1726 • Title page of Mather's *Magnalia Christi Americana* • Old State House, Boston

Good, show an amazing adjustment to scientific, humanitarian, and philanthropic movements which were, in the end, to build a new kind of society. Mather did not always understand their implications, but he was so anxious to be well-informed and informative about all branches of knowledge that his books are a mirror of their age.

Sermons, biographies, theological treatises, essays, handbooks for his parishioners, letters, poems, and various other types of writing flowed steadily from his pen. He also kept one of the fullest and most self-revealing

of Puritan diaries. He cultivated and defended an elaborate, allusion-studded style which modern readers are likely to find pedantic and antiquated. Both his literary forms and his style, however, were intimately related to provincial Boston, seeking to preserve its traditions and to maintain its place in the sun.

From

The Wonders of the Invisible World

The Salem "witchcraft episode" began at Salem Village, now Danvers, Massachusetts, during the winter of 1691-1692, with the nine-year-old daughter, the eleven-year-old niece, and the West Indian servant, half Indian, half Negro, of the Rev. Samuel Parris. The children became "afflicted"; that is, they flew into fits and complained of being pricked, bitten, pinched, or choked by invisible hands, of being tormented by apparitions. When a gathering of ministers examined them and decided they were bewitched, they named, after much urging, three tormentors: an obvious neurotic, a miserable old woman, and Tituba, the West Indian servant. In March, publicly examined by Salem magistrates, Tituba confessed to the practice of witchcraft, naming the other two women as her accomplices. Soon there were more accusations, more examinations, more commitments to jail, and by May about one hundred persons were confined, awaiting trial, partly because the community was rural and disunited, full of bitterness among neighbors and relatives.

To meet this situation the new governor, Sir William Phips, appointed a special court of oyer and terminer, to

investigate and to try the witchcraft cases. On evidence such as appears in this selection, the seven magistrates sent Bridget Bishop to the gallows in June. In July five others were hanged; in August, six; in September, fourteen. One eighty-year-old man was pressed to death beneath heavy stones because, fearing that his conviction would forfeit the property he hoped to leave his family, he refused to plead either guilty or not guilty. Forty-five individuals confessed themselves witches and thus escaped death, all those who were executed maintained their innocence to the end. Altogether, more than two hundred persons were accused or suspected. At length the accusations became so numerous and so absurd that the prosecutions were abandoned, the confessed witches freed, and before many years Samuel Sewall was publicly asking forgiveness for his share in the judicial decisions (see p. 90).

Scholars have disagreed violently about the extent to which Increase and Cotton Mather should be held responsible for this amazing episode. Their apologists point out (1) that the vast majority of educated men of the day, whatever their religious affiliations, believed in witchcraft, (2) that Increase Mather, who returned from England in the midst of the mania, urged the utmost caution in weighing the evidence; and (3) that Cotton Mather wrote his account of the trials out of friendship for the magistrates involved. Against these facts one must weigh the intangible effects of Increase Mather's *Essay for the Recording of Illustrious Providences* (1684) and Cotton Mather's *Memorable Providences, Relating to Witchcrafts and Possessions* (1689). Both books collected accounts of Satan's activities against New England, with the intention of combating materialism and religious indifference. Although the

Mathers were following in the footsteps of such English writers as Joseph Glanvill, Henry More, and Richard Baxter, it is possible that their stories of supernatural phenomena contributed to the state of mind which lay behind the explosion at Salem Village.

The *Wonders of the Invisible World*, for which many generations have condemned Cotton Mather as benighted and superstitious, was written in September and October 1692. Two Boston imprints appeared in 1693, and there were three London editions in the same year. More recently it has been several times reprinted, together with Robert Calef's *More Wonders of the Invisible World* (London, 1700), a rationalist's attack upon the procedure and the principals of the Salem outbreak.

THE TRIAL OF BRIDGET BISHOP, ALIAS, OLIVER
AT THE COURT OF OYER AND TERMINER
HELD AT SALEM, JUNE 2, 1692

I

She was Indicted for Bewitching of several persons in the Neighbourhood, the Indictment being drawn up, according to the *Form* in such Cases usual. And pleading, *Not Guilty* there were brought in several persons, who had long undergone many kinds of Miseries, which were preternaturally Inflicted, and generally ascribed unto an horrible *Witchcraft*. There was little Occasion to prove the *Witchcraft*; it being Evident and Notorious to all Beholders. Now to fix the *Witchcraft* on the Prisoner at the Bar, the first thing used, was, the Testimony of the *Bewitched*, whereof, several Testify'd That the *Shape* of the Prisoner did oftentimes very grievously Pinch them, choke them, Bite them, & Afflict them, urging them to write their Names in a *Book*, which the said Spectre called, *Ours*. One of them did further Testify, that it was the *Shape* of this Prisoner, with another, which one Day took her from her Wheel, and carrying her to the River side, threaten'd there to Drown her, if she did not Sign to the Book mentioned which yet she refused. Others of them did also Testify, that the said *Shape* did in her Threats brag to them that she had been the Death of sundry persons, then by her Named, that she had *Ridden* a man, then likewise Named. Another

Testify'd, the Apparition of *Ghosts* unto the Spectre of *Bishop*, crying out, *You Murdered us!* About the Truth whereof, there was in the matter of Fact, but too much Suspicion.

II It was Testify'd, That at the Examination of the Prisoner, before the Magistrates, the Bewitched were extremely Tortured. If she did but cast her Eyes on them, they were presently struck down; and this in such a manner as there could be no Collusion in the Business. But upon the Touch of her Hand upon them, when they lay in their Swoons, they would immediately Revive, and not upon the Touch of any ones else. Moreover, upon some Special Actions of her Body, as the shaking of her Head, or the Turning of her Eyes, they presently and painfully fell into the like postures. And many of the like Accidents now fell out, while she was at the Bar. One at the same time testifying, That she said, *She could not be Troubled to see the Afflicted thus Tormented*.

III There was Testimony likewise brought in, that a man striking once at the place, where a Bewitched person said, the *Shape* of this *Bishop* stood, the bewitched cryed out, that he had Tore her Coat in the place then particularly specify'd, and the Womans Coat, was found to be Torn in that very place.

IV One *Deliverance Hobbs* who had Confessed her being a Witch, was now Tormented by the Spectres, for her Confession. And she now Testify'd, That this *Bishop*, tempted her to Sign the *Book* again, and to Deny what she had Confess'd. She affirmed, that it was the Shape of this Prisoner, which whipped her with Iron Rods, to compel her therunto. And she affirmed, that

Text the first Boston edition, 1693 • **Bridget Bishop**, previously married to a man named Oliver, had long had a bad reputation in Salem Village and had once before been accused of witchcraft. She was the first to be tried and hanged • 3 the *Form* . . . usual, based upon procedures of the English common law, developed during frequent prosecutions for witchcraft under statutes adopted in 1563 and 1604 and not repealed until 1736 • 12 *Shape* . . . **Prisoner** The crucial point in the prosecutions was "special evidence." The magistrates acted on the assumption that evil spirits could not assume the shape of innocent persons. This meant that if an accuser testified under oath to seeing the apparition of his tormentor, and if he died of it, his very accusation was accepted as proof of guilt • 14 **Book**, the large black book in which a witch inscribed his name to seal his contract with Satan. The signature was ordinarily made with the blood of the signer, as in the Faust legend • 17 **Wheel**, spinning wheel • 23 **Ridden a man**, an allusion to the folk belief in incubation, from which the term "nightmare" is derived • 30 **cast her Eyes**, an allusion to the "evil eye," upon which the Salem judges pondered at some length

this *Bishop* was at a General Meeting of the Witches, in a Field at Salem-Village and there partook of a Diabolical Sacrament, in Bread and Wine then Administred'

V. To render it further Unquestionable, that the prisoner at the Bar, was the Person truly charged in THIS *Witchcraft*, there were produced many Evidences of OTHER *Witchcrafts*, by her perpetrated. For Instance, *John Cook* testify'd, that about five or six years ago, One morning, about Sun-Rise, he was in his Chamber assaulted by the *Shape* of this prisoner which Look'd on him, grin'd at him, and very much hurt him, with a Blow on the side of the Head and that on the same day, about Noon, the same *Shape* walked in the Room where he was, and an Apple strangely flew out of his Hand, into the Lap of his mother, six or eight foot from him

VI. *Samuel Gray*, testify'd, That about fourteen years ago, he wak'd on a Night, & saw the Room where he lay, full of Light; & that he then saw plainly a Woman between the Cradle, and the Bed-side, which look'd upon him He Rose, and it vanished; tho' he found the Doors all fast. Looking out at the Entry-Door he saw the same Woman, in the same Garb again; and said, *In Gods Name, what do you come for?* He went to Bed, and had the same Woman again assaulting him The Child in the Cradle gave a great schreech, and the Woman Disappeared It was long before the Child could be quieted; and tho' it were a very likely thriving Child, yet from this time it pined away, and after divers months dy'd in a sad Condition. He knew not *Bishop*, nor her Name; but when he saw her after this, he knew by her Countenance, and Apparrel, and all Circumstances, that it was the Apparition of this *Bishop*, which had thus troubled him.

VII. *John Bly* and his wife, testify'd, that he bought a sow of *Edward Bishop*, the Husband of the prisoner; and was to pay the price agreed, unto another person. This Prisoner being Angry that she was thus hindred from fingring the money, Quarrell'd with *Bly*. Soon after which the Sow, was taken with strange Fits; Jumping, Leaping, and Knocking her head against the Fence; she seem'd Blind and Deaf, and would neither eat nor be suck'd. Whereupon a neighbour said, she believed the Creature was *Over-Looked*; & sundry other circumstances concurred, which made the Deponents Believe that *Bishop* had Bewitched it.

VIII. *Richard Coman* testify'd, that eight years ago,

as he lay Awake in his Bed, with a Light Burning in the Room, he was annoy'd with the Apparition of this *Bishop* and of two more that were strangers to him; who came and oppressed him so that he could neither stir himself, nor wake any one else, and that he was the night after, molested again in the like manner; the said *Bishop* taking him by the Throat, and pulling him almost out of the Bed His Kinsman offered for this cause to lodge with him, and that Night, as they were Awake, Discoursing together this *Coman* was once more visited, by the Guests which had formerly been so troublesome, his kinsman being at the same time strook speechless and unable to move Hand or Foot. He had laid his sword by him, which these unhappy spectres, did strive much to wrest from him; only he held too fast for them. He then grew able to call the People of his house; but altho' they heard him, yet they had not power to speak or stirr, until at last, one of the people crying out, *what's the matter!* the spectres all vanished.

IX. *Samuel Shattock* testify'd, That in the Year 1680, this *Bridget Bishop*, often came to his house upon such frivolous and foolish errands, that they suspected she came indeed with a purpose of mischief. Presently whereupon his eldest child, which was of as promising Health & Sense, as any child of its Age, began to droop exceedingly; & the oftener that *Bishop* came to the House, the worse grew the Child. As the Child would be standing at the Door, he would be thrown and bruised against the Stones, by an Invisible Hand, and in like sort knock his Face against the sides of the House, and bruise it after a miserable manner. Afterwards this *Bishop* would bring him things to Dy, whereof he could not Imagine any use; and when she paid him a piece of Money, the Purse and Money were unaccountably conveyed out of a Lock'd box, and never seen more. The Child was immediately hereupon taken with terrible fits, whereof his Friends thought he would have dyed: indeed he did almost nothing but cry and Sleep for several Months together and at length his understanding

1 General . . . Witches, the Sabbat, the sacrilegious and obscene parody of the mass and other sacraments which constituted a central feature of the folklore of witchcraft Goethe used it skillfully in *Faust*, Hawthorne in *Young Goodman Brown*, it survives in the Hallowe'en figures of witches on broomsticks, on which they were supposed to ride to such meetings • 16 *Samuel Gray*, who, according to Calef, repented his "wholly groundless" accusation on his deathbed

was utterly taken away Among other Symptoms of an Inchantment upon him, one was, that there was a Board in the Garden, whereon he would walk, and all the invitations in the world could never fetch him off About Seventeen or Eighteen years after, there came a Stranger to Shattocks House, who seeing the Child, said, *This poor Child is Bewitched. and you have a Neighbour living not far off. who is a Witch.* He added, *You Neighbour has had a falling out with your Wife: and she said in her Heart, your Wife is a proud Woman,*
 10 *and she would bring down her Pride in this Child:* He then Remembred, that *Bishop* had parted from his Wife in muttering and menacing Terms, a little before the Child was taken Ill The abovesaid Stranger would needs carry the Bewitched Boy with him, to *Bishops* House, on pretence of buying a pot of Cyder The Woman Entertained him in furious manner, and flew also upon the Boy, scratching his Face till the Blood came, and saying, *Thou Rogue, what? dost thou bring this Fellow here to*
 20 *plague me?* Now it seems the man had said before he went, that he would fetch Blood of *her.* Even after the Boy was follow'd with grievous Fits, which the Doctors themselves generally ascribed unto *Witchcraft.* and wherein he would be thrown still into the *Fire* or the *Water,* if he were not constantly look'd after, and it was verily believed that *Bishop* was the cause of it

X *John Louder* testify'd, that upon some little controversy with *Bishop* about her fowles, going well to Bed, he did awake in the Night by moonlight, and did
 30 see clearly the likeness of this woman grievously oppressing him; in which miserable condition she held him unable to help him self, till near Day. He told *Bishop* of this, but she deny'd it, and threatned him, very much. Quickly after this, being at home on a Lords Day, with the doors shutt about him, he saw a Black Pig approach him; at which he going to kick, it vanished away. Immediately after, sitting down, he saw a Black Thing Jump in at the Window, & come & stand before him. The Body, was like that of a Monkey,
 40 the Feet like a Cocks, but the Face much like a mans He being so extreemly affrighted, that he could not speak; this Monster spoke to him, and said, *I am a Messenger sent unto you. for I understand that you are in some Trouble of Mind, and if you will be ruled by me. you shall want for nothing in this world.* Whereupon he endeavoured to clap his hands upon it; but he could feel no substance, and it jumped out of the window

again, but immediately came in by the Porch, though the Doors were shut, and said, *You had better take my Counsel!* He then struck at it with a stick, but struck only the Ground-sel, and broke the Stick. The Arm with which he struck was presently Disenabled, and it vanished away. He presently went out at the Back-Door, and spyed, this *Bishop.* in her Orchard, going toward her House, but he had not power to set one foot forward unto her Whereupon returning into the House, he was immediately accosted by the Monster he had seen before, which Goblin was now going to Fly at him whereat he cry'd out, *The whole Armour of God, be between me and you!* So it sprang back, and flew over the Apple Tree, shaking many Apples off the Tree, in its flying over. At its Leap, it flung Dirt with its Feet, against the Stomack of the man; whereon he was then struck Dumb, and so continued for three Days together. Upon the producing of this Testimony, *Bishop* deny'd that she knew this Deponent: yet their two Orchards joined, and they had often had their Little Quarrels for some years together.

XI. *William Stacy.* Testified, That receiving Money of this *Bishop* for work done by him. he was gone but a matter of Three Rods from her. and looking for his money, found it unaccountably gone from him Some time after, *Bishop* asked him whether his Father would grind her grist for her? He demanded why? She Reply'd, *Because Folks count me a witch.* He answered, *No Question, but he will grind it for you.* Being then gone about six Rods from her, with a small Load in his Cart, suddenly the Off-wheel slump't and sunk down into an Hole, upon plain ground, so that the Deponent, was forced to get help for the Recovering of the wheel. But stepping Back to look for the Hole which might give him this disaster, there was none at all to be found. Some time after, he was waked in the Night; but it seem'd as Light as Day, and he perfectly saw the shape of this *Bishop.* in the Room, Troubling of him, but upon her going out, all was Dark again He charg'd *Bishop*

27 some little controversy, suggestion that neighborhood quarrels and malice formed part of the explanation for the witchcraft episode • 35 Black Pig, evidently the animal familiar of the witch, supposedly nourished by blood or by the supernatural teat mentioned in Section XIII • 38 Black Thing, the Devil • 51 Ground-sel, threshold • 59 The whole . . . God, an allusion to the traditional protection from witchcraft the name of God, the Bible, a crucifix or some other sacred object

afterwards with it. and she deny'd it not, but was very angry Quickly after, this Deponent having been threatened by *Bishop*, as he was in a dark Night going to the Barn, he was very suddenly taken or lifted from the ground, and thrown against a stone wall, After that, he was again hoisted up and thrown down a Bank, at the end of his House After this again, passing by this *Bishop*, his Horse with a small load, striving to Draw, all his Gears flew to pieces, and the Cart fell down, and this deponent going then to lift a Bag of corn, of about two Bushels, could not budge it, with all his might

Many other pranks of this *Bishops*, this deponent was Ready to testify. He also testify'd, that he verily Believed, the said *Bishop*, was the Instrument of his Daughter, *Piscilla's* Death; of which suspicion, pregnant Reasons were assigned.

XII. To Crown all, *John Bly*. and *William Bly*. testify'd, That being Employ'd by *Bridget Bishop*. to help take down the Cellar-wall of the old House, wherein she formerly Lived, they did in Holes of the said old Wall, find several *Poppets*. made up of Rags, and Hogs Brussels, with Headless Pins in them, the points being outward Whereof she could now give no Account unto the Court, that was Reasonable or Tolerable

XIII One thing that made against the Prisoner was, her being evidently convicted of *Gross Lying* in the Court, several Times, while she was making her Plea. But besides this, a Jury of Women, found a preternatural Teat upon her Body, but upon a second search, within three or four Hours, there was no such thing to be seen. 30 There was also an account of other people whom this woman had afflicted And there might have been many more, if they had been, enquired for But there was no need of them.

XIV There was one very strange thing more, with which the Court was newly Entertained As this Woman was under a Guard, passing by the Great and Spacious Meeting-House of *Salem*. she gave a Look towards the House And immediately a *Daemon* Invisibly Entering the Meeting-house, Tore down a part of it, so that tho' 40 there were no person to be seen there, yet the people at the Noise running in, found a Board, which was strongly fastned with several Nails, transported unto another quarter of the House

1692-1693

21 Poppets, images The practice described is commonplace in primitive magic and survives in voodooism

From

Magnalia Christi Americana

Cotton Mather's best-known book is the *Magnalia Christi Americana* or, *The Ecclesiastical History of New-England, from Its First Planting in the Year 1620, unto the Year of Our Lord 1698*. It was begun in 1693 to bring together "Discoveries of the Divine Providence, in the Government of the World." Mather evidently hoped to continue the work begun by his father in the *Essay for the Recording of Illustrious Providences*. Soon, however, he was calling the project his "Church History of New Eng-

land" and was working somewhat along the lines of Thomas Fuller's *Church-History of Britain* (1655) and John Vicars' *Magnalia Dei Anglicana* (1646). Largely completed by the end of 1696, the work was first published at London in 1702 Later editions appeared at Hartford in 1820 and in 1853-1855

The "great American deeds of Christ" are described in seven books (1) a general account of the settlement of New England, (2) the lives of the governors; (3) the lives of the ministers, (4) an account of Harvard College and its leaders, (5) acts and monuments of the New England churches, (6) "Illustrious Discoveries and Demonstrations of the Divine Providence" (the remnant of the original plan), and (7) a description of the various church controversies and the troubles with the Indians A vast storehouse of information on New England history, the *Magnalia* shows its author at his best and worst. Vivid biographies and narratives are interspersed with pedantic quotations and allusions, accurate history with doubtful speculations. Yet it remains one of the great books of colonial America,

and it will always be read appreciatively by those who wish to catch the flavor of the seventeenth century.

The section which follows forms Chapter III of Book III, Part II. The Rev Jonathan Burr (1604-1641) was associated with Richard Mather, the author's grandfather, at Dorchester, for less than two years. His life is described as carefully, however, as that of the most conspicuous leaders of the Puritan Migration. Cotton Mather seldom expressed his attitude toward the laborers in the vineyard more clearly and happily.

NATUS AD EXEMPLAR
THE LIFE OF MR JONATHAN BURR
EXEMPLO MONSTRANTE VIAM

1

When the Interests of *David* were carried into a *Wilderness*, the Respects and Regards by his *Jonathan*, had thereunto were such, that he at last uttered this Exclamation thereupon, *Thy Love to me was wonderful!* The Interests of our *Jesus*, the true *David*, being lodged very much in an *American Wilderness*, there was a *Jonathan*, whose *Love* thereunto was indeed so *wonderful*, that it carried him through the *many Waters* of the *Atlantic Ocean*, to be serviceable thereunto, and this
10 was Mr *Jonathan Burr*.

2 He was born at *Redgrave*, in *Suffolk*, about the Year 1604, descended of Godly Parents, who gratified the Inclinations of this their Son, with a Learned Education. But altho' *Literature* did much adorn his Childhood, *Religion* did so much more; for he had from a *Child* known the *Holy Scriptures*, which made him wise unto *Salvation*. It is noted, that the *Rod of Aaron* was made of an *Almond-Tree*; of which 'twill be no *Plinyism* to observe (tho' *Pliny* observe it), that it flowers the first
20 of all *Trees*, even in *January*, in the more Southern Countries, and bears in *March*; which has been sometimes employ'd as an Intimation, how *quickly* those that are designed for the Ministry, should *Blossom* towards Heaven, and be young *Jeremiahs*, and *Johns*, and *Timothies*. Thus did our *Jonathan*. Even in his very Childhood, so *studious* he was, as to leave his *Food* for his *Book*, but withal so *pious*, that he could neither Morning nor Evening dare to go without *Prayers* to God for his Blessing. And as it was his endeavour, whilst a School-
30 boy, to be *every Day* in the *Fear of the Lord*, so he would

on the *Lord's Day* discover a singular Measure of the *Fear*; not only by abstaining from the *Liberties* which others of his Age then use to take, to *pass the time away* but also by *devoting the time* to the Exercises of *Devotion*. His Father, observing this Disposition of the *Child* hoped, as well he might, that whatever was expended in fitting him for *Service*, would be well repaid, in the Service which might be done by him for the Church of God, and therefore after due Preparations for it, he sent him unto the University.

3. After he had spent three or four Years in *Academical* Studies, the Death of his *Father* fetch'd him sooner than he would have gone, into the country; where, though he kept a *School*, yet he pursued the Design of accomplishing himself with every part of Learning, that when those of his Years were to take their Degrees of *Mastership*, he was one of the *Moderators*, which place he discharged with great Acceptation. But he afterwards would say, That the awful and humbling Providence of God, in the Death of his *Father*, which hindred him from those Employments and Preferments in the *University*, for which he had a particular Fondness, had an effect upon him, for which he had Reason to admire the Wisdom of Heaven, inasmuch as it reduced him to that modest, gracious, careful Frame, which made him the fitter for the Work of *turning many to Righteousness*.

4. Having for a while attended that Work at *Horn-inger*, near *Bury* in *Suffolk*, he afterwards undertook the Charge of *Reckingshal*, in the same County, wherein he did most exemplarily express the Spirit of a *Minister of the New Testament*. He would therein be sometimes ready to envy the more easie Condition of the *Husbandmen*; but in Submission and Obedience unto the Call of God, he now set his Hand unto the *Plough* of the Lord *Jesus Christ*. And therefore in the Form of a Solemn *Covenant*, he obliged himself unto the most Conscien-

Text the London edition of 1702 • *Natus ad Exemplar*, born to be an example (This and subsequent translations are those made by Lucius Robinson for the 1853-1855 edition) • *Exemplo monstrante Viam*, example shows the way • 11 *Redgrave*, in *Suffolk*, a village near the north central border of the county • 17 *Rod of Aaron*. See Numbers 17 • 18 *Plinyism*, a statement of doubtful truth, such as might appear in the *Historia Naturalis* of Gaius Plinius Secundus (23-79). Mather's use of the word is the only one recorded in the *New English Dictionary*. Pliny's statement about the almond-tree appears in Bk XVI, Chap. 42 • 40 *the University*, Cambridge, where Burr matriculated at Corpus Christi College in 1620. According to the records, he took his B.A. in 1623-1624, his M.A., in 1627.

nous Discharge of his Ministerial Duties; in which Discharge he would always beg of God, that whatever *Exhortation* he gave unto others, might first be shaped in his own *Experience*: And yet sometimes he would complain unto his Friends: *Alas, I preach not what I am, but what I ought to be.*

5. This *gracious* Man, was indeed a very *humble* Man, and his *Humility* carried him even into a *Dejection* of Spirit; especially when by *Importunities* he had been prevailed upon to *preach abroad*. Once particularly, there was a Person of Quality, for whose Conversion many Prayers had been put up to God, by those who hoped that God might have much *Honour* from a *Man of Honour* brought unto himself. Mr. Burr preaching at a place, far from his own Congregation, had a most happy Success in the Conversion of this Gentleman, who not only acknowledged this Change, with much Thankfulness, both to God, and the Instrument, but also approved himself a *changed Man*, in the whole Frame of his *After-Conversation*. And yet coming home, from the Preaching of that Sermon, Mr. Burr had a particular Measure of his lowly and modest Reflections thereupon, adding, *I shall conclude, it is of God, if any Good be done by any thing preached by such an Unworthy Instrument.*

6. Hence on the *Lord's Day*, after he came home from his publick Work, it was his manner presently to *Retire*, and spend some time in *praying* to God, for the *pardon* of the Sins, which accompanied him in his Work, and in *praising* of God, for enabling him to go, in any measure, through it; with *Petitions* for the good Success of his Labours.

He then would come down to his *Family-Worship*, wherein he spent some Hours *instructing* of the *Family*, and performing of other Duties: And when his Wife desired him to abate of his excessive Pains, his Answer

would be, *'Tis better to be worn out with Work, than to be eaten out with Rust.* It was indeed his Joy, to be spending his *Life* unto the uttermost for God, and for his People, yea, he would say, tho' he should have no 40 *Temporal Rewards*. Accordingly, when any that had been benefited by his Ministry, sent him any *Tokens* of their Gratitude, he would (like *Luther*) beg of God, *That he might not have his Portion in such things*: And he desired of his grateful Friends, *That if they had gotten any good of him, they would give unto God alone the Glory of it.* Moreover, if he had understood, that any had gained in the Concern of their Souls, by his Labours, he would mention it, in some of his privater Devotions, with this Expression, *Lord, of thine own have I given, so take then the Glory unto thy self: As for me, let my Portion be in thy self, and not in the Things of this World.* But when he was debarred of his Liberty to preach, he was even like a *Fish out of the Water*; and his very *Body* languished through a Sympathy, with the Resentments of his *Mind*: saying, *That his Preaching was his Life; and if he were laid aside from that, he should quickly be dead.*

7. It was not on the *Lord's Day* only but *every Day*, that this good Man was usually, *In the Fear of the Lord* 60 *all the Day long*. He might say with the *Psalmist*, *When I awake, I am still with God*: For at his first *awaking*, he would bless God for the Mercies of the Night, and then pray, *That he might so number his Days, as to apply his Heart to Wisdom*: And if he awaked in the Night, it would commonly be with some *Thanksgivings* unto Heaven. Rising in the Morning, he would repair to his beloved *Study*, where he began the Day with *Secret Prayer* before the Lord. After this he would read a Chapter in the *Old Testament*, spending some time in 70 *Serious* and *Solemn*, and *Heart-searching Meditations* thereupon. He would then come down into his *Family*; where, with his *Prayers*, he would then Read and Expound, and apply the same Chapter unto his own Folks, and such of the Neighbours as would come in, to enjoy his *Meditations*, at the usual Season of them. Retiring then to his *Study* again, he would continue there, till called unto his *Dinner*; and if none came to speak with him after Dinner, he would, after some *Diversion* for a while with his *Children*, return to his *Study*, where he 80

43 Luther, who, especially in the early days of the Reformation, refused the gifts of his admirers lest he be criticized by his enemies

would then have a time to pray with his Wife: But if at any time he were invited unto a Dinner abroad, he would have a time for *that* Service in the Forenoon, before his going out.

As the Evening drew on, after the like manner, he would read a Chapter in the *New Testament* making his *Family* Partakers of his *Reflections* with his Prayer upon it. And before his going to Bed, he usually walked up and down the Room, for half an Hour, or more, pondering upon *something*, which his Wife desiring to know, *What it was?* He replied, *Seeing thou art so near me, if it may do thee good I'll tell thee. First*, He said, he called himself unto an Account, *How he had spent the day?* And what sinful *Commissions*, or *Omissions*, he had been overtaken with, for which, he then, begg'd Pardon of God. *Secondly*, He reckon'd up the particular *Mercies* he had received *in the Day* rendring of Praises to Heaven for those *Mercies*. *Lastly* He made his *Petitions* to God that he might be prepared for *sudden* Death. Unto which *Third Article* in his Thoughts, that which gave more special Occasion was, the *sudden Death* of his *Brother* an eminent and excellent *Christian*, whom, he said, he *could never forget*.

8 When he travelled abroad he thought long to be at home again, through his Dissatisfaction at his not having elsewhere, so convenient Seasons for his *Communion* with God. And when he took any Journeys with his Friends, it was his manner to enquire, *What good had been done, or gained therein?* and *what good Examples had been seen?* and *what good Instructions had been heard?* and that there might be no loss of time in the Journeys, he would be full of *profitable Discourse*, especially by way of *Occasional Reflection*, upon things that then occur'd unto Observation. What he was in a *Journey* the same he was at the Table, even like the Fire, (what was once writ of *Athenodorus*) Ἐξάπτων πάντα τὰ παραγείμενα. So that they who would bear no part in a gracious *Communication*, would be *dumb*, where-ever he came, and some of the roughest and rudest Hearers, who have *Tears* fetched from their Eyes, at the Soul melting Expressions that passed from his Mouth. Moreover, at a *Feast* he would eat more sparingly than at another time, giving us his Reason for his Temperance, the Advice of the Wise Man *Put a Knife to thy Throat*. And he would say, *Where there are many Varieties, there are many Temptations*.

9. It was his wont, before the *Lord's Supper*, to keep

a Day of solemn *Fasting* and *Prayer* alone, with his *Wife* as well to prepare themselves for that Sacred *Ordinance*, as to obtain the manifold Blessings of Heaven upon his Family and Neighbourhood. Such was his *Piety*. And as for his *Charity*, he seldom visited the *Poor*, but with *Spirituals* he communicated also *Temporals* unto them. For which, when some of his Friends intimated, that he might err, in reserving no more for himself, he would answer, *I often think of those Words, he that sows sparingly shall reap sparingly*. It was also remarkable to see how much his own Personal Joy, and Grievs, were swallowed up in the *Sympathy* which he had, with the Condition of the whole Church abroad. When he heard it was well with the Church, he would say, *Blessed be God, that it goes well with them, whatever becomes of me!* But if ill none of his own private Prosperity kept him from feeling it, as a true Member of that *Mystical Body*. Finally, All the Graces which thus rendred him amiable to those that were about him, were attended with such *Mosaic Meekness* as made him yet further amiable. He would be *zealous*, when he saw Dishonour cast on the Name of God, but *patient* under Injury offer'd unto himself. If he were informed, that any thought meanly of him, he would not be moved at it but say, *I think as meanly of my self and therefore may well be content, that others think meanly of me!* And when *Evil* hath been charged on him, he has replied *If Men see so much, what does God see?* Disgraceful and unworthy Speeches bestowed upon him, he would call, *his Gains*; but it was his Trouble to find himself applauded. His Friends might indeed have said of him as *Luther* of *Melancthon*, *Mibi plane videtur saltem in hoc errare, quod Christum ipse fingat longius abesse à Corde suo, quam sit reverà, certè nimis Nullus in hoc est noster Jonathan*.

10 This bright *Star* must move *Westward*. He, with many Fellow-Sufferers for the *Testimony of Jesus*, being silenced in *England*, and foreseeing a dismal *Storm* a

36 Ἐξάπτων... παραγείμενα, which troubles everything near it. The reference is probably to Athenodorus of Tarsus (74 B.C.-8 A.D.) teacher of Augustus and Tiberius, and friend of Cicero. • 44 Put Throat. Proverbs 23:2. And put a knife to thy throat, if thou be a man given to appetite. • 79 *Luther of Melancthon*, Melancthon (Philipp Schwarzerd, 1497-1560) was one of Luther's great allies in the German Reformation. The sense of the quotation is: It is evident to me that he errs in pretending that Christ is farther from his heart than is real. Surely in this my Jonathan seems to deprecate himself to an unreasonable extent.

coming upon the Nation, till the overpassing whereof he saw many *Praying Saints* directed unto *America*. for *Chambers of Safety*: and willing to forego all Worldly Advantages, for the Enjoyment of Gospel Ordinances, administred without the mixtures of *Humane Inventions*; he removed into *New England*. having his three Children with him, and his Wife big with a Fourth, in his Remove; where arriving, it refreshed him not a little, to see the escaped People of God, with *Harp* in their Hands, there singing the *Song of Moses*. He came into *New-England*. at a time, when there was not so much want of *Lights*, as of *Golden Candlesticks*. wherein to place the *Lights*: but he was not long there, before he was invited by the Church of *Dorchester*, to be an Assistant unto the well-known Mr. *Richard Mather*.

11. The *Evil One*. disturbed at the Happiness of *Dorchester*, very strongly endeavoured a *Misunderstanding* between Mr. *Mather* and Mr. *Burr*; and the *Misunderstanding* did proceed so far, as to produce a *Paroxysm*.

It was judged by some of the Brethren in the Church, that Mr. *Burr* had expressed himself erroneously in certain Points, then much agitated throughout the Country, and Mr. *Mather*. upon their Desire, examining the Propositions which this Good Man had written, thought he could not altogether clear them from Exceptions. Hereupon grew such Alienations, that they could not be well Re-united, without calling in the Help of Neighbour-Churches in a *Council*: which *Council* directing both Mr. *Mather* and Mr. *Burr*, to acknowledge what *Misunderstandings* were then discovered in this Business, those two Good Men set apart a Day for the *Reconciliation*: and with such Exemplary Expressions of *Humility* and *Affection*. Rectified all that had been out of Joint, that God was exceedingly Glorified, and the Peace of the *Church* effectually restored and maintained.

12 This true *Barnabas*. was not only to give the Churches of *New England* a *Consolatory Visit*. in his Passage unto Glory, that he might leave them an Example of that *Love*, *Patience*. *Holiness*, and *Fruitfulness*. which would make them an Happy People. Tho' he had not *Persecution* to try him in this Wilderness, yet he was not without his Trials. For, as 'tis well observed in the Discourse, *De Duplici Martyrio*. which goes under the Name of *Cyprian*: *Si deest Tyrannus, si Tortor, si Spoliatio, non deest concupiscentia, Martyr. Materiam. quotidianam nobis exhibens*. The next Year after he came to *New-England*, he was taken Sick of the *Small-Pox*;

out of which he nevertheless recovered, and came forth as *Gold that had been tryed in the Fire*. He then renewed and applied the *Covenant of Grace*, by the suitable Recognitions of the following *Instrument*. 50

'I *Jonathan Burr*. being brought in the Arms of Almighty God over the Vast *Ocean*. with my Family and Friends, and Graciously provided for in a Wilderness; and being sensible of my own *Unprofitableness* and *Self-seeking*: yet of Infinite Mercy, being called unto the Tremendous Work of *Feeding Souls*. and being of late with my Family deliver'd out of a Great Affliction of the *Small-Pox*: and having found the Fruit of that Affliction, God Tempering, Ordering, Mitigating the *Evil* 60 thereof, so as I have been graciously and speedily deliver'd, I do promise and *vow* to him, that hath done all things for me, *First*. That I will aim only at his *Glory*. and the *Good of Souls*. and not *my self* and *Vain Glory*: And that, *Secondly*. I will walk *Humbly*. with lower *Thoughts of my self*. considering what a poor Creature I am, a Puff of Breath, sustained only by the *Power* of his *Grace*; And therefore, *Thirdly*. I will be more watchful over my Heart, to keep it in a due Frame of *Holiness* and *Obedience*. without running out so far to the Crea- 70 ture, for I have seen, That he is mine only Help in time of need; *Fourthly*. That I will put more weight upon that *firm Promise*. and *sure Truth*. That God is a *God hearing Prayer*: *Fifthly*. That I will set up *God*. more in my Family. more in *my self*. *Wife*. *Children* and *Servants*; conversing with them in a more serious and constant manner, for *This*. God aimed at, in sending his Hand into my Family at this time

Memento Mori.

'In Meipso Nihil; in Christo Omne.'

80

10 *Song of Moses*. See Exodus 15 1 • 15 Mr. *Richard Mather* (1596-1669), Colton Mather's grandfather • 17 a *Misunderstanding*. Burr had been suspected of entertaining a belief in divine revelation directly to the individual. The Synod of 1657 had condemned eighty-two heresies of this nature • 36 *Barnabas*, a contemporary of St. Paul, famous as a missionary (see 1 Corinthians 9 6) • 43 *De Duplici Martyrio*, "Twofold Martyrdom," a treatise attributed to Cyprian (200?-258), Church Father, martyr, and saint. It was probably composed by Erasmus • 44 *Si deest Tyrannus*, etc. If there be no tyrant, no torturer, no robber, there will still be evil passions, punishing daily occasions for martyrdom • 79 *Memento Mori*. Keep death in mind, a common inscription on tombstones • 80 *In . . . Omne*. In myself, I am nothing, in Christ, I am all things

Nor was his *Heavenly Conversation* afterwards disagreeable to these Grateful Resolutions of his Devout Soul By the same Token, that the famous Mr. *Thomas Hooker*, being one of his Auditors, when he preached in a great Audience at *Charlestown*, had this Expression about him *Surely, this Man wont be long out of Heaven. for he preaches as if he were there already.* And the most experienced Christians in the Country, found still in his Ministry, as well as in his whole Behaviour, the Breathing of such a Spirit, as was very greatly to their Satisfaction. They could not but call him, as *Dionysius* was once called, Πτερινὸν τοῦς οὐρανοῦς, *The Bird of Heaven.* Had it not been *Old Adam's World*, so Innocent, so Excellent, so Heavenly a Person, could not have met with such Exercises as he and others like him, then sometimes did, even from their Truest Brethren,

13. Having just been preaching about the *Redemption of Time*, he fell into a Sickness of Ten Days Continuance, during which Time, he expressed a wonderful
 20 Patience, and Submission, upon all Occasions. His Wife perceiving his *Willingness to Die*, asked him, *Whether he were desirous to leave her and his Children?* Where-to his Answer was, *Do not mistake me, I am not desirous of that; but I bless God, that now my Will is the Lord's Will: If he will have me to live yet with my dear Wife and Children, I am willing. I will say to you my dear Wife and Children, as the Apostle says, It is better for you, that I abide with you; but it is better for me to be dissolved and to be with Christ.* And perceiving his
 30 Wife's Disconsolation, he asked her, *If she could not be willing to part with him;* whereupon, when she intimated how hard it was, he exhorted her to acquiesce in that God, who would be *Better than Ten Husbands.* Adding, *Our Parting is but for a Time, I am sure we shall one Day meet again.* Being discouraged by finding himself unable to put on his Clothes, one of his Friends told him, *his Work was now to lie still:* At which he complained, *I lie slugging a Bed, when others are at work!* But being minded of *God's Will*, That it should
 40 be so, that quieted him. Observing how diligently his Wife tended him, he said unto her, *Don't spend so much Time with me, but go thy way and spend some time in Prayer; thou knowest not what thou mayst obtain from God: I fear lest thou look too much upon this Affliction* A Day or two before his Death, he blessed his Children; and the Night before he died, he was overheard some-

times to say, *I will wait until my Change come; and Why art thou so loath to die?* A few Hours before his Death, it was observed, that he had a sore Conflict with the *Angel of Death*, who was now shooting his last Arrows at him; and when one of the Standers-by said, *The Sting of Death is taken away; the Lord Jesus Christ has overcome Death for you; this is one of Satan's last Assaults; his Work is now almost at an end; though he be a subtil Enemy, and would if it were possible, deceive the very Elect;* he presently laid hold on that last Expression, *If it were possible;* said he, *Blessed be God there is no Possibility!* After this, he requested the Company might withdraw, that so he might have an Opportunity to pray for a while by himself, but seeing the Company loth to leave the Room, he pray'd in Latin as long as he had Strength to do it. When he was to Appearance just expiring, he called for his Wife; and stedfastly fixing his Eyes upon her, he said, *Cast thy Care upon God, for he careth for thee.* About half an Hour after this, when Death had been for some while drawing the Curtains about him, his last Words were those unto his Wife *Hold Fast, Hold Fast!* So he finished his Pilgrimage, on Aug. 9. 1641.

14 Unto that Vertuous Gentlewoman his Wife, he expressed himself with great Confidence, *That God would certainly provide well for her;* and that Gentlewoman, shortly after being Honourably and Comfortably married unto another Gentleman of Good Estate, namely, *Richard Dummer*, Esq; once a Magistrate of the Colony, lived with him near Forty Years; and was more than Forty Years after alive to testify her Experience of the Accomplishment, which God had given unto that Faith of her *Dying Husband*. Who at his Death commended his Family to God, in Strains not unlike those of the *Dying Wilerus*.

3 Mr Thomas Hooker (1586-1647), the founder and first minister of Hartford, Connecticut • 11 Dionysius, probably Dionysius the Areopagite, mentioned in Acts 17 34 • 75 Richard Dummer. Their son Jeremiah Dummer, became a famous colonial silversmith • 81 Wilerus, probably Count Herman van Weiden (1472-1552) archbishop of Cologne who was excommunicated by the Pope in 1546 The Latin reads

To thee, O Christ, this tender flock I leave,
 Be thou their father when I am no more,
 Thou from the morn of life until its eve
 Hast fed me with the riches of thy store
 These little ones so feed, protect, and love,
 And then translate them to Thy rest above

CHRISTE. tibi soli mea pignora Viva relinquo.
 Quorum post Mortem Tu Pater esto meam
 Qui cunctis Vitæ miserum me jugiter Annis
 Pavisti, Largam dans Mihi semper opem,
 Tu quoq, Pasce meos defende, tuere, doceq,
 Et tandem ad Coeli guadia transfer

Amen

EPITAPHIUM

*Mortuus hic Jacet, qui in Omnium Cordibus Vivit.
 Omnes Virtutes, quæ Vivunt post Funera,
 In Unius BURRI Funere invenerunt Sepulchrum.* 10
 To make up his *Epitaph*. I will borrow a Line or two
 from the Tombstone of *Volkmarus*.
*Hic Jacet Exutis nimium citò BURRIUS Annis,
 Adjuga Suggestus, Magne MATHFRE, Tui*

*Si magis Annosam licuisset condere Vitam,
 Ac Scriptis Animum notificare Libris,
 Tot Verbis non esset opus hoc Scalpere Saxum,
 Sufficerent Quatuor, BURRIUS hic situs est.*

1693-1698?·1702

EPITAPHIUM

Here he lies dead, but he lives in the hearts of all
 All those great virtues, which the tomb defy,
 Now sleep within it, where our Burr doth lie

12 *Volkmarus*, an allusion the editor has been unable to identify.
 Mather was evidently paraphrasing from some book of epitaphs The
 Latin reads as follows

Here lieth Burr, whose span too soon was sped
 Burr, whom in life our own great Mather led
 Alas! had he but reached a riper age,
 And stamped his genius on some deathless page,
 No sculpture need upon this stone appear,
 Save one brief, meaning sentence. "Burr Lies Here."

Curiosa Americana

Cotton Mather's curiosity about science won him election
 as Fellow of the Royal Society of London in 1713 Between
 1712 and 1724 he sent to that organization over eighty let-
 ters on more or less scientific subjects. Some of his com-
 ments were summarized in the *Philosophical Transactions*.
 The letter which follows was written to John Woodward
 (1655-1728), an English geologist who had undertaken a
 world-wide correspondence about fossil remains before
 publishing his *Essay Toward a Natural History of the
 Earth* (1695). Professor Murdock has shown that Mather's
 facts were drawn from an account sent him by John
 Winthrop (1681-1747), a descendant of the famous gov-
 ernor of that name, on September 12, 1717.

Tho' we are gott so far onward at the Beginning of
 another Winter, yett we have not forgott the Last which
 at the Latter End whereof, we were Entertained & over-
 whelmed with a *Snow*, which was attended with some
 Things that were uncommon enough, to afford matter
 for a letter from us The *Winter* was not so bad as that
 wherein *Tacitus* tells us that *Corbulo* made his Expedi-
 tion against the *Parthians*. Nor like that which proved 10
 so fatal to the Beasts & Birds, in the Days of the Em-
 perour *Justinian* [nor?] that wherein the very Fishes
 were killed under the Freezing Sea, when *Phocas* did as

Text from *Selections from Cotton Mather*, ed K B Murdock • 1 10d.
 X m 1717, December 10 Prior to 1752, March rather than January was
 accounted the first month of the year • 9 *Tacitus* (55?-117?), Roman
 historian Corbulo, a famous general under Claudius and Nero, was
 executed at the latter's orders in 67 A.D. In all probability, Mather's
 allusions in his first paragraph were derived from some dictionary or
 classical encyclopedia which listed the great snows of antiquity • 12
Justinian (483-565), Emperor of the eastern Roman empire • 13 *Phocas*,
 usurper of the empire of Constantinople, 602-610, and a notoriously
 cruel tyrant

much to the men whom Tyrants treat like the Fishes of the Sea. But the Conclusion of our *Winter* was hard enough, & was too formidable to be easily forgotten and of a peece with what you had in *Europe*. a year before The *Snow* was the Chief Thing that made it so For tho' rarely does a *Winter* pass us, wherein we may not say with *Pliny*, *Ingens Hyeme Nivis apud nos copia*: yett the Last *Winter* brought with it a *Snow* that Excelled them all A *Snow* tis true, not equal to that which
 10 once fell and Lay Twenty Cubits high, about the Beginning of *October*, in the parts about the *Euxine Sea*. Nor to that, which the French Annals tell us, kept falling for twenty Nine weeks together. Nor to several mentioned by *Boethius*, wherein vast Numbers of people, and of Cattel, perished, Not to those that *Strabo* finds upon *Caucasus* and *Rhodiginus* in *Armenia*. But yett such an one, and attended with such Circumstances, as may deserve to be Remembred.

On the Twentieth of the Last *February*, there came on
 20 a *Snow*, which being added unto what had covered the ground a few Days before, made a Thicker Mantle for our Mother than what was usual. And the Storm with it, was for the following Day so violent, as to make all communication between the Neighbours every where to cease People for some Hours could not pass from one side of a Street unto another, and the poor Women, who happened at this critical time to fall into Travail, were putt into Hardships which anon produced many odd Stories for us. But on the Twenty-fourth Day of the
 30 Month comes *Pelion* upon *Ossa*. Another *Snow* came on, which almost buried the Memory of the former: With a Storm so furious, that Heaven laid an Interdict on the Religious Assemblies throughout the countrey on this Lords-day, the like whereunto had never been seen before. The Indians near an hundred years old, affirm, that their Fathers never told them of any thing that equall'd it. Vast Numbers of Cattel were destroy'd in this Calamity, Whereof some that were of the Stronger Sort, were found standing Dead on their Legs, as if they
 40 had been alive, many weeks after, when the *Snow* melted away. And others had their Eyes glazed over the Ice at such a rate, that being not far from the Sea, they went out of their way, and drowned them there

One Gentleman, on whose Farms, there were now Lost above eleven hundred *Sheep*, which with other cattel were Interred (Shall I Say, or Inniv'd) in the

Snow, writes me That there were Two *Sheep* very singularly circumstanced. For no Less than Eight & Twenty Days after the Storm, the people pulling out the Ruines of above an hundred *Sheep*, out of a *Snow-bank*, which Lay sixteen foot high drifted over them, there were Two found alive, which had been there all this time, & kept themselves alive by Eating the Wool of their Dead Companions When they were taken out, they shed their own Fleeces, but soon gott into good Case again.

Sheep were not the only creatures that Lived unaccountably for whole weeks without their usual Sustenance, entirely buried in the *Snow-drifts*. The *Swine* had a share with the *Sheep* in Strange Survivals. A man had a couple of Young *Hogs*, which he gave over for Dead. But on the twenty-seventh day after their Burial, they made their way out of a *Snow-bank*, at the bottom of which they had found a Little Tansy to feed upon.

The *Poultry* as unaccountably survived as these *Hens* were found alive, after *Seven Days*; *Turkeys* were found alive, after *five & Twenty Days*; Buried in the *Snow*, and at a Distance from the Ground; and altogether destitute of any thing to feed them.

The Number of Creatures, that kept a *Rigid Fast*, shut up in *Snow*, for several weeks together, & were found alive after all, have yielded surprizing stories to us

The Wild Creaturss of the Woods, (the *Outgoing of the Evening*) made their Descent as well as they could in this Time of Scarcity for them, towards the Sea-side. A vast multitude of Deer for the Same Cause taking the Same Couse, & the Deep *Snow* Spoiling them of their only Defence. which is, *To Run*. they became such a prey to those Devourers, that it is thought, not one in Twenty Escaped.

But here again occur'd a Curiosity

These carniverous Sharpers, and especially the *Foxes*, would make their *Nocturnal Visits*, to the Pens, where

7 *Ingens . . . copia* We have had uncommonly heavy snows this winter • 10 *Twenty Cubits*, thirty or more feet The ancient cubit varied from eighteen to twenty-two inches • 11 *Euxine Sea*, Black Sea • 14 *Boethius* (475?-525?), Roman philosopher • 15 *Strabo* (60 B.C.-24 A.D.?), Greek geographer • 16 *Rhodiginus* (1450?-1525), Italian philologist, author of *Antiquae Lectiones* (1516) • 30 *Pelion upon Ossa*. Both are mountains in Thessaly The giants, at war with the gods, supposedly tried to pile one mountain upon the other, in order to reach the heavens The expression, of course, means one great thing on top of another • 46 *Inniv'd*. Mather is playing with the Latin *terra* (earth) and *nix* (snow)

the people had their Sheep defended from them. The poor Ewes big with young were so terrified with the frequent Approaches of the *Foxes*, & the Terror had such Impression on them, that most of the *Lambs* brought forth in the Spring following, were of Monsieur *Reinard's* complexion, when the Dams were all either White or Black.

It was remarkable, that immediately after the Fall of the Snow, an infinite multitude of Sparrows, made their Appearance, but then after a short continuance all disappeared.

It is incredible, how much Damage was done to the *Orchards*; For the Snow freezing to a Crust, as high as the Boughs of the Trees, anon Splitt them to peeces. The Cattle also, walking on the Crusted Snow, a dozen foot from the Ground, so fed upon the Trees as very much to damnify them.

The Ocean was in a prodigious Ferment, and after it was over, Vast Heaps of Little Shells were driven ashore where they were never seen before. Mighty Shoals of Porpoises, also kept a Playday in the Disturbed waves of our Harbours.

From

Manuductio ad Ministerium

The *Manuductio ad Ministerium*, or *Directions for a Candidate of the Ministry* (Boston, 1726), has been reprinted three times—in 1781, 1789, and by the Facsimile Text Society in 1938. It describes the proper studies for the prospective clergyman, evaluating all the arts and sciences. Professor Perry Miller has recently pointed out that it represents both a "mature tradition of Puritan scholarship in America" and certain striking departures from the seventeenth-century positions. Particularly for-

The odd Accidents befalling many poor people, whose Cottages were totally covered with the Snow, & the very tops of their Chimneys to be seen, would afford a Story, But there not being any Relation to philosophy in them, I forbear them. And now, *I am Satis Terris Nivis*—And here is enough of my Winter-tale. If it serve to no other purpose, yett it will give me an opportunity to tell you, That Nine months ago, I did a thousand times wish myself with you in *Gresham-Colledge*, which is never so horribly Snow'd upon. But instead of so great a satisfaction, all I can attain to, is the pleasure of talking with you in this Epistolary way, and subscribing myself,

Syr, Yours with an Affection that knows no Winter
[Cotton Mather]

Dr Woodward

1717-1926

27 *Satis Terris Nivis*, weary of the snow-covered ground • 31 *Gresham-College*, an institution founded with funds left by Sir Thomas Gresham (1519-1579). It was the meeting-place of the Royal Society of London.

ward-looking are Mather's emphasis on practical conduct, his minimizing of logic, his enthusiasm for science, and his failure to insist upon the traditional "doctrine-reasons-uses" pattern of the sermon. His comments on style, however, are a defense of the method and conviction of his own work, akin neither to the "plain style" of his predecessors nor to the fashions of the age of Addison and Steele. The passage is a digression in the course of Mather's comments on literature.

There has been a deal of a do about a *STYLE*; So much that I must offer you my Sentiments upon it. There is a *Way of Writing*, wherein the Author endeavours, that the Reader may have *something to the Purpose* in every Paragraph. There is not only a *Vigour* sensible in

Text the Boston edition of 1726 • 1 a *deal* do, particularly by the enthusiasts for the New Science of Francis Bacon, Robert Boyle, and the Royal Society

every *Sentence*, but the Paragraph is embellished with *Profitable References*, even to something beyond what is *directly spoken*. Formal and Painful *Quotations* are not studied, yet all that could be learnt from them is insinuated. The Writer pretends not unto *Reading*, yet he could not have writ as he does if he had not *Read* very much in his Time, and his Composures are not only a *Cloth of Gold*, but also stuck with as many *Jewels*, as the Gown of a Russian Ambassador. This *Way of Writing* has been decried by many, and is at this Day more than ever so, for the same Reason, that in the old Story, the *Grapes* were decried, *That they were not Ripe*. A Lazy, Ignorant, Conceited Sett of Authors, would persuade the whole Tribe, to lay aside that *Way of Writing*, for the same Reason that one would have persuaded his Brethren to part with the Encumbrance of their *Bushy Tails*. But however *Fashion* and *Humour* may prevail, they must not think that the Club at their *Coffee-House* is, *All the World*; but there will always be those, who will in this Case be governed by *Indisputable Reason*; And who will think, that the real Excellency of a Book will never ly in *saying of little*: That the less one has for his Money in a Book, 'tis really the more Valuable for it, and that the less one is instructed in a Book, and the more of Superfluous *Margin*, and Superficial *Harangue*, and the less of *Substantial Matter* one has in it, the more tis to be accounted of. And if a more Massy *Way of Writing* be never so much disgusted at This Day, a *Better Gust* will come on, as will some other Thing, *quæ jam Cecidere*. In the mean time, Nothing appears to me more Impertinent and Ridiculous than the *Modern Way*. [I cannot say, *Rule*: For they have *None*!] of *Criticising*. The Blades that set up for *Criticks*, I know not who constituted or commission'd 'em!—they appear to me, for the most part as *Contemptible*, as they are a *Supercilious* Generation. For indeed no Two of them have the same *Style*: and they are as intollerably Cross-grain'd and severe in their Censures upon one another, as they are upon the rest of Mankind. But while each of them, conceitedly enough, sets up for the *Standard of Perfection*, we are entirely at a Loss which *Fine* to follow. Nor can you easily find any one thing wherein they agree for their *Style*, except perhaps a perpetual Care to give us Jeune and Empty Pages, without such *Touches of Erudition* (to speak in the *Style* of an Ingenious Traveller) as may make the

Discourses less *Tedious*, and more *Enriching*, to the Mind of him that peruses them. There is much Talk of a *Flowid Style*, obtaining among the Pens, that are most in Vogue; but how often would it puzzle one, even with the best Glasses to find the *Flower*. And if they were to be Chastized for it, it would be with as much of Justice, as *Jerom* was, for being a *Ciceronian*. After all, Every Man will have his own *Style*, which will distinguish him as much as his *Gate*: And if you can attain to that which I have newly described, but always writing so as to give an *Easy Conveyance* unto your *Ideas*, I would not have you by any *Scourging* be driven out of your *Gate*, but if you must confess a *Fault* in it, make a Confession like that of the Lad, unto his Father while he was beating him for his *Verifying*.

However, since every Man will have his own *Style*, I would pray, that we may learn to treat one another with mutual *Civilities*, and *Condescensions*, and handsomely *indulge* one another in this, as *Gentlemen* do in other Matters.

I wonder what ails People, that they can't let *Cicero* write in the *Style* of *Cicero*, and *Seneca* write in the (much other') *Style* of *Seneca*: and own that Both may please in their *several Ways*.—But I will freely tell you, what has made me consider the *Harmouists* that set up for *Criticks upon Style*, as the most *Unregardable Set of Mortals* in the World, is This: Far more Illustrious *Criticks* than any of those to whom I am now bidding Defiance, and no less Men than your *Erasmus's*, and your *Grotius's*, have taxed the *Greek Style* of the *New Testament*, with I know not what *Solæcisms* and *Barbarisms*: And, how many *learned Folks* have Obsequiously run away with the Notion! Whereas 'tis an Ignorant and an Insolent *Humour*, which they have

11 the old Story, of the fox and the grapes, in Aesop's *Fables*, a book which apparently was one of Mather's favorites. In 1692 he wrote and circulated in manuscript a number of *Political Fables*. • 29 *Gust*, taste. • 30 *quæ jam Cecidere*, which now to cut short, i.e., so much for that. • 53 *Jerom*, St. Jerome (331?-420), famous as a stylist. The remark is attributed to Erasmus. • 68 *Seneca*, Lucius Annaeus Seneca (4 B.C.?-65 A.D.), noted for his short, epigrammatic sentences and rhetorical ornament, in marked contrast to the long sentences of Cicero. • 75 *Erasmus's*. . . *Grotius's*, Desiderius Erasmus (1467?-1536) and Hugo de Groot (1583-1645). Erasmus edited the New Testament in Greek, with a Latin translation, Grotius was the author of a commentary or 'annotations' on the Bible.

been guilty of. It may be (and particularly by an Ingenious *Blackwal*, it has been) Demonstrated, That the Gentlemen are mistaken in every one of their pretended Instances; All the Unquestionable *Classicks*, may be brought in, to convince them of their Mistakes. Those Glorious Oracles are as *pure Greek* as ever was written

in the World; and so Correct; so Noble, so Sublime is their *Style*, that never any thing under the Cope of Heaven, but the Old Testament, has equall'd it.

1726

2 *Blackwal*, Anthony Blackwall (1674-1730), author of *The Sacred Classicks Defended* (1725)

Jonathan Edwards

1703 • 1758

To most Americans Jonathan Edwards is either the founder of the family which has compared so favorably with the ill-fated Jukeses that it provides the stock argument for the importance of heredity and education or, and perhaps more commonly, the most sulphurous hellfire preacher of the colonial period. To the specialists, however, Edwards is the greatest theologian that America has yet produced, unquestionably one of the most original minds in our country's history. By uniting a passionate love for God and His authority with a genius for logic and system, he made himself the foremost reinterpreter of Calvinism in America, and he has remained, down to the present day, a great bulwark of religion through his powerful affirmation of faith in the reality and the primacy of spiritual experience. Something of his stature is suggested by the fact that he has been compared with such church fathers as Tertullian, St Augustine, and Calvin, with the philosophers Spinoza, Leibnitz, Berkeley, and Kant, and, for his synthesis of the attitudes of an age, with such widely separated figures as Dante and Emerson.

Edwards was born in 1703 at East Windsor, Connecticut, where his father was minister. Surrounded by sisters (he was the fifth child and the only son in a family of eleven), he received his early education at

home. He entered Yale College when that institution was wandering from one little Connecticut town to another, and was graduated before he was seventeen. He spent two additional years at Yale in the study of theology and, after an interval of eight months during which he preached in a Presbyterian church in New York City, three more years as a tutor. Early in 1727 he joined his grandfather, the Rev. Solomon Stoddard, in the church at Northampton, Massachusetts, married, and became full minister there upon Stoddard's death in 1729.

As a clergyman Edwards developed an absorbing interest in what we would now call the psychology of religion. He welcomed the "awakenings" which came periodically in his church, and eventually announced that he could not conscientiously admit to communion those persons who had made no public relation of religious experience. His congregation, influenced as much, perhaps, by personal as by doctrinal considerations, were unwilling to accept this return to the stricter ways of the first generation in New England, and in 1750 Edwards was dismissed. From 1751 until 1757 he was pastor at Stockbridge, Massachusetts, at that time an Indian mission village on the frontier. He then accepted a call to the presidency of the College of New

Jersey (now Princeton University), where he died of smallpox within three months of his installation.

The rise of Edwards to leadership as a preacher and theologian is to be traced chiefly in his writings. His precocity as a thinker is demonstrated by a considerable body of philosophical papers written during his residence at Yale and published piecemeal after his death. "Of Insects," "Of Being," "Colours," and "Notes on the Mind" have often been cited as evidence of his genius for logical analysis. They show that he developed, independently of George Berkeley, the English philosopher, that philosophical position known as "subjective idealism," which holds that matter has reality only in terms of the perceiving mind. Although this position was fundamental to Edwards' entire intellectual life, he did not publish his conclusions and therefore had no genuine influence upon the philosophical thought of his age.

Soon after his settlement at Northampton, however, he began to publish sermons and case histories which show his absorption in the phenomena of conversion. *A Divine and Supernatural Light* (1734) carefully expounds his belief that a mystical faith is likewise the most logical. *A Faithful Narrative* (1737) describes the first great revival in his church. *Some Thoughts Concerning the Present Revival of Religion in New England* (1742) supports the activities of George Whitefield, an English Methodist who had preached with great effect throughout the colonies, in the face

of ridicule by the leading ministers of Boston (see Chauncy, pp. 184-188). These works merit comparison with a famous book of the twentieth century. William James' *The Varieties of Religious Experience* (1902). Despite occasional overseriousness, notably in the description of the emotional antics of very young children, Edwards must not be dismissed as a ranting revivalist, playing upon unstable individuals and reveling in the physical contortions of repenting sinners. He could be as skeptical of mass emotion as anyone, but he did believe thoroughly in the possibility and the supreme importance of true conversion. He had experienced it himself; he thought he could distinguish between the genuinely "awakened" and the momentarily excited. He lent his support, therefore, to those who sought to arouse men to the insufficiency of a comfortable Sunday pew unaccompanied by a deep-rooted, burning love of God. His justification of trust in religious experience and intuitive knowledge was enormously influential and helped to make evangelicalism and revivalism the prevailing pattern of American religion.

Finally, Edwards built for himself and his followers an impressively logical system of theology, powerfully reaffirming the principal heads of Calvinism but modifying their bases in accordance with the philosophy and

psychology of his day. This system, which was largely responsible for his great posthumous reputation, was set forth in four treatises *A Treatise Concerning Religious Affections* (1746), *A Careful and Strict Enquiry into the Modern Prevailing Notions of That Freedom of the Will Which Is Supposed To Be Essential to Moral Agency, Virtue and Vice, Reward and Punishment, Praise and Blame* (1754), *The Great Christian Doctrine of Original Sin Defended* (1758); and *Two Dissertations. I. Concerning the End for Which God Created the World. II. The Nature of True Virtue* (1765).

In the *Treatise Concerning Religious Affections* Edwards argued that the rational soul, or human mind, has two faculties: the Understanding, by which it discerns, views, or judges, and the Will or Inclination, by which it is turned toward or against the things perceived by the Understanding. Will, in other words, he regarded as closely akin to feeling or emotion: it is that aspect of mind which is described by the common phrase, to have a "heart" for this action or that one. The passions or affections of Will—love and hatred and their derivatives—were to Edwards the basis of religion; reason or judgment was not. Finally, he asserted that the religious affections, of which love was the most important, flowed from a "supernatural sense," communicated directly by God to the regenerate man. In this analysis, based partly upon traditional distinctions and partly upon his own experience, Edwards placed himself in opposition to those thinkers who laid most emphasis upon the element of reason in religion (the Deists and the Unitarians, for example), but he stopped short of the opinion of the Arminians (the followers of Jacobus Arminius, 1560-1609, a Dutch theologian) that the power of accepting or rejecting Divine grace rested in some measure in the Will itself.

The Arminians had long argued that unless the choice between good and evil is conceived of as lying with the individual there can be no real incentive to religion and virtue, they represented a growing opposition to the Calvinistic insistence upon predestination and the election of the few. Edwards' *Freedom of the Will* is a lengthy consideration of this crucial point, in which he proved to his own satisfaction that the Will was passive. Although a man may be able to do what he pleases and so is to some degree free, each volitional act has a cause or motive which is outside his control.

Edwards sought to maintain the glory of the Puritan God and, at the same time, to place some responsibility for conduct upon the individual. How successful he was depends upon his reader's willingness to accept his definition of terms.

Original Sin Defended answered *The Scripture-Doctrine of Original Sin Proposed to a Free and Candid Examination* (1738) by an English clergyman, John Taylor, who had drawn Isaac Watts, John Wesley, and other well-known divines into a controversy. Edwards once more reinforced the Calvinist positions by logical analysis and careful demolition of his opponent's arguments. His chief contributions were an ingenious explanation of general responsibility for Adam's sin, on the ground that all men are to Adam as buds and shoots are to the root or stock of a tree, and a description of the Fall as the withdrawal from man of the inclination toward virtue. At no point in his system was Edwards to be sooner challenged, for his portrayal of man's depravity and complete selfishness was in sharp contrast with the humanitarian trend of his times.

The glory of God was urged once more in the *Two Dissertations*. God created the world because of a "disposition to communicate His own fulness." "The beams of glory come from God, are something of God, and are refunded back again to their original." Virtue is "disinterested benevolence," a kind of beauty, exceedingly rare in man and attainable only by the grace of God. The discussion, as Professor Faust has shown, is closely related to the thought of the period, especially to Francis Hutcheson's *Inquiry into the Original of Our Ideas of Beauty and Virtue* (1725).

Doctrinally, in short, Edwards was at one with Thomas Shepard, and the title of *The Sincere Convert* (see p. 128) can stand for Edwards' theology as readily as for Shepard's. There were modifications, to be sure, but the Edwards theology is primarily a powerful reaffirmation, the middle point in the drift from Puritanism to Transcendentalism.

Personal Narrative

Edwards' account of his "new sense of things" was written sometime after 1739, and was first printed in Samuel Hopkins' *Life and Character of the Late Reverend Mr. Jonathan Edwards* (Boston, 1765). The manuscript has been lost. The "Personal Narrative" is much admired as one of the most glowing yet lucid descriptions of mystic experience in American literature. The invariable steps of conversion—a conviction of sin, a recognition of the justice and absolute sovereignty of God, and a surrender to Him—are followed by a description of results which most of us, whatever our faith, can find enviable. The exhilaration of the spirit which Edwards describes is what he lived for; his is one of the most vivid testimonies to the integrating power of religious ecstasy.

I had a variety of concerns and exercises about my soul from my childhood, but had two more remarkable seasons of awakening, before I met with that change by which I was brought to those new dispositions, and that new sense of things, that I have since had. The first time was when I was a boy, some years before I went to college, at a time of remarkable awakening in my father's congregation. I was then very much affected for many months, and concerned about the things of religion, and my soul's salvation, and was abundant in duties. I used to pray five times a day in secret, and to spend much time in religious talk with other boys, and used to meet with them to pray together. I experienced I know not what kind of delight in religion. My mind was much engaged in it, and had much selfrighteous pleasure; and it was my delight to abound in religious duties. I with some of my schoolmates joined together, and built a booth in a swamp, in a very retired spot, for a place of prayer. And besides, I had particular

secret places of my own in the woods, where I used to retire by myself; and was from time to time much affected. My affections seemed to be lively and easily moved, and I seemed to be in my element when engaged in religious duties. And I am ready to think, many are deceived with such affections, and such a kind of delight as I then had in religion, and mistake it for grace.

But in process of time, my convictions and affections wore off, and I entirely lost all those affections and delights and left off secret prayer, at least as to any constant performance of it; and returned like a dog to his vomit, and went on in the ways of sin. Indeed I was at times very uneasy, especially towards the latter part of my time at college, when it pleased God, to seize me with a pleurisy, in which he brought me nigh to the grave, and shook me over the pit of hell. And yet, it was not long after my recovery, before I fell again into my old ways of sin. But God would not suffer me to go on with any quietness; I had great and violent inward struggles, till, after many conflicts with wicked inclinations, repeated resolutions, and bonds that I laid myself under by a kind of vows to God, I was brought wholly to break off all former wicked ways, and all ways of known outward sin; and to apply myself to seek salvation, and practise many religious duties; but without that kind of affection and delight which I had formerly experienced. My concern now wrought more by inward struggles and conflicts, and selfreflections. I made seeking my salvation the main business of my life. But yet, it seems to me, I sought after a miserable manner; which has made me sometimes since to question, whether ever it issued in that which was saving, being ready to doubt, whether such miserable seeking ever succeeded. I was indeed brought to seek salvation in a manner that I never was before. I felt a spirit to part with all things in the world, for an interest in Christ. My concern continued and prevailed, with many exercising thoughts and inward struggles, but yet it never seemed to be proper to express that concern by the name of terror.

From my childhood up, my mind had been full of objections against the doctrine of God's sovereignty, in choosing whom he would to eternal life, and rejecting whom he pleased, leaving them eternally to perish, and

Text: the Austin edition of the *Works*, 1808 • 61 . . . college-
Edwards entered Yale in 1716

be everlastingly tormented in hell. It used to appear like a horrible doctrine to me. But I remember the time very well, when I seemed to be convinced, and fully satisfied, as to this sovereignty of God, and his justice in thus eternally disposing of men, according to his sovereign pleasure. But never could give an account, how, or by what means, I was thus convinced, nor in the least imagining at the time, nor a long time after, that there was any extraordinary influence of God's Spirit in it; but only that now I saw further, and my reason apprehended the justice and reasonableness of it. However, my mind rested in it, and it put an end to all those cavils and objections. And there has been a wonderful alteration in my mind, with respect to the doctrine of God's sovereignty, from that day to this, so that I scarce ever have found so much as the rising of an objection against it, in the most absolute sense, in God's shewing mercy to whom he will shew mercy, and hardening whom he will. God's absolute sovereignty and justice, with respect to salvation and damnation, is what my mind seems to rest assured of, as much as of any thing that I see with my eyes, at least it is so at times. But I have often, since that first conviction, had quite another kind of sense of God's sovereignty than I had then. I have often since had not only a conviction, but a delightful conviction. The doctrine has very often appeared exceeding pleasant, bright, and sweet. Absolute sovereignty is what I love to ascribe to God. But my first conviction was not so.

The first instance that I remember of that sort of inward, sweet delight in God and divine things that I have lived much in since, was on reading those words, 1 Tim 1:17. *Now unto the King eternal, immortal, invisible, the only wise God, be honor and glory forever and ever. Amen.* As I read the words, there came into my soul, and was as it were diffused through it, a sense of the glory of the Divine Being, a new sense, quite different from any thing I ever experienced before. Never any words of scripture seemed to me as these words did. I thought with myself, how excellent a Being that was, and how happy I should be, if I might enjoy that God, and be rapt up to him in heaven, and be as it were swallowed up in him for ever! I kept saying, and as it were singing over these words of scripture to myself, and went to pray to God that I might enjoy him, and prayed in a manner quite different from what I used to

do, with a new sort of affection. But it never came into my thought that there was any thing spiritual, or of a saving nature in this.

From about that time, I began to have a new kind of apprehensions and ideas of Christ, and the work of redemption and the glorious way of salvation by him. An inward, sweet sense of these things, at times, came into my heart, and my soul was led away in pleasant views and contemplations of them. And my mind was greatly engaged to spend my time in reading and meditating on Christ, on the beauty and excellency of his person, and the lovely way of salvation by free grace in him. I found no books so delightful to me, as those that treated of these subjects. Those words Cant. 11:1, used to be abundantly with me, *I am the Rose of Sharon, and the Lilly of the valleys.* The words seemed to me, sweetly to represent the loveliness and beauty of Jesus Christ. The whole book of Canticles used to be pleasant to me, and I used to be much in reading it, about that time; and found, from time to time, an inward sweetness, that would carry me away, in my contemplations. This I know not how to express otherwise, than by a calm, sweet abstraction of soul from all the concerns of this world, and sometimes a kind of vision, or fixed ideas and imaginations, of being alone in the mountains, or some solitary wilderness, far from all mankind, sweetly conversing with Christ, and wrapt and swallowed up in God. The sense I had of divine things, would often of a sudden kindle up, as it were, a sweet burning in my heart, an ardor of soul, that I know not how to express.

Not long after I first began to experience these things, I gave an account to my father of some things that had passed in my mind. I was pretty much affected by the discourse we had together, and when the discourse was ended, I walked abroad alone, in a solitary place in my father's pasture, for contemplation. And as I was walking there, and looking up on the sky and clouds, there came into my mind so sweet a sense of the glorious *majesty* and *grace* of God, that I know not how to express. I seemed to see them both in a sweet conjunction; *majesty* and *meekness* joined together; it was a sweet, and gentle, and holy *majesty*, and also a *majestic meekness*, an awful sweetness; a high, and great, and holy gentleness.

After this my sense of divine things gradually increased, and became more and more lively, and had

more of that inward sweetness. The appearance of every thing was altered, there seemed to be, as it were, a calm, sweet cast, or appearance of divine glory, in almost every thing. God's excellency, his wisdom, his purity and love, seemed to appear in every thing, in the sun, moon, and stars, in the clouds, and blue sky, in the grass, flowers, trees, in the water, and all nature, which used greatly to fix my mind. I often used to sit and view the moon for continuance; and in the day, spent
10 much time in viewing the clouds and sky, to behold the sweet glory of God in these things, in the mean time, singing forth, with a low voice, my contemplations of the Creator and Redeemer. And scarce any thing, among all the works of nature, was so sweet to me as thunder and lightning, formerly, nothing had been so terrible to me. Before, I used to be uncommonly terrified with thunder, and to be struck with terror when I saw a thunder storm rising, but now, on the contrary, it rejoiced me. I felt God, so to speak, at the first appearance
20 of a thunder storm, and used to take the opportunity, at such times, to fix myself in order to view the clouds, and see the lightnings play, and hear the majestic and awful voice of God's thunder, which oftentimes was exceedingly entertaining, leading me to sweet contemplations of my great and glorious God. While thus engaged, it always seemed natural to me to sing, or chant for my meditations, or, to speak my thoughts in soliloquies with a singing voice.

I felt then great satisfaction, as to my good state, but
30 that did not content me. I had vehement longings of soul after God and Christ, and after more holiness, wherewith my heart seemed to be full, and ready to break, which often brought to my mind the words of the Psalmist, Psal cxix 28 *My soul breaketh for the longing it hath*. I often felt a mourning and lamenting in my heart, that I had not turned to God sooner, that I might have had more time to grow in grace. My mind was greatly fixed on divine things, almost perpetually in the contemplation of them. I spent most of my time in
40 thinking of divine things, year after year, often walking alone in the woods, and solitary places, for meditation, soliloquy, and prayer, and converse with God; and it was always my manner, at such times, to sing forth my contemplations. I was almost constantly in ejaculatory prayer, wherever I was. Prayer seemed to be natural to me, as the breath by which the inward burnings of my

heart had vent. The delights which I now felt in the things of religion, were of an exceeding different kind from those before mentioned, that I had when a boy, and what I then had no more notion of, than one born blind has of pleasant and beautiful colors. They were of a more inward, pure, soul-animating and refreshing nature. Those former delights never reached the heart and did not arise from any sight of the divine excellency of the things of God, or any taste of the soulsatisfying and life-giving good there is in them.

My sense of divine things seemed gradually to increase, until I went to preach at Newyork, which was about a year and a half after they began, and while I was there, I felt them, very sensibly, in a much higher degree than I had done before. My longings after God and holiness, were much increased. Pure and humble, holy and heavenly Christianity, appeared exceeding amiable to me. I felt a burning desire to be in every thing a complete Christian, and conform to the blessed image of Christ, and that I might live, in all things, according to the pure, sweet and blessed rules of the gospel. I had an eager thirsting after progress in these things; which put me upon pursuing and pressing after them. It was my continual strife day and night, and constant inquiry, how I should *be* more holy, and *live* more holily, and more becoming a child of God, and a disciple of Christ. I now sought an increase of grace and holiness, and a holy life, with much more earnestness, than ever I sought grace before I had it. I used to be continually examining myself, and studying and contriving for likely ways and means, how I should live holily, with far greater diligence and earnestness, than ever I pursued any thing in my life; but yet with too great a dependance on my own strength, which afterwards proved a great
50 damage to me. My experience had not then taught me, as it has done since, my extreme feebleness and impotence, every manner of way; and the bottomless depths of secret corruption and deceit there was in my heart. However, I went on with my eager pursuit after more holiness, and conformity to Christ.

The heaven I desired was a heaven of holiness; to be with God, and to spend my eternity in divine love, and

58 I Newyork. He was in New York from August 1722 until April 1723. Little is known about his ministry beyond what he says in this account.

holy communion with Christ. My mind was very much taken up with contemplations on heaven, and the enjoyments there, and living there in perfect holiness, humility and love. And it used at that time to appear a great part of the happiness of heaven, that there the saints could express their love to Christ. It appeared to me a great clog and burden, that what I felt within, I could not express as I desired. The inward ardor of my soul, seemed to be hindered and pent up, and could not freely flame out as it would. I used often to think, how in heaven this principle should freely and fully vent and express itself. Heaven appeared exceedingly delightful, as a world of love, and that all happiness consisted in living in pure, humble, heavenly, divine love.

I remember the thoughts I used then to have of holiness, and said sometimes to myself, "I do certainly know that I love holiness, such as the gospel prescribes." It appeared to me, that there was nothing in it but what was ravishingly lovely, the highest beauty and amiableness—a *divine* beauty, far purer than any thing here upon earth, and that every thing else was like mire and defilement, in comparison of it.

Holiness, as I then wrote down some of my contemplations on it, appeared to me to be of a sweet, pleasant, charming, serene, calm nature, which brought an inexpressible purity, brightness, peacefulness and rapture to the soul. In other words, that it made the soul like a field or garden of God, with all manner of pleasant flowers, all pleasant, delightful, and undisturbed, enjoying a sweet calm, and the gently vivifying beams of the sun. The soul of a true Christian, as I then wrote my meditations, appeared like such a little white flower as we see in the spring of the year, low and humble on the ground, opening its bosom to receive the pleasant beams of the sun's glory, rejoicing as it were in a calm rapture, diffusing around a sweet fragrant; standing peacefully and lovingly, in the midst of other flowers round about, all in like manner opening their bosoms, to drink in the light of the sun. There was no part of creature holiness, that I had so great a sense of its loveliness, as humility, brokenness of heart and poverty of spirit, and there was nothing that I so earnestly longed for. My heart panted after this, to lie low before God, as in the dust, that I might be nothing, and that God might be ALL, that I might become as a little child.

While at Newyork, I was sometimes much affected

with reflections on my past life, considering how late it was before I began to be truly religious; and how wickedly I had lived till then, and once so as to weep abundantly, and for a considerable time together. 50

On *January* 12, 1723 I made a solemn dedication of myself to God, and wrote it down, giving up myself, and all that I had to God, to be for the future in no respect my own, to act as one that had no right to himself, in any respect. And solemnly vowed to take God for my whole portion and felicity; looking on nothing else as any part of my happiness, nor acting as if it were, and his law for the constant rule of my obedience, engaging to fight with all my might, against the world, the flesh and the devil, to the end of my life. But I have reason 60 to be infinitely humbled, when I consider how much I have failed of answering my obligation.

I had then abundance of sweet religious conversation in the family where I lived, with Mr. John Smith and his pious mother. My heart was knit in affection to those in whom were appearances of true piety, and I could bear the thoughts of no other companions, but such as were holy, and the disciples of the blessed Jesus. I had great longings for the advancement of Christ's kingdom in the world, and my secret prayer used to be, in great 70 part, taken up in praying for it. If I heard the least hint of any thing that happened, in any part of the world, that appeared, in some respect or other, to have a favorable aspect on the interest of Christ's kingdom, my soul eagerly caught at it, and it would much animate and refresh me. I used to be eager to read public news letters, mainly for that end, to see if I could not find some news favorable to the interest of religion in the world.

I very frequently used to retire into a solitary place, 80 on the banks of Hudson's river, at some distance from the city, for contemplation on divine things, and secret converse with God; and had many sweet hours there. Sometimes Mr. Smith and I walked there together, to converse on the things of God, and our conversation used to turn much on the advancement of Christ's kingdom in the world, and the glorious things that God would accomplish for his church in the latter days. I had then, and at other times the greatest delight in the holy scriptures, of any book whatsoever. Oftentimes in read- 90 ing it, every word seemed to touch my heart. I felt a harmony between something in my heart, and those

sweet and powerful words. I seemed often to see so much light exhibited by every sentence, and such a refreshing food communicated, that I could not get along in reading; often dwelling long on one sentence, to see the wonders contained in it; and yet almost every sentence seemed to be full of wonders.

I came away from Newyork in the month of April, 1723, and had a most bitter parting with Madam Smith and her son. My heart seemed to sink within me at
10 leaving the family and city, where I had enjoyed so many sweet and pleasant days. I went from Newyork to Weathersfield, by water, and as I sailed away, I kept sight of the city as long as I could. However, that night, after this sorrowful parting, I was greatly comforted in God at Westchester, where we went ashore to lodge, and had a pleasant time of it all the voyage to Saybrook. It was sweet to me to think of meeting dear Christians in heaven, where we should never part more. At Saybrook we went ashore to lodge, on Saturday, and
20 there kept the Sabbath, where I had a sweet and refreshing season, walking alone in the fields.

After I came home to Windsor, I remained much in a like frame of mind, as when at Newyork, only sometimes I felt my heart ready to sink with the thoughts of my friends at Newyork. My support was in contemplations on the heavenly state, as I find in my Diary of May 1, 1723. It was a comfort to think of that state, where there is fulness of joy, where reigns heavenly calm, and delightful love, without alloy; where there
30 are continually the dearest expressions of this love; where is the enjoyment of the persons loved, without ever parting; where those persons who appear so lovely in this world, will really be inexpressibly more lovely and full of love to us. And how sweetly will the mutual lovers join together to sing the praises of God and the Lamb! How will it fill us with joy to think, that this enjoyment, these sweet exercises will never cease, but will last to all eternity! I continued much in the same frame, in the general, as when at Newyork, till I
40 went to Newhaven as tutor to the college: particularly once at Bolton, on a journey from Boston, while walking out alone in the fields. After I went to Newhaven I sunk in religion; my mind being diverted from my eager pursuits after holiness, by some affairs that greatly perplexed and distracted my thoughts.

In September, 1725, I was taken ill at Newhaven, and while endeavoring to go home to Windsor, was so ill at the North Village, that I could go no further; where I lay sick for about a quarter of a year. In this sickness God was pleased to visit me again with the sweet influences of his Spirit. My mind was greatly engaged there in divine, pleasant contemplations, and longings of soul. I observed that those who watched with me, would often be looking out wishfully for the morning, which brought to my mind those words of the psalmist, and which my soul with delight made its own language, *My soul waiteth for the Lord, more than they that watch for the morning, I say, more than they that watch for the morning*; and when the light of day came in at the windows, it refreshed my soul from one morning to another. It seemed to be some image of the light of God's glory.

I remember, about that time, I used greatly to long for the conversion of some that I was concerned with, I could gladly honor them, and with delight be a servant to them, and lie at their feet, if they were but truly holy. But, some time after this, I was again greatly diverted in my mind with some temporal concerns that exceedingly took up my thoughts, greatly to the wounding of my soul, and went on through various exercises, that it would be tedious to relate, which gave me much more experience of my own heart, than ever I had before.

Since I came to this town, I have often had sweet complacency in God, in views of his glorious perfections and the excellency of Jesus Christ. God has appeared to me a glorious and lovely Being, chiefly on the account of his holiness. The holiness of God has always appeared to me the most lovely of all his attributes. The doctrines of God's absolute sovereignty, and free grace, in shewing mercy to whom he would shew mercy; and man's absolute dependance on the operations of God's Holy Spirit, have very often appeared to me as sweet and glorious doctrines. These doctrines have been much my delight. God's sovereignty has ever appeared to me great part of his glory. It has often been my delight to approach God, and adore him as a sovereign God, and ask sovereign mercy of him.

I have loved the doctrines of the gospel; they have been to my soul like green pastures. The gospel has seemed to me the richest treasure; the treasure that I have most desired, and longed that it might dwell richly in me. The way of salvation by Christ has appeared, in a general way, glorious and excellent, most pleasant and most beautiful. It has often seemed to me, that it would in a great measure spoil heaven, to receive it in any other way. That text has often been affecting and delightful to me, Isa. xxxii. 2. *A man shall be an hiding place from the wind, and a covert from the tempest, &c.*

It has often appeared to me delightful, to be united to Christ; to have him for my head, and to be a member of his body, also to have Christ for my teacher and prophet. I very often think with sweetness, and longings, and pantings of soul, of being a little child, taking hold of Christ, to be led by him through the wilderness of this world. That text, Matth. xviii. 3, has often been sweet to me, *except ye be converted and become as little children, &c.* I love to think of coming to Christ, to receive salvation of him, poor in spirit, and quite empty of self, humbly exalting him alone; cut off entirely from my own root, in order to grow into, and out of Christ; to have God in Christ to be all in all; and to live by faith on the son of God, a life of humble, unfeigned confidence in him. That scripture has often been sweet to me, Psal. cxv. 1. *Not unto us, O Lord, not unto us, but unto thy name give glory, for thy mercy, and for thy truth's sake.* And those words of Christ, Luke x. 21. *In that hour Jesus rejoiced in spirit, and said, I thank thee, O Father, Lord of heaven and earth, that thou hast hid these things from the wise and prudent, and hast revealed them unto babes: Even so, Father, for so it seemed good in thy sight.* That sovereignty of God which Christ rejoiced in, seemed to me worthy of such joy; and that rejoicing seemed to show the excellency of Christ, and of what spirit he was

Sometimes, only mentioning a single word caused my heart to burn within me, or only seeing the name of Christ, or the name of some attribute of God. And God has appeared glorious to me, on account of the Trinity. It has made me have exalting thoughts of God, that he subsists in three persons, Father, Son and Holy Ghost. The sweetest joys and delights I have experienced, have not been those that have arisen from a hope of my own

good estate, but in a direct view of the glorious things of the gospel. When I enjoy this sweetness, it seems to carry me above the thoughts of my own estate; it seems at such times a loss that I cannot bear, to take off my eye from the glorious, pleasant object I behold without me, to turn my eye in upon myself, and my own good estate

My heart has been much on the advancement of Christ's kingdom in the world. The histories of the past advancement of Christ's kingdom have been sweet to me. When I have read histories of past ages, the pleasantest thing in all my reading has been, to read of the kingdom of Christ being promoted. And when I have expected, in my reading, to come to any such thing, I have rejoiced in the prospect, all the way as I read. And my mind has been much entertained and delighted with the scripture promises and prophecies, which relate to the future glorious advancement of Christ's kingdom upon earth.

I have sometimes had a sense of the excellent fulness of Christ, and his meetness and suitableness as a Saviour; whereby he has appeared to me, far above all, the chief of ten thousands. His blood and atonement have appeared sweet, and his righteousness sweet; which was always accompanied with ardency of spirit, and inward strugglings and breathings, and groanings that cannot be uttered, to be emptied of myself, and swallowed up in Christ.

Once, as I rode out into the woods for my health, in 1737, having alighted from my horse in a retired place, as my manner commonly has been, to walk for divine contemplation and prayer, I had a view that for me was extraordinary, of the glory of the Son of God, as Mediator between God and man, and his wonderful, great, full, pure and sweet grace and love, and meek and gentle condescension. This grace that appeared so calm and sweet, appeared also great above the heavens. The person of Christ appeared ineffably excellent with an excellency great enough to swallow up all thought and conception . . . which continued as near as I can judge, about an hour; which kept me the greater part of the time in a flood of tears, and weeping aloud. I felt an ardency of soul to be, what I know not otherwise how to express, emptied and annihilated; to lie in the dust, and to be full of Christ alone, to love him with a holy

and pure love; to trust in him, to live upon him; to serve and follow him; and to be perfectly sanctified and made pure, with a divine and heavenly purity. I have, several other times, had views very much of the same nature, and which have had the same effects.

I have many times had a sense of the glory of the third person in the Trinity, in his office of Sanctifier, in his holy operations, communicating divine light and life to the soul. God, in the communications of his Holy
10 Spirit, has appeared as an infinite fountain of divine glory and sweetness, being full, and sufficient to fill and satisfy the soul, pouring forth itself in sweet communications, like the sun in its glory, sweetly and pleasantly diffusing light and life. And I have sometimes had an affecting sense of the excellency of the word of God, as a word of life, as the light of life, a sweet, excellent, life-giving word; accompanied with a thirsting after that word, that it might dwell richly in my heart.

Often, since I lived in this town, I have had very af-
20 fecting views of my own sinfulness and vileness, very frequently to such a degree as to hold me in a kind of loud weeping, sometimes for a considerable time together, so that I have often been forced to shut myself up. I have had a vastly greater sense of my own wickedness, and the badness of my heart, than ever I had before my conversion. It has often appeared to me, that if God should mark iniquity against me, I should appear the very worst of all mankind, of all that have been, since the beginning of the world to this time, and
30 that I should have by far the lowest place in hell. When others, that have come to talk with me about their soul concerns, have expressed the sense they have had of their own wickedness, by saying that it seemed to them, that they were as bad as the devil himself; I thought their expression seemed exceeding faint and feeble, to represent my wickedness.

My wickedness, as I am in myself, has long appeared to me perfectly ineffable, and swallowing up all thought and imagination; like an infinite deluge, or mountains
40 over my head. I know not how to express better what my sins appear to me to be, than by heaping infinite upon infinite, and multiplying infinite by infinite. Very often, for these many years, these expressions are in my mind, and in my mouth, "Infinite upon infinite . . . Infinite upon infinite!" When I look into my heart, and take a view of my wickedness, it looks like an abyss

infinitely deeper than hell. And it appears to me, that were it not for free grace, exalted and raised up to the infinite height of all the fulness and glory of the great Jehovah, and the arm of his power and grace stretched forth in all the majesty of his power, and in all the glory of his sovereignty, I should appear sunk down in my sins below hell itself; far beyond the sight of everything, but the eye of sovereign grace, that can pierce even down to such a depth. And yet it seems to me that my conviction of sin is exceeding small, and faint, it is enough to amaze me, that I have no more sense of my sin. I know certainly, that I have very little sense of my sinfulness. When I have had turns of weeping and crying for my sins I thought I knew at the time, that my repentance was nothing to my sin.

I have greatly longed of late, for a broken heart, and to lie low before God, and, when I ask for humility, I cannot bear the thoughts of being no more humble than other Christians. It seems to me, that though their degrees of humility may be suitable for them, yet it would be a vile self-exaltation in me, not to be the lowest in humility of all mankind. Others speak of their longing to be "humbled to the dust," that may be a proper expression for them, but I always think of myself, that I ought, and it is an expression that has long been natural for me to use in prayer, "to lie infinitely low before God." And it is affecting to think, how ignorant I was, when a young Christian, of the bottomless, infinite depths of wickedness, pride, hypocrisy and deceit, left in my heart.

I have a much greater sense of my universal, exceeding dependence on God's grace and strength, and mere good pleasure, of late, than I used formerly to have, and have experienced more of an abhorrence of my own righteousness. The very thought of any joy arising in me, on any consideration of my own amiableness, performances, or experiences, or any goodness of heart or life, is nauseous and detestable to me. And yet I am greatly afflicted with a proud and self-righteous spirit much more sensibly than I used to be formerly. I see that serpent rising and putting forth its head continually every where, all around me.

Though it seems to me, that, in some respects, I was a far better Christian, for two or three years after my first conversion, than I am now; and lived in a more constant delight and pleasure, yet, of late years, I have

had a more full and constant sense of the absolute sovereignty of God, and a delight in that sovereignty; and have had more of a sense of the glory of Christ, as a Mediator revealed in the gospel. On one Saturday night, in particular, I had such a discovery of the excellency of the gospel above all other doctrines, that I could not but say to myself, "This is my chosen light, my chosen doctrine;" and of Christ, "This is my chosen Prophet." It appeared sweet, beyond all expression, to follow Christ, and to be taught, and enlightened, and instructed by him, to learn of him, and live to him. Another Saturday night, (*January*, 1739) I had such a sense, how sweet and blessed a thing it was to walk in the way of duty; to do that which was right and meet

to be done, and agreeable to the holy mind of God; that it caused me to break forth into a kind of loud weeping, which held me some time, so that I was forced to shut myself up, and fasten the doors. I could not but, as it were, cry out, "How happy are they which do that which is right in the sight of God! They are blessed indeed, 20 they are the happy ones!" I had, at the same time, a very affecting sense, how meet and suitable it was that God should govern the world, and order all things according to his own pleasure, and I rejoiced in it, that God reigned, and that his will was done.

1739?·1808

12 January, 1739, the only clue to the date of composition

Of Being

"Of Being" was written sometime between 1717 and 1720, shortly after Edwards had read for the first time John Locke's *Essay Concerning Human Understanding*. Locke Book II, Chapter 8j had said that "the ideas of primary qualities of bodies [i.e., solidity, extension, figure, motion or rest, and number] are resemblances of them, and their patterns do really exist in the bodies themselves; but the ideas produced in us by . . . secondary qualities [i.e., colors, sounds, tastes, etc.] have no resemblance of them at all. There is nothing like our ideas existing in the bodies themselves." Primary qualities, he continued (Chapter 23), are the chief basis of our ideas of corporeal substance, which can be no more and no less clear than our ideas of immaterial substance. Edwards, taking up the discussion at this point, concludes that what Locke called primary qualities depend, no less than those he called secondary, upon the perceiving mind. In other words, like George Berkeley, Edwards makes consciousness the only reality, transfers all

"being" to the mind, and arrives at the basic principle of the philosophical system known as subjective idealism.

That there should absolutely be nothing at all is utterly impossible, the Mind Can never Let it stretch its Conceptions ever so much bring it self to Conceive of a state of Perfect nothing, it put's the mind into mere Convulsion and Confusion to endeavour to think of such a state, and it Contradicts the very nature of the soul to think that it should be, and it is the Greatest Contradiction and the Aggregate of all Contradictions to say that there should not be, tis true we Cant so Distinctly show the Contradiction by words because we Cannot talk about it without Speaking horrid Nonsense and Contra- 10 dicting our selve at every word, and because nothing is that whereby we Distinctly show other particular Contradictions, but here we are Run up to Our first principle and have no other to explain the Nothingness or not being of nothing by, indeed we Can mean nothing else by nothing but a state of Absolute Contradiction; and If any man thinks that he Can think well Enough how there should be nothing I'll Engage that what he means by nothing is as much something as any thing that ever He thought of in his Life, and I believe that if 20 he knew what nothing was it would be intuitively Evident to him that it Could not be. So that we see it is necessary some being should Eternally be and tis a more palpable Contradiction still to say that there must be

being somewhere and not elsewhere for the words absolute nothing, and where, Contradict each other, and besides it Gives as great a shock to the mind to thin[k] of pure nothing being in any one place, as it Does to think of it in all and it is self evident that there Can be nothing in one place as well as in another and so if there Can be in one there Can be in all. So that we see this necessary eternall being must be infinite and Omnipresent. This Infinite And omnipresent being Cannot be solid.

10 Let us see how Contradictory it is to say that an infinite being is solid, for Solidity surely is nothing but Resistance to other solidities.

Space is this Necessary eternal infinite and Omnipresent being, we find that we can with ease Conceive how all other beings should not be, we Can remove them out of our Minds and Place some Other in the Room of them, but Space is the very thing that we Can never Remove, and Conceive of its not being, If a man would imagine space any where to be Divided So as
20 there should be Nothing between the Divided parts, there Remains Space between notwithstanding and so the man Contradicts himself, and it is self evident I believe to every man that space is necessary, eternal, infinite, & Omnipresent. but I had as Good speak Plain, I have already said as much as that Space is God, and it is indeed Clear to me, that all the Space there is not proper to body, all the space there is without y^e Bounds of the Creation. all the space there was before the Creation, is God himself, and no body would in the Least
30 stick at it if it were not because of the Gross Conceptions that we have of space.

A state of Absolute nothing is a state of Absolute Contradiction absolute nothing is the Aggregate of all the Absurd [?] contradictions in the World, a state wherein there is neither body nor spirit, nor space neither empty space nor full space neither little nor Great, narrow nor broad neither infinitely Great space, nor finite space, nor a mathematical point neither Up nor Down neither north nor south (I dont mean as it is with Respect to the body of the earth or some other Great body
40 but no Contrary Point, nor Positions or Directions []) no such thing as either here Or there this way or that way or only one way; When we Go About to form an idea of Perfect nothing we must shut Out all these things we must shut out of our minds both space that has something in it and space that has nothing in it we

must not allow our selves to think of the least part of space never so small, nor must we suffer our thoughts to take sanctuary in a mathematical point, when we Go to Expell body out of Our thoughts we must Cease not to leave empty space in the Room of it and when we Go to Expell emptiness from Our thoughts we must not think to squeeze it out by any thing Close hard and solid but we must think of the same that the sleeping Rocks Dream of and not till then shall we Get a Compleat idea of nothing

a state of nothing is a state wherein every Proposition in Euclid is not true, nor any of those self evident maxims by which they are Demonstrated & all other Eternal truths are neither true nor false

when we Go to Enquire whether or no there Can be absolutely nothing we speak nonsense in Enquiring the stating of the Question is Nonsense because we make a disjunction where there is none either being or absolute nothing is no Disjunction no more than whether a t[r]iangle is a triangle or not a triangle there is no other way but Only for there to be existence there is no such thing as absolute nothing. There is such a thing as nothing with Respect to this Ink & paper there is such a thing as nothing with Respect to you & me there is such a thing as nothing with Respect to this Globe of Earth & with Respect to this Created universe there is another way besides these things having existence but there is no such thing as nothing with Respect to Entity or being absolutely Considered we don't know what we say if we say we think it Possible in it self that there should not be Entity

and how Doth it Grate upon the mind to thin[k] that something should be from all Eternity, and nothing all the while be Conscious of it let us suppose to illustrate it that the world had a being from all Eternity, and had many Great Changes and Wonderfull Revolutions, and all the while nothing knew, there was no knowledge in the Universe of any such thing, how is it possible to bring the mind to imagine, yea it is Really impossible it should be that Any thing should be and nothing know it then you'll say if it be so it is because nothing has

Text follows the transcription of the manuscript by Professor E. C. Smyth, printed in *Proceedings of the American Antiquarian Society*, New Series, X 1895 • 8 Omnipresent. Interpolations and marginal notes in the manuscript suggest that Edwards regarded what he had said so far as a preliminary proposition to be demonstrated more fully

Any existence any where else but in Consciousness no certainly no where else but either in Created or un-created Consciousness Supposing there were Another Universe only of bodies Created at a Great Distance from this Created in excellent Order and harmonious motions, and a beautifull variety, and there was no Created intelligence in it nothing but senseless bodies, nothing but God knew anything of it I Demand in what Respect this world has a being but only in the Divine Consciousness Certainly in no Respect there would be figures and magnitudes, and motions and Proportions but where where Else but in the almighty's knowledge how is it possible there should, then you'll say for the same Reason in a Room Close Shut Up that no body sees nor hears nothing in it there is nothing any other-way than in Gods knowledge I answer Created beings are Conscious of the Effects of what is in the Room, for Perhaps there is not one leaf of a tree nor Spire of Grass but what has effects All over the universe and
20 will have to the End of Eternity but any otherwise there is nothing in a Room shut up but only in Gods Consciousness how Can Any thing be there Any other way this will appear to be truly so to Any one that thinks of it with the whole united strength of his mind. Let us suppose for illustration this impossibility that all the Spirits in the Universe to be for a time to be Deprived of their Consciousness, and Gods Consciousness at the same time to be intermitted. I say the Universe for that time would cease to be of it self and not only as we speak because the almighty Could not attend to Uphold the world but because God knew nothing of it tis our foolish imagination that will not suffer us to see we fancy there may be figures and magnitudes Relations and properties without any ones knowing of it, but it is our imagination hurts us we Dont know what figures and Properties Are.

Our imagination makes us fancy we see Shapes an Colours and magnitudes tho no body is there to behold it but to help our imagination Let us thus State the Case, Let us suppose the world Deprived of Every Ray of light so that there should not be the least Glimering of light in the Universe Now all will own that in such Case the Universe would be immediately Really Deprived of all its Colours, one part of the Universe is no More Red or blue, or Green or Yellow or black or white or light or dark or transparent or opake there would

be no visible Distinction between the world and the Rest of the incomprehensible Void yea there would be no Difference in these Respect between the world and the infinite void that is any Part of that void would really
50 be as light and as Dark, as white and as black as Red and Green as blue and as brown as transparent and as opake as Any Part of the universe, or as there would be in such Case no Difference between the world and nothing in these Respects so there would be no Difference between one part of the world and another all in these Respects is alike confounded with and undistinguishable from infinite emptiness

At the same time also Let us suppose the Universe to be altogether Deprived of motion, and all parts of it to
60 be at perfect Rest (the same supposition is indeed included in this but we Distinguish them for better Clearness) then the Universe would not Differ from the void in this Respect, there will be no more motion in one than the other then also solidity would cease, all that we mean or Can be meant by solidity is Resistance Resistance to touch, the Resistance of some parts of Space, this is all the knowledge we Get of solidity by our senses and I am sure all that we Can Get any other way, but solidity shall be shown to be nothing Else more
70 fully hereafter but there Can be no Resistance if there is no motion, one body Can [not] Resist another when there is perfect Rest Amongst them, but you'll say tho there is not actuall Resistance yet there is potential existence, that is such and such Parts of space would Resist upon occasion, but this Is all I would have that there is no solidity now not but that God would Cause there to be on occasion and if there is no solidity there is no extension for extension is the extenddness of the solidity, then all figure, and magnitude and proportion im-
80 mediately Ceases put both these suppositions together that is Deprive the world of light and motion and the Case would stand thus with the world, there would [be] neither white nor black neither blew nor brown, bright nor shaded pellucid nor opake, no noise or sound neither heat nor Cold, neither fluid nor Wet nor Drie hard nor soft nor solidity nor Extension, nor figure, nor magnitude nor Proportion nor body nor spirit, what then [is] to become of the Universe Certainly it exists no where but in the Divine mind this will be Abundantly Clearer
90 to one after having Read what I have further to say of solidity &c.

So that we see that a world without motion Can Exist
no where Else but in the mind either infinite or finite
Corollary, it follows from hence that those beings which
have knowledge and Consciousness are the Only Proper
and Real And substantial beings, inasmuch as the being

of other things is Only by these from hence we may
see the Gross mistake of those who think material things
the most substantial beings and spirits more like a
shadow, whereas spirits Only Are Properly Substance
1720²-1895

A Divine and Supernatural Light

Immediately Imparted to the Soul by the Spirit of
God, Shown to Be Both a Scriptural, and Rational
Doctrine; in a Sermon Preached at Northampton

This sermon was preached in August 1733 and published
in Boston the following year. In form it follows the well-
established "doctrine-reasons-uses" pattern, but it is re-
markable for its ease and clarity and for its exposition of
what was the central feature of Edwards' thought: the
reality of supernatural principles communicated by God
to the redeemed soul. The confidence in intuitive knowl-
edge looks forward to that of Emerson and the other Tran-
scendentalists two generations later (see pp. 715-720), and
lends weight to the argument that much of the philosophy
of the nineteenth century had its roots in Puritanism.

MATTHEW xvi. 17. *And JESUS answered and said
unto him, blessed art thou Simon Bar-jona: for
Flesh and Blood hath not revealed it unto thee, but
my Father which is in Heaven.*

CHRIST says these Words to *Peter*, upon Occasion of
his professing his Faith in him as the Son of GOD. Our
Lord was enquiring of his Disciples, who Men said he
was; not that he needed to be informed, but only to
introduce and give Occasion to what follows. They an-
swer, that some said he was *John the Baptist*, and some

Elias, and others *Jeremias* or one of the Prophets. When
they had thus given an Account who others said he was,
CHRIST asks them, who they said he was. *Simon Peter*,
whom we find always zealous and forward, was the first
to answer; he readily replied to the Question, *Thou art
CHRIST the Son of the living GOD.*

UPON this Occasion CHRIST says as he does to him and
of him in the Text: In which we may observe,

1 THAT *Peter* is pronounced blessed on this Account
Blessed art thou—"Thou art an happy man, that thou art
"not ignorant of this, that I am CHRIST the son of the
"living God. Thou art distinguishingly happy. Others
"are blinded, and have dark and deluded Apprehen-
"sions, as you have now given an Account, some think-
"ing that I am *Elias*, and some that I am *Jeremias*, and
"some one thing, and some another, but none of them
"thinking right, all of them misled. Happy art thou
"that art so distinguished as to know the Truth in this
"Matter.

2 THE Evidence of this his Happiness declared, viz.
That GOD and he only had revealed it to him. This is an
Evidence of his being *blessed*.

First, As it shows how peculiarly favoured he was of
GOD, above others. *q.d.* "How highly favored art thou
"that others that are wise and great Men, the Scribes
"Pharisees, and Rulers, and the Nation in general, are
"left in Darkness, to follow their own misguided Appre-
"hensions, and that thou should'st be singled out, as it
"were by Name, that my heavenly Father should thus
"set his Love on thee *Simon Bar-jona*. This argues
"thee *blessed*, that thou should'st thus be the Object of
"GOD's distinguishing Love.

Text the first edition, Boston, 1734 • 6 John the Baptist . . . Elias . . .
Jeremias. Herod had said that Jesus was John the Baptist risen from the
dead (Matthew 14 2, Luke 9 7), it was also supposed by some that
Elijah or *Jeremiah* or some other Old Testament prophet was risen
(Luke 9 8)

Secondly, IT evidences his Blessedness also, as it intimates that this Knowledge is above any that *Flesh and Blood* can reveal. "This is such Knowledge as my *Father* *which is in heaven* only can give. It is too high and excellent to be communicated by such Means as other Knowledge is Thou art *blessed*, that thou knowest that which GOD alone can teach thee.

THE Original of this Knowledge is here declared, both negatively and positively. *Positively*, as GOD is here declared the Author of it *Negatively*, as 'tis declared that *Flesh and Blood* had not revealed it. GOD is the Author of all Knowledge and Understanding whatsoever He is the Author of the Knowledge, that is obtained by human Learning He is the Author of all moral Prudence, and of the Knowledge and Skill that Men have in their secular Business. Thus it is said of all in *Israel* that were *wise-behaved*, and skill'd in Embroidering, that GOD had fill'd them with the spirit of *Wisdom*. Exod. 28. 3.

GOD is the Author of such Knowledge, but yet not so but that *Flesh and Blood* reveals it. Mortal Men are capable of imparting the Knowledge of human Arts and Sciences, and Skill in temporal Affairs. GOD is the Author of such Knowledge by those Means. *Flesh and Blood* is made use of by GOD as the *mediate* or *second* Cause of it, He conveys it by the Power and Influence of natural Means. But this spiritual Knowledge, spoken of in the Text, is what *God* is the Author of, and none else He reveals it and *Flesh and Blood* reveals it not. He imparts this Knowledge immediately, not making use of any intermediate natural Causes, as he does in other Knowledge.

What had passed in the preceding Discourse naturally occasioned CHRIST to observe this, because the Disciples had been telling, how others did not know him, but were generally mistaken about him, and divided and confounded in their Opinions of him, but *Peter* had declared his assured Faith that he was the *Son of GOD*. Now it was natural to observe, how it was not *Flesh and Blood* that had revealed it to him, but GOD, for if this knowledge were dependent on natural Causes or Means, how came it to pass that they, a Company of poor Fishermen, illiterate Men, and Persons of low Education, attain'd to the knowledge of the Truth; while the Scribes and Pharisees, Men of vastly higher advantages, and greater knowledge and sagacity in other matters, remain'd in Ignorance? This could be owing only to the

gracious distinguishing Influence and Revelation of the SPIRIT of GOD. Hence, what I would make the Subject of my present Discourse from these Words, is this

DOCTRINE, VIZ

That there is such a thing, as A SPIRITUAL and DIVINE 50
LIGHT, immediately imparted to the Soul by GOD, of a different Nature from any that is obtain'd by natural Means.

IN what I say on this Subject at this Time, I would

I SHOW what this *divine Light* is

II. HOW it is given *Immediately* by GOD, and not obtain'd by natural Means.

III. SHOW the Truth of the Doctrine

AND then conclude with a brief Improvement

I I would show *what this* spiritual and divine Light 60
is. And in order to it would show,

First. IN a few things *what it is not*. And here,

1. THOSE *Convictions* that natural Men may have of *their Sin and Misery* is not *this* spiritual and divine Light Men in a natural Condition may have Convictions of the Guilt that lies upon them, and of the anger of GOD, and their Danger of divine Vengeance Such Convictions are from *Light* or Sensibleness of Truth That some Sinners have a greater Conviction of their Guilt and Misery than others, is because some have more 70
Light, or more of an Apprehension of Truth than others And this *Light* and Conviction may be from the Spirit of GOD; *the SPIRIT convinces Men of Sin*: but yet nature is much more concern'd in it than in the Communication of that *spiritual and divine Light* that is spoken of in the *Doctrine*; 'tis from the Spirit of GOD only as assisting *natural Principles*, and not as infusing any new *Principles*. *Common Grace* differs from *special*, in that it influences only by assisting of *Nature*: and not by imparting *Grace*, or bestowing any thing *above* Nature. 80
The *Light* that is obtain'd, is wholly *natural*, or of no superiour *Kind* to what meer *Nature* attains to, tho' more of *that kind* be obtained, than would be obtained if Men were left wholly to themselves. Or in other Words, *Common Grace* only assists the Faculties of the Soul to do that more fully, which they do by *Nature*; as *natural* Conscience, or Reason, will by meer *Nature* make a Man sensible of Guilt, and will accuse and condemn him when he has done amiss. Conscience is a

Principle natural to Men, and the Work that it doth *naturally*, or of itself, is to give an Apprehension of *right* and *wrong*; and to suggest to the Mind the Relation that there is between right and wrong, and a Retribution. The Spirit of GOD, in those Convictions which unregenerate Men sometimes have, assists Conscience to do this Work in a further Degree, than it would do if they were left to themselves: He helps it against those Things that tend to stupify it, and obstruct its Exercise. But in the
 10 *renewing* and *sanctifying* work of the HOLY GHOST, those things are wrought in the Soul that are *above* Nature, and of which there is nothing of the like kind in the Soul *by* Nature; and they are caused to exist in the Soul habitually, & according to such a stated Constitution or Law, that lays such a Foundation for Exercises in a continued Course, as is called a *Principle* of nature. Not only are remaining *Principles* assisted to do their work more freely and fully, but those *Principles* are restored that were utterly destroyed by the Fall, and the
 20 mind thence-forward habitually exerts those acts that the Dominion of Sin had made it as wholly destitute of, as a dead Body is of vital Acts.

THE Spirit of GOD acts in a very different manner in the one Case, from what he doth in the other. He may indeed act *upon* the Mind of a natural Man, but he acts *in* the Mind of a Saint as an *indwelling vital Principle*. He acts upon the Mind of an unregenerate Person as an *extrinsic occasional Agent*; for in acting upon them he doth not unite himself to them, for notwithstanding all
 30 his Influences that they may be the Subjects of, they are still *sensual having not the Spirit*. Jude 19. But he unites himself with the Mind of a Saint, takes him for his Temple, actuates and influences him as a new, *super-natural Principle* of Life and Action. There is this Difference, that the Spirit of GOD in acting in the Soul of a Godly Man, exerts and communicates himself there in his own proper Nature. Holiness is the proper Nature of the Spirit of GOD. The HOLY SPIRIT operates in the Minds of the Godly, by uniting himself to them, and
 40 living in them, and exerting his own Nature in the Exercise of their Faculties. The Spirit of GOD may act upon a Creature, and yet not, in acting communicate himself. The Spirit of GOD may act upon inanimate Creatures; as the *Spirit moved upon the Face of the Waters*, in the Beginning of the Creation. So the Spirit of GOD may act upon the minds of Men, many ways,

and communicate himself no more than when he acts upon an inanimate Creature. *For Instance*. He may excite Thoughts in them, may assist their natural Reason and Understanding, or may assist other natural Principles, and this without any Union with the Soul, but may act, as it were, as upon an external Object. But as he acts in his holy Influences, and spiritual Operations, he acts in a way of peculiar Communication of himself, so that the Subject is thence denominated *Spiritual*.

2. THIS spiritual and divine Light *don't consist in any Impression made upon the Imagination*. 'Tis no *Impression* upon the Mind, as tho' one saw any thing with the bodily Eyes: 'Tis no *Imagination* or *Idea* of an outward *Light* or *Glory*, or any *Beauty* of *Form* or *Countenance*, or a visible *Lustre* or *Brightness* of any Object. The *Imagination* may be strongly impress'd with such things, but this is not *spiritual Light*. Indeed when the Mind has a lively Discovery of spiritual things, and is greatly affected by the Power of divine Light, it may, and probably very commonly doth, much affect the *Imagination*: So that *Impressions* of an outward *Beauty* or *Brightness*, may accompany those spiritual Discoveries. But *spiritual Light* is not that *Impression upon the Imagination*, but an exceeding different thing from it. Natural Men may have lively *Impressions* on their *Imaginations*; and we cant determine but that the Devil, *who transforms himself into an Angel of Light*, may cause *Imaginations* of an outward *Beauty*, or visible *Glory*, and of *Sounds* and *Speeches*, and other such Things; but these are Things of a vastly inferiour Nature to *Spiritual Light*.

3. THIS spiritual Light *is not the suggesting of any new Truths, or Propositions not contain'd in the Word of GOD*. This suggesting of new Truths or Doctrines to the Mind, independent of any antecedent Revelation of those Propositions, either in Word or Writing, is Inspiration; such as the Prophets and Apostles had, and such as some Enthusiasts pretend to. But this *spiritual Light* that I am speaking of, is quite a different thing from Inspiration: It reveals no new Doctrine, it suggests no new Proposition to the Mind, it teaches no new thing of GOD, or CHRIST, or another World, not taught in the Bible; but only gives a due Apprehension of those things that are taught in the word of GOD.

4. 'Tis not every affecting View that Men have of the Things of Religion, that is this spiritual and divine

Light Men by meer Principles of Nature are capable of being *affected* with Things that have a special Relation to Religion, as well as other Things. A Person by meer Nature, for Instance, may be liable to be *affected* with the Story of JESUS CHRIST, and the sufferings he underwent, as well as by any other tragical Story. He may be the more *affected* with it from the Interest he conceives Mankind to have in it: Yea he may be *affected* with it without believing it; as well as a Man may be *affected* with what he reads in a Romance, or see's acted in a Stage Play. He may be *affected* with a lively and eloquent description of many pleasant things that attend the state of the Blessed in Heaven; as well as his Imagination be entertain'd by a romantick description of the pleasantness of Fairy Land, or the like. And that common belief of the truth of *the things of Religion*, that Persons may have from Education, or otherwise, may help forward their *affection*. We read in Scripture of many that were greatly *affected* with things of a religious nature, who yet are there represented as wholly graceless, and many of them very ill Men. A Person therefore may have *affecting views of the things of Religion*, and yet be very destitute of *spiritual Light*. *Flesh and Blood* may be the Author of this. One Man may give another an *affecting view* of divine things with but common assistance, but GOD alone can give a *spiritual* Discovery of them.

BUT I proceed to show,

Secondly, Positively, WHAT *this* spiritual and divine light is.

AND it may be thus described, *A true sense of the divine Excellency of the things revealed in the Word of GOD, and a conviction of the truth and reality of them, thence arising.*

THIS *spiritual Light* primarily consists in the former of these, *viz.* a real sense and apprehension of the divine Excellency of things revealed in the Word of GOD. A spiritual and saving Conviction of the truth and reality of these things, arises from such a sight of their divine Excellency and Glory; so that this Conviction of their truth is an effect and natural consequence of this sight of their divine Glory. There is therefore in this *spiritual Light*.

1. *A true sense of the divine and superlative excellency of the things of Religion*; a real sense of the excellency of GOD and JESUS CHRIST, and of the work of Redemption, and the ways and works of GOD revealed

in the Gospel. There is a *divine* and *superlative* Glory in these things; an Excellency that is of a vastly higher Kind, and more sublime Nature, than in other things, a Glory greatly distinguishing them from all that is earthly and temporal. He that is spiritually *enlightened* truly apprehends and sees it, or has a sense of it. He don't meerly rationally believe that GOD is Glorious, but he has a sense of the Gloriousness of GOD in his Heart. There is not only a rational belief that GOD is holy, and that Holiness is a good thing, but there is a sense of the Loveliness of GOD's Holiness. There is not only a speculatively judging that GOD is gracious, but a sense how amiable GOD is upon that Account, or a sense of the Beauty of this divine Attribute.

THERE is a twofold Understanding or Knowledge of Good that GOD has made the Mind of Man capable of. The *First*, that which is meerly *speculative* and *notional*: As when a Person only speculatively judges, that any thing is, which by the Agreement of Mankind, is called Good or Excellent, *viz.* that which is most to general Advantage, and between which and a Reward there is a suitableness; and the like. And the *other* is that which consists in the sense of the Heart. As when there is a sense of the Beauty, Amiableness, or Sweetness of a thing, so that the Heart is sensible of Pleasure and Delight in the presence of the *Idea* of it. In the *former* is exercised meerly the speculative Faculty, or the Understanding strictly so called, or as spoken of in Distinction from the Will or Disposition of the Soul. In the *latter* the Will, or Inclination, or Heart, are mainly concern'd.

THUS there is a Difference between *having an Opinion* that GOD is holy and gracious, and *having a sense* of the Loveliness and Beauty of that Holiness and Grace. There is a Difference between *having a rational Judgment* that Honey is sweet, and *having a sense* of its sweetness. A Man may have the *Former*, that knows not how honey tastes; but a Man can't have the *Latter* unless he has an *Idea* of the tast of Honey in his Mind. So there is a difference between *believing* that a Person is Beautiful, and *having a sense* of his Beauty. The *Former* may be obtain'd by hear-say, but the *Latter* only by seeing the Countenance. There is a wide difference between meer *speculative, rational Judging* any thing to be excellent, and *having a sense* of its Sweetness, and Beauty. The *Former* rests only in the Head, Speculation only is concern'd in it, but the Heart is concern'd in

the *Latter*. When the Heart is sensible of the Beauty and Amiability of a Thing, it necessarily feels Pleasure in the Apprehension. It is implied in a Persons being heartily sensible of the Loveliness of a thing, that the *Idea* of it is sweet and pleasant to his Soul, which is a far different thing from having a rational Opinion that it is excellent.

2. THERE *arises from this* sense of divine Excellency of Things contain'd in the Word of GOD, a *Conviction* of the Truth and Reality of them: and that either directly, or indirectly.

First, *Indirectly*, and that two ways

1. AS *the Prejudices that are in the Heart, against the truth of divine things, are hereby removed, so that the Mind becomes susceptible of the due Force of rational Arguments for their Truth.* The Mind of Man is naturally full of *Prejudices against the Truth of divine Things*: It is full of Enmity against the Doctrines of the Gospel, which is a disadvantage to those *Arguments* that prove their *Truth*, and causes them to lose their Force upon the Mind. But when a Person has discovered to him the divine excellency of Christian Doctrines, this destroys the Enmity, removes those *Prejudices*, and sanctifies the Reason, and causes it to lie open to the *Force of Arguments for their Truth*.

HENCE was the different Effect that CHRIST'S Miracles had to convince the Disciples, from what they had to convince the Scribes and Pharisees. Not that they had a stronger Reason, or had their Reason more improved; but their Reason was sanctified, and those blinding *Prejudices*, that the Scribes and Pharisees were under, were removed by the sense they had of the Excellency of CHRIST, and his Doctrine

2. IT *not only removes the Hinderances of Reason, but positively helps Reason* It makes even the speculative Notions the more lively. It engages the attention of the Mind, with the more Fixedness and Intenseness to that Kind of Objects; which causes it to have a clearer View of them, and enables it more clearly to see their mutual Relations, and occasions it to take more Notice of them. The *Ideas* themselves that otherwise are dim, and obscure, are by this Means impress'd with the greater Strength, and have a Light cast upon them; so that the Mind can better judge of them. As he that beholds the Objects on the Face of the Earth, when the Light of the Sun is cast upon them, is under greater Advantage to discern them in their true Forms, and

mutual Relations, than he that sees them in a dim Star-light or Twilight.

The Mind having a sensibleness of the Excellency of divine Objects, dwells upon them with Delight, and the Powers of the Soul are more awaken'd and enliven'd to employ themselves in the Contemplation of them, and exert themselves more fully and much more to the Purpose The Beauty and Sweetness of the Objects draws on the Faculties, and draws forth their Exercises So that Reason it self is under far greater Advantages for its proper and free Exercises, and to attain its proper End, free of Darkness and Delusion. But,

SECONDLY, A true sense of the divine Excellency of the Things of GOD'S Word doth more *directly* and *immediately* convince of the Truth of them, And that because the Excellency of these things is so superlative There is a Beauty in them that is so divine and Godlike, that is greatly and evidently distinguishing of them from things meerly human, or that Men are the Inventors and Authors of, a Glory that is so high and great, that when clearly seen, commands Assent to their Divinity and Reality. When there is an actual and lively Discovery of this Beauty and Excellency, it won't allow of any such Thought as that it is an Human work, or the Fruit of Mens Invention. This Evidence that they, that are spiritually *enlightened*, have of the Truth of the things of Religion, is a Kind of *intuitive* and *immediate* Evidence. They believe the Doctrines of GOD'S Word to be divine, because they see Divinity in them, i.e. They see a divine, and transcendent, and most evidently distinguishing Glory in them, such a Glory as, if clearly seen, don't leave Room to doubt of their being of GOD, and not of Men.

SUCH a Conviction of the Truth of Religion as thus arising, these Ways, from a sense of the divine Excellency of them, is that true spiritual Conviction, that there is in saving Faith. And this Original of it, is that by which it is most essentially distinguished from that common assent, which unregenerate Men are capable of

II. I Proceed now to the second Thing proposed, viz. To show *how this Light is Immediately given by GOD, and not obtain'd by natural Means.* And here,

1. 'Tis *not intended that the natural Faculties are not made Use of in it.* The *natural Faculties* are the Subject of this Light: And they are the Subject in such a Manner, that they are not meerly passive, but active in it; the Acts and Exercises of Man's Understanding are con-

ceived and made use of in it. GOD in letting in this *Light* into the Soul, deals with Man according to his Nature, or as a rational Creature, and makes Use of his human *Faculties*. But yet this *Light* is not the less immediately from GOD for that, tho' the *Faculties are made Use of*, 'tis as the Subject and not as the Cause; and that acting of the *Faculties* in it, is not the Cause, but is either implied in the Thing it self, (in the *Light* that is imparted) or is the Consequence of it. As the Use that we make of our Eyes in beholding various Objects, when the Sun arises, is not the Cause of the Light that discovers those Objects to us.

2 'Tis not intended that outward Means have no Concern in this Affair. As I have observed already, 'tis not in this Affair, as it is in Inspiration, where new Truths are suggested: for here is by this *Light* only given a due Apprehension of the same Truths that are revealed in the Word of GOD, and therefore it is not given without the Word. The Gospel is made Use of in this Affair: This *Light* is the *Light of the Glorious Gospel of CHRIST* 2. Cor. iv. 4. The Gospel is as a Glass, by which this *Light* is conveyed to us. 1 Cor. xiii. 12. Now we see through a Glass—But,

3 WHEN it is said that this *Light* is given immediately by GOD, and not obtained by natural Means, whereby is intended, that 'tis given by GOD without making Use of any Means that operate by their own Power, or a natural Force. GOD makes Use of Means, but 'tis not as mediate Causes to produce this Effect. There are not truly any second Causes of it; but it is produced by GOD immediately. The Word of GOD is no proper Cause of this Effect. It don't operate by any natural Force in it. The Word of GOD is only made Use of to convey to the Mind the Subject matter of this saving Instruction. And this indeed it doth convey to us by natural Force or Influence. It conveys to our Minds these and those Doctrines, it is the Cause of the Notion of them in our Heads, but not of the sense of the divine Excellency of them in our Hearts. Indeed a Person can't have spiritual *Light* without the Word. But that don't argue, that the Word properly causes that *Light*. The Mind can't see the Excellency of any Doctrine, unless that Doctrine be first in the Mind; but the seeing the Excellency of the Doctrine may be immediately from the Spirit of GOD; tho' the conveying of the Doctrine or Proposition it self may be by the Word. So that the Notions that are the Subject matter of this

Light, are conveyed to the Mind by the Word of GOD, but that due sense of the Heart, wherein this *Light* formally consists, is immediately by the Spirit of GOD. 50 As for Instance, that Notion that there is a CHRIST and that CHRIST is holy and gracious, is conveyed to the Mind by the Word of GOD. But the sense of the Excellency of CHRIST by reason of that Holiness and Grace, is nevertheless immediately the Work of the HOLY SPIRIT. I come now,

III. To show the Truth of the Doctrine; that is to show that there is such a Thing as that spiritual *Light* that has been described, thus immediately let into the Mind by GOD. And here I would shew briefly, that this 60 Doctrine is both scriptural, and rational.

First, 'TIS SCRIPTURAL. My Text is not only full to the Purpose, but 'tis a Doctrine that the Scripture abounds in. We are there abundantly taught, that the Saints differ from the Ungodly in this, that they have the Knowledge of GOD, and a sight of GOD, and of JESUS CHRIST. I shall mention but few Texts of many, 1 John 3. 6. Whosoever sinneth hath not seen him, nor known him. 3 John 11. He that doth Good, is of God, but he that doth Evil, hath not seen GOD. John 14. 19. 70 The world seeth me no more; but ye see me. John 17.

3 And this is Eternal Life, that they might know thee, the only true GOD, and JESUS CHRIST whom thou hast sent. This Knowledge, or sight of GOD and CHRIST, can't be a meer speculative Knowledge; because it is spoken of as a seeing and knowing, wherein they differ from the Ungodly. And by these Scriptures it must not only be a different Knowledge in Degree and Circumstances, and different in its Effects; but it must be entirely different in Nature and Kind. 80

AND this *Light* and Knowledge is always spoken of as immediately given of GOD Mat. 11. 25, 26, 27. At that time JESUS answered and said, I thank thee O Father Lord of Heaven and Earth, because thou hast hid these things from the wise and prudent, and hast revealed them unto Babes; even so Father, for so it seemed good in thy sight. All things are delivered unto me of my Father; and no Man knoweth the Son but the Father; neither knoweth any Man the Father, save the Son, and he to whomsoever the Son will reveal him. Here this 90 Effect is ascribed alone to the arbitrary Operation, and Gift of GOD, bestowing this Knowledge on whom he will, and distinguishing those with it, that have the least natural Advantage or Means for Knowledge, even

Babes, when it is denied to the *Wise and Prudent*. And the imparting of the Knowledge of GOD is here appropriated to the Son of GOD, as his sole Prerogative. And again, 2 Cor. 4. 6. *For GOD who commanded the Light to shine out of Darkness, hath shined in our Hearts, to give the Light of the Knowledge of the Glory of GOD in the Face of JESUS CHRIST*. This plainly shows, that there is such a thing as a discovery of the divine superlative Glory and Excellency of GOD and

10 CHRIST, and that peculiar to the Saints' and also that 'tis as immediately from GOD, as Light from the Sun and that 'tis the immediate Effect of his Power and Will, for 'tis compared to GOD'S creating the Light by his powerful Word in the beginning of the Creation; and is said to be by the Spirit of the LORD, in the 18th verse of the preceding Chapter GOD is spoken of as giving the Knowledge of CHRIST in Conversion, as of what before was hidden and unseen in that Gal. 1. 15,

20 *But when it pleased GOD, who separated me from my Mothers Womb, and called me by his Grace, to reveal his Son in me—*. This Scripture also speaks plainly of such a Knowledge of the Word of GOD, as has been described, as the immediate gift of GOD. Psal. 119. 18. *Open thou mine Eyes, that I may behold wondrous things out of thy Law*. What could the Psalmist mean, when he begged of GOD to *open* his Eyes? Was he ever blind? Might he not have Resort to the Law and see every Word and Sentence in it when he pleased? And what could he mean by those *wondrous Things*?

30 Was it the wonderful Stories of the Creation, and Deluge, and Israel's passing thro' the red Sea, and the like? were not his Eyes open to read these strange things when he would? Doubtless by *wondrous Things in GOD'S Law*, he had Respect to those distinguishing and wonderful Excellencies, and marvellous Manifestations of the divine Perfections, and Glory, that there was in the Commands and Doctrines of the Word, and those Works and Counsels of GOD that were there revealed. So the Scripture speaks of a Knowledge of

40 GOD'S Dispensation, and Covenant of Mercy, and Way of Grace towards his People, as peculiar to the Saints, and given only by GOD, Psal. 25. 14. *The Secret of the LORD is with them that fear him; and he will shew them his Covenant*.

AND that a true and saving Belief of the Truth of Religion is that which arises from such a Discovery, is also what the Scripture teaches. As John 6. 40 *And*

this is the will of him that sent me, that every one which SEETH the Son, and BELIEVETH on him, may have everlasting Life. Where it is plain that a true Faith is what arises from a spiritual sight of CHRIST. And John 17. 6, 7, 8. *I have manifested thy Name unto the Men which thou gavest me out of the World—*. *Now they have known that all things whatsoever thou hast given me, are of thee; for I have given unto them the words which thou gavest me, and they have received them, and have known surely that I came out from thee, and they have believed that thou didst send me*. Where CHRIST'S manifesting GOD'S Name to the Disciples, or giving them the Knowledge of God, was that whereby they knew that CHRIST'S Doctrine was of GOD, and that CHRIST himself was of him, proceeded from him, and was sent by him. Again John 12. 44, 45, 46. *JESUS cried and said, He that believeth on me, believeth not on me, but on him that sent me: And he that seeth me seeth him that sent me. I am come a Light into the World, that whosoever Believeth on me should not abide in Darkness*. Their Believing in CHRIST, and spiritually Seeing him, are spoken of as running parallel.

CHRIST condemns the Jews, that they did not know that he was the MESSIAH, and that his Doctrine was true, from an inward distinguishing Taste and Relish of what was divine, in Luke 12. 56, 57. He having there blamed the Jews, that though they could *discern the Face of the Sky and of the Earth*, and Signs of the Weather, that yet they could not *discern* those *Times*, or as 'tis expressed in Matthew, *the Signs of those Times*; He adds, *yea and why even of your own selves judge ye not what is right?* i. e. without extrinsic Signs. "Why have ye not that sense of true Excellency whereby ye may distinguish that which is holy and divine? Why have ye not that savour of the things of GOD, by which you may see the distinguishing Glory and evident Divinity of me and my Doctrine?"

THE Apostle Peter mentions it as what gave them (the Apostles) good and well grounded Assurance of the Truth of the Gospel, that they had seen the divine Glory of CHRIST. 2. Pet. 1. 16. *For we have not followed cunningly devised Fables, when we made known unto you, the Power and Coming of our Lord JESUS CHRIST, but were Eye-witnesses of his Majesty*. The Apostle has Respect to that visible Glory of CHRIST which they saw in his Transfiguration: That Glory was

so divine having such an ineffable Appearance and semblance of divine Holiness, Majesty, and Grace, that it evidently denoted him to be a divine Person. But if a sight of CHRIST'S outward Glory might give a rational Assurance of his Divinity, why may not an Apprehension of his spiritual Glory do so too Doubtless CHRIST'S spiritual Glory is in itself as distinguishing, and as plainly shewing his Divinity, as his outward Glory; and a great deal more for his spiritual Glory is that wherein his Divinity consists; and the outward Glory of his Transfiguration shew'd him to be divine, only as it was a Remarkable Image or Representation of that spiritual Glory. Doubtless therefore he that has had a clear sight of the spiritual Glory of CHRIST, may say, *I have not followed cunningly devised Fables, but have been an Eye-witness of his Majesty.* upon as good Grounds as the Apostle, when he had Respect to the outward Glory of Christ, that he had seen.

But this brings me to what was proposed next *viz.* to show that,

Secondly. THIS Doctrine is RATIONAL.

1 'Tis rational to suppose that there is really such an Excellency in divine things, that is so transcendent and exceedingly different from what is in other things, that if it were seen would most evidently distinguish them. We can't rationally doubt but that Things that are divine, that appertain to the supreme Being, are vastly different from Things that are human; that there is that God-like, high, and glorious Excellency in them, that does most remarkably difference them from the things that are of Men, insomuch that if the difference were but seen, it would have a convincing, satisfying influence upon any one, that they are what they are, *viz. divine.* What Reason can be offered against it? Unless we would argue that GOD is not remarkably distinguished in Glory from Men.

IF CHRIST should now appear to any One as he did on the Mount at his Transfiguration, or if he should appear to the World in the Glory that he now appears in Heaven, as he will do at the Day of Judgment, without doubt, the Glory and Majesty that he would appear in, would be such as would satisfy every One, that he was a divine Person, and that Religion was true. And it would be a most reasonable, and well grounded Conviction too. And why may there not be that Stamp of Divinity, or divine Glory on the word of GOD, on the Scheme and Doctrine of the Gospel, that may be in

like manner distinguishing and as *rational* convincing, provided it be but seen? 'Tis rational to suppose, that when GOD speaks to the World, there should be something in his Word or Speech vastly different from MEN'S Word. Supposing that GOD never had spoken to the World, but we had Noticed that He was about to do it, that he was about to Reveal himself from Heaven, and speak to us immediately himself, in divine Speeches or Discourses, as it were from his own Mouth; or that he should give us a Book of his own inditing; after what manner should we expect that he would speak? Would it not be *rational* to suppose, that his Speech would be exceeding different from Men's Speech, that he should speak like a GOD, that is, that there should be such an Excellency and sublimity in his Speech or Word, such a Stamp of Wisdom, Holiness, Majesty, and other divine Perfections, that the word of Men, yea of the wisest of Men, should appear mean and base in Comparison of it? Doubtless it would be thought *rational* to expect this, and *unreasonable* to think otherwise When a wise Man speaks in the Exercise of his Wisdom, there is something in every thing he says, that is very distinguishable from the Talk of a little Child. So, without doubt, and much more, is the Speech of GOD, (if there be any such Thing as the Speech of GOD,) to be distinguished from that of the wisest of Men; agreeably to Jer. 23 28, 29. GOD having there been reproving the false Prophets that prophesied in his Name, and pretended that what they spake was his Word, when indeed it was their own Word, says, *The Prophet that bath a Dream, let him tell a Dream; and he that bath my Word, let him speak my Word faithfully: WHAT IS THE CHAFF TO THE WHEAT? Saith the LORD. Is not my Word like as a Fire, saith the LORD, and like a Hammer that breaketh the Rock in Pieces?*

2. IF there be such a distinguishing Excellency in divine things; 'tis rational to suppose that there may be such a thing as seeing it. What should hinder but that it may be seen? 'Tis no Argument that there is no such Thing as such a distinguishing Excellency, or that, if there be, that it can't be seen, that some don't see it, tho' they may be discerning Men in temporal Matters. It is not *rational* to suppose, if there be any such Excellency in divine Things, that wicked Men should see it. 'Tis not *rational* to suppose, that those whose Minds are full of spiritual Pollution, and under the Power of filthy Lusts, should have any Relish or Sense of divine Beauty,

or Excellency; or that their Minds should be susceptible of that *Light* that is in its own Nature so pure and heavenly. It need not seem at all strange, that Sin should so blind the Mind, seeing that Mens particular natural Tempers and Dispositions will so much blind them in secular Matters; as when Mens natural Temper is melancholly, jealous, fearful, proud, or the like.

3. 'Tis *rational* to suppose that this Knowledge should be given immediately by GOD, and not be obtain'd by
 10 natural means. Upon what account should it seem unreasonable, that there should be any immediate Communication between GOD and the Creature? 'Tis strange that Men should make any matter of difficulty of it. Why should not He that made all things, still have something immediately to do with the Things that he has made? Where lies the great difficulty, if we own the Being of a GOD, and that he created all things out of Nothing, of allowing some immediate Influence of GOD on the Creation still And if it be reasonable to
 20 suppose it with Respect to any Part of the Creation, 'tis Especially so with Respect to reasonable intelligent Creatures; who are next to GOD in the Gradation of the different Orders of Beings, and whose Business is most immediately with GOD; who were made on Purpose for those Exercises that do respect God, and wherein they have nextly to do with God for Reason teaches that Man was made to serve and glorify his Creator. And if it be rational to suppose that GOD immediately communicates himself to Man in any Affair, it is in this.
 30 'Tis rational to suppose that GOD would reserve that Knowledge and Wisdom, that is of such a divine and excellent Nature, to be bestowed immediately by himself, and that it should not be left in the Power of second Causes. Spiritual Wisdom and Grace is the highest and most excellent Gift that ever GOD bestows on any Creature In this the highest Excellency and Perfection of a rational Creature consists. 'Tis also immensely the most important of all divine Gifts: 'Tis that wherein Mans Happiness consists, and on which
 40 his everlasting Welfare depends. How rational is it to suppose that GOD, however he has left meaner Goods and lower Gifts to second Causes, and in some sort in their Power, yet should reserve this most excellent, divine, and important of all divine Communications, in his own Hands, to be bestowed immediately by himself, as a thing too great for second Causes to be concern'd

in? 'Tis rational to suppose that this Blessing should be immediately from GOD, for there is no Gift or Benefit that is in it self so nearly related to the divine Nature, there is nothing the Creature receives that is so much of GOD, of his Nature, so much a Participation of the Deity: 'Tis a Kind of Emanation of GOD's Beauty, and is related to GOD as the Light is to the Sun. 'Tis therefore congruous and fit, that when it is given of GOD, it should be nextly from himself, and by himself, according to his own Sovereign Will.

'Tis rational to suppose, that it should be beyond a Man's Power to obtain this Knowledge, and *Light*, by the meer Strength of natural Reason; for 'tis not a Thing that belongs to Reason, to see the Beauty and Loveliness of spiritual things; it is not a speculative thing, but depends on the Sense of the Heart. Reason indeed is necessary in order to it, as 'tis by Reason only that we are become the Subjects of the means of it, which means I have already shown to be necessary in order to it, though they have no proper causal Influence in the Affair. 'Tis by Reason that we become possessed of a notion of those Doctrines that are the Subject Matter of this *divine Light*; and Reason may many ways be indirectly, and remotely an Advantage to it And Reason has also to do in the Acts that are immediately consequent on this Discovery A seeing the Truth of Religion from hence, is by Reason, though it be but by one step, and the Inference be immediate. So Reason has to do in that accepting of, and trusting in CHRIST, that is consequent on it. But if we take Reason strictly, not for the Faculty of mental Perception in general, but for Ratiocination, or a Power of Inferring by Arguments; I say if we take Reason thus, the perceiving of spiritual Beauty and Excellency no more belongs to Reason, than it belongs to the Sense of feeling to perceive Colors, or to the Power of seeing to perceive the Sweetness of Food. It is out of Reason's province to perceive the Beauty or Loveliness of any thing: Such a Perception don't belong to that Faculty. Reason's Work is to perceive Truth and not Excellency 'Tis not Ratiocination that gives Men the Perception of the Beauty and Amiableness of a Countenance; tho' it may be many ways indirectly an advantage to it; yet 'tis no more Reason that immediately perceives it, than it is Reason that perceives the Sweetness of Honey: It depends on the Sense of the Heart. Reason may determine that a

Countenance is Beautiful to others, it may determine that Honey is sweet to others; but it will never give me a Perception of its Sweetness.

I will conclude with a very brief *Improvement* of what has been said.

FIRST. THIS Doctrine may lead us to *reflect* on the Goodness of GOD, that has so ordered it, that a saving Evidence of the Truth of the Gospel is such, as is attainable by Persons of mean Capacities, and Advantages, as well as those that are of the greatest Parts and Learning. If the Evidence of the Gospel depended only on History, and such Reasonings as learned Men only are capable of, it would be above the Reach of far the greatest part of Mankind. But Persons, with but an ordinary Degree of Knowledge, are capable without a long and subtil Train of Reasoning, to see the divine Excellency of the things of Religion. They are capable of being taught by the Spirit of GOD, as well as learned Men. The Evidence that is this Way obtained, is vastly better and more satisfying, than all that can be obtain'd by the Arguings of those that are most Learned, and greatest Masters of Reason. And Babes are as capable of knowing these things, as [are] the wise and prudent; and they are often hid from these, when they are revealed to those. 1 Cor. 1. 26, 27 *For ye see your Calling Brethren. how that not many wise Men, after the Flesh, not many mighty, not many noble are called. But GOD hath chosen the foolish things of the World—*

Secondly. THIS Doctrine may well put us upon examining ourselves, whether we have ever had his *divine Light*, that has been described, let into our Souls. If there be such a thing indeed, and it ben't only a Notion or Whimsy of Persons of weak and distempered Brains, then doubtless 'tis a thing of great Importance, whether we have thus been taught by the Spirit of GOD; whether *the Light of the Glorious Gospel of CHRIST, who is the Image of GOD hath shined into us, giving us the Light of the Knowledge of the Glory of GOD in the Face of JESUS CHRIST*, whether we have *seen the Son, and believed on him*, or have that Faith of Gospel Doctrines that arises from a spiritual Sight of CHRIST.

Thirdly. ALL may hence be exhorted, earnestly to seek this *spiritual Light*. To influence and move to it, the following things may be consider'd.

1. THIS is the most *excellent and divine* Wisdom, that any Creature is capable of. 'Tis more excellent

than any human Learning; 'Tis far more excellent than all the Knowledge of the greatest Philosophers or Statesmen. Yea the least Glimpse of *the Glory of GOD in the Face of CHRIST* doth more exalt and enoble the Soul, 50 than all the Knowledge of those that have the greatest speculative Understanding in Divinity, without grace. This Knowledge has the most noble Object that is, or can be, *viz.* the divine Glory and Excellency of GOD, and CHRIST. The Knowledge of these Objects is that wherein consists the most excellent Knowledge of the Angels, yea, of GOD himself,

2. THIS Knowledge is that which is above all others *Sweet and Joyful*. Men have a great deal of Pleasure in human Knowledge, in Studies of natural things, but this is nothing to that Joy which arises from this *divine Light* shining into the Soul. This *Light* gives a View of those things that are immensely the most exquisitely Beautiful, and capable of delighting the Eye of the Understanding. This *spiritual Light* is the dawning of the Light of Glory in the Heart. There is nothing so powerful as this to support Persons in Affliction, and to give the Mind Peace and Brightness, in this stormy and dark World.

3. THIS Light is such as *effectually influences the Inclination, and Changes the Nature of the Soul*. It assimilates the Nature to the divine Nature, and changes the Soul into an Image of the same Glory that is beheld. 2 Cor. 3. 18. *But we all with open Face beholding as in a Glass the Glory of the Lord, are changed into the same Image, from Glory to Glory, even as by the Spirit of the Lord*. This Knowledge will wean from the World, and raise the Inclination to heavenly things. It will turn the Heart to GOD as the Fountain of Good, and to choose him for the only Portion. This *Light*, and this 80 only, will bring the Soul to a saving Close with CHRIST. It conforms the Heart to the Gospel, mortifies its Enmity and Opposition against the Scheme of Salvation therein revealed. It causes the Heart to embrace the joyful Tidings, and entirely to adhere to, and acquiesce in the Revelation of CHRIST as our Saviour: It causes the whole Soul to accord and Symphonize with it, admitting it with entire Credit and Respect, cleaving to it with full Inclination and Affection. And it effectually disposes the Soul to give up it self entirely 90 to CHRIST.

4. THIS Light and this only *has its Fruit in a uni-*

versal Holiness of Life. No merely notional or speculative Understanding of the Doctrines of Religion, will ever bring to this But this *Light* as it reaches the bottom of the Heart, and changes the Nature, so it will effectually dispose to an universal Obedience. It shews GOD's worthiness to be obeyed and served It draws

forth the Heart in a sincere Love to GOD, which is the only Principle of a true, gracious and universal Obedience And it convinces of the Reality of those glorious Rewards that GOD has promised to them that obey him

1733-1734

From

Freedom of the Will

The following selection (Part I, Section 5) from the *Freedom of the Will* displays Edwards' skill in definition and logical distinctions For his general position, see page 161.

CONCERNING THE NOTION OF LIBERTY, AND OF MORAL AGENCY

The plain and obvious Meaning of the Words *Freedom* and *Liberty*, in common Speech, is *Power, Opportunity or Advantage, that any one has, to do as he pleases*. Or in other Words, his being free from Hindrance or Impediment in the Way of doing, or conducting in any Respect, as he wills. And the contrary to Liberty, whatever Name we call that by, is a Person's being hinder'd or unable to conduct as he will, or being necessitated to do otherwise

10 If this which I have mentioned be the Meaning of the Word Liberty, in the ordinary Use of language, as I trust that none that has ever learn'd to talk, and is unprejudiced, will deny; then it will follow, that in Propriety of Speech, neither Liberty, nor it's contrary, can properly be ascribed to any Being or Thing, but that which has such a Faculty, Power or Property, as is called will. For that which is possessed of no such Thing as *Will*, can't have any *Power* or *Opportunity* of

doing *according to it's Will*, nor be necessitated to act *contrary to its Will*, nor be restrained from acting agreeably to it And therefore to talk of Liberty, or the contrary, as belonging to the *very Will it self*, is not to speak good Sense; if we judge of Sense, and Nonsense, by the original & proper Signification of Words For the *Will it self* is not an Agent that *has a Will* The Power of choosing, it self, has not a Power of chusing That which has the Power of Volition or Choice is the Man or the Soul, and not the Power of Volition it self And he that has the Liberty of doing according to his Will, is the Agent or Doer who is possessed of the Will, and not the Will which he is possessed of We say with Propriety, that a Bird let loose has Power & Liberty to fly, but not that the Bird's Power of flying has a Power & Liberty of flying To be free is the Property of an Agent, who is possessed of Powers & Faculties, as much as to be cunning, valiant, bountiful, or zealous But these Qualities are the Properties of Men or Persons, and not the Properties of Properties

There are two Things that are contrary to this which is called Liberty in common Speech One is *Constraint*, the same is otherwise called *Force, Compulsion, & Coaction*; which is a Person's being necessitated to do a Thing *contrary* to his Will The other is *Restraint*; which is his being hinder'd, and not having Power to do *according to his Will* But that which has no Will, can't be the Subject of these Things—I need say the less on this Head, Mr *Locke* having set the same Thing forth, with so great clearness, in his *Essay on the human Understanding*

But one Thing more I would observe concerning what is vulgarly called *Liberty*: namely, that Power &

Text the first edition, Boston, 1754 • 6 wills. "I say not only *doing*, but *conducting*, because a voluntary forbearing to do, sitting still, keeping Silence, &c are Instances of Persons' *Conduct*, about which Liberty is exercised, tho' they are not so properly called *doing*."—Edwards • 48 Mr *Locke*, in Bk II, Chap 21

Opportunity for one to do and conduct as he will, or according to his Choice, is all that is meant by it; without taking into the Meaning of the Word, any Thing of the Cause or Original of that Choice; or at all considering how the Person came to have such a Volition, whether it was caused by some external Motive or internal habitual Bias; whether it was determin'd by some internal antecedent Volition, or whether it happen'd without a Cause; whether it was necessarily connected with something foregoing, or not connected. Let the Person come by his Volition or Choice how he will, yet if he is able, and there is Nothing in the Way to hinder his pursuing and executing his Will, the man is fully & perfectly free, according to the primary and common Notion of Freedom.

What has been said may be sufficient to show what is meant by *Liberty*, according to the common Notions of Mankind, and in the usual & primary Acceptation of the Word but the Word, as used by *Arminians*, *Pelagians* & others, who oppose the *Calvinists*, has an entirely different Signification These several Things belong to their Notion of Liberty 1 That it consists in a *Self-determining Power* in the Will, or a certain Sovereignty the Will has over it self, and it's own Acts, whereby it determines it's own Volitions, so as not to be dependent in it's Determinations, on any Cause without it self, nor determined by any Thing prior to it's own Acts 2 *Indifference* belongs to Liberty in their Notion of it, or that the Mind, previous to the Act of Volition be, *in equilibrio*. 3. *Contingence* is another Thing that belongs and is essential to it, not in the common Acceptation of the Word, as that has been already explain'd, but as opposed to all *Necessity*, or any fixed & certain Connection with some previous Ground or Reason of it's existence They suppose the Essence of Liberty so much to consist in these Things, that unless the Will of Man be free in this Sense, he has no real Freedom. how much soever he may be at Liberty to act according to his will

A *moral Agent* is a Being that is capable of those Actions that have a moral Quality, and which can properly be denominated good or evil in a moral Sense, virtuous or vicious, commendable or faulty. To moral Agency belongs a *moral Faculty*, or Sense of moral Good and Evil, or of such a Thing as Desert or Worthiness, of Praise or Blame, Reward or Punishment, and a Capacity which an Agent has of being influenced in his

Actions by moral Inducements or *Morives*, exhibited to the View of Understanding & Reason, to engage to a Conduct agreeable to the moral Faculty.

50

The Sun is very excellent & beneficial in it's Action and Influence on the Earth, in warming it, and causing it to bring forth it's Fruits, but it is not a moral Agent It's Action, tho good, is not vertuous or meritorious Fire that breaks out in a City, and consumes great Part of it, is very mischievous in its Operation; but is not a moral Agent. what it does is not faulty or sinful, or deserving of any Punishment The brute Creatures are not moral Agents the actions of some of 'em are very profitable & pleasant, others are very hurtful yet, seeing 60 they have no moral Faculty, or Sense of Desert, and don't act from Choice guided by Understanding, or with a Capacity of reasoning and reflecting, but only from Instinct, and are not capable of being influenced by moral Inducements, their Actions are not properly sinful or vertuous, nor are they properly the Subjects of any such moral Treatment for what they do, as moral Agents are for their Faults or good Deeds

Here it may be noted, that there is a circumstantial Difference between the moral Agency of a *Ruler* and a 70 *Subject*. I call it *circumstantial*, because it lies only in the Difference of moral Inducements they are capable of being influenced by, arising from the Difference of *Circumstances*. A Ruler, acting, in that Capacity only, is not capable of being influenced by a moral Law, and it's Sanctions of Threatnings and Promises, Rewards and Punishments, as the *Subject* is, tho' both may be influenced by a Knowledge of moral Good and Evil And therefore the moral Agency of the Supreme Being, who acts only in the Capacity of a *Ruler* towards his Crea- 80 tures, and never as a *Subject*, differs in that Respect from the moral Agency of created intelligent Beings. God's Actions, and particularly those which he exerts as a moral Governour, have moral Qualifications, are morally good in the highest Degree. They are most perfectly holy & righteous, and we must conceive of Him as influenced in the highest Degree, by that which, above all others, is properly a moral Inducement, *viz.* the moral Good which He sees in such and such Things. And therefore He is, in the most proper Sense, a moral 90

19 Pelagians, followers of Pelagius (fl. 400), a British monk who maintained the freedom of the human will and opposed the doctrine of original sin

Agent, the Source of all moral Ability & Agency, the Fountain and Rule of all Vertue and moral Good; tho' by Reason of his being Supreme over all, 'tis not possible He should be under the Influence of Law or Command, Promises or Threatnings, Rewards or Punishments, Counsels or Warnings. The essential Qualities of a moral Agent are in God, in the greatest possible Perfection, such as Understanding, to perceive the Difference between moral Good & Evil; a Capacity of
¹⁰ discerning that moral Worthiness and Demerit, by which some Things are Praise-worthy, others deserving of Blame and Punishment, and also a Capacity of

Choice, and Choice guided by Understanding, and a Power of acting according to his Choice or Pleasure, and being capable of doing those Things which are in the highest Sense Praise-worthy. And herein does very much consist that Image of God wherein he made Man, (which we read of *Gen.* I. 26, 27, & Chap. IX. 6.) by which God distinguished Man from the Beasts, *viz.* in those Faculties & Principles of Nature, whereby He is capable of moral Agency. Herein very much consists the *natural* Image of God; as his *spiritual* and *moral* Image, wherein Man was made at first, consisted in that moral Excellency, that he was endowed with.

1751-1754²•1754

Charles Chauncy

1705 • 1787

"A more shocking idea can scarce be given of the Deity than that which represents him as arbitrarily dooming the greater part of the race of men to eternal misery," wrote Charles Chauncy To Thomas Shepard, to Cotton Mather, to Jonathan Edwards that statement would have seemed almost the ultimate in heresy, and it is not surprising that for most of his life Chauncy kept some of his theological opinions to himself or published them anonymously Yet everything in Chauncy's life and times tended to minimize the sterner Calvinistic doctrines of depravity and election—everything except the powerful reaffirmations of his great rival, Edwards.

For sixty years Chauncy was one of the ministers of the First Church in Boston. A poor preacher, if "exhorting" is the measure of pulpit success, he proved in his fifty-odd published books that no one in New Eng-

land was his superior in knowledge of the church fathers in staunch defense of Congregational church government or in the exercise of a clear and functional style. He made worship dignified and intellectual; he expressed the social and political convictions of the dominantly Whig society in which he lived, he was outstanding among the controversialists of his day for unimpassioned detachment. Rational and somewhat cold, he is an excellent illustration of why Boston and eastern Massachusetts turned away from some of the most conspicuous aspects of Calvinism to the more comfortable but less emotional ways of Unitarianism and Universalism.

Although Chauncy is worth study both for his doctrine and for his part in the fight against the establishment of an Anglican episcopate (a fearful prospect to most of the New England clergy, and the issue which

aligned them almost solidly with the Revolutionary party), he is perhaps at his best when he writes about religious experience. Without denying the part which emotion plays in regeneration and without deserting the authority of the Bible, he distrusted unbridled religious excitement and was convinced that the effects of semi-hysterical revival periods were seldom permanent. Lacking the passionate piety of Edwards, he had little use for "enthusiasm," and he stated his case against it in

many places. Revivalism became, despite Chauncy, a characteristic feature of the religious life of America, but there have always been men like him, sure that the good life has most to do with rational conviction and the moral tone of daily living.

Williston Walker, *Ten New England Leaders*, New York and Chicago, 1901

From

Seasonable Thoughts on the State of Religion in New-England

Between 1740 and 1745 over 150 New England towns felt the excitement of the "Great Awakening," a religious revival usually attributed to the influence of Jonathan Edwards and George Whitefield. Chauncy represents the urbane reaction to its remarkable physical manifestations and obvious dangers. His *Seasonable Thoughts* (Boston, 1743), a treatise in five parts, presented (1) the "Things of a bad and dangerous Tendency" in the revival, i.e., such results as hysteria; (2) the obligations of pastors to help "suppress prevailing Disorders"; (3) instances of ill treatment of "Discouragers of Irregularities," i.e., persons who raised objections to uninhibited behavior; (4) what "ought to be corrected, or avoided," in testifying against the disorders; and (5) "what may be judged the best Expedients, to promote pure and undefiled Religion." The selection which follows is from the latter portion of Part I.

I doubt not, but the *divine SPIRIT* often accompanies the *preached Word*, so as that, by *his Influence*. Sinners

are awakened to a *Sense of Sin*. and filled with *deep Distress of Soul*. But the *blessed SPIRIT* must not, at Random, be made the Author of all those *Surprises*, operating in *strange Effects* upon the *Body*, which may be seen among People. They may be produced other Ways; yea, I trust, that has been already said, which makes it evident, they have actually been produced, even by the *wild and extravagant Conduct* of some ¹⁰ *over-heated Preachers*.

It will, doubtless, be here said, these *Out-cries* have sometimes arisen, when no other than the great Truths of the Gospel have been urg'd upon the Consciences of Sinners; and this, in a *becoming Manner*, and by Preachers who have not been noted, either for the *Loudness of their Voice*, or the *Boisterousness of their Action*.

In Reply whereto, I deny not but this may have been the Case: But, at the same Time, think it worthy of Notice, that these bodily *Effects* were, at *FIRST*, produced, so far as I can learn, *ONLY* by *such Preachers* as were *remarkable* for their *terrible speaking*, both as to *Matter*, and *Manner*: Nor do I remember an Instance, in the Country, of *Out-cries*, by *any other Sort of Preachers*, 'till the Noise of such *extraordinary Effects*, as *Arguments of an immediate divine Power*, in one Place and another, had alarmed the People, and made many of them think, it was necessary they also should be in like Circumstances.

Besides, when these *Out-cries* have been effected by ³⁰ your more *moderate Preachers*, (which, by the Way, comparatively speaking, has been a rare Thing) have they not begun with one or two only, and from them

Text: the first edition, 1743

been propagated to others? Nay, have not *these*, from whom they took Rise, *usually*, been such as were *before accustomed* to the Way of *screaming out*? And were they not, *at first*, brought to it, under a more terrible Kind of Preaching? I believe, upon Examination, this will be found to be *nearly* the Truth of the Case

Rev Charles Chauncy's Church, Boston

I shall only add further, that however distinguished the Minister who has preached has been for his *exemplary Piety*, and *shining Gifts*; however agreeable to the Mind of CHRIST he has delivered the Truths of the Gospel; and however warmly he may have address himself to the *People's Passions*, if he wan't before known to have been a *Favourer* of these *Outcries*, he has not produced them Nor do I believe, an Instance can be given in the Country, of their being brought forward by any Minister, of whom the People had a Suspicion, that he did not like them. Which to me, is not the best Argument of their being so wholly owing to the *divine Power*, as some may be too ready to imagine But
20 to proceed,

Another Thing that very much lessens my Opinion of these *religious Fears*, with the *strange Effects* of them is, that they are produced by the *Exhorters*; and this, in all Parts of the Land, and it may be, in more numerous Instances, than by the *Ministers* themselves And if these

bodily Agitations arise from the Influence of the SPIRIT, when produc'd by the *Ministers*, they are so when produced by the *Exhorters*. The Appearance is the same in both Cases; the like *inward Distress* is effected, and discovers it self in like *Cryings* and *Swoonings*: Nor is there any Reason to think well, in the general, of the one, and not of the other And yet, some of the best Friends of *this Work*, both among the *Clergy* and *Lay*, think ill of these Things, as brought forward by the *Exhorters*: Nay, one of the greatest Friends to the *good Work*, among the Ministers in Town, freely declar'd concerning one of these *Exhorters*, who came into this Place, and began the *Outcries* we were before Strangers to that he feared the Hand of Satan was in his coming here to throw Disgrace on the Work of GOD, suggesting that the Wonders wrought by the *Magicians* in *Egypt* were, to all Appearance like the *Miracles* wrought by MOSES. I see no Reason for such a Remark The visible Effects of this young Man's exhorting here, and in the neighbouring Town of *Dorchester*, were just the same that are wrought by the most famous Preachers in the *new Way*: And where there is no discernable Difference there is no Ground, in *Reason* or *Scripture*, to speak well of the one, and ill of the other Such are certainly inconsistent with themselves, who attribute these *Extraordinaries*, as bro't forward by the *Exhorters*, to a *Spirit of Delusion*, or *Enthusiasm*, or any other *inferior Cause*, while they can't bear to hear a Word said against them, when they are the Produce of those who are called *Ministers*. For my self, I put them both on the same Foot, as supposing they both arise from the same Cause Only, the Appearance of these Things, in the same Kind and Degree, when the *Exhorters* are the Carriers on, administers just Ground of Fear, whether they are, in *general*, so much owing to the *extraordinary Influence* of the *divine SPIRIT*, as some may be too ready to imagine. If they are not owing to the *wonderful Operation* of the HOLY GHOST, when the *Exhorters* are the Occasion of them, they may easily be accounted for, when produced by others And it can't well be supposed,

37 one . . . *Exhorters*, probably James Davenport (1716-1757), who visited Boston in 1742 Interviewed by the ministers, and then excluded from the churches, he preached in the streets with such violence that he was arrested and judged insane

there should be the extraordinary Concurrence of the blessed SPIRIT with these *Exhorters*. For who are they but such, concerning whom the *inspir'd Apostle* has said, *Not a Novice lest he be lifted up with Pride, and fall into the Condemnation of the Devil*. Who are they but such, of whom the same *Apostle* says, *they walk disorderly, working not at all, but are Busy-Bodies*. With Respect to whom, he gives *Commandment by the LORD JESUS CHRIST, that with Quietness they work and eat their own Bread*. Who are they but such, as set themselves up in Opposition to their *Pastors*, though *sound in the Faith* and of a *good Conversation*, contrary to the *Order of the Gospel*, and to the *Disturbance of the Churches*? And can it be thought, that GOD would countenance the Conduct of this Kind of Persons, by extraordinary Testimonies of his *Presence* from Heaven, and this, while they are in a Method of acting that directly contradicts his own Appointments? Besides, may it not be said of these *Exhorters*, in the *general*, that they are very *Babes in Understanding*, needing themselves to be *taught which be the first Principles of the Oracles of GOD*? That they are over-forward and conceited; taking that upon them, they have neither a *Call* to, nor *Qualifications* for? Yea, is it not too true of some of them, that they have acted under the Influence of an *over-heated Imagination*: or what is worse, from *low and base Views*? This is now so evident, that there is no Room for Debate upon the Matter. And of all Men, these, I should think, are the most unlikely to be distinguish'd with the extraordinary *Presence* of the HOLY GHOST.

There is yet another Thing that makes it look as though these *Terrors* might arise from a *lower Cause* than that which is *Divine*: and that is, their happening in the *Night*. I don't mean, that there han't been *Out-cries* in the *Day Time*; but the *Night* is more commonly the *Season*, when these Things are to be seen, and in their greatest Perfection. They are more *frequent*, and more *general*, and rais'd to a higher *Degree*, at the *Night Meetings*, when there are but *two* or *three* Candles in the Place of Worship, or they are wholly in the dark. I have often, in Conversation, heard this Remark made by those, who have been in the Way of these Things, and the same Observations I find in the *Letters* that have been sent me. Says one, speaking of these Extraordi-

naries, "They are more in the *Night* than in the *Day*;" Another, "They operate most strongly in their *Night Meetings*;" Another still, "They never happen'd [this must be understood of the particular Place, he is giving an Account of] [Chauncy's brackets] to any considerable Degree, 'till the *Darkness* of the *Night* came on." And why should these *strange Effects* be more *frequent*, and *general*, in the *Gloominess* of the *Night*, if they were produc'd by the Agency of the *Divine SPIRIT*? Does he need the Advantage of the *dark* to fill Men's Hearts with Terror? This is certainly a shrew'd Sign, that there is more of the *Humane* in these Things, than some are willing to own. We know every Thing appears more dismal in the *Night*. Persons are more apt to be struck with Surprise and Consternation. And as this is a good Reason, it may be the true one, why a *doleful Voice*, and frightful *Managements* may take Effect more in the *Night* than at other Times.

The *Subjects* also of these *Terrors* may lead us to make the like Judgment about them; and these are *Children*, *Women*, and *youngerly* Persons. Not that others han't been wrought upon. Instances there have been of *Men*; and these, both *middle-aged*, and *advanced in Years*, who have both *cried out*, and *fallen down*. But 'tis among *Children*, *young People* and *Women*, whose Passions are soft and tender, and more easily thrown into a Commotion, that these Things chiefly prevail. I know, 'tis thus in those Places, where I have had Opportunity to make Inquiry. And from the Accounts transmitted to me from Friends, in other Places, it appears to have been so among them also. The Account I have from one Part of the Country is, "The Operation is principally among *Women* and *Girls*;" From another, "The Persons wrought upon were generally *Women* and *Children*;" From another, "These Effects have been most frequent in *Women* and *young* Persons" And are not these the very Persons, whose Passions according to *Nature*, it might be expected, would be alarmed? If *young* People are, in a moral Sense, more likely to be wrought upon by *Divine Grace*, than *old*, I see not that this is the Case with respect to *Women* in Distinction from *Men*. *Men* may as easily be overcome by the *Power* of the HOLY GHOST, as *Women*; and are as likely, in a *moral View* of the Matter, to be so. And what should then be the Reason that they should be, as it were, overlook'd, and

Women generally the Persons thrown into these *Agitations* and *Terrors*? It certainly looks, as tho' the Weakness of their Nerves, and from hence their greater Liability to be surpris'd, and overcome with Fear, was the true Account to be given of this Matter.

Moreover, the *Way* in which these *Terrors* spread themselves is a Circumstance, that does not much favour their *divine Origin*. They seem to be suddenly propagated, from one to another, as in a great Fright or Consternation. They often begin with a single Person, a *Child*, or *Woman*. or *Lad*, whose *Shrieks* set others a *Shrieking*; and so the Shrieks catch from one to another, 'till the whole Congregation is alarmed, and such an awful Scene, many Times, open'd, as no Imagination can paint to the Life. To this Purpose is that in the *BOSTON-Post-Boy* [Numb. 391], when after an Account of the *terrible Language* made Use of by the Itinerants, 'tis added, "This frequently frights the *little Children*, and sets them a Screaming; and that frights
 20 their *tender Mothers*, and sets them to Screaming, and by Degrees spreads over a great Part of the Congregation. And 40, 50, or an 100, of them screaming all together, makes such an awful and hideous Noise as will make a Man's Hair stand on End. Some will faint away, fall down upon the Floor, wallow and foam Some Women will rend off their Caps, Handkerchiefs, and other Clothes, tear their Hair down about their Ears, and seem perfectly bereft of their Reason"

Appearances in this Kind, I have often had an Account of from those who have been present at them, and
 30 as begun by one or two Persons at first: And where this has been the Case, there is no great Difficulty in finding out the Cause. 'Tis far more reasonable to look for it in *Nature*, than in *Grace*.

It may not be amiss to observe still further, that these *Terrors*, with their *Effects*, are *uniform all over the Country*; operating upon all in whom they take Place. much in the *same Way* and *Manner*, be their *moral* Character what it will. Whether the Subjects of them be
 40 *great* or *small* Sinners, whether the Sins they have committed be *more* or *less*, whether they have continued in Sin a *longer* or *shorter* Time, there is no Difference as to their *Fears*, and the *Operation* of them; but they are all indiscriminately thrown into the like *horrible* Circumstances; which it is not reasonable to think would be the Case, if they were put into this Condition by a *divine Influence*: Whereas, its the very Thing that might

be expected, where *Nature* is suddenly surpris'd, and over-come, as in a Fright.

In fine, it's a Circumstance no *Ways* favouring the *divine Rise* of these *Out-cries*, that many People now commonly make them, not as urg'd hereto from an *overflowing* Sense of their *own* Sins, but the Sins of *others* Having been *converted* themselves, their *Distress*, under the *Preaching of the Word*, is now raised to such a Height for the *unconverted Sinners in the Congregation*. that they can't help *screaming out*; and so many of them, sometimes at once, as that the *Worship* is *interrupted*, or greatly *disturb'd*. A *Concern* for others, whom we have Reason to fear, are in a State of Sin, is, no Doubt, reasonable, and there will be more or less of it, in the Heart of every sincere Christian. But are *Shriekings* a suitable Expression of this Concern; especially, in the House of GOD? And can it be suppos'd, the *GOD of Order*, would, by the Exertment of his Power, raise this Concern to such a Height, as that his *own Worship* should be broke up upon the Account of it? 'Tis impossible. I never heard one *sober, solid* Person speak a Word, in Favour of *these Out-cries*; and am heartily sorry, any Thing has been *printed*, encouraging so gross an Extravagance. I hope none, from the *mere Sound* of some Texts, will justify *this same Distress* for *others*, as it begins now to discover it self, among some Persons, in *another* Form, in *Travail-Pains* and *Throws*. Of this, I have now an Account by me, in a *Letter* from a Friend, upon the Evidence of his *own Eyes and Ears*, which yet, I should not have mentioned, but that I have since *personally* conversed with a *Minister* in the Country, who informed me of one, who had been in *Travail*, two or three Times successively for him. i. e. Under all the *Signs of Distress*, that appear in *Women* upon such Occasions.

These are the Reasons, why I can't entertain so high an Opinion as some others do, of the *Terrors* appearing in strange *bodily* Effects, which have been so common of late in this Land.

Anne Bradstreet

1612 • 1672

Anne Bradstreet was born at Northampton, England. Since her father, Thomas Dudley, was steward of the estate of the Earl of Lincoln, it is reasonable to suppose that Anne, as a young girl, enjoyed special advantages, including perhaps the use of books from the Earl's library. At the age of sixteen she was married to Simon Bradstreet, a graduate of Emmanuel College, Cambridge, and steward of the Countess of Warwick. Two years later the Dudleys and the Bradstreets came to Massachusetts with John Winthrop and other prominent first settlers of the Massachusetts Bay Colony on the good ship *Arbella*. In Anne's own words, "I changed my condition and was married, and came into this Country, where I found a new world and new manners, at which my heart rose. But after I was convinced it was the

way of God, I submitted to it." Like Ruth, she was sick for home amid the alien corn.

After brief residences at Cambridge and Ipswich, the Bradstreets resided permanently at Andover. Both Thomas Dudley and Simon Bradstreet were prominent leaders in the affairs of the Massachusetts Bay Colony. Anne Bradstreet had eight children; hers was the busy, heroic life of a wife and mother in a pioneer community. She found time, nevertheless, for the writing of verse, a considerable quantity of which was published in London in 1650 with the title, *The Tenth Muse Lately Sprung up in America*. In the Preface of this book the

Panel (l to r) The Bradstreet home • Anne Bradstreet • Westfield, Massachusetts, where Edward Taylor preached • Household chores

author is described as "a Woman, honoured, and esteemed where she lives, for her gracious demeanour, her eminent parts, her pious conversation, her courteous disposition, her exact diligence in her place, and discreet managing of her Family occasions."

The Tenth Muse consisted largely of long encyclopedic poems on "The Four Elements," "The Four Humours in Man's Constitution," "The Four Ages of Man," "The Four Seasons of the Year," and "The Four Monarchies." In these compositions the author seems to have been misled by her favorite poet, Guillaume du Bartas, whose works she read in Joshua Sylvester's translation (*Du Bartas, His Divine Weeks and Works*, London, 1605). Happily, she outgrew this influence in her later work "Contemplations," her most finished poem, shows the influence of two Elizabethan poets, Sidney and Spenser.

Mrs. Bradstreet's most original poems, and some may think her best, are her private domestic pieces, unpublished until after her death, in which she reveals her religious difficulties and her wifely and maternal devotion. She was disturbed by religious doubt. "Many times," she confessed, "hath Satan troubled me concerning the verity of the scriptures, many times by

Atheisme how I could know whether there was a God" She feared that her love of the pleasant things of this life was unchristian. The conflict is incisively presented in "The Flesh and the Spirit." The Spirit was victor, but the Flesh, even though vanquished, reasserted again and again its claims. Her poems to her husband—"On the Restoration of her Husband from an Ague," "On her Husband's going to England," "In her solitary hours in her Husband's absence," "In thankful remembrance of her Husband's safe arrival home," "A letter to her Husband, absent upon Publick employment," "To my Dear and loving Husband"—attest to her warm devotion, they contain surprisingly frank avowals of passionate love, and refute the notion, sometimes met with that the New England Puritans were cold. Anne Bradstreet loved Simon Bradstreet and her children and God with a troubled realization that she fell short of the divine command, "Thou shalt love the Lord thy God with *all* thy heart."

The Works of Anne Bradstreet, ed J. H. Ellis, Charlestown, 1867 (reprinted, 1932) • S. E. Morison, *Mistress Anne Bradstreet, Builders of the Bay Colony*, Boston, 1930

In reference to her Children, June 23, 1656

I had eight birds hatcht in one nest,
Four Cocks there were, and Hens the rest,
I nurst them up with pain and care,
Nor cost, nor labour did I spare,
Till at the last they felt their wing
Mounted the Trees, and learn'd to sing,
Chief of the Brood then took his flight,
To Regions far, and left me quite
My mournful chirps I after send,
Till he return, or I do end,
Leave not thy nest, thy Dam and Sire,
Fly back and sing amidst this Quire
My second bird did take her flight,
And with her mate flew out of sight,
Southward they both their course did bend,
And Seasons twain they there did spend.

10

Till after blown by Southern gales,
They Northward steer'd with filled sayles
A prettier bird was no where seen
Along the Beach among the treen
I have a third of colour white,
On whom I plac'd no small delight,
Coupled with mate loving and true,
Hath also bid her Dam adieu
And where Aurora first appears,
She now hath percht, to spend her years,
One to the Academy flew
To chat among that learned crew
Ambition moves still in his breast
That he might chant above the rest,
Striving for more than to do well.

11

That nightingales he might excell
 My fifth, whose down is yet scarce gone
 Is amongst the shrubs and bushes flown,
 And as his wings increase in strength,
 On higher boughs he'll perch at length
 My other three, still with me nest,
 Untill they'r grown, then as the rest,
 Or here or there, they'll take their flight,
 As is ordain'd, so shall they light
 If birds could weep, then would my tears
 Let others know what are my fears
 Lest this my brood some harm should catch,
 And be surpriz'd for want of watch,
 Whilst pecking corn, and void of care
 They fall unwares in Fowlers snare
 Or whilst on trees they sit and sing,
 Some untoward boy at them do fling
 Or whilst allur'd with bell and glass,
 The net be spread, and caught, alas
 Or least by Lime-twigs they be foyl'd,
 Or by some greedy hawks be spoyl'd
 O would my young, ye saw my breast
 And knew what thoughts there sadly rest
 Great was my pain when I you bred,
 Great was my care, when I you fed,
 Long did I keep you soft and warm,
 And with my wings kept off all harm,
 My cares are more, and fears than ever
 My throbs such now, as 'fore were never
 Alas my birds, you wisdom want.
 Of perils you are ignorant,
 Oft times in grass, on trees, in flight,
 Sore accidents on you may light
 O to your safety have an eye,
 So happy may you live and die
 Mean while my dayes in tunes Ile spend,
 Till my weak layes with me shall end
 In shady woods I'll sit and sing,
 And things that past, to mind I'll bring
 Once young and pleasant, as are you,
 But former toyes (no joyes) adieu,
 My age I will not once lament,
 But sing, my time so near is spent.
 And from the top bough take my flight,
 Into a country beyond sight,
 Where old ones, instantly grow young,

And there with Seraphims set song.
 No seasons cold nor storms they see;
 But spring lasts to eternity.
 When each of you shall in your nest
 Among your young ones take your rest,
 In chirping language, oft them tell,
 You had a Dam that lov'd you well
 That did what could be done for young,
 And nurs't you up till you were strong,
 And 'fore she once would let you fly,
 She shew'd you joy and misery,
 Taught what was good, and what was ill,
 What would save life, and what would kill
 Thus gone, amongst you I may live
 And dead, yet speak, and counsel give
 Farewell my birds, farewell adieu,
 I happy am if well with you

1678

To my Dear and loving Husband

If ever two were one, then surely we
 If ever man were lov'd by wife then thee,
 If ever wife was happy in a man,
 Compare with me ye women if you can
 I prize thy love more than whole Mines of gold,
 Or all the riches that the East doth hold
 My love is such that Rivers cannot quench
 Nor ought but love from thee, give recompence
 Thy love is such I can no way repay,
 The heavens reward thee manifold I pray
 Then while we live, in love lets so persever,
 That when we live no more, we may live ever

1678

Verses upon the burning of her house, July 10, 1666

In silent night when rest I took,
 For sorrow neer I did not look,

I waken'd was with thundring nois
And Piteous shrieks of dreadfull voice
That fearfull sound of fire and fire,
Let no man know is my Desire.

I, starting up, the light did spye,
And to my God my heart did cry
To strengthen me in my Distresse
And not to leave me succourlesse.
Then coming out beheld a space,
The flame consume my dwelling place

And, when I could no longer look,
I blest his Name that gave and took.
That layd my goods now in the dust:
Yea so it was, and so 'twas just
It was his own: it was not mine,
Far be it that I should repine.

He might of All justly bereft,
But yet sufficient for us left.
When by the Ruines oft I past,
My sorrowing eyes aside did cast,
And here and there the places spye
Where oft I sate, and long did lye.

Here stood that Trunk, and there that chest;
There lay that store I counted best
My pleasant things in ashes lye,
And them behold no more shall I.
Under thy roof no guest shall sitt,
Nor at thy Table eat a bitt.

No pleasant tale shall 'ere be told,
Nor things recounted done of old
No Candle 'ere shall shine in Thee.
Nor bridegroom's voice ere heard shall bee
In silence ever shalt thou lye,
Adieu, Adieu; All's vanity.

Then streight I gin my heart to chide,
And did thy wealth on earth abide?
Didst fix thy hope on mouldring dust,
The arm of flesh didst make thy trust?
Raise up thy thoughts above the skye
That dunghill mists away may flie.

Thou hast an house on high erect,
Fram'd by that mighty Architect,
With glory richly furnished,
Stands permanent tho' this bee fled.
Its purchased, and paid for too
By him who hath enough to doe.

10 A Prize so vast as is unknown,
Yet, by his Gift, is made thine own. 50
Ther's wealth enough, I need no more;
Farewell my Pelf, farewell my Store.
The world no longer let me Love,
My hope and Treasure lyes Above.

1678

The Flesh and the Spirit

20 Samuel Eliot Morison, in what is perhaps the best essay
on Mrs. Bradstreet ("Mistress Anne Bradstreet," *Builders
of the Bay Colony*), said about the following poem: "Her
mature poem on 'The Flesh and the Spirit' is one of the
best expressions in English literature of the conflict de-
scribed by Saint Paul in the eighth chapter of his Epistle
to the Romans. It has a dramatic quality which can only
have come of personal experience"

30 In secret place where once I stood
Close by the Banks of Lacrim flood
I heard two sisters reason on
Things that are past, and things to come:
One flesh was call'd, who had her eye
On worldly wealth and vanity,
The other Spirit, who did rear
Her thoughts unto a higher sphere
Sister, quoth Flesh, what liv'st thou on
Nothing but Meditation? 1.
Doth Contemplation feed thee so
Regardlessly to let earth goe?

40 Verses upon house • 14 l. . . took. Job 1 21 "The Lord gave
and the Lord hath taken away, blessed be the name of the Lord"
The Flesh Spirit • 2 Lacrim, from "lacrimae," tears

Can Speculation satisfy
 Notion without Reality?
 Dost dream of things beyond the Moon
 And dost thou hope to dwell there soon?
 Hast treasures there laid up in store
 That all in th' world thou count'st but poor?
 Art fancy sick, or turn'd a Sor
 To catch at shadowes which are not?
 Come, come, Ile shew unto thy sence,
 Industry hath its recompence
 What canst desire, but thou maist see
 True substance in variety?
 Dost honour like? acquire the same.
 As some to their immortal fame
 And trophyes to thy name erect
 Which wearing time shall ne're deject
 For riches dost thou long full sore?
 Behold enough of precious store
 Earth hath more silver, pearls and gold,
 Than eyes can see, or hands can hold
 Affect's thou pleasure? take thy fill.
 Earth hath enough of what you will
 Then let not goe, what thou maist find,
 For things unknown, only in mind
Spir. Be still thou unregenerate part,
 Disturb no more my setled heart,
 For I have vow'd, (and so will doe)
 Thee as a foe, still to pursue.
 And combate with thee will and must,
 Untill I see thee laid in th' dust
 Sisters we are, ye[a] twins we be,
 Yet deadly feud 'twixt thee and me,
 For from one father are we not,
 Thou by old Adam wast begot,
 But my arise is from above,
 Whence my dear father I do love
 Thou speakst me fair, but hatst me sore.
 Thy flatt'ring shews Ile trust no more
 How oft thy slave, hast thou me made.
 When I believ'd, what thou hast said.
 And never had more cause of woe
 Then when I did what thou bad'st doe
 Ile stop mine ears at these thy charms,
 And count them for my deadly harms
 Thy sinfull pleasures I doe hate,
 Thy riches are to me no bait,

Thine honours doe, nor will I love;
 For my ambition lyes above
 My greatest honour it shall be
 When I am victor over thee,
 And triumph shall, with laurel head,
 When thou my Captive shalt be led,
 How I do live, thou need'st not scoff,
 For I have meat thou know'st not off,
 The hidden Manna I doe eat,
 The word of life it is my meat
 My thoughts do yield me more content
 Then can thy hours in pleasure spent
 Nor are they shadows which I catch,
 Nor fancies vain at which I snatch,
 But reach at things that are so high,
 Beyond thy dull Capacity,
 Eternal substance I do see,
 With which enriched I would be
 Mine Eye doth pierce the heavens and see
 What is Invisible to thee
 My garments are not silk nor gold,
 Nor such like trash which Earth doth hold,
 But Royal Robes I shall have on,
 More glorious than the glistening Sun,
 My Crown not Diamonds, Pearls, and gold,
 But such as Angels heads infold
 The City where I hope to dwell,
 There's none on Earth can parallel,
 The stately Walls both high and strong,
 Are made of pretious Jasper stone,
 The Gates of Pearl, both rich and clear,
 And Angels are for Porters there
 The Streets thereof transparent gold,
 Such as no Eye did e're behold,
 A Chrystal River there doth run,
 Which doth proceed from the Lambs Throne
 Of Life, there are the waters sure,
 Which shall remain for ever pure,
 Nor Sun, nor Moon, they have no need,
 For glory doth from God proceed
 No Candle there, nor yet Torch light,
 For there shall be no darksome night

60
 70
 80
 90
 100
 65 The City. The remainder of the poem is based on Revelation 21:2
 And I John saw the holy city, new Jerusalem, coming down from
 God out of heaven, prepared as a bride adorned by her husband"

From sickness and infirmity,
For evermore they shall be free,
Nor withering age shall e're come there,
But beauty shall be bright and clear;

This City pure is not for thee,
For things unclean there shall not be:
If I of Heaven may have my fill,
Take thou the world, and all that will.

1678

Edward Taylor

c. 1645 • 1729

Very few biographical facts concerning Edward Taylor are known. He was born in Coventry, England. In 1668, at the age of twenty-two or twenty-three, he left England, presumably for liberty of conscience, and came to Boston, where he was cordially received by Increase Mather. He was admitted to Harvard College and was graduated in the Class of 1671. A lifelong friendship with Samuel Sewall, of the same class, dates from his college years. "He and I," Sewall wrote, "were Chamber fellows and Bed fellows in Harvard-College Two years. He being admitted into the College, drew me thither [i.e., to himself]." Following his graduation, Taylor became pastor of the church at Westfield, Massachusetts. He lived quietly at Westfield during the remaining fifty-eight years of his life, serving the community for that long period both as minister and as physician. Twice married, he had seven children by his first wife and six by his second. Ezra Stiles, his grandson (President of Yale, 1778-1795), described him as "a man of small stature but firm of quick Passions—yet serious and grave."

Taylor did not write his poems for publication. They must have been read by very few during the poet's lifetime, and for more than two centuries after his death their existence was almost completely forgotten. The recent publication of a small portion of Taylor's manu-

scripts has greatly enriched our poetical heritage from colonial times. Indeed, Taylor's poetry takes rank not only as the best poetry written in America before the nineteenth century but as one of the classics of New England literature.

Taylor wrote in the "metaphysical" tradition, the tradition of Donne, Crashaw, and Herbert, and he must have been influenced by their poetry, particularly by Herbert's. His structure follows the "metaphysical" pattern, that is, to borrow T. S. Eliot's description, "the elaboration of a figure of speech to the farthest stage to which ingenuity can carry it" and "a development by rapid association of thought." His poetry, nevertheless, is in no real sense imitative, for the stuff of Taylor's poetry is indisputably his own. The thought and emotion are elaborated in homely metaphors drawn straight from the poet's own experience. The weaving of cloth affords the metaphorical vehicle in one poem, the making of bread, in another; the cultivation of flowers, in a third. Music and musical instruments are a rich source of figurative language—the many musical references help to refute the popular notion that the early Puritans were hostile to music.

Taylor's poems help to refute also the notion that Puritans were, without exception, grim and strenuously unhappy. Taylor celebrates the joys of the Christian

life, to him the Christian experience was something quite delightful. His saints, unlike Bunyan's plodding pilgrim are "encoached for Heaven," and they sing as they ride. The Christian life is a rich banquet with music. The water of life is "beer—the bread of life, Heaven's Sugar Cake." He experiences a mystical union with the divine. He describes in brilliant, ardent verses

Christ's ascent into Heaven and longs for wings to follow after

The Poetical Works of Edward Taylor, ed. T. H. Johnson, New York, 1927 • Austin Warren, "Edward Taylor's Poetry: Colonial Baroque," The Kenyon Review, III, Summer 1941 • W. C. Brown, "Edward Taylor: An American Metaphysical Poet," American Literature, XVI, November 1944

From • God's Determinations

The Glory of and Grace in the Church Set Out

Come now behold
Within this Knot What Flowers do grow
Spangle like gold
Whence Wreaths of all Perfumes do flow
Most Curious Colours of all Sorts you shall
With all Sweet Spirits scent Yet that's not all

Oh! Look, and finde
These Choicest Flowers most richly Sweet
Are Discipline
With Artificiall Angells meet
An heap of Pearls is precious but they Shall
When Set by Art Excell Yet that's not all

Christ's Spirit showers
Down in his Word, and Sacraments
Upon these Flowers
The Clouds of Grace Divine Contents.
Such things of Wealthy Blessings on them fall
As make them sweetly thrive Yet that's not all

Yet Still behold!
All flourish not at once We see
While Some Unfold
Their blushing Leaves, some buds there bee.
Here's Faith, Hope, Charity in flower, which call
On yonders in the Bud Yet that's not all.

But as they stand
Like Beauties reeking in perfume
A Divine Hand
Doth hand them up to Glories room
Where Each in sweet'ned Songs all Praises shall
Sing all ore Heaven for aye And that's but all

30
1939

The Joy of Church Fellowship Rightly Attended

In Heaven soaring up, I dropt an Eare
On Earth and oh! sweet Melody
And listening found it was the Saints who were
Encoacht for Heaven that sang for Joy
For in Christs Coach they sweetly sing,
As they to Glory ride therein.

10 Oh! joyous hearts! Enfir'd with holy Flame!
Is Speech thus tassled with praise?
Will not your inward fire of Joy contain,
That it in open flames doth blaze?
For in Christs Coach Saints sweetly sing,
As they to Glory ride therein.

10

And if a string do slip, by Chance, they soon
Do screw it up again whereby
They set it in a more melodious Tune
And a Diviner Harmony
For in Christs Coach they sweetly sing
As they to Glory ride therein

The Glory . . . Out • 26 reeking, reeking Obviously, the word does not have the unpleasant connotation of modern usage

The Joy . . . Attended • 8 tassled, tasseled, adorned

In all their Acts, publick and private, nay,
 And secret too, they praise impart
 But in their Acts Divine and Worship, they
 With Hymns do offer up their Heart
 Thus in Christs Coach they sweetly sing
 As they to Glory ride therein.

20

Some few not in, and some whose Time and Place
 Block up this Coaches way do goe
 As Travellers afoot and so do trace
 The Road that gives them right thereto,
 While in this Coach these sweetly sing
 As they to Glory ride therein

1939

Huswifery

The poem is a good example of Taylor's ingenious elaboration of a single metaphor

Make me, O Lord, thy Spinning Wheele compleat
 Thy Holy Worde my Distaff make for mee
 Make mine Affections thy Swift Flyers neate
 And make my Soule thy holy Spooles to bee
 My Conversation make to be thy Reelee
 And reele the yarn thereon Spun of thy Wheele

Make me thy Loom then, knit therein this Twine
 And make thy Holy Spirit, Lord, winde quills
 Then weave the Web thyselfe. The yarn is fine
 Thine Ordinances make my Fulling Mills
 Then dy the Same in Heavenly Colours Choice
 All pinkt with Varnisht Flowers of Paradise

Then cloath therewith mine Understanding, Will,
 Affections, Judgment, Conscience, Memory,
 My Words, and Actions, that their shine may fill
 My wayes with glory and thee glorify
 Then mine apparell shall display before yee
 That I am Cloathd in Holy robes for glory.

1939

From • Sacramental Meditations

The Experience

The poem seems to express an authentic mystical experience, the union of the soul with God, and should be compared with an even more notable account of such an experience in Jonathan Edwards' "Personal Narrative"

Oh' that I always breath'd in such an aire,
 As I suckt in feeding on sweet Content!
 Disht up unto my Soul ev'n in that pray're
 Pour'd out to God over last Sacrament
 What Beam of Light wrapt up my Sight to finde
 Me neerer God than ere Came in my minde?

Most Strange it was! But yet more Strange that shine
 Which filld my Soul then to the brim to spv
 My nature with thy Nature all Divine
 Together joynd in Him thats Thou, and I
 Flesh of my Flesh, Bone of my Bone there's run
 Thy Godhead, and my Manhood in thy Son.

Oh' that that Flame which thou didst on me Cast
 Might me enflame, and Lighten everywhere
 Then Heaven to me would be less at last,
 So much of heaven I should have while here
 Oh! Sweet though Short! I'll not forget the same.
 My neerness, Lord, to thee did me Enflame

I'll Claim my Right Give place, ye Angells Bright
 Ye further from the Godhead stande than I
 My Nature is your Lord, and doth Unite
 Better than Yours unto the Deity
 Gods Throne is first and mine is next, to you
 Onely the place of Waiting-men is due.

Huswifery, housewifery • 3 Flyers, the pair of arms in a spinning wheel which revolve around the bobbin to twist the yarn • 8 quills, spindle or spools • 10 Fulling Mills, a mill for cleaning, shrinking, and thickening cloth This is an especially happy analogy, since the ordinances of the church may be supposed to have a similarly purifying and fortifying effect

Oh' that my Heart thy Golden Harp might bee
 Well tun'd by Glorious Grace. that ev'ry string
 Screw'd to the highest pitch, might unto thee
 All Praises wrapt in sweetest Musick bring
 I praise thee, Lord, and better praise thee would
 It what I had, my heart might ever hold

30
 1939

Meditation Eight

I kening through Astronomy Divine
 The Worlds bright Battlement, wherein I spy
 A Golden Path my Pensill cannot line
 From that bright Throne unto my Threshold ly
 And while my puzzled thoughts about it pore
 I finde the Bread of Life in't at my doore

When that this Bird of Paradise put in
 This Wicker Cage (my Corps) to tweedle praise
 Had peckt the Fruite forbid and so did fling
 Away its Food and lost its golden dayes,
 It fell into Celestiall Famine sore
 And never could attain a morsell more.

10

Alas' alas' Poore Bird, what wilt thou doe?
 This Creatures field no food for Souls e're gave.
 And if thou knock at Angells dores they show
 An Empty Barrell they no Soul bread have
 Alas' Poore Bird, the Worlds White Loafe is done.
 And cannot yield thee here the smallest Crumb.

In this sad state, Gods Tender Bowells run
 Out Streams of Grace And he to end all strife
 The Purest Wheate in Heaven, his deare-dear Son
 Grinds, and kneads up into this Bread of Life
 Which Bread of Life from Heaven down came and
 stands
 Disht on thy Table up by Angells Hands.

20

Did God mould up this Bread in Heaven, and bake,
 Which from his Table came, and to thine goeth?
 Doth he bespeake thee thus, Thy Soule Bread take,
 Come, Eate thy fill of this, thy Gods White Loafe?

Its Food too fine for Angells, yet come, take
 And Eate thy fill Its Heavens Sugar Cake

30

What Grace is this knead in this Loafe? This thing
 Souls are but petty things it to admire
 Yee Angells, help This ill would to the brim
 Heav'ns whelm'd-down Chrystall meeles Bowles, yea
 and higher.
 This Bread of Life dropt in thy mouth doth Cry:
 Eate, Eate me, Soul, and thou shalt never dy.

1939

Meditation Twenty

The poem describes Christ's ascension to Heaven

View, all ye eyes above, this sight which flings
 Seraphick Phancies in Chill Raptures high
 A Turffe of Clay, and yet bright Glories King
 From dust to Glory Angell-like to fly
 A Mortall Clod immortaliz'de, behold,
 Flyes through the skies swifter than Angells could

Upon the Wings he of the Winde rode in
 His Bright Sedan, through all the Silver Skies,
 And made the Azure Cloud, his Charriot, bring
 Him to the Mountain of Celestiall joyes
 The Prince o'th'Aire durst not an Arrow spend,
 While through his Realm his Charriot did ascend

10

He did not in a Fiery Charriot's shine,
 And Whirlewinde, like Elias upward goe

The Experience • 27 highest pitch. The tightening of the strings of musical instruments is a favorite figure with Taylor • 30 ever, always, constantly, thus repeating the thought of the first line

Meditation Eight • 6 Bread of Life. John 6:35 And Jesus said unto them, I am the bread of life " • 7 Bird of Paradise, the soul • 8 tweedle, sing • 11 Celestiall Famine, a lack of spiritual food • 14 Creatures field, the world • 19 Bowells, the seat of pity, hence, compassion • 34 whelm'd-down, filled to overflowing

Meditation Twenty • 11 Prince . . . Aire, Satan, who is described in Ephesians 2:2 as 'the prince of the power of the air' • 14 Elias, Elijah, whose ascent to heaven is described in II Kings 2:11

But th' golden Ladders Jasper rounds did climbe
 Unto the Heavens high from Earth below.
 Each step had on a Golden Stepping Stone
 Of Deity unto his very Throne

Methinks I see Heavens sparkling Courtiers fly,
 In flakes of Glory down him to attend; 20
 And heare Heart Cramping notes of Melody
 Surround his Charriot as it did ascend:
 Mixing their Musick, making e'ry string
 More to inravish, as they this tune sing

God is Gone up with a triumphant shout
 The Lord with sounding Trumpets melodies
 Sing Praise, sing Praise, sing Praise, sing Praises out.
 Unto our King sing praise seraphick-wise!
 Lift up your Heads, ye lasting Doors, they sing
 And let the King of Glory Enter in 30

Art thou ascended up on high, my Lord,
 And must I be without thee here below?
 Art thou the sweetest joy the Heavens afford?
 Oh! that I with thee was! what shall I do?
 Should I pluck Feathers from an Angells Wing.
 They could not waft me up to thee my King

Lend me thy Wings, my Lord, I'st fly apace,
 My Soules Arms stud with thy strong Quills, true
 Faith,
 My Quills then Feather with thy Saving Grace.
 My Wings will take the Winde thy Word displai'th. 40
 Then I shall fly up to thy glorious Throne
 With my strong Wings whose Feathers are thine own
 1939

Meditation Sixty, Second Series

This poem, whose theme is the "water of life," may be regarded as a companion piece to "Meditation Eight," whose theme is the "bread of life."

Ye Angells bright, pluck from your Wings a Quill;
 Make me a pen thereof that best will write

Lende me your fancy and Angellick skill
 To treat this Theme, more rich than Rubies bright
 My muddy Inke and Cloudy fancy dark
 Will dull its glory, lacking highest Art

An Eye at Centre righter may describe
 The Worlds Circumferentiall glory vast,
 As in its nutshell bed it snugs fast t'ide.
 Than any angells pen can glory Cast 10
 Upon this Drink drawn from the Rock, tapt by
 The Rod of God, in Horeb, typickly.

Sea water strain'd through Minerall, Rocks, and Sands
 Well Clarifi'd by Sunbeams, Dulcifi'de.
 Insipid, Sordid, Swill, Dishwater stands.
 But here's a Rock of Aqua-Vitae tri'de!
 When once God broacht it, out a River came
 To bath and bibble in, for Israels train.

Some rocks have sweat Some Pillars bled out tears,
 But here's a River in a Rock up runn'd, 20
 Not of Sea Water nor of Swill It's beere!
 No Nectar like it! Yet it once unbungd,
 A River down out runs through ages all.
 A Fountain opte, to wash off Sin and Fall

Christ is this Horebs Rock, the streames that slide
 A River is of Aqua Vitae Deare,
 Yet costs us nothing, gushing from his side
 Celestiall Wine our sinsunk souls to cleare.
 This Rock and Water, Sacramentall Cup
 Are made, Lords Supper Wine for us to sup. 30

This Rock's the Grape that Zions Vineyard bore,
 Which Moses Rod did smiting pound, and press,

Meditation Twenty • 29 Lift in, based upon Psalms 24 7 • 37
 I'st, I wouldst

Meditation Sixty • 11 Rock Horeb, an allusion to the smiting of the rock by Moses, recorded in Numbers 20 11 • 12 typickly. The rock from which the water flowed typified, or prefigured, Christ Compare 1 Corinthians 10 4 And did all drink the same spiritual drink for they drank of that spiritual Rock that followed them and that Rock was Christ" • 16 Aqua-Vitae, brandy • 21 beere. Good Puritans had no aversion to alcoholic beverages, if moderately used (Compare Sewall's Diary, August 25, 1709.) One is nevertheless astonished at the audacity of the poet in using beer as an emblem of the "spiritual drink" • 24 opte, opened

Untill its blood, the brooke of Life, run ore
 All Glorious Grace, and Gracious Righteousness
 We in this brook must bath and with faiths quill
 Suck Grace and Life out of this Rock our fill

Lord, oynt me with this Petro oyle. I'm sick
 Make me drink Water of the Rock I'm dry
 Me in this fountain wash my filth is thick
 I'm faint: give Aqua Vitae or I dy. 40
 If in this stream thou cleanse and Chearish mee,
 My Heart thy Hallelujahs Pipe shall bee.

1939

Meditation One Hundred and Ten, Second Series

The Angells sung a Carole at thy Birth,
 My Lord, and thou thyselfe didst sweetly sing
 An Epinicium at thy Death on Earth.
 And order'st thine, in memory of this thing,
 Thy Holy Supper, closing it at last
 Up with an Hymn, and Choakst the foe thou hast.

This Feast thou madst in memory of thy death
 Which is disht up most graciously and towers
 Of reeching vapours from thy Grave (Sweet breath)
 Aromatize the Skies That sweetest Showers. 10
 Richly perfumed by the Holy Ghost,
 Are rained thence upon the Churches Coast

Thy Grave beares flowers to dress thy Church withall,
 In which thou dost thy Table dress for thine
 With Gospell Carpet, Chargers, Festivall
 And Spirituall Venison, White Bread and Wine
 Being the Fruits thy Grave brings forth and hands
 Upon thy Table where thou waiting standst

Dainties most rich, all spiced o're with Grace,
 That grow out of thy Grave do deck thy Table. 20
 To entertain thy Guests, thou callst, and place
 Allowst, with welcome (and this is no Fable).

And with these Guests I am invited to't,
 And this rich banquet makes me thus a Poet.

Thy Cross planted within thy Coffin beares
 Sweet Blossoms and rich Fruits, whose steams do rise
 Out of thy Sepulcher and purge the aire
 Of all Sins dampes and fogs that Choake the Skies
 This Fume perfumes Saints hearts as it out peeps,
 Ascending up to bury thee in th'reechs 30

Joy stands on tiptoes all the while thy Guests
 Sit at thy Table, ready forth to sing
 Its Hallilujahs in sweet musicks dress
 Waiting for Organs to imploy herein
 Here matter is allowd to all, rich, high,
 My Lord, to tune thee Hymns melodiously

Oh! make my heart thy Pipe the Holy Ghost
 The Breath that fills the same and Spiritually.
 Then play on mee, thy pipe, that is almost
 Worn out with piping tunes of Vanity 40
 Winde musick is the best, if thou delight
 To play the same thyselfe, upon my pipe

Hence make me, Lord, thy Golden Trumpet Choice,
 And trumpet thou thyselfe upon the same
 Thy heart enravishing Hymns with Sweetest Voice
 When thou thy Trumpet soundst, thy tunes will flame.
 My heart shall then sing forth thy praises sweet,
 When sounded thus with thy Sepulcher reech.

Make too my Soul thy Cittern, and its wyers
 Make my affections and rub off their rust 50
 With thy bright Grace and screw my Strings up higher,
 And tune the same to tunes thy praise most Just
 Ile close thy Supper then with Hymns most sweet,
 Burr'ing thy Grave in thy Sepulcher's reech

1939

Meditation Sixty • 37 Petro, of the rock

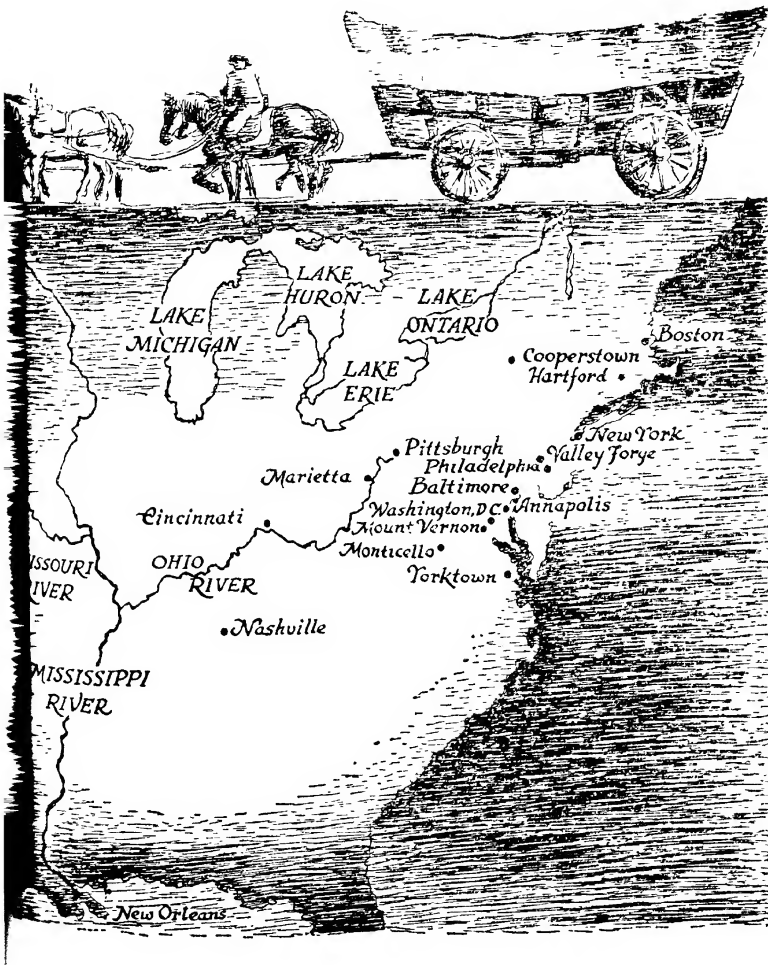

Meditation One Hundred and Ten • 3 Epinicium, epinicion, a song of triumph • 9 reeching, the "reeking" atmosphere, a cloud of incense • 31 Joy . . . tiptoes Taylor's editor suggests that the phrase owes something to George Herbert's "The Church Militant" "Religion stands on tip-toe in our land Readie to pass to the American strand" • 48 thy Sepulcher reech, the breath of thy Sepulcher • 49 Cittern, cithern, a lutelike instrument played with a plectrum • 54 Burr'ing, burying

I. Intellectual Currents

A NEW and a PROUD NATION

The most distinctive aspects of the second great stage of American development were the stabilization of independent political institutions and the corresponding cultural nationalism which pervaded almost every phase of American thought. The stage is often called the early national period. Although various other dates might be given, it is justifiably described as beginning with the Stamp Act Congress of 1765, wherein the united political power of Americans was first demonstrated, and as ending in 1829 with the inauguration of Andrew Jackson as seventh President of the United States, an event which was a triumph for the common man.

These sixty-four years present a picture of world-shaking change. This was the age of the American Revolution, the ratification of the Constitution, and the development of the

two-party system of government. It was the age of George Washington and John Paul Jones, of Shays' Rebellion and the Whiskey Insurrection, of the Louisiana Purchase and the Lewis and Clark Expedition, of the War of 1812, of Henry Clay and Daniel Webster and John C. Calhoun, of the Missouri Compromise and the Monroe Doctrine. In Europe it was the age of the French Revolution and of the rise and fall of Napoleon, of the romantic revival and the industrial revolution in England.

Like all periods of rapid change this one was inexpressibly complex, but it was marked by the general collapse of anachronistic institutions and philosophies. The "haves" were ranged against the "have nots," aristocratic and landed classes against those less fortunate, proponents of centralized control against those who wished more local autonomy, absolutists and authoritarians against all colors of individualists and democrats. Western civilization painfully sought new compromises in these perennial conflicts, and those it arrived at, while not wholly satisfactory and far from the last full measure of democracy, were considerably more democratic than the world had known before.

No explanation as simple as this can be entirely satisfactory. The familiar clashes of the era—Mercantilism *vs.* Free Trade, Imperialism *vs.* Home Rule, Tory *vs.* Whig, and Federalist *vs.* Republican—existed in some form long before 1766 and, under other names, are with us still. In the realm of human affairs few basic differences are ever decisively and finally settled.

As an illustration, consider the Revolutionary ideals of liberty and equality, in which most Americans profess belief. Practically regarded, these two concepts have incompatible elements; for liberty, followed to its logical extreme, is antisocial, and social and economic equality can only be obtained by severe limitation of individual freedom. Nevertheless, reconciliation of the two is one of the central problems of a democratic society. Neither can be absolute; the best that can be hoped for is that under favorable conditions a people may have a relatively large degree of freedom and a relatively large degree of equality.

Because the most magnificent promise of the American way of life is the fullest possible development of the individual within a society providing equal and exact justice for all, the literature of the early national period has extraordinary interest. The problems faced by the generations who lived between 1765 and 1829 are essentially today's problems. No American, instructed by the last fifteen years in the painful complexity of political events—however remote they may at first seem, can afford to be ignorant of the ideas of George Washington, Alexander Hamilton, Thomas Jefferson, Thomas Paine, John Adams, Andrew Jackson, and their associates. The writings of these men, together with the Declaration of Independence and the Constitution, form a body of political literature which for richness, variety, and importance to the present day is second to none in the world. Even the belles-lettres of the period, slight in comparison to the work of the English romanticists, take on new meaning when read in terms of the political matrix in which they had their origin.

American nationalism was based upon both the geographical isolation of the English colonies and the political, economic, and social controversies which resulted in revolution. The debate over the Stamp Act divided the colonists into two parties: conservatives and radicals, or to give them the names more common at the time, Tories and Whigs, Loyalists and Patriots. The lines of cleavage varied from colony to colony, but the radical leaders came mainly from the middle classes, whose distrust of British control was often mingled with antipathy to the ruling aristocracy. Anti-British feeling was combined from the first with a glorification of the common man and his place in the world. The victorious party consisted of those Americans least aware and least desirous of commercial, social, religious, and cultural ties with Great Britain. Aggressive and self-confident, men "on the make," to use a phrase of a later age, they had nevertheless a self-conscious anxiety to show themselves "just as good" as the Tories they had so effectually chased out. Crèvecoeur's "The American Belisarius" (p. 289) vividly suggests the emotional basis of their position.

Self-consciousness was indeed characteristic of the entire period. The idea of inferiority, and particularly of inferiority to Britain, was unendurable. Patriotism often silenced intelligent objectivity; the person who expressed much skepticism regarding American character, institutions, or destiny found himself exceedingly unpopular. The first generations of citizens of the United States were extraordinarily sensitive to criticism.

The train of events, moreover, was propitious for the growth of nationalism. Of the elements contributing to unity, such diverse factors as the Revolution itself, the conservative reaction to the upheaval in France, the Napoleonic wars, and Westward expansion deserve recalling.

Many democratic tendencies were accentuated or set in motion by the Revolution. Large estates were confiscated and divided; small business and manufacturing were stimulated; church establishments were attacked; slavery, imprisonment for debt, and humiliating punishments were regarded with growing disfavor; the idea of universal education at state expense was voiced. Americans were far from being of one mind about these matters, but they recognized that such tendencies differentiated the United States from the nations of the Old World. They agreed, moreover, in insisting that they were now ready to arrange their own affairs, and in being sublimely confident that they could arrange them better than the English had arranged theirs. The Americans were a "new" people, as Crèvecoeur put it. They were ready to teach the rest of the world; they were weary of being taught.

The assertion of the rights of man by the revolutionists in France seemed at first a gratifying justification of the American example. European convulsions soon brought, however, a strong conservative reaction among Americans, already doubtful that they had wholly solved their political problems. The Federalists, who under the leadership of Hamilton controlled the government from the adoption of the Constitution until 1801, were perhaps not lovers of the common man, but they were still fervent nationalists. They planned and worked to

create a strong federal union, able to withstand possible attack from abroad and to suppress internal disorder. Events proved that they were both wise and patriotic.

The Napoleonic wars, which disrupted commercial and diplomatic accord with Europe, made American isolation much more a reality than it had been before. The United States was finally drawn into a second war with England, largely through the determination of the "War Hawks" of the back country, and the War of 1812 is generally credited with giving the nation that economic self-sufficiency which had long been talked about but never quite achieved. Textile and iron industries grew up quickly, and Americans faced the occupation of the West with full assurance that they had the means to fulfill their dreams of greatness.

The West, despite its individualism, was even more nationalistic than the older seaboard states. It looked to the central government for its lands and the means of access to them, and its local ties were new and weak. It was the West which was least respectful of Europe, most certain that the United States, if necessary, could lick the entire Old World.

From the perspective of the twentieth century it is clear that the bonds of Europe were not cut sharply, that the old pattern of transplantation and adaptation continued as immigrants like Albert Gallatin and P. S. Dupont de Nemours brought their talents to the service of American life. Nationalism, however, was peculiarly significant to literature, for it led Americans to attempt the impossible—the creation, overnight, of a tradition of belles-lettres.

To the nationalist the possession of a first-rate literature of politics and a highly reputable literature of religion was not enough; if poetry, fiction, and the drama were the marks of a great culture, America must have them. If, as Aristotle had asserted, epic poetry was the height of literary art, the United States must have epic poems comparable in grandeur to the North American continent and the superior political institutions of the Republic.

Such was the attitude which lay behind the work of Philip Freneau, Royall Tyler, the Connecticut Wits, William Cullen Bryant, Washington Irving, and James Fenimore Cooper

In Commencement and Fourth of July orations, in newly founded magazines with "United States" or "Columbian" or a state or city name conspicuous in their titles, in anthologies, and in books, Americans hammered at the theme of intellectual independence, the creation of a literary culture better than anything which had yet appeared or which was likely to appear in monarchical Europe. However, they did not succeed in creating such a culture before 1829.

National pride led to many pleas for more generous support of American writers and many elaborate defenses of America against the criticism of British editors and travelers. This material, most voluminous after the War of 1812, has been labeled the "Paper War" and is not of general interest, although both Cooper and Irving contributed to it. It had, however, one all-important effect—it focused the attention of American writers more sharply than ever before upon the native scene. What, they asked themselves, was unique in American life? In their attempt to answer that question they became deeply concerned with native types, dialects, manners, scenery, and institutions. Despite their frequent failure to solve the problem of finding fresh or appropriate forms in which to clothe their new literary materials, they left a body of writing notable both for its variety and for its interpretation of American life.

POLITICAL THOUGHT

The literature of politics is generously represented in the present chapter. It may best be summarized as it centers around four stages of American history: (1) the debate about self-government which extended from the Stamp Act to the Declaration of Independence; (2) the Revolution itself; (3) the struggle for stability and an acceptable balance of the opposing political philosophies of Hamilton and Jefferson; and (4) the continuing battle of the common man for his share of the responsibilities and rewards of political office.

(1) The philosophy and the events which lay behind the Revolution are readily gathered from John Dickinson's "Liberty Song," Benjamin Franklin's "Edict by the King of Prussia" (p. 275) and "Rules by Which a Great Empire May be Reduced to a Small One" (p. 271),

John Adams' *Novanglus* (p. 309), Jonathan Boucher's *View of the Causes and Consequences of the American Revolution* (p. 314), Thomas Paine's *Common Sense* (p. 328), and the Declaration of Independence itself (p. 359). Franklin provides a description of the economic and political irritations enumerated also in the Declaration; the others give an impression of the emotions of the period, deeply rooted as they were in social and religious differences. Boucher deserves particular study, because the Tory position is often ignored or neglected.

These writings are only a small part of the literary debate of 1765-1776. Pamphlets, speeches, sermons, and state papers appeared in profusion. Outstanding among the Whig pamphlets are those by Samuel Adams, James Otis, Daniel Dulany, John Dickinson, and the first works of Hamilton and Jefferson (see Chronological Table for titles and dates). The Tory position was maintained by such writers as Martin Howard, Daniel Leonard, and Samuel Seabury. Patrick Henry's "Give me liberty or give me death" speech of March 1775 is a part of the full picture, as is Francis Hopkinson's allegory, *A Pretty Story* (1774). In a little more than a decade a large body of polemical prose appeared, presenting arguments based both upon specific legal or constitutional positions and upon abstract philosophies of government. Both types of argument are observable in the Declaration.

The legal position of the Patriots—denial of the authority of Parliament to levy "internal taxes" on the colonies, assertion of the doctrine of "no taxation without representation," and demands that the colonial legislatures be recognized as the only just means of obtaining "consent of the governed"—proved in the end less defensible than direct appeal to the right of revolution. For that and other "natural rights" specifically named in the Declaration, the Patriots had the precedents of the revolutions which had driven Charles I and James II from the English throne. They knew their history and their political philosophy; their writings show close study of the theories of Thomas Hobbes, Sir Robert Filmer, John Locke, and many other English and European thinkers. They had behind them, moreover, a solid tradition c

theological disputation. It is impossible to read their presentations of the colonial case without increasing respect for the caliber of their minds and the clarity of their exposition.

(2) The "clash of resounding arms" at Lexington ended the constitutional debate and brought to the fore more emotional and persuasive writers—propagandists they would now be called. Their task was to unite and hold in line a Revolutionary party which was never perhaps more than a two-thirds majority of the population; their method was to appeal to the interests and the prejudices of as many different groups as they could. Master of them all was Paine, whose *Crisis* series (p. 348) ranks with the best propaganda ever written. Newspapers and magazines carried much similar material, including numerous poems such as Freneau's "Memorable Victory" (p. 441), Hopkinson's "Battle of the Kegs" (p. 323), and Dwight's "Columbia, Columbia, to Glory Arise" (p. 451). Popular songs, ballads, and hymns had their place in the literary war (see p. 320). There were also extensive verse satires, of which the most famous was John Trumbull's *M'Fingal* (Part I, 1775), an imitation of Samuel Butler's *Hudibras* (1663-1678), an English satire. The Loyalists, too, had their propagandists, of whom the best known were Joseph Stansbury and Jonathan Odell. They show clearly the social cleavage of the Revolution, for they almost invariably assumed a snobbish tone toward the "rabble." Few printing presses were available to the Loyalists, however, and their opinions must be sought in letters, diaries, parodies of Patriot songs, and such accounts of affairs as Boucher's *View*, published later in England. Neither party was averse to name-calling or scurrility, and it is perhaps no accident that the most good-natured of Revolutionary songs, "Yankee Doodle" (p. 321), is the only one which has remained on the lips of Americans. As Crèvecoeur's "The American Belisarius" reveals, it was not a time of tolerance or generosity toward one's enemies.

(3) A rational and deliberative tone is again uppermost (although undertones of emotion are not lacking) in the literature of the years between the end of the war and the

stabilization of the new government. Its great monument, outside of the Constitution itself is *The Federalist*, in the main the work of Hamilton (p. 364). Washington's *Farewell Address* (p. 374), in which Hamilton had a part, the inaugurals of Jefferson (p. 389), and the political content of such pieces as Tyler's *The Contrast* (p. 509), H. H. Brackenridge's *Modern Chivalry* (p. 383), and Freneau's "Stanzas to an Alien" (p. 447) round out the picture of the political issues of the era. Fuller representation would include *The Anarchiad* (1786-1787) and numerous other works by the Connecticut Wits, most of whom were strongly Federalist in their convictions. Joel Barlow, author of *Advice to the Privileged Orders* (1791) and *The Conspiracy of Kings* (1792) was a notable exception (see p. 457).

Especially interesting here is the repetition, with variations, of the age-old conflicts Centralized control and local autonomy, government by the few and government by the many—these were again among the alternatives. Woodrow Wilson and others have suggested that the Constitution was based upon a political philosophy derived ultimately from Newtonian physics, to the effect that opposing political forces can be balanced one against another, and the state, though constantly moving, preserved in equilibrium. John Adams was probably the chief American exponent of this philosophy, with his distrust of unlimited democracy and his theory that executive, aristocratic, and democratic elements must be preserved in a stable government by elaborate checks and balances. The French political philosopher Montesquieu, widely read in America, had much the same idea. Whatever its precise source the Constitution unquestionably reflects a conservative reaction to Revolutionary doctrine. It has proved flexible enough, however, to protect both majorities and minorities with reasonable success for over 150 years.

(4) The Federalists, however right they may have been, were not astute politicians. They did not disguise their belief that the masses counted for little, the *aristoi* for much, and they ignored local loyalties and conditions which they would have done well to study. The common people demanded respect throughout the period, and toward the end of it the

received from most successful politicians the flattery which has ever since been theirs. They wanted their leaders "folksy," and they did not care whether or not words were meticulously pronounced and diplomatic protocol rigorously observed. They did not, in short, accept Captain Farrago's notion that those who handle the affairs of state should be informed on fundamental principles and skilled in public speaking (see p. 383). In 1828, at length, the common people came into their own and elected Andrew Jackson. They did not, of course, find thereby an immediate solution to the unending problems of democratic government.

Irving's satirical portrait of Jefferson in the *Knickerbocker History* (p. 540) gives some indication of the political temper of the last phase of the early national period, but the citizenry of Templeton as delineated in Cooper's *The Pioneers* (p. 586) are even better evidence. Special privileges had to go, even though their elimination might mean economic waste, ignorance enshrined in public office, and general irresponsibility. Cooper's own attitude, expressed far more irascibly elsewhere, was precisely that of the orderly man who surveys the litter in a public park on the morning after the Labor Day weekend. He doubted that the common people were yet prepared to take care of their heritage. The political spirit of the period was best expressed, however, by Jackson himself in the peroration to his *Farewell Address* (p. 397). Pride in the national accomplishment and assurance that there was no longer danger from abroad were combined with the recognition that "It is from within, among yourselves, from cupidity, from corruption, from disappointed ambition, and inordinate thirst for power, that factions will be formed and liberty endangered. It is against such designs, whatever disguise the actors may assume, that you have especially to guard yourselves." Who shall say that Jackson was not right?

ECONOMIC DEVELOPMENT

The problem of earning a living was not so frequently or so fully the concern of literature after 1765 as it had been before. Nevertheless, the later writing can be better understood with

some knowledge of the economic thought and conflicts which distinguished American life in the early national period.

Fundamental, of course, was the desire of individuals to "get on" in the world. Simple living, thrift, and industry, the ideals preached by Poor Richard (see p. 264), were the ideals of most men. They were praised by writers as diverse as Crèvecoeur, Washington, Jefferson, Dwight, and Barlow. "My neighbor Freeport" (p. 500) and Rip Van Winkle (p. 559) were most decidedly not the heroes of the era. Americans were on their way to full acceptance of the gospel proclaimed in 1838 by Henry Wadsworth Longfellow (see "A Psalm of Life," p. 771):

Let us, then, be up and doing

With a heart for any fate;

Still achieving, still pursuing,

Learn to labor and to wait.

Most Americans probably felt that money was the chief thing to be up and doing about and they did not question the validity of that end for work. John Woolman (p. 298) was an exception; like Thoreau in a later generation he wished to know the result of the pursuit of wealth. Far more averse to luxuries and pomp than many who cried out against them from higher places in the world, he reached a thought-provoking conclusion: "Wealth desired for its own sake Obstructs the increase of Virtue, and large possessions in the hand of selfish men have a bad tendency, for by their means too small a number of people are employed in things usefull, and therefore some of them are necessitated to labour too hard." A few other observers expressed a similar concern lest money-getting end in too wide a discrepancy between the very rich and the very poor (see, for example, Crèvecoeur and Dwight), but Poor Richard's disciples would scarcely have admitted the possibility that men could labor too hard.

At what, then, did Americans labor? They were primarily an agricultural people

1765 and they were still so in 1829, but in the interval the economy of the nation underwent great changes which had their due effect upon literature. Three such changes may be mentioned: (1) the shift from a colonial to a national economy, although with continuing conflicts between those who wanted a centralized control of commerce, manufactures, finance, and transportation and those who wanted a large measure of local control; (2) the far-reaching development of industry and the factory system; and (3) the creation, through expansion to the West, of an enormous domestic market.

The colonies in 1766 were dependencies of a nation which, in so far as it had a colonial policy, had accepted the Mercantilist doctrine that overseas possessions should supply the home country with raw materials and serve as a market for manufactured products. The trade regulations based upon this theory caused much hard feeling, as may readily be seen in Franklin's "Edict" and "Rules"; they were, of course, one of the principal causes of the Revolution. Mercantilism was also partially responsible for the British desire to limit expansion to the West, where the control of markets would be more difficult. That attitude aroused as much antagonism, probably, as either the trade regulations or the taxation which was sought to help pay for the French and Indian War; the Virginians were particularly unwilling to give up the West to the Indians. As Paine's *Common Sense* shows, the Americans had arrived at the point where they thought in "continental" terms, and they were determined to control not merely their internal affairs but their economic life as well.

The success of the Revolution permitted the development of home manufactures and the West. The federal government gradually acquired title to the Western lands, and with the Constitution, internal tariff barriers were removed. Washington's *Farewell Address* provides a good view of the hope that the natural economic rivalries of the various sections might be minimized, a hope which was echoed by Jefferson and Jackson. Americans did not agree, however, on the extent to which the central government should aid the states in internal improve-

ments or "protect" infant industries or control the financial structure of the nation. They never have agreed on these matters, but their disagreements were especially sharp in the age of Hamilton's *Report on Manufactures*, of the clamor of the West for roads and canals, and of Jackson's titanic struggle with the Second Bank of the United States (see note, p. 403).

Industrialization was forced upon the United States by the situation in Europe, where France and Great Britain were at war almost continuously from 1793 until 1815. The unprecedented development of American foreign trade involved the nation in its first attempt to make good its right to trade as a neutral with belligerent nations, in the face of Napoleon's Berlin and Milan Decrees and the British Orders in Council. The Embargo Act of 1807 and the War of 1812 are usually credited with effecting a large measure of self-sufficiency in manufactures, although the full effect of the factory system was not to be felt until several decades later. Irving's satire on governing by proclamation (p. 543) suggests the Federalist attitude toward Jefferson's theory of economic isolation to avoid embroilment in war. Bryant's "A Meditation on Rhode Island Coal" (p. 471) reflects the development of industrialization.

The occupation of the West began almost immediately after the Revolution, but it was enormously accelerated by the introduction of new means of transportation. The steamboat reached the Ohio River in 1811, only four years after Robert Fulton's first successful demonstration on the Hudson. Roads and canals followed swiftly; the Cumberland or National Road had reached Zanesville, Ohio, by 1825, the year in which the Erie Canal was completed. The railroad era was soon to come, for construction of the Baltimore and Ohio began in 1828. The West soon had its own literature, reflecting the turbulence of the period, as may be seen in the writings of Morgan Neville (p. 502) and Peter Cartwright (p. 430). Its development is also suggested by Cooper's *The Pioneers*, despite a slightly earlier setting, and by Bryant's "The Prairies" (p. 473). From the time of the *Western Review* (1819-1821) c

Lexington, Kentucky, this Western section had periodicals of its own and a local literature.

RELIGION

Religion remained vastly important to Americans, but it did not occupy quite so central a position in the national life as it had previously. The disruption and damage of the Revolution perceptibly weakened the position of many churches; Congress was forbidden by the Constitution to make any laws leading to the establishment of a state church; and the Bill of Rights asserted the principle of complete religious freedom. Disestablishment in those states which had supported particular churches followed, and the period as a whole displays that wide variety of religious thought to which Americans are now accustomed. Nationalistic tendencies may be discerned in various denominations and in the continued dominance of Protestantism, but they are of minor significance.

This is not to say that religious fervor lessened, or that sectarianism disappeared. The masses wanted churches; denominational rivalries were no less intense; and the literature of religion was still enormous.

Calvinism remained a powerful force through the influence of such followers of Edwards as Dwight, and it may be observed in a watered-down form in certain lines of Bryant's "Inscription for the Entrance to a Wood" (p. 467) and "To a Waterfowl" (p. 468). Revivalism flourished at intervals throughout the period, especially in the West, as Cartwright's autobiography (p. 431) suggests. Quakerism, no longer noisily militant, found its finest American exponent in Woolman.

From the standpoint of literary history, however, the distinctive feature of the age is the emergence of the rationalistic and humanitarian doctrines of Deism and Unitarianism. Neither was new; neither was widely popular. The virulence with which they were both attacked gives us some hint of their effect upon the age, and from this distance it is clear that their common confidence in the powers of the human mind and their common tendency to pre-

sent a man-centered rather than a God-centered world expressed something basic in the times.

Deism, which denied the revelation of God in the Bible, preferring to seek religious truth through human reason, regarded religious duties as primarily humanitarian. Franklin arrived at Deistic beliefs early in life and he seems never to have deserted them. After his *Dissertation on Liberty and Necessity* (1725), however, he never expounded them openly, evidently having reached the conclusion that the orthodox Christian churches operated as a desirable social control, doing more good than harm. Somewhat similar attitudes are to be seen in Crèvecoeur, Freneau, Jefferson, and even Washington. With the French Revolution, however, Deism became momentarily a proselyting faith, spread in Deistic newspapers, magazines, and societies, as well as in more or less formal treatises. Three of the last are worth mention: Ethan Allen's *Reason the Only Oracle of God* (1784), for which the Revolutionary hero of Vermont was largely indebted to a Dr. Thomas Young; Paine's *The Age of Reason* (1794-1795; see p. 408); and Elihu Palmer's *Principles of Nature* (1802). These works were the object of almost unbelievably violent attacks by such orthodox Christians as Dwight who regarded Deism not only as the worst form of infidelity and materialism but also as the handmaid of political radicalism. Deism was effectually destroyed, for the masses were not willing to give up the authority of the Bible, whatever they thought of social and political control.

Unitarianism, the denial of the doctrine of the Trinity and the divinity of Jesus Christ, fully explained in William Ellery Channing's sermon (p. 417). It had been common among the upper and more rationalistic classes in Boston and other large New England towns since the 1780's, and became a matter for violent debate only after 1805, when a Unitarian was appointed to the professorship of divinity in Harvard College. Differing from Deism in its acceptance of revelation, it is chiefly significant for its similar emphasis upon human nature and reason, and for its humanitarianism. The genesis of the succeeding age of reform, in so far as that reform was stimulated by Transcendentalism (see p. 716), has often been found

Unitarianism. Closely related to it is Universalism, organized as a formal sect in 1794 with the central doctrine that, since God is all-good, He could never have intended other than that all men shall be saved—a position which had been anticipated some years earlier by Charles Chauncy (p. 184). These doctrines, although not widely popular, challenged the dominance of Calvinism throughout the nation.

SCIENCE and EDUCATION

When Benjamin Silliman founded the *American Journal of Science* in 1818 with the express purpose of raising science to “the elevation of our national character,” he added one more link to the chain of nationalistic ambitions. The period abounded in new scientific associations, museums, libraries, and colleges. This aspect of the age is seldom apparent in literature because of the advance of specialization, but it is worth recalling to the reader of Franklin, Freneau, the Connecticut Wits, and even Cooper and Poe. Scientific rationalism was spreading rapidly, and it was finding institutional support.

Irving's satire on Jefferson's fondness for gadgets suggests that the advance of science was not universally appreciated, as does Poe's famous sonnet (p. 699). On the other hand, the absence of persistent appeals to a providential order of nature will be observed by every reader, and the scientific world-view may be regarded as generally accepted.

Neither the common schools nor the universities found much genuine state support before 1829; the democratization of education was to come somewhat later. The principle that the state should educate its citizens and exert itself for the diffusion of knowledge was, however, clearly enunciated by Washington (p. 379) and Jefferson (p. 353) and other of the founding fathers. The setting aside of public lands in the West for the maintenance of school systems had not succeeded, but the foundation had been laid. Dwight's prophecy of “new-born Oxfords” in the West (p. 456) and Cooper's account of the grandiose educational dreams of Templeton in *The Pioneers* show that Americans were thinking of education.

THE FINE ARTS

The fine arts, relatively unimportant in the colonial period, were especially susceptible to the later urgings of nationalism. Their connection with literature, moreover, was much more intimate than it had been before. While it cannot be said that they attained genuine distinction before 1829, their development was extraordinary and well worth attention.

The piety which had supported portraiture in the earlier age now became patriotic, and the founders of the Republic were given generously such immortality as paint could provide. The numerous portraits of Washington by Gilbert Stuart (1755-1828) are the best-known example of a demand which gave a livelihood to a dozen or more painters in the period. Most of them were trained abroad, many under Benjamin West (1738-1820), an expatriate from Pennsylvania who was President of the Royal Academy from 1792 until his death. Large historical paintings of incidents of the Revolution were also popular, although the most familiar, Emanuel Leutze's "Washington Crossing the Delaware," was painted somewhat late. Most interesting to students of literature, however, because it paralleled the literary search for new material, was the beginning of a landscape school with such painters as Thomas Cole (1801-1848), to whom Bryant addressed a highly characteristic sonnet (p. 472). Numerous galleries, art schools, and associations were founded, of which the most important was the National Academy of the Arts of Design, founded in 1826 and still in existence.

Sculpture was still in the future, although by 1825 a few Americans were settling in Italy to learn that art. They were soon to return to fill the halls of the Capitol at Washington with nationalistic statuary. The carving of ship figureheads was a folk form which later generations have much admired; the observant reader will notice Freneau's reference to the "girl at the helm" in his "Lines by H. Salem" (p. 445).

Music became somewhat more popular in the period, with the organization of choral societies in the larger towns, even as far west as Cincinnati. There was much music in the cities.

and in the 1820's opera was introduced. Immigrants continued to provide the most genuine music-lovers, and except for a few songs such as Samuel Woodworth's "The Old Oaken Bucket" (p. 498) not even lyrics were American. Dwight's "Columbia, Columbia, to Glory Arise" is an example of the patriotic songs which found places in the popular books of music. Francis Scott Key's "The Star-Spangled Banner" is the major contribution of the era, but many generations of Americans have lamented that its melody is neither native nor within the range of most American voices.

Perhaps the most fascinating survival of the cultural nationalism of the period is the classical revival in architecture, with which Cooper had so much fun in *The Pioneers*. Sponsored by Jefferson, who fell in love with the Roman remains at Nîmes in southern France (and with the Maison Carrée in particular), classical forms dominated both public and domestic architecture from shortly after the Revolution until the 1840's. They were closely connected with the conviction that American tastes should be exemplary and republican; they disregarded, as Cooper so neatly demonstrated, the American climate and the American way of life. Colonial and Georgian styles survived, especially in the seaboard towns, and the great architect of the period is now acknowledged to have been Charles Bulfinch (1763-1844), designer of the State House at Boston. The period is memorable, moreover, for the first architectural competition for designs for the national capitol.

T. H.

II. Literary Trends

THE CIRCUMSTANCES of LITERARY PUBLICATION

The literate American between 1765 and 1829 had great advantages over his colonial ancestors. He was the heir of an enormous expansion of printing, of the establishment of a periodical

press scarcely equalled in vigor elsewhere in the world, and of the acceptance to a degree before unknown of the protection of literary property by copyright. None of these developments had reached its height by 1829, but their collective importance to literature can scarcely be overemphasized.

Almost all of the books represented in the present chapter were printed in America for American readers. The exceptions—certain pieces by Franklin, Crèvecoeur's *Letters*, Boucher's *View*, and Paine's *Age of Reason*—are those whose circumstances of publication were peculiar. Irving and Cooper were among the few authors who had audiences on both sides of the Atlantic, and they developed the custom of arranging for nearly simultaneous editions in London and New York.

The spread of printing can be suggested by statistics. In 1810 the census found 202 paper mills in the United States. Charles Evans, who sought in his *American Bibliography* to list all American imprints before 1820 (and did not complete the task), found 35,854 items before 1800, of which 25,634 were printed between 1766 and 1799 inclusive, as against 10,220 items between 1639 and 1765. He listed 329 imprints for 1765 and 784 for 1799. Nor was this steady increase centralized; it was, indeed, less so than would be the case today. The chief center of printing until the Revolution was Boston; Philadelphia then held the lead until the 1820's, when it went to New York. But there were presses in all the larger towns, including those in the West, and many of them published books as well as newspapers and magazines. All printing was still by hand, on flat-bed presses, but improvements and industrialization were in the offing. The Columbian Iron Press, developed about 1807, substituted the principle of the fulcrum for that of the screw. Steam and revolving cylinder presses were soon to be adopted, and one American, William Church (1778-1853), had patented in London in 1821 a typesetting and composing machine.

The stimulation to printing was primarily political, for this was the age of party journal

ism. Much of the political writing by Franklin, Adams, Paine, Jefferson, Hamilton, and Freneau first appeared in newspapers, which, despite paper shortages and military occupations, played a highly valuable part in the Revolution. The war over, newspapers multiplied; it is said that about two hundred were published simultaneously by 1801. Dailies appeared at Philadelphia and New York in 1783 and 1785, when those cities numbered about 25,000 persons. In the Hamilton-Jefferson period, party journalism swiftly came to maturity with the help of Freneau (see p. 437). Newspapers survived the Alien and Sedition Acts (see Freneau's "Stanzas to an Alien," p. 447); their place in political controversy is vividly revealed by Jefferson's attention to them in his *Second Inaugural* (see p. 392). Bryant, it will be remembered (see p. 465), made his fortune as editor and part owner of the New York *Evening Post*, founded by Hamilton in 1801. Throughout the period, in short, newspapers increased rapidly in numbers (by 1829 there were probably more than a thousand of them), in size, and in influence.

Magazines developed more slowly. F. L. Mott has estimated that about seventy-five were begun between 1783 and 1801, several hundred more during the first third of the nineteenth century. Most of them were short-lived, but they played a large part in the rise of belles-lettres. Among those in which material reprinted in the following pages first appeared were the *United States Magazine* (Philadelphia, 1779, edited by H. H. Brackenridge), the *New-York Magazine* (1790-1797), and the *North American Review* (Boston, 1815-1839). Other important literary outlets included the *Farmer's Weekly Museum* (Walpole, N. H., 1793-1810, edited chiefly by Joseph Dennie), the *Columbian Magazine* (Philadelphia, 1786-1792), the *American Museum* (Philadelphia, 1787-1792), the *Massachusetts Magazine* (Boston, 1789-1796), and the *Port Folio* (Philadelphia, 1801-1827, edited by Dennie). These periodicals, and others like them all over the nation, provided a market for poems, essays, fiction, and literary criticism such as had never before been available. They were the background

for the magazine world which supported Edgar Allan Poe in the next decade (see p. 645).

The American author, moreover, was favored after 1790 by a national copyright law protecting him from the unauthorized use of his work within the United States (but not, it will be noted, abroad) for a period of fourteen years, with the possibility of an extension for another fourteen. This law, based upon the similar law passed in Great Britain in 1710, and upon legislation in Connecticut in 1783, was a great boon, although it did not protect American writers from the competition of pirated English books. International copyright was not achieved until 1891.

The book trade developed rapidly after the Revolution, and before the end of the period publishing, as now understood, was replacing older methods of bridging the gap between author and reader. Bookstores and printing establishments transformed themselves into publishers, and some of the familiar names of present-day publishing appeared. The firm of Wiley was founded by Charles Wiley in 1807, that of Harper by J. and J. Harper, printers, in 1817, that of Appleton by Daniel Appleton in 1825. Americans, nevertheless, were still largely dependent upon Great Britain; it has been estimated that American presses supplied only twenty per cent of current books in 1820, only thirty per cent in 1830.

NATIONALISM and ROMANTICISM

The content of American literature between 1765 and 1829 was, we have seen, largely determined by the peculiar circumstances of American life, and shows in large measure the dominant nationalistic pattern of thought of the period. When we turn, however, to the problem of literary form, we are at once impressed by a quite dissimilar and even a conflicting factor—the continuing influence of European and especially English literary tradition. Our early national literature was written at approximately the same time as the so-called romantic revival, and its connections with that movement are so numerous that some scholars have preferred to describe it as American romanticism.

Romanticism is one of those tags of literary history which are useful as broad generalizations but impossible to define precisely. It was first used to serve as a contrast to classicism, in a description of the difference between the prevailing literary temper of the years between 1775 and 1837 and the prevailing literary temper of the century immediately preceding. The foremost English romanticists were Wordsworth, Coleridge, Scott, Byron, Shelley, and Keats, all of them except Scott primarily poets. Despite their wide divergences of temperament and literary production, they represented, taken together, something new in English literature.

The American romanticists included in the present chapter (it must be remembered that numerous later writers might be grouped with them) are Freneau, Bryant, Irving, Cooper, and Poe. Cooper wrote only prose, Irving only a poem or two, and Poe is quite as famous for his prose fiction and criticism as for his poetry. Nevertheless, these writers too, like their English contemporaries, represent something new. Their similarity may be readily demonstrated by brief consideration of five elements which are generally accepted as identifying marks of romanticism.

(1) The revolt against the literary forms and ideas of the period of classicism, evident in varying ways in the work of Wordsworth, Byron, and Shelley, has some parallel in the relatively new forms of fiction developed by Irving, Cooper, and Poe, and in the political poetry of Freneau and Bryant.

(2) The new emphasis upon the imaginative and emotional qualities of literature, apparent in all the English romanticists, is likewise observable in all the Americans. It includes a liking for the picturesque, the exotic, the sensuous, the sensational, and the supernatural, and sometimes, as in the case of Poe, all of them together.

(3) The strong tendency to exalt the individual and the common man, characteristic especially of Wordsworth, was in America almost a national religion, as we have seen.

(4) The fresh interest in external nature, for which Wordsworth is again most famous, may be felt in the poetry of Freneau and Bryant and in the novels of Cooper.

(5) The literary use of the more colorful aspects of the past, common in the work of Coleridge, Scott, and Keats, is also to be found in Freneau's use of the "ruins of empire" theme, in Bryant's fascination by the Mound Builders, in Irving's effort to exploit the legends of the Hudson River region, and in Cooper's long series of historical tales.

It is not surprising, therefore, that the Americans have often been compared with the English romanticists. Doubtless they were deeply influenced by the literary fashions of Great Britain and instances may be shown of direct imitation. Yet we must not too hastily dismiss all of their work as imitative, nor ignore their very great differences from the English. Americans contributed to romanticism as much, perhaps, as they derived from it. The interplay of forms and ideas was simply the continuation of a cultural bond with Europe which no degree of national pride could wholly sever. Always the American writers were drawn in two directions, on the one hand to their own land, which usually furnished them with the content for their writings, and on the other hand to that cosmopolitan tradition which ordinarily furnished them with the forms in which they shaped their ideas.

TYPES of DIMINISHING IMPORTANCE

A distinctive feature of the period is the rise to greater importance than ever before of poetry, the essay, drama, and fiction—those belletristic forms in which the ideas of the writer are shaped within a fairly well defined aesthetic pattern. It cannot be said that Americans uniformly displayed, within these forms, that cultural independence which they thought so desirable. The rise of belles-lettres nevertheless indicates the appearance of a class of men who thought of themselves as literary artists, and of a reading public ready for literature other than the merely informational or utilitarian.

With the advent of more polished and more self-consciously literary writers, the distinctive

ideas of the age were much more likely to find expression in belles-lettres than had previously been the case. Accounts of voyages, promotion tracts, sermons, histories, and biographies continued to be written, but they no longer had a central place.

The only material closely related to the accounts of voyages and the promotion tracts in the following pages is Crèvecoeur's *Letters*, Bartram's *Travels* having been included in Chapter One. The most cursory examination of Crèvecoeur will show that his book is more like a series of familiar essays than like the writing of Bartram and his predecessors. The older types by no means disappeared, but they take a subordinate place, in such works as Jonathan Carver's *Travels* (1778), Jefferson's *Notes on the State of Virginia* (written about 1782), Flint's *Geography and History of the Mississippi Valley* (1827), and the travel books of Bryant, Cooper, and Irving. An especially interesting survival is Poe's extensive use of the 'imaginary voyage' form in the *Narrative of Arthur Gordon Pym* and other minor works.

Sermons similarly became freer and more polished, under the influence of ideals of composition like those expressed by Channing. They were still innumerable, but the only sermon besides Channing's included here is one by Boucher. Dwight's sermons are probably more typical of the time than Channing's, but they and the hundreds of others published during the period are now seldom read. The methods of oral discourse developed in the pulpit had their influence upon political oratory, which, as we shall see, now came into favor.

As we should expect, the nationalistic temper of the period had an immediate effect upon history and biography. The events of the Revolution were recorded, its heroes immortalized by such works as John Marshall's *Life of Washington* (1804-1807), and there was a flood of local histories, headed by Jeremy Belknap's *History of New Hampshire* (1784-1792). Little of this work was objective, and Irving's burlesque of antiquarianism and local pedantry (see p. 539) was doubtless needed. Not for several decades was history of literary merit and

sound scholarship to be popularized by Prescott, Motley, and Parkman. Cooper's history of the United States Navy and Irving's many biographies should not, however, be forgotten. Such writings were thoroughly characteristic of the period in which these men matured.

POLEMICAL TRACTS and TREATISES

The literature of persuasion was, of course, outstanding in an age of constant political discussion. It had a conspicuous place from the first, as we have seen; now it reached a very high level indeed in such examples as Franklin's "Edict" and "Rules," Adams' *Noranglu*, Paine's *Common Sense*, *American Crisis*, and *Age of Reason*, and *The Federalist*. Many other works might be named from the period, for the great bulk of political writings belongs to this class, as do many theological treatises. Closely related to the tract and treatise on the one hand, and to the sermon on the other, are the innumerable political addresses and orations, here represented by the farewell addresses of Washington and Jackson, and by Jefferson's inaugurals.

As was the case in the colonial period, the structure of this material defies generalization. Certain new tendencies are, however, evident. The development of newspapers and magazine made place for short pieces like Franklin's, and for lengthy series of essays and letters such as those by Adams, Paine (in the *Crisis*), and Hamilton. The latter were quite evidently influenced by the rise to prominence of the English periodical essay.

Topical arrangement continued to dominate, with the nature of the controversy determining the pattern. Of especial interest are the meticulous planning of *The Federalist*, described in the first number of that series, and the variety which was achieved by Paine, both in *Common Sense* and in the *Crisis* series.

The addresses and orations will be found to have remarkably similar structure, except that to the topical arrangement the speaker's invariable exordium (introduction) and peroration (conclusion) are added. The modest beginning and the highly dignified conclusion, oft

embodying an appeal to divine guidance, which characterize all of the political speeches in the following pages, are still a part of the pattern of discourse expected of our national leaders.

The rhetorical height of the period was unquestionably the Declaration of Independence, which combines the topical structure of the tract with the tones and methods of oratory. The revisions of Jefferson's first draft (p. 359) provide an opportunity to study the standards of the Revolutionary period. The careful balance of emotion and reason makes the Declaration a model of its kind, and it is not surprising that its phrases have never lost their vividness. Paine's writings have a similar oratorical ring, as do Hamilton's (although less frequently); it is unfortunate that we have no authentic text of the speeches with which Patrick Henry and James Otis electrified their audiences, for they too were doubtless masterpieces of persuasion.

DIARIES and AUTOBIOGRAPHIES

Franklin's *Autobiography* (p. 245) and Woolman's *Journal* (p. 299) would be found upon any list of the great books of the period, and the enduring attraction of diaries and autobiographies is also attested by the inclusion herein of the efforts in these forms by Jefferson (p. 355) and Cartwright (p. 431). All these men had a didactic purpose, ethical, religious, or political, but Cartwright shows some wish to be entertaining. The structure of such writings is ordinarily chronological, with success depending almost wholly upon the attractiveness of the personality self-revealed. Woolman is of course the fulfilment of the tradition of spiritual autobiography, Franklin the most striking evidence of the secularization of American life. More than one commentator has noted the thought-provoking contrast between the two men.

POEMS

Poetry had been cultivated from the first in America; it now began to bulk much larger. The present chapter contains examples of the work of three poets who would be included in any

list of major American verse-makers: Freneau, Bryant, and Poe. Represented also are the poets of the Revolution, the Connecticut Wits—Dwight and Barlow, and the sentimentalists—Wilde and Woodworth.

The singers of the Revolution were more concerned with propaganda than with artistic finish, but the relative sophistication of their forms as compared with those of the *Bay Psalm Book* and *The Day of Doom* is immediately evident. Popular ballad meters were retained, together with such ballad devices as repetition and refrain, but both "Yankee Doodle" and "The Battle of the Kegs" consistently use feminine rhymes and "Nathan Hale," probably the finest of the anonymous ballads, has a subjectivity unusual in the type.

The Revolutionary songs are, in fact, somewhat more free and fresh in their forms than most of the poems of the Connecticut Wits, who regarded themselves as the "highbrows" of their time. The Wits had studied English literature and accepted the "rules" of classicism, including that respect for established types which is sometimes described as the "tyranny of the genres." Dwight thought so highly of Denham, Pope, Thomson, and Goldsmith that he incorporated whole lines of theirs in *Greenfield Hill* and deliberately imitated their forms and diction, even though he was dealing with American themes and problems. Barlow, least conservative of the Wits, felt most at home in the mock-heroic and the iambic pentameter couplet perfected (and worn out) by the predecessors and contemporaries of Pope. Nor are the examples here the most flagrant instances of the way in which a reverence for classical forms vitiated the sometimes original ideas of the Connecticut Wits. Their efforts at the epic—Dwight's *Conquest of Canaan* (1785) and Barlow's *Columbiad* (1807)—are the most familiar evidences of misguided nationalistic endeavor.

We may leave sentimentalism for definition in connection with fiction, remembering however, that such pieces as "The Lament of the Captive" and "The Old Oaken Bucket" merely foreshadow the reign of tears and self-pity in the holiday gift-books of the 1830's and 1840's:

These poems reflect the romantic tradition quite as obviously as those of the Connecticut Wits reflect the Neoclassical, but they are much less pretentious and appealed to a public only casually concerned with literary art.

Freneau, Bryant, and Poe, taken together, show the steady progress of romanticism in America. Freneau's admiration for the classics, Milton, and Ossian identifies him as a precursor of the romantic revival as was the English poet Thomas Gray, whom he much resembles. Bryant, with his many similarities to Wordsworth, had deep roots in the English poetic theory of the eighteenth century; his concept of the imagination and his emphasis upon the moral quality of beauty sometimes were in conflict with his more romantic glorification of emotion. In Poe, finally, we may see the central conviction that the business of the poet is simply the creation of beauty or, in other words, the achievement of an aesthetic effect with no relation to moral truth—an extreme romantic view. A similar progress in forms is evident, paralleling the change from established patterns to great variety which had taken place slightly earlier in English poetry. Freneau's regular verse forms give way to Bryant's experiments with anapestic substitutions in iambic meter and, eventually, to Poe's notion of organic form, which amounted in practice to such emphasis upon the musical and emotional effects of rhyme, alliteration, and assonance that sometimes, as in "Ulalume," sound became more important than sense.

Examination of the minor poetry written between 1765 and 1829 will corroborate this description of the trend, and may be conveniently accomplished by looking through some of the anthologies of the age. Elihu Hubbard Smith's *American Poems, Selected and Original* (1793), *The Columbian Muse* (1794), and Samuel Kettell's *Specimens of American Poetry* (1829) are particularly valuable. The transition was by no means over by 1829.

ESSAYS

Newspapers and magazines played their part in the increase of poetic production, but they were most fundamental, perhaps, to the American development of the literary essay. The

essay form had firmly established itself in England with *The Spectator* (begun 1711) of Addison and Steele, and its prestige was much enhanced by Samuel Johnson, Oliver Goldsmith, and other later authors. Its brevity and variety, together with the ease with which it could be adapted to didactic purposes, made it very attractive to Americans, who had had nothing quite like it before except the squibs in the almanacs (see Franklin's "Way to Wealth," p. 264, and the excerpts from Thomas' almanacs, p. 499). As early as 1722 Franklin was imitating *The Spectator* in his brother's newspaper, over the signature of "Silence Dogood." Thereafter the newspaper or magazine which lacked its "Tomo Cheeki" (Freneau) or "Jonathan Oldstyle" (Irving) or "Oliver Oldschool" (Joseph Dennie) was a rarity. The attempt to maintain a dignified anonymity gave a sameness to these productions in a type which depends for its success upon the personality, even the idiosyncrasy, of the author. In Irving's *Sketch Book*, however, the essay achieved genuine distinction. Crèvecoeur, moreover, has some claim to being regarded as one of the earliest of nature essayists.

Newspaper and magazine requirements were likewise responsible for the beginnings of American literary criticism, in reviews and leading articles such as those by Poe (p. 646). Bryant's lectures on poetry (p. 482), although prepared for oral delivery, might easily have taken the review form, as much of his other criticism did. The earliest American reviewers learned their trade from the British quarterlies, much as they deplored the strictures of those journals on American politics and culture.

PLAYS

Imitation and adaptation of European models, combined with the all-pervading nationalism appeared also in the drama. Royall Tyler's *The Contrast*, produced in 1787, is an admirable illustration of the trend.

Important changes in the theatrical situation must first be noted. The repertoire company system which had grown up during the colonial period survived the closing of most o

the principal theaters in the decade after 1774, but before 1829 it was giving way to the "star" system, which throughout the nineteenth century brought famous English actors to tour the chief American cities. Prejudice against the theater lessened, as is evident from the opening of an undisguised theater in Boston in 1794, and the repeal in 1789 of a long-ignored Pennsylvania law against stage plays. Neither public support nor international copyright laws yet favored a native drama. All that can be said is that the theater became firmly established, with an ever-increasing number of native-born actors, managers, and playwrights.

Some native plays, now lost, may have been produced in the years just before the Revolution. During the conflict itself some political use was made of dramatic dialogues and satires, but few of them were actually produced. H. H. Brackenridge's *Battle of Bunkers Hill* (1776) is typical. Beginning with Tyler, however, American playwrights began to see their work on the professional stage. Many of them were amateurs like Tyler and James Nelson Barker (1784-1858) of Philadelphia. Two—William Dunlap (1766-1839) and John Howard Payne (1791-1852)—made the theater their profession, so that a brief description of their work will provide an impression of theatrical affairs and of the difficulties which lay in the way of native drama. Their plays were traditional in structure; it is only in experimental theaters that attempts are made to extend the limits of dramatic form.

Dunlap, born in New Jersey, was a boy in New York City during the Revolution. Between 1784 and 1787 he was in London, studying painting under Benjamin West and attending plays. Soon after his return to New York he began writing, and in 1789 had his first production. Before his death he wrote at least twenty-nine original plays, adapted and translated twenty-one more from the German and the French, and published, in 1832, the first history of the American theater. As manager of the Park Theater in New York in 1796-1805, he turned largely to foreign themes and fashions, but his most famous tragedy, *André* (acted in

1798), was based upon a well-known spy story of the Revolution and exemplifies the tendency to use nationalistic material.

Payne, like Washington Irving, did most of his writing for the English audience, and was inclined to be critical of the failure of his countrymen to support native authors. Like Irving, too, he was at length rewarded for his services as literary ambassador by consular appointments. Payne's distinction rests upon the fact that he was first of all an actor, trained in the American theaters. He went to England in 1813 and did not return for nineteen years. Over sixty plays have been attributed to him; the best known are the tragedy of *Brutus* (1818), which became one of the widely popular plays of the century; *Clari or the Maid of Milan* (1823), an adaptation from the French into which was inserted Payne's most famous composition, "Home, Sweet Home"; and *Charles the Second* (1826), a comedy in which Washington Irving was his collaborator. As the titles indicate, Payne looked abroad for his themes and models.

At home, however, Tyler had numerous successors in the attempt to glorify the Revolutionary struggle and native American types. Not many of them had sufficient theatrical sense to succeed, and it may be added in their defense that the drama everywhere was in one of its not infrequent doldrums.

NOVELS and SHORT STORIES

The prejudice against fiction which had marked the colonial period did not disappear in America until well after 1800. Jefferson, Dwight, and Noah Webster must be counted among the many who expressed belief that stories gave wholly false notions of life to impressionable youth. Nevertheless, fiction grew steadily more popular. In the late eighteenth century circulating libraries specializing in fiction prospered at the expense of the young ladies who commanded romance, and the new magazines, although expressing a suitable editorial concern about the possible moral effect of fiction, could not afford to bar it from their pages. By the 1780's American authors were ready to help supply the market with native production

often meeting the anticipated criticism by protestations that their tales were drawn from "real life," or pointing out that they invariably portrayed the awful consequences of sin and the fair rewards of virtue. That sin was made attractive was purely coincidental.

The prevailing nationalism was evident in the quest for American settings and characters, but the American novel in its first stages was heavily indebted to English models. Three distinct trends may be discerned, in an order which is roughly chronological. (1) The earliest American novels were adaptations of the fiction of sentiment and sensibility which had made the reputations of Samuel Richardson and Laurence Sterne; Mrs. Hannah Webster Foster's *The Coquette* (p. 489) is generally regarded as the best example of the type. (2) Americans next imitated the sensationalism of the so-called Gothic romance, as practiced in its later stages by Mrs. Ann Radcliffe, and the mystery-laden propaganda novel of which William Godwin's *Caleb Williams* (1794) is typical; this trend is illustrated by the work of Charles Brockden Brown (1771-1810) and, so far as propaganda is concerned, by H. H. Brackenridge's *Modern Chivalry*. (3) Finally, the society or domestic novel for which Fanny Burney and Jane Austen were famous and the historical romance as developed by Sir Walter Scott became naturalized in the United States; in these forms James Fenimore Cooper led the way, achieving the first really striking success.

Sentiment and sensibility—alike in their release of the "tender" emotions but differing in that sentimentalism was didactic and moral, sensibility deliberately throat-filling and tear-jerking—can scarcely be separated in *The Power of Sympathy; or, The Triumph of Nature* (1789), written "to expose the dangerous Consequences of Seduction and to set forth the advantages of female Education." Usually accepted as the first American novel, it was long attributed to Mrs. Sarah Wentworth Morton, but is now claimed for William Hill Brown. Mrs. Susanna Haswell Rowson's *Charlotte Temple, a Tale of Truth* (1790) was more popular. Many other sentimental novels might be named, and seduction and suicide and floods of tears

filled many pages of fiction far into the nineteenth century. For most readers, however, *The Coquette* will be sufficient introduction to the type. Its form—a series of letters—was derived from Richardson's *Pamela* and *Clarissa Harlowe* and, while not universal, was characteristic. The contemporary attitude toward such fiction may be accurately gauged by *The Contrast* (p. 509), in which sentimentalism is vigorously attacked.

Charles Brockden Brown made use of the epistolary form in *Jane Talbot* (1801) and *Clara Howard* (1801), but he is better known for his "thrillers": *Wieland* (1798), *Ormond* (1799), *Arthur Mervyn* (1799-1800), and *Edgar Huntley* (1801). These are remarkable for their use of such mysteries as ventriloquism and sleep-walking, as well as for wonder working heroes and deep-dyed villains. Brown's imitation of the Gothic romance and of Godwin is unmistakable but not slavish. His work shows traces also of social purpose. That theme however, was best used by Brackenridge, whose models were *Don Quixote* and Henry Fielding. *Modern Chivalry* is a rambling book, partly a satirical tract on the times (for which it is now usually read) and partly a picaresque romance, with Teague O'Regan as its rogue hero.

The work of Cooper, weak as it is in some respects, was a clear improvement over earlier attempts in the form. His first effort, *Precarion* (1820), was an imitation of the Jane Austen type of English domestic fiction, and foreshadowed a lifelong concern with social distinction. *The Spy* (1821) was doubtless suggested by the success of the then unidentified author of *Waverley* and *Ivanhoe* in combining history and fiction. Nationalism helped to make Cooper's work popular, but he must be credited with great skill in obtaining suspense in those parts of his novels in which physical action dominates, as well as with advances in the use of setting and in characterization. The escape-pursuit pattern, evident at intervals throughout *The Pioneer*, is the structure in which he excelled; unfortunately he often combined it with overelaborate mysteries such as that of the Effinghams. Unquestionably, however, Cooper made the American novel respectable, and his excursions into new types were paralleled by the novels of Ly

Maria Child (1802-1880), Catherine Maria Sedgwick (1769-1867), and James Kirke Paulding (1778-1860).

Unlike the novel, the short story was largely dependent upon the magazines, and therefore had a relatively even start in international competition. Its beginnings are closely connected with those of the essay and with "characters," delineations of unusual or typical personalities. Franklin came close to the short story in "The Way to Wealth" (p. 264) and "The Ephemeris" (p. 278), while Crèvecoeur's "The American Belisarius" is half-essay, half-story. The English magazines, although full of Oriental and moral tales, widely imitated in America, had not perfected the short story by 1815, nor had the German and French storytellers. The Americans had, therefore, a relatively new field, in which the contributions of Irving and Poe were outstanding. Although not many of their contemporaries rivalled them (see Morgan Neville, for example, p. 502), it is not unreasonable to argue that with the short story the Americans first took a place in the main stream of world literature.

The story sketches of Irving retained many of the characteristics of the essay: a sense of the author's presence and manipulation, leisurely movement, a fullness of detail that is sometimes almost digression, and the achievement of atmosphere rather than suspense and sharp climax. With Poe, however, a close student of magazine requirements, the short story became distinctive. His detective tales, his scientific tales, his psychological studies, his tales of terror—all have a structural sureness which has been universally admired and imitated. They are often regarded as the first and the best of their kind.

Writing in 1835 to T. W. White, owner of the *Southern Literary Messenger*, Poe remarked that editors were demanding tales containing "the ludicrous heightened into the grotesque; the fearful colored into the horrible; the witty exaggerated into the burlesque; and the singular heightened into the strange and mystical." He could turn out stories with any of these effects, but he was at his best in creating the second and the fourth of them. "The Fall

of the House of Usher," "Ligeia," "The Masque of the Red Death," and "The Cask of Amontillado" are all spine-tingling, gooseflesh-raising stories. They owe something, no doubt, to the Gothic romances, but Poe's artistic genius, which was marked by a passion for unity of effect, raises them far above his models. To the most romantically unreal situations imaginable he brought such realistic and carefully ordered detail, such psychological convincingness, that many generations of readers have reacted exactly as Poe intended that they should.

His theory that the short story should produce one single effect—and one only—is now regarded as too cramping; there are many other purposes which a short-story writer may legitimately pursue. Poe, however, presented his conception of a story so clearly (in his review of *Twice-Told Tales*, p. 646), and carried it out so effectively in his own work, that it was accepted almost without challenge down to the twentieth century. Whatever may have been its limitations, it remains one of the most original aesthetic positions in American literature. Working within it, Poe produced a substantial body of short fiction which belongs with the classics, not merely of the United States but of the world.

T. H.

Chronological Table of Literature and History

1766

Numerous pamphlets printed relating to the Stamp Act and the right of Parliament to tax the colonies • Oliver Goldsmith's *The Vicar of Wakefield*, English novel

Franklin examined before the House of Commons, 28 January • Declaratory Act, 7 March, affirmed the right of Parliament to legislate for the colonies "in all cases whatsoever" • Stamp Act repealed, 18 March

1767

John Dickinson's *Letters from a Farmer in Pennsylvania* a shrewd presentation of the conviction that British regulation of colonial trade had been unfair

Townshend Acts, effective 20 November, imposed duties on paper, tea, glass, and painter's lead entering American ports • The Earl of Hillsborough became secretary of state responsible for American affairs

1768

Circular Letter, drafted by Samuel Adams for the Massachusetts House of Representatives, urged all colonial assemblies to resist the policies of the British ministry

Massachusetts House was dissolved after defying Hillsborough's order that it rescind the **Circular Letter** • British troops moved to Boston from Halifax to impress the Whig "extremists"

1769

Samuel Adams and others, **An Appeal to the World, or a Vindication of the Town of Boston**

Nonimportation agreements adopted throughout the colonies, winning British merchants to press for the repeal of the Townshend Acts • Dartmouth College founded

1770

Woolman's **Considerations on the True Harmony of Mankind** • Goldsmith's **Deserted Village**, English poem popular in America

Boston Massacre, 5 March • Townshend Acts repealed, with the exception of the duty on tea • Thomas Hutchinson became Governor of Massachusetts • Population (estimated) about 2,200,000

1771

Franklin wrote the first part of his **Autobiography** • **Encyclopaedia Britannica**, first edition

First spinning-mill established by Samuel Arkwright in Derbyshire, England

1772

Philip Freneau and H. H. Brackenridge, **Rising Glory of America**

Death of John Woolman • Local committee of correspondence formed in Boston by Samuel Adams • The **Gaspee**, a revenue cutter, burned by exasperated citizens of Rhode Island

1773

Franklin's "Edict by the King of Prussia" and "Rules by Which a Great Empire May be Reduced to a Small One," in the London **Public Advertiser** • Woolman's **Serious Considerations on Various Important Subjects** • Goldsmith's **She Stoops to Conquer**, English comedy

Hutchinson Letters sent to Boston by Franklin undermine the little remaining colonial confidence in the British ministry • Intercolonial committees of correspondence established • Boston Tea Party, 16 December

1774

Woolman's **Journal** • John Adams' "Novanglus" letters in the Boston **Gazette** • Thomas Jefferson's **Summary View of the Rights of British America** • Alexander Hamilton's **Vindication of the Measures of Congress** • Francis Hopkinson's **Pretty Story**, a political allegory • Edmund Burke's **Speech on American Taxation**, best example of the British Whig support for American complaints against the policy of the ministry • Chesterfield's **Letters to His Son**, English gentleman's account of the manners of a man of the world • Goethe's **Sorrows of Werther**, German romantic novel

Five "Intolerable Acts" passed by Parliament (1) Boston Port Bill closing that port to all but essential commerce until the tea should be paid for, (2) Massachusetts Government Act giving the royal governor added power and virtually suppressing town meetings, (3) Act for the Impartial Administration of Justice providing trial in England when the governor believed a fair trial in the local courts was improbable; (4) Quartering Act, giving the colonial governors the power to requisition buildings for the use of royal troops, and (5) Quebec Act recognizing French law and Roman Catholicism in Canada, whose boundaries were extended to include the Ohio country • First Continental Congress met in Philadelphia, 5 September, demanded the repeal of the "Intolerable Acts," and formed a "Continental Association" for administering nonimportation and nonexportation agreements • Sharp division of Americans on the question of resistance to British policy, the Tories or Loyalists deploring the acts of the illegally constituted Congress, the Whigs or Patriots applauding them • Thomas Paine arrived in Pennsylvania

1775

Samuel Seabury's **Westchester Farmer** pamphlets, the most important exposition of the Loyalist position • Hamilton's **The Farmer Refuted** • Trumbull's **M'Fingal**, first part • Burke's **Speech on Conciliation with America**, the plea of a British Whig for resolution of the difficulties • Samuel Johnson's **Taxation No Tyranny**, a typical British Tory pamphlet

General Gage marched from Boston to seize military supplies at Concord, 18 April, his intention being announced by Paul Revere—"The redcoats are coming" • Skirmishes at Lexington and Concord, 19 April • Second Continental Congress convened at Philadelphia, 10 May • Battle of Bunker Hill, 17 June • Washington assumed command of the Continental Army besieging Boston, 3 July • Americans captured Montreal, November, but failed in an attack on Quebec and were eventually forced to withdraw from Canada

1776

Paine's **Common Sense** • The Declaration of Independence • Adam Smith's **Wealth of Nations**, English economic treatise advocating *laissez faire*

Boston evacuated by the British, 17 March • Sentiment for independence culminated in the Declaration, signed 4 July and 2 August • British army landed on Long Island, 22 August, and soon occupied Manhattan Island • Nathan Hale executed, 22 September • Washington and his troops forced to retreat across New Jersey • Americans heartened by victory at Trenton, 26 December, after Washington's dramatic crossing of the Delaware • Various naval actions, in which John Paul Jones emerged as a skillful leader • Organization of state governments begun

1777

Hopkinson's **Political Catechism** • Richard Brinsley Sheridan's **School for Scandal**, English comedy

First supplies received from France • British occupied Philadelphia, September • General Burgoyne, after marching from Canada, surrendered a force of 5800 men to the Americans under General Gates at Saratoga, 17 October • Articles of Confederation, legalizing the Continental Congress, submitted to the states for ratification; finally adopted in 1781, after lengthy discussion of the titles to Western lands • "Conway Cabal" to displace Washington as commander-in-chief failed • Winter quarters at Valley Forge

1778

Freneau's **America Independent**

Death of Rousseau and Voltaire, French philosophers • American independence recognized by France and a military alliance effected • Unofficial aid received

from Spain • Philadelphia evacuated by the British, 18 June

1779

Hopkinson's **Battle of the Kegs**

Spain declared war on Great Britain, 16 June • The **Serapis** captured by John Paul Jones and the **Bon Homme Richard**, 23 September

1780

British captured Charleston • Spaniards took Mobile • Benedict Arnold's treason discovered, 26 September • Major John André executed, 2 October • Various military actions in North Carolina and Virginia, hereafter the chief battle area • Population (estimated) about 2,800,000

1781

Freneau's **British Prison-Ship** • Samuel Peters' **General History of Connecticut** • Immanuel Kant's **Critique of Pure Reason**, German philosophical treatise • Rousseau's **Confessions**, French autobiography

Action at Eutaw Springs, South Carolina, 8 September • British campaign in the South ended with the surrender of Cornwallis and his troops at Yorktown, Virginia, 19 October

1782

Crèvecoeur's **Letters from an American Farmer**

Provisional treaty of peace signed at Paris, 30 November • First balloon ascension, observed by Franklin near Paris

1783

End of the war proclaimed by Washington, 19 April • Society of the Cincinnati formed • Treaty of Paris, September, recognized American independence, restored Florida to Spain, various East Indian territories to France and certain West Indian islands to Great Britain • New York evacuated by the British, 25 November

1784

Ordinance providing for the survey and sale of public lands in the West, supplemented by Ordinances of 1785 and 1787 (the latter being the famous Northwest Ordinance)

1785

Timothy Dwight's *Conquest of Canaan*

John Adams appointed minister to Great Britain, with instructions to negotiate commercial agreements and settlement of Western land question, the British being still garrisoned in the forts at Detroit, Niagara, and elsewhere • Jefferson appointed American minister to France • Franklin returned to Philadelphia • American ships seized by Algerine pirates

1786

Royall Tyler's *Contrast* acted • Freneau's *Poems* • Robert Burns' *Poems* chiefly in the Scottish dialect, first edition

Steamboat experiments by John Fitch on the Delaware and by James Ramsey on the Potomac • Shays' Rebellion in Massachusetts, first Populist uprising • Annapolis Convention, September, dominated by Hamilton, issued call for a convention to consider amending the Articles of Confederation • Second Ohio Company organized in Boston

1787

John Adams' *Defence of the Constitutions of Government of the United States*, first volume • Joel Barlow's *Vision of Columbus* • The Constitution of the United States, published 19 September

Death of Charles Chauncy • Constitutional Convention held at Philadelphia, 14 May–17 September • Constitution submitted for ratification by the states, nine votes being sufficient to put it into effect

1788

Hamilton, James Madison, and John Jay, *The Federalist* • Freneau's *Miscellaneous Works* • London Times established

Constitution ratified by the ninth state, New Hampshire, 6 April • Marietta, Ohio, settled by the Ohio Company

1789

Washington's *First Inaugural* • John Adams' *Discourses on Davila* begun

Constitution in effect, 4 March • Washington and Adams chosen President and Vice-President, 6 April •

Washington inaugurated in New York City, 30 April • Fall of the Bastille, Paris, 14 July • Declaration of the Rights of Man, 4 August

1790

Susanna Haswell Rowson's *Charlotte Temple*, among the best-known of early American novels • Burke's *Reflections on the Revolution in France*, classic British example of the conservative reaction to events in France

Death of Benjamin Franklin • First United States census population of approximately 4,000,000

1791

William Bartram's *Travels* • Barlow's *Advice to the Privileged Orders* • Paine's *Rights of Man*, first part • Hamilton's *Report on Manufactures* • *National Gazette* founded, with Freneau as editor

First ten amendments to the Constitution • First Bank of the United States chartered • Vermont admitted as the fourteenth state • Louis XVI fled from Paris, but was captured and returned • French Constitution adopted

1792

H. H. Brackenridge's *Modern Chivalry*, first part • Barlow's *Conspiracy of Kings* • Paine's *Age of Reason*, first part

Kentucky admitted as the fifteenth state • Paine imprisoned in Paris, as the French Revolution became more and more violent • First French Republic proclaimed, 22 September • Capitol at Washington begun • Washington reelected President

1793

Louis XVI executed • France declared war on Great Britain, Holland, and Spain, being already at war with Austria and Prussia • "Citizen Genêt landed in the United States, April • United States proclaimed neutrality despite the alliance of 1778 with France • Reign of Terror in France • Cotton gin invented by Eli Whitney • Jefferson resigned as secretary of state

1794

Dwight's *Greenfield Hill*

Whiskey Insurrection in western Pennsylvania • Robespierre executed, 28 July

1795

Treaty of San Lorenzo permitted American navigation of the Mississippi and the deposit of export goods at New Orleans duty free • French government organized as a Directory

1796

Barlow's **Hasty Pudding** • Washington's **Farewell Address**
Tennessee admitted as the sixteenth state • John Adams chosen second President, with Jefferson as Vice-President • British troops finally withdrawn from the Western forts • Napoleon Bonaparte achieved spectacular military victories for France in northern Italy

1797

Anti-French feeling increased by the attempt of Talleyrand, foreign minister for the Directory, to bribe American emissaries—"X. Y. Z. affair," origin of the phrase "Millions for defense, but not one cent for tribute"

1798

Charles Brockden Brown's **Wieland**, first of a long series of novels • William Wordsworth and Samuel Taylor Coleridge, **Lyrical Ballads**, a landmark in the development of the English Romantic Movement • Malthus' **Essay on the Principle of Population**, pioneer English study in sociology
Alien and Sedition Laws, an expression of the Federalist fear of "French principles" • The Virginia and Kentucky Resolutions, setting forth the states' rights position of the Jeffersonian Republicans • Napoleon invaded Egypt

1799

Brown's **Ormond** • Tyler's **Algerine Captive**
Death of George Washington and Patrick Henry • Napoleon, his Egyptian campaign a failure, returned to France and by a **coup d'état**, 9 November, overthrew the Directory and became First Consul

1800

Mason Weems' **Life of Washington**, origin of the cherry-tree story • Nathaniel Bowditch's **American Practical Navigator**, first edition
Jefferson elected third President • United States

census, population of nearly 5,500,000 • Government of France centralized and military power rebuilt by Napoleon • Louisiana ceded by Spain to France by the secret Treaty of San Ildefonso

1801

Brown's **Edgar Huntley** • New York **Evening Post** established • Chateaubriand's **Atala**, French novel
Numerous Federalist judges appointed under the "lame duck" Judiciary Act • John Marshall became Chief Justice of the Supreme Court • Jefferson inaugurated in the new capital city, Washington • Tripoli declared war on the United States

1802

Ohio admitted as seventeenth state • Peace of Amiens established temporary truce between France and England • Napoleon named Consul for life

1803

The **Monthly Anthology** and **Boston Review** established
Louisiana purchased from Napoleon for \$15,000,000 • Expedition under Meriwether Lewis sent to the Northwest, under authorization made by Congress prior to the Purchase • John Marshall established doctrine of judicial review by the Supreme Court of the constitutionality of act of Congress, in the case of **Marbury vs. Madison** • Great Britain declared war on France

1804

Death of Hamilton • Jefferson reelected President
Napoleon crowned as Emperor of France, 2 December

1805

Napoleon defeated the Austrians at Austerlitz • Lord Nelson and the English fleet destroyed French sea power at Trafalgar

1806

French coast blockaded by the British • By the Berlin Decree, 21 November, Napoleon attempted to halt neutral trade with Great Britain

1807

Washington Irving and others, **Salmagundi** • Barlow

Columbiad • Lord Byron's **Hours of Idleness**, English romantic poems

British Orders in Council forbade neutral trade with Europe • Napoleon established his "Continental System" with the aid of Russia and Prussia • Anti-British feeling aroused in the United States by the Chesapeake affair, June, in which seamen were taken off an American man-of-war • Jefferson, by proclamation, forbade the entrance of British warships into American harbors • Embargo Act, 21 December, prohibited all ships from leaving American ports • Slave trade abolished in the British Empire • Robert Fulton demonstrated the practicability of the steamboat on the Hudson River

1808

William Cullen Bryant's **Embargo**, first edition • Goethe's **Faust**, German poetic drama, first part

Importation of slaves into the United States forbidden • Jefferson became highly unpopular as a result of the economic distress caused by the Embargo Act • James Madison elected fourth President

1809

Irving's **Knickerbocker History of New York**

Embargo Act repealed • Non-Intercourse Act passed, permitting American shipping to destinations other than French and English ports • Metternich became first minister in Austria, holding that post until 1848

1810

Death of Charles Brockden Brown • United States census: population of approximately 7,240,000 • Rambouillet Decree, 23 March, by which Napoleon seized all American ships in French ports

1811

Baron De la Motte Fouqué's **Undine**, German romantic novelette much admired by Edgar Allan Poe

Charter of the First Bank of the United States lapsed without renewal • Astoria founded at the mouth of the Columbia River • United States broke off diplomatic relations with Great Britain, after failing to obtain agreement on the rights of neutrals

1812

Death of Joel Barlow • Louisiana admitted as the

eighteenth state • United States declared war on Great Britain • Madison reelected President • Napoleon invaded Russia

1813

Jane Austen's **Pride and Prejudice**, English novel of manners

Blockade of American ports established by the British, after a number of naval victories by the Americans • American fleet under Oliver Hazard Perry victorious at Put-in-Bay, on Lake Erie, 10 September • Revolt of Colombia against the rule of Spain, the beginning of a series of revolutions in South America

1814

Sir Walter Scott's **Waverley**, English historical novel

Washington captured by the British, 24 August • Hartford Convention assembled, 15 December, to express New England disapproval of the war, although there was talk of secession, the convention contented itself with recommending amendments to the Constitution • Treaty of Ghent, 24 December, ended the war but failed to settle any of the major differences • Abdication of Napoleon and his exile to Elba

1815

North American Review established • Freneau's **Poems on American Affairs**

British defeated in the Battle of New Orleans, 8 January • Napoleon returned from Elba, 1 March, was defeated at Waterloo, 18 June, and banished to St. Helena, 8 August • Holy Alliance formed as an aftermath of the Congress of Vienna

1816

Death of Hugh Henry Brackenridge • Second Bank of the United States created • Indiana admitted as the nineteenth state • First tariff for protection adopted • James Monroe elected fifth President

1817

Bryant's "Thanatopsis," in the **North American Review** • Coleridge's **Biographia Literaria**, important English critical work

Death of Timothy Dwight • Mississippi admitted as the twentieth state

1818

Dwight's *Theology Explained and Defended* • Mary Wollstonecraft Shelley's *Frankenstein*, English novel

Illinois admitted as the twenty-first state • Boundary between the United States and Canada defined • Cumberland Road completed • First steamship crossed the Atlantic Ocean, in twenty-six days

1819

Irving's *Sketch Book* • Byron's *Don Juan*, English poem, first two cantos • Scott's *Ivanhoe*, English historical novel

Alabama admitted as the twenty-second state • Tallmadge amendment to the bill for the admission of Missouri brought the slavery question to the forefront in national affairs • Florida acquired from Spain • Dartmouth College case decision by Marshall denied the right of a state to abrogate a charter granted to a corporation

1820

James Fenimore Cooper's *Precaution* • Percy Bysshe Shelley's *Prometheus Unbound*, English poem

Missouri Compromise adopted, providing that all states created from the Louisiana Territory north of the latitude of 36° 30' should be free, except for Missouri, which might be admitted as a slave state • Maine admitted as the twenty-third state • United States census: population of more than 9,500,000 • Death of George III (reigned 1760-1820, under regency after 1811); accession of George IV • Monroe re-elected President

1821

Bryant's *Poems* • Cooper's *Spy* • Shelley's *Adonais*, English elegy

Missouri admitted as the twenty-fourth state • Greeks began struggle for independence from the Turks

1822

Irving's *Bracebridge Hall*

1823

Cooper's *Pilot*, *Pioneers*, and *Lionel Lincoln* • Charles Lamb's *Essays of Elia*, classic English familiar essays

1824

Irving's *Tales of a Traveller*

John Quincy Adams elected sixth President • Lafayette toured the United States

1825

Erie Canal completed

1826

Cooper's *Last of the Mohicans*

Death of John Adams and Thomas Jefferson • National Academy of the Arts of Design established

1827

Cooper's *Prairie* • Edgar Allan Poe's *Tamerlane* and *Other Poems*, anonymously published • Alfred and Charles Tennyson's *Poems by Two Brothers*, English

1828

Nathaniel Hawthorne's *Fanshawe* • Irving's *Life and Voyages of Christopher Columbus* • Noah Webster's *American Dictionary of the English Language*

Baltimore and Ohio Railroad began construction • "Tariff of Abominations," high protective tariff unacceptable to the South • Doctrine of nullification stated by John C. Calhoun in the "South Carolina Exposition" adopted by the legislature of that state • Andrew Jackson elected seventh President

Benjamin Franklin

1706 • 1790

Benjamin Franklin was one of the great men of the eighteenth century, famous far beyond the limits of the colonies which he helped unite into a nation. John Adams once remarked—and there is good reason to think he was right—that Franklin was more renowned than Sir Isaac Newton, Frederick the Great, or Voltaire, and “more beloved and esteemed than any or all of them.” There was a warmth in Franklin, his mind, inquiring rather than dogmatic, endeared him to an age which regarded itself as peculiarly “enlightened,” the more so since his reasonableness and simplicity were combined with a generous flair for showmanship. His contemporaries, and to some extent their posterity, saw

Franklin in a series of sharply dramatic pictures—flying his kite in a thunderstorm to demonstrate the identity of lightning with electricity, standing modest but unawed before the House of Commons to assert the justice of American complaints, beaming philosophically yet with obvious delight in the adulation of the ladies of the court of Louis XVI, suggesting to the Constitutional Convention that it break a deadlock in debate by an appeal for the guidance of the Supreme Being.

Panel (l to r): An experiment with electricity • Franklin, about 55 years old • Printing-press used by Franklin • View of Philadelphia, 1754 • Franklin's birthplace, Milk Street, Boston

Unfortunately for his later reputation Franklin wrote an autobiography in which he reviewed his early life. It is a classic of its type—the first “rags-to-riches” success story in American literature—but it so glorified thrift, industry, conformity, and shrewd calculation of the material results of tact in personal relations that many sensitive readers have damned Franklin, on his own testimony, as selfishly opportunistic. Only those who accept unthinkingly the bourgeois standard that “getting ahead” is the be-all and end-all of life can wholeheartedly admire his self-portrait.

The truth of the matter is that Franklin was neither a great-souled philanthropist nor an unprincipled “careerist.” A somewhat enigmatic mixture of idealist and realist, he comes close to being the first example of the typical American. He could not well have emerged from the mass of people in any corner of the world other than colonial America, and his vanity in having worked his way up is both pardonable and widespread in a land where class lines have never been rigid. Not very many self-made men, however, have turned as Franklin did from the making of a fortune to the broadening of a mind. Blessed with an insatiable curiosity and an admirable gusto for living, he became so widely traveled and so universally acquainted that there was scarcely a nook of the age in which he lived where he was not at home.

The details of his early life are familiar through his autobiography. There he tells of his ancestry and birth (in Boston in 1706), of his early apprenticeship to his printer brother, of the circumstances which led to his running off to Philadelphia when he was seventeen, of his disillusion there and in London concerning easy roads to wealth. In 1728 he founded his own printing firm, determined to make his fortune by hard work and thrift. Only men with financial security could afford to indulge themselves in the public service which he had in the back of his mind.

It took just twenty years for him to make enough money so that he could retire. Other men of forty-two would have gone on to pile up the pounds, shillings, and pence; Franklin, for all his preaching of the gospel of moneymaking, was not ambitious for mere financial power. He turned first to science, long one of his enthusiasms, and within a few years was internationally famous for his *Experiments & Observations on Electricity*, first published in London in 1751. Already, however, he was busy with public projects and political

affairs, notable among them the founding of the Library Company of Philadelphia (1731), the organization of the American Philosophical Society (1743), the proposal for the Academy of Philadelphia, later the University of Pennsylvania (1749), and his service as clerk of the colonial legislature (1736-1751).

To recite, much less to evaluate, Franklin's activities during the remainder of his life would require many pages and the recapitulation of American history from the Albany Congress of 1754 to the ratification of the Constitution of the United States in 1789. There was scarcely a stage in the process of binding disparate colonies into a great nation wherein the calm counsel of Benjamin Franklin had no part. He was probably the first American to assert the principle of “no taxation without representation”; between 1757 and 1775 he was the chief representative of the colonial point of view in England; in 1775-1776 he was a key member of the Second Continental Congress, where he was one of the drafting committee for the Declaration of Independence; between 1777 and 1785 he was in France, where he was largely responsible for the alliance without which the Revolution could hardly have been successful and where he helped to negotiate the treaty of peace; and in 1787, back in Philadelphia, he ended his good works by acting as a balance wheel in the stormy Constitutional Convention.

Franklin would not have obtained the influence which he had if he had not been a writer. At sixteen he was contributing essays to his brother's newspaper, over the signature of “Silence Dogood.” Thereafter he wrote steadily, with growing ease and polish. Most of his early work appeared in the newspapers and almanacs which helped him make his fortune; later he became a skillful writer of political pamphlets, many of them published anonymously, throughout his life he was an accomplished letter writer. In an age which tended to like ornate Latinate prose he cultivated simplicity in style and structure. He did not think of himself as an author in the belated sense, although all his life he had a critical ear for style both in prose and in poetry. His literary purposes, like those in politics, were utilitarian; “that is best wrote,” he once said, “which is best adapted for obtaining the end of the writer.” Never a writer of books, he succeeded in leaving papers which are ordinarily collected in ten volumes—and there is as yet no really complete edition.

His literary ends were many and various. *A Dissertation*

on *Liberty and Necessity, Pleasure and Pain* (1725) expressed his youthful convictions on the fundamentals of morality—Deistic convictions which he later decided were not “useful,” however sound they may have been. *Plain Truth* (1747) marked his entrance into political pamphleteering, with a plea for measures to defend Pennsylvania from the French and Indians. *Experiments & Observations on Electricity* (1751, 2d ed., 1751, 11th ed., 1769) was composed of letters describing his scientific work and that of his friends. *The Interest of Great Britain Considered with Regard to Her Colonies* (1760) was representative of his long effort to persuade the British of the necessity for a home-rule policy. Most of his other pieces were composed for newspaper or periodical publication or for the entertainment and edification of his friends. The *Autobiography*, by far his most extended work, not published until long after his death, was written for the younger members of his family.

Franklin and his writings have meant many things to many men, and they will doubtless continue to attract commentators and special students. The problems which

they present are universal problems in religion, education, economics, politics, and the social and physical sciences. To the general reader, moreover, Franklin, as much as any colonial American, has the fascinating power of a great and versatile personality. To understand the drives which found expression in his life and work is not only a means of understanding the eighteenth century but also a way of clarifying certain personal values. What should a man or woman seek to find in the vocation which he chooses to gain his livelihood? To what extent is self-aggrandizement compatible with self-respect? What, after all, is success? Franklin did not give an ultimate answer to these questions, but few persons will read his life or writings without reflecting upon them with new insight.

Smyth, 10 vols., New York, 1905-1907 • Benjamin Franklin: Representative Selections, ed. F. L. McClintock and C. E. Jorgenson, Cincinnati, 1936 • F. L. Ford, Franklin Bibliography, Brooklyn, 1889 • Carl Van Doren, Benjamin Franklin, New York, 1938

From the

Autobiography

Franklin began writing his autobiography when he was sixty-five. Vacationing with his friend Jonathan Shipley, Bishop of St. Asaph's, in Hampshire, he determined to use his unwonted leisure to give an account of his ancestry and early life to his son William, then governor of New Jersey. After setting down a list of events and topics to be discussed, he composed eighty-six pages of manuscript, carrying the story of his life down to 1730. He may have sent this manuscript to his son, although there is no real proof that he did so. At any rate, busy with political affairs, he forgot about his memoirs for eleven years. In

1782, living at Passy, a suburb of Paris, he received a letter from an American friend in which was enclosed a copy of the first portion of the autobiography (how obtained no one knows), with the urgent suggestion that it be continued. After consultation with his French friends, who agreed that the project should be completed, Franklin wrote fourteen more pages in 1784. In this portion he described his effort to learn virtue by a chart system; he was over seventy-eight when he composed it. Four years later, back in Philadelphia, he added a third section of 117 pages, and in 1790, a few weeks before his death, he wrote still a fourth part of seven and one-half pages. Although his memoirs were eagerly awaited, it was, through circumstances too complicated to describe here, many years before there was an edition based upon the original manuscript. John Bigelow's transcription, first published in 1868, is now known to be far from accurate, so far as Franklin's capitalization, punctuation, and sentence structure are concerned. A definitive edition, based upon the original manuscript at the Henry E. Huntington Library and now in preparation by Max Farrand, will embody careful study of the innumerable interlinear changes.

The following selections include about one third of the portion of the *Autobiography* written at Twyford in 1771, the larger part of the portion written at Passy in 1784, and a small part (that describing Franklin's success with the investigation of electricity) of the portion written at Philadelphia in 1788. The "preachy" tone of the Twyford and Passy sections may be explained in part by his desire to edify his son, for whom he had high ambitions, and by his penchant for moralizing, evident throughout his work. It should be remembered, however, that the *Autobiography*, with its strong suggestion that anyone who is willing to pay the price of caution and industry can succeed, is not, for all its frankness, a full revelation of Franklin.

TWYFORD, at the Bishop of St. Asaph's, 1771

Dear Son, I have ever had a Pleasure in obtaining any little Anecdotes of my Ancestors. You may remember the Enquiries I made among the Remains of my Relations when you were with me in England; and the journey I undertook for that purpose. Now imagining it may be equally agreeable to you to know the Circumstances of *my* Life, many of which you are yet unacquainted with, and expecting a Weeks uninterrupted
 10 Leisure in my present Country Retirement, I sit down to write them for you. To which I have besides some other Inducements. Having emerg'd from the Poverty and Obscurity in which I was born and bred, to a State of Affluence and some Degree of Reputation in the World, and having gone so far thro' Life with a considerable Share of Felicity, the conducting Means I made use of, which, with the Blessing of God, so well succeeded, my Posterity may like to know, as they may find some of them suitable to their own Situations, and
 20 therefore fit to be imitated. That Felicity, when I reflected on it, has induc'd me sometimes to say, that were it offer'd to my Choice, I should have no Objection to a Repetition of the same Life from its Beginning, only asking the Advantages Authors have in a second Edition to correct some Faults of the first. So would I if I might, besides corr[ecting] the Faults, change some sinister Accidents and Events of it for others more favourable. but tho' this were deny'd, I should still accept the Offer. However, since such a Repetition is not to be expected,

the next Thing most like living one's Life over again, seems to be a *Recollection* of that Life, and to make that Recollection as durable as possible, the putting it down in Writing. Hereby, too, I shall indulge the Inclination so natural in old Men, to be talking of themselves and their own past Actions, and I shall indulge it, without being troublesome to others who thro' respect to Age might think themselves oblig'd to give me a Hearing, since this may be read or not as any one pleases. And lastly (I may as well confess it, since my Denial of it will be believ'd by no Body) perhaps I shall a good deal gratify my own *Vanity*. Indeed I scarce ever heard or saw the introductory Words, *Without vanity I may say*. &c but some vain thing immediately follow'd. Most People dislike Vanity in others whatever share they have of it themselves, but I give it fair Quarter wherever I meet with it, being persuaded that it is often productive of Good to the Possessor and to others that are within his Sphere of Action. And therefore in many Cases it would not be quite absurd if a Man were to thank God for his Vanity among the other Comforts of Life —

And now I speak of thanking God, I desire with a Humility to acknowledge, that I owe the mention'd Happiness of my past Life to his kind Providence, which led me to the Means I us'd and gave them Success. My Belief of this, induces me to *hope*, tho' I must not *presume*, that the same Goodness will still be exercis'd towards me in continuing that Happiness, or in enabling me to bear a fatal Reverse, which I may experience; others have done, the Complexion of my future Fortune being known to him only in whose Power it is to bestow to us even our Afflictions.

The Notes one of my Uncles (who had the same kind of Curiosity in collecting Family Anecdotes) once put into my Hands, furnish'd me with several Particulars relating to our Ancestors. From these Notes I learn that the Family had liv'd in the same Village, Ecton, Northamptonshire, for 300 Years, and how much long

Text That of the first section is based upon the original manuscript examined by F. L. Mott and C. E. Jorgenson, that of the second and third sections is from the Bigelow edition, Vol. I (1887). • 1 Twyford, a village near Winchester, about fifty miles southwest of London. • 5 with me. William Franklin and his father made a genealogical tour into central England in 1758. • 62 one . . . Uncles, Benjamin Franklin who died in Boston in 1728. • 66 Ecton, about fifty miles north-northeast of London.

he knew not (perhaps from the Time when the Name *Franklin* that before was the name of an Order of People, was assum'd by them for a Surname, when others took surnames all over the kingdom)[.] on a Freehold of about 30 Acres, aided by the Smiths Business, which had continued in the Family till his Time, the eldest son being always bred to that Business[.] A Custom which he and my Father both followed as to their eldest Sons—When I search'd the Register at Ecton, I found an Account of their Births, Marriages and Burials, from the Year 1555 only, there being no Register kept in that Parish at any time preceding—By that Register I perceiv'd that I was the youngest Son of the youngest Son for 5 Generations back My Grandfather Thomas, who was born in 1598, lived at Ecton till he grew too old to follow Business longer, when he went to live with his Son John, a Dyer at Banbury in Oxfordshire, with whom my Father serv'd an Apprenticeship. There my Grandfather died and lies buried. We saw his Gravestone in

2 1758 His eldest Son Thomas liv'd in the House at Ecton, and left it with the Land to his only Child, a Daughter, who, with her Husband, one Fisher of Wellingborough sold it to Mr Isted, now Lord of the Manor there My Grandfather had 4 Sons that grew up, viz Thomas, John, Benjamin and Josiah I will give you what Account I can of them at this distance from my Papers, and if these are not lost in my Absence, you will among them find many more Particulars. Thomas was bred a Smith under his Father, but being ingenious, and

30 encourag'd in Learning (as all his Brothers likewise were) by an Esquire Palmer then the principal Gentleman in that Parish, he qualify'd himself for the Business of Scrivener, became a considerable Man in the County Affairs, was a chief Mover of all publick Spirited Undertakings for the County or Town of Northampton and his own village, of which many instances were told us, and he was at Ecton much taken Notice of and patroniz'd by the then Lord Halifax He died in 1702, Jan 6, old

40 Stile, just 4 Years to a Day before I was born The Account we receiv'd of his Life and Character from some old People at Ecton, I remember struck you as something extraordinary, from its Similarity to what you knew of mine Had he died on the same Day, you said one might have suppos'd a Transmigration—John was bred a Dyer, I believe of Woollens. Benjamin, was bred a Silk Dyer, serving an Apprenticeship at London. He was an

ingenious Man, I remember him well, for when I was a Boy he came over to my Father in Boston, and lived in the House with us some Years He lived to a great Age. His Grandson Samuel Franklin now lives in Boston He left behind him two Quarto Volumes M S of his own Poetry, consisting of little occasional Pieces address'd to his Friends and Relations, of which the following sent to me, is a Specimen He had form'd a Shorthand of his own, which he taught me, but, never practising it I have now forgot it I was nam'd after this Uncle, there being a particular Affection between him and my Father He was very pious, a great Attender of Sermons of the best Preachers, which he took down in his Shorthand and had with him many Volumes of them He was also much of a Politician, too much perhaps for his Station There fell lately into my Hands in London a Collection he had made of all the principal Pamphlets relating to Publick Affairs from 1641 to 1717 Many of the Volumes are wanting, as appears by the Numbering, but there still remains 8 Vols Folio and 24 in 4^{to} and 8^{vo}—A Dealer in old Books met with them and knowing me by my sometimes buying of him, he brought them to me It seems my Uncle must have left them here when he went to America, which was above 50 years since There are many of his Notes in the Margins—

This obscure Family of ours was early in the Reformation, and continu'd Protestants thro' the Reign of Queen Mary, when they were sometimes in Danger of Trouble on Account of their Zeal against Popery They had got an English Bible, and to conceal and secure it, it was fastened open with Tapes under and within the Frame of a Joint Stool When my Great Great Grandfather read it [it] to his Family, he turn'd up the joint Stool upon his Knees, turning over the Leaves then under the Tapes One of the Children stood at the Door to give Notice if he saw the Apparitor coming, who was an

2 **Order of People** Franklins were small landowners in the English feudal society of the fourteenth and fifteenth centuries • 38 **Lord Halifax**, Charles Montague, first Earl of Halifax (1661-1715), a noted financier • 38 **old Stile**, the Julian calendar, superseded by the present Gregorian calendar in 1752 By modern reckoning Franklin was born on January 17, 1706 • 54 **a Specimen**, which Franklin failed to insert, as a marginal note shows was intended Examples of Uncle Benjamin's verses are printed in the Bigelow edition • 73 **Reign**, Mary, 1553-1558 • 78 **Joint Stool**, a wooden footstool made by a joiner

Officer of the Spiritual Court In that Case the Stool was turn'd down again upon its feet, when the Bible remain'd conceal'd under it as before This Anecdote I had from my Uncle Benjamin—The Family continu'd all of the Church of England till about the End of Charles the 2^{ds} Reign, when some of the Ministers that had been outed for Nonconformity, holding Conventicles in Northamptonshire, Benjamin and Josiah adher'd to them, and so continu'd all their Lives. The rest of the Family remain'd with the Episcopal Church.

Josiah, my father, married young, and carried his Wife with three Children into New England, about 1682 The Conventicles having been forbidden by Law, and frequently disturbed, induced some considerable Men of his Acquaintance to remove to that Country, and he was prevail'd with to accompany them thither, where they expected to enjoy their Mode of Religion with Freedom.—By the same Wife he had 4 Children more born there, and by a second wife ten more, in all 17, of which I remember 13 sitting at one time at his Table, who all grew up to be Men and Women, and married. I was the youngest Son, and the youngest Child but two, and was born in Boston, N England My mother, the 2^d wife was Abiah Folger, a daughter of Peter Folger, one of the first Settlers of New England, of whom honourable mention is made by Cotton Mather, in his Church History of that Country, (entitled *Magnalia Christi Americana*) as a *godly learned Englishman*. if I remember the Words rightly I have heard that he wrote sundry small occasional Pieces, but only one of them was printed which I saw now many years since It was written in 1675, in the home-spun Verse of that Time and People, and address'd to those then concern'd in the Government there It was in favour of Liberty of Conscience, and in behalf of the Baptists, Quakers, and other Sectaries, that had been under Persecution; ascribing the Indian Wars and other Distresses, that had befallen the Country to that Persecution, as so many Judgments of God, to punish so heinous an Offense, and exhorting a Repeal of those uncharitable Laws. The whole appear'd to me as written with a good deal of Decent Plainness and manly Freedom. The six last concluding Lines I remember, tho' I have forgotten the two first of the Stanza, but the Purport of them was that his Censures proceeded from Good will, and therefore he would be known as the Author.

"Because to be a Libeller, (says he)
I hate it with my Heart.
From Sherburne Town where now I dwell,
My Name I do put here,
Without Offense, your real Friend,
It is Peter Folger."

My elder Brothers were all put Apprentices to different Trades. I was put to the Grammar School at Eight Years of Age, my Father intending to devote me as the Tithe of his Sons to the Service of the Church. My early Readiness in learning to read (which must have been very early, as I do not remember when I could not read, and the Opinion of all his Friends that I should certainly make a good Scholar, encourag'd him in this Purpose of his My Uncle Benjamin too approv'd of it, and propos'd to give me all his Shorthand Volumes of Sermons I suppose as a Stock to set up with, if I would learn his Character. I continu'd however at the Grammar School not quite one Year, tho' in that time I had risen gradually from the Middle of the Class of that Year to be the Head of it, and farther was remov'd into the next Class above it, in order to go with that into the third at the End of the Year. But my Father in the mean time, from a View of the Expence of a College Education which, having so large a Family, he could not well afford, and the mean Living many so educated were afterwards able to obtain Reasons that he gave to his Friends in my Hearing altered his first Intention, took me from the Grammar School, and sent me to a School for Writing and Arithmetic kept by a then famous Man, Mr Geo. Brownell very successful in his Profession generally, and that by

5 Charles . . . Reign, 1660-1685 • 7 for Nonconformity, that is refusing to read the prayer book as required by the Act of Uniformity 1662 • 7 Conventicles, secret religious meetings, outlawed by the Conventicle Act of 1664 • 28 a godly . . . Englishman, actually a Able Godly Englishman, mentioned very briefly in Bk VI, Chap V of the *Magnalia* (see p 149) • 30 one . . . printed, an allusion to *A Looking Glass for the Times* or, *the Former Spirit of New England Revived in This Generation*, a fourteen-page pamphlet published in Boston in 1676 • 49 Sherburne Town, "In the Island of Nantucket" —Franklin • 54 the Grammar School. There were two grammar schools in Boston in 1714. Franklin is thought to have attended the older one, now known as the Boston Latin School • 56 Tithe Benjamin was Josiah Franklin's tenth son • 76 Mr. Geo. Brownell who taught private pupils in Boston between 1712 and 1734

mild encouraging Methods. Under him I acquired fair Writing pretty soon, but I fail'd in the Arithmetic, and made no Progress in it—At Ten Years old, I was taken home to assist my Father in his Business, which was that of a Tallow Chandler and Sope Boiler. A Business he was not bred to, but had assumed on his Arrival in New England and on finding his Dying Trade would not maintain his Family, being in little Request. Accordingly I was employed in cutting Wick for the Candles, filling the Dipping Mold, and the Molds for cast Candles, attending the Shop, going of Errands, etc.—I dislik'd the Trade and had a strong Inclination for the Sea; but my Father declar'd against it; however, living near the Water, I was much in and about it, learnt early to swim well, and to manage Boats, and when in a Boat or Canoe with other Boys I was commonly allow'd to govern, especially in any case of Difficulty, and upon other Occasions I was generally a Leader among the Boys, and sometimes led them into Scrapes, of w^{ch} I will mention one Instance, as it shows an early projecting public Spirit, tho' not then justly conducted. There was a salt Marsh that bounded part of the Mill Pond, on the Edge of which at Highwater, we us'd to stand to fish for Min[n]ows. By much Trampling, we had made it a mere Quagmire. My Proposal was to build a Wharf there fit for us to stand upon, and I show'd my Comrades a large Heap of Stones which were intended for a new House near the Marsh, and which would very well suit our Purpose. Accordingly in the Evening when the Workmen were gone, I assembled a Number of my Playfellows; and working with them diligently like so many Emmets, sometimes two or three to a Stone, we brought them all away and built our little Wharff—The next Morning the Workmen were surpriz'd at Missing the Stones, which were found in our Wharff, Enquiry was made after the Removers, we were discovered and complain'd of, several of us were corrected by our Fathers, and tho' I pleaded the Usefulness of the Work, mine convinc'd me that nothing was useful which was not honest.

I think you may like to know something of his Person and Character. He had an excellent Constitution of Body, was of middle Stature, but well set and very strong. He was ingenious, could draw prettily, was skill'd a little in Music and had a clear pleasing Voice, so that when he play'd Psalm Tunes on his Violin and sung withal as he

sometimes did in an Evening after the Business of the Day was over, it was extreamly agreeable to hear. He had a mechanical Genius too, and on occasion was very handy in the Use of other Tradesmen's Tools. But his great Excellence lay in a sound Understanding, and solid Judgment in prudential Matters, both in private and publick Affairs. In the latter indeed he was never employed, the numerous Family he had to educate and the straitness of his Circumstances, keeping him close to his Trade, but I remember well his being frequently visited by leading People, who consulted him for his Opinion in Affairs of the Town or of the Church he belong'd to and show'd a good deal of Respect for his Judgment and advice. He was also much consulted by private Persons about their affairs when any Difficulty occur'd, and frequently chosen an Arbitrator between contending Parties.—At his Table he lik'd to have as often as he could, some sensible Friend or Neighbour to converse with, and always took care to start some ingenious or useful Topic for Discourse, which might tend to improve the Minds of his Children. By this means he turn'd our Attention to what was good, just, and prudent in the Conduct of Life, and little or no Notice was ever taken of what related to the Victuals on the Table, whether it was well or ill drest, in or out of season, of good or bad flavour, preferable or inferior to this or that other thing of the kind, so that I was bro't up in such a perfect Inattention to those Matters as to be quite Indifferent what kind of Food was set before me, and so unobservant of it, that to this Day, if I am ask'd I can scarce tell a few Hours after Dinner, what I din'd upon. This has been a Convenience to me in travelling where my Companions have been sometimes very unhappy for want of a suitable Gratification of their more delicate[,] because better instructed[,] tastes and appetites.

My Mother had likewise an excellent Constitution. She suckled all her 10 Children. I never knew either my Father or Mother to have any Sickness but that of which they dy'd he at 89 and she at 85 years of age. They lie buried together at Boston, where I some years since placed a Marble Stone over their Grave with this Inscription.

JOSIAH FRANKLIN
And ABIAH his Wife
Lie here interred
They lived lovingly together in Wedlock
Fifty-five Years
Without an Estate or any gainful Employment,
By constant labour and Industry,
With God's blessing,
They maintained a large Family
Comfortably,
And brought up thirteen Children,
And seven Grandchildren
Reputably
From this Instance, Reader,
Be encouraged to Diligence in thy Calling,
And Distrust not Providence
He was a pious and prudent Man,
She a discreet and virtuous Woman
Their youngest Son,
In filial Regard to their Memory,
Places this Stone
J F born 1655—Died 1741—Ætat 89
A F born 1667—Died 1752—85

By my rambling Digressions I perceive myself to be grown old I us'd to write more methodically—But one does not dress for private Company as for a publick Ball 'Tis perhaps only Negligence—

To return I continu'd thus employ'd in my Father's Business for two Years, that is till I was 12 Years old, and my Brother John, who was bred to that Business having left my Father, married and set up for himself at Rhodeisland, there was all Appearance that I was destin'd to supply his Place and be a Tallow Chandler But my Dislike to the Trade continuing, my Father was under Apprehensions that if he did not find one for me more agreeable, I should break away and get to Sea, as his Son Josiah had done to his great Vexation He therefore sometimes took me to walk with him, and see Joiners, Bricklayers, Turners, Braziers, etc at their Work, that he might observe my Inclination, and endeavour to fix it on some Trade or other on Land It has ever since been a Pleasure to me to see good Workmen handle their Tools, and it has been useful to me, having learnt so much by it, as to be able to do little Jobs myself in my House, when a Workman could not readily be got,

and to construct little Machines for my Experiments while the Intention of making the Experiment was fresh and warm in my Mind My Father at last fix'd upon the Cutler's Trade, and my Uncle Benjamin's Son Samuel was bred to that Business in London[,] being about that time establish'd in Boston, I was sent to be with him some time on liking But his Expectations of a Fee with me displeasing my Father, I was taken home again—

From a Child I was fond of Reading, and all the little Money that came into my Hands was ever laid out in Books Pleas'd with the Pilgrim's Progress, my first Collection was of John Bunyan's Works, in separate little Volumes I afterwards sold them to enable me to buy R Burton's Historical Collections, they were small Chapmen's Books and cheap, 40 or 50 in all—My Father's little Library consisted chiefly of Books in polemic Divinity, most of which I read, and have since often regretted, that at a time when I had such a Thirst for Knowledge, more proper Books had not fallen in my Way, since it was now resolv'd I should not be a Clergyman Plutarch's Lives there was, in which I read abundantly, and I still think that time spent to great Advantage There was also a Book of Defoe's, called an Essay on Projects, and another of Dr Mather's, called Essays to do Good which perhaps gave me a Turn of thinking that had an influence on some of the principal future Events of my Life

This Bookish inclination at length determin'd my Father to make me a Printer, tho' he had already one Son (James) of that Profession In 1717 my Brother James return'd from England with a Press and Letters to set

56 *Pilgrim's Progress*, allegorical novel (1678) by John Bunyan (1629-1688), English nonconformist Bunyan's writings were not collected at this date, Franklin's purchases were probably early editions of separate works • 59 R. Burton's . . . Collections, a series of compilations by an English publisher and hack writer, Nathaniel Crouch (1632?-1725?) Sold at a shilling each by chapmen (peddlers) and bookdealers, they were widely popular in colonial America • 66 *Plutarch's Lives*, the most famous collection of biographies of the Greeks and Romans, by a Greek who lived at Rome in the first century A.D. • 68 *Essay on Projects* (1697) by Daniel Defoe (1661?-1731), English journalist and novelist The book dealt with such matters as education and insurance • 69 *Essays* . . . Good, contained the ideas of Cotton Mather (see p. 144) on cooperative societies for religious and humanitarian improvement • 75 James, James Franklin (1696/7-1735)

up his Business in Boston. I lik'd it much better than that of my Father, but still had a Hanking for the Sea —To prevent the apprehended Effect of such an Inclination, my Father was impatient to have me bound to my Brother I stood out some time, but at last was persuaded and signed the Indentures, when I was yet but 12 Years old—I was to serve as an Apprentice till I was 21 Years of Age, only I was to be allow'd Journeyman's Wages during the last Year In a little time I made great Proficiency in the Business, and became a useful Hand to my Brother I now had Access to better Books An Acquaintance with the Apprentices of Booksellers, enabled me sometimes to borrow a small one, which I was careful to return soon and clean Often I sat up in my Room reading the greatest Part of the Night, when the Book was borrow'd in the Evening and to be return'd early in the Morning[,] lest it should be miss'd or wanted And after some time an ingenious Tradesman Mr Matthew Adams who had a pretty Collection of Books, and who frequented our Printing House, took Notice of me, invited me to his Library, and very kindly lent me such Books as I chose to read I now took a Fancy to Poetry, and made some little Pieces My Brother, thinking it might turn to account encourag'd me, and put me on composing two occasional Ballads One was called *The Lighthouse Tragedy*, and contained an Acc't of the drowning of Capt Worthilake with his Two Daughters, the other was a Sailor Song on the Taking of *Teach* or *Blackbeard* the Pirate They were wretched Stuff, in the Grub-street Ballad Stile, and when they were printed he sent me about the town to sell them The first sold wonderfully, the Event being recent, having made a great Noise This flatter'd my Vanity But my Father discourag'd me, by ridiculing my Performances, and telling me Verse-makers were generally Beggars, so I escap'd being a Poet, most probably a very bad one But as Prose Writing has been of great Use to me in the Course of my Life, and was a principal Means of my Advancement, I shall tell you how in such a Situation I acquir'd what little Ability I have in that Way

There was another Bookish Lad in the Town, John Collins by Name, with whom I was intimately acquainted We sometimes disputed, and very fond we were of Argument, and very desirous of confuting one another Which disputacious Turn, by the way, is apt to become a very bad Habit, making People often ex-

treemly disagreeable in Company, by the Contradiction that is necessary to bring it into Practice, and thence, besides souring and spoiling the Conversation, is productive of Disgusts and perhaps Enmities where you may have occasion for Friendship I had caught it by reading my Father's Books of Dispute about Religion. Persons of good Sense, I have since observ'd, seldom fall into it, except Lawyers, University Men, and Men of all Sorts that have been bred at Edinborough A Question was once some how or other started between Collins and me, of the Propriety of educating the Female Sex in Learning, and their Abilities for Study He was of Opinion that it was improper, and that they were naturally unequal to it. I took the contrary Side, perhaps a little for Dispute[']s sake He was naturally more eloquent, had a ready Plenty of Words, and sometimes as I thought bore me down more by his Fluency than by the Strength of his Reasons As we parted without settling the Point, and were not to see one another again for some time, I sat down to put my Arguments in Writing, which I copied fair and sent to him He answer'd and I reply'd Three of [or] four Letters of a Side had pass'd, when my Father happen'd to find my Papers, and read them Without entering into the Discussion, he took occasion to talk to me about the Manner of my Writing, observ'd that tho' I had the Advantage of my Antagonist in correct Spelling and pointing (which I ow'd to the Printing House) I fell far short in elegance of Expression, in Method and in Perspicuity, of which he convinc'd me by several Instances I saw the Justice of his Remarks, and thence grew more attentive to the *Manner* in writing, and determin'd to endeavour at Improvement—

About this time I met with an odd Volume of the *Spectator* It was the Third I had never before seen any of them I bought it, read it over and over, and was much delighted with it I thought the Writing excellent, and wish'd if possible to imitate it With that

27 Capt. Worthilake or Worthylake, first keeper of the Boston lighthouse He and his wife and one daughter were drowned (Franklin's memory was at fault here) in November 1718 • 28 Teach, Edward Teach or Thatch, better known as Blackbeard, killed by a British naval officer in North Carolina in 1718 • 73 pointing, punctuating • 81 *Spectator* (1711-1712, second series, 1714), English literary periodical conducted by Joseph Addison (1672-1719) and Sir Richard Steele (1672-1729)

View, I took some of the Papers, and making short Hints of the Sentiment in each Sentence, laid them by a few Days, and then without looking at the Book, try'd to compleat the Papers again, by expressing each hinted Sentiment at length, and as fully as it had been express'd before, in any suitable Words, that should come to hand

Then I compar'd my Spectator with the Original, discover'd some of my Faults and corrected them But I
 10 found I wanted a Stock of Words or a Readiness in recollecting and using them, which I thought I should have acquir'd before that time, if I had gone on making Verses, since the continual Occasion for Words of the same Import but of different Length, to suit the Measure, or of different Sound for the Rhyme, would have laid me under a constant Necessity of searching for Variety, and also have tended to fix that Variety in my Mind, and make me Master of it Therefore I took some of the
 20 Tales and turn'd them into Verse And after a time, when I had pretty well forgotten the Prose, turn'd them back again I also sometimes jumbled my Collections of Hints into Confusion, and after some Weeks, endeavour'd to reduce them into the best Order, before I began to form the full Sentences, and compleat the Paper This was to teach me Method in the Arrangement of Thoughts By comparing my work afterwards with the original, I discover'd many faults and amended them, but I sometimes had the Pleasure of Fancying that in certain Particulars of small Import, I had been lucky
 30 enough to improve the Method or the Language and this encourag'd me to think I might possibly in time come to be a tolerable English Writer, of which I was extremely ambitious

My time for these Exercises and for Reading, was at Night, after Work or before it began in the Morning, or on Sundays, when I contrived to be in the Printing House alone, evading as much as I could the common Attendance on publick Worship, which my Father used to exact of me when I was under his Care And which
 40 indeed I still thought a Duty, tho' I could not, as it seemed to me, afford the Time to practise it

When about 16 Years of Age, I happen'd to meet with a Book, written by one Tryon, recommending a Vegetable Diet. I determin'd to go into it. My Brother being yet unmarried, did not keep House, but boarded himself and his Apprentices in another Family. My re-

fusing to eat Flesh occasioned an Inconveniency, and I was frequently chid for my singularity I made myself acquainted with Tryon's Manner of preparing some of his Dishes, such as Boiling Potatoes or Rice, making Hasty Pudding, and a few others, and then propos'd to my Brother, that if he would give me Weekly half the Money he paid for my Board I would board myself He instantly agreed to it, and I presently found that I could save half what he paid me. This was an additional Fund for buying Books But I had another Advantage in it My Brother and the rest going from the Printing House to their Meals. I remain'd there alone, and dispatching presently my light Repast, (which often was no more than a Bisket or a Slice of Bread, a Handful of Raisins or a Tart from the Pastry Cook's, and a Glass of Water) had the rest of the Time till their Return, for Study, in which I made the greater Progress from the greater Clearness of Head and quicker Apprehension which usually attend Temperance in Eating and Drinking And now it was that being on some Occasion made asham'd of my Ignorance in Figures, which I had twice failed in Learning when at School, I took Cocker's Book of Arithmetick, and went thro' the whole by myself with great Ease I also read Seller's and Sturmy's Books of Navigation, and became acquainted with the little Geometry they contain, but never proceeded far in that Science.—And I read about this Time Locke on Human Understanding, and the Art of Thinking by Messrs du Port Royal

While I was intent on improving my Language, I met with an English Grammar (I think it was Greenwood's) at the End of which there were two little

43 Tryon, Thomas Tryon (1634-1703), English mystic Franklin probably read *Health's Grand Preservative* (1682) • 48 Cocker's Edward Cocker (1631-1675), English textbook writer, was the author of several different arithmetics, the most popular of which was first published in 1678, after Cocker's death • 70 Seller's John Seller (fl. 1700) was the author of *The English Pilot* (1671) and *Practical Navigation* (1718) The latter is the book which Franklin probably read • 70 Sturmy's, presumably Samuel Sturmy's *The Mariner's Magazine* (1669) • 73 Locke *Understanding*, the best-known work of the English philosopher John Locke (1632-1704), *An Essay Concerning Human Understanding* (1690) • 75 Messrs . . . Royal. Port-Royal, originally a nunnery near Chevreuse in France, became in the seventeenth century the center of Jansenism, a movement within the Roman Catholic Church with which were associated Cornelius Jansen (1585-1638) and Blaise Pascal (1623-1662) The book referred to by Franklin is *L'Art de penser*, a logic first published in 1662 • 77 Greenwood's, *An Essay towards a Practical English Grammar* (1711) by James Greenwood (d. 1737), English grammarian

sketches of the Arts of Rhetoric and Logic, the latter finishing with a Specimen of a Dispute in the Socratic Method. And soon after I procur'd Xenophon's Memorable Things of Socrates, wherein there are many Instances of the same Method. I was charm'd with it, adopted it, dropt my abrupt Contradiction, and positive Argumentation, and put on the humble Enquirer and Doubter. And being then, from reading Shaftsbury and Collins, become a real Doubter in many Points of our religious Doctrine, I found this Method safest for myself and very embarrassing to those against whom I us'd it, therefore I took a Delight in it, practis'd it continually and grew very artful and expert in drawing People even of superior Knowledge into Concessions the Consequences of which they did not foresee, entangling them in Difficulties out of which they could not extricate themselves, and so obtaining Victories that neither myself nor my Cause always deserved — I continu'd this Method some few years, but gradually left it, retaining only the Habit of expressing myself in Terms of modest Diffidence, never using when I advance any thing that may possibly be disputed, the Words, (*certainly*), *undoubtedly*; or any others that give the Air of Positiveness to an Opinion, but rather say, I conceive, or I apprehend a Thing to be so or so, It appears to me, or I should think it so or so for such and such Reasons, or I imagine it to be so, or it is so if I am not mistaken. This Habit I believe has been of great Advantage to me, when I have had occasion to inculcate my Opinions and persuade Men into Measures that I have been from time to time engag'd in promoting — And as the chief Ends of Conversation are to *inform*, or to be *informed*, to *please* or to *persuade*. I wish wellmeaning sensible Men would not lessen their Power of doing Good by a Positive assuming Manner that seldom fails to disgust, tends to create Opposition, and to defeat every one of those Purposes for which Speech was given us, to wit, giving or receiving Information, or Pleasure. For if you would *inform*, a positive dogmatical Manner in advancing your Sentiments, may provoke Contradiction and prevent a candid Attention. If you wish Information and Improvement from the Knowledge of others and yet at the same time express yourself as firmly fix'd in your present Opinions, modest sensible Men, who do not love Disputation, will probably leave you undisturbed in the Possession of your Error, and by such a

Manner you can seldom hope to recommend yourself in *pleasing* your Hearers, or to persuade those whose Concurrence you desire — Pope says, judiciously,

Men should be taught as if you taught them not. 50
And things unknown propos'd as things forgot.—

farther recommending it to us.

To speak tho' sure, with seeming Diffidence.

And he might have coupled with this Line that which he has coupled with another, I think less properly,

For want of Modesty is want of Sense.

If you ask why *less properly*. I must repeat the lines

"Immodest Words admit of *no* Defence,
For Want of Modesty is Want of Sense"

Now is not *Want of Sense* (where a Man is so unfortunate as to want it) some Apology for his *Want of Modesty*? and would not the Lines stand more justly thus?

Immodest Words admit *but this* Defence,
That Want of Modesty is Want of Sense

This however I should submit to better Judgments —

My Brother had in 1720 or 21, begun to print a Newspaper. It was the second that appear'd in America, and was called *The New England Courant*. The only one before it, was *the Boston News Letter*. I remember 70 his being dissuaded by some of his Friends from the Undertaking, as not likely to succeed, one Newspaper

3 Xenophon's . . . *Socrates*, probably the translation by that title published in 1712 by Edward Bysshe, an English hack writer. Xenophon (444-354? B.C.) wrote his *Memorabilia* (in dialogue form) to defend Socrates against the charge that he had corrupted the youth of Athens.

• 8 Shaftsbury and Collins, presumably a reference to *Charactericks of Men, Manners, Opinions, and Times* (1711) by Anthony Ashley Cooper, third Earl of Shaftesbury (1671-1713), a moralist whose remarks on the Bible show Deistic tendencies, and the *Discourse of Freethinking* (1713) by Anthony Collins (1676-1729), in which that English writer advanced the thesis that all belief should be based upon reason.

• 49 Pope says, in the *Essay on Criticism* (1711), Part II, ll. 574-575 Franklin substitutes 'should' for 'must' in the first line, evidently quoting from memory. The additional line is from the same poem, line 567.

• 55 *another*, not actually by Pope. The couplet Franklin had in mind, concluding *For want of decency is want of sense*, is from the *'Essay on Translated Verse'* (1684) by Wentworth Dillon, fourth Earl of Roscommon (1633?-1685).

• 68 *the second*. The *New-England Courant* had been preceded by three other newspapers (see p. 29).

being in their Judgment enough for America.—At this time 1771 there are not less than five and twenty — He went on however with the Undertaking, and after having work'd in composing the Types and printing off the Sheets, I was employ'd to carry the Papers thro' the Streets to the Customers—He had some ingenious Men among his Friends who amus'd themselves by writing little Pieces for this Paper, which gain'd it Credit, and made it more in Demand, and these Gentlemen
10 often visited us —Hearing their Conversations, and their Accounts of the Approbation their Papers were receiv'd with, I was excited to try my Hand among them But being still a Boy, and suspecting that my Brother would object to printing any Thing of mine in his Paper if he knew it to be mine, I contriv'd to disguise my Hand, and writing an anonymous Paper I put it in at Night under the Door of the Printing House It was found in the Morning and communicated to his Writing Friends when they call'd in as usual They read
20 it, commented on it in my Hearing, and I had the exquisite Pleasure, of finding it met with their Approbation, and that in their different Guesses at the Author none were named but Men of some Character among us for Learning and Ingenuity —I suppose now that I was rather bold in my Judges And that perhaps they were not really so very good ones as I then esteem'd them Encourag'd however by this, I wrote and convey'd in the same Way to the Press several more Papers, which were equally approv'd, and I kept my Secret till my
30 small Fund of Sense for such Performances was pretty well exhausted, and then I discovered it, when I began to be considered a little more by my Brother's Acquaintance, and in a manner that did not quite please him, as he thought, probably with reason, that it tended to make me too vain And perhaps this might be one Occasion of the Differences that we began to have about this Time Tho' a Brother, he considered himself as my Master, and me as his Apprentice, and accordingly expected the same Services from me as he would from another, while
40 I thought he demean'd me too much in some he requir'd of me, who from a Brother expected more Indulgence Our Disputes were often brought before our Father, and I fancy I was either generally in the right, or else a better Pleader, because the Judgment was generally in my favour. But my Brother was passionate and had often beaten me, which I took extreamly amiss, and thinking

my Apprenticeship very tedious, I was continually wishing for some Opportunity of shortening it, which at length offered in a manner unexpected

One of the Pieces in our Newspaper, on some political Point which I have now forgotten, gave Offence to the Assembly He was taken up, censur'd and imprison'd for a Month by the Speaker's Warrant, I suppose because he would not discover his Author I too was taken up and examin'd before the Council, but tho' I did not give them any Satisfaction, they contented themselves with admonishing me, and dismiss'd me, considering me perhaps as an Apprentice who was bound to keep his Master's Secrets During my Brother's Confinement, which I resented a good deal, notwithstanding our private Differences, I had the Management of the Paper, and I made bold to give our Rulers some Rubs in it, which my Brother took very kindly, while others began to consider me in an unfavourable Light, as a young Genius that had a Turn for Libelling and Satyr My Brother's Discharge was accompany'd with an Order of the House, (a very odd one) *that James Franklin should no longer print the Paper called the New England Courant.* There was a Consultation held in our Printing House among his Friends what he should do in this Case. Some propos'd
7 to evade the Order by changing the Name of the Paper, but my Brother seeing Inconveniences in that, it was finally concluded on as a better Way, to let it be printed for the future under the Name of *Benjamin Franklin.* And to avoid the Censure of the Assembly that might fall on him, as still printing it by his Apprentice, the Contrivance was, that my old Indenture should be return'd to me with a full Discharge on the Back of it, to be shown on Occasion, but to secure to him the Benefit of my Service I was to sign new Indentures for the
8 Remainder of the Term, w^{ch} were to be kept private

49 unexpected I fancy his harsh and tyrannical treatment of me, might be a means of impressing me with that aversion to arbitrary power that has stuck to me thro' my whole life —Franklin • 50
some political Point James Franklin's offense, hardly heinous from a present-day point of view, was to print a fictitious letter from Newport saying that pirates had been seen off the coast and that it was reported that the Massachusetts government was fitting out a ship to go after them, "wind and weather permitting" Franklin was arrested for contempt and released only after apology The Order of the House came six months later, after James Franklin had printed (in January 1723) an article attacking "hypocritical pretenders to religion" Benjamin Franklin's name appeared as publisher from February 11, 1723, until fall, when he ran away to New York

A very flimsy Scheme it was, but however it was immediately executed, and the Paper went on accordingly under my Name for several Months. At length a fresh Difference arising between my Brother and me, I took upon me to assert my Freedom, presuming that he would not venture to produce the new Indentures. It was not fair in me to take this Advantage, and this I therefore reckon one of the first Errata of my life: But the Unfairness of it weighed little with me, when under the Impressions of Resentment, for the Blows his Passion too often urg'd him to bestow upon me. Tho' he was otherwise not an ill-natur'd Man. Perhaps I was too saucy and provoking.

When he found I would leave him, he took care to prevent my getting Employment in any other Printing-House of the Town, by going round and speaking to every Master, who accordingly refus'd to give me Work. I then thought of going to New York as the nearest Place where there was a Printer: and I was the rather inclin'd to leave Boston, when I reflected that I had already made myself a little obnoxious to the governing Party, and from the arbitrary Proceedings of the Assembly in my Brother's Case it was likely I might if I stay'd soon bring myself into Scrapes; and farther that my indiscrete Disputations about Religion began to make me pointed at with Horror by good People, as an Infidel or Atheist. I determin'd on the Point: but my Father now siding with my Brother, I was sensible that if I attempted to go openly, Means would be used to prevent me. My Friend Collins therefore undertook to manage a little for me. He agreed with the Captain of a New York Sloop for my Passage, under the Notion of my being a young Acquaintance of his that had got a naughty Girl with Child, whose Friends would compel me to marry her, and therefore I could not appear or come away publicly. So I sold some of my Books to raise a little Money, Was taken on board privately, and as we had a fair Wind[,] in three Days I found myself in New York near 300 Miles from home, a Boy of but 17, without the least Recommendation to or Knowledge of any Person in the Place, and with very little Money in my Pocket.

My Inclinations for the Sea, were by this time worn out, or I might now have gratify'd them. But having a Trade, and supposing myself a pretty good Workman I offer'd my Service to the Printer in the Place, old Mr

W^m Bradford, who had been the first Printer in Pennsylvania, but remov'd from thence upon the Quarrel of Geo Keith — He could give me no Employment, having little to do, and Help enough already. But, says he, 50 my Son at Philadelphia has lately lost his principal Hand, Aquila Rose, by Death. If you go thither I believe he may employ you. — Philadelphia was 100 Miles farther I set out, however, in a Boat for Amboy, leaving my Chest and Things to follow me round by Sea. In crossing the Bay we met with a Squall that tore our rotten sails to pieces, prevented our getting into the Kill, and drove us upon Long Island. In our Way a drunken Dutchman, who was a Passenger too, fell overboard, when he was sinking I reach'd thro' the Water 60 to his shock Pate and drew him up so that we got him in again. His ducking sober'd him a little, and he went to sleep, taking first out of his Pocket a Book which he desir'd I would dry for him. It prov'd to be my old favourite Author Bunyan's *Pilgrim's Progress* in Dutch, finely printed on good Paper with copper Cuts, a Dress better than I had ever seen it wear in its own Language. I have since found that it has been translated into most of the Languages of Europe, and suppose it has been 70 more generally read than any other Book except perhaps the Bible. Honest John was the first that I know of who mix'd Narration and Dialogue, a Method of Writing very engaging to the Reader, who in the most interesting Parts finds himself, as it were brought into the Company, and present at the Discourse. De foe in his *Crusoe*, his *Moll Flanders*, *Religious Courtship*, *Family Instructor*, and other Pieces, has imitated it with Success. And Richardson has done the same in his *Pamela*, etc —

46 old . . . Bradford. William Bradford (1663-1752) was the pioneer printer of the middle colonies, having first visited Pennsylvania in 1682 • 51 my Son, Andrew Bradford (1686-1742), for many years Franklin's chief rival in Philadelphia • 52 Aquila Rose (1695-1723), a minor poet, author of the posthumous *Poems on Several Occasions* (1740) • 54 Amboy, Perth Amboy, on the southern shore of Raritan Bay in New Jersey • 58 Kill, Kill van Kull, the strait between Staten Island and New Jersey • 75 De foe . . . Pieces. The references are to *Robinson Crusoe* (1719), *Moll Flanders* (1722), *Religious Courtship* (1722), and *The Family Instructor* (1715-1718) or *A New Family Instructor* (1727). Franklin's acquaintance with the work of Defoe has interesting implications for the student of his style • 78 Richardson, Samuel Richardson (1689-1761), English novelist, whose *Pamela, or Virtue Rewarded* was first printed in 1740

When we drew near the Island we found it was at a Place where there could be no Landing, there being a great Surff on the stony Beach. So we dropt Anchor and swung round towards the Shore. Some People came down to the Water Edge and hallow'd to us, as we did to them. But the Wind was so high and the Surff so loud, that we could not hear so as to understand each other. There were Canoes on the Shore, and we made Signs and hallow'd that they should fetch us, but they either did not
 5 understand us, or thought it impracticable. So they went away, and Night coming on, we had no Remedy but to wait till the Wind should abate, and in the mean time the Boatman and I concluded to sleep if we could, and so crouded into the Scuttle with the Dutchman who was still wet, and the Spray beating over the Head of our Boat, leak'd thro' to us, so that we were soon almost as wet as he. In this Manner we lay all Night with very little Rest. But the Wind abating the next Day, we made a Shift to reach Amboy before Night, having been
 20 Hours on the Water without Victuals, or any Drink but a Bottle of filthy Rum. The Water we sail'd on being salt —

In the Evening I found myself very feverish, and went in to Bed. But having read somewhere that cold Water drank plentifully was good for a Fever, I follow'd the Prescription, sweat plentifully most of the Night, my Fever left me, and in the Morning crossing the Ferry, I proceeded on my Journey, on foot, having 50 Miles to Burlington, where I was told I should find Boats that
 30 would carry me the rest of the Way to Philadelphia.

It rain'd very hard all the Day, I was thoroughly soak'd, and by Noon a good deal tir'd, so I stopt at a poor Inn, where I staid all night, beginning now to wish I had never left home. I cut so miserable a Figure too, that I found by the Questions ask'd me I was suspected to be some runaway Servant, and in danger of being taken up on that Suspicion. However I proceeded the next Day, and got in the Evening to an Inn within 8 or 10 Miles of Burlington, kept by one Dr. Brown. —

40 He ent[e]red into Conversation with me while I took some Refreshment, and finding I had read a little, became very sociable and friendly. Our Acquaintance continu'd as long as he liv'd. He had been, I imagine an itinerant Doctor, for there was no Town in England, or Country in Europe, of which he could not give a very particular Account. He had some Letters, and was in-

genious, but much of an Unbeliever, and wickedly undertook, some Years after to travesty the Bible in doggerel Verse as Cotton had done Virgil. By this means he set many of the Facts in a very ridiculous Light, and might have hurt weak minds if his Work had been publish'd — but it never was. — At his House I lay that Night, and the next Morning reach'd Burlington — But had the Mortification to find that the regular Boats were gone a little before my coming, and no other expected to go till Tuesday, this being Saturday. Wherefore I returned to an old Woman in the Town of whom I had bought Gingerbread to eat on the Water, and ask'd her Advice: she invited me to lodge at her House till a Passage by Water should offer — and being tired with my foot Travel-
 ling, I accepted the Invitation. She understanding I was a Printer, would have had me stay at that Town and follow my Business, being ignorant of the Stock necessary to begin with. She was very hospitable, gave me a Dinner of Ox Cheek with great Goodwill, accepting only of a Pot of Ale in return. And I thought myself fix'd till Tuesday should come. However walking in the Evening by the Side of the River, a Boat came by, which I found was going towards Philadelphia, with several People in her. They took me in, and as there was no wind, we
 row'd all the Way, and about Midnight not having yet seen the City, some of the Company were confident we must have pass'd it, and would row no farther, the others knew not where we were, so we put towards the Shore, got into a Creek, landed near an old Fence[,] with the Rails of which we made a Fire, the Night being cold, in October, and there we remain'd till Daylight. Then one of the Company knew the Place to be Cooper's Creek a little above Philadelphia, which we saw as soon as we got out of the Creek, and arriv'd there about 8 or 9 o'Clock, on the Sunday morning, and landed at the Market Street Wharff. —

I have been the more particular in this Description of my Journey, and shall be so of my first Entry into that

29 Burlington, on the Delaware River, northeast of Philadelphia • 39 Dr. Brown, apparently an obscure physician, Dr. John Browne, who died in 1737 • 49 as . . . Virgil, an allusion to a burlesque poem

"Scarronides," or the "First Book of Virgil Travestie" (1664), by Charles Cotton (1630-1687), English translator • 78 Cooper's Creek, a small stream which empties into the Delaware at Camden, just above downtown Philadelphia

City, that you may in your Mind compare such unlikely Beginnings with the Figure I have since made there I was in my Working Dress, my best Cloaths being to come round by Sea. I was dirty from my Journey, my Pockets were stuff'd out with Shirts and Stockings, I knew no Soul, nor where to look for Lodging I was fatigued with Travelling, Rowing and Want of Rest I was very hungry, and my whole Stock of Cash consisted of a Dutch Dollar and about a Shilling in Copper The latter I gave the People of the Boat for my Passage, who at first refus'd it on Acct of my Rowing, but I insisted on their taking it, a Man being sometimes more generous when he has but a little Money than when he has plenty, perhaps thro' Fear of being thought to have but little Then I walk'd up the Street, gazing about, till near the Market House I met a Boy with Bread I had made many a Meal on Bread, and inquiring where he got it, I went immediately to the Baker's he directed me to in Second Street, and ask'd for Bisket, intending such as we had in Boston, but they it seems were not made in Philadelphia, then I ask'd for a threepenny Loaf, and was told they had none such: so not considering or knowing the Difference of Money and the greater Cheapness nor the Names of his Bread, I bad[e] him give me threepenny worth of any sort. He gave me accordingly three great Puffy Rolls. I was surpriz'd at the Quantity, but took it, and having no room in my Pockets, walk'd off, with a Roll under each Arm, and eating the other Thus I went up Market Street as far as fourth Street, passing by the Door of Mr Read, my future Wife's Father, when she standing at the Door saw me, and thought I made as I certainly did a most awkward ridiculous Appearance Then I turn'd and went down Chestnut Street and part of Walnut Street, eating my Roll all the Way, and coming round found myself again at Market Street Wharff, near the Boat I came in, to which I went for a Draught of the River Water, and being fill'd with one of my Rolls, gave the other two to a Woman and her Child that came down the River in the Boat with us and were waiting to go farther. Thus refresh'd I walk'd again up the Street, which by this time had many clean dress'd People in it who were all walking the same Way, I join'd them, and thereby was led into the great Meeting House of the Quakers near the Market I sat down among them, and after looking round awhile and hearing nothing said, being very drowsy thro' Labour and want of Rest

the preceding Night, I fell fast asleep, and continu'd so till the Meeting broke up, when one was kind enough to rouse me This was therefore the first House I was in or slept in, in Philadelphia.—

50

I had been religiously educated as a Presbyterian, and tho some of the dogmas of that persuasion, such as *the eternal decrees of God, election, reprobation, etc.* appeared to me unintelligible, others doubtful, and I early absented myself from the public assemblies of the sect, Sunday being my studying day, I never was without some religious principles. I never doubted, for instance, the existence of the Deity, that he made the world, and govern'd it by his Providence, that the most acceptable service of God was the doing good to man, that our souls are immortal, and that all crime will be punished, and virtue rewarded, either here or hereafter. These I esteem'd the essentials of every religion, and, being to be found in all the religions we had in our country, I respected them all, tho' with different degrees of respect, as I found them more or less mix'd with other articles, which, without any tendency to inspire, promote, or confirm morality, serv'd principally to divide us, and make us unfriendly to one another This respect to all with an opinion that the worst had some good effects, induc'd me to avoid all discourse that might tend to lessen the good opinion another might have of his own religion, and as our province increas'd in people, and new places of worship were continually wanted, and generally erected by voluntary contribution my mite for such purpose, whatever might be the sect, was never refused

Tho' I seldom attended any public worship, I had still an opinion of its propriety, and of its utility when rightly conducted, and I regularly paid my annual subscription for the support of the only Presbyterian minister or meeting we had in Philadelphia He us'd to visit me sometimes as a friend, and admonish me to attend his

50 **Philadelphia** The selection from the portion of the *Autobiography* written at Twyford ends here, Franklin went on to describe his first connections in Philadelphia, his voyage to England and his work there in 1724-1726, and his business life in Philadelphia down to 1730 • 63 **the essentials . . . religion**, derived, that is to say, from comparing the fundamentals of all faiths—a typical Deistic method Note also that Franklin omits mention of the Bible as the revealed word of God, an omission which is the surest distinguishing mark of Deism

administrations, and I was now and then prevail'd on to do so, once for five Sundays successively. Had he been in my opinion a good preacher, perhaps I might have continued, notwithstanding the occasion I had for the Sunday's leisure in my course of study, but his discourses were chiefly either polemic arguments, or explications of the peculiar doctrines of our sect, and were all to me very dry, uninteresting, and unedifying, since not a single moral principle was inculcated or enforc'd.
10 their aim seeming to be rather to make us Presbyterians than good citizens

At length he took for his text that verse of the fourth chapter of Philippians *"Finally, brethren, whatsoever things are true, honest, just, pure, lovely, or of good report, if there be any virtue, or any praise, think on these things."* And I imagin'd, in a sermon on such a text, we could not miss of having some morality. But he confin'd himself to five points only, as meant by the apostle, viz. 1 Keeping holy the Sabbath day 2 Being diligent
20 in reading the holy Scriptures 3 Attending duly the publick worship 4 Partaking of the Sacrament 5 Paying a due respect to God's ministers. These might be all good things, but, as they were not the kind of good things that I expected from that text, I despaired of ever meeting with them from any other, was disgusted, and attended his preaching no more. I had some years before compos'd a little Liturgy, or form of prayer, for my own private use (viz, in 1728), entitled, *Articles of Belief and Acts of Religion*. I return'd to the use of this,
30 and went no more to the public assemblies. My conduct might be blameable, but I leave it, without attempting further to excuse it, my present purpose being to relate facts, and not to make apologies for them.

It was about this time I conceiv'd the bold and arduous project of arriving at moral perfection. I wish'd to live without committing any fault at any time, I would conquer all that either natural inclination, custom, or company might lead me into. As I knew, or thought I knew, what was right and wrong, I did not see why I
40 might not always do the one and avoid the other. But I soon found I had undertaken a task of more difficulty than I had imagined. While my care was employ'd in guarding against one fault, I was often surprised by another, habit took the advantage of attention, inclination was sometimes too strong for reason. I concluded, at length, that the mere speculative conviction that it

was our interest to be completely virtuous, was not sufficient to prevent our slipping, and that the contrary habits must be broken, and good ones acquired and established, before we can have any dependence on a steady, uniform rectitude of conduct. For this purpose I therefore contriv'd the following method.

In the various enumerations of the moral virtues I had met with in my reading, I found the catalogue more or less numerous, as different writers included more or fewer ideas under the same name. Temperance, for example, was by some confined to eating and drinking, while by others it was extended to mean the moderating every other pleasure, appetite, inclination, or passion, bodily or mental, even to our avarice and ambition. I propos'd to myself, for the sake of clearness, to use rather more names, with fewer ideas annex'd to each, than a few names with more ideas, and I included under thirteen names of virtues all that at that time occur'd to me as necessary or desirable, and annexed to each a short precept, which fully express'd the extent I gave to its meaning.

These names of virtues, with their precepts, were

1 TEMPERANCE

Eat not to dullness, drink not to elevation.

2 SILENCE

Speak not but what may benefit others or yourself, avoid trifling conversation.

3 ORDER

Let all your things have their places, let each part of your business have its time.

4 RESOLUTION

Resolve to perform what you ought, perform without fail what you resolve.

28 *Articles . . . Religion*, to be found in Bigelow's *Complete Works*, I, 307-316, and in Smyth's *Writings*, II 91-100.

5 FRUGALITY.

Make no expense but to do good to others or yourself, *i.e.*, waste nothing

6 INDUSTRY.

Lose no time, be always employ'd in something useful, cut off all unnecessary actions

7. SINCERITY

Use no hurtful deceit, think innocently and justly, and, if you speak, speak accordingly

8 JUSTICE.

Wrong none by doing injuries, or omitting the benefits that are your duty

9 MODERATION

Avoid extreams, forbear resenting injuries so much as you think they deserve

10 CLEANLINESS

Tolerate no uncleanness in body, cloaths, or habitation

11 TRANQUILLITY.

Be not disturbed at trifles, or at accidents common or unavoidable

12 CHASTITY.

Rarely use venery but for health or offspring, never to dulness, weakness, or the injury of your own or another's peace or reputation

13 HUMILITY.

Imitate Jesus and Socrates

My intention being to acquire the *habitude* of all these virtues, I judg'd it would be well not to distract my attention by attempting the whole at once, but to fix it on one of them at a time, and, when I should be

master of that, then to proceed to another, and so on, till I should have gone thro' the thirteen, and, as the previous acquisition of some might facilitate the acquisition of certain others, I arrang'd them with that view, as they stand above Temperance first, as it tends to procure that coolness and clearness of head, which is so necessary where constant vigilance was to be kept up, and guard maintained against the unremitting attraction of ancient habits, and the force of perpetual temptations. This being acquir'd and establish'd, Silence would be more easy, and my desire being to gain knowledge at the same time that I improv'd in virtue, and considering that in conversation it was obtain'd rather by the use of the ears than of the tongue, and therefore wishing to break a habit I was getting into of prattling, punning, and joking, which only made me acceptable to trifling company, I gave *Silence* the second place. This and the next, *Order* I expected would allow me more time for attending to my project and my studies. *Revolution*, once become habitual, would keep me firm in my endeavors to obtain all the subsequent virtues, *Frugality* and *Industry* freeing me from my remaining debt, and producing affluence and independence, would make more easy the practice of *Sincerity* and *Justice*, etc., etc. Conceiving then, that, agreeably to the advice of Pythagoras in his Golden Verses, daily examination would be necessary, I contriv'd the following method for conducting that examination

I made a little book, in which I allotted a page for each of the virtues. I rul'd each page with red ink, so as to have seven columns, one for each day of the week, marking each column with a letter for the day. I cross'd these columns with thirteen red lines, marking the beginning of each line with the first letter of one of the virtues, on which line, and in its proper column, I might mark, by a little black spot, every fault I found upon examination to have been committed respecting that virtue upon that day

57 **Pythagoras Verses.** The Greek philosopher Pythagoras (fl. 540-512 B.C.) favored an ascetic discipline as a means of attaining spiritual perfection. A translation of the verses referred to by Franklin, showing remarkable similarity to the program here outlined, is given in Bigelow's *Complete Works*, I, 177-179. It seems probable that Franklin derived his Pythagorean ideas from Thomas Tryon, whose vegetarianism has been mentioned earlier. • 60 a little book, which bears, according to William Temple Franklin, the date July 1, 1733

I determined to give a week's strict attention to each of the virtues successively. Thus, in the first week, my great guard was to avoid every the least offence against *Temperance*, leaving the other virtues to their ordinary chance, only marking every evening the faults of the day. Thus, if in the first week I could keep my first line, marked T, clear of spots, I suppos'd the habit of that virtue so much strengthen'd, and its opposite weaken'd, that I might venture extending my attention to include the next, and for the following week keep both lines clear of spots. Proceeding thus to the last, I could go thro' a course compleat in thirteen weeks, and four courses in a year. And like him who, having a garden to weed, does not attempt to eradicate all the bad herbs at once, which would exceed his reach and his strength, but works on one of the beds at a time, and, having accomplish'd the first, proceeds to a second, so I should have, I hoped, the encouraging pleasure of seeing on my pages the progress I made in virtue, by clearing successively my lines of their spots, till in the end, by a number of courses, I should be happy in viewing a clean book, after a thirteen weeks' daily examination.

This my little book had for its motto these lines from Addison's *Cato*:

Here will I hold If there's a power above us
(And that there is, all nature cries aloud
Thro' all her works), He must delight in virtue,
And that which He delights in must be happy.

Another from Cicero,

O vitæ Philosophia dux! O virtutum indagatrix exploratrixque vitiorum! Unus dies, bene et ex præceptis tuis actus, peccanti immortalitati est anteponendus

Another from the Proverbs of Solomon, speaking of wisdom or virtue

Length of days is in her right hand, and in her left hand riches and honour. Her ways are ways of pleasantness, and all her paths are peace.—III. 16, 17.

And conceiving God to be the fountain of wisdom, I thought it right and necessary to solicit his assistance for obtaining it, to this end I formed the following little prayer, which was prefix'd to my tables of examination, for daily use.

O powerful Goodness! bountiful Father! merciful Guide! Increase in me that wisdom which discovers my truest interest. Strengthen my resolutions to perform what that wisdom dictates. Accept my kind offices to thy other children as the only return in my power for thy continual favours to me.

I used also sometimes a little prayer which I took from Thomson's Poems, viz

Father of light and life, thou Good Supreme!
O teach me what is good, teach me Thyself!
Save me from folly, vanity, and vice.
From every low pursuit, and fill my soul
With knowledge, conscious peace, and virtue pure;
Sacred, substantial, never-fading bliss!

24 Addison's *Cato*, a tragedy produced and published in 1713. The lines quoted (except for the "us" at the end of the first line) appear in a soliloquy by Cato on Plato's views of the immortality of the soul, at the beginning of Act V. • 29 Cicero, Marcus Tullius Cicero (106-43 B.C.), Roman orator and philosopher. The sentences, with a few lines intervening, may be found in Bk. V, Chap. II, of the *Tusculan Disputations*, and may be translated as follows: "O philosophy, thou guide of life, O thou explorer of virtue and expeller of vice. One day well spent and in accordance with thy lessons is to be preferred to an eternity of error." • 50 Thomson's *Poems*. The lines are from "Winter" (1726), ll. 210-215, by the English poet James Thomson (1700-1748).

The precept of *Order* requiring that *every part of my business should have its allotted time*, one page in my little book contain'd the following scheme of employment for the twenty-four hours of a natural day

THE MORNING Question. What good shall I do this day?	{	5)	Rise, wash and address
		6)	<i>Powerful Goodness'</i> Contrive day's business, and take the resolution of the day, prosecute the present study, and breakfast
		7)	
		8)	
NOON.	{	9)	Work.
		10)	
		11)	
		12)	Read, or overlook my accounts, and dine.
EVENING. Question. What good have I done to-day?	{	2)	
		3)	Work
		4)	
		5)	
NIGHT.	{	6)	Put things in their places. Supper. Music or diversion, or conversation. Examination of the day
		7)	
		8)	
		9)	
	{	10)	
		11)	
		12)	Sleep.
		1)	
	{	2)	
		3)	
		4)	
		5)	

I enter'd upon the execution of this plan for self-examination, and continu'd it with occasional intermissions for some time. I was surpris'd to find myself so much fuller of faults than I had imagined, but I had the satisfaction of seeing them diminish. To avoid the trouble of renewing now and then my little book, which, by scraping out the marks on the paper of old faults to make room for new ones in a new course, became full of holes, I transferr'd my tables and precepts to the ivory leaves of a memorandum book, on which the lines were drawn with red ink, that made a durable stain, and on those lines I mark'd my faults with a black-lead pencil, which marks I could easily wipe out with a wet sponge. After a while I went thro' one course only in a year, and afterward only one in several years, till at length

I omitted them entirely, being employ'd in voyages and business abroad, with a multiplicity of affairs that interfered, but I always carried my little book with me.

My scheme of *ORDER* gave me the most trouble; and I found that, tho' it might be practicable where a man's business was such as to leave him the disposition of his time, that of a journeyman printer, for instance, it was not possible to be exactly observed by a master who must mix with the world and often receive people of business at their own hours. *Order*, too, with regard to places for things, papers, etc. I found extremely difficult to acquire. I had not been early accustomed to it, and, having an exceeding good memory, I was not so sensible of the inconvenience attending want of method. This article, therefore, cost me so much painful attention, and my faults in it vexed me so much, and I made so little progress in amendment, and had such frequent relapses, that I was almost ready to give up the attempt, and content myself with a faulty character in that respect, like the man who, in buying an ax of a smith, my neighbour, desired to have the whole of its surface as bright as the edge. The smith consented to grind it bright for him if he would turn the wheel, he turn'd, while the smith press'd the broad face of the ax hard and heavily on the stone, which made the turning of it very fatiguing. The man came every now and then from the wheel to see how the work went on, and at length would take his ax as it was, without farther grinding. "No," said the smith, "turn on, turn on, we shall have it bright by-and-by, as yet, it is only speckled." "Yes," says the man, "*but I think I like a speckled ax best.*" And I believe this may have been the case with many who, having, for want of some such means as I employ'd, found the difficulty of obtaining good and breaking bad habits in other points of vice and virtue, have given up the struggle, and concluded that "*a speckled ax was best*"; for something, that pretended to be reason, was every now and then suggesting to me that such extremity as I exacted of myself might be a kind of foppery in morals, which, if it were known, would make me ridiculous, that a perfect character might be attended with the inconvenience of being envied and hated; and that a benevolent man should allow a few faults in himself, to keep his friends in countenance.

In truth, I found myself incorrigible with respect to *Order*, and now I am grown old, and my memory bad,

I feel very sensibly the want of it. But, on the whole, tho' I never arrived at the perfection I had been so ambitious of obtaining, but fell far short of it, yet I was, by the endeavour, a better and a happier man than I otherwise should have been if I had not attempted it, as those who aim at perfect writing by imitating the engraved copies, tho' they never reach the wish'd-for excellence of those copies, their hand is mended by the endeavour, and is tolerable while it continues fair and
o legible

It may be well my posterity should be informed that to this little artifice, with the blessing of God, their ancestor ow'd the constant felicity of his life, down to his 79th year, in which this is written. What reverses may attend the remainder is in the hand of Providence, but, if they arrive, the reflection on past happiness enjoy'd ought to help his bearing them with more resignation. To Temperance he ascribes his long-continued health, and what is still left to him of a good constitution, to
o Industry and Frugality, the early easiness of his circumstances and acquisition of his fortune, with all that knowledge that enabled him to be a useful citizen, and obtained for him some degree of reputation among the learned, to Sincerity and Justice, the confidence of his country, and the honorable employs it conferred upon him, and to the joint influence of the whole mass of the virtues, even in the imperfect state he was able to acquire them, all that evenness of temper, and that cheerfulness in conversation, which makes his company still sought
o for, and agreeable even to his younger acquaintances. I hope, therefore, that some of my descendants may follow the example and reap the benefit . . .

In 1746, being at Boston I met there with a Dr. Spence who was lately arrived from Scotland, and show'd me some electric experiments. They were imperfectly perform'd as he was not very expert but, being on a subject quite new to me, they equally surpris'd and pleased me. Soon after my return to Philadelphia, our library company receiv'd from Mr. P. Collinson,
o Fellow of the Royal Society of London, a present of a glass tube with some account of the use of it in making such experiments. I eagerly seized the opportunity of repeating what I had seen at Boston, and, by much practice, acquir'd great readiness in performing those, also, which we had an account of from England, adding a

number of new ones. I say much practice, for my house was continually full, for some time, with people who came to see these new wonders.

To divide a little this incumbrance among my friends, I caused a number of similar tubes to be blown at our glass-house, with which they furnished themselves, so that we had at length several performers. Among these, the principal was Mr. Kinnersley, an ingenious neighbor, who, being out of business, I encouraged to undertake showing the experiments for money, and drew up for him two lectures, in which the experiments were rang'd in such order, and accompanied with such explanations in such method, as that the foregoing should assist in comprehending the following. He procur'd an elegant apparatus for the purpose, in which all the little machines that I had roughly made for myself were nicely form'd by instrument-makers. His lectures were well attended, and gave great satisfaction, and after some time he went thro' the colonies exhibiting them in every capital town and pick'd up some money. In the West India Islands, indeed, it was with difficulty the experiments could be made, from the general moisture of the air.

Oblig'd as we were to Mr. Collinson for his present of the tube, etc. I thought it right he should be inform'd
o of our success in using it, and wrote him several letters containing accounts of our experiments. He got them read in the Royal Society where they were not at first thought worth so much notice as to be printed in their

32 benefit. Here ends the selection from the portion of the *Autobiography* written at Passy in 1784. A few paragraphs, relating chiefly to a proposed book on the "Art of Virtue," which Franklin never got around to writing, have been omitted. • 33 Dr. Spence has been identified tentatively by I. Bernard Cohen in his edition (1941) of Franklin's *Experiments* as a Dr. A. Spencer, who advertised courses in experimental philosophy in Boston in 1743 and in Philadelphia in 1744. It appears probable that Franklin erred both in the date of his first acquaintance with electrical experiments and in the name of the man who displayed them. • 39 Mr. P. Collinson, Peter Collinson (1694-1768), a Quaker merchant of London whose large trade with America enabled him to gratify a fondness for gardening and natural history. He formed intimate connections not only with Franklin but also with John Bartram, the father of William Bartram (see p. 117), and throughout his life imported exotic plants for his gardens at Mill Hill, near London. • 53 Mr. Kinnersley, Ebenezer Kinnersley (1711-1778), one of Franklin's closest associates and himself a considerable contributor to electrical science. After 1751 he lectured on a plan drawn up by Franklin, throughout the colonies and even in the West Indies.

Transactions One paper, which I wrote for Mr Kinnersley, on the sameness of lightning with electricity, I sent to Dr Mitchel, an acquaintance of mine and one of the members also of that society, who wrote me word that it had been read, but was laughed at by the connoisseurs. The papers, however, being shown to Dr Fothergill, he thought they were of too much value to be stifled, and advis'd the printing of them. Mr Collinson then gave them to Cave for publication in his *Gentleman's Magazine*; but he chose to print them separately in a pamphlet and Dr Fothergill wrote the preface. Cave, it seems, judged rightly for his profit, for by the additions that arrived afterward, they swell'd to a quarto volume which has had five editions, and cost him nothing for copy-money.

It was, however, some time before those papers were much taken notice of in England. A copy of them happening to fall into the hands of the Count de Buffon, a philosopher deservedly of great reputation in France, and, indeed, all over Europe, he prevailed with M. Dalibard to translate them into French, and they were printed at Paris. The publication offended the Abbé Nollet, preceptor in Natural Philosophy to the royal family, and an able experimenter, who had form'd and publish'd a theory of electricity, which then had the general vogue. He could not at first believe that such a work came from America, and said it must have been fabricated by his enemies at Paris, to decry his system. Afterwards, having been assur'd that there really existed such a person as Franklin at Philadelphia, which he had doubted, he wrote and published a volume of "Letters," chiefly address'd to me, defending his theory, and denying the verity of my experiments, and of the positions deduc'd from them.

I once purpos'd answering the abbé, and actually began the answer, but, on consideration that my writings contain'd a description of experiments which any one might repeat and verify, and if not to be verifi'd, could not be defended, or of observations offer'd as conjectures, and not delivered dogmatically, therefore not laying me under any obligation to defend them, and reflecting that a dispute between two persons, writing in different languages, might be lengthened greatly by mis-translations and thence misconceptions of one another's meaning, much of one of the abbé's letters being founded on an error in the translation, I concluded to let my

papers shift for themselves, believing it was better to spend what time I could spare from public business in making new experiments, than in disputing about those already made. I therefore never answered M Nollet, and the event gave me no cause to repent my silence; for my friend M le Roy of the Royal Academy of Sciences, took up my cause and refuted him, my book was translated into the Italian, German, and Latin languages, and the doctrine it contain'd was by degrees universally adopted by the philosophers of Europe in preference to that of the abbé, so that he lived to see himself the last of his sect, except Monsieur B———, of Paris, his *élève* and immediate disciple.

What gave my book the more sudden and general celebrity, was the success of one of its proposed experiments, made by Messrs Dalibard and Delor at Marly, for drawing lightning from the clouds. This engag'd the public attention every where. M Delor, who had an apparatus for experimental philosophy, and lectur'd in that branch of science, undertook to repeat what he called the *Philadelphia Experiments*, and, after they were performed before the king and court, all the curious of Paris flocked to see them. I will not swell this narrative with an account of that capital experiment, nor of the infinite pleasure I receiv'd in the success of a similar one I made soon after with a kite at Philadelphia, as both are to be found in the histories of electricity.

3 Dr Mitchel, John Mitchell (d. 1768), an English physician and scientist who resided from about 1721 until 1747 or 1748 at Urbanna, Virginia. He is most famous for his map of North America, printed in 1755. • 6 Dr. Fothergill, John Fothergill (1712-1780), English Quaker physician. He had many close connections with the American colonies and subsidized William Bartram's expedition into the Floridas and Georgia in 1773-1777 (see pp. 118-126). • 9 Cave, Edward Cave (1691-1754), English printer and founder of the *Gentleman's Magazine* (1731), probably the most widely circulated periodical of the eighteenth century. • 18 Count de Buffon, George Louis Leclerc, Comte de Buffon (1707-1785), one of the great natural philosophers of the age. • 20 M Dalibard, Jean François Dalibard (1703-1799). His translation was printed in 1752, on May 10 of the same year he successfully carried out the experiment suggested by Franklin of drawing lightning from the clouds. • 22 Abbé Nollet, Jean Antoine Nollet (1700-1770), the chief French opponent to Franklin's theories. He appears to have been offended because Franklin ignored his earlier work in the field of electricity. • 52 M le Roy, Jean Baptiste Le Roy (1719-1800), a French physician much interested in electricity. • 62 Delor. Of Delor, master of experimental philosophy, little is known beyond the fact that he performed Franklin's experiments before the King and his courtiers and on May 18, 1752, repeated the experiment of drawing lightning from the clouds by using a ninety-foot iron rod.

Dr. Wright, an English physician, when at Paris, wrote to a friend, who was of the Royal Society, an account of the high esteem my experiments were in among the learned abroad, and of their wonder that my writings had been so little noticed in England. The Society, on this, resum'd the consideration of the letters that had been read to them, and the celebrated Dr. Watson drew up a summary account of them and of all I had afterwards sent to England on the subject, which
 10 he accompanied with some praise of the writer. This summary was then printed in their Transactions, and some members of the Society in London, particularly the very ingenious Mr. Canton, having verified the experiment of procuring lightning from the clouds by a pointed rod, and acquainting them with the success, they soon made me more than amends for the slight with which they had before treated me. Without my having made any application for that honor, they chose me a member, and voted that I should be excus'd the
 20 customary payments, which would have amounted to twenty-five guineas, and ever since have given me their Transactions gratis. They also presented me with the

gold medal of Sir Godfrey Copley for the year 1753, the delivery of which was accompanied by a very handsome speech of the president, Lord Macclesfield, wherein I was highly honoured

1771-1788-1868

1 Dr. Wright. At this point Franklin's memory seems to have been badly in error. His writings were actually discussed before the Royal Society in June 1751 by Watson (see note), some time before his book had reached France. The Dr. Wright referred to is possibly William Wright (1735-1813), later closely associated with Franklin's friends, Fothergill and Sir John Pringle (see p. 269). • 7 Dr. Watson, Sir William Watson (1715-1787), who had begun to contribute papers on electricity to the Royal Society as early as 1745. His theories were very similar to Franklin's, although more vaguely expressed. • 13 Mr. Canton, John Canton (1718-1772), English schoolteacher and electrician, elected a Fellow of the Royal Society in 1749. • 23 Sir Godfrey Copley, (d. 1709) left the Royal Society the sum of one hundred pounds, the income of which was expended after 1736 for the annual award of a gold medal to persons making notable contributions to natural knowledge. • 25 Lord Macclesfield, George Parker, second Earl of Macclesfield (1697-1764), astronomer and a president of the Royal Society. He was chiefly responsible for the English acceptance of the change of the calendar in 1752.

The Way to Wealth

In 1757, on board ship en route to England, Franklin brought together into a single piece many of the aphorisms relating to industry, frugality, and prudence which had previously appeared in the pages of *Poor Richard's Almanac*. Whether or not he had a file of the almanacs with him is uncertain; very possibly he had at hand a copy of *Gnomologia: Adagies and Proverbs; Wise Sentences and Witty Sayings, Ancient and Modern, Foreign and British* (London, 1732) by Thomas Fuller (1654-1734), a

book which contains a great many of the sentences used by Franklin. In any case the compilation eventually proved to be one of Franklin's best-known works. As published in *Poor Richard Improved* for 1758 it had no title, it was reprinted in 1760 as *Father Abraham's Speech*, and in 1774 as *The Way to Wealth*, by which name it is now usually known. Thereafter it was published over and over again and translated into almost all of the modern languages, altogether nearly five hundred different editions are known. The explanation of such popularity lies partly in the age-old love for proverbs and partly in the dominance of the bourgeois philosophy of life during the nineteenth and twentieth centuries.

The almanacs did not always contain such trustful worldly wisdom as appears here; Franklin had a streak of cynicism, and such adages as "Let thy maid-servant be faithful, strong, and homely," "Fish and visitors smell in three days," "An egg today is better than a hen tomorrow," and "He does not possess wealth, it possesses him" are not in quite the same spirit as those included here. It

should be noted that Franklin did not claim to be original in his maxims (only one, "Three Removes is as bad as a Fire," is thought to have been completely his creation), he displayed admirable literary skill, however, in creating a character and background to make his piece more than a mere listing of wise sayings, and in polishing and humanizing the material he garnered from his predecessors. "The cat in gloves catches no mice" is, for example, a redaction of "A gloved cat was never a good mouser" (Scottish proverb) and "A muffled cat is no good mouser" (English)

Courteous Reader,

I have heard that nothing gives an Author so great Pleasure, as to find his Works respectfully quoted by other learned Authors. This Pleasure I have seldom enjoyed, for tho' I have been, if I may say it without Vanity, an *eminent Author* of Almanacks annually now a full Quarter of a Century, my Brother Authors in the same Way, for what Reason I know not, have ever been very sparing in their Applauses; and no other Author has taken the least Notice of me, so that did not my Writings produce me some solid *Pudding*, the great Deficiency of *Praise* would have quite discouraged me.

I concluded at length, that the People were the best Judges of my Merit, for they buy my Works; and besides, in my Rambles, where I am not personally known, I have frequently heard one or other of my Adages repeated, with, as *Poor Richard* says, at the End on't, this gave me some Satisfaction, as it showed not only that my Instructions were regarded, but discovered likewise some Respect for my Authority, and I own, that to encourage the Practice of remembering and repeating those wise Sentences, I have sometimes *quoted myself* with great Gravity.

Judge then how much I must have been gratified by an Incident I am going to relate to you. I stopt my Horse lately where a great Number of People were collected at a Vendue of Merchant Goods. The Hour of Sale not being come, they were conversing on the Badness of the Times, and one of the Company call'd to a plain clean old Man, with white Locks, *Pray, Father Abraham, what think you of the Times? Won't these heavy Taxes quite ruin the Country? How shall we ever be able to pay them? What would you advise us to?—*

Father *Abraham* stood up, and reply'd, If you'd have my Advice, I'll give it you in short, for a *Word to the Wise is enough*, and *many Words won't fill a Bushel*, as *Poor Richard* says. They join'd in desiring him to speak his Mind, and gathering round him, he proceeded as follows,

"Friends, says he, and Neighbours, the Taxes are indeed very heavy, and if those laid on by the Government were the only Ones we had to pay, we might more easily discharge them; but we have many others, and much more grievous to some of us. We are taxed twice as much by our *Idleness*, three times as much by our *Pride*, and four times as much by our *Folly*, and from these Taxes the Commissioners cannot ease or deliver us by allowing an Abatement. However let us hearken to good Advice, and something may be done for us, *God helps them that help themselves*, as *Poor Richard* says, in his Almanack of 1733.

It would be thought a hard Government that should tax its People one tenth Part of their *Time*, to be employed in its Service. But *Idleness* taxes many of us much more, if we reckon all that is spent in absolute *Sloth*, or doing of nothing, with that which is spent in idle Employments or Amusements, that amount to nothing. *Sloth*, by bringing on Diseases, absolutely shortens Life. *Sloth, like Rust, consumes faster than Labour wears, while the used Key is always bright*, as *Poor Richard* says. But *dost thou love Life, then do not squander Time, for that's the Stuff Life is made of*, as *Poor Richard* says—How much more than is necessary do we spend in Sleep! forgetting that *The sleeping Fox catches no Poultry*, and that *there will be sleeping enough in the Grave*, as *Poor Richard* says. If Time be of all Things the most precious, *wasting Time* must be, as *Poor Richard* says, *the greatest Prodigality*, since, as he elsewhere tells us, *Lost Time is never found again*; and what we call *Time-enough, always proves little enough*: Let us then up and be doing, and doing to the Purpose, so by Diligence shall we do more with less Perplexity. *Sloth makes all Things difficult, but Industry all easy*, as *Poor*

Text *Poor Richard* Improved for 1758 • 7 Quarter . . . Century. The first *Poor Richard* was compiled in 1732, for the year 1733 • 11 solid Pudding. How much money Franklin made from *Poor Richard* is not known, but from the beginning his almanac was an enormous success, averaging perhaps ten thousand copies annually. It must have been one of his most reliable sources of income.

Richard says, and He that riseth late, must trot all Day, and shall scarce overtake his Business at Night. While Laziness travels so slowly, that Poverty soon overtakes him, as we read in Poor Richard, who adds, Drive thy Business let not that drive thee; and Early to Bed, and early to rise, makes a Man healthy, wealthy and wise.

So what signifies *wishing* and *hoping* for better Times We may make these Times better if we bestir ourselves *Industry need not wish*, as *Poor Richard* says, and *He that lives upon Hope will die fasting. There are no Gains, without Pains; then Help Hands, for I have no Lands, or if I have, they are smartly taxed* And, as *Poor Richard* likewise observes, *He that hath a Trade hath an Estate, and He that hath a Calling, hath an Office of Profit and Honour*, but then the *Trade* must be worked at, and the *Calling* well followed, or neither the *Estate*, nor the *Office*, will enable us to pay our Taxes—If we are industrious we shall never starve, for, as *Poor Richard* says, *At the working Man's House Hunger looks in, but dares not enter. Nor will the Bailiff or the Constable enter, for Industry pays Debts, while Despair increaseth them* says *Poor Richard*—What though you have found no Treasure, nor has any rich Relation left you a Legacy, *Diligence is the Mother of Good luck*, as *Poor Richard* says, and *God gives all Things to Industry* Then plough deep, while Sluggards sleep, and you shall have Corn to sell and to keep, says *Poor Dick*. Work while it is called To-day, for you know not how much you may be hindered To-morrow, which makes *Poor Richard* say, *One To-day is worth two To-morrows; and farther, Have you somewhat to do To-morrow, do it To-day. If you were a Servant, would you not be ashamed that a good Master should catch you idle? Are you then your own Master, be ashamed to catch yourself idle*, as *Poor Dick* says When there is so much to be done for yourself, your Family, your Country, and your gracious King, be up by Peep of Day, *Let not the Sun look down and say, Inglorious here he lies. Handle your Tools without Mittens, remember that the Cat in Gloves catches no Mice*, as *Poor Richard* says 'Tis true there is much to be done, and perhaps you are weak handed, but stick to it steadily, and you will see great Effects, for *constant Dropping wears away Stones, and by Diligence and Patience the Mouse ate in two the Cable; and little Strokes fell great Oaks*, as *Poor Richard* says in his Almanack, the Year I cannot just now remember.

Methinks I hear some of you say, *Must a Man afford himself no Leisure?*—I will tell thee, my Friend, what *Poor Richard* says, *Employ thy Time well if thou meanest to gain Leisure; and since thou art not sure of a Minute, throw not away an Hour*. Leisure, is Time for doing something useful, this Leisure the diligent Man will obtain, but the lazy Man never; so that, as *Poor Richard* says, *a Life of Leisure and a Life of Laziness are two Things*. Do you imagine that Sloth will afford you more Comfort than Labour? No, for as *Poor Richard* says, *Trouble springs from Idleness, and grievous Toil from needless Ease. Many without Labour, would live by their WITS only, but they break for want of Stock* Whereas Industry gives Comfort, and Plenty, and Respect *Fly Pleasures, and they'll follow you. The diligent Spinner has a large Shift; and now I have a Sheep and a Cow, every Body bids me Good morrow*, all which is well said by *Poor Richard*.

But with our Industry, we must likewise be *steady, settled and careful*, and oversee our own Affairs *with our own Eyes*, and not trust too much to others, for, as *Poor Richard* says,

*I never saw an oft removed Tree,
Nor yet an oft removed Family,
That thrive so well as those that settled be*

And again, *Three Removes is as bad as a Fire; and again Keep thy Shop, and thy Shop will keep thee, and again, If you would have your Business done, go. If not, send. And again,*

*He that by the Plough would thrive,
Himself must either hold or drive.*

And again, *The Eye of a Master will do more Work than both his Hands; and again, Want of Care does us more Damage than Want of Knowledge; and again, Not to oversee Workmen, is to leave them your Purse open. Trusting too much to others Care is the Ruin of many, for, as the Almanack says, In the Affairs of this World, Men are saved, not by Faith, but by the Want of it; but a Man's own Care is profitable, for, saith Poor Dick, Learning is to the Studious, and Riches to the Careful, as well as Power to the Bold, and Heaven to the Virtuous. And farther, If you would have a faithful Servant, and one that you like, serve yourself. And again, he adviseth to Circumspection and Care, even in the smallest Mat-*

ters, because sometimes *a little Neglect may breed great Mischiefs*, adding, *For want of a Nail the Shoe was lost; for want of a Shoe the Horse was lost; and for want of a Horse the Rider was lost*, being overtaken and slain by the Enemy, all for want of Care about a Horse shoe Nail.

So much for Industry, my Friends, and Attention to one's own Business, but to these we must add *Frugality*, if we would make our *Industry* more certainly successful A Man may, if he knows not how to save as he gets, *keep his Nose all his Life to the Grindstone*, and die not worth a *Groat* at last *A fat Kitchen makes a lean Will*, as *Poor Richard* says; and,

*Many Estates are spent in the Getting,
Since Women for Tea forsook Spinning and Knitting,
And Men for Punch forsook Hewing and Splitting.*

If you would be wealthy, says he, in another Almanack, *think of Saving as well as of Getting. The Indies have not made Spain rich, because her Outgoes are greater than her Incomes*. Away then with your expensive Follies, and you will not have so much Cause to complain of hard Times, heavy Taxes, and chargeable Families, for, as *Poor Dick* says,

*Women and Wine, Game and Deceit
Make the Wealth small, and the Wants great.*

And farther, *What maintains one Vice, would bring up two Children*. You may think perhaps, That a little Tea, or a little Punch now and then, Diet a little more costly, Clothes a little finer, and a little Entertainment now and then, can be no great Matter, but remember what *Poor Richard* says, *Many a Little makes a Mickle*, and farther, *Beware of little Expences; a small Leak will sink a great Ship*, and again, *Who Dainties love, shall Beggars prove*, and moreover, *Fools make Feasts, and wise Men eat them*.

Here you are all got together at this Vendue of *Fancies* and *Knicknacks*. You call them *Goods* but if you do not take Care, they will prove *Evils* to some of you You expect they will be sold *cheap*, and perhaps they may for less than they cost; but if you have no Occasion for them, they must be *dear* to you Remember what *Poor Richard* says, *Buy what thou hast no Need of and ere long thou shalt sell thy Necessaries*. And again *At a great Pennyworth pause a while*: He means, that perhaps the Cheapness is *apparent* only, and not *real* or the Bargain, by straitning thee in thy Business, may do

thee more Harm than Good. For in another Place he says, *Many have been ruined by buying good Pennyworths*. Again, *Poor Richard* says, *'Tis foolish to lay out Money in a Purchase of Repentance*; and yet this Folly is practised every Day at Vendues, for want of minding the Almanack. *Wise Men*, as *Poor Dick* says, *learn by others Harms, Fools scarcely by their own*; but *Felix quem faciunt aliena Pericula cautum*. Many a one, for the Sake of Finery on the Back, have gone with a hungry Belly, and half starved their Families, *Silks and Satins, Scarlet and Velvets*, as *Poor Richard* says, *put out the Kitchen Fire*. These are not the *Necessaries* of Life, they can scarcely be called the *Conveniences*, and yet only because they look pretty, how many want to have them The artificial Wants of Mankind thus become more numerous than the *natural*, and, as *Poor Dick* says, *For one poor Person, there are an hundred indigent*. By these, and other Extravagancies, the Genteele are reduced to Poverty, and forced to borrow of those whom they formerly despised, but who through *Industry* and *Frugality* have maintained their Standing, in which Case it appears plainly, that a *Ploughman on his Legs is higher than a Gentleman on his Knees*, as *Poor Richard* says Perhaps they have had a small Estate left them which they knew not the Getting of, they think *'tis Day, and will never be Night*; that a little to be spent out of so much, is not worth minding, (*a Child and a Fool, as Poor Richard says, imagine Twenty Shillings and Twenty Years can never be spent*) but, *always taking out of, the Meal-tub, and never putting in, soon comes to the Bottom*; then, as *Poor Dick* says, *When the Well's dry, they know the Worth of Water*. But this they might have known before, if they had taken his Advice. *If you would know the Value of Money, go and try to borrow some*: for, *he that goes a borrowing goes a sorrowing*, and indeed so does he that lends to such People, when he goes to get it in again.—*Poor Dick* farther advises, and says,

*Fond Pride of Dress is sure a very Curse;
Let Fancy you consult, consult your Purse.*

And again, *Pride is as loud a Beggar as Want, and a*

51 *Felix* *cautum*. Fortunate is he whom the mistakes of others make wary

great deal more saucy. When you have bought one fine Thing you must buy ten more, that your Appearance may be all of a Piece, but *Poor Dick* says, *'Tis easier to suppress the first Desire, than to satisfy all that follow it.* And 'tis as truly Folly for the Poor to ape the Rich, as for the Frog to swell, in order to equal the Ox.

Great Estates may venture more.

But little Boats should keep near Shore.

'Tis however a Folly soon punished, for *Pride that dines*
10 *on Vanity sups on Contempt,* as *Poor Richard* says And in another Place, *Pride breakfasted with Plenty, dined with Poverty, and supped with Infamy.* And after all, of what Use is this *Pride of Appearance,* for which so much is risked, so much is suffered? It cannot promote Health, or ease Pain, it makes no Increase of Merit in the Person, it creates Envy, it hastens Misfortune

What is a Butterfly? At best

He's but a Caterpillar drest.

The gaudy Fop's his Picture just.

20 as *Poor Richard* says

But what Madness must it be to *run in Debt* for these Superfluities? We are offered, by the Terms of this Vendue, *Six Months Credit;* and that perhaps has induced some of us to attend it, because we cannot spare the ready Money, and hope now to be fine without it But, ah, think what you do when you run in Debt, *You give to another, Power over your Liberty.* If you cannot pay at the Time, you will be ashamed to see your Creditor, you will be in Fear when you speak to him,
30 you will make poor pitiful sneaking Excuses, and by Degrees come to lose your Veracity, and sink into base downright lying, for, as *Poor Richard* says, *The second Vice is Lying, the first is running in Debt* And again, to the same Purpose, *Lying rides upon Debt's Back.* Whereas a freeborn *Englishman* ought not to be ashamed or afraid to see or speak to any Man living But Poverty often deprives a Man of all Spirit and Virtue *'Tis hard for an empty Bag to stand upright,* as *Poor Richard* truly says. What would you think of that Prince, or
40 that Government, who should issue an Edict forbidding you to dress like a Gentleman or a Gentlewoman, on Pain of Imprisonment or Servitude? Would you not say, that you are free, have a Right to dress as you please, and that such an Edict would be a Breach of your Privileges, and such a Government tyrannical? And yet

you are about to put yourself under that Tyranny when you run in Debt for such Dress! Your Creditor has Authority at his Pleasure to deprive you of your Liberty by confining you in Goal [*sic*] for Life, or to sell you for a Servant, if you should not be able to pay him' 50 When you have got your Bargain, you may, perhaps, think little of Payment, but *Creditors, Poor Richard* tells us, *have better Memories than Debtors;* and in another Place says, *Creditors are a superstitious Sect, great Observers of set Days and Times.* The Day comes round before you are aware, and the Demand is made before you are prepared to satisfy it Or if you bear your Debt in Mind, the Term which at first seemed so long, will, as it lessens, appear extremely short *Time* will seem to have added Wings to his Heels as well as Shoulders 60 *Those have a short Lent,* saith *Poor Richard,* *who owe Money to be paid at Easter.* Then since, as he says, *The Borrower is a Slave to the Lender, and the Debtor to the Creditor,* disdain the Chain, preserve your Freedom, and maintain your Independency Be *industrious* and *free,* be *frugal* and *free.* At present, perhaps, you may think yourself in thriving Circumstances, and that you can bear a little Extravagance [*sic*] without Injury, but,

For Age and Want, save while you may;

No Morning Sun lasts a whole Day.

as *Poor Richard* says—Gain may be temporary and uncertain, but ever while you live, Expence is constant and certain, and *'tis easier to build two Chimnies than to keep one in Fuel,* as *Poor Richard* says So rather go to Bed supperless than rise in Debt.

Get what you can, and what you get hold;

'Tis the Stone that will turn all your Lead into Gold.

as *Poor Richard* says And when you have got the Philosopher's Stone, sure you will no longer complain of bad Times, or the Difficulty of paying Taxes

This Doctrine, my Friends, is *Reason* and *Wisdom,* but after all, do not depend too much upon your own *Industry,* and *Frugality,* and *Prudence,* though excellent Things, for they may all be blasted without the Blessing of Heaven, and therefore ask that Blessing humbly, and be not uncharitable to those that at present seem to want it, but comfort and help them. Remember *Job* suffered, and was afterwards prosperous

And now to conclude, *Experience keeps a dear School, but Fools will learn in no other, and scarce in that;* for

it is true, *we may give Advice, but we cannot give Conduct*, as *Poor Richard* says. However, remember this, *They that won't be counselled, can't be helped*, as *Poor Richard* says. And farther, *That if you will not bear Reason, she'll surely rap you Knuckles*.

Thus the old Gentleman ended his Harangue. The People heard it, and approved the Doctrine and immediately practised the contrary, just as if it had been a common Sermon, for the Vendue opened, and they began to buy extravagantly, notwithstanding all his Cautions, and their own Fear of Taxes—I found the good Man had thoroughly studied my Almanacks, and digested all I had dropt on those Topics during the Course of Five-and-twenty Years. The frequent Mention he made of me must have tired any one else, but my Vanity was wonderfully delighted with it, though I was conscious that not a tenth Part of the Wisdom was my own which

he ascribed to me, but rather the *Gleanings* I had made of the Sense of all Ages and Nations. However, I resolved to be the better for the Echo of it; and though I had at first determined to buy Stuff for a new Coat, I went away resolved to wear my old One a little longer. *Reader*, if thou wilt do the same, thy Profit will be as great as mine.

I am, as ever,

Thine to serve thee

RICHARD SAUNDERS

1757•1758

18 *The Gleanings* Nations Not all of Franklin's adages can be traced to particular sources, but examination of earlier collections of proverbs will disclose most of them in some form similar to that he used. • 27 *Richard Saunders*, the fictitious compiler of *Poor Richard*

Letter to Sir John Pringle

It is difficult to represent Franklin's scientific writing, particularly that which deals with electricity, in small space. The following letter, however, illustrates both the clarity of his explanatory style—a factor which had a great deal to do with the wide acceptance of his theories and suggestions—and his talent for devising simple apparatus for the experimental investigation of his hypotheses. His thinking in the field of hydrodynamics has been amply justified by later expenditures to provide experimental tanks for the study of naval architecture and, although he did not foresee them, wind tunnels for the investigation of aerodynamics. Sir John Pringle (1707-1782) was a Scottish physician and professor who served as president of the Royal Society of London from 1772 until 1778. He and Franklin traveled together on the continent

in the summer of 1766. This letter was first printed in the 1769 edition of *Experiments & Observations on Electricity*.

Craven Street, 10 May, 1768

Sir—You may remember that when we were traveling together in Holland, you remarked that the *track-schuit* in one of the stages went slower than usual, and inquired of the boatman what might be the reason, who answered that it had been a dry season and the water in the canal was low. On being again asked if it was so low that the boat touched the muddy bottom, he said no, not so low as that, but so low as to make it harder for the horse to draw the boat. We neither of us at first could conceive that if there was enough water for the boat to swim clear of the bottom, its being deeper would make any difference. But, as the man affirmed it seriously as a thing well known among them, and as the punctuality required in their stages was likely to make such difference, if any there were, more readily observed by them than by other watermen who did not pass so regularly and constantly backwards and forwards in the same track, I began to apprehend there might be something in it, and attempted to account for it from this

Text Bigelow, *Complete Works*, IV, 159-162. • 3 *trackschuit*, the Dutch *trek-schuit*, towboat.

consideration, that the boat, in proceeding along the canal, must, in every boat's length of her course, move out of her way a body of water equal in bulk to the room her bottom took up in the water; that the water so moved must pass on each side of her and under her bottom to get behind her; that if the passage under her bottom was straitened by the shallows, more of that water must pass by her sides, and with a swifter motion, which would retard her, as moving the contrary way, or
 10 that the water becoming lower behind the boat than before, she was pressed back by the weight of its difference in height, and her motion retarded by having that weight constantly to overcome. But as it is often lost time to attempt accounting for uncertain facts, I determined to make an experiment of this when I should have convenient time and opportunity.

After our return to England, as often as I happened to be on the Thames, I enquired of our watermen whether they were sensible of any difference in rowing
 20 over shallow or deep water. I found them all agreeing in the fact that there was a very great difference, but they differed widely in expressing the quantity of the difference, some supposing it was equal to a mile in six, others to a mile in three, &c. As I did not recollect to have met with any mention of this matter in our philosophical books, and conceiving that if the difference should really be great it might be an object of consideration in the many projects now on foot for digging new navigable canals in this island, I lately put
 30 my design of making the experiment in execution, in the following manner.

I provided a trough of planed boards fourteen feet long, six inches wide, and six inches deep, in the clear, filled with water within half an inch of the edge, to represent a canal. I had a loose board of nearly the same length and breadth, that, being put into the water might be sunk to any depth, and fixed by little wedges where I would choose to have it stay, in order to make different depths of water, leaving the surface at the
 40 same height with regard to the sides of the trough. I had a little boat in form of a lighter or boat of burthen, six inches long, two inches and a quarter wide, and one inch and a quarter deep. When swimming it drew one inch water. To give motion to the boat I fixed one end of a long silk thread to its bow, just even with the water's edge, the other end passed over a well-made

brass pulley of about an inch diameter, turning freely on a small axis, and a shilling was the weight. Then placing the boat at one end of the trough, the weight would draw it through the water to the other.

Not having a watch that shows seconds, in order to measure the time taken up by the boat in passing from end to end, I counted as fast as I could count to ten repeatedly, keeping an account of the number of tens on my fingers. And, as much as possible to correct any little inequalities in my counting, I repeated the experiment a number of times at each depth of water, that I might take the medium. And the following are the results.

	Water		
	11 2 inches deep	2 inches	4 1 2 inches
1st exp	- - 100 - - -	94 - - -	79
2	- - - 101 - - -	93 - - -	78
3	- - - 104 - - -	91 - - -	77
4	- - - 106 - - -	87 - - -	79
5	- - - 100 - - -	88 - - -	79
6	- - - 99 - - -	86 - - -	80
7	- - - 100 - - -	90 - - -	79
8	- - - 100 - - -	88 - - -	81
	<u>815</u>	<u>717</u>	<u>632</u>
	Medium 101	Medium 89	Medium 79

I made many other experiments, but the above are those in which I was most exact, and they serve sufficiently to show that the difference is considerable. Between the deepest and shallowest it appears to be somewhat more than one fifth. So that, supposing large canals and boats and depths of water to bear the same proportions, and that four men or horses would draw a boat in deep water four leagues in four hours, it would require five to draw the same boat in the same time as far in shallow water, or four would require five hours.

Whether this difference is of consequence enough to justify a greater expense in deepening canals, is a matter of calculation, which our ingenious engineers in that way will readily determine. I am, &c.

B. FRANKLIN

Rules by Which a Great Empire May be Reduced to a Small One

A large part of Franklin's time in the decade after the repeal of the Stamp Act (1766) was devoted to pleading the cause of the American colonies before the British public and the Tory government. Had his policy of mediation been successful, some scheme of home rule, foreshadowing the later colonial policy of Great Britain, might have been worked out. Franklin was ordinarily good-natured about the situation, but sometimes he grew impatient with the measures of men who did not know or wish to know the true state of affairs in America. The latter mood lay behind the "Rules by Which a Great Empire May be Reduced to a Small One," perhaps the most vitriolic of his satires, first published in a London newspaper, the *Public Advertiser*, in 1773. Using his favorite method of irony, he displayed the worst features of the British colonial administration, which was based on favoritism and selfishness rather than on any desire for efficiency and competence. On the surface it was pointed most directly, perhaps, at William Legge, second Earl of Dartmouth (1731-1801), who had become, in August 1772, secretary of state for the colonies and president of board of trade and foreign plantations. Actually, however, the acts and policies listed form a scathing review of the record of Dartmouth's predecessor in those posts, Wills Hill, first Earl of Hillsborough (1718-1793), who served as the cabinet member chiefly responsible for American affairs from 1768 until 1772. Some printings, in fact, bear the half-title "Presented to a late Minister, when he entered upon his Administration."

An ancient Sage boasted, that, tho' he could not fiddle, he knew how to make a *great city* of a *little one*. The science that I, a modern simpleton, am about to communicate, is the *very reverse*.

I address myself to all ministers who have the management of extensive dominions, which from their very greatness are become troublesome to govern, because the multiplicity of their affairs leaves no time for *fiddling*.

I In the first place, gentlemen, you are to consider, that a great empire, like a great cake, is most easily ¹⁰ diminished at the edges. Turn your attention, therefore, first to your remotest provinces, that, as you get rid of them, the next may follow in order.

II That the possibility of this separation may always exist, take special care the provinces are never incorporated with the mother country, that they do not enjoy the same common rights, the same privileges in commerce, and that they are governed by *several* laws, all of *your enacting*, without allowing them any share in the choice of the legislators. By carefully making and pre- ²⁰ serving such distinctions, you will (to keep to my simile of the cake) act like a wise gingerbread baker, who, to facilitate a division, cuts his dough half through in those places, where, when baked, he would have it *broken to pieces*.

III These remote provinces have perhaps been acquired, purchased, or conquered, at the *sole expence* of the settlers or their ancestors, without the aid of the mother country. If this should happen to increase her *strength* by their growing numbers ready to join in her ³⁰ wars, her *commerce* by their growing demand for her manufactures, or her *naval power* by greater employment for her ships and seamen, they may probably suppose some merit in this, and that it entitles them to some favour, you are therefore to *forget it all*, or resent it as if they had done you injury. If they happen to be zealous Whigs, friends of liberty, nurtured in revolution principles, *remember all that* to their prejudice, and resolve to punish it, for such principles, after a revolution is thoroughly established, are of *no more use*, they are even ⁴⁰ *odious* and *abominable*.

IV However peaceably your colonies have submitted to your government, shewn their affection to your interests, and patiently borne their grievances, you are to *suppose* them always inclined to revolt, and treat them

Text from the *Gentleman's Magazine*, September 1773 • 37 revolution principles, an allusion to the Whig leadership in the Glorious Revolution of 1688, an event which was the chief precedent for those who believed in the supremacy of the people over the crown

accordingly Quarter troops among them, who by their insolence may *provoke* the rising of mobs, and by their bullets and bayonets *suppress* them. By this means, like the husband who uses his wife ill *from suspicion*, your [sic] may in time convert your *suspensions* into *realities*.

V Remote provinces must have *Governors*, and *Judges*, to represent the Royal Person, and execute every where the delegated parts of his office and authority. You ministers know, that much of the strength of
10 government depends on the *opinion* of the people, and much of that opinion on the choice of rulers placed immediately over them. If you send them wise and good men for governors, who study the interest of the colonists, and advance their prosperity, they will think their King wise and good, and that he wishes the welfare of his subjects. If you send them learned and upright men for Judges, they will think him a lover of justice. This may attach your provinces more to his government. You are, therefore, to be careful who you recommend for
20 those offices.—If you can find prodigals who have ruined their fortunes, broken gamblers or stock jobbers, these may do well as *governors*, for they will probably be rapacious, and provoke the people by their extortions. Wrangling proctors and pettifogging lawyers, too, are not amiss, for they will be for ever disputing and quarrelling with their little parliaments. If withal they should be ignorant, wrong headed, and insolent, so much the better. Attornies clerks and Newgate solicitors will do for *Chief-Justices*, especially if they hold their places
30 *during your pleasure*. And all will contribute to impress those ideas of your government that are proper for a people *you would wish to renounce it*.

VI To confirm these impressions, and strike them deeper, whenever the injured come to the capital with complaints of mal-administration, oppression, or injustice, punish such suitors with long delay, enormous expence, and a final judgment in favour of the oppressor. This will have an admirable effect every way. The trouble of future complaints will be prevented, and Governors
and Judges will be encouraged to farther acts of oppression and injustice, and thence the people may become more disaffected, *and at length desperate*.

VII. When such Governors have crammed their coffers, and made themselves so odious to the people that they can no longer remain among them in safety to their persons, recal and *reward* them with pensions. You may

make them *Baronets*, too, if that respectable order should not think fit to resent it. All will contribute to encourage new governors in the same practices, and make the supreme government *detestable*.

VIII If, when you are engaged in war, your colonies should vie in liberal aids of men and money against the common enemy, upon your simple requisition, and give far beyond their abilities, reflect, that a penny taken from them by your power is more honourable to you than a pound presented by their benevolence. Despise therefore their voluntary grants, and resolve to harrass them with novel taxes. They will probably complain to your parliaments, that they are taxed by a body in which they have no representative, and that this is contrary to common right. They will petition for redress. Let the Parliaments flout their claims, reject their petitions, refuse even to suffer the reading of them, and treat the petitioners with the utmost contempt. Nothing can have a better effect in producing the alienation proposed, for though many can forgive injuries, *none ever forgive contempt*.

IX In laying these taxes, never regard the heavy burthens those remote people already undergo, in defending their own frontiers, supporting their own provincial governments, making new roads, building bridges, churches, and other public edifices, which in old countries have been done to your hands by your ancestors but which occasion constant calls and demands on the purses of a new people. Forget the *restraints* you lay on their trade for *your own* benefit, and the advantage a *monopoly* of this trade gives your exacting merchants. Think nothing of the wealth those merchants and your manufacturers acquire by the colony commerce, their increased ability thereby to pay taxes at home, their accumulating, in the price of their commodities, most of those taxes, and so levying them from their consuming customers, all this, and the employment and support of thousands of your poor by the colonists, you are *intinctly to forget*. But remember to make your arbitrary tax more grievous to your provinces, by public declarations im-

1 Quarter troops, as in Boston, where their presence, on the recommendation of Governor Bernard, led eventually to the Boston Massacre of 1770 • 47 Baronets. Governor Francis Bernard (1714-1779) was created baronet after his recall from Massachusetts • 58 novel taxes, such as the Stamp Tax of 1765

porting that your power of taxing them has *no limits*; so that when you take from them without their consent one shilling in the pound, you have a clear right to the other nineteen. This will probably weaken every idea of *security in their property* and convince them, that, under such a government, *they have nothing they can call their own*; which can scarce fail of producing the *happiest consequences*!

X Possibly, indeed, some of them might still comfort themselves, and say, 'Though we have no property, we have yet *something* left that is valuable, we have 'constitutional *liberty* both of person and of conscience. 'This King, these Lords, and these Commons, who, it seems, are too remote from us to know us, and feel for us cannot take from us our *Habeas-Corpus* right, or our right of trial *by a Jury of our neighbours*; they cannot deprive us of the exercise of our religion, alter our ecclesiastical constitution, and compel us to be Papists, if they please, or Mahometans.' To annihilate this comfort, begin by laws to perplex their commerce with infinite regulations impossible to be remembered and observed, ordain seizures of their property for every failure, take away the trial of such property by Jury, and give it to arbitrary Judges of your own appointing, and of the lowest characters in the country, whose salaries and emoluments are to arise out of the duties or condemnations, and whose appointments are *during pleasure*. Then let there be a formal declaration of both houses, that opposition to your edicts is *treason*, and that any person suspected of treason in the provinces may, according to some obsolete law, be seized and sent to the metropolis of the empire for trial, and pass an act that those there charged with certain other offences shall be sent away in chains from their friends and country to be tried in the same manner for felony. Then erect a new Court of Inquisition among them, accompanied by an armed force, with instructions to transport all such suspected persons, to be ruined by the expence if they bring over evidences to prove their innocence, or be found guilty and hanged if they cannot afford it. And, lest the people should think you cannot possibly go any farther, pass another solemn declaratory act, that 'King, Lords, and Commons had, hath, and of right ought to have full power and authority to make statutes of sufficient force and validity to bind the unrepresented provinces IN ALL CASES WHATSOEVER.' This will include *spiritual* with

temporal, and, taken together, must operate wonderfully to your purpose, by convincing them, that they are at present under a power something like that spoken of in the scriptures, which cannot only *kill their bodies*, but *so damn their souls* to all eternity, by compelling them, if it pleases, *to worship the Devil*.

XI. To make your taxes more odious, and more likely to procure resistance, send from the capital a board of officers to superintend the collection, composed of the most *indiscreet, ill-bred, and insolent*, you can find. Let these have large salaries out of the extorted revenue, and live in open grating luxury upon the sweat and blood of the industrious, whom they are to worry continually with groundless and expensive prosecutions before the above-mentioned arbitrary revenue Judges, all *at the cost of the party prosecuted*, tho' acquitted because *the King is to pay no costs*.—Let these men, *by your order*, be exempted from all the common taxes and burthens of the province, though they and their property are protected by its laws. If any revenue officers are *suspected* of the least tenderness for the people, discard them. If others are justly complained of, protect and reward them. If any of the under officers behave so as to provoke the people to drub them, promote those to better offices. *so* this will encourage others to procure for themselves such profitable drubbings, by multiplying and enlarging such provocations, and *all will work towards the end you aim at*.

XII Another way to make your tax odious, is to misapply the produce of it. If it was originally appropriated for the *defence* of the provinces, the better support of government, and the administration of justice where it may be *necessary*, then apply none of it to that *defence*, but bestow it where it is *not necessary*. *so* in augmented salaries or pensions to every governor who has distinguished himself by his enmity to the people, and by calumniating them to their sovereign. This will make them pay it more unwillingly, and be more apt to quarrel with those that collect it, and those that imposed it who will quarrel again with them, and

42 declaratory act, the Declaratory Act of 1766, passed immediately before the repeal of the Stamp Act. It was the answer of Parliament to the colonists' argument that they were not, under their royal charters, subject to control by a body in which they had no representation

No. 7 Church Street, Franklin's London residence

all shall contribute to your *main purpose*, of making them *weary of your government*.

XIII If the people of any province have been accustomed to support their own Governors and Judges to satisfaction, you are to apprehend that such Governors and Judges may be thereby influenced to treat the people kindly, and to do them justice. This is another reason for applying part of that revenue in larger salaries to such Governors and Judges, given, as their commissions are,
 10 during your *pleasure* only, forbidding them to take any salaries from their provinces, that thus the people may no longer hope any kindness from their Governors, or (in Crown cases) any justice from their Judges. And as the money thus misapplied in one province is extorted from all, probably *all will resent the misapplication*.

XIV If the parliaments of your provinces should dare to claim rights, or complain of your administration, order them to be harassed with repeated *dissolutions*. If the same men are continually returned by new elections,
 20 adjourn their meetings to some country village where they cannot be accommodated, and there keep them during *pleasure*; for this, you know, is your PREROGATIVE, and an excellent one it is, as you may manage it, to promote discontents among the people, diminish their respect, and *increase their disaffection*.

XV. Convert the brave, honest officers of your navy into pimping tide-waiters and colony officers of the customs. Let those who, in time of war, fought gallantly in defence of the commerce of their countrymen, in

peace be taught to prey upon it. Let them learn to be corrupted by great and real smugglers; but (to shew their diligence) scour with armed boats every bay, harbour, river, creek, cove, or nook, throughout the coast of your colonies, stop and detain every coaster, every wood-boat, every fisherman, tumble their cargoes, and even their ballast, inside out, and upside down, and, if a penny worth of pins is found un-entered, let the whole be seized and confiscated. Thus shall the trade of your colonists suffer more from their friends in time of peace, than it did from their enemies in war. Then let these boats crews land upon every farm in their way, rob the orchards, steal the pigs and the poultry, and insult the inhabitants. If the injured and exasperated farmers, unable to procure other justice, should attack the aggressors, drub them and burn their boats; you are to call this *high treason and rebellion*, order fleets and armies into their country, and threaten to carry all the offenders three thousand miles to be hanged, drawn, and quartered. *O' this will work admirably!*

XVI If you are told of discontents in your colonies never believe that they are general, or that you have given occasion for them, therefore, do not think of applying any remedy, or of changing any offensive measure. Redress no grievance, lest they should be encouraged to demand the redress of some other grievance. Grant no request that is just and reasonable, lest they should make another that is unreasonable. Take all your informations of the state of the colonies from your Governors and officers in enmity with them. Encourage and reward these *leasing makers*; secrete their lying accusations, lest they should be confuted, but act upon them as the clearest evidence, and believe nothing you hear from the friends of the people. Suppose all *then* complaints to be invented and promoted by a few factious demagogues, whom if you could catch and hang, all would be quiet. Catch and hang a few of them accordingly; and the *blood of the Martyrs* shall *work miracles* in favour of your purpose.

XVII If you see *rival nations* rejoicing at the pros-

18 *dissolutions*, such as those in Massachusetts. Franklin seems to have had in mind the refusal of the House of Representatives in 1768 to rescind the circular letter sent to other colonial assemblies, although Hillsborough ordered them to do so or face dissolution. • 45 *burn their boats*, an allusion to the burning of the schooner *Gaspée*, June 10 1772, an act of violence which called forth the threats mentioned

pect of your disunion with your provinces, and endeavouring to promote it, if they translate, publish and applaud all the complaints of your discontented colonists, at the same time privately stimulating you to severer measures, let not that *alarm* or offend you. Why should it? since you all mean *the same thing*.

XVIII If any colony should, at their own charge, erect a fortress to secure their port against the fleets of a foreign enemy, get your Governor to betray that fortress
 10 into your hands. Never think of paying what it cost the country, for that would *look*, at least, like some regard for justice, but turn it into a citadel to awe the inhabitants, and curb their commerce. If they should have lodged in such fortress the very arms they bought and used to aid you in your conquests, seize them all, it will provoke like *ingratitude* added to *robbery*. One admirable effect of these operations will be, to discourage every other colony from erecting such defences, and so your enemies may more easily invade them, to the great
 20 disgrace of your government, and, of course, *the furtherance of your project*.

XIX Send armies into their country under pretence of protecting the inhabitants, but, instead of garrisoning the forts on their frontiers with those troops, to prevent incursions, demolish those forts, and order the troops into the heart of the country, that the savages may be encouraged to attack the frontiers, and that the

troops may be protected by the inhabitants: this will seem to proceed from your ill-will or your ignorance, and contribute farther to produce and strengthen an
 30 opinion among them, *that you are no longer fit to govern them*.

XX Lastly, invest the General of your army in the provinces with great and unconstitutional powers, and free him from the controul of even your own Civil Governors. Let him have troops enow under his command, with all the fortresses in his possession, and who knows but (like some provincial Generals in the Roman empire, and encouraged by the universal discontent you have produced) he may take it into his head to set up
 40 for himself. If he should, and you have carefully practised these few *excellent rules* of mine, take my word for it, all the provinces will immediately join him, and you will that day (if you have not done it sooner) get rid of the trouble of governing them, and all the *plagues* attending their *commerce* and connection, from thenceforth and for ever.

An Edict by the King of Prussia

A second satire of 1773, also published in the *Public Advertiser*, is usually known as "An Edict by the King of Prussia." By skillfully paraphrasing actual laws by which Parliament had regulated trade in Ireland and America, Franklin dramatized the illogicality of the ministry's posi-

tion in a way remarkable for its brevity and its effectiveness. Of the reception of the piece he left an account in one of his letters: "What made it the more noticed here was, that people in reading it were, as the phrase is, taken in, till they had got half through it, and imagined it a real edict, to which mistake I suppose the King of Prussia's character must have contributed. I was down at Lord Le Despencer's, when the post brought that day's papers. Mr. Whitehead was there, too [Paul Whitehead, the author of "Manners"], who runs early through all the papers, and tells the company what he finds remarkable. He had them in another room, and we were chatting in the breakfast parlour, when he came running in to us, out of breath, with the paper in his hand. 'Here!' says he, 'here's news for ye! Here's the King of Prussia claiming a right to this kingdom!' All stared, and I as much as anybody; and

he went on to read it. When he had read two or three paragraphs, a gentleman present said, 'Damn his impudence. I dare say we shall hear by next post, that he is upon his march with one hundred thousand men to back this' Whitehead, who is very shrewd, soon after began to smoke it, and looking in my face, said, 'I'll be hanged if this is not some of your American jokes upon us' The reading went on, and ended with abundance of laughing, and a general verdict that it was a fair hit "

Dantzick, Sept 5

We have long wondered here at the supineness of the English nation, under the Prussian impositions upon its trade entering our port We did not, till lately, know the claims, ancient and modern, that hang over that nation, and therefore could not suspect that it might submit to those impositions from a sense of duty, or from principles of equity The following Edict, just made publick, may, if serious, throw some light upon
10 this matter

"FREDERICK, by the grace of God, King of Prussia, &c &c &c to all present and to come, Health The peace now enjoyed throughout our dominions, having afforded us leisure to apply ourselves to the regulation of commerce, the improvement of our finances, and at the same time the easing our domestic subjects in their taxes For these causes and other good considerations us thereunto moving, we hereby make known, that, after having deliberated these affairs in our council, present
20 our dear brothers, and other great officers of the state, members of the same, we, of our certain knowledge, full power, and authority royal, have made and issued this present Edict, viz

"Whereas it is well known to all the world, that the first German settlements made in the island of Britain were by colonies of people, subjects to our renowned ducal ancestors, and drawn from their dominions, under the conduct of Hengist, Horsa, Hella, Uffa, Cerdicus, Ida, and others; and that the said colonies have flour-
30 ished under the protection of our august house, for ages past; have never been emancipated therefrom, and yet have hitherto yielded little profit to the same And whereas we ourself have in the last war fought for and defended the said colonies, against the power of France,

and thereby enabled them to make conquests from the said power in America, for which we have not yet received adequate compensation And whereas it is just and expedient that a revenue should be raised from the said colonies in Britain, towards our indemnification, and that those who are descendants of our ancient subjects, and thence still owe us due obedience, should contribute to the replenishing of our royal coffers, as they must have done, had their ancestors remained in the territories now to us appertaining We do therefore hereby ordain and command, that, from and after the date of these presents, there shall be levied, and paid to our officers of the customs, on all goods, wares, and merchandizes, and on all grain and other produce of the earth, exported from the said island of Britain, and on all goods of whatever kind imported into the same, a duty of four and a half per cent ad valorem, for the use of us and our successors And that the said duty may more effectually be collected, we do hereby ordain, that all ships or vessels bound from Great-Britain to any other part of the world, or from any other part of the world to Great-Britain, shall in their respective voyages touch at our port of Koningsberg, there to be unladen, searched, and charged with the said duties

"And whereas there hath been from time to time discovered in the said island of Great-Britain, by our colonists there, many mines or beds of iron stone, and sundry subjects of our ancient dominion, skilful in converting the said stone into metal, have in times past transported themselves thither, carrying with them and communicating that art, and the inhabitants of the said island, presuming that they had a natural right to make the best use they could of the natural productions of their country, for their own benefit, have not only built furnaces for smelting the said stone into iron, but have erected plating forges, slitting mills, and steel furnaces, 7

Text Gentleman's Magazine for October 1773 • 12 to all . . . come A tous presens et à venir ORIGINAL " Franklin • 28 Hengist, . . . Ida, all leaders of the Germanic invasion of Britain, traditionally dated as beginning in 449 A.D. Franklin seems to have read the History of England (1754-1761) by his friend David Hume (1711-1776), wherein these names are mentioned in almost the same order Hella should be Ælla, or Ella • 51 ad valorem, according to value • 57 Koningsberg, Königsberg, in East Prussia, peculiarly suitable to Franklin's purpose because of its remoteness The hit is at the laws requiring American ships trading abroad to touch at an English port • 61 iron stone See a parliamentary act of 23 George III, c. 29 (1749-1750) prohibiting ironworks in the American colonies

for the more convenient manufacturing of the same, thereby endangering a diminution of the said manufacture in our ancient dominion; we do therefore hereby farther ordain, that, from and after the date hereof, no mill or other engine for slitting or rolling of iron, or any plating forge to work with a tilt-hammer, or any furnace for making steel, shall be erected or continued in the said island of Great-Britain. And the Lord-Lieutenant of every county in the said island is hereby commanded, on information of any such erection within his county, to order and by force to cause the same to be abated and destroyed, as he shall answer the neglect thereof to us at his peril. But we are nevertheless graciously pleased to permit the inhabitants of the said island to transport their iron into Prussia, there to be manufactured, and to them returned, they paying our Prussian subjects for the workmanship, with all the costs of commission, freight, and risk, coming and returning, any thing herein contained to the contrary notwithstanding.

"We do not, however, think fit to extend this our indulgence to the article of wool; but meaning to encourage not only the manufacturing of woollen cloth, but also the raising of wool, in our ancient dominions; and to prevent both, as much as may be, in our said island, we do hereby absolutely forbid the transportation of wool from thence even to the mother-country, Prussia. And that those islanders may be farther and more effectually restrained in making any advantage of their own wool, in the way of manufacture, we command that none shall be carried out of one county into another, nor shall any worsted, bay, or woollen-yarn, cloth, says, bays, kerseys, serges, frizes, druggets, cloth-serges, shalloons, or any other drapery stuffs, or woollen manufactures whatsoever, made up or mixed with wool in any of the said counties, be carried into any other county, or be water-borne even across the smallest river or creek, on penalty of forfeiture of the same, together with the boats, carriages, horses, &c. that shall be employed in removing them. Nevertheless, our loving subjects there are hereby permitted (if they think proper) to use all their wool as manure, for the improvement of their lands.

"And whereas the art and mystery of making hats hath arrived at great perfection in Prussia; and the making of hats by our remoter subjects ought to be as

much as possible restrained. And forasmuch as the islanders before mentioned, being in possession of wool, beaver and other furs, have presumptuously conceived they had a right to make some advantage thereof, by manufacturing the same into hats, to the prejudice of our domestic manufacture. We do therefore hereby strictly command and ordain, that no hats or felts whatsoever, dyed or undyed, finished or unfinished, shall be laden or put into or upon any vessel, cart, carriage, or horse, to be transported or conveyed out of one county in the said island into another county, or to any other place whatsoever, by any person or persons whatsoever, on pain of forfeiting the same, with a penalty of five hundred pounds sterling for every offence. Nor shall any hat-maker, in any of the said counties, employ more than two apprentices, on penalty of five pounds sterling per month. We intending hereby that such hat-makers, being so restrained, both in the production and sale of their commodity, may find no advantage in continuing their business. But, lest the said islanders should suffer inconvenience by the want of hats, we are farther graciously pleased to permit them to send their beaver furs to Prussia, and we also permit hats made thereof to be exported from Prussia to Britain, the people thus favoured to pay all costs and charges of manufacturing, interest, commission to our merchants, insurance and freight going and returning, as in the case of iron.

"And lastly, being willing farther to favour our said colonies in Britain, we do hereby also ordain and command, that all the thieves, highway and street robbers, house-breakers, forgerers, murderers, s—d—tes, and villains of every denomination, who have forfeited their lives to the law in Prussia, but whom we, in our great clemency, do not think fit here to hang, shall be emptied out of our gaols into the said island of Great-Britain, for the better peopling of that country.

"We flatter ourselves, that these our royal regulations and commands will be thought just and reasonable by our much favoured colonists in England, the said regulations being copied from their own statutes, of 10 and

22 wool. See an act of 10 and 11 William III, c. 10 (1698-1699) to prevent the exportation of wool from Ireland and the colonies. • 44 making hats. See the act of 5 George II, c. 22 (1731-1732) prohibiting the conveyance of hats and felt from the colonies. • 76 thieves, etc. See the act of 4 George II, c. 11 (1717-1718) relating to piracy.

11 Will III c 10—5 Geo II c 22—23 Geo. II c 29—4 Geo. I. c. 11. and from other equitable laws made by their parliaments, or from instructions given by their Princes, or from resolutions of both Houses, entered into for the good government of their own colonies in Ireland and America

"And all persons in the said island are hereby cautioned not to oppose in any wise the execution of this our Edict, or any part thereof, such opposition being
10 high-treason, of which all who are suspected shall be transported in fetters from Britain to Prussia, there to be tried and executed according to the Prussian law

"Such is our pleasure

"Given at Potsdam, this twenty-fifth day of the month of August, One thousand seven hundred and seventy-three, and in the thirty-third year of our reign

"By the King, in his Council.

"RECHTMÆSSIG, Sec."

Some take this Edict to be merely one of the King's Jeux d'Esprit: others suppose it serious, and that he means a quarrel with England, but all here think the assertion it concludes with, "that these regulations are copied from acts of the English parliament respecting their colonies," a very injurious one, it being impossible to believe, that a people distinguished for their love of liberty, a nation so wise, so liberal in its sentiments, so just and equitable towards its neighbours, should, from mean and injudicious views of petty immediate profit, treat its own children in a manner so arbitrary and tyrannical'

1773-1773

The Ephemera

An Emblem of Human Life

The Ephemera was originally written in French for Madame Brillon de Jouy, one of Franklin's neighbors during his residence at Passy, and is thought to have been first printed on his private press there, about September 1778. Madame Brillon, perhaps forty years Franklin's junior, was the wife of a government official, none too happy in her family responsibilities but possessed of an abundant share of that vivacity which is so common among educated Frenchwomen. She and Franklin shared a fondness for music and for chess, and they exchanged half-flirtatious, half-serious letters not unlike the more polished bagatelle which follows. The familiar piece entitled *The Whistle* was also written for Madame Brillon.

As appears from the introductory paragraph, *The Ephemera* was suggested by a visit to the Moulin Joli, a small island in the Seine which was a part of the country

estate of Claude-Henri Watelet. Franklin later acknowledged that he owed something to his memory of a newspaper essay on "Human Vanity," printed in the *Pennsylvania Gazette* for December 4, 1735. What makes *The Ephemera* an unusually pointed comment on the well-worn theme of the transience of life is the reader's identification of the experienced Franklin with the insect philosopher. Pathos has seldom been more delicately sustained.

YOU may remember, my dear friend, that when we lately spent that happy day in the delightful garden and sweet society of the Moulin Joly, I stooped a little in one of our walks, and stayed some time behind the company. We had been shown numberless skeletons of a kind of little fly, called an ephemera, whose successive generations, we were told, were bred and expired within the day. I happened to see a living company of them on a leaf, who appeared to be engaged in conversation. You know I understand all the inferior animal tongues. My too great application to the study of them is the best excuse I can give for the little progress I have made in your charming language. I listened through curiosity to the discourse of these little creatures; but as they, in their national vivacity, spoke three or four together, I could

make but little of their conversation. I found, however, by some broken expressions that I heard now and then, they were disputing warmly on the merit of two foreign musicians, one a *cousin*, the other a *moscheto*, in which dispute they spent their time, seemingly as regardless of the shortness of life as if they had been sure of living a month. Happy people! thought I, you are certainly under a wise, just, and mild government, since you have no public grievances to complain of, nor any subject of contention but the perfections and imperfections of foreign music. I turned my head from them to an old gray-headed one, who was single on another leaf, and talking to himself. Being amused with his soliloquy, I put it down in writing, in hopes it will likewise amuse her to whom I am so much indebted for the most pleasing of all amusements, her delicious company and heavenly harmony.

"It was," said he, "the opinion of learned philosophers of our race, who lived and flourished long before my time, that this vast world, the Moulin Joly, could not itself subsist more than eighteen hours, and I think there was some foundation for that opinion, since, by the apparent motion of the great luminary that gives life to all nature, and which in my time has evidently declined considerably towards the ocean at the end of our earth, it must then finish its course, be extinguished in the waters that surround us, and leave the world in cold and darkness, necessarily producing universal death and destruction. I have lived seven of those hours, a great age, being no less than four hundred and twenty minutes of time. How very few of us continue so long! I have seen generations born, flourish, and expire. My present friends are the children and grandchildren of the friends of my youth, who are now, alas, no more! And I must soon follow them, for, by the course of nature, though still in health, I cannot expect to live above seven or eight minutes longer. What now avails all my toil and labor in amassing honey-dew on this leaf, which I cannot live to enjoy! What the political struggles I have been engaged in for the good of my compatriot inhabitants of this bush, or my philosophical studies for the benefit of our race in general! for in politics what can laws do without morals? Our present race of ephemerae will in a course of minutes become corrupt, like those of other and older bushes, and consequently as

House in which Franklin lived at Passy.

wretched. And in philosophy how small our progress! Alas! art is long, and life is short! My friends would comfort me with the idea of a name they say I shall leave behind me, and they tell me I have lived long enough to nature and to glory. But what will fame be to an ephemera who no longer exists? And what will become of all history in the eighteenth hour, when the world itself, even the whole Moulin Joly, shall come to an end, and be buried in universal ruin?"

To me, after all my eager pursuits, no solid pleasures now remain, but the reflection of a long life spent in meaning well, the sensible conversation of a few good lady ephemerae, and now and then a kind smile and a tune from the ever amiable *Brillante*.

B FRANKLIN 60
1778-1778?

Text: *Beaumont's Complete Works*, VI, 237-239 • 4 one . . . *moscheto*, one a gnat, the other a mosquito. In a letter to William Carmichael written June 17, 1780, Franklin said that at the time he wrote *The Ephemera* "all conversations at Paris were filled with disputes about the music of Gluck and Piccini, a German and Italian musician, who divided the town into violent parties." The *Iphigénie en aulide* of C. W. Ritter von Gluck (1714-1787) was produced at Paris in 1774, Niccolò Piccini (1728-1800), the Italian composer, was invited to Paris in 1776.

Dialogue Between Franklin and the Gout

Like *The Ephemera*, Franklin's dialogue with the gout was first written in French and may have been printed on the Passy press sometime in 1780. Although it is one of the simplest of the bagatelles, it is nevertheless a characteristic summary of Franklin's ideas on health, recreation, pleasure, and pain. The young man who sought to learn virtue by keeping a chart of his daily failings had come to accept the discomfort of paying for his pleasures. The numerous local allusions emphasize Franklin's real purpose, the amusement of his circle of friends, but he was a moralizer even in his lightest moments.

Midnight, 22 October, 1780

FRANKLIN. Eh' oh' eh' What have I done to merit these cruel sufferings?

GOUT. Many things, you have ate and drank too freely, and too much indulged those legs of yours in their indolence.

FRANKLIN. Who is it that accuses me?

GOUT. It is I, even I, the Gout.

FRANKLIN. What! my enemy in person?

10 GOUT. No, not your enemy.

FRANKLIN. I repeat it, my enemy, for you would not only torment my body to death, but ruin my good name; you reproach me as a glutton and a tippler, now all the world, that knows me, will allow that I am neither the one nor the other.

GOUT. The world may think as it pleases, it is always very complaisant to itself, and sometimes to its friends, but I very well know that the quantity of meat and drink proper for a man, who takes a reasonable degree

of exercise, would be too much for another, who never takes any

FRANKLIN. I take—eh' oh'—as much exercise—eh'—as I can. Madam Gout. You know my sedentary state and on that account, it would seem, Madam Gout, as if you might spare me a little, seeing it is not altogether my own fault.

GOUT. Not a jot, your rhetoric and your politeness are thrown away, your apology avails nothing. If your situation in life is a sedentary one, your amusements, your recreations, at least, should be active. You ought to walk or ride, or, if the weather prevents that, play at billiards. But let us examine your course of life. While the mornings are long, and you have leisure to go abroad, what do you do? Why, instead of gaining an appetite for breakfast, by salutary exercise, you amuse yourself with books, pamphlets, or newspapers, which commonly are not worth the reading. Yet you eat an inordinate breakfast, four dishes of tea, with cream, and one or two buttered toasts, with slices of hung beef which I fancy are not things the most easily digested. Immediately afterwards you sit down to write at your desk, or converse with persons who apply to you on business. Thus the time passes till one, without any kind of bodily exercise. But all this I could pardon, in regard as you say, to your sedentary condition. But what is your practice after dinner? Walking in the beautiful gardens of those friends with whom you have dined would be the choice of men of sense, yours is to be fixed down to chess, where you are found engaged for two or three hours! This is your perpetual recreation, which is the least eligible of any for a sedentary man, because, instead of accelerating the motion of the fluids, the rigid attention it requires helps to retard the circulation and obstruct internal secretions. Wrapt in the speculations of this wretched game, you destroy your constitution. What can be expected from such a course of living, but a body replete with stagnant humors ready to fall a prey to all kinds of dangerous maladies, if I, the Gout, did not occasionally bring you relief by agitating those

49 chess, of which Franklin, in his seventies, was so fond that he is said to have once played from six in the evening until sunrise. His *Moral of Chess*, written about the same time as this dialogue, is one of the classics of the game.

humors, and so purifying or dissipating them? If it was in some nook or alley in Paris, deprived of walks, that you played awhile at chess after dinner, this might be excusable, but the same taste prevails with you in Passy, Auteuil, Montmartre, or Sanoy, places where there are the finest gardens and walks, a pure air, beautiful women, and most agreeable and instructive conversation, all which you might enjoy by frequenting the walks. But these are rejected for this abominable game of chess
Fie, then Mr Franklin! But amidst my instructions, I had almost forgot to administer my wholesome corrections, so take that twinge,—and that

FRANKLIN. Oh! eh! oh! ohhh! As much instruction as you please, Madam Gout, and as many reproaches, but pray, Madam, a truce with your corrections!

GOUT. No, Sir, no,—I will not abate a particle of what is so much for your good,—therefore —

FRANKLIN. Oh! eh! —It is not fair to say I take no exercise, when I do very often, going out to dine
2. and returning in my carriage

GOUT. That, of all imaginable exercises, is the most slight and insignificant, if you allude to the motion of a carriage suspended on springs. By observing the degree of heat obtained by different kinds of motion, we may form an estimate of the quantity of exercise given by each. Thus, for example, if you turn out to walk in winter with cold feet, in an hour's time you will be in a glow all over, ride on horseback, the same effect will scarcely be perceived by four hours' round
3. trotting, but if you loll in a carriage, such as you have mentioned, you may travel all day and gladly enter the last inn to warm your feet by a fire. Flatter yourself then no longer, that half an hour's airing in your carriage deserves the name of exercise. Providence has appointed few to roll in carriages, while he has given to all a pair of legs, which are machines infinitely more commodious and serviceable. Be grateful, then, and make a proper use of yours. Would you know how they forward the circulation of your fluids, in the very
4. action of transporting you from place to place, observe when you walk, that all your weight is alternately thrown from one leg to the other, this occasions a great pressure on the vessels of the foot, and repels their contents, when relieved, by the weight being thrown on the other foot, the vessels of the first are allowed

to replenish, and, by a return of this weight, this repulsion again succeeds; thus accelerating the circulation of the blood. The heat produced in any given time depends on the degree of this acceleration, the fluids are shaken, the humors attenuated, the secretions facilitated, and
50 all goes well, the cheeks are ruddy, and health is established. Behold your fair friend at Auteuil, a lady who received from bounteous nature more really useful science than half a dozen such pretenders to philosophy as you have been able to extract from all your books. When she honors you with a visit, it is on foot. She walks all hours of the day, and leaves indolence, and its concomitant maladies, to be endured by her horses. In this, see at once the preservative of her health and personal charms. But when you go to Auteuil, you must
60 have your carriage, though it is no further from Passy to Auteuil than from Auteuil to Passy.

FRANKLIN. Your reasonings grow very tiresome.

GOUT. I stand corrected. I will be silent and continue my office, take that, and that

FRANKLIN. Oh! Ohh! Talk on, I pray you!

GOUT. No, no, I have a good number of twinges for you to-night, and you may be sure of some more to-morrow

FRANKLIN. What, with such a fever! I shall go
70 distracted! Oh! eh! Can no one bear it for me?

GOUT. Ask that of your horses, they have served you faithfully

FRANKLIN. How can you so cruelly sport with my torments?

GOUT. Sport! I am very serious. I have here a list of offences against your own health distinctly written, and can justify every stroke inflicted on you.

FRANKLIN. Read it then

GOUT. It is too long a detail, but I will briefly men-
80 tion some particulars

FRANKLIN. Proceed. I am all attention

GOUT. Do you remember how often you have prom-

5 Auteuil, Montmartre, or Sanoy. At the time Franklin wrote, all were suburban villages like Passy. Auteuil is a short distance down the Seine, Montmartre, a district in the northern section of the city, Sannois, still some miles north of the city limits. • 52 your fair friend, Madame Helvétius, widow of a French philosopher, with whom Franklin was so intimate that he once addressed to her a half-serious proposal of marriage

ised yourself, the following morning, a walk in the grove of Boulogne, in the garden de la Muette, or in your own garden, and have violated your promise, alleging, at one time, it was too cold, at another too warm, too windy, too moist, or what else you pleased, when in truth it was too nothing, but your insuperable love of ease?

FRANKLIN. That I confess may have happened occasionally, probably ten times in a year.

10 GOUT. Your confession is very far short of the truth, the gross amount is one hundred and ninety-nine times

FRANKLIN. Is it possible?

GOUT. So possible, that it is fact, you may rely on the accuracy of my statement. You know M. Brillon's gardens, and what fine walks they contain, you know the handsome flight of an hundred steps, which lead from the terrace above to the lawn below. You have been in the practice of visiting this amiable family twice
20 that "a man may take as much exercise in walking a mile, up and down stairs, as in ten on level ground." What an opportunity was here for you to have had exercise in both these ways! Did you embrace it, and how often?

FRANKLIN. I cannot immediately answer that question.

GOUT. I will do it for you, not once

FRANKLIN. Not once?

GOUT. Even so. During the summer you went there at six o'clock. You found the charming lady, with her
30 lovely children and friends, eager to walk with you, and entertain you with their agreeable conversation, and what has been your choice? Why, to sit on the terrace, satisfying yourself with the fine prospect, and passing your eye over the beauties of the garden below, without taking one step to descend and walk about in them. On the contrary, you call for tea and the chess-board, and lo! you are occupied in your seat till nine o'clock, and that besides two hours' play after dinner, and then, instead of walking home, which would have
40 bestirred you a little, you step into your carriage. How absurd to suppose that all this carelessness can be reconcilable with health, without my interposition!

FRANKLIN. I am convinced now of the justness of poor Richard's remark, that "Our debts and our sins are always greater than we think for."

GOUT. So it is. You philosophers are sages in your

maxims, and fools in your conduct.

FRANKLIN. But do you charge among my crimes, that I return in a carriage from Mr. Brillon's?

GOUT. Certainly; for, having been seated all the while, you cannot object the fatigue of the day, and cannot want therefore the relief of a carriage.

FRANKLIN. What then would you have me do with my carriage?

GOUT. Burn it if you choose; you would at least get heat out of it once in this way; or, if you dislike that proposal, here's another for you, observe the poor peasants, who work in the vineyards and grounds about the villages of Passy, Auteuil, Chaillot, etc.; you may find every day among these deserving creatures, four or five old men and women, bent and perhaps crippled by weight of years, and too long and too great labor. After a most fatiguing day, these people have to trudge a mile or two to their smoky huts. Order your coachman to set them down. This is an act that will be good for your soul, and, at the same time, after your visit to the Brillons, if you return on foot, that will be good for your body.

FRANKLIN. Ah! how tiresome you are!

GOUT. Well, then, to my office, it should not be forgotten that I am your physician. There.

FRANKLIN. Ohhh! what a devil of a physician!

GOUT. How ungrateful you are to say so! Is it not I who, in the character of your physician, have saved you from the palsy, dropsy, and apoplexy? one or other of which would have done for you long ago, but for me.

FRANKLIN. I submit, and thank you for the past, but entreat the discontinuance of your visits for the future, for, in my mind, one had better die than be cured so dolefully. Permit me just to hint, that I have also not been unfriendly to you. I never feed physician or quack of any kind, to enter the list against you; if then you do not leave me to my repose, it may be said you are ungrateful too.

2 grove . . . Muette, the Bois de Boulogne, just west of Passy, now perhaps the chief public park of Paris, and the garden of a royal chateau, La Muette, now largely built over. It was in the park of La Muette that the first balloon ascension was made on November 21, 1783, Franklin being one of the spectators. • 14 M. Brillon's gardens in Passy. See *The Ephemera*. • 59 Chaillot, a village a short distance up the Seine from Passy.

GOUT. I can scarcely acknowledge that as any objection. As to quacks, I despise them, they may kill you indeed, but cannot injure me. And, as to regular physicians, they are at last convinced that the gout, in such a subject as you are, is no disease, but a remedy, and wherefore cure a remedy? —but to our business, — there

FRANKLIN. Oh! oh! —for Heaven's sake leave me! and I promise faithfully never more to play at

chess, but to take exercise daily, and live temperately. 10

GOUT I know you too well. You promise fair; but, after a few months of good health, you will return to your old habits, your fine promises will be forgotten like the forms of last year's clouds. Let us then finish the account, and I will go But I leave you with an assurance of visiting you again at a proper time and place, for my object is your good, and you are sensible now that I am your *real friend*.

1780-1780?

SOCIAL COMMENTATORS: Crèvecoeur, Woolman

Michel Guillaume St. Jean de Crèvecoeur

1735 • 1813

Michel Guillaume St. Jean de Crèvecoeur was born in France, near Caen. Educated first in a Jesuit school and then in England, he took ship for Canada before he was twenty and there enlisted in the army. He rose

to the rank of lieutenant, making himself particularly useful as a mapmaker in the region of the lower Great

Panel (l to r) John Woolman's shop • Friends' meeting • Michel Guillaume St. Jean de Crèvecoeur • Crèvecoeur's farm, Orange County

Lakes. About 1759 Crèvecoeur drifted down through the English colonies, probably working as a surveyor, and in 1764 applied for naturalization in New York. He settled on an Orange County farm, married, and for approximately fifteen years lived as a gentleman farmer in a well-established and prosperous rural community. Soon after his marriage in 1769, he appears to have begun setting down his impressions of the country, and by 1780, when he was forced to leave America because his moderate opinions had made both Whigs and Tories suspicious of him, he had a small trunk full of manuscripts. He found a publisher for some of them in London, but the publisher was a Whig and probably selected for *Letters from an American Farmer* (1782) those pieces least critical of the Revolutionary party in America. A few others were published in a French translation in 1784, but a number of more obviously Tory papers remained in manuscript until 1925, when they were included in *Sketches of Eighteenth Century America*.

Crèvecoeur's *Letters* were popular in English, French, and German, and for a time he was a literary lion, the protégé in the Paris salons of Madame d'Houdetot, whom Rousseau had loved. Partly through her influence, the "sauvage" from America was sent back to New York as consul-general, and from 1783 until 1790 Crèvecoeur did his best to keep alive American gratitude to and friendship with France. The last twenty-three years of his life were spent in Europe.

Crèvecoeur expresses many of the revolutionary ideals which operated powerfully in the eighteenth century, first in America and then in France. He was a perfectionist, although he never recognized the paradox in his admiration for social progress and his equally high regard for the primitive and simple. He was more than a believer in religious freedom, he was anticlerical, with a distrust of organized religion almost as strong as Thomas Paine's. Like Benjamin Franklin and the Frenchmen who were weary of the old order, he was a physiocrat, believing that agriculture should be left largely free of taxation because it was the basis of wealth and a healthy economic life. Like Jefferson, he envisaged an agrarian society, free of governmental restrictions, free of the dangers of cities and of great wealth concentrated in the hands of the few, free, by

and large, of the influence of clergymen and of lawyers, free of sickness, intemperance, and extravagance. In his most expansive moments, Crèvecoeur was capable of seeing America as "one diffusive scene of happiness reaching from the sea-shores to the last settlements on the borders of the wilderness."

Sometimes, particularly in the pieces which remained so long in manuscript, there is brief recognition of man's inhumanity to man, as exemplified by slavery and civil disturbances and war. Nature, usually beneficent, occasionally displays its crueler aspects, when the snakes fight to the death, the hummingbirds grow irascible, and storms and insects plague the determinedly happy farmer. Crèvecoeur, however, was fundamentally an optimist, and the pastoral tone prevails in his writing. His mind was keen and sensitive, an excellent observer, he had the power to communicate his emotional experience. If he overdramatized, he did so, one is convinced, without intent to deceive. The modern reader can understand the conviction of the friend who described Crèvecoeur as "a philanthropist, a man of serene temper and pure benevolence. The milk of human kindness circulated in every vein."

Crèvecoeur wrote well, although unevenly. The fashion of his day compelled him to shape his best-known book into a series of letters, but within these he displayed considerable command of three different forms: the prose essay, the short story, and the dramatic dialogue. His ideas are not unlike those of the promotion tracts and progress reports, but he had a sense of the form appropriate to his "sentiment and susceptibility." He therefore has his place both as a social philosopher and as one of the earliest American writers to experiment with the nature essay and with fiction as a medium for expression. Whether or not he was an "emotional liar," idealizing the simple life without regard to truth may be a question for debate; there is almost no dissent, however, from the praise of his literary grace.

Letters from an American Farmer, ed. W. P. Trent and Ludwig Lewisohn, New York, 1904. • *Sketches of Eighteenth Century America*, ed. H. L. Bourdin, R. H. Gabriel, and S. T. Williams, New Haven, 1925. • Julia P. Mitchell, *St. Jean de Crèvecoeur*, New York, 1916. • H. C. Rice, *Le Cultivateur américain: étude sur l'oeuvre de Sair John de Crèvecoeur*, Paris, 1933.

From

Letters from an American Farmer

Letters from an American Farmer (London, 1782) was reprinted, in the English version, five times before 1793, and there were three editions of the French expansion and two of the German translation

The twelve essays, or "letters," vary greatly in length, and it seems probable that the letter form was an afterthought of Crèvecoeur or his printer. The first three essays are a general and highly favorable view of American life, emphasizing the construction of a new and superior society in sharp contrast with Europe, which he regarded as decadent, stratified, and priest-dominated. The next six essays are more particular, four of them deal with Nantucket, which Crèvecoeur regarded as "inhabited merely to prove what mankind can do when happily governed," one with Martha's Vineyard and the whale fishery, and one with Charleston and the deplorable institution of slavery. A nature essay, a description of the visit of a Russian gentleman to John Bartram, and "Distresses of a Frontier Man" complete the book. The final essay is the only one which contains hints of the "desolating consequences" of the Revolution, mentioned in the Preface and described so vividly in "The American Belisarius" (see p. 289).

The organization of the *Letters* is loose, Crèvecoeur's strength lay in his paragraphs and stretches of dialogue. The selection which follows is approximately the first third of Letter III, "What Is an American?"

I wish I could be acquainted with the feelings and thoughts which must agitate the heart and present themselves to the mind of an enlightened Englishman, when he first lands on this continent. He must greatly rejoice

that he lived at a time to see this fair country discovered and settled. he must necessarily feel a share of national pride, when he views the chain of settlements which embellishes these extended shores. When he says to himself, this is the work of my countrymen, who, when convulsed by factions, afflicted by a variety of miseries 10 and wants, restless and impatient, took refuge here. They brought along with them their national genius, to which they principally owe what liberty they enjoy, and what substance they possess. Here he sees the industry of his native country displayed in a new manner, and traces in their works the embryos of all the arts, sciences, and ingenuity which flourish in Europe. Here he beholds fair cities, substantial villages, extensive fields, an immense country filled with decent houses, good roads, orchards, meadows, and bridges, where an 20 hundred years ago all was wild, woody and uncultivated! What a train of pleasing ideas this fair spectacle must suggest, it is a prospect which must inspire a good citizen with the most heartfelt pleasure. The difficulty consists in the manner of viewing so extensive a scene. He is arrived on a new continent, a modern society offers itself to his contemplations, different from what he had hitherto scene. It is not composed, as in Europe, of great lords who possess everything, and of a herd of people who have nothing. Here are no aristocratical 30 families, no courts, no kings, no bishops, no ecclesiastical dominion, no invisible power giving to a few a very visible one, no great manufacturers employing thousands, no great refinements of luxury. The rich and the poor are not so far removed from each other as they are in Europe. Some few towns excepted, we are all tillers of the earth, from Nova Scotia to West Florida. We are a people of cultivators, scattered over an immense territory, communicating with each other by means of good roads and navigable rivers, united by 40 the silken bands of mild government, all respecting the laws, without dreading their power, because they are equitable. We are all animated with the spirit of an industry which is unfettered and unrestrained, because each person works for himself. If he travels through our rural districts he views not the hostile castle, and the haughty mansion, contrasted with the clay-built hut and miserable cabin, where cattle and men help to keep each other warm, and dwell in meanness, smoke, and

indigence. A pleasing uniformity of decent competence appears throughout our habitations. The meanest of our log-houses is a dry and comfortable habitation. Lawyer or merchant are the fairest titles our towns afford, that of a farmer is the only appellation of the rural inhabitants of our country. It must take some time ere he can reconcile himself to our dictionary, which is but short in words of dignity, and names of honor. There, on a Sunday, he sees a congregation of
 10 respectable farmers and their wives, all clad in neat homespun, well mounted, or riding in their own humble waggons. There is not among them an esquire, saving the unlettered magistrate. There he sees a parson as simple as his flock, a farmer who does not riot on the labour of others. We have no princes, for whom we toil, starve, and bleed: we are the most perfect society now existing in the world. Here man is free as he ought to be, nor is this pleasing equality so transitory as many others are. Many ages will not see the shores of
 20 our great lakes replenished with inland nations, nor the unknown bounds of North America entirely peopled. Who can tell how far it extends? Who can tell the millions of men whom it will feed and contain? for no European foot has as yet travelled half the extent of this mighty continent!

The next wish of the traveller will be to know whence came all these people? they are a mixture of English, Scotch, Irish, French, Dutch, Germans, and Swedes. From this promiscuous breed, that race now called
 30 Americans have arisen. The eastern provinces must indeed be excepted, as being the unmixed descendants of Englishmen. I have heard many wish that they had been more intermixed also: for my part, I am no wisher, and think it much better as it has happened. They exhibit a most conspicuous figure in this great and variegated picture, they too enter for a great share in the pleasing perspective displayed in these thirteen provinces. I know it is fashionable to reflect on them, but I respect them for what they have done, for the
 40 accuracy and wisdom with which they have settled their territory, for the decency of their manners, for their early love of letters, their ancient college, the first in this hemisphere, for their industry, which to me who am but a farmer, is the criterion of everything. There never was a people, situated as they are, who with so ungrateful a soil have done more in so short a time. Do you think

that the monarchical ingredients which are more prevalent in other governments, have purged them from all foul stains? Their histories assert the contrary.

In this great American asylum, the poor of Europe have by some means met together, and in consequence of various causes, to what purpose should they ask one another what countrymen they are? Alas, two thirds of them had no country. Can a wretch who wanders about, who works and starves, whose life is a continual scene of sore affliction or pinching penury, can that man call England or any other kingdom his country? A country that had no bread for him, whose fields procured him no harvest, who met with nothing but the frowns of the rich, the severity of the laws, with jails and punishments, who owned not a single foot of the extensive surface of this planet? No! urged by a variety of motives, here they came. Every thing has tended to regenerate them, new laws, a new mode of living, a new social system, here they are become men: in Europe they were as so many useless plants, wanting vegetative mould, and refreshing showers, they withered and were mowed down by want, hunger, and war, but now by the power of transplantation, like all other plants they have taken root and flourished! Formerly they were not numbered in any civil lists of their country, except in those of the poor, here they rank as citizens. By what invisible power has this surprising metamorphosis been performed? By that of the law and that of their industry. The laws, the indulgent laws protect them as they arrive, stamping on them the symbol of adoption, they receive ample rewards for their labours, these accumulated rewards procure them lands those lands confer on them the title of freemen, and to that title every benefit is affixed which men can possibly require. This is the great operation daily performed by our laws. From whence proceed these laws? From our government. Whence that government? It derived from the original genius and strong desire of the people ratified and confirmed by the crown. This is the great chain which links us all, this is the picture which every province exhibits, Nova Scotia excepted.

Text: first London edition • 30 eastern provinces, New England
 42 ancient college, Harvard, founded in 1636

There the crown has done all, either there were no people who had genius, or it was not much attended to the consequence is, that the province is very thinly inhabited indeed; the power of the crown in conjunction with the musketos has prevented men from settling there. Yet some parts of it flourished once; and it contained a mild harmless set of people. But for the fault of a few leaders, the whole were banished. The greatest political error the crown ever committed in
 10 America, was to cut off men from a country which wanted nothing but men¹

What attachment can a poor European emigrant have for a country where he had nothing? The knowledge of the language, the love of a few kindred as poor as himself, were the only cords that tied him his country is now that which gives him land, bread, protection, and consequence. *Ubi panis ibi patria*, is the motto of all emigrants. What then is the American, this new man? He is either an European, or the descendant of
 20 an European, hence that strange mixture of blood, which you will find in no other country. I could point out to you a family whose grandfather was an Englishman, whose wife was Dutch, whose son married a French woman, and whose present four sons have now four wives of different nations. He is an American, who leaving behind him all his ancient prejudices and manners, receives new ones from the new mode of life he has embraced, the new government he obeys, and the new rank he holds. He becomes an American by being received in the broad lap of our great *Alma Mater*. Here individuals of all nations are melted into a new race of men, whose labours and posterity will one day cause great changes in the world. Americans are the western pilgrims, who are carrying along with them that great mass of arts, sciences, vigour, and industry which began long since in the east, they will finish the great circle. The Americans were once scattered all over Europe, here they are incorporated into one of the finest systems of population which has ever appeared,
 40 and which will hereafter become distinct by the power of the different climates they inhabit. The American ought therefore to love this country much better than that wherein either he or his forefathers were born. Here the rewards of his industry follow with equal steps the progress of his labour, his labour is founded on the basis of nature, *self-interest*; can it want a stronger

allurement? Wives and children, who before in vain demanded of him a morsel of bread, now, fat and frolicksome, gladly help their father to clear those fields whence exuberant crops are to arise to feed and to clothe
 50 them all, without any part being claimed, either by a despotic prince, a rich abbott, or a mighty lord. Here religion demands but little of him, a small voluntary salary to the minister, and gratitude to God, can he refuse these? The American is a new man, who acts upon new principles, he must therefore entertain new ideas, and form new opinions. From involuntary idleness, servile dependence, penury, and useless labour, he has passed to toils of a very different nature, rewarded by ample subsistence — This is an American
 60

British America is divided into many provinces, forming a large association, scattered along a coast 1500 miles extent and about 200 wide. This society I would fain examine, at least such as it appears in the middle provinces, if it does not afford that variety of tinges and gradations which may be observed in Europe, we have colours peculiar to ourselves. For instance, it is natural to conceive that those who live near the sea, must be very different from those who live in the woods, the intermediate space will afford a
 70 separate and distinct class

Men are like plants, the goodness and flavour of the fruit proceeds from the peculiar soil and exposition in which they grow. We are nothing but what we derive from the air we breathe, the climate we inhabit, the government we obey, the system of religion we profess, and the nature of our employment. Here you will find but few crimes; these have acquired as yet no root among us. I wish I were able to trace all my ideas, if my ignorance prevents me from describing them
 80

1 the crown all Nova Scotia, the chief part of French Acadia, was conquered by the English in 1710. The authorities found it difficult to find English settlers, and the Acadians refused to take an oath of allegiance. In 1755, about ten thousand Acadians were removed and their lands given to New England families. Both Crèvecoeur and Longfellow (in *Evangeline*) appear to have underestimated the difficulty of assimilation. • 17 *Ubi . . . patria*. One's fatherland is where there is bread. • 72 *Men . . . plants*. Crèvecoeur's frequent use of this analogy suggests some knowledge, at first or second hand, of Montesquieu's *L'Esprit des lois* (1748), sometimes regarded as the origin of modern sociology

properly, I hope I shall be able to delineate a few of the outlines, which are all I propose

Those who live near the sea, feed more on fish than on flesh, and often encounter that boisterous element. This renders them more bold and enterprising, this leads them to neglect the confined occupations of the land. They see and converse with a variety of people, their intercourse with mankind becomes extensive. The sea inspires them with a love of traffic, a desire of transporting produce from one place to another, and leads them to a variety of resources which supply the place of labour. Those who inhabit the middle settlements, by far the most numerous, must be very different, the simple cultivation of the earth purifies them, but the indulgences of the government, the soft remonstrances of religion, the rank of independent freeholders, must necessarily inspire them with sentiments, very little known in Europe among people of the same class. What do I say? Europe has no such class of men, the early knowledge they acquire, the early bargains they make, give them a great degree of sagacity. As freemen they will be litigious, pride and obstinacy are often the cause of law suits, the nature of our laws and governments may be another. As citizens it is easy to imagine, that they will carefully read the newspapers, enter into every political disquisition, freely blame or censure governors and others. As farmers they will be careful and anxious to get as much as they can, because what they get is their own. As northern men they will love the cheerful cup. As Christians, religion curbs them not in their opinions, the general indulgence leaves every one to think for themselves in spiritual matters, the laws inspect our actions, our thoughts are left to God. Industry, good living, selfishness, litigiousness, country politics, the pride of freemen, religious indifference, are their characteristics. If you recede still farther from the sea, you will come into more modern settlements, they exhibit the same strong lineaments, in a ruder appearance. Religion seems to have still less influence, and their manners are less improved.

Now we arrive near the great woods, near the last inhabited districts, there men seem to be placed still farther beyond the reach of government, which in some measure leaves them to themselves. How can it pervade every corner, as they were driven there by misfortunes, necessity of beginnings, desire of acquiring large tracks

of land, idleness, frequent want of economy, ancient debts; the re-union of such people does not afford a very pleasing spectacle. When discord, want of unity and friendship, when either drunkenness or idleness prevail in such remote districts, contention, inactivity, and wretchedness must ensue. There are not the same remedies to these evils as in a long established community. The few magistrates they have, are in general little better than the rest, they are often in a perfect state of war, that of man against man, sometimes decided by blows, sometimes by means of the law, that of man against every inhabitant of these venerable woods, of which they are come to dispossess them. There men appear to be no better than carnivorous animals of a superior rank, living on the flesh of wild animals when they can catch them, and when they are not able they subsist on grain. He who would wish to see America in its proper light, and have a true idea of its feeble beginnings and barbarous rudiments, must visit our extended line of frontiers where the last settlers dwell, and where he may see the first labours of settlement, the mode of clearing the earth, in all their different appearances, where men are wholly left dependent on their native tempers, and on the spur of uncertain industry, which often fails when not sanctified by the efficacy of a few moral rules. There, remote from the power of example, and check of shame, many families exhibit the most hideous parts of our society. They are a kind of forlorn hope, preceding by ten or twelve years the most respectable army of veterans which come after them. In that space, prosperity will polish some, vice and the law will drive off the rest, who uniting again with others like themselves will recede still farther making room for more industrious people, who will finish their improvements, convert the loghouse into a convenient habitation, and rejoicing that the first heavy labours are finished, will change in a few years this hitherto barbarous country into a fine fertile, well regulated district. Such is our progress, such is the march of the Europeans toward the interior parts of this continent. In all societies there are off-casts, this impure part serves as our precursors or pioneers, in

41 the last . . . districts, the frontier, noticeably unglorified in the description • 88 my father, a fictional touch, since there is no evidence that Crèvecoeur's father was ever in America

father himself was one of that class, but he came upon honest principles, and was therefore one of the few who held fast; by good conduct and temperance, he transmitted to me his fair inheritance, when not above one in fourteen of his contemporaries had the same good fortune.

Forty years ago this smiling country was thus inhabited. it is now purged, a general decency of manners prevails throughout, and such has been the fate of our best countries

Exclusive of those general characteristics, each province has its own, founded on the government, climate,

mode of husbandry, customs, and peculiarity of circumstances. Europeans submit insensibly to these great powers, and become, in the course of a few generations, not only Americans in general, but either Pennsylvanians, Virginians, or provincials under some other name. Whoever traverses the continent must easily observe those strong differences, which will grow more evident in time. The inhabitants of Canada, Massachusetts, the middle provinces, the southern ones will be as different as their climates, their only points of unity will be those of religion and language . . .

From • Sketches of Eighteenth Century America

The American Belisarius

Belisarius (505?-565) was the chief military genius in the reign of the Emperor Justinian. After a long series of brilliant victories, he was accused of conspiracy and deprived of his property, writers of a later period asserted that, his eyes put out by order of the Emperor, Belisarius became a beggar in the streets. In truth, apparently, Justinian was not thus ungrateful, but believed in his general's innocence and restored his dignities. Crèvecoeur's implication in the title of the following story is that Americans did not always appreciate their true leaders.

"The American Belisarius" is both an experiment in fiction, with so many allusions to tears that it takes its place in the tradition of sentimentalism, and an excellent expression of Crèvecoeur's Tory sympathies, which the reader of the *Letters* would scarcely expect. Probably written before the end of the Revolution, it remained in manuscript until 1925. *Sketches of Eighteenth Century America*, published more than a century after its author's death, rehabilitated Crèvecoeur's reputation, so that he now ranks as one of the major figures of eighteenth-century American literature.

Journals, memoirs, elaborate essays shall not fail hereafter to commemorate the heroes who have made their appearance on this new American stage, to the end that Europe may either lavishly praise or severely censure their virtues and their faults. It requires the inquisitive eye of an unnoticed individual mixing in crowds to find out and select for private amusement more obscure, though not less pathetic scenes. Scenes of sorrow and affliction are equally moving to the bowels of humanity. Find them where you will, there is a strange but peculiar sort of pleasure in contemplating them, it is a mournful feast for some particular souls.

A pile of ruins is always striking, but when the object of contemplation is too extensive, our divided and wearied faculties receive impressions proportionably feeble, we possess but a certain quantity of tears and compassion. But when the scale is diminished, when we descend from the destruction of an extensive government or nation to that of several individuals, to that of a once opulent, happy, virtuous family, there we pause, for it is more analogous to our own situation. We can better comprehend the woes, the distresses of a father, mother, and children immersed in the deepest

Text that established by H. L. Bourdin, R. H. Gabriel, and S. T. Williams, following Bourdin's discovery of the Crèvecoeur papers in 1923. • 13 A pile of ruins. This typically eighteenth-century reflection, best known, perhaps, through Shelley's "Ozymandias," found fullest expression in the Comte de Volney's "Les Ruines, ou méditations sur les révolutions des empires" (1791).

calamities imagination can conceive, than if we had observed the overthrow of kings and great rulers

After a violent storm of northwest wind I never see even a single oak overset, once majestic and lofty, without feeling some regret at the accident. I observe the knotty roots wrenched from the ground, the broken limbs, the scattered leaves. I revolve in my mind the amazing elemental force which must have occasioned so great an overthrow. I observe the humble bushes
10 which grew under its shade. They felt the impression of the same storm, but in a proportion so much the less, as was that of their bulk when compared to that of the oak. I acknowledge that, were I to observe a whole mountain thus divested of its trees by the impulse of the same gale, I should feel a superior degree of astonishment, but, at the same time, my observations could not be so minute nor so particular. It is not, therefore, those great and general calamities to the description of which my pencil is equal, it is the individual object as it lies
20 lowly prostrate which I wish to describe. I can encompass it, I can view it in all situations, and the limited impressions admit within my mind a possibility of retracing them. Reserve this, therefore, for the hours, for the moments of your greatest philanthropy. The enormity may shock you. Here we are more used to it, and, having so many objects to feel for, one is able to feel so much the less for each.

The horror, the shocking details of the following tragedy, 'tis true, show mankind in the worst light possible. But what can you expect when law, government,
30 morality are become silent and inefficacious? When men are artfully brought into a chaos, in order, as they are taught to believe, that they may be raised from their former confined line to a much preferable state of existence? To make use of a modern simile, the action of ploughing seems to be laborious and dirty, numberless worms, insects, and wise republics of ants are destroyed by the operation. Yet these scenes of unknown disasters, of unnoticed murders and ruins
40 happily tend to produce a rich harvest in the succeeding season.

In the township of ———— lived S. K., the son of a Dutch father and of an English mother. These mixtures are very frequent in this country. From his youth he loved and delighted in hunting, and the skill he acquired confirmed his taste for that manly diversion.

In one of the long excursions which he took in the mountains of ———— (which he had never before explored), mixing the amusements of the chase with those of more useful contemplation, and viewing the grounds as an expert husbandman, he found among the wilds several beautiful vales formed by Nature in her most indulgent hours, when, weary with the creation of the surrounding cliffs and precipices, she condescended to exhibit something on which Man might live and flourish,—a singular contrast which you never fail to meet with in the mountains of America. The more rocky, barren, and asperous are the surrounding ridges, the richer and more fertile are the intervalles and valleys which divide them. Struck with the singular beauty and luxuriance of one of these spots, he returned home, and soon after patented it. I think it contained about one thousand acres.

With cheerfulness he quitted the paternal estate he enjoyed, and prepared to begin the world anew in the bosom of this huge wilderness, where there was not even a path to guide him. He had a road to make, some temporary bridges to make, overset trees to remove, a house to raise, swamps to convert into meadows and to fit for the scythe, upland fields to clear for the plough,—such were the labours he had to undertake, such were the difficulties he had to overcome. He surmounted every obstacle, he was young, healthy, vigorous and strong-handed. In a few years this part of the wilderness assumed a new face and wore a smiling aspect. The most abundant crops of grass, of fruit, and grain soon succeeded to the moss, to the acorn, to the wild berry, and to all the different fruits, natives of the soil. Soon after these first successful essays the farm of his happy beginning drew abundance of inferior people to that neighbourhood. It was made a count and in a short time grew populous, principally with poor people, whom some part of this barren soil could not render much richer. But the love of independence, that strong attachment to wives and children which is so powerful and natural, will people the tops of cliffs and make them even prefer such settlements to the servitude of attendance, to the confinement of manufactories, or to the occupation of more menial labour.

There were in the neighbourhood two valuable pieces of land, less considerable indeed, but in point of fertility as good as his own. S. K. purchased them both and

vited his two brothers-in-law to remove there; generously making them an offer of the land, of his teams, and every other necessary assistance, requiring only to be paid the advanced capital whenever they should be enabled; giving up all pretensions to interest or any other compensation. This handsome overture did not pass unaccepted. They removed to the new patrimony which they had thus easily purchased and in this sequestered situation became to S. K. two valuable
10 neighbours and friends. Their prosperity, which was his work, raised no jealousy in him. They all grew rich very fast. The virgin earth abundantly repaid them for their labours and advances, and they soon were enabled to return the borrowed capital which they had so industriously improved. This part of the scene is truly pleasing, pastoral, and edifying. Three brothers, the founders of three opulent families, the creators of three valuable plantations, the promoters of the succeeding settlements that took place around them. The
20 most plentiful crops, the fattest cattle, the greatest number of hogs and horses, raised loose in his wilderness, yearly accumulated their wealth; swelled their opulence and rendered them the most conspicuous families in this corner of the world. A perfect union prevailed not only from the ties of blood, but cemented by those of the strongest gratitude.

Among the great number of families which had taken up their residence in that vicinage it was not to be expected that they could all equally thrive. Prosperity
30 is not the lot of every man, so many casualties occur that often prevent it. Some of them were placed, besides, on the most ungrateful soil, from which they could barely draw a subsistence. The industry of Man, the resources of a family are never tried in this cold country, never put to the proof, until they have undergone the severity of a long winter. The rigours of this season generally require among this class of people every exertion of industry, as well as every fortunate circumstance that can possibly happen. A cow, perhaps, a
40 few sheep, a couple of poor horses must be housed, must be fed through the inclement season, and you know that it is from the labour of the summer, from collected grasses and fodder, this must proceed. If the least accident through droughts, sickness, carelessness or want of activity happens, a general calamity ensues. The death of any one of these precious animals oversets

the well-being of the family. Milk is wanting for the children, wood must be hauled, the fleeces of sheep cannot be dispensed with. What providence can replace these great deficiencies?

50 Happily S. K. lived in the neighbourhood. His extreme munificence and generosity had hitherto, like a gem, been buried, for he had never before lived in a country where the needy and the calamitous were so numerous. In their extreme indigence, in all their unexpected disasters, they repair to this princely farmer. He opens to them his granary; he lends them hay; he assists them in whatever they want, he cheers them with good counsel, he becomes a father to the poor of this wilderness. They promise him payment, he never
60 demands it. The fame of his goodness reaches far and near. Every winter his house becomes an Egyptian granary, where each finds a supply proportioned to his wants. Figure to yourself a rich and opulent planter situated in an admirable vale, surrounded by a variety of distressed inhabitants, giving and lending, in the midst of a severe winter, cloaks, wool, shoes, etc., to a great number of unfortunate families, relieving a mother who has not perhaps wherewithal to clothe her new-born infant, sending timely succour, medicines, victuals
70 to a valetudinarian exhausted with fatigues and labours, giving a milch cow to a desolate father who has just lost his in a quagmire, as she went to graze the wild herbage for want of hay at home, giving employment, directing the labours and essays of these grateful but ignorant people towards a more prosperous industry. Such is the faithful picture of this man's conduct, for a series of years, to those around him. At home he was hospitable and kind, an indulgent father, a tender husband, a good master. This, one would have imagined,
80 was an object on which the good genius of America would have constantly smiled.

Upon an extraordinary demand of wheat from abroad, the dealers in this commodity would often come to his house and solicit from him the purchase of his abundant crops. "I have no wheat," said he, "for the rich, my harvest is for the poor. What would the inhabitants of these mountains do, were I to divest myself of what superfluous grain I have?" "Consider, sir, you will

28 vicinage, neighborhood • 62 an Egyptian granary. See the story of Joseph, Genesis 47:12

receive your money in a lump, and God knows when you are to expect it from these needy people, whose indolence you rather encourage by your extreme bounty "Some do pay me very punctually. The rest wish and try to do it, but they find it impossible, and pray, must they starve because they raise less grain than I do?" Would to God I were acquainted with the sequel of this humane conversation! I would recapitulate every phrase, I would dwell on every syllable. If Mercy herself
10 could by the direction of the Supreme Being assume a visible appearance, such are the words which this celestial Being would probably utter for the example, for the edification of mankind 'Tis really a necessary relief and a great comfort to find in human society some such beings, lest in the crowd, which through experience we find so different, we should wholly lose sight of that beautiful original and of those heavenly dispositions, with which the heart of Man was once adorned

One day as he was riding through his fields, he saw
20 a poor man carrying a bushel of wheat on his back "Where now, neighbour?"

"To mill, sir"

"Pray, how long since you are become a beast of burthen?"

"Since I had the misfortune of losing my jade"

"Have you neither spirit nor activity enough to catch one of my wild horses?"

"I dare not without your leave"

"Hark ye, friend, the first time I see you in that
30 servile employment whilst I have so many useless ones about my farm, you shall receive from me a severe reprimand" The honest countryman took the hint, borrowed a little salt and a halter, and soon after appeared mounted on a spirited mare, which carried him where he wanted to go, and performed for him his necessary services at home

In the fall of the year it was his usual custom to invite his neighbours in, helping him to hunt and to gather together the numerous heads of swine which were bred
40 in his woods, that he might fat them with corn which he raised in the summer. He made it a rule to treat them handsomely, and to send them home each with a good hog, as a reward for their trouble and attendance. In harvest and haying he neither hired nor sent for any man, but, trusting to the gratitude of the neighbourhood, always found his company of reapers and hay-makers

more numerous than he wanted. It was truly a patriarchal harvest gathered for the benefit of his little world. Yet, notwithstanding his generosity, this man grew richer every crop, every agricultural scheme succeeded. What he gave did not appear to diminish his stores, it seemed but a mite, and immediately to be replaced by the hand of Providence. I have known Quakers in Pennsylvania who gave annually the tenth part of their income, and that was very great, but this man never counted, calculated, nor compared. The wants of the year, the calamities of his neighbourhood were the measure by which he proportioned his bounty. The luxuriance of his meadows surpassed all belief, I have heard many people say, since his misfortunes, that they have often cut and cured three tons and half per acre. The produce of his grain was in proportion, the blessings of heaven prospered his labours and showered fertility over all his lands. Equally vigilant and industrious, he spared neither activity nor perseverance to accomplish his schemes of agriculture. Thus he lived for a great number of years, the father of the poor and the example of this part of the world. He aimed at no popular promotion, for he was a stranger to pride and arrogance. A simple commission as a militia-captain was all that distinguished him from his equals.

Unfortunate times came at last. What opinion he embraced in the beginning remains unknown. His brothers-in-law had long envied his great popularity, of which, however, he had never made the least abuse. They began to ridicule his generosity, and, from a contempt of his manner of living, they secretly passed to extreme hatred, but hitherto they had taken care to conceal their rancour and resentment. At the dawn of this new revolution, they blazed forth. Fanned by the general impunity of the times, they, in an underhanded manner, endeavoured to represent him as inimical. They prevailed upon the leaders to deprive him of his commission (though fifty-six years of age), and even made him submit to the duties of a simple militiaman. They harassed his son by all the means which false zeal and uncontrollable power—[all] too unhappily—suggested to them. In short, they made themselves so obnoxious as to expose them to every contumely devised by the rage of party and the madness of the times.

As he was a great lover of peace and repose, he obeyed their commands and went forth, as well as his son,

whenever ordered. This unexpected compliance became a severe mortification and an insupportable disappointment to his enemies. They became, therefore, more openly outrageous. They began by causing his son to be deprived of a favourite rifle, a rifle that had constantly and successfully contributed to his father's youthful amusements. This outrage the old gentleman could not patiently endure. He seized on the house of the officer who had committed this act of violence. A great dispute ensued, in consequence of which he was cast (into prison) and severely fined. Innumerable other insults were offered to the youth, who, young, bold, and courageous, preferred at last a voluntary exile to so much insult and vexation. He joined the King's troops. This was what had been foreseen, and [was] a part of that plan which had been previously concerted by his brothers-in-law and his other enemies. Thus these people, from the wild fury of the times, contrived the means of S. K.'s destruction, which was to ensure them the possession of his fine estate. This elopement with the doubtful confirmed the preceding suspicions, realized the conjectures of his enemies. Among the more irascible the torch now blazed with redoubled heat. His life was immediately demanded by the fanatical, and his estate secured by the detestable devisers of his ruin.

What a situation for an honest, generous man! Despised, shunned, hated, calumniated, and reviled in the midst of a county of which he was the founder, in the midst of a people the poorest of which he had so often assisted and relieved, pursued and overtaken by his brothers-in-law, whom he had raised from indigence! Gracious God, why permit so many virtues to be blasted in their greatest refulgency? Why permit the radiance of so many heavenly attributes to be eclipsed by men who impiously affix to their new, fictitious zeal the sacred name of liberty on purpose to blind the unwary, whilst, ignorant of Thee, they worship no deity but self-interest, and to that idol sacrilegiously sacrifice so many virtues? If it is to reward him with never-fading happiness, condescend to manifest some faint ray of Thy design proportioned to the weakness of the comprehension of us, frail mortals and fellow-sufferers, that we may not despair, nor impious men may arraign Thy eternal justice. Yes, it is virtue Thou meanest to reward and to crown. The struggle, the contest, the ignominy to which it is now exposed, the greater disasters which will

soon terminate this scene have some distant affinity with the suffering of Thy Son, the Moral Legislator, the Pattern of Mankind.

S. K. bore his misfortunes with a manly constancy. However, the absence of his son impaired his industry, and almost put an entire stop to his designs of improvement. He saw but neglected his farm, his fields, his pastures, and his meadows, the ruinous and deplorable state in which the country was involved. His house, once the mansion of hospitality and kindness, was entered now but by secret emissaries, enemies, committeemen, etc. The few friends he had left dared not visit him, for they, too, were struggling with their difficulties; they dared not expose themselves to a declaration of their sentiments by soothing his oppressed mind, and comforting him in his adversity. He was taken ill. Nevertheless, militia-duty was demanded and required of him. He was fined forty pounds for every fortnight he had been absent. He recovered and resolved either to cease to be, or else to exist with more ease. He went towards New York, but the guards and other obstacles he met with prevented him from accomplishing his design. He returned, but ere he reached his house, he heard the melancholy tidings that it had been plundered, and that there was a general order for the militia to hunt him through the woods. For a great number of days he had to escape their pursuit from hill to hill, from rocks to rocks, often wanting bread, and uncertain where to hide himself. By means of the mediation of some friends he was at last permitted to return home and remain there on bail. A dejected, melancholy wife, a desolated house, a half-ruined farm, a scarcity of everything struck him to the heart at his first coming, but his sorrow and affliction were all passive. These impressions, however, soon wore away, he insensibly grew more reconciled to his situation. His advanced age, his late sickness, his fatigues had wearied him down, and his mind, partaking of the debility of his body, did no longer view these disagreeable images in the same keenness of light.

This happened in the fall. The following winter some poor people repaired to his house for relief and supplies as usual. "Alas, my friends, committees and rulers have made such a havoc here that I have no longer the means to relieve you. A little hay, perhaps, I may spare, for they have stolen all my horses. Pray, were not you one of those who hunted me whilst I was wild?"

"Yes, sir, I was unfortunately one of them, but I was compelled. I was driven to do it. You know as well as I the severity with which we poor militiamen are treated, exorbitant and arbitrary fines, corporal punishments. Every kind of terror is held out to us. What could I do?"

"I know it, and am far from blaming you, though I greatly lament and pity your situation. Pray, have you been paid for your services against me?"

10 "No, sir."

"How many days have you been out?"

"Two."

"What! Two days in the woods and you have received no wages? Have neither committees nor captains ever settled that matter yet?"

"No, sir, our services are gratis, and we must, besides, find our victuals, our blankets, and the very ammunition we expend,—we must pay for it."

20 "I hate, and always did, to see poor men employed for nothing. Take two loads of hay for your two days' work. Will that satisfy you?"

"You were always a good man. God loves you yet though some men are dreadfully set against you."

"Do tell me, would you really have killed me as you were ordered, if you had met me in the woods?" Here the poor man, hiding his face with his hat, shed tears and made no other answer.

The patience, the resignation with which he seemed now to bear his fate, greatly alarmed his enemies. They 30 reproached themselves with the facility with which they suffered him to return and to procure bail, new devices, therefore, were made use of to push him to a final extremity. His determination of thus remaining at home, quiet and inoffensive, might abate that popular rage and malice which were the foundations of their hopes. The keen edge of popular clamour might become blunted; there was a possibility of their being frustrated in their most favourite expectations. They, therefore, secretly propagated a report that he had harboured 40 Indians on their way to New York. No sooner said than believed. Imprisonment, hanging were denounced against him by the voice of the public. This new clamour was principally encouraged by his brothers-in-law, the one now become a magistrate, and the other a captain of the militia.

Finding himself surrounded with new perils, without

one friend either to advise or to comfort him, threatened with his final doom, accused of that which, though they could not prove, he could only deny; knowing of no power he could appeal to, either for justice or relief. 5 seeing none but prejudiced enemies in his accusers, judges, and neighbours, he at last determined to join the Indians who were nearest to him, not so much with the design of inciting them to blood and slaughter, as [of finding] a place of refuge and repose. This was what his enemies expected. His house, his farm,—all were seized, even the scanty remains of what had escaped their former avidity and plunder. All was sold, and the house and farm were rented to a variety of tenants until laws should be made to sell the lands. 6

Such a house broke!

So noble a master fallen! All gone! and not

One friend to take his fortune by the arm,

And go along with him

It has been said since that this famed farm has ceased this year to bear as plentifully as usual, that the meadows have brought but little hay, that the grain has been scanty and poor. This is at least the tradition of the neighbourhood. It may be that these inconsiderate tenants neither plough nor cultivate it as it was formerly, that the meadows, late-fed and ill-fenced, have no time to bear a crop, and that in the short space of their lease they refuse the necessary manures and usual care, without which the best land produces nothing.

His wife, alas! has been hitherto overlooked and unnoticed, though you may be sure she has not been passive through these affecting scenes. In all these various calamities which have befallen her family she has borne the part of a tender mother, an affectionate wife. Judge of her situation at this particular and critical moment! The repeated shocks which she has sustained within these three years have impaired the tone of her nerves,—you know the delicacy of the female frame. Though her cheerfulness was gone, the gleamings of hope, the presence of her husband still supported her. This sudden and unexpected blow completed the horrid catastrophe. Soon after his elopement, when the armed men came to seize him, she fainted, and though she has since recovered the use of her limbs, her reason has never returned but in a few lucid intervals. She is now confined to a small room, her servants sold and gone, she is reduced

to penury; she is become a poor tenant of that very house which in the better days of her husband's prosperous industry had glowed with the cheerful beams of benevolence. She is now an object of pity without exciting any. When her reason returns, it is only to hear herself and family reviled. "You yourselves have driven my son, my husband away," is all she can say. Could tears, could wishes, could prayers relieve her, I'd shed a flood, I'd form a thousand, I'd proffer the most ardent
 10 ones to heaven. But who can stem the tide of Fate? It is the arbiter of kings and subjects, in spite of every impediment it will rise to its preordained height. She lives, happily unknown to herself, an example of the last degree of desolation which can overtake a once prosperous family, the object of raillery to those who are witnesses of her delirium. It would have been a miracle indeed, had her senses remained unimpaired amidst the jars, the shocks of so many perturbations. A Stoic himself would have required the spirit of Zeno to have with-
 20 stood, placid and composed, the convulsions of so great a ruin

One stroke of fortune is still wanting. S. K. in his flight met with a party of Indians coming towards ———, which they intended to destroy. He accompanied them, never ceasing to beg of them that they would shed no blood and spare the lives of poor innocent farmers. The deaths of three or four, to which he was witness, shocked his humane soul. He quitted them and returned once more towards home, choosing rather
 30 to meet his final doom in his own country than be any longer a witness to the further mischiefs meditated by these incensed people. On his return he was soon informed of the deplorable state to which his wife was reduced and of the destruction of his property. He balanced what to do, as if amidst so much evil there was still a possibility of choice. Sad, however, was the alternative: whether to venture and deliver himself up at all hazards, and thus end the suspense; or whether to live a vagrant, a fugitive in these woods and mountains,
 40 with the paths and intricate ways of which he was so well-acquainted. But whence was he to procure subsistence? It could not be by the chase. Was he then to turn plunderer? Weary of life, he at last found means to inform the rulers of his return and repentance; but he received no other answer than what was soon afterwards delivered by the mouths of the dogs and by the

noise of the militia which was ordered out to search the woods for him. He luckily escaped their pursuit, but hunger, his greatest enemy, at last overtook him. He ventured towards a cabin, the tenants of which he had
 50 often relieved in their adversity. They gave him some bread and advised him to fly. Soon afterwards, by means of the indiscretion of a child, this mystery of generosity and gratitude was revealed. The aged couple were severely whipped, being too poor to be fined. For a long time he skulked from tree to tree, from rock to rock; now hid on the tops of cliffs, seeing his pursuers below him, now creeping through the impervious ways of marshes and swamps, the receptacle of bears less cruel than his enemies

Ye angels of peace, ye genii of placid benevolence, ye invisible beings who are appointed to preside over the good, the unjustly persecuted, is there no invisible ægis in the high armouries of heaven? Gently cause one to descend, in order to shield this mortal man, your image, from the muskets of his ancient friends and dependants, —all aimed towards him. Whichsoever way he steers, he has to dread the smell of dogs, now become his enemies. Where can he go to escape and live? But if he lives, what life will it be? The goaded mind incessantly
 70 represents to itself and compares the ancient days of ease, felicity, tranquillity, and wealth, with the present hours of hunger, persecution, and general hatred, once the master and proprietor of a good house, now reduced to the shelter of the woods and rocks, once surrounded with servants and friends, now isolated and alone, afraid of the very animal which used to be his companion in the chase. Such, however, was the fate of this man for a long time, until, abandoning himself to despair, overpowered by the excess of fatigue, debility, and hunger,
 80 he suffered himself to be taken. He was conducted to gaol, where he expected he should not long languish. Mercy was now become useless to him. What good could it procure him, now that his wife was delirious, his son gone, and all his property destroyed? His only remaining felicity was the remembrance of his ancient humane deeds which like a sweet ethereal dew must

19 Zeno (fl. 300 B.C.), founder of the Stoic school of philosophy, held that the wise man should always be indifferent to external circumstances.
 • 63 ægis, the storm cloud or shield of Zeus, hence any powerful protection

cast a mist over the horrors of his confinement, and imperceptibly prepare him to appear in that world which blesses the good, the merciful without measure, and has no bitterness for such tenants

The day of trial soon came, and to his great surprise, as well as to the astonishment of all, he was released on bail and permitted to go to work for his bread. Like Belisarius of old, he is returned to live in that small part of his own house which is allotted him for his habitation, there to behold once more the extensive havoc which surrounds him, and to contemplate in gloomy despair the overthrow of his wife's reason and the reunion of all the physical evil that could possibly befall him, without resources and without hope

Yet he lives, yet he bears it without murmuring. Life seems still to be precious to him, 'tis a gift he has no thought of parting with. 'Strange! What is it good for when thus embittered, when thus accompanied with so much acrimony, such irretrievable accidents? 'Tis a perpetual state of agony. Better part with it in a heavy, final groan and trust to Nature for the consequence than to drag so ponderous a chain. How much happier the felon, the murderer who at one fortunate blow ends the remembrance of his life and his crimes, and is delivered from chains, putrid holes, and all the other wants of Nature!'

Compare now the fate of this man with that of his more fortunate persecutors. I appeal to the enlightened tribunals of Europe, to the casuistical doctors of the colleges of science, to the Divan, to the synods, to the presbyteries, and to all bodies and conventions of men reunited to judge of the various cases which the combined malice of men exhibit on the stage of the world, as well as of the various preventives and punishments designed to check malice and evil deeds. I appeal to the American tribunals on that day when the mist of these times shall be dissipated. I ask them all on what principles can this man be punished? What has he done that can deserve so much severity? The graft, by the virulence of these times, is made to poison the parent stock, the vine is made to corrode the tutelar elm which has so long supported its entwined limbs and branches. 'Tis the jealousy, the avarice, the secret thirst of plunder, sanctified under new and deceiving names, which have found means to vilify this generous citizen, and have set the aspic tongues reviling this innocent man. Can it be? Can this

be the reflected work of three years? Yes, it is. But for their demoniacal fury he might have remained at home passive and inoffensive. The produce of his fertile farm might have served to support the cause. But this was not sufficient to satisfy the rage, the malice of an ignorant, prejudiced public

Are ye not afraid, ye modern rulers, to attract the wrath of heaven, the vindictive fires of its eternal justice in thus trampling under, in thus disregarding the most essential laws of humanity, in thus neglecting the most indispensable ones contained in that code which ought to reign supreme, exclusive of all parties, factions, and revolutions? Is not the deplorable state into which this man and all his family are reduced more than sufficient to atone for the popular offences he is supposed to have been guilty of? Must poverty, languor, and disease terminate in want, penury, and ignominy a life hitherto pursued on the most generous principles, a life which, contrary to the tenor of yours, has been so useful, so edifying?

But I am not pleading his cause, I am no biographer. I give way to an exuberance of thoughts which involuntarily crowd on my mind, unknown to all the world but its Ruler and yourself. I don't presume that this man was matchless, devoid of vices and faults. Like all other men, his cup was no doubt mixed with those ingredients which enter into the beverage of mortals. It is not the minutiae of his life into which I want to descend. This unfortunate epoch is *that* alone which I want to select and to describe as a proof of his hard destiny, and as one of the characteristics of the times in which we live. Yet I am persuaded that there are several members in Congress and in every province who, moved into compassion at this relation, would shed tears over the ashes of this ruin; but these men at a great distance direct the revolution of the new orb. It is the inferior satellites who crush, who dispel, and make such a havoc in the paths which it is to follow.

Yet his enemies exult, triumph, and rule. They bear sway, are applauded, gather every harvest, and receive every incense which the world can give, whilst he bemoans his fate, and is obliged to support himself and

30 the Divan, the highest council of state among the Turks

his wife. His enemies, now become his masters, were before these times, mostly poor, obscure, and unnoticed, great psalm-singers, zealous religionists who would not have cracked a nut on the Sabbath.—no, not for any worldly consideration. They were meek, lowly Christians, always referring every accident to God's divine providence and peculiar appointment, humble in their deportment, composed in their carriage, prudent in their outward actions, careful of uttering offensive words, men of plausible countenances, sleek-haired, but possessed at the same time of great duplicity of heart, sly in their common social intercourse, callous,—pushing, with an affected charitable language, from their doors the poor, the orphan, the widow

I have known some of these country saints to tenaciously detain in gaol some debtors for twelve pounds, which S. K., unknown to everybody, would privately cause to be paid. These are the people who before these times were ostentatiously devout, laboriously exact in their morning prayers, reading, expoundings, etc. These are the men who now in the obscure parts of this country have assumed the iron sceptre and from religious hypocrites are become political tyrants. That affected meekness, that delusive softness of manners are now gone, they are discarded as useless. They were formerly the high road to popularity, applause, and public respect, but this new zeal for their new cause must not, like the ancient one, moulder under the ashes and be afraid of sunshine and of air. It must burn, it must conflagrate, the more violent the flames, the thicker the smoke, the more meritorious. Whilst the unaffected good man, the sincere Christian, who proved his principles by his actions more than by his vain words and his disputations, is reprobated, shunned, despised, and punished, the secret liar, the hidden fornicator, the nocturnal drunkard, the stranger to charity and benevolence are uplifted on

modern wings, and obtain the applause of the world which should be the reward of merit, of benefits conferred, of useful actions done

Surely this points out the absolute necessity of future rewards and punishments. Were not I convinced of it, I would not suffer the rebukes, the taunts, the daily infamy, to which I have conscientiously exposed myself. I'd turn Manichean like so many others. I'd worship the demon of the times, trample on every law, break every duty, neglect every bond, overlook every obligation to which no punishment was annexed. I'd set myself calumniating my rich neighbours. I'd call all passive, inoffensive men by the name of inimical. I'd plunder or detain the entrusted deposits. I'd trade on public moneys, though contrary to my oath. Oath! Chaff for good Whigs, and only fit to bind a few conscientious Royalists! I'd build my new fortune on the depreciation of the money. I'd inform against every man who would make any difference betwixt it and silver, whilst I, secure from any discovery or suspicion by my good name, would privately exchange ten for one. I'd pocket the fines of poor militiamen extracted from their heart's blood. I'd become obdurate, merciless, and unjust. I'd grow rich, "*fas vel nefas*." I'd send others a-fighting, whilst I stayed at home to trade and to rule. I'd become a clamorous American, a modern Whig, and offer every night incense to the god Arimanes

1780²·1925

1 His enemies. The passage which follows suggests something of the class conflict which underlay the Revolution. • 44 Manichean. Manichaeism was a religion originating in Babylonia in the third century, with Mani or Manes. Long regarded as dangerous by the Christian church, it was often misrepresented. To Crèvecoeur, Manichaeism apparently meant the same thing as materialism, a definition which it did not deserve. • 60 "*fas vel nefas*," right or wrong. • 63 the god Arimanes, Ahriman, the Persian name for the Devil, or principle of evil

American Farm, Late 1700's

John Woolman

1720 • 1772

The *Journal* of John Woolman has found enthusiastic readers ever since its first publication in 1774. Among those who have been charmed by its revelation of a man who for honesty, simplicity, and sweetness of temper merits comparison with St. Francis of Assisi and Jesus Christ must be counted Charles Lamb, the English essayist, Lamb's friend Crabb Robinson, diarist-historian of the Romantic era, William Ellery Channing (p. 416), and John Greenleaf Whittier. To many, Woolman has come to represent American Quakerism at its splendid best, a mystic faith whose outward starkness and lack of pomp accentuate great inward richness. More recently Woolman has been much admired for his unique grasp of the social and economic implications of the concept of the Society of Friends that the human race is one great family.

The brotherhood of man was to Woolman not an ideal but a reality, and as he grew older he sought to divorce himself, quietly but firmly, from all actions and institutions which even indirectly involved injustice to his fellow creatures. Although he made much of his living by drawing up legal documents, he refused to make out bills of sale for slaves. When he learned that plantation workers in the West Indies endured indescribable hardships, he did without sugar. Before he died he was examining every aspect, every purchase, of his daily life in the light of its social effect. He hit upon the methods of passive resistance, non-coöperation, and the economic boycott and, like Thoreau two generations later, learned to scale down his wants to fit his

principles. Woolman did not reform society, but he tried to deal honestly with the exceedingly complicated problem of an individual's just relation to his fellow men. On occasion his methods have proved to be tremendously effective.

Woolman was born on a farm on Rancocas Creek, midway between Burlington and Mount Holly, New Jersey. There he lived until he was twenty, learning to love the Quaker way of life in his family, the village school, and the weekly Meeting. He then went into a shop in Mount Holly, five miles away, and in his spare time learned the tailor's trade. Diligent and thrifty, he might easily have grown wealthy, but his social conscience was obviously far greater than that of most of his associates. Soon he felt the call to visit other Meetings, as was the custom of those Friends who wished to become ministers and elders in a sect which had no professional clergy. During the last half of his life, except when he was ill, he made at least one journey a year, sometimes being away from home for as long as four months. Usually accompanied by another Friend, he visited and testified at Quaker meetings and in Quaker homes from New England to the Carolinas and westward into the Indian country, telling what was in his mind and heart and remonstrating with Quaker slave holders and businessmen whose lives, in his judgment, fell short of what he called "pure wisdom." His tact, his literary skill, and, most of all, his unimpeachable sincerity made him successful in Quaker politics and action, and he was chiefly responsible for consolidating

Quaker sentiment for the emancipation of Negro slaves His inclination to help arouse the English Quakers to the importance of this cause sent him to England in 1772. He arrived in London in June, visited Friends there and in the neighborhood, and then, wishing to go to the North, chose characteristically to walk rather than have any part in the oppression of postboys and horses He got as far as York, where he died of smallpox in September.

In the course of his life Woolman wrote more than a dozen essays on matters which he thought ought to be more fully considered by the Quakers. Some of them were published during his lifetime, usually by the Overseers of the Press of the Philadelphia Meeting, so that they were distributed among Quakers with some degree of authority. The *Essay on Some Considerations on the Keeping of Negroes* (Part I, 1754, Part II, 1762) and *Considerations on Pure Wisdom and Human Policy*

(1758) are the most important. A few of the more radical essays and the *Journal* did not appear until after Woolman's death.

Woolman's writing is far from being as artless as it may seem at first glance. He gained precisely the effect of unpretentious directness that he wanted, and he revised some of his manuscripts with considerable care. His Quaker readers were suspicious of learning, of dependence upon close-knit logic or rhetorical devices. The sweet reasonableness of Woolman's tone and the apparent carelessness in organization clothe a keen and penetrating intellect, stored with the rich wisdom of the Bible and of personal experience and directed by convictions which are often revolutionary

The Journal and Essays of John Woolman, ed. Amelia M. Gummere, New York, 1922 • Janet Whitney, *John Woolman, American Quaker*, Boston, 1942

From

The Journal and Essays of John Woolman

Woolman tells us that he began his journal when he was thirty-six. Presumably he kept some kind of day-by-day diary, but so far as is known none is extant. The *Journal* has come down to us in two manuscripts, one of which includes a number of Woolman's essays and is the manuscript which he himself prepared for the publication committee of the Philadelphia Meeting before he left for England. The *Journal* consists of eleven chapters, all of Chapter I and a part of the latter portion of Chapter III follow. Mrs. Whitney has shown in her recent biography, by reference to manuscript account books, that Woolman's dating of events, probably from memory, is not always to be relied upon. His account of his gradual progress toward spiritual enlightenment, "until I felt that rise which pre-

pares the creature to stand like a Trumpet, through which the Lord speaks to his flock," is possibly the clearest exposition of the Quaker faith in our literature

CHAPTER I

I have often felt a motion of Love to leave some hints of my experience of the Goodness of God and pursuant thereto, in the 36 year of my age, I begin this work.

I was Born in Northampton, in Burlington county, in West Jersey, in the year of our Lord 1720 & before I was seven years old, I began to be acquainted with the operations of Divine Love. Through the care of my Parents, I was taught to Read as soon as I was capable of it, and as I went from School one seventh-day, I remember, while my companions went to play by the way, I went forward out of sight, and setting down, I read the twenty second chapter of the Revelations: "He showed me a pure River of Water of Life, clear as Crystal, proceeding out of the Throne of God and of the Lamb," &c. and in the reading of it, my mind was drawn to seek after that Pure Habitation, which I then believed God had prepared for his servants. The place where I sat, and

the sweetness that attended my soul, remain fresh in my memory.

This, and the like Gracious Visitations, had that effect upon me, that when boys used ill language, it troubled me, & through the continued Mercies of God, I was preserved from it. The pious instructions of my Parents were often fresh in my mind when I happened to be among wicked children, and were of use to me

My Parents haveing a large family of children, used
10 frequently on first-days after meeting, to put us to read in the Holy Scriptures, or some religious books, one after another, the rest sitting by without much conversation, which I have since often thought was a good practice From what I had read, I believed there had been in past ages, people who Walked in Uprightness before God in a degree exceeding any that I knew, or heard of, now living & the Apprehension of their being less Steadiness and firmness amongst people in this age than in past ages, often Troubled me while
20 I was still young

I had a Dream about the ninth year of my age as follows I saw the Moon rise near the West, & run a regular course Eastward, so swift that in about a quarter of an hour, she reached our Meridian, when there descended from her a small Cloud on the Direct line to the Earth, which lighted on a pleasant Green about twenty yards from the Door of my Father's House (in which I thought I stood) and was immediately turned into a Beautiful green Tree The Moon appeared to run
30 on with Equal swiftness, and soon set in the East, at which time the Sun arose at the place where it commonly doth in the Sumer, and Shineing with full Radiance in a Serene air, it appeared as pleasant a morning as ever I saw.

All this time I stood still in the door, in an Awfull frame of mind, and I observed that as heat increased by the Rising Sun, it wrought so powerfully on the little green Tree, that the leaves gradually withered, and before Noon it appear'd dry & dead. There then appeared
40 a Being, Small of Size, moving Swift from the North Southward, called a "Sun Worm."

Tho' I was A Child, this dream was instructive to me

Another thing remarkable in my childhood was, that once as I went to a neighbour's house, I saw, on the way, a Robbin sitting on her nest, and as I came near she went off, but having young ones, flew about, and with

many cries expressed her Concern for them. I stood and threw stones at her, till one striking her, she fell down dead. At first I was pleas'd with the Exploit, but after a few minutes was seized with Horror, as haveing in a sportive way kild an Innocent Creature while she was carefull for her young I beheld her lying dead, & thought those young ones for which she was so carefull must now perish for want of their dam to nourish them, and after some painfull considerations on the subject, I climbed up the Tree, took all the young birds, and killed them supposing that better than to leave them to pine away and die miserably, and believ'd in this case, that scripture proverb was fulfilled, "The tender mercies of the wicked are Cruel" I then went on my errand, but, for some hours, could think of little else but the Cruelties I had committed, and was much troubled

Thus He whose tender Mercies are over all his works, hath placed that in the Human mind which incites to exercise goodness towards every liveing creature and This being singly attended to, people become tender-hearted and sympathizing, but being frequently & totally rejected, the mind shuts itself up in a Contrary disposition

About the twelfth year of my age, my Father being abroad, my Mother reprov'd me for some misconduct, to which I made an Undunfull reply & the next first-day as I was with my Father returning from Meeting, He told me he understood I had behaved amis to my Mother and Advised me to be more carefull in future I knew myself blameable, and in shame and confusion remained silent Being thus awakened to a sense of my Wickedness, I felt remorse in my mind, and geting home, I retired and prayed to the Lord to forgive me, and I do not remember that I ever after that, spoke unhand somely to either of my Parents, however foolish in some other things

Having attained the age of Sixteen, I began to love wanton company and though I was preserved from profane language or Scandalous conduct, Still I perceive a plant in me which produced much wild grapes Ye my Merciful Father forsook me not utterly, but

9 large family. John Woolman was the fourth child and eldest son of a family of six girls and seven boys • 21 a Dream The symbols of Woolman's dream is obscure, but presumably has something to do with his knowledge of good and evil • 59 scripture proverb, Prover 10 12

times through his grace I was brought seriously to consider my ways, and the sight of my backsliding affected me with sorrow: but for want of rightly attending to the reproofs of Instruction, Vanity was added to Vanity, and Repentance Upon the whole my mind was more and more Alienated from the Truth, and I hastened towards Destruction While I meditate on the Gulf towards which I traveled, and reflect on my youthful Disobedience, my heart is affected with Sorrow

Advancing in age, the number of my Acquaintance increased, and thereby my way grew more difficult Though I had heretofore found comfort in reading the Holy Scriptures, and thinking on heavenly things, I was now Estranged therefrom I knew I was going from the flock of Christ, and had no resolution to return, hence serious reflections were uneasie to me, and Youthfull Vanities and Diversions my greatest pleasure Runing in this Road I found many like myself, and we associated in that which is reverse to true Friendship but in this swift race it pleased God to visit me with Sickness, so that I doubted of recovering and then did Darkness, Horror and Amazement, with full force seize me, even when my pain and distress of body was verry great I thought it would have been better for me never to have had a being, than to see the day which I now saw I was filled with Confusion, & in great affliction both of mind & body, I lay and bewailed myself I had not confidence to lift up my cries to God, whom I had thus offended, but in a deep sense of my great folly I was humbled before Him, & at length that Word which is as a Fire and a Hamer, broke and dissolved my rebellious heart, and then my Cries were put up in contrition, and in the multitude of His mercies I found inward relief, and felt a close Engagement, that if he was pleased to Restore my health, I might walk Humbly before Him

After my Recovery, this Exercise remained with me a considerable time, but, by degrees, giving way to youthfull vanities, they gained strength, and getting with wanton young people I lost ground. The Lord had been verry Gracious, and Spoke peace to me in the time of my distress, and I now most ungratefully turned again to folly, on which account, at times, I felt sharp reproof, but did not get low enough to Cry for help I was not so hardy as to commit things scandalous, but to Exceed in Vanity, and promote myrth, was my chief

study. Still I retained a love and esteem for pious people, and their company brought an Awe upon me. My Dear Parents several times Admonished me in the fear of the Lord, and their admonition entered into my heart, & had a good effect for a season, but not getting deep enough to pray rightly, the tempter when he came found entrance I remember once having spent a part of a day in wantonness, as I went to bed at night, there lay in a window near my bed a Bible, which I opened, and first cast my eye on the Text, "we lie down in our shame, and our confusion covers us" Thus I knew to be my case, and meeting with so unexpected a reproof, I was somewhat Affected with it, and went to bed under remorse of conscience, which I soon cast off again

Thus time passed on, my heart was replenished with myrth and wantonness, while pleasing scenes of Vanity were presented to my Imagination, till I attain'd the age of Eighteen years, near which time I felt the Judgments of God in my soul like a consuming fire, and looking over my past life, the prospect was moveing I was often sad, and longed to be deliver'd from those vanities, then again my heart was Strongly Inclined to them, and there was in me a sore conflict At times I turned to folly, and then again sorrow and confusion took hold of me In a while I resolved totally to leave off some of my vanities, but there was a secret reserve in my heart, of the more refined part of them, and I was not low enough to find true peace Thus for some months, I had great troubles and disquiet, there remaining in me an unsubjected will, which rendered my labours fruitless, till at length, through the Mercifull continuance of Heavenly Visitations, I was made to bow down in Spirit before the Most High I remember one evening I had spent some time in reading a pious author, and walking out a lone, I humbly prayed to the Lord for his help, that I might be delivered from those vanities which so ensnared me Thus being brought low he helped me, and as I learned to bear the Cross, I felt refreshment to come from his Presence but not keeping in that Strength which gave victory I lost ground again, The sense of which greatly afflicted me and I sought Desarts and lonely places, and there with tears did confess my Sins to God, and humbly craved help of HIM, and I may

say with Reverence he was near to me in my troubles, and in those times of Humiliation opened my ear to Discipline

I was now led to look seriously at the means by which I was drawn from the pure Truth, and I learned this. That if I would live in the life which the Faithful servants of God lived in, I must not go into company as heretofore in my own will, but all the cravings of Sense must be governed by a Divine principle. In times of
10 sorrow and abasement these Instructions were sealed upon me, and I felt the power of Christ prevail over all selfish desires, so that I was preserved in a good degree of steadiness, and being young and believing at that time that a single life was best for me, I was strengthened to keep from such company as had often been a snare to me.

I kept steady to meetings, spent first-days in the afternoon chiefly in reading the scriptures and other good Books, and was early convinced in my mind that true
20 Religion consisted in an inward life, wherein the Heart doth Love and Reverence God the Creator, and learn to Exercise true Justice and Goodness, not only toward all men, but also toward the Brute Creatures. That as the mind was moved by an inward Principle to Love God as an invisible, Incomprehensible Being, by the same principle it was moved to love him in all his manifestations in the Visible world. That as by his breath the flame of life was kindled in all Animal and Sensible creatures, to say we Love God as unseen, and at the
30 same time Exercise cruelty toward the least creature moving by his life, or by life derived from Him, was a Contradiction in itself

I found no narrowness respecting Sects and Opinions, but believe that sincere upright-hearted people, in Every society who truly love God were accepted of HIM

As I lived under the Cross, and simply followed the openings of Truth, my mind from day to day was more Enlightened, my former acquaintance were left to judge
40 of me as they would, for I found it safest for me to live in private and keep these things sealed up in my own breast. While I silently ponder on that change which was wrought in me, I find no language equal to it, nor any means to convey a clear idea of it. I looked upon the works of God in this Visible Creation, and an awfullness covered me: my heart was tender and often contrite, and a universal Love to my fellow Crea-

tures increased in me. This will be understood by such who have troden in the same path.

Some glances of Real beauty is perceivable in their faces, who dwell in true meekness. Some tincture of true Harmony in the sound of that voice to which Divine Love gives utterance, & Some appearance of right order in their temper and Conduct, whose passions are fully regulated, yet all these do not fully show forth that inward life to such who have not felt it; but this white stone and new name is known rightly to such only who have it

Now tho' I had been thus Strengthened to bear the Cross, I still found myself in great danger, having many weaknesses Attending me, and strong Temptations to wrestle with, in the feeling whereof I frequently withdrew into private places, and often with tears besought the Lord to help me, whose gracious ear was open to my cry

All this time I lived with my Parents, and wrought on the plantation, and having had schooling pretty well for a planter, I used to improve winter evenings, and other leisure times, and being now in the Twenty first year of my age, a man in much business at Shopkeeping and Baking, asked me if I would hire with him to tend Shop and keep books. I acquainted my Father with the proposal, and, after some deliberation it was agreed for me to go. I had for a considerable time found my mind less given to Husbandry than heretofore, having often in view some other way of living

At home I had lived retired, and now having a prospect of being much in the way of company, I felt frequent and fervent Cries in my heart to God the Father of Mercies, that he would preserve me from all Taint & Corruption. That in this more public Employ, I might serve Him my Gracious Redeemer, in that Humility and self Denial with which I had been in a small degree exercised in a verry private life.

The man who employed me furnished a Shop 1 Mountholly, about five miles from my Father's house. Six from his own and there I lived alone, & tended his Shop. Shortly after my settlement here, I was visited by several young people, my former acquaintances, who knew not but vanities would be as agreeable to me now as ever, and at these times I cried unto the Lord Secret for wisdom and Strength, for I felt myself encompassed with difficulties, and had fresh Occasion bewail the follies of time past, in contracting a famili-

ity with a Libertine people. And as I had now left my Fathers house outwardly, I found my Heavenly Father to be mercifull to me beyond what I can express

By day I was much among people, and had many tryals to go through, but in evenings I was mostly alone, and may with thankfulness acknowledge, that in those times the Spirit of Supplication was often poured upon me, under which I was frequently exercised, and felt my Strength renewed.

In a few months after I came here, my Master bought several Scotch men-servants, from on board a Vessel, and brought them to Mountholly to sell & having sold several the rest were left with me, one of which was taken sick, & died The latter part of his sickness, he, being delirious, used to curse and Swear most sorrowfully, and after he was buried, I was left to sleep alone the next night in the same chamber where he died I perceived in me a Timorousness I knew however I had not injured the man, but had assisted in taking care of him according to my capacity, and I was not free to ask any one, on that occasion, to sleep with me nature was feble, but every tryal was a fresh incitement to give myself up wholly to the service of God, for I found no helper like Him in times of Trouble

After a while my former Acquaintance gave over Expecting me as one of their company, and I began to be known to some whose conversation was helpful to me And now, as I had Experienced the Love of God, through Jesus Christ, to Redeem me from many pollutions, and to be a constant succour to me through a Sea of conflicts, with which no person was fully acquainted, and as my heart was often enlarged in this Heavenly Principle, so I felt a tender compassion for the youth who remain'd entangled in the same snares which had entangled me From one month to another, this Love & tenderness increased, and my mind was more strongly engaged for the good of my fellow-creatures I went to meetings in an awfull frame of mind, and endeavoured to be inwardly acquainted with the language of the True Shepherd, and one day being under a Strong Exercise of Spirit, I stood up, and said some words in a meeting, but not keeping close to the Divine opening, I said more than was required of me & being soon sensible of my error, I was afflicted in mind some weeks, without any light or comfort, even to that degree that I could take satisfaction in nothing I remembered God, and was troubled and in the depth of my distress he had

pitty upon me, and sent the Comforter I then felt forgiveness for my offence, and my mind became calm and quiet, being truly thankfull to my Gracious Redeemer⁵⁰ for his mercies And after this, feeling the spring of Divine Love opened, and a Concern to Speak, I said a few words in meeting in which I found peace, this I believe was about six weeks from the first time, and as I was thus humbled and disciplined under the Cross, my understanding became more strengthened to distinguish the language of the pure Spirit which inwardly moves upon the heart, and taught me to wait in Silence sometimes many weeks together, until I felt that rise which prepares the creature to Stand like a Trumpet, through⁶⁰ which the Lord Speaks to his flock

From an inward purifying, and stedfast abideing under it, springs a lively operative desire for the good of others All faithful people are not called to the publick ministry but whoever are called to it, are called to minister of that which they have tasted and handled spiritually The outward modes of worship are various, but wheresoever [men] are true Ministers of Jesus Christ, it is from the operation of his Spirit upon their hearts, first purifying them, and thus giving them a [feeling]⁷⁰ sense of the conditions of others This truth was early fixed in my mind, and I was taught to watch the pure opening, and to take heed least while I was standing to speak, my own will should get upermost, and cause me to utter words from worldly wisdom, and depart from the Chanel of the true Gospel Ministry

In the management of my outward affairs I may say with thankfulness I found Truth to be my Support, and I was respected in my Masters Family who came to live in Mountholly within two years after my going there⁸⁰ [1742.]

About the twenty third year of my age I had many fresh and heavenly openings, in respect to the care and providence of the Almighty over his creatures in general, and over man as the most noble amongst those which are visible, and Being clearly convinced in my Judgmt that to place my whole trust in God was best for me, I felt renewed engagements that in all things I might act on an inward principle of Virtue, and pursue worldly business no further than as Truth open'd my⁹⁰ way therein

About the time called Christmas I observed many people from the Country, and dwellers in Town, who resorting to publick houses, spent their time in drink-

ing and vain sports, tending to corrupt one another, on which account I was much troubled. At one house in particular there was much disorder, and I believed it was a duty laid on me to go and speak to the master of that house. I considered I was young, and that several Elderly friends in Town had opportunity to see these things, and though I would gladly have been excused, yet I could not feel my mind clear. The Exercise was heavy, and as I was Reading what the Almighty Said to Ezekiel,
 10 respecting his duty as a watchman, the matter was set home more clearly, and then with prayer and tears, I besought the Lord for his Assistance, who in loving kindness gave me a Resigned heart. Then at a suitable Opportunity, I went to the publick house, and Seeing the man amongst a company, I went to him and told him I wanted to speak with him, so we went aside, and there in the Fear and dread of the Almighty I Express to him what rested on my mind, which he took kindly, and afterward showed more regard to me than before. In a few
 20 years after he died, middle-aged, and I often thought that had I neglected my duty in that case, it would have given me great trouble and I was humbly thankfull to my Gracious Father, who had supported me therein.

My Employer having a Negro woman sold her, and directed me to write a bill of Sale, The man being waiting who had bought her. The thing was Sudden, and though the thoughts of writing an Instrument of Slavery for one of my fellow creatures felt uneasie, yet I remembered I was hired by the year, that it was my master
 30 who directed me to do it, and that it was an Elderly man, a member of our society who bought her, so through weakness I gave way, and wrote it, but at the Executing

it I was so Afflicted in my mind, that I said before my Master and the friend, that I believed Slavekeeping to be a practice inconsistent with the Christian Religion. This in some degree abated my uneasiness, yet as often as I reflected seriously upon it I thought I should have been clearer, if I had desired to be Excused from it, as a thing against my conscience, for such it was. [And] some time after this a young man of our Society, spake to me to write [an instrument of Slavery], he having taken a Negro into his house. I told him I was not easie to write it, for though many [people] kept slaves in our society as in others, I still believed the practice was not right, and desired to be excused from doing the writing. I spoke to him in good will, and he told me, that keeping slaves was not altogether agreeable to his mind, but that the slave being a gift made to his wife, he had accepted of her.

CHAPTER III

Until the year 1756, I continued to retail goods besides following my trade as a Taylor, about which time I grew uneasy on account of my business growing too cumbersome. I began with selling timings for garments, and from thence proceeded to sell cloaths and linens, and at length having got a considerable shop of goods, my trade increased every year, and the road to large business appeared open. But I felt a Stop in my mind.

Through the Mercies of the Almighty I had in a good degree learned to be content with a plain way of living. I had but a small family my outward Affairs had been prosperous and, on serious reflection I believed Truth did not require me to engage in much cumbering affair. It had generally been my practice to buy and sell things really usefull. Things that served chiefly to please the vain mind in people, I was not easie to trade in; seldom did it, and whenever I did, I found it weaken me as a Christian.

The increase of business became my burthen, for though my natural inclination was towards merchandize yet I believed Truth required me to live more free from outward cumber. There was now a strife in my mind betwixt the two, and in this exercise my prayers were

put up to the Lord, who Graciously heard me, and gave me a heart resigned to his Holy will, I then lessened my outward business, and as I had opportunity told my customers of my intention that they might consider what shop to turn to and so in a while, wholly laid down merchandize, following my trade as a Taylor, myself only, having no prentice I also had a nursery of Apple trees, in which I spent a good deal of time, how'ng, grafting, triming & Inoculating

In merchandize it is the custom, where I lived, to sell chiefly on credit, and poor people often get in debt, & when payment is expected haveing not wherewith to pay, & so their creditors often sue for it at Law having often observed occurrences of this kind, I found it good for me to advise poor people to take such as were most useful & not costly

In the time of trading I had an opportunity of seeing that a too liberal use of Spirituous liquors, and the Custom of wearing too costly apparel, led some people into great inconveniences and these two things appear to be often connected one with the other, for by not attending to that use of things which is consistent with Universal Righteousness, there is a [necessary] increase of Labour which extends beyond what our Heavenly Father intends for us and by great labour, and often by much sweting in the heat there is, even among such who are not drunkards, a craving of some liquor to revive the spirits That partly by the wanton, Luxurious drinking of some, and partly by the drinking of others, led to it through immoderate labour, verry great quantities of Rum are annually expended in our Colonies, of which we should have no need, did we steadily Attend to pure Wisdom

Where men take pleasure in feeling their minds elevated with strong drink, and so indulge this appetite as to disorder their understanding, neglect their duty as members in a family or civil society, and cast off all pretence to Religion, their case is much to be pittied, And where such whose lives are for the most part regular, and whose Examples have a strong influence on the minds of others, Adhere to some customs which powerfully draw toward the use of More strong liquor than pure wisdom [directeth the Use of,] this allso, as it hinders the spreading of the Spirit of meekness, and Strengthens the hands of the more Excessive drinkers, is a case to be lamented

As [the least] degree of luxury hath some connection

with evil, for those who profess to be disciples of Christ, and are looked upon as leaders of the people, to have that mind in them which was also in Him, & so stand 50 separate from every wrong way, is a means of help to the weaker As I have sometimes been much spent in the heat, and taken spirits to revive me I have found by Experience that the mind is not so calm in such circumstances, nor so fitly disposed for Divine meditation, as when all such extreams are avoided, and I have felt an increasing Care to attend to that Holy Spirit which sets right bounds to our desires, and leads those who faithfully follow it to apply all the gifts of Divine Providence to the purposes for which they were intended. 60 Did such who have the care of great Estates, attend with singleness of heart to this Heavenly Instructor, which so opens and enlarges the mind that Men love their neighbours as themselves, They would have wisdom given them to manage, without ever finding occasion to employ some people in the Luxuries of life, or to make it necessary for others to labour too hard But for want of regarding steadily this Principle of Divine love, a selfish Spirit takes place in the minds of people, which is attended with darkness & manifold confusions in the 70 world

In the Course of my Tradeing, being somewhat affected at the Various Law Suits about collecting Money which I saw going forward, On aplying to a Constable, he gave me a List of his proceedings for one year as follows, to wit

Served 267 Warrants, 103 Summonses, and 17 Executions! As to Writs Served by the Sheriff, I got no account of them

I once had a Warrant for an Idle Man, who I be- 80 lieved was about to run away, which was the only time I applied to the Law to recover Money

Through trading in things Usefull is an honest employ, yet through the great number of Superfluities which are commonly bought and sold, and through the corruptions of the times, they who apply to merchandize for a living, have great need to be well experienced in that precept which the prophet Jeremiah laid down for Balaac, his scribe "Seekest thou great things for thyself? seek them not" . . .

1772? - 1774 90

From

A Plea for the Poor

A Word of Remembrance and Caution to the Rich (Dublin, 1793) first appeared under Woolman's simpler title in 1837. It was probably written during the winter of 1763-1764. None of Woolman's essays has attracted more attention recently, none shows more clearly the amazing breadth of his humanitarianism. Abridged and published as Fabian Tract No. 79 (January 1898), it eventually had wide circulation in England, the editor remarking that it contains "the most connected account" of Woolman's views on social questions. The same editor described Woolman as "the voice in the wilderness, the John the Baptist of the Gospel of Socialism." In its entirety, the essay consists of sixteen chapters. The first two, reprinted here, give Woolman's general position, in the others he discusses the responsibilities of the wealthy, the dangers of overwork and avarice, the economic origin of war, the injustice of primogeniture, the proper education of children, and the duties of masters to their servants and slaves.

CHAPTER I

WEalth desired for its own sake obstructs the increase of Virtue, and large possessions in the hands of selfish men have a bad tendency, for by their means too small a number of people are employed in things usefull, and therefore some of them are necessitated to labour too hard, while others would want business to earn their Bread, were not employments invented, which having no real use, serve only to please the vain mind.

Rents set on lands are often so high, that persons
10 who have but small substance are straitened in hiring a plantation and while Tenants are healthy, and prosperous in business, they often find Occasion to labour harder than was intended by our Gracious Creator.

Oxen & Horses are often seen at work, when through

Heat & too much labour, their eyes, and the emotion of their Bodies manifest that they are oppressed. Their loads in Wagons are frequently so heavy, that when weary with halling it far, their drivers find occasion in going up Hills, or through mire, to raise their spirits by whipping to get forward. Many poor people are so thronged in their business, that it is difficult for them to provide Shelter suitable for their animals, in great storms. These things are common when in health; but through Sickness and inability to labour through loss of Creatures, and miscarriage in business, many are straitened, & much of their increase goes to pay rent or Interest, that they have not wherewith to hire so much as their case requires. Hence one poor woman in attending on her Children, providing for her family, & helping the sick, does as much business as would for the time be Suitable Employment for two or three, and honest persons are often straitened to give their children suitable learning.

The money which the wealthy receive from the poor, who do more than a proper share of business in raising it, is frequently paid to other poor people for doing business which is foreign to the true use of things.

Men who have large possessions, & live in the spirit of Charity, who carefully inspect the circumstance of those who occupy their Estates, and, regardless of the Customs of the times, regulate their demands agreeable to Universal Love, these by being Righteous on a principle, do good to the poor without placing it as an act of bounty. Their Example in avoiding superfluities tends to incite others to moderation, their goodness, in not exacting what the Laws or Customs would support therein, tends to open the Channel to moderate Labour in useful Affairs, and to discourage those branches of business which have not their foundation in true wisdom.

To be busied in that which is but vanity, & serves on to please the unstable mind, tends to an alliance with those who promote that vanity, and is a snare in which many poor tradesmen are entangled.

To be employed in things connected with Virtue, most agreeable with the Character and Inclination of an honest man.

Text: Mrs. Gummere's edition • 7 having . . . use. The objection of luxury, frequent in Woolman's writings, and a characteristic eighteenth-century notion, should be compared with that by Timothy Dwight, p.

While industrious frugal people are borne down with poverty, and oppressed with too much labour in useful things, the way to apply money, without promoting pride and Vanity, remains open to such who truly Sympathize with them in their various Difficulties.

CHAPTER II

The Creator of the earth is the owner of it. He gave us being thereon, and our nature requires nourishment, which is the produce of it. As he is kind and merciful we, as his creatures, while we live answerable to the design of our creation, are so far Entitled to a convenient Subsistence, that no man may justly deprive us of it.

By the agreements and Contracts of Our Fathers and predecessors, and by doings and proceedings of our own, some claim a much greater share of this world than others. and while those possessions are Faithfully Improved to the good of the whole, it consists with Equity. But he who with a view to self-exaltation, causeth some with their domestick Animals to labour immoderately, and, with the monies arising to him therefrom, employs others in the Luxuries of Life, Acts, contrary to the Gracious designs of Him who is the true owner of the

Earth, nor can any possessions, either acquired or derived from Ancestors, justify such conduct.

Goodness Remains to be goodness, and the direction of pure wisdom is obligatory on all Reasonable Creatures that Laws and Customs are no further a Standard for our proceedings than as their Foundation is on Universal Righteousness.

Though the poor Occupy our Estates by a bargain, to which they in their poor Circumstances agreed, and we ask even less than a punctual fulfilling of their agreement, yet if our views are to lay up riches, or to live in conformity to customs which have not their Foundation in the Truth, and our demands are such as requires greater Toyl, or application to business in them, than is Consistent with pure Love, we invade their rights as Inhabitants of that World, of which a good and gracious God is proprietor, under whom we are Tennants

Were all superfluities, and the desire of outward greatness laid aside, and the right use of things universally attended to, Such a number of people might be employed in things usefull, as that moderate labour, with the Blessing of Heaven, would answer all good purposes relating to people and their Animals, and a Sufficient number have time to attend to proper Affairs of Civil Society.

1763-1764? • 1793

THE REVOLUTION: Adams, Boucher, Singers of the Revolution, Paine, Jefferson

John Adams

1735 • 1826

No man, not even Washington, served the cause of American independence and political stability longer or more faithfully than John Adams. Because he was tactless and sometimes ungracious, especially when he was out of reach of his wife, the sprightly Abigail, he was not a very good political strategist or diplomat and never rivaled Washington or Jefferson in the hearts of

his countrymen. Even his enemies, however, respected his honest devotion to what he conceived to be the best interests of the nation. His reward he probably thought unequal to his merit, for his invaluable labors as a public servant culminated in a single stormy term as second President of the United States, to which post he was elected by the slender margin of three electoral votes.

Adams was born in 1735, at Braintree, Massachusetts, to an old New England farming family. He went to Harvard with one eye on the ministry, and after his graduation actually read theology while teaching a school, as was the custom of studious products of that institution. He soon turned, however, to the law, and at thirty was an assured success, a popular leader in the agitation for the repeal of the Stamp Act. At forty, as a member of the Continental Congress, he was instrumental in the appointment of Washington as commander in chief of the army. With Jefferson and Franklin, he was on the committee to draft the Declaration of Independence. At home and in France he worked tirelessly to supply the American troops with the matériel of war, although his distrust of the military, and especially of the officer caste, was so great that it is said to have been a contributing cause of Benedict Arnold's treason. He sat at the peace table in Paris and stayed abroad for a time thereafter as minister to England. His two terms as vice-president under Washington and the years of his own presidency were followed by a full quarter century in retirement. During this time he read, wrote, and observed none too happily the continuing struggle between the forces of aristocracy and of democracy for control of the government which he had played a large part in creating. He died on the same day as Thomas Jefferson, the Fourth of July, 1826.

As a writer, Adams is remembered for his letters, those to his wife forming a particularly readable series; for his diary, an important source document for the

social historians; for an autobiography, and for a series of works on government, most of them in the form of essays. His *Dissertation on the Canon and Feudal Law* (1765) and *Novanglus: or, a History of the Dispute with America* (1775), which appeared periodically in the *Boston Gazette*, display the fear of "ecclesiastical and civil tyranny" that characterized most of the Whig literature during the years before the Declaration of Independence. *A Defence of the Constitutions of Government of the United States of America* (1787-1788) and *Discourses on Davila* (1790) expound the unpopular conviction of the Federalists that a stable government requires such restraint on the hasty execution of the will of majorities as is provided by an aristocratic senate elected either for life or for long terms.

"Honest John Adams," as one biographer has called him, remains an object lesson for any student of politics. Sure of his own opinions and of the integrity of his own motives, he had little talent for compromise and flattery and the undercover manipulation of forces, activities which are likely to absorb the attention of the "practical" politician. As the party system took shape in the early days of the republic, the unbending Adams failed to work amicably with Alexander Hamilton, a political realist who was Washington's chief confidant and the actual head of the Federalists. Honesty and admini-

trative ability Adams had, but they were not enough to bring him genuine leadership. Partly because of disappointment and partly because of his temperament and conviction, Adams grew more conservative as he grew older—a not uncommon pattern of development among revolutionaries who succeed. His growing fear of the masses estranged him temporarily from his friend Jefferson, who shared his love for the classics and for philosophy. In their retirement the two men were reconciled and exchanged lengthy letters on their com-

mon interests, but fundamentally they were far apart. Jefferson never lost his faith in the common man; John Adams came more and more to place his hope in carefully planned institutions

From

Novanglus

Between December 1774 and April 1775 seventeen papers over the signature of "Massachusettensis" ("A Massachusetts Man") appeared in the *Massachusetts Gazette and Post Boy*. They are regarded as the best exposition of the Tory arguments. As Adams says in his autobiography, they were "well written, abounded in wit, discovered good information, and were conducted with a subtlety of art and address wonderfully calculated to keep up the spirits of their party, to depress ours, to spread intimidation, and to make proselytes among those whose principles and judgments give way to their fears; and these compose at least one third of mankind." He tells us in the same paragraph that as week after week went by without an answer to them he "began at length to think seriously of the consequences"; elsewhere he remarks that he "instantly resolved to enter the lists." The result, in any case, was the series signed "Novanglus" ("A New Englander") in the *Boston Gazette*. At this period in his life, Adams was a skillful debater rather than a polished political essayist, and he combined legalistic argument with the usual appeals to the anti-Catholic and antimonarchical prejudices of his New England audience. In the revelation of these antipathies and in the citation of historical precedents and

analogies, Adams' papers are typical of the great mass of Whig writing. "Coarse and rough as they are, like everything else that has ever been published by me, who never had time to polish, correct, or transcribe any thing," they were reprinted almost at once in Boston, New York, and London. Unquestionably they contributed mightily to the determination of the patriots to resist the encroachment on their liberties

ADDRESSED TO THE INHABITANTS OF THE
COLONY OF MASSACHUSETTS BAY,
JANUARY 23, 1775

My Friends,

A writer, under the signature of Massachusettensis, has addressed you, in a series of papers, on the great national subject of the present quarrel between the British administration and the Colonies. As I have not in my possession more than one of his Essays, and that is in the *Gazette* of December 26, I will take the liberty, in the spirit of candor and decency, to bespeak your attention upon the same subject

There may be occasion to say very severe things, ¹⁰ before I shall have finished what I propose, in opposition to this writer, but there ought to be no reviling. *Rem ipsam dic, mitte male loqui*, which may be justly

Text the edition of *Novanglus* and *Massachusettensis*, published at Boston in 1819, but the punctuation has been simplified and a few typographical errors corrected by reference to the text printed in Vol. IV of the *Works*. • 2 *Massachusettensis*, Daniel Leonard (1740-1829), a prominent lawyer of Boston, who left with the British army in 1776. Until 1821, Adams believed that his opponent was Jonathan Sewall, a close friend

translated, speak out the whole truth boldly, but use no bad language.

It is not very material to enquire, as others have done, who is the author of the speculations in question. If he is a disinterested writer, and has nothing to gain or to lose, to hope or to fear, for himself more than other individuals of your community; but engages in this controversy from the purest principles, the noblest motives of benevolence to men, and of love to his country, he ought to have no influence with you, further than truth and justice will support his argument. On the other hand, if he hopes to acquire or preserve a lucrative employment, to screen himself from the just detestation of his countrymen, or whatever other sinister inducement he may have, as far as the truth of facts and the weight of argument are in his favor, he ought to be duly regarded.

He tells you "that the temporal salvation of this province depends upon an entire and speedy change of measures, which must depend upon a change of sentiments respecting our own conduct and the justice of the British nation."

The task, of effecting these great changes, this courageous writer has undertaken in a course of publications in a newspaper. *Nil desperandum* is a good motto, and *Nil admirari*, is another. He is welcome to the first, and I hope will be willing that I should assume the last. The public, if they are not mistaken in their conjecture, have been so long acquainted with this gentleman, and have seen him so often disappointed, that if they were not habituated to strange things, they would wonder at his hopes, at this time to accomplish the most unpromising project of his whole life. In the character of Philanthrop, he attempted to reconcile you to Mr. Bernard. But the only fruit of his labor was, to expose his client to more general examination, and consequently to more general resentment and aversion. In the character of Philalethes, he essayed to prove Mr. Hutchinson a patriot and his letters not only innocent, but meritorious. But the more you read and considered, the more you were convinced of the ambition and avarice, the simulation and dissimulation, the hypocrisy and perfidy of that destroying angel.

This illfated and unsuccessful, though persevering writer, still hopes to change your sentiments and conduct—by which it is supposed that he means to convince you that the system of Colony administration, which has been pursued for these ten or twelve years past, is a wise, righteous and humane plan; that Sir

Francis Bernard and Mr. Hutchinson, with their connections, who have been the principal instruments of it, are your best friends,—and that those gentlemen in this province, and in all the other Colonies, who have been in opposition to it, are from ignorance, error, or from worse and baser causes, your worst enemies.

This is certainly an inquiry that is worthy of you, and I promise to accompany this writer, in his ingenious labours to assist you in it. And I earnestly intreat you, as the result of all shall be, to change your sentiments or persevere in them, as the evidence shall appear to you, upon the most dispassionate and impartial consideration, without regard to his opinion or mine.

He promises to avoid personal reflections, but to penetrate the arcana, and expose the wretched policy of the whigs. The cause of the whigs is not conducted by intrigues at a distant court, but by constant appeals to a sensible and virtuous people, it depends intirely on their good will, and cannot be pursued a single step without their concurrence, to obtain which, all designs, measures and means, are constantly published to the collective body. The whigs therefore can have no arcana, but if they had, I dare say, they were never so left, as to communicate them to this writer, you will therefore be disappointed if you expect from him any thing which is true, but what has been as public as records and newspapers could make it.

I, on my part, may perhaps in a course of papers, penetrate arcana too. Shew the wicked policy of the Tories—trace their plan from its first rude sketches to its present complete draught. Shew that it has been much longer in contemplation, than is generally known,—who were the first in it—their views, motives and secret springs of action—and the means they have employed. This will necessarily bring before your eyes many characters, living and dead. From such a research and detail of facts, it will clearly appear, who were the aggressors—and who have acted on the defensive from first to

23 *Nil desperandum*, never despair • 24 *Nil admirari*, wonder at nothing • 32 Mr. Bernard. See note, p. 272 • 36 Philalethes, lover of secrecy • 36 Mr. Hutchinson, Thomas Hutchinson (1711-1780), lieutenant governor, 1758-1771, and last royal governor of Massachusetts, 1769-1773. A native Bostonian, Tory by position and conviction, he bore the brunt of popular opposition to the Stamp and Tea Acts. His "letters," written in confidence to a British administrator, and proposing strong measures to suppress colonial discontent, came into Franklin's hands and were published in 1772, intensifying Hutchinson's difficulties. Later generations have admired his carefully written history of Massachusetts.

last—who are still struggling, at the expense of their ease, health, peace, wealth and preferment, against the encroachments of the tories on their country—and who are determined to continue struggling, at much greater hazards still, and, like the Prince of Orange, resolve never to see its entire subjection to arbitrary power, but rather to die fighting against it, in the last ditch.

It is true, as this writer observes, "that the bulk of the people are generally, but little versed in the affairs of State; that they left the affairs of government where accident has placed them." If this had not been true, the designs of the tories had been many years ago entirely defeated. It was clearly seen, by a few, more than ten years since, that they were planning and pursuing the very measures, we now see executing. The people were informed of it, and warned of their danger. But they had been accustomed to confide in certain persons, and could never be persuaded to believe, until prophecy became history. Now they see and feel, that the horrible calamities are come upon them, which were foretold so many years ago, and they now sufficiently execrate the men who have brought these things upon them. Now alas! when perhaps it is too late. If they had withdrawn their confidence from them in season, they would have wholly disarmed them.

The same game, with the same success, has been played in all ages and countries, as Massachusettensis observes. When a favourable conjuncture has presented, some of the most intriguing and powerful citizens have conceived the design of enslaving their country, and building their own greatness on its ruins. Philip and Alexander, are examples of this in Greece—Cæsar in Rome—Charles the fifth in Spain—Louis the eleventh in France—and ten thousand others.

"There is a latent spark in the breasts of the people capable of being kindled into a flame, and to do this has always been the employment of the disaffected." What is this latent spark? The love of Liberty? *a Deo hominis est indita naturæ*. Human nature itself is evermore an advocate for liberty. There is also in human nature, a resentment of injury, and indignation against wrong. A love of truth and a veneration for virtue.

These amiable passions, are the "latent spark" to which those whom this writer calls the "disaffected" apply. If the people are capable of understanding, seeing and feeling the difference between true and false, right and wrong, virtue and vice, to what better principle can the friends

of mankind apply, than to the sense of this difference.

Is it better to apply, as this writer and his friends do, to the basest passions in the human breast—to their fear, their vanity, their avarice, ambition, and every kind of corruption? I appeal to all experience, and to universal history, if it has ever been in the power of popular leaders, uninvested with other authority than what is conferred by the popular suffrage, to persuade a large people, for any length of time together, to think themselves wronged, injured, and oppressed, unless they really were, and saw and felt it to be so.

"They," the popular leaders, "begin by reminding the people of the elevated rank they hold in the universe as men, that all men by nature are equal, that kings are but the ministers of the people, that their authority is delegated to them by the people, for their good, and they have a right to resume it, and place it in other hands, or keep it themselves, whenever it is made use of to oppress them. Doubtless there have been instances, when these principles have been inculcated to obtain a redress of real grievances, but they have been much oftener perverted to the worst of purposes."

These are what are called revolution principles. They are the principles of Aristotle and Plato, of Livy and Cicero, and Sydney, Harrington and Locke. The principles of nature and eternal reason. The principles on which the whole government over us, now stands. It is therefore astonishing, if any thing can be so, that writers, who call themselves friends of government, should in this age and country, be so inconsistent with themselves, so indiscreet, so immodest, as to insinuate a doubt concerning them.

Yet we find that these principles stand in the way of Massachusettensis, and all the writers of his class. The veteran, in his letter to the officers of the army, allows to be

5 the Prince of Orange, William I of Orange (1533-1584), deliverer of the Netherlands from Spanish rule. His "justification" for rebellion was issued in 1568. • 38 a Deo naturæ, [it] is instilled in the nature of man by God. • 71 Aristotle. • Locke, Aristotle, Plato, Cicero, and John Locke hold important places in the history of political philosophy. Locke's *Treatises on Government* (1690) were the chief source of the natural-rights theory which was used to justify the Revolution. Algernon Sidney (1622-1682) and James Harrington (1611-1677) were English republicans, authors of *Discourses on Government* (1698) and *Oceana* (1656), respectively. The Roman historian Livy (59 B.C.-17 A.D.) described the downfall of the Roman republic. • 81 The veteran. Adams alludes to an anonymous pamphlet of 1774 "A Letter from a Veteran to the Officers of the Army, Encamped at Boston."

noble, and true, but says the application of them to particular cases is wild and utopian. How they can be in general true, and not applicable to particular cases, I cannot comprehend. I thought their being true in general, was because they were applicable in most particular cases.

Gravity is a principle in nature. Why? because all particular bodies are found to gravitate. How would it sound to say, that bodies in general are heavy, yet to apply this to particular bodies and say, that a guinea, or a ball is heavy, is wild, &c—"Adopted in private life," says the honest amiable veteran, "they would introduce perpetual discord." This I deny, and I think it plain, that there never was an happy private family where they were not adopted. "In the State perpetual discord." This I deny, and affirm that order, concord and stability in this State, never was or can be preserved without them. "The least failure in the reciprocal duties of worship and obedience in the matrimonial contract would justify a divorce." This is no consequence from those principles,—a total departure from the ends and designs of the contract it is true, as elopement and adultery, would by these principles justify a divorce, but not the least failure, or many smaller failures in the reciprocal duties, &c. "In the political compact, the smallest defect in the Prince a revolution"—By no means. But a manifest design in the Prince, to annul the contract on his part, will annul it on the part of the people. A settled plan to deprive the people of all the benefits, blessings and ends of the contract, to subvert the fundamentals of the constitution, to deprive them of all share in making and executing laws, will justify a revolution.

The author of a "*Friendly Address to all reasonable Americans*," discovers his rancour against these principles in a more explicit manner, and makes no scruples to advance the principles of Hobbs and Filmer, boldly, and to pronounce damnation, *ore rotundo*, on all who do not practice implicit passive obedience to an established government, of whatever character it may be. It is not reviling, it is not bad language, it is strictly decent to say, that this angry bigot, this ignorant dogmatist, this foul mouthed scold, deserves no other answer than silent contempt. Massachusetts and the veteran, I admire, the first for his art, the last for his honesty.

Massachusetts is more discreet than either of the others; sensible that these principles would be very troublesome to him, yet conscious of their truth, he has neither admitted nor denied them. But we have a right

to his opinion of them, before we dispute with him. He finds fault with the application of them. They have been invariably applied in support of the revolution and the present establishment—against the Stuart's, the Charles' and the James',—in support of the reformation and the Protestant religion, against the worst tyranny that the genius of toriyism has ever yet invented, I mean the Roman superstition. Does this writer rank the revolution and present establishment, the reformation and Protestant religion among his worst of purposes? What "worse purpose" is there than established tyranny? Were these principles ever inculcated in favor of such tyranny? Have they not always been used against such tyrannies, when the people have had knowledge enough to be apprized of them, and courage to assert them? Do not those who aim at depriving the people of their liberties, always inculcate opposite principles, or discredit these

"A small mistake in point of policy," says he, "often furnishes a pretence to libel government and persuade the people that their rulers are tyrants, and the whole government, a system of oppression." This is not only untrue, but inconsistent with what he said before. The people are in their nature so gentle, that there never was a government yet, in which thousands of mistakes were not overlooked. The most sensible and jealous people are so little attentive to government, that there are no instances of resistance, until repeated, multiplied oppressions have placed it beyond a doubt, that their rulers had formed settled plans to deprive them of their liberties; not to oppress an individual or a few, but to break down the fences of a free constitution, and deprive the people at large of all share in the government and all the checks by which it is limited. Even Machiavel

6 Gravity . . . nature. The context here suggests Adams' knowledge of Newtonian physics. He was not the only thinker of his time who saw an analogy between the laws of attraction and the proper balance of powers in government. • 32 "*Friendly Address . . .*," a pamphlet published in 1774, by Myles Cooper (1735-1785), Loyalist president of King's College (now Columbia University). • 35 Hobbs and Filmer, the chief English exponents of political absolutism. The *Leviathan* (1650) of Thomas Hobbes (1588-1679) was a powerful argument for monarchy as a political necessity, the *Patriarcha* (1680) of Sir Robert Filmer (d. 1653) advocated the divine right of kings. See the arguments of Jonathan Boucher, pp. 314-320. • 36 *ore rotundo*, with well-turned speech. • 80 Machiavel, Niccolò Machiavelli (1469-1527), author of *Il Principe* (*The Prince*), a plea for a strong nation with a powerful ruler guided only by political expediency. He gave the English language the adjective *machiavellian*, meaning cunning, crafty, guileful, deceitful.

himself allows, that not ingratitude to their rulers, but much love is the constant fault of the people

This writer is equally mistaken, when he says, the people are sure to be losers in the end. They can hardly be losers, if unsuccessful, because, if they live, they can but be slaves, after an unfortunate effort, and slaves they would have been, if they had not resisted. So that nothing is lost. If they die, they cannot be said to lose, for death is better than slavery. If they succeed, their gains are immense. They preserve their liberties. The instances in antiquity, which this writer alludes to, are not mentioned, and therefore cannot be answered, but that in the country from whence we are derived, is the most unfortunate for his purpose that could have been chosen. The resistance to Charles the First and the case of Cromwell, no doubt he means. But the people of England, and the cause of liberty, truth, virtue and humanity, gained infinite advantages by that resistance. In all human probability, liberty civil and religious, not only in England but in all Europe, would have been lost. Charles would undoubtedly have established the Romish religion and a despotism as wild as any in the world. And as England had been a principal bulwark, from that period to this, of civil liberty and the Protestant religion in all Europe, if Charles' schemes had succeeded, there is great reason to apprehend that the light of science would have been extinguished, and mankind drawn back to a state of darkness and misery like that which prevailed from the fourth to the fourteenth century. It is true and to be lamented that Cromwell did not establish a government as free, as he might and

ought, but his government was infinitely more glorious and happy to the people than Charles'. Did not the people gain by the resistance to James the second. Did not the Romans gain by the resistance to Tarquin? Without that resistance and the liberty that was restored by it, would the great Roman orators, poets and historians, the great teachers of humanity and politeness, the pride of human nature, and the delight and glory of mankind for seventeen hundred years, ever have existed? Did not the Romans gain by resistance to the Decemvirs? Did not the English gain by resistance to John, when Magna Charta was obtained? Did not the seven united provinces gain by resistance to Philip, Alva, and Granvell? Did not the Swiss Cantons, the Genevans and Grissons, gain by resistance to Albert and Grisler?

NOVANGLUS

1775

35 Tarquin, the Proud (d. 495 B.C.), deposed by the Roman people, supposedly because of his son's rape of Lucretia (see Shakespeare's *The Rape of Lucrece*). • 42 Decemvirs, commissioners appointed (451 B.C.) to frame a code of laws for Rome. When they sought to establish an oligarchy, the people rose and restored the old form of government. • 44 Philip . . . Granvell, Philip II (1527-1598), King of Spain, the Duke of Alva (1508-1582), and Antoine de Perrenot, Cardinal de Granvelle (1517-1586). Their combined efforts to stamp out Protestant heretics resulted in the formation of the Dutch republic. • 46 Grissons, Grisons, inhabitants of the large eastern canton of Switzerland. • 46 Albert and Grisler, Albert I (1248-1308), Duke of Austria, and (probably) Herman Gessler, the tyrannical Austrian governor or bailiff of Uri, who supposedly ordered William Tell to shoot the famous apple from his son's head. The history of the origins of the Swiss confederation is largely legendary.

Jonathan Boucher

1738 • 1804

In August 1775, about to leave America for England, Jonathan Boucher broke off his friendship with George Washington, whose stepson he had taught. "We have

now each of us," he wrote, "taken and avowed our side, and with such ardour as becomes men who feel themselves to be in earnest with their convictions. That we

should both be in the right is impossible, but that we both think we are we must in common candour allow. . . . There cannot be anything named, of which I am more strongly convinced than I am that all those who are promoting the present apparently popular measures are the true enemies of their country" Boucher was, in other words, a Tory of strong convictions, because he was also outspoken he preached for more than six months in Maryland with two loaded pistols close at hand for protection from his Whig congregation. He remains perhaps the most colorful representative of his party.

Boucher arrived in Virginia in 1759, when he was twenty-one. He had had a rather haphazard education for schoolmastering, but served as a private tutor for a time at Port Royal on the Rappahannock, and for most of his sixteen years in America taught the sons of well-to-do gentlemen. In 1762, however, he returned briefly to England for ordination to the ministry of the established church, and thereafter held livings in Hanover and Carolina Counties in Virginia and at Annapolis and in Prince George's County in Maryland. He found Annapolis "the genteelest town in North America" and won fame there as a wit and clubman. The parish in the western part of the province was more lucrative, however, and Boucher, who had married a wealthy woman in 1772, settled on a large plantation on

the Potomac in 1774, prepared to become a patriarchal vicar and slaveholder.

Almost at once he was in trouble, partly because of his aristocratic life and views, partly because of his stubborn refusal to compromise with his principles. He stood for the King, right or wrong; he declined to preach in behalf of the people of Boston, when contributions were sought for their relief, he was charged with hostility to the interests of America, and tried by a provincial committee which he regarded as illegal even though it acquitted him. Arrogant and opinionated, he was convinced that nine out of ten Americans were against separation from England and that the disturbances were the work of lawyers, Presbyterians, and blackguards.

After his return to England he was given a government pension as partial compensation for his loss of property in America. With this, and some income as curate, teacher, and miscellaneous writer, he eked out a living until he became vicar of Epsom in Surrey in 1785. He died there nineteen years later.

Reminiscences of an American Loyalist, 1738-1789: Being the Autobiography of the Revd Jonathan Boucher, ed. Jonathan Bouchier, Boston, 1925

From

A View of the Causes and Consequences of the American Revolution

A View of the Causes and Consequences of the American Revolution: in Thirteen Discourses, Preached in North America Between the Years 1763 and 1775 (London, 1797) is probably the fullest defense of absolutism

by an American Tory. It was dedicated to George Washington, and its thirteen sermons, accompanied by voluminous and digressive notes, were preceded by a ninety-page "historical" Preface in which Boucher defended slavery, deplored schism, urged an American episcopate, attacked proponents of disestablishment, and in general complained of the degeneracy of modern times. Although Boucher by the time of publication recognized the eclipse of his political convictions and was moderately willing to let bygones be bygones, he evidently hoped to demonstrate the fallacy of republican principles. His Preface recommended a federal union, based on consanguinity and mutual interest, among Great Britain, the United States, and the British settlements in India and Australia. "That towering prospect of universal Monarchy," he wrote, "for the sake of which France, for centuries past, has convulsed all Europe, and for which she too probably will continue to convulse

it for centuries to come, may thus be realized; and this not only without injury or danger to the rest of the world, but without exciting the apprehension of any. For such an universal Monarchy would be the sure harbinger of an universal Peace. Its strength would be so far beyond all possibility of competition, that it could have nothing to dread from any assailants."

Three of the sermons in the volume were preached in Virginia between 1763 and 1771, the others, in Maryland. The one from which the following selection is taken was an answer to Jacob Duché's *The Duty of Standing Fast in Our Spiritual and Temporal Liberties* (Philadelphia, 1775) and is the twelfth of the series. Boucher entitled it "On Civil Liberty; Passive Obedience, and Non-Resistance." The presentation of political philosophy from the pulpit was not extraordinary in the Revolutionary period, but few preachers printed their sermons with such lengthy notes as Boucher's. Not all of them have been included here.

[*Galatians, ch. v. ver. 1. Stand fast, therefore, in the liberty wherewith Christ hath made us free.*]

In the infancy of Christianity, it would seem that some rumour had been spread (probably by Judas of Galilee, who is mentioned in the Acts that the Gospel was designed to undermine kingdoms and commonwealths, as if the intention of our Saviour's first coming had been the same with that which is reserved for the second, viz to *put down all rule, and all authority, and all power*, On this supposition the apparent solicitude of our Saviour and his Apostles, in their frequent and earnest recommendation of submission to *the higher powers*, is easily and naturally accounted for. Obedience to Government is every man's duty, because it is every man's interest: but it is particularly incumbent on Christians, because (in addition to its moral fitness) it is enjoined by the positive commands of God: and therefore, when Christians are disobedient to human ordinances, they are also disobedient to God. If the form of government under which the good providence of God has been pleased to place us be mild and free, it is our duty to enjoy it with

gratitude and with thankfulness, and, in particular, to be careful not to abuse it by licentiousness. If it be less indulgent and less liberal than in reason it ought to be, still it is our duty not to disturb and destroy the peace of the community, by becoming refractory and rebellious subjects, and *resisting the ordinances of God*. However humiliating such acquiescence may seem to men of warm and eager minds, the wisdom of God in having made it our duty is manifest. For, as it is the natural temper and bias of the human mind to be impatient under restraint, it was wise and merciful in the blessed Author of our religion not to add any new impulse to the natural force of this prevailing propensity, but, with the whole weight of his authority, altogether to discountenance every tendency to disobedience.

If it were necessary to vindicate the Scriptures for this their total unconcern about a principle which so many other writings seem to regard as the first of all human considerations, it might be observed, that, avoiding the vague and declamatory manner of such writings, and avoiding also the useless and impracticable subtleties of metaphysical definitions, these Scriptures have better consulted the great general interests of mankind, by summarily recommending, and enjoining a conscientious reverence for law whether human or divine. To respect the laws, is to respect liberty in the only rational sense in which the term can be used, for liberty consists in a subserviency to law. "Where there is no law," says Mr. Locke, "there is no freedom." The mere man of nature (if such an one there ever was) has no freedom *all his lifetime he is subject to bondage*. It is by being included within the pale of civil polity and government that he takes his rank in society as a free man.

Hence it follows, that we are free, or otherwise, as we are governed by law, or by the mere arbitrary will, or wills, of any individual, or any number of individuals. And liberty is not the setting at nought and despising established laws—much less the making of our own wills the rule of our own actions, or the actions of others—

Text the first and only edition (London, 1797) • 1 *In the infancy*. The exegesis of the text is omitted • 3 Acts, 'Ch v ver 37'—Boucher • 47 *subserviency to law*. A footnote quoting Cicero's oration in defense of Aulus Cluentius is omitted • 48 *Mr. Locke*, in the second of his *Treatises on Government* (1690), Chap. 6. For Locke, see note, p. 311

and not bearing (whilst yet we dictate to others) the being dictated to, even by the laws of the land; but it is the being governed by laws, and by law only. The Greeks described Eleutheria, or Liberty, as the daughter of Jupiter, the supreme fountain of power and law. And the Romans, in like manner, always drew her with the Pretor's wand, (the emblem of legal power and authority,) as well as with the cap. Their idea, no doubt, was, that liberty was the fair fruit of just authority, and that it
 10 consisted in men's being subjected to law. The more carefully well-devised restraints of law are enacted, and the more rigorously they are executed in any country, the greater degree of civil liberty does that country enjoy. To pursue liberty, then, in a manner not warranted by law, whatever the pretence may be, is clearly to be hostile to liberty and those persons who thus *promise you liberty*, are themselves *the servants of corruption*. . . .

True liberty, then, is a liberty to do every thing that is right, and the being restrained from doing any thing
 20 that is wrong. So far from our having a right to do every thing that we please, under a notion of liberty, liberty itself is limited and confined—but limited and confined only by laws which are at the same time both its foundation and its support. It can, however, hardly be necessary to inform you, that ideas and notions respecting liberty, very different from these, are daily suggested in the speeches and the writings of the times, and also that some opinions on the subject of government at large, which appear to me to be particularly loose and danger-
 30 ous, are advanced in the sermon now under consideration; and that, therefore, you will acknowledge the propriety of my bestowing some farther notice on them both.

It is laid down in this sermon, as a settled maxim, that the end of government is "the common good of mankind." I am not sure that the position itself is indisputable but, if it were, it would by no means follow that, "this common good being matter of common feeling, government must therefore have been instituted by com-
 40 mon consent." There is an appearance of logical accuracy and precision in this statement, but it is only an appearance. The position is vague and loose, and the assertion is made without an attempt to prove it. If by men's "common feelings" we are to understand that principle in the human mind called common sense, the assertion is either unmeaning and insignificant, or it is

false. In no instance have mankind ever yet agreed as to what is, or is not, "the common good." A form or mode of government cannot be named, which these "common feelings" and "common consent," the sole arbiters, as it seems, of "common good," have not, at one time or another, set up and established, and again pulled down and reprobated. What one people in one age have concurred in establishing as the "common good," another in another age have voted to be mischievous and big with ruin. The premises, therefore, that "the common good is matter of common feeling," being false, the consequence drawn from it, viz. that government was instituted by "common consent," is of course equally false.

This popular notion, that government was originally formed by the consent or by a compact of the people, rests on, and is supported by, another similar notion, not less popular, nor better founded. This other notion is, that the whole human race is born equal; and that no man is naturally inferior, or, in any respect, subjected to another; and that he can be made subject to another only by his own consent. The position is equally ill-founded and false both in its premises and conclusions. In hardly any sense that can be imagined is the position strictly true, but, as applied to the case under consideration, it is demonstrably not true. Man differs from man in every thing that can be supposed to lead to supremacy and subjection, *as one star differs from another star in glory*. It was the purpose of the Creator, that man should

4 Eleutheria. This information may be found in the popular *Cyclopaedia of Ephraim Chambers*, first published in 1728. More recent scholars give Eleutheria as the name for Jupiter in his political aspect. • 7 Pretor's wand, the fasces, a bundle of rods bound together with an ax, its blade protruding, symbol of authority of the praetor and other Roman magistrates. It survives in American official heraldry on the dime, for example. • 17 corruption . . . A paragraph on civil liberty, quoted from a sermon preached before the House of Lords, January 30, 1740, by Joseph Butler (1692-1752), bishop of Bristol and Durham, is omitted. • 30 sermon . . . consideration. Jacob Duché (1738-1798), Boucher's opponent, was chaplain of the Continental Congress, and a vociferous Whig. After the Declaration of Independence and the capture of Philadelphia by the British, Duché changed his opinions, and in a letter to Washington predicted defeat and urged a negotiated peace. Although he died in Philadelphia, he lived in exile in England from 1777 to 1792. • 36 indisputable. A long footnote, here omitted, quotes the opinions of Lancelot Andrewes (1555-1626), bishop of Winchester, John Selden (1584-1654), the jurist, and Robert Sanderson (1587-1663), bishop of Lincoln, to the effect that the good of the people is not the sole purpose or supreme law of government.

be social: but, without government, there can be no society; nor, without some relative inferiority and superiority, can there be any government. A musical instrument composed of chords, keys, or pipes, all perfectly equal in size and power, might as well be expected to produce harmony, as a society composed of members all perfectly equal to be productive of order and peace. It (according to the idea of the advocates of this chimerical scheme of equality) no man could rightfully *be compelled to come in* and be a member even of a government to be formed by a regular compact, but by his own individual consent; it clearly follows, from the same principles, that neither could he rightfully be made or compelled to submit to the ordinances of any government already formed, to which he has not individually or actually consented. On the principle of equality, neither his parents, nor even the vote of a majority of that society, (however virtuously and honourably that vote might be obtained,) can have any such authority over any man. Neither can it be maintained the acquiescence implies consent, because acquiescence may have been extorted from impotence or incapacity. Even an explicit consent can bind a man no longer than he chooses to be bound. The same principle of equality that exempts him from being governed without his own consent, clearly entitles him to recall and resume that consent whenever he sees fit; and he alone has a right to judge when and for what reasons it may be resumed.

Any attempt, therefore, to introduce this fantastic system into practice, would reduce the whole business of social life to the wearisome, confused, and useless task of mankind's first expressing, and then withdrawing, their consent to an endless succession of schemes of government. Governments, though always forming, would never be completely formed: for, the majority to-day, might be the minority to-morrow; and, of course, that which is now fixed might and would be soon unfixed. Mr. Locke indeed says, that, "by consenting with others to make one body-politic under government, a man puts himself under an obligation to every one of that society to submit to the determination of the majority, and to be concluded by it." For the sake of the peace of society, it is undoubtedly reasonable and necessary that this should be the case: but, on the principles of the system now under consideration, before Mr. Locke or any of his followers can have authority to say, that it actually is the case, it

must be stated and proved that every individual man, on entering into the social compact, did first consent, and declare his consent, to be concluded and bound in all cases by the vote of the majority. In making such a declaration, he would certainly consult both his interest and his duty, but at the same time he would also completely relinquish the principle of equality, and eventually subject himself to the possibility of being governed by ignorant and corrupt tyrants. Mr. Locke himself afterwards disproves his own position respecting this supposed obligation to submit to the "determination of the majority," when he argues that a right of resistance still exists in the governed: for, what is resistance but a recalling and resuming the consent heretofore supposed to have been given, and in fact refusing to submit to the "determination of the majority?" It does not clearly appear what Mr. Locke exactly meant by what he calls "the determination of the majority" but the only rational and practical public manner of declaring "the determination of the majority," is by law: the laws, therefore, in all countries, even in those that are despotically governed, are to be regarded as the declared "determination of a majority" of the members of that community, because, in such cases, even acquiescence only must be looked upon as equivalent to a declaration. A right of resistance, therefore, for which Mr. Locke contends, is incompatible with the duty of submitting to the determination of "the majority," for which he also contends.

It is indeed impossible to carry into effect any government which, even by compact, might be framed with this reserved right of resistance. Accordingly there is no

9 be compelled . . . in, Luke 14 23, a favorite sermon text in eighteenth-century America • 55 tyrants. The present government of France, having largely experienced the folly and danger of being consistent in pursuing this system of equality to its full extent, have now abandoned it, but so, however, as still to make a shew of it's being retained. They now, very justly, thus define their principle: *L'égalité consiste en ce que la loi est la même pour tous, soit qu'elle protège, soit qu'elle punisse*. [Equality consists in this that the law is the same for all, whether it protects, or whether it punishes.] Art. 3. Droits. But, after all the pomp and parade they have made about the liberality of their reforms, what is there in this more liberal than all mankind, in all ages, have thought and said, when they drew Justice blind, and balancing her even-poised scales, or indeed more liberal than we find pointedly expressed in the well-known clause of our own Magna Charta? —Boucher. (A quotation from the Magna Charta is omitted)

record that any such government ever was so formed. If there had, it must have carried the seeds of its decay in its very constitution. For, as those men who make a government (certain that they have the power) can have no hesitation to vote that they also have the right to unmake it, and as the people, in all circumstances, but more especially when trained to make and unmake governments, are at least as well disposed to do the latter as the former, it is morally impossible that there should be any thing like permanency or stability in a government so formed. Such a system, therefore, can produce only perpetual dissensions and contests, and bring back mankind to a supposed state of nature, arming every man's hand, like Ishmael's, against every man, and rendering the world an *aceldama*, or field of blood—Such theories of government seem to give something like plausibility to the notions of those other modern theorists, who regard all governments as invasions of the natural rights of men, usurpations, and tyranny. On this principle it would follow, and could not be denied, that government was indeed fundamentally, as our people are sedulously taught it still is, an evil. Yet it is to government that mankind owe their having, after their fall and corruption, been again reclaimed, from a state of barbarity and war, to the conveniency and the safety of the social state: and it is by means of government that society is still preserved, the weak protected from the strong, and the artless and innocent from the wrongs of proud oppressors. It was not without reason, then, that Mr. Locke asserted, that a greater wrong cannot be done to prince and people, than is done by "propagating wrong notions concerning government."

Ashamed of this shallow device, that government originated in superior strength and violence, another party, hardly less numerous, and certainly not less confident than the former, fondly deduce it from some imaginary compact. They suppose that, in the decline perhaps of some fabulous age of gold, a multitude of human beings, who, like their brother beasts, had hitherto ranged the forests, *without guide, or overseer, or ruler*—at length convinced, by experience, of the impossibility of living either alone with any degree of comfort or security, or together in society, with peace, without government, had (in some lucid interval of reason and reflection) met together in a spacious plain, for the express purpose of framing a government. Their first step must have been the transfer-

ring to some individual, or individuals, some of those rights which are supposed to have been inherent in each of them: of these it is essential to government that they should be divested, yet can they not, rightfully, be deprived of them, otherwise than by their own consent. No, admitting this whole supposed assembly to be perfectly equal as to rights, yet all agreed as to the propriety of ceding some of them, on what principles of equality is it possible to determine, either who shall relinquish such a portion of his rights, or who shall be invested with such new accessory rights? By asking another to exercise jurisdiction over me, I clearly confess that I do not think myself his equal, and by his consenting to exercise such authority, he also virtually declares that he thinks himself superior. And, to establish this hypothesis of a compact, it is farther necessary that the whole assembly should concur in this opinion—a concurrence so extremely improbable, that it seems to be barely possible. The supposition that a large concourse of people, in a rude and imperfect state of society, or even a majority of them, should thus rationally and unanimously concur to subject themselves to various restrictions, many of them irksome and unpleasant, and all of them contrary to all their former habits, is to suppose them possessed of more wisdom and virtue than multitudes in any instance in real life have ever shewn. Another difficulty respecting this notion may yet be mentioned. Without a power of life and death, it will, I presume, be readily admitted that there could be no government. Now, admitting it to be possible that men, from motives of public and private utility, may be induced to submit to many heavy penalties, and even to corporal punishment, inflicted by the sentence of the law, there is an insuperable objection to any man's giving to another a power over his life: this objection is, that no man has such a power over his own life, and cannot therefore transfer to another, or to others, be they few or many, on any conditions, a right which he does not himself possess. He only who gave life, can give the authority to take it away: and as such authority is essential to government, this argument seems very

14 *Ishmael's*, an allusion to Ishmael, the son of Nathaniah (Jeremiah 41), slayer of men by the scores • 15 *aceldama*, the field purchased by Judas with the thirty pieces of silver he received for betraying Christ, and perhaps the scene of Judas' suicide (see Acts 1:18)

decidedly to prove, not only that government did not originate in any compact, but also that it was originally from God

This visionary idea of a government by compact was, as Filmer says, "first hatched in the schools, and hath, ever since, been fostered by Papists, for good divinity" For some time, the world seemed to regard it merely as another Utopian fiction, and it was long confined to the disciples of Rome and Geneva, who, agreeing in nothing else, yet agreed in this. In an evil hour it gained admittance into the Church of England, being first patronized by her during the civil wars, by "a few miscreants, who were as far from being true Protestants, as true Subjects" Mankind have listened, and continue to listen to it with a predilection and partiality, just as they do to various other exceptionable notions, which are unfavourable to true religion and sound morals, merely from imagining, that if such doctrines be true, they shall no longer be subjected to sundry restraints, which, however wholesome and proper, are too often unpalatable to our corrupt natures. What we wish to be true, we easily persuade ourselves is true. On this principle it is not difficult to account for our thus eagerly following these *ignes fatui* of our own fancies or "feelings," rather than the steady light of the word of God, which, (in this instance as well as in others) lies under this single disadvantage, that it proposes no doctrines which may conciliate our regards by flattering our pride.

If, however, we can even resolve no longer to be bewildered by these vain imaginations still the interesting question presses on us, "Where," in the words of Plato, "where shall we look for the origin of government?" Let Plato himself instruct us. Taught then by this oracle of Heathen wisdom, "we will take our stations there, where the prospect of it is most easy and most beautiful." Of all the theories respecting the origin of government with which the world has ever been either puzzled, amused, or instructed, that of the Scriptures alone is accompanied by no insuperable difficulties.

It was not to be expected from an all-wise and all-merciful Creator, that, having formed creatures capable of order and rule, he should turn them loose into the world under the guidance only of their own unruly wills, that, like so many wild beasts, they might tear and worry one another in their mad contests for pre-eminence. His purpose from the first, no doubt, was, that men should *live*

godly and sober lives. But, such is the sad estate of our corrupted nature, that, ever since the Fall, we have been averse from good, and prone to evil. We are, indeed, so disorderly and unmanageable, that, were it not for the restraints and the terrors of human laws, it would not be possible for us to dwell together. But as men were clearly formed for society, and to dwell together, which yet they cannot do without the restraints of law, or, in other words, without government, it is fair to infer that government was also the original intention of God, who never decrees the end, without also decreeing the means. Accordingly, when man was made, his Maker did not turn him adrift into a shoreless ocean, without star or compass to steer by. As soon as there were some to be governed, there were also some to govern. and the first man, by virtue of that paternal claim, on which all subsequent governments have been founded, was first invested with the power of government. For, we are not to judge of the Scriptures of God, as we do of some other writings, and so, where no express precept appears, hastily to conclude that none was given. On the contrary, in commenting on the Scriptures, we are frequently called upon to find out the precept from the practice. Taking this rule, then, for our direction in the present instance, we find, that, copying after the fair model of heaven itself, wherein there was government even among the angels, the families of the earth were subjected to rulers, at first set over them by God. *for, there is no power, but of God; the powers that be are ordained of God.* The first father was the first king. and if (according to the rule just laid down) the law may be inferred from the practice, it was thus that all government originated, and monarchy is its most ancient form.

Little risque is run in affirming, that this idea of the patriarchal origin of government has not only the most and best authority of history, as far as history goes, to

2 originally from God. A long footnote citing Grotius is omitted. Boucher was evidently familiar with *De Juri Belli et Pacis* (1623), Bk. I, Chap. 3, wherein the Dutch legal philosopher expounded this doctrine.

• 5 Filmer, Sir Robert Filmer. See citation by John Adams, p. 312.

• 23 *ignes fatui*, lights over swampy grounds, supposedly caused by the combustion of marsh gas. Travelers lost at night were sometimes beguiled off their road by such lights, hence the figurative use.

• 31 Plato, *of Laws*, book III. —Boucher.

• 56 *intention of God*. A footnote quoting the *Convocation Book* (1690) of John Overall (1560-1619), bishop of Norwich, is omitted.

support it, but that it is also by far the most natural, most consistent, and most rational idea. Had it pleased God not to have interfered at all in the case, neither directly nor indirectly, and to have left mankind to be guided only by their own uninfluenced judgments, they would naturally have been led to the government of a community, or a nation, from the natural and obvious precedent of the government of a family. In confirmation of this opinion, it may be observed, that the patriarchal scheme is that which always has prevailed, and still does prevail, among the most enlightened people and (what is no slight attestation of it's truth) it has also prevailed, and still does prevail, among the most unenlightened. According to Vitruvius, the rudiments of architecture are to be found in the cottage. and, according to Aristotle, the first principles of government are to be traced to private families. Kingdoms and empires are but so many larger families. and hence it is that our

Church, in perfect conformity with the doctrine here inculcated, in her explication of the fifth commandment, from the obedience due to parents, wisely derives the congenial duty of *honouring the king and all that are put in authority under him*. . . .

1775? • 1797

11 most enlightened people. In a footnote here omitted, Boucher quotes the *Ecclesiasticall Politie* (1592) of Richard Hooker (1554?-1600), foremost Anglican theologian, the *History of Greece* (1784-1790) of William Mitford (1744-1827), and Filmer's *Patriarcha* • 13 the most unenlightened. A footnote several pages long is omitted, in it Boucher reviews the points at issue between Filmer and Locke, and quotes the *Description de la Chine* (1777-1784) by the Abbé Grosier (1743-1823) the *Voyage to Sierra Leone* (1788) by John Matthews, and the *History of America* (1777) by William Robertson (1721-1793) • 14 Vitruvius (fl 46 B C), author of the only surviving Roman treatise on architecture • 16 Aristotle. The allusion is to the *Politics*, Bk I • 23 under him. In the remainder of the sermon, Boucher preaches passive obedience to the royal authority

Singers of the Revolution

Both Tories and Continentals used songs and poems to urge their forces to victory, voice their arguments, and celebrate their heroes. Beginning with the passage of the Stamp Act, the verses showed more and more clearly the growth of unrest, then defiance, and finally hatred.

There was a contrast in the sentiments expressed, but not much difference in the forms employed by the opposing songsters. The reason is suggested by Professor Boynton in *Literature and American Life* when he says, "The most popular songs were all set to melodies then current in old England, sometimes occurring in sequence: the first a parody of the English song, the next the parody of a parody, and so on." He cites the fortunes of the tune

of David Garrick's "Hearts of Oak," first sung on the stage in 1759. Seven years later, in America, the tune was outfitted with words of a conciliatory sort urging both loyalty and liberty. Then came a series of versions whose first lines show the alternating use of the tune by the two parties

July 1768. "Come, join hand in hand, brave Americans all."

January 1769 "Come, cheer up, my lads, like a true British band."

1775: "Come, rouse up, my lads, and join the great cause."

These represent only a fraction of the songs which, down to 1812, made use of the Garrick tune

Despite such typical resemblances the songs of the Revolution have many elements of interest. They vividly tell the story of the war and the feelings of the people about it. Further, like balladry in general—although

many of them have an eighteenth-century polish not typical of the older ballads—they forcefully display human emotions and human character in times of stress.

Songs and Ballads of the American Revolution, ed. Frank Moore, New York, 1856 • J. T. Howard, *The Music of George Washington's Time*, New York, 1931

Yankee Doodle

Anonymous

"The Yankee's Return from Camp" was the title first given to this song, later generally known by its present title. Since it is an authentic ballad, there is no way of determining just who wrote it, when it was written, and what the original words were. The tune was known in the colonies as early as 1767, but the words—which varied in different versions—were composed later, probably by British soldiers or Tory sympathizers who wanted to ridicule the crude Yankees. The contrary Yankees in time apparently used it as a battle song of their own. It is interesting not only for its wartime history and for its lasting appeal to Americans but also for the way it created an American bumpkin by letting him talk his own dialect, later to be a very important procedure in the humor and fiction of the United States.

Father and I went down to camp,
Along with Captain Gooding.
And there we see the men and boys,
As thick as hasty pudding

Chorus

Yankee Doodle, keep it up,
Yankee Doodle, dandy,
Mind the music and the step,
And with the girls be handy

And there we see a thousand men,
As rich as 'Squire David;

10

And what they wasted every day,
I wish it could be saved

The 'lasses they eat every day,
Would keep a house a winter,
They have so much that, I'll be bound,
They eat it when they're a mind to

And there we see a swamping gun,
Large as a log of maple,
Upon a deuced little cart,
A load for father's cattle

20

And every time they shoot it off,
It takes a horn of powder,
And makes a noise like father's gun,
Only a nation louder

I went as nigh to one myself,
As Siah's underpinning,
And father went as nigh again,
I thought the deuce was in him

Cousin Simon grew so bold,
I thought he would have cock'd it;
It scar'd me so, I shrink'd it off,
And hung by father's pocket.

30

And Captain Davis had a gun,
He kind of clapped his hand on't,
And stuck a crooked stabbing iron
Upon the little end on't

And there I see a pumpkin shell
As big as mother's basin;
And every time they touch'd it off,
They scamper'd like the nation.

40

I see a little bariel too,
The heads were made of leather,
They knock'd upon't with little clubs,
And call'd the folks together.

And there was Captain Washington.
And gentlefolks about him,
They say he's grown so tarnal proud,
He will not ride without 'em

He got him on his meeting clothes,
Upon a slapping stallion.
He set the world along in rows,
In hundreds and in millions

The flaming ribbons in his hat,
They look'd so tearing fine ah,
I wanted pockily to get,
To give to my Jemimah

I see another snarl of men
A digging graves, they told me,
So tarnal long, so tarnal deep,
They 'tended they should hold me

It scar'd me so, I hook'd it off,
Nor stopp'd, as I remember,
Nor turned about, till I got home,
Lock'd up in mother's chamber

Nathan Hale

Anonymous

After the retreat from Long Island in 1776, Washington tried to find among his men a "discreet and enterprising person to penetrate the enemy's camp" as a spy. Young Captain Nathan Hale, three years out of Yale College, undertook the mission. He went through the British lines, secured the information he wanted, and started to return. He was captured, however, and executed as a spy. The excellent ballad which tells of the event does not, surprisingly, make use of his reputed last words ("I regret that I have but one life to give for my country") or the alleged statement of the provost marshal that Hale's letters were destroyed "that the rebels should not know that they had a man in their army who could die with so much firmness." But the author perhaps saw that such details did not harmonize well with the rather elegiac account of the execution. Repetition, a typical ballad device, is notably used in this song

The breezes went steadily thro' the tall pines,
A saying "Oh hu-ush!" a saying "Oh hu-ush!"
As stilly stole by a bold legion of horse,
For Hale in the bush, for Hale in the bush

"Keep still!" said the thrush as she nestled her young.
In a nest by the road, in a nest by the road,
"For the tyrants are near, and with them appear
What bodes us no good, what bodes us no good"

The brave captain heard it and thought of his home.
In a cot by the brook, in a cot by the brook,
With mother and sister and memories dear,
He so gaily forsook, he so gaily forsook

Cooling shades of the night were coming apace,
The tattoo had beat, the tattoo had beat
The noble one sprang from his dark lurking-place
To make his retreat, to make his retreat.

50

60

1775

He warily trod on the dry rustling leaves,
 As he pass'd thro' the wood, as he pass'd thro' the wood,
 And silently gain'd his rude launch on the shore,
 As she play'd with the flood, as she play'd with the flood 20

The guards of the camp, on that dark, dreary night,
 Had a murderous will, had a murderous will
 They took him and bore him afar from the shore,
 To a hut on the hill, to a hut on the hill

No mother was there, nor a friend who could cheer.
 In that little stone cell, in that little stone cell
 But he trusted in love from his Father above,
 In his heart all was well, in his heart all was well

An ominous owl with his solemn bass voice
 Sat moaning hard by, sat moaning hard by 30
 "The tyrant's proud minions most gladly rejoice,
 For he must soon die, for he must soon die"

The brave fellow told them, no thing he restrain'd,
 The cruel gen'ral, the cruel gen'ral,
 His errand from camp, of the ends to be gain'd,
 And said that was all, and said that was all

They took him and bound him and bore him away,
 Down the hill's grassy side, down the hill's grassy side
 'Twas there the base hirelings, in royal array,
 His cause did deride, his cause did deride 40

Five minutes were given, short moments, no more,
 For him to repent, for him to repent
 He pray'd for his mother, he ask'd not another,
 To Heaven he went, to Heaven he went

The faith of a martyr the tragedy shew'd,
 As he trod the last stage, as he trod the last stage,
 And Britons will shudder at gallant Hale's blood,
 As his words do presage, as his words do presage

"Thou pale king of terrors, thou life's gloomy foe,
 Go frighten the slave, go frighten the slave, 50
 Tell tyrants to you their allegiance they owe,
 No fears for the brave, no fears for the brave"

1776

The Battle of the Kegs

Francis Hopkinson 1737 • 1791

The first floating mines ever to be launched against an enemy fleet were tried out by the Americans in January 1778. These mines were kegs of powder which exploded upon coming into contact with other objects. A number of mines sent down the Delaware failed to do much damage to the British ships because the British had drawn them up to docks, out of the way of floating ice. One keg did explode, however, and the colonists claimed that the British became so disturbed that for a while they fearfully fired at every keg floating along the river, including a keg of butter.

Francis Hopkinson, a young Philadelphian and author of many pamphlets and poems in behalf of the Continentals, saw a chance to show the British in a ridiculous light by writing a poem about the incident. His ballad, published in the *Pennsylvania Packet* for March 4, became one of the most popular songs of the Revolution. It was set to music, perhaps by the author himself, and was sung by the American soldiers.

G. E. Hastings, *The Life and Works of Francis Hopkinson*, Chicago, 1926

Gallants attend, and hear a friend,
 Trill forth harmonious ditty,
 Strange things I'll tell, which late befell,
 In Philadelphia city

'Twas early day, as poets say,
 Just when the sun was rising,
 A soldier stood, on a log of wood,
 And saw a thing surprising

As in amaze he stood to gaze,
 The truth can't be denied, sir,
 He spied a score of kegs or more,
 Come floating down the tide, sir.

10

A sailor, too, in jerkin blue,
This strange appearance viewing.
First damn'd his eyes, in great surprise,
Then said, "some mischief's brewing.

"These kegs, I'm told, the rebels hold,
Packed up like pickled herring.
And they're come down, t' attack the town,
In this new way of ferrying "

The soldier flew, the sailor too,
And scared almost to death, sir,
Wore out their shoes to spread the news,
And ran till out of breath, sir

Now up and down, throughout the town,
Most frantic scenes were acted,
And some ran here, and others there,
Like men almost distracted

Some fire cried, which some denied,
But said the earth had quakèd,
And girls and boys, with hideous noise,
Ran through the streets half naked.

Sir William, he, snug as a flea,
Lay all this time a snoring,
Nor dreamed of harm, as he lay warm,
In bed with Mrs. L . . . g.

Now in a fright, he starts upright,
Awak'd by such a clatter,
He rubs his eyes, and boldly cries,
"For God's sake, what's the matter?"

At his bedside he then espied,
Sir Erskine at command, sir,
Upon one foot he had one boot,
And t'other in his hand, sir.

"Arise! arise, Sir Erskine cries,
The rebels—more's the pity—
Without a boat, are all afloat,
And rang'd before the city.

"The motley crew, in vessels new,
With Satan for their guide, sir,
Packed up in bags, or wooden kegs,
Come driving down the tide, sir.

"Therefore prepare for bloody war;
The kegs must all be routed,
Or surely we despis'd shall be,
And British courage doubted."

The royal band, now ready stand,
All ranged in dread array, sir,
With stomachs stout, to see it out,
And make a bloody day, sir.

The cannons roar from shore to shore.
The small arms make a rattle,
Since wars began, I'm sure no man
Ere saw so strange a battle.

The rebel dales, the rebel vales,
With rebel trees surrounded,
The distant woods, the hills and floods,
With rebel echoes sounded

The fish below swam to and fro,
Attack'd from every quarter,
Why sure, thought they, the devil's to pay,
'Mongst folks above the water.

The kegs, 'tis said, though strongly made
Of rebel staves and hoops, sir,
Could not oppose their powerful foes,
The conquering British troops, sir.

From morn till night, these men of might
Display'd amazing courage,
And when the sun was fairly down,
Retir'd to sup their porridge

33 Sir William, Sir William Howe (1729-1814), the commander of the British army, much hated by the Americans • 36 Mrs. L . . . g, the wife of Joshua Loring, a Loyalist refugee from Boston • 42 Sir Erskine, Sir William Erskine, a general in the British army

An hundred men, with each a pen,
Or more, upon my word, sir,
It is most true would be too few,
Their valor to record, sir.

Such feats did they perform that day,
Against those wicked kegs, sir,
That years to come, if they get home,
They'll make their boasts and brags. sir

1778

The Epilogue

Anonymous

In October 1778, when the British had possession of Philadelphia and the Continental Congress was meeting in Yorktown, Virginia, "The Epilogue," a Tory song, was published in a ballad sheet and posted in the streets of New York and Philadelphia.

Said a foreword: "There was lately exhibited in the city of Philadelphia, an admirable farce called *Independence*. Who the author was is not positively known, but some are of the opinion that it is the work of a certain quack doctor called Franklin. Others assert that it is the joint production of the strolling company by whom it was acted, it is, however, generally allowed, that one Adams gave the first hint, contrived the plot, and cast the parts. It appeared in the exhibition so tragi-comical, that the audience were at a loss whether to laugh or cry. They were, however, well pleased with the catastrophe, and joined heartily in the following chorus. As the renowned Voltaire somewhere relates, that a song was the cause of the French reformation, the excellent actor who performed the part of the President took upon himself the plain song "

Our farce is now finish'd, your sport's at an end,
But ere you depart, let the voice of a friend
By way of a chorus, the evening crown
With a song to the tune of a hey derry down,
Derry down, down, hey derry down.

Old Shakspeare, a poet, who should not be spit on,
Altho' he was born in the island called Britain,
Hath said that mankind are all players at best,
A truth we'll admit of, for sake of the jest.

On this puny stage we've strutted our hour,
And have acted our parts to the best of our power;
That the farce hath concluded not perfectly well,
Was surely the fault of the devil in hell

10

This devil, you know, out of spleen to the church,
Will oftentimes leave his best friends in the lurch,
And turn them adrift in the midst of their joy,
'Tis a difficult matter to cheat the Old Boy.

Since this is the case, we must e'en make the best
Of a game that is lost, let us turn it to jest,
We'll smile, nay, we'll laugh, we'll carouse and we'll sing,²⁰
And cheerfully drink life and health to the king.

Let Washington now from his mountains descend,
Who knows but in George he may still find a friend;
A Briton, altho' he loves bottle and wench,
Is an honest fellow than parle vous French.

Our great Independence we give to the wind,
And pray that Great Britain may once more be kind.
In this jovial song all hostility ends,
And Britons and we will for ever be friends

Boys fill me a bumper! now join in the chorus!
There is happiness still in the prospect before us,
In this sparkling glass, all hostility ends,
And Britons and we will for ever be friends

30

Good night! my good people, retire to your houses,
Fair ladies, I beg you, convince your dear spouses
That Britons and we are united in bliss,
And ratify all with a conjugal kiss

Once more, here's a health to the king and queen!
Confusion to him, who in rancor and spleen,
Refuses to drink with an English friend,
Immutable amity to the world's end.

Thomas Paine

1737 • 1809

The career and reputation of Thomas Paine are tragic evidence of human frailty. His private hells of physical and mental torture were paved with the most altruistic of intentions, and those who have judged him saint or devil have usually been passionately sincere. He emerged from failure and obscurity to become the most powerful single voice of revolutionary thought in British America, pursuing the line of his principles a little farther, he was driven out of England, jailed in France, and insulted and ostracized in the United States. Down through the years his name has called forth more diverse and violent comment than any other in literary history, not excepting Poe and Shelley.

Paine was born at Thetford in Norfolk, England, in 1737. His father was a Quaker farmer and staymaker; his mother a Church of England woman, older than her

husband, a shade higher in the social scale, and discontented. Their son's childhood was unhappy, his early manhood scarcely less so. Leaving school at thirteen, he searched fruitlessly for a quarter of a century before he found an agreeable occupation. As sailor, corset-maker, collector of the excise, schoolteacher, tobacconist, he was never quite fitted to his task. At twenty-two he married only to have his wife die in childbirth within a year. His second marriage, at thirty-four, ended three years later in a legal separation. All that Paine had found at thirty-seven were an interest in science and a sympathy for the underdog in society, the result of his private reading,

Panel (l to r) Composition of *The Crisis* • Title page of *Common Sense*, 1776 • Reading the *Crisis* papers to the army • Thomas Paine at about 55 • His home in New Rochelle, New York

and his futile championship of the plea of his fellow-excisemen for more pay from Parliament.

Penniless and unknown, Paine encountered Benjamin Franklin, who apparently encouraged him to try America, giving him a letter of introduction as an "ingenious worthy young man" who might well be employed as "clerk, or assistant tutor in a school, or assistant surveyor." Late in 1774, seriously ill, Paine was carried off a ship in Pennsylvania.

Within a year he had readied himself for a new profession by a series of contributions to the *Pennsylvania Magazine*. As "Atlanticus," "Vox Populi," "Æsop," and "An Englishman," Paine learned to shape his humanitarian sympathies into persuasive essays on dueling, marriage, the rights of women, the need of copyright, kindness to animals, and the injustice of slavery. Meanwhile he had to make up his mind about the Battle of Lexington and the events which swiftly followed. That was not difficult, despite his Quaker predilections. What reason had he to love England? In the autumn of 1775 he was writing *Common Sense* to convince his adopted countrymen that "nothing can settle our affairs so expeditiously as an open and determined *Declaration of Independence*." The pamphlet's appearance and success demonstrated that the colonies had welcomed no mere bankrupt staymaker, but a propagandist of genius, whose skill in moving men to action has seldom been rivaled.

Common Sense, however, was only a beginning. The *Declaration* achieved, Paine joined the army in time to share the disheartening retreat across New Jersey in the fall of 1776. In the face of disaster, he wrote the first of a series of letter-pamphlets now known as *The American Crisis*. Published just before Christmas, its ringing denunciation of the "summer soldier and the sunshine patriot" was read to the troops who crossed the Delaware to surprise the Hessians at Trenton and thereby preserved the morale of the Americans during the first crucial winter of the war. Fifteen times thereafter, in the space of the next seven years, the need arose for a *Crisis* paper to hold the nation together or to arouse the support required for decisive action. Each of the sixteen numbers circulated in the tens of thousands. Finally, in 1783, Paine could write, "The times that tried men's souls' are over—and the greatest and completest revolution the world ever knew, gloriously and happily accomplished."

Paine's contributions had included various kinds of work for the Continental Congress, such as a quick but valuable trip to France in 1781. The end of the war, however, found him as poor as at the beginning, and not without his enemies. Washington, remembering the effect of his propaganda pieces, was able to suggest a few rewards: a confiscated estate from New York, a gift of money from Pennsylvania, and \$3000 from the Congress itself. Paine's pamphlets had been his freewill offering to the cause; he had never wished to profit from their sale. No place appearing for him in the public service, he devoted what funds he had to promoting one of his inventions—a single-span iron bridge which, he argued, would be more practicable for American rivers than arches on piers, against which ice could jam in the spring. In April 1787 he sailed for France to display his model to the engineering experts and investors there. He was not, however, to succeed as a promoter of his own fortunes.

To follow in detail Paine's fifteen years in Europe would require many pages describing the intricate events of the French Revolution and the conservative reaction in England. Paine was not content to busy himself with bridges. *The Rights of Man* (Part I, 1791, Part II, 1792), his answer to Edmund Burke's *Reflections on the Revolution in France*, is the fullest expression of his political convictions: that the best form of government is a representative republic, with universal manhood suffrage, and that the "natural rights" of men should be protected by written constitutions and legislation to prevent the development of aristocratic and hereditary privileges. For these views, and for his free prediction of coming revolution, he was found guilty of libel and exiled from an England he had already left. English mobs hanged and burned his effigy.

If, as has been said, Paine's views were too French for the English, they were soon to prove too English for the French. As honorary citizen and member of the National Convention, he opposed the execution of Louis XVI; and by December 1793, no longer a hero, he was imprisoned as a foreigner. Gouverneur Morris, the American ambassador, failed to help him (some biographers, in fact, believe that Morris was in part responsible for Paine's imprisonment, because of personal enmity), and Paine was not released until ten months later, after Morris had been succeeded by James Monroe. Broken

in health, his faith in political rationalism seriously damaged, Paine had still to meet the bitterest antagonisms of his career

The Age of Reason (Part I, 1794, Part II, 1795) was written as Paine's "last offering" to mankind, to provide a religion compatible with the new political and social order which he believed was at hand despite the excesses of the Reign of Terror. Mankind was not only unappreciative, it was so shocked by the apparent blasphemy of his application of reason to religion that a goodly part of it was willing to burn Paine at the stake. To the masses, swayed by newspapers and pulpit pronouncements, Paine's name became a synonym for atheism and infidelity. His English publisher was prosecuted for blasphemy, he himself, after his return to the United States in 1802, was shot at through his window, insulted in the streets, and humiliated on his deathbed by clergymen who forced their way into his room. Even the Quakers refused to permit burial in their cemetery. Ten years later his body was exhumed and taken to England, where William Cobbett hoped to exhibit it as part of a scheme to reform society there. Forbidden this final gruesome means of swaying men's minds, Paine's bones were, it is

said, nearly sold at auction to satisfy the creditors of Cobbett's son before they finally disappeared.

Men still find moderation virtually impossible when evaluating Thomas Paine. He wrote always for a purpose, and some of his purposes are still anathema to large groups of people. Of his merits as a writer, however, there can be little disagreement. No man of his time was better able to express, simply and clearly, the views which effected vast changes in the political, social, and religious constitution of Western civilization. The force, directness, and variety of his appeals to reason and emotion made him the foremost propagandist-agitator of his time. A master of persuasion rather than a profound or original thinker, he will be studied as long as there are men who seek to understand the social functions of language and literature

Common Sense

Addressed to the
Inhabitants of America,
On the following Interesting Subjects, viz.:

- I. Of the Origin and Design of Government in General; with Concise Remarks on the English Constitution.
- II. Of Monarchy and Hereditary Succession.
- III. Thoughts on the Present State of American Affairs.
- IV. Of the Present Ability of America; with some Miscellaneous Reflections.

A pamphlet of seventy-nine pages, *Common Sense* was published at Philadelphia in January 1776. The first open appeal for a declaration of independence, it achieved a sale estimated at 125,000 copies within three months and by

the end of the year had appeared in fifteen or more editions.

George Washington, commanding the army besieging Boston, wrote on January 31 of the "sound doctrine and unanswerable reasoning" of Paine's pamphlet, and it was unquestionably the greatest single force in convincing Americans of the wisdom of separation from England. Its shrewd analyses and arguments are punctuated by bursts of emotion-laden rhetoric, all bound together by a constant reiteration of the theme of "continental" destiny. In one way or another Paine appealed to almost every interest, selfish or benevolent, which could help to draw the colonists together.

The "sound doctrine" which Washington admired will be found upon examination to be largely that of John Locke (1632-1704), the English philosopher whose *Two Treatises on Government* (1689-1690) formed a classic justification of the Glorious Revolution of 1688. It is not profitable, however, to trace the origins of Paine's political thought. He did not claim that it was original, and he did not intend that *Common Sense* should be read for its abstract principles. It was designed to bring action, and in achieving

that end it was supremely successful Independence was declared, and Paine had every reason to feel, as he did, that the inscription on his tombstone should read simply "Thomas Paine, Author of Common Sense."

INTRODUCTION

Perhaps the sentiments contained in the following pages, are not *yet* sufficiently fashionable to procure them general favor, a long habit of not thinking a Thing *wrong*, gives it a superficial appearance of being *right*, and raises at first a formidable outcry in defence of Custom But the tumult soon subsides Time makes more converts than Reason

As a long and violent abuse of Power is generally the means of calling the right of it in question, (and in matters too which might never have been thought of, had not the Sufferers been aggravated into the inquiry,) and as the king of England hath undertaken in his *own right*, to support the Parliament in what he calls *theirs*, and as the good People of this country are grievously oppressed by the combination, they have an undoubted privilege to inquire into the pretensions of both, and equally to reject the usurpation of *either*.

In the following Sheets, the Author has studiously avoided every thing which is personal among ourselves. Compliments as well as Censure to individuals make no part thereof The wise and the worthy need not the triumph of a pamphlet, and those whose sentiments are injudicious or unfriendly will cease of themselves, unless too much pains is bestowed upon their conversions

The cause of America is in a great measure the cause of all mankind. Many circumstances have, and will arise, which are not local, but universal, and through which the principles of all lovers of mankind are affected, and in the event of which their affections are interested The laying a country desolate with fire and sword, declaring war against the natural rights of all mankind, and extirpating the defenders thereof from the face of the earth, is the concern of every man to whom nature hath given the power of feeling; of which class, regardless of party censure, is

THE AUTHOR

ON THE ORIGIN AND DESIGN OF GOVERNMENT IN GENERAL, WITH CONCISE REMARKS ON THE ENGLISH CONSTITUTION

Some Writers have so confounded Society with government, as to leave little or no distinction between them; whereas they are not only different, but have different origins Society is produced by our wants and government by our wickedness, the former promotes our happiness *positively* by uniting our affections, the latter *negatively* by restraining our vices The one encourages intercourse, the other creates distinctions The first is a patron, the last a punisher

Society in every state is a blessing, but government, even in its best state, is but a necessary evil, in its worst state an intolerable one for when we suffer, or are exposed to the same miseries *by a government*, which we might expect in a country *without Government*, our calamity is heightened by reflecting that we furnish the means by which we suffer Government, like dress, is the badge of lost innocence, the palaces of kings are built upon the ruins of the bowers of paradise For were the impulses of conscience clear, uniform and irresistibly obeyed, man would need no other law-giver, but that not being the case, he finds it necessary to surrender up a part of his property to furnish means for the protection of the rest, and this he is induced to do by the same prudence which in every other case advises him, out of two evils to choose the least *Wherefore*, security being the true design and end of government, it unanswerably follows that whatever *form* thereof appears most likely to ensure it to us, with the least expense and greatest benefit, is preferable to all others

In order to gain a clear and just idea of the design and end of government, let us suppose a small number of persons settled in some sequestered part of the earth, unconnected with the rest, they will then represent the first peopling of any country, or of the world In this state of natural liberty, society will be their first thought A thousand motives will excite them thereto, the strength of

Text Professor Peach's version of the first edition, which eliminated "such typographical errors as were clearly destructive of the sense" • Introduction, dated in some editions as late as February 1776 • 71 natural liberty Paine's phrase, like his account of the origin of society, shows his general agreement with John Locke's idea of presocial society

one man is so unequal to his wants, and his mind so unfitted for perpetual solitude, that he is soon obliged to seek assistance and relief of another, who in his turn requires the same. Four or five united would be able to raise a tolerable dwelling in the midst of a wilderness, but *one* man might labor out the common period of life without accomplishing any thing, when he had felled his timber he could not remove it, nor erect it after it was removed, hunger in the mean time would urge him to quit his
10 work, and every different want would call him a different way. Disease, nay even misfortune, would be death, for though neither might be mortal, yet either would disable him from living, and reduce him to a state in which he might rather be said to perish than to die.

Thus necessity, like a gravitating power, would soon form our newly arrived emigrants into society, the reciprocal blessings of which would supersede, and render the obligations of law and government unnecessary while they remained perfectly just to each other, but as nothing
20 but Heaven is impregnable to vice, it will unavoidable happen that in proportion as they surmount the first difficulties of emigration, which bound them together in a common cause, they will begin to relax in their duty and attachment to each other: and this remissness will point out the necessity of establishing some form of government to supply the defect of moral virtue.

Some convenient tree will afford them a State-House, under the branches of which the whole Colony may assemble to deliberate on public matters. It is more than
30 probable that their first laws will have the title only of *Regulations* and be enforced by no other penalty than public disesteem. In this first parliament every man by natural right will have a seat.

But as the colony increases, the public concerns will increase likewise, and the distance at which the members may be separated, will render it too inconvenient for all of them to meet on every occasion as at first, when their number was small, their habitations near, and the public concerns few and trifling. This will point out the con-
40 venience of their consenting to leave the legislative part to be managed by a select number chosen from the whole body, who are supposed to have the same concerns at stake which those have who appointed them, and who will act in the same manner as the whole body would act were they present. If the colony continue encreasing, it will become necessary to augment the number of repre-

sentatives, and that the interest of every part of the colony may be attended to, it will be found best to divide the whole into convenient parts, each part sending its proper number: and that the *elected* might never form to themselves an interest separate from the *electors*, prudence will point out the propriety of having elections often: because as the *elected* might by that means return and mix again with the general body of the *electors* in a few months, their fidelity to the public will be secured by the prudent reflection of not making a rod for themselves. And as this frequent interchange will establish a common interest with every part of the community, they will mutually and naturally support each other, and on this, (not on the unmeaning name of king,) depends the *strength of Government, and the happiness of the governed*.

Here then is the origin and rise of government, namely, a mode rendered necessary by the inability of moral virtue to govern the world, here too is the design and end of government, viz freedom and security. And however our eyes may be dazzled with show, or our ears deceived by sound, however prejudice may warp our wills, or interest darken our understanding, the simple voice of nature and reason will say, 'tis right.

I draw my idea of the form of government from a principle in nature which no art can overturn, viz that the more simple any thing is, the less liable it is to be disordered, and the easier repaired when disordered, and with this maxim in view I offer a few remarks on the so much boasted Constitution of England. That it was noble for the dark and slavish times in which it was erected, is granted. When the world was overrun with tyranny the least remove therefrom was a glorious rescue. But that it is imperfect, subject to convulsions, and incapable of producing what it seems to promise, is easily demonstrated.

Absolute governments, (tho' the disgrace of human nature) have this advantage with them, they are simple: if the people suffer, they know the head from which their suffering springs, know likewise the remedy, and are not bewildered by a variety of causes and cures. But the Constitution of England is so exceedingly complex that the nation may suffer for years together without being able to discover in which part the fault lies, some will say in one and some in another, and every political physician will advise a different medicine.

I know it is difficult to get over local or long standing prejudices, yet if we will suffer ourselves to examine the component parts of the English Constitution, we shall find them to be the base remains of two ancient tyrannies, compounded with some new Republican materials

First.—The remains of Monarchical tyranny in the person of the King

Secondly.—The remains of Aristocratical tyranny in the persons of the Peers

Thirdly.—The new Republican materials, in the persons of the Commons, on whose virtue depends the freedom of England

The two first, by being hereditary, are independent of the People, wherefore in a *constitutional sense* they contribute nothing towards the freedom of the State

To say that the Constitution of England is an *union* of three powers, reciprocally *checking* each other, is farical, either the words have no meaning, or they are flat contradictions

To say that the Commons is a check upon the king presupposes two things

First—That the king is not to be trusted without being looked after, or in other words that a thirst for absolute power is the natural disease of Monarchy

Secondly.—That the Commons, by being appointed for that purpose, are either wiser or more worthy of confidence than the crown

But as the same constitution which gives the Commons a power to check the King by withholding the supplies, gives afterwards the King a power to check the Commons, by empowering him to reject their other bills, it again supposes that the king is wiser than those whom it has already supposed to be wiser than him. A mere absurdity!

There is something exceedingly ridiculous in the composition of Monarchy, it first excludes a man from the means of information, yet empowers him to act in cases where the highest judgment is required. The state of a King shuts him from the World, yet the business of a king requires him to know it thoroughly, wherefore the different parts, by unnaturally opposing and destroying each other, prove the whole character to be absurd and useless

Some writers have explained the English Constitution thus: the king say they is one, the People another, the Peers are a house in behalf of the King, the Commons in

behalf of the People, But this hath all the distinctions of a house divided against itself, and tho' the expressions be pleasantly arranged, yet when examined they appear idle and ambiguous, and it will always happen, that the nicest construction that words are capable of, when applied to the description of something which either cannot exist, or is too incomprehensible to be within the compass of description, will be words of sound only, and tho' they may amuse the ear, they cannot inform the mind. for this explanation includes a previous question, viz *how came the king by a power which the people are afraid to trust, and always obliged to check?* Such a power could not be the gift of a wise People, neither can any Power, *which needs checking*, be from God, yet the provision which the Constitution makes supposes such a power to exist

But the provision is unequal to the task, the means either cannot or will not accomplish the end, and the whole affair is a *Felo de se*: for as the greater weight will always carry up the less, and as all the wheels of a machine are put in motion by one, it only remains to know which power in the constitution has the most weight, for that will govern: and tho' the others, or a part of them, may clog, or check the rapidity of its motion, yet so long as they cannot stop it, their endeavors will be ineffectual. The first moving power will at last have its way, and what it wants in speed is supplied by time

That the crown is this overbearing part in the English constitution needs not be mentioned, and that it derives its whole consequence merely from being the giver of places and pensions is self-evident, wherefore, tho' we have been wise enough to shut and lock a door against absolute Monarchy, we at the same time have been foolish enough to put the Crown in possession of the key.

The prejudice of Englishmen, in favor of their own government, by King, Lords and Commons, arises as much or more from national pride than reason. Individuals are undoubtedly safer in England than in some other Countries: but the Will of the King is as much the Law of the land in Britain as in France, with this difference, that instead of proceeding directly from his

17 reciprocally checking. Montesquieu had held such a view of the Constitution of Britain • 65 *Felo de se*, murderer of itself

mouth, it is handed to the People under the formidable shape of an act of Parliament. For the fate of Charles the First hath only made kings more subtle—not more just

Wherefore, laying aside all national pride and prejudice in favor of modes and forms, the plain truth is that *it is wholly to the constitution of the People, and not to the constitution of the Government* that the Crown is not as oppressive in England as in Turkey.

- 10 An inquiry into the *constitutional errors* in the English form of government, is at this time highly necessary; for as we are never in a proper condition of doing justice to others, while we continue under the influence of some leading partiality, so neither are we capable of doing it to ourselves while we remain fettered by any obstinate prejudice. And as a man who is attached to a prostitute is unfitted to choose or judge of a wife, so any prepossession in favor of a rotten constitution of government will disable us from discerning a good one

OF MONARCHY AND HEREDITARY SUCCESSION

- 20 Mankind being originally equals in the order of creation, the equality could only be destroyed by some subsequent circumstance—the distinctions of rich and poor may in a great measure be accounted for, and that without having recourse to the harsh ill-sounding names of oppression and avarice. Oppression is often the *consequence*, but seldom or never the *means* of riches, and tho' avarice will preserve a man from being necessitously poor, it generally makes him too timorous to be wealthy.

- 30 But there is another and greater distinction for which no truly natural or religious reason can be assigned, and that is the distinction of Men into *Kings* and *Subjects*. Male and female are the distinctions of nature, good and bad the distinctions of Heaven; but how a race of Men came into the World so exalted above the rest, and distinguished like some new species, is worth inquiring into, and whether they are the means of happiness or of misery to mankind.

- 40 In the early ages of the World, according to the Scripture chronology there were no Kings; the consequence of which was, there were no wars, it is the pride of Kings which throws mankind into confusion. Holland without a King hath enjoyed more peace for this last century than any of the Monarchical governments in

Europe. Antiquity favors the same remark, for the quiet and rural lives of the first Patriarchs have a happy something in them, which vanishes when we come to the history of Jewish royalty.

Government by Kings was first introduced into the World by the Heathens, from whom the children of Israel copied the custom. It was the most prosperous invention the Devil ever set on foot for the promotion of idolatry. The heathens paid divine honors to their deceased Kings, and the Christian World has improved on the plan by doing the same to their living ones. How impious is the title of sacred Majesty applied to a worm, who in the midst of his splendor is crumbling into dust!

As the exalting one man so greatly above the rest cannot be justified on the equal rights of nature, so neither can it be justified on the authority of scripture, for the will of the Almighty as declared by Gideon, and the prophet Samuel, expressly disapproves of Government by kings. All anti-monarchical parts of scripture have been very smoothly glossed over in monarchical governments, but they undoubtedly merit the attention of Countries which have their governments yet to form "*Render unto Cæsar the things which are Cæsar's*," is the scripture doctrine of Courts, yet it is no support of monarchical government, for the Jews at that time were without a king, and in a state of vassalage to the Romans

Near three thousand years passed away, from the Mosaic account of the creation, till the Jews under a national delusion requested a king. Till then, their form of government (except in extraordinary cases where the Almighty interposed) was a kind of Republic, administered by a judge and the elders of the tribes. Kings they had none, and it was held sinful to acknowledge any Being under that title but the Lord of Hosts. And when a man seriously reflects on the idolatrous homage which is paid to the persons of kings, he need not wonder that the Almighty, ever jealous of his honor, should disapprove a form of government which so impiously invades the prerogative of Heaven.

Monarchy is ranked in scripture as one of the sins of

61 Gideon . . . Samuel. See Judges 8 22-23 and 1 Samuel 8 5-22 most of which Paine quotes directly in the paragraphs which follow

the Jews, for which a course in reserve is denounced against them. The history of that transaction is worth attending to.

The children of Israel being oppressed by the Midianites, Gideon marched against them with a small army, and victory thro' the Divine interposition decided in his favor. The Jews elate with success and attributing it to the generalship of Gideon, proposed making him a king, saying, *Rule thou over us, thou and thy son, and thy son's son.* Here was temptation in its fullest extent; not a kingdom only, but a hereditary one, but Gideon in the piety of his soul replied, *I will not rule over you, neither shall my son rule over you.* THE LORD SHALL RULE OVER YOU. Words need not be more explicit, Gideon doth not *decline* the honor, but denieth their right to give it; neither doth he compliment them with invented declarations of his thanks, but in the positive style of a prophet charges them with disaffection to their proper Sovereign, the King of Heaven.

About one hundred and thirty years after this, they fell again into the same error. The hankering which the Jews had for the idolatrous customs of the Heathens, is something exceedingly unaccountable, but so it was, that laying hold of the misconduct of Samuel's two sons, who were intrusted with some secular concerns, they came in an abrupt and clamorous manner to Samuel, saying, *Behold, thou art old, and thy sons walk not in thy ways, now make us a king to judge us like all the other nations.* And here we cannot but observe that their motives were bad, viz. that they might be *like* unto other nations, i. e. the Heathens, whereas their true glory lay in being as much *unlike* them as possible. *But the thing displeased Samuel when they said, give us a king to judge us, and Samuel prayed unto the Lord, and the Lord said unto Samuel, hearken unto the voice of the people in all that they say unto thee, for they have not rejected thee, but they have rejected me.* THAT I SHOULD NOT REIGN OVER THEM. *According to all the works which they have done since the day that I brought them up out of Egypt even unto this day, wherewith they have forsaken me, and served other Gods: so do they also unto thee. Now therefore hearken unto their voice, howbeit, protest solemnly unto them and show them the manner of the king that shall reign over them, i. e. not of any particular King, but the general manner of the Kings of the Earth whom Israel was so eagerly copying after.*

And notwithstanding the great distance of time and difference of manners, the character is still in fashion. *And Samuel told all the words of the Lord unto the People, that asked of him a King. And he said, This shall be the manner of the King that shall reign over you. He will take your sons and appoint them for himself for his chariots and to be his horsemen, and some shall run before his chariots (This description agrees with the present mode of impressing men) and he will appoint him captains over thousands and captains over fifties, will set them to ear his ground and to reap his harvests, and to make his instruments of war, and instruments of his chariots. And he will take your daughters to be confectionaries, and to be cooks, and to be bakers (This describes the expense and luxury as well as the oppression of Kings) and he will take your fields and your vineyards, and your olive yards, even the best of them, and give them to his servants. And he will take the tenth of your seed, and of your vineyards, and give them to his officers and to his servants (By which we see that bribery, corruption, and favouritism, are the standing vices of Kings) and he will take the tenth of your men servants, and your maid servants, and your goodliest young men, and your asses, and put them to his work: and he will take the tenth of your sheep, and ye shall be his servants, and ye shall cry out in that day because of your king which ye shall have chosen, AND THE LORD WILL NOT HEAR YOU IN THAT DAY.* This accounts for the continuation of Monarchy, neither do the characters of the few good Kings which have lived since, either sanctify the title, or blot out the sinfulness of the origin, the high encomium given of David takes no notice of him officially as a King, but only as a Man after God's own heart. Nevertheless the People refused to obey the voice of Samuel, and they said, *Nay but we will have a King over us, that we may be like all the nations, and that our King may judge us, and go out before us and fight our battles.* Samuel continued to reason with them but to no purpose, he set before them their ingratitude, but all would not avail, and seeing them fully bent on their folly, he cried out, *I will call unto the Lord, and he shall send thunder and rain (which was then a punishment, being in the time of wheat harvest) that ye may per-*

78 David. See 1 Kings 2.4

ceive and see that your wickedness is great which ye have done in the sight of the Lord, IN ASKING YOU A KING. So Samuel called unto the Lord, and the Lord sent thunder and rain that day, and all the people greatly feared the Lord and Samuel. And all the people said unto Samuel, Pray for thy servants unto the Lord thy God that we die not. for WE HAVE ADDED UNTO OUR SINS THIS EVIL, TO ASK A KING. These portions of scripture are direct and positive. They admit of no equivocal construction. That the Almighty hath here entered his protest against monarchical government is true, or the scripture is false. And a man hath good reason to believe that there is as much of king-craft as priestcraft in withholding the scripture from the public in popish countries. For monarchy in every instance is the popery of government.

To the evil of monarchy we have added that of hereditary succession, and as the first is a degradation and lessening of ourselves, so the second, claimed as a matter of right, is an insult and imposition on posterity. For all men being originally equals, no *one* by *birth* could have a right to set up his own family in perpetual preference to all others for ever, and tho' himself might deserve some decent degree of honors of his contemporaries, might be far too unworthy to inherit them. One of the strongest natural proofs of the folly of hereditary right in kings, is that nature disapproves it, otherwise she would not so frequently turn it into ridicule, by giving mankind an *ass* for a *lion*.

Secondly, as no man at first could possess any other public honors than were bestowed upon him, so the givers of those honors could have no power to give away the right of posterity, and though they might say "we choose you for our head," they could not without manifest injustice to their children say "that your children and your children's children shall reign over our's forever." Because such an unwise, unjust, unnatural compact might (perhaps) in the next succession put them under the government of a rogue or a fool. Most wise men in their private sentiments have ever treated hereditary right with contempt, yet it is one of those evils which when once established is not easily removed: many submit from fear, others from superstition, and the more powerful part shares with the king the plunder of the rest.

This is supposing the present race of kings in the

world to have had an honorable origin. Whereas it is more than probable, that, could we take off the dark covering of antiquity and trace them to their first rise we should find the first of them nothing better than the principal ruffian of some restless gang, whose savage manners or pre-eminence in subtlety obtained him the title of chief among plunderers and who by increasing in power and extending his depredations, over-awed the quiet and defenceless to purchase their safety by frequent contributions. Yet his electors could have no idea of giving hereditary right to his descendants, because such a perpetual exclusion of themselves was incompatible with the free and unrestrained principles they profess to live by. Wherefore, hereditary succession in the early ages of monarchy could not take place as a matter of claim, but as something casual or complemental, but as few or no records were extant in those days, and traditionary history stuff'd with fables, it was very easy, after the lapse of a few generations, to trump up some superstitious tale conveniently timed, Mahomet-like, to cram hereditary right down the throats of the vulgar. Perhaps the disorders which threatened, or seemed to threaten on the decease of a leader and the choice of a new one (for elections among ruffians could not be very orderly) induced many at first to favour hereditary pretensions by which means it happened, as it hath happened since that what at first was submitted to as a convenience was afterwards claimed as a right.

England since the conquest hath known some few good monarchs, but groaned beneath a much larger number of bad ones, yet no man in his senses can say that their claim under William the Conqueror is a very honorable one. A French Bastard landing with an armed Banditti and establishing himself king of England against the consent of the natives, is in plain terms a very paltry rascally original—It certainly hath no divinity in it. However it is needless to spend much time in exposing the folly of hereditary right, if there are any so weak as to believe it, let them promiscuously worship the *Ass* and the *Lion*, and welcome. I shall neither copy their humility, nor disturb their devotion.

Yet I should be glad to ask how they suppose King

66 Mahomet-like, an allusion to the belief that Mohammed, prophet of Islam, carefully timed for his political purposes the revelations upon which the Koran is based

came at first? The question admits but of three answers, viz either by lot, by election, or by usurpation. If the first king was taken by lot, it establishes a precedent for the next, which excludes hereditary succession. Saul was by lot, yet the succession was not hereditary, neither does it appear from that transaction that there was any intention it ever should. If the first king of any country was by election that likewise establishes a precedent for the next, for to say that the right of all future generations is taken away by the act of the first electors in their choice not only of a king, but of a family of kings for ever, hath no parallel in or out of scripture but the doctrine of original sin, which supposes the free will of all men lost in Adam, and from such comparison, and it will admit of no other, hereditary succession can derive no glory. For as in Adam all sinned, and as in the first electors all men obeyed, as in the one all mankind were subjected to Satan, and in the other to sovereignty, as our innocence was lost in the first, and our authority in the last, and as both disable us from reassuming some former state and privilege, it unanswerably follows that original sin and hereditary succession are parallels. Dishonorable rank! inglorious connection! yet the most subtle sophist cannot produce a juster simile.

As to usurpation, no man will be so hardy as to defend it, and that William the Conqueror was an usurper is a fact not to be contradicted. The plain truth is, that the antiquity of English monarchy will not bear looking into.

But it is not so much the absurdity as the evil of hereditary succession which concerns mankind. Did it insure a race of good and wise men it would have the seal of divine authority, but as it opens a door to the *foolish*, the *wicked*, and the *improper*, it hath in it the nature of oppression. Men who look upon themselves born to reign, and others to obey, soon grow insolent — Selected from the rest of mankind, their minds are early poisoned by importance, and the world they act in differs so materially from the world at large, that they have but little opportunity of knowing its true interest. and when they succeed to the government are frequently the most ignorant and unfit of any throughout the dominions.

Another evil which attends hereditary succession is, that the throne is subject to be possessed by a minor at any age, all which time the regency acting under the cover of a king have every opportunity and inducement

to betray their trust. The same national misfortune happens when a king worn out with age and infirmity enters the last stage of human weakness. In both these cases the public becomes a prey to every miscreant who can tempt successfully with the follies either of age or infancy.

The most plausible plea which hath ever been offered in favor of hereditary succession is, that it preserves a Nation from civil wars, and were this true, it would be weighty, whereas it is the most barefaced falsity ever imposed upon mankind. The whole history of England disowns the fact. Thirty kings and two minors have reigned in that distracted kingdom since the conquest, in which time there has been (including the Revolution) no less than eight civil wars and nineteen Rebellions. Wherefore instead of making for peace, it makes against it, and destroys the very foundation it seems to stand upon.

The contest for monarchy and succession, between the houses of York and Lancaster, laid England in a scene of blood for many years. Twelve pitched battles besides skirmishes and sieges were fought between Henry and Edward. Twice was Henry prisoner to Edward, who in his turn was prisoner to Henry. And so uncertain is the fate of war and the temper of a Nation, when nothing but personal matters are the ground of a quarrel, that Henry was taken in triumph from a prison to a palace, and Edward obliged to fly from a palace to a foreign land, yet, as sudden transitions of temper are seldom lasting, Henry in his turn was driven from the throne, and Edward recalled to succeed him. The parliament always following the strongest side.

This contest began in the reign of Henry the 6th, and was not entirely extinguished till Henry the 7th, in whom the families were united. Including a period of 67 years, viz from 1422 to 1489.

In short, monarchy and succession have laid (not this or that kingdom only) but the world in blood and ashes. 'Tis a form of government which the word of God bears testimony against, and blood will attend it.

If we inquire into the business of a King, we shall

4 Saul . . . lot. See 1 Kings 10:17-24. • 65 York and Lancaster, the two houses which contended for the rule in England after the deposition of Richard II in 1399. The period described by Paine is that of the Wars of the Roses, so-called because the emblem of the Lancastrians was a red rose, that of the Yorkists, a white one.

find that in some countries they may have none; and after sauntering away their lives without pleasure to themselves or advantages to the nation, withdraw from the scene, and leave their successors to tread the same idle round. In absolute monarchies the whole weight of business civil and military lies on the King, the children of Israel in their request for a King urged this plea, "that he may judge us, and go out before us and fight our battles." But in countries where he is neither a judge
 10 nor a general, as in England, a man would be puzzled to know what *is* his business

The nearer any government approaches to a Republic, the less business there is for a King. It is somewhat difficult to find a proper name for the government of England. Sir William Meredith calls it a Republic, but in its present state it is unworthy of the name, because the corrupt influence of the Crown, by having all the places in its disposal, hath so effectually swallowed up the power, and eaten out the virtue of the House of Com-
 20 mons (the Republican part in the constitution) that the government of England is nearly as monarchical as that of France or Spain. Men fall out with names without understanding them. For 'tis the republican and not the monarchical part of the constitution of England which Englishmen glory in, viz. the liberty of choosing an house of commons from out of their own body—and it is easy to see that when republican virtues fail, slavery ensues. Why is the Constitution of England sickly? but because monarchy hath poisoned the Re-
 30 public; the crown has engrossed the Commons.

In England a king hath little more to do than to make war and give away places, which in plain terms is to impoverish the nation and set it together by the ears. A pretty business indeed for a man to be allowed eight hundred thousand sterling a year for, and worshipped into the bargain! Of more worth is one honest man to society, and in the sight of God, than all the crowned ruffians that ever lived.

THOUGHTS ON THE PRESENT STATE OF AMERICAN AFFAIRS

In the following pages I offer nothing more than simple
 40 facts, plain arguments, and common sense. and have no other preliminaries to settle with the reader, than that

he will divest himself of prejudice and prepossession and suffer his reason and his feeling to determine for themselves that he will put on, or rather that he will not put off, the true character of a man, and generously enlarge his views beyond the present day.

Volumes have been written on the subject of the struggle between England and America. Men of all ranks have embarked in the controversy, from different motives, and with various designs; but all have been ineffectual, and the period of debate is closed. Arms as the last resource decide the contest; the appeal was the choice of the King, and the continent has accepted the challenge.

It hath been reported of the late Mr. Pelham (who tho' an able minister was not without his faults) that on his being attacked in the House of Commons on the score that his measures were only of a temporary kind, replied, "*they will last my time.*" Should a thought so fatal and unmanly possess the Colonies in the present contest, the name of Ancestors will be remembered by future generations with detestation.

The Sun never shined on a cause of greater worth. 'Tis not the affair of a City, a County, a Province, or a Kingdom, but of a Continent—of at least one eighth part of the habitable globe. 'Tis not the concern of a day, a year, or an age, posterity are virtually involved in the contest, and will be more or less affected even to the end of time by the proceedings now. Now is the seedtime of continental union, faith and honor. The least fracture now, will be like a name engraved with the point of a pin on the tender rind of a young oak, the wound would enlarge with the tree, and posterity react it in full grown characters.

By referring the matter from argument to arms, a new æra for politics is struck—a new method of thinking has arisen. All plans, proposals, &c. prior to the nineteenth of April, i. e. to the commencement of hostilities, are like the almanacks of last year; which though proper then, are superceded and useless now. Whatever was advanced by the advocates on either side of the

15 Sir William Meredith (1725?-1790), an English political leader, and one time prominent in the Whig opposition to the Tory ministry.
 • 55 Mr. Pelham, Henry Pelham (1694-1754), prime minister of Great Britain, 1744-1754. • 78 nineteenth of April, the date of the engagement at Lexington.

question then, terminated in one and the same point, viz. a union with Great Britain, the only difference between the parties was the method of effecting it; the one proposing force, the other friendship, but it has so far happened that the first has failed, and the second has withdrawn her influence

As much has been said of the advantages of reconciliation, which, like an agreeable dream, has passed away and left us as we were, it is but right that we should examine the contrary side of the argument, and enquire into some of the many material injuries which these Colonies sustain, and always will sustain, by being connected with and dependant on Great Britain. To examine that connection and dependance, on the principles of nature and common sense, to see what we have to trust to, if separated, and what we are to expect, if dependant.

I have heard it asserted by some, that as America has flourished under her former connection with Great Britain, the same connection is necessary toward her future happiness, and will always have the same effect.—Nothing can be more fallacious than this kind of argument.—We may as well assert that because a child has thrived upon milk, that it is never to have meat, or that the first twenty years of our lives is to become a precedent for the next twenty But even this is admitting more than is true; for I answer roundly, that America would have flourished as much, and probably much more, had no European power taken any notice of her The commerce by which she hath enriched herself are the necessities of life, and will always have a market while eating is the custom of Europe

But she has protected us, say some That she hath engrossed us is true, and defended the Continent at our expence as well as her own, is admitted, and she would have defended Turkey from the same motive, viz. for the sake of trade and dominion.

Alas! we have been long led away by ancient prejudices and made large sacrifices to superstition We have boasted the protection of Great Britain, without considering, that her motive was *interest* not *attachment*; and that she did not protect us from *our enemies* on *our account*, but from her enemies on her own account, from those who had no quarrel with us on any *other account*, and who will always be our enemies on the *same account*. Let Britain waive her pretensions to the continent, or the continent throw off the dependance, and

we should be at peace with France and Spain were they at war with Britain The miseries of Hanover's last war ought to warn us against connections.

It hath lately been asserted in Parliament, that the colonies have no relation to each other but through the parent country, i. e. that Pennsylvania and the Jerseys, and so on for the rest, are sister colonies by the way of England, this is certainly a very roundabout way of proving relationship, but it is the nearest and only true way of proving enmity (or enemyship, if I may so call it). France and Spain never were, nor perhaps ever will be, our enemies as *Americans*, but as our being the *subjects of Great Britain*.

But Britain is the parent country, say some Then the more shame upon her conduct Even brutes do not devour their young, nor savages make war upon their families, wherefore, the assertion, if true, turns to her reproach, but it happens not to be true, or only partly so, and the phrase *parent* or *mother country* hath been jesuitically adopted by the King and his parasites, with a low papistical design of gaining an unfair bias on the credulous weakness of our minds. Europe, and not England, is the parent country of America. This new world hath been the asylum for the persecuted lovers of civil and religious liberty from *every part* of Europe. Hither have they fled, not from the tender embraces of the mother, but from the cruelty of the monster; and it is so far true of England, that the same tyranny which drove the first emigrants from home, pursues their descendants still.

In this extensive quarter of the globe, we forget the narrow limits of three hundred and sixty miles (the extent of England) and carry our friendship on a larger scale, we claim brotherhood with every European Christian, and triumph in the generosity of the sentiment.

It is pleasant to observe by what regular gradations we surmount the force of local prejudices, as we enlarge our acquaintance with the world A man born in any town in England divided into parishes, will naturally associate most with his fellow parishioners (because their interests in many cases will be common) and distinguish him by the name of *neighbor*: if he meet him but a

48 Hanover's last war, the Seven Years' War (1756-1763), estimated to have cost 900,000 lives

few miles from home, he drops the narrow idea of a street, and salutes him by the name of *townsman*; if he travel out of the country and meet him in any other, he forgets the minor divisions of street and town, and calls him *country-man*, i.e. *county-man*; but if in their foreign excursions they should associate in France, or any other part of *Europe*, their local remembrance would be enlarged into that of *Englishman*. And by a just parity of reasoning, all Europeans meeting in America, or
10 any other quarter of the globe, are *countrymen*: for England, Holland, Germany, or Sweden, when compared with the whole, stand in the same places on the larger scale, which the divisions of street, town, and county do on the smaller ones. Distinctions too limited for Continental minds. Not one third of the inhabitants, even of this province are of English descent. Wherefore, I reprobate the phrase of parent or mother country applied to England only, as being false, selfish, narrow and ungenerous.

20 But, admitting that we were all of English descent, what does it amount to? Nothing. Britain, being now an open enemy, extinguishes every other name and title and to say that reconciliation is our duty, is truly farcical. The first king of England, of the present line (William the Conqueror) was a Frenchman, and half the Peers of England are descendants from the same country, wherefore, by the same method of reasoning, England ought to be governed by France.

Much hath been said of the united strength of Britain
30 and the Colonies, that in conjunction they might bid defiance to the world. But this is mere presumption, the fate of war is uncertain, neither do the expressions mean any thing, for this Continent would never suffer itself to be drained of inhabitants, to support the British arms in either Asia, Africa or Europe.

Besides, what have we to do with setting the world at defiance? Our plan is commerce, and that, well attended to, will secure us the peace and friendship of all Europe, because it is the enterest of all Europe to
40 have America a *free port*. Her trade will always be a protection, and her barrenness of gold and silver secure her from invaders.

I challenge the warmest advocate of reconciliation to show a single advantage that this Continent can reap, by being connected with Great Britain. I repeat the challenge, not a single advantage is derived. Our corn

will fetch its price in any market in Europe, and our imported goods must be paid for buy them where we will.

But the injuries and disadvantages which we sustain by that connection, are without number, and our duty to mankind at large, as well as to ourselves, instruct us to renounce the alliance. Because, any submission to, or dependance on, Great Britain, tends directly to involve this Continent in European wars and quarrels, and set us at variance with nations who would otherwise seek our friendship, and against whom we have neither anger nor complaint. As Europe is our market for trade, we ought to form no partial connection with any part of it. 'Tis the true interest of America to steer clear of European contentions, which she can never do, while by her dependance on Britain, she is made the make-weight in the scale of British politics.

Europe is too thickly planted with kingdoms to be long at peace, and wherever a war breaks out between England and any foreign power, the trade of America goes to ruin, *because of her connection with Britain*. The next war may not turn out like the last and should it not, the advocates for reconciliation now will be wishing for separation then, because neutrality in that case would be a safer convoy than a man of war. Everything that is right or reasonable pleads for separation. The blood of the slain, the weeping voice of nature cries, 'TIS TIME TO PART. Even the distance at which the Almighty hath placed England and America is a strong and natural proof that the authority of the one over the other, was never the design of heaven. The time likewise at which the Continent was discovered, adds weight to the argument, and the manner in which it was peopled, encreases the force of it.—The Reformation was preceded by the discovery of America. As if the Almighty graciously meant to open a sanctuary to the persecuted in future years, when home should afford neither friendship nor safety.

The authority of Great Britain over this Continent, is a form of government, which sooner or later must have an end. And a serious mind can draw no true pleasure by looking forward, under the painful and positive conviction that what he calls "the present constitution" is

16 this province, Pennsylvania • 29 Much . . . said. See, for example Jonathan Boucher's preface, quoted on p. 314

merely temporary. As parents, we can have no joy knowing that *this government* is not sufficiently lasting to insure any thing which we may bequeath to posterity. And by a plain method of argument, as we are running the next generation into debt, we ought to do the work of it, otherwise we use them meanly and pitifully. In order to discover the line of our duty rightly, we should take our children in our hand, and fix our station a few years farther into life, that eminence will present a prospect which a few present fears and prejudices conceal from our sight.

Though I would carefully avoid giving unnecessary offence, yet I am inclined to believe, that all those who espouse the doctrine of reconciliation, may be included within the following descriptions.

Interested men, who are not to be trusted, weak men who *cannot* see, prejudiced men who *will not* see, and a certain set of moderate men who think better of the European world than it deserves, and this last class, by an ill-judged deliberation, will be the cause of more calamities to this continent than all the other three.

It is the good fortune of many to live distant from the scene of present sorrow, the evil is not sufficiently brought to *their* doors to make *them* feel the precariousness with which all American property is possessed. But let our imaginations transport us a few moments to Boston, that seat of wretchedness will teach us wisdom, and instruct us for ever to renounce a power in whom we can have no trust. The inhabitants of that unfortunate city who but a few months ago were in ease and affluence, have now no other alternative than to stay and starve, or turn out to beg. Endangered by the fire of their friends if they continue within the city, and plundered by the soldiery if they leave it in their present situation they are prisoners without the hope of redemption and in a general attack for their relief they would be exposed to the fury of both armies.

Men of passive tempers look somewhat lightly over the offences of Great Britain and still hoping for the best, are apt to call out, *come, come we shall be friends again for all this*. But examine the passions and feelings of mankind. Bring the doctrine of reconciliation to the touchstone of nature, and then tell me whether you can hereafter love, honor, and faithfully serve the power that hath carried fire and sword into your land? If you cannot do all these, then are you only deceiving

yourselves, and by your delay bringing ruin upon posterity. Your future connection with Britain, whom you can neither love nor honor, will be forced and unnatural, and being formed only on the plan of present convenience, will in a little time fall into a relapse more wretched than the first. But if you say, you can still pass the violations over, then I ask, Hath your house been burnt? Hath your property been destroyed before your face? Are your wife and children destitute of a bed to lie on, or bread to live on? Have you lost a parent or child by their hands, and yourself the ruined and wretched survivor? If you have not, then are you not a judge of those who have. But if you have, and can still shake hands with the murderers, then are you unworthy the name of husband, father, friend, or lover, and whatever may be your rank or title in life, you have the heart of a coward, and the spirit of a sycophant.

This is not inflaming or exaggerating matters, but trying them by those feelings and affections which nature justifies, and without which we should be incapable of discharging the social duties of life, or enjoying the felicities of it. I mean not to exhibit horror for the purpose of provoking revenge, but to awaken us from fatal and unmanly slumbers, that we may pursue determinately some fixed object. 'Tis not in the power of Britain or of Europe to conquer America, if she doth not conquer herself by delay and timidity. The present winter is worth an age if rightly employed, but if lost or neglected the whole continent will partake of the misfortune, and there is no punishment which that man doth not deserve, be he who, or what, or where he will, that may be the means of sacrificing a season so precious and useful.

'Tis repugnant to reason, to the universal order of things to all examples from former ages, to suppose that this continent can long remain subject to any external power. The most sanguine in Britain doth not think so. The utmost stretch of human wisdom cannot, at this time, compass a plan, short of separation which can promise the continent even a year's security. Reconciliation is *now* a fallacious dream. Nature has deserted the connection and art cannot supply her place. For, as Milton wisely expresses, "never can true reconcilement grow where wounds of deadly hate have pierced so deep."

27 Boston, besieged from July 1775 until March 1776 • 88 Milton.
See *Paradise Lost*, Bk. IV, ll. 98-99

Every quiet method for peace hath been ineffectual
Our prayers have been rejected with disdain; and hath
tended to convince us that nothing flatters vanity or con-
firms obstinacy in Kings more than repeated petition-
ing—and nothing hath contributed more than that very
measure to make the Kings of Europe absolute Witness
Denmark and Sweden Wherefore, since nothing but
blows will do, for God's sake let us come to a final
separation, and not leave the next generation to be cut-
10 ting throats under the violated unmeaning names of
parent and child

To say they will never attempt it again is idle and
visionary, we thought so at the repeal of the stamp act,
yet a year or two undeceived us, as well may we suppose
that nations which have been once defeated will never
renew the quarrel

As to government matters, 'tis not in the power of
Britain to do this Continent justice the business of it
will soon be too weighty and intricate to be managed
20 with any tolerable degree of convenience, by a power
so distant from us, and so very ignorant of us, for if
they cannot conquer us they cannot govern us To be
always running three or four thousand miles with a tale
or a petition, waiting four or five months for an answer,
which, when obtained, requires five or six more to ex-
plain it in, will in a few years be looked upon as folly
and childishness—There was a time when it was proper,
and there is a proper time for it to cease

Small islands not capable of protecting themselves,
30 are the proper objects for government to take under
their care, but there is something absurd in supposing
a Continent to be perpetually governed by an island
In no instance hath nature made the satellite larger than
its primary planet, and as England and America, with
respect to each other, reverse the common order of
nature, it is evident that they belong to different sys-
tems. England to Europe America to itself

I am not induced by motives of pride, party or resent-
ment to espouse the doctrine of separation and inde-
pendance, I am clearly, positively, and conscientiously
40 persuaded that 'tis the true interest of this continent to
be so, that everything short of *that* is mere patchwork,
that it can afford no lasting felicity—that it is leaving the
sword to our children, and shrinking back at a time
when a little more, a little further, would have rendered
this continent the glory of the earth

As Britain hath not manifested the least inclination
towards a compromise, we may be assured that no terms
can be obtained worthy the acceptance of the continent
or any ways equal to the expence of blood and treasure
we have been already put to

The object contended for, ought always to bear some
just proportion to the expence The removal of North,
or the whole detestable junto, is a matter unworthy the
millions we have expended A temporary stoppage of
trade was an inconvenience, which would have suffi-
ciently balanced the repeal of all the acts complained of
had such repeals been obtained, but if the whole Con-
tinent must take up arms, if every man must be a soldier,
'tis scarcely worth our while to fight against a contempt-
ible ministry only Dearly, dearly do we pay for the
repeal of the acts, if that is all we fight for; for, in a
just estimation 'tis as great a folly to pay a bunker-hill
price for law as for land As I have always considered
the independancy of this Continent, as an event which
sooner or later must arrive, so from the late rapid prog-
ress of the Continent to maturity, the event cannot be
far off Wherefore, on the breaking out of hostilities,
it was not worth the while to have disputed a matter
which time would have finally redressed, unless we meant
to be in earnest otherwise it is like wasting an estate
on a suit at law, to regulate the trespasses of a tenant
whose lease is just expiring No man was a warmer
wisher for a reconciliation than myself, before the fatal
nineteenth of April, 1775, but the moment the event of
that day was made known, I rejected the hardened
sullen-tempered Pharaoh of England for ever, and dis-
dain the wretch, that with the pretended title of FATHER
OF HIS PEOPLE can unfeelingly hear of their slaughter,
and composedly sleep with their blood upon his soul

But admitting that matters were now made up, what
would be the event? I answer, the ruin of the conti-
nent And that for several reasons.

First The powers of governing still remaining in the
hands of the king, he will have a negative over the
whole legislation of this Continent And as he hath

7 Denmark and Sweden, where quarrels among the nobles had led
to the establishment of absolute monarchy, under Frederick III of
Denmark in 1660 and Gustavus III of Sweden in 1772 • 53 North, Lord
North (1733-1792), prime minister of Great Britain, 1770-1782 • 63
bunker-hill price Killed and wounded numbered nearly one third of
the troops engaged on both sides

shown himself such an inveterate enemy to liberty, and discovered such a thirst for arbitrary power, is he, or is he not, a proper person to say to these Colonies, *You shall make no laws but what I please!*? And is there any inhabitant of America so ignorant as not to know, that according to what is called the *present Constitution*, this Continent can make no laws but what the king gives leave to, and is there any man so unwise as not to see, that (considering what has happened) he will suffer no law to be made here but such as suits his purpose? We may be as effectually enslaved by the want of laws in America, as by submitting to laws made for us in England. After matters are made up, (as it is called) can there be any doubt, but the whole power of the crown will be exerted to keep this Continent as low and humble as possible? Instead of going forward we shall go backward, or be perpetually quarrelling, or ridiculously petitioning—We are already greater than the King wishes us to be, and will he not hereafter endeavor to make us less? To bring the matter to one point, Is the power who is jealous of our prosperity, a proper power to govern us? Whoever says No, to this question, is an Independent for independency means no more than this, whether we shall make our own laws, or, whether the King, the greatest enemy this Continent hath, or can have, shall tell us "*there shall be no laws but such as I like.*"

But the King, you'll say, has a negative in England, the people there can make no laws without his consent. In point of right and good order, it is something very ridiculous that a youth of twenty-one (which hath often happened) shall say to several millions of people older and wiser than himself, "I forbid this or that act of yours to be law." But in this place I decline this sort of reply, tho' I will never cease to expose the absurdity of it, and only answer that England being the King's residence, and America not so, makes quite another case. The King's negative here is ten times more dangerous and fatal than it can be in England, for *there* he will scarcely refuse his consent to a bill for putting England into as strong a state of defence as possible, and in America he would never suffer such a bill to be passed.

America is only a secondary object in the system of British politics, England consults the good of *this* country no further than it answers her *own* purpose. Wherefore, her own interest leads her to suppress the growth

of *ours*, in every case which doth not promote *her* advantage, or in the least interfere with it. A pretty state we should soon be in under such a second-hand government, considering what has happened! Men do not 50 change from enemies to friends by the alteration of a name. And in order to show that reconciliation *now* is a dangerous doctrine, I affirm *that it would be policy in the king at this time to repeal the acts, for the sake of reinstating himself in the government of the provinces;* In order that HE MAY ACCOMPLISH BY CRAFT AND SUBLITY, IN THE LONG RUN, WHAT HE CANNOT DO BY FORCE AND VIOLENCE IN THE SHORT ONE. Reconciliation and ruin are nearly related.

Secondly.—That as even the best terms which we can 60 expect to obtain can amount to no more than a temporary expedient, or a kind of government by guardianship, which can last no longer than till the Colonies come of age, so the general face and state of things in the interim will be unsettled and unpromising. Emigrants of property will not choose to come to a country whose form of government hangs but by a thread, and who is every day tottering on the brink of commotion and disturbance. And numbers of the present inhabitants would lay hold of the interval to dispose of their 70 effects, and quit the continent.

But the most powerful of all arguments is, that nothing but independence, i. e. a continental form of government, can keep the peace of the continent and preserve it inviolate from civil wars. I dread the event of a reconciliation with Britain *now*, as it is more than probable that it will be followed by a revolt some where or other, the consequences of which may be far more fatal than all malice of Britain.

Thousands are already ruined by British barbarity; 80 (thousands more will probably suffer the same fate). Those men have other feelings than us who have nothing suffered. All they *now* possess is liberty, what they have before enjoyed is sacrificed to its service, and having nothing more to lose they disdain submission. Besides, the general temper of the colonies, towards a British government will be like that of a youth who is nearly out of his time, they will care very little about her. And a government which cannot preserve the peace is 90 no government at all, and in that case we pay our money for nothing, and pray what is it that Britain can do, whose power will be wholly on paper, should a civil

tumult break out the very day after reconciliation? I have heard some men say, many of whom I believe spoke without thinking, that they dreaded an independence fearing that it would produce civil wars. It is but seldom that our first thoughts are truly correct, and that is the case here, for there is ten times more to dread from a patched up connection than from independence. I make the sufferers *see* my own, and I protest, that were I driven from home and home, my property destroyed, and my circumstances ruined, that as a man, sensible of injuries, I could never relish the doctrine of reconciliation, or consider myself bound thereby.

The colonies have manifested such a spirit of good order and obedience to continental government, as is sufficient to make every reasonable person easy and happy on that head. No man can assign the least pretence for his fears, on any other grounds, than such as are truly childish and ridiculous, viz. that one colony will be striving for superiority over another.

20 Where there are no distinctions there can be no superiority, perfect equality affords no temptation. The Republics of Europe are all (and we may say always) in peace. Holland and Switzerland are without wars foreign or domestic. Monarchical governments, it is true, are never long at rest: the crown itself is a temptation to enterprising ruffians at home; and that degree of pride and insolence ever attendant on regal authority, swells into a rupture with foreign powers in instances where a republican government, by being formed on
30 more natural principles, would negotiate the mistake.

If there is any true cause of fear regarding independence, it is because no plan is yet laid down. Men do not see their way out—Wherefore, as an opening into that business I offer the following hints, at the same time modestly affirming, that I have no other opinion of them myself, than that they may be the means of giving rise to something better. Could the straggling thoughts of individuals be collected, they would frequently form materials for wise and able men to improve
40 into useful matter.

LET the assemblies be annual, with a president only. The representation more equal, their business wholly domestic, and subject to the authority of a Continental Congress.

Let each Colony be divided into six, eight, or ten convenient districts, each district to send a proper number of Delegates to Congress, so that each Colony send

at least thirty. The whole number in Congress will be at least 390. Each Congress to sit and to choose a President by the following method. When the Delegates are met, let a colony be taken from the whole thirteen Colonies by lot, after which let the Congress choose (by ballot) a president from out of the Delegates of that province. In the next Congress, let a Colony be taken by lot from twelve only, omitting that Colony from which the president was taken in the former Congress, and so proceeding on till the whole thirteen shall have had their proper rotation. And in order that nothing may pass into a law but what is satisfactorily just, not less than three fifths of the Congress to be called a majority—He that will promote discord, under a government so equally formed as this, would have joined Lucifer in his revolt.

But as there is a peculiar delicacy from whom, or in what manner, this business must first arise, and as it seems most agreeable and consistent that it should come from some intermediate body between the governed and the governors, that is, between the Congress and the People, Let a CONTINENTAL CONFERENCE be held in the following manner, and for the following purpose.

A Committee of twenty six members of Congress, viz. Two for each colony. Two members from each house or Assembly, or Provincial convention, and five Representatives of the people at large, to be chosen in the capital city or town of each Province, for, and in behalf of the whole Province, by as many qualified voters as shall think proper to attend from all parts of the Province for that purpose, or, if more convenient, the Representatives may be chosen in two or three of the most populous parts thereof. In this CONFERENCE, thus assembled, will be united the two grand principles of business, *knowledge* and *power*. The members of Congress, Assemblies, or Conventions, by having had experience in national concerns, will be able and useful counsellors, and the

23 Holland and Switzerland. The United Netherlands (northern Holland) were a republic in 1814, they and Switzerland were frequently cited by Americans as precedents in their arguments against monarchy. • 41 a president only. Paine's fear of monarchy was accompanied by such a strong distrust of executive power that he favored abolishing the office of governor of an individual state. It will also be evident from his proposed scheme of government that he was opposed both to a bicameral legislature and to the principle of checks and balances.

whole, being impowered by the people, will have a truly legal authority.

The conferring members being met, let their business be to frame a CONTINENTAL CHARTER, or Charter of the United Colonies; (answering to what is called the Magna Charta of England) fixing the number and manner of choosing members of Congress Members of Assembly, with their date of sitting, and drawing the line of business and jurisdiction between them Always remembering, that our strength is continental, not provincial Securing freedom and property to all men, and above all things, the free exercise of religion, according to the dictates of conscience, with such other matter as it is necessary for a charter to contain Immediately after which, the said conference to dissolve, and the bodies which shall be chosen conformable to the said charter, to be the legislators and governors of this continent for the time being Whose peace and happiness may God preserve AMEN.

Should any body of men be hereafter delegated for this or some similar purpose, I offer them the following extracts from that wise observer on governments DRAGONETTI. "The science," says he, "of the politician consists in fixing the true point of happiness and freedom Those men would deserve the gratitude of ages, who should discover a mode of government that contained the greatest sum of individual happiness, with the least national expense"

But where, say some, is the king of America? I'll tell you, Friend he reigns above, and doth not make havoc of mankind like the Royal Brute of Great Britain Yet that we may not appear to be defective even in earthly honors let a day be solemnly set apart for proclaiming the Charter, let it be brought forth placed on the divine law, the Word of God, let a Crown be placed hereon, by which the world may know, that so far as we approve of monarchy, that in America THE LAW IS KING. For as in absolute governments the king is law, so in free countries the law *ought* to be king, and there ought to be no other But lest any ill use should afterwards arise, let the Crown at the conclusion of the ceremony be demolished, and scattered among the People whose right it is

A government of our own is our natural right and when a man seriously reflects on the precariousness of human affairs, he will become convinced, that it is in-

finitely wiser and safer, to form a Constitution of our own in a cool deliberate manner, while we have it in our power, than to trust such an interesting event to time and chance If we omit it now, some Massanello may hereafter arise, who, laying hold of popular disquietudes, may collect together the desperate and the discontented, and by assuming to themselves the powers of government, finally sweep away the liberties of the Continent like a deluge Should the government of America return again into the hands of Britain, the tottering situation of things will be a temptation for some desperate adventurer to try his fortune, and in such a case, what relief can Britain give? Ere she could hear the news, the fatal business might be done, and ourselves suffering like the wretched Britons under the oppression of the conqueror Ye that oppose independence now, ye know not what ye do, ye are opening a door to eternal tyranny, by keeping vacant the seat of government There are thousands and tens of thousands, who would think it glorious to expel from the Continent, that barbarous and hellish power, which hath stirred up the Indians and the Negroes to destroy us, the cruelty hath a double guilt, it is dealing brutally by us, and treacherously by them

To talk of friendship with those in whom our reason forbids us to have faith, and our affections wounded thro' a thousand pores instruct us to detest, is madness and folly Every day wears out the little remains of kindred between us and them, and can there be any reason to hope, that as the relationship expires, the affection will increase, or that we shall agree better when we have ten times more and greater concerns to quarrel over than ever?

Ye that tell us of harmony and reconciliation, can ye restore to us the time that is past? Can ye give to prostitution its former innocence? neither can ye reconcile Britain and America The last cord now is broken, the people of England are presenting addresses against

23 Dragonetti, Giacinto, Marquis degli Dragonetti (1738-1818), a Neapolitan jurist • 28 expense Dragonetti on Virtues and Rewards —Paine • 50 Massanello Thomas Anello, otherwise Massanello, a fisherman of Naples, who after spiriting up his countrymen in the public market place, against the oppression of the Spaniards, to whom the place was then subject, prompted them to revolts, and in the space of a day became king —Paine, in later editions

us. There are injuries which nature cannot forgive, she would cease to be nature if she did. As well can the lover forgive the ravisher of his mistress, as the Continent forgive the murders of Britain. The Almighty hath implanted in us these inextinguishable feelings for good and wise purposes. They are the guardians of his image in our hearts. They distinguish us from the herd of common animals. The social compact would dissolve and justice be extirpated from the earth, or have only a casual existence were we callous to the touches of affection. The robber and the murderer would often escape unpunished, did not the injuries which our tempers sustain, provoke us into justice.

O' ye that love mankind! Ye that dare oppose not only the tyranny but the tyrant, stand forth! Every spot of the old world is over-run with oppression. Freedom hath been hunted round the globe. Asia and Africa have long expelled her—Europe regards her like a stranger, and England hath given her warning to depart. O receive the fugitive, and prepare in time an asylum for mankind.

OF THE PRESENT ABILITY OF AMERICA WITH SOME MISCELLANEOUS REFLECTIONS

I have never met a man either in England or America, who hath not confessed his opinion, that a separation between the countries would take place, one time or other. And there is no instance, in which we have shown less judgment, than in endeavoring to describe, what we call, the ripeness or fitness of the Continent for independance.

As all men allow the measure, and vary only in their opinion of the time, let us, in order to remove mistakes, take a general survey of things, and endeavor if possible to find out the very time. But I need not go far, the inquiry ceases at once, for the *time hath found us*. The general concurrence, the glorious union of all things, proves the fact.

'Tis not in numbers but in unity that our great strength lies, yet our present numbers are sufficient to repel the force of all the world. The Continent has at this time the largest body of armed and disciplined men of any power under Heaven, and is just arrived at that pitch of strength, in which no single Colony is able to support itself, and the whole, when united, is able to do any thing. Our land

force is more than sufficient, and as to naval affairs, we cannot be insensible that Britain would never suffer an American man of war to be built, while the Continent remained in her hands. Wherefore, we should be no forwarder a hundred years hence in that branch than we are now, but the truth is, we should be less so, because the timber of the country is every day diminishing.

Were the Continent crowded with inhabitants, her sufferings under the present circumstances would be intolerable. The more seaport-towns we had, the more should we have both to defend and to lose. Our present numbers are so happily proportioned to our wants, that no man need be idle. The diminution of trade affords an army, and the necessities of an army create a new trade.

Debts we have none, and whatever we may contract on this account will serve as a glorious memento of our virtue. Can we but leave posterity with a settled form of government, an independent constitution of its own, the purchase at any price will be cheap. But to expend millions for the sake of getting a few vile acts repealed and routing the present ministry only, is unworthy the charge, and is using posterity with the utmost cruelty, because it is leaving them the great work to do, and a debt upon their backs from which they derive no advantage. Such a thought's unworthy a man of honor and is the true characteristic of a narrow heart and a piddling politician.

The debt we may contract doth not deserve our regard if the work be but accomplished. No nation ought to be without a debt. A national debt is a national bond, and when it bears no interest, it is in no case a grievance. Britain is oppressed with a debt of upwards of one hundred and forty millions sterling, for which she pays upwards of four millions interest. And as a compensation for her debt, she has a large navy. America is without a debt, and without a navy, yet for a twentieth part of the English national debt, could have a navy as large again. The navy of England is not worth at this time more than three millions and a half sterling.

No country on the globe is so happily situated, or so internally capable of raising a fleet as America. Tar, timber, iron and cordage are her natural produce. We need go abroad for nothing. Whereas the Dutch, who make large profits by hiring out their ships of war to the Spaniards and Portuguese, are obliged to impor-

most of the materials they use. We ought to view the building a fleet as an article of commerce, it being the natural manufactory of this country 'Tis the best money we can lay out A navy when finished is worth more than it cost And is that nice point in national policy, in which commerce and protection are united Let us build, if we want them not, we can sell, and by that means re-place our paper currency with ready gold and silver

In point of manning a fleet, people in general run into great errors, it is not necessary that one fourth part should be sailors The Terrible privateer, Captain Death stood the hottest engagement of any ship last war, yet had not twenty sailors on board, though her complement of men was upwards of two hundred A few able and social sailors will soon instruct a sufficient number of active landsmen in the common work of a ship Wherefore we never can be more capable of beginning on maritime matters than now, while our timber is standing, our fisheries blocked up, and our sailors and shipwrights out of employ Men of war, of seventy and eighty guns, were built forty years ago in New England, and why not the same now? Ship building is America's greatest pride, and in which she will, in time, excel the whole world. The great empires of the east are mostly inland, and consequently excluded from the possibility of rivalling her. Africa is in a state of barbarism, and no power in Europe, hath either such an extent of coast, or such an internal supply of materials Where nature hath given the one, she hath withheld the other; to America only hath she been liberal to both The vast empire of Russia is almost shut out from the sea, wherefore her boundless forests, her tar, iron, and cordage are only articles of commerce

In point of safety, ought we to be without a fleet? We are not the little people now, which we were sixty years ago, at that time we might have trusted our property in the streets, or fields rather, and slept securely without locks or bolts to our doors and windows The case is now altered, and our methods of defence ought to improve with our encrease of property A common pirate, twelve months ago, might have come up the Delaware, and laid the city of Philadelphia under contribution for what sum he pleased, and the same might have happened to other places Nay, any daring fellow, in a brig of 14 or 16 guns, might have robbed the whole continent, and carried off half a million of

money. These are circumstances which demand our attention, and point out the necessity of naval protection.

Some perhaps will say, that after we have made it up with Britain, she will protect us Can they be so unwise as to mean, that she will keep a navy in our harbors for that purpose? Common sense will tell us, that the power which hath endeavored to subdue us, is of all others, the most improper to defend us Conquest may be effected under the pretence of friendship, and ourselves, after a long and brave resistance, be at last cheated into slavery And if her ships are not to be admitted into our harbors, I would ask, how is she to protect us? A navy three or four thousand miles off can be of little use, and on sudden emergencies, none at all Wherefore if we must hereafter protect ourselves, why not do it for ourselves? Why do it for another?

The English list of ships of war, is long and formidable, but not a tenth part of them are at any one time fit for service, numbers of them are not in being, yet their names are pompously continued in the list, if only a plank be left of the ship, and not a fifth part of such as are fit for service, can be spared on any one station at one time. The East and West Indies, Mediterranean, Africa, and other parts, over which Britain extends her claim, make large demands upon her navy From a mixture of prejudice and inattention, we have contracted a false notion respecting the navy of England, and have talked as if we should have the whole of it to encounter at once, and, for that reason, supposed that we must have one as large, which not being instantly practicable, has been made use of by a set of disguised Tories to discourage our beginning thereon Nothing can be further from truth than this, for if America had only a twentieth part of the naval force of Britain, she would be by far an over-match for her, because, as we neither have, nor claim any foreign dominion, our whole force would be employed on our own coast, where we should, in the long run, have two to one the advantage of those who had three or four thousand miles to sail over, before they could attack us, and the same distance to return in order

11 Captain Death, commander of the Terrible, a British privateer captured by the French on December 28, 1756, after a murderous battle About four hundred men were killed Death was of course a pseudonym; his lieutenants were "Spirit" and Ghost

to rent and recruit. And although Britain, by her fleet, hath a check over our trade to Europe, we have as large a one over her trade to the West Indies, which, by laying in the neighborhood of the Continent lies entirely at its mercy.

Some method might be fallen on to keep up a naval force in time of peace, if we should not judge it necessary to support a constant navy. If premiums were to be given to merchants to build and employ in their
10 service, ships mounted with 20, 30, 40, or 50 guns, (the premiums to be in proportion to the loss of bulk to the merchant,) fifty or sixty of those ships, with a few guardships on constant duty, would keep up a sufficient navy, and that without burdening ourselves with the evil so loudly complained of in England, of suffering their fleet in time of peace to lie rotting in the docks. To unite the sinews of commerce and defence is sound policy, for when our strength and our riches play into each other's hand, we need fear no external enemy.

20 In almost every article of defence we abound. Hemp flourishes even to rankness, so that we need not want cordage. Our iron is superior to that of other countries. Our small arms equal to any in the world. Cannon we can cast at pleasure. Saltpeter and gunpowder we are every day producing. Our knowledge is hourly improving. Resolution is our inherent character, and courage has never yet forsaken us. Wherefore, what is it that we want? Why is it that we hesitate? From Britain we can expect nothing but ruin. If she is once admitted
30 to the government of America again, this continent will not be worth living in. Jealousies will be always arising, insurrections will be constantly happening, and who will go forth to quell them? Who will venture his life to reduce his own countrymen to a foreign obedience? The difference between Pennsylvania and Connecticut, respecting some unlocated lands, shows the insignificance of a British government, and fully proves that nothing but Continental authority can regulate Continental matters.

Another reason why the present time is preferable to
40 all others, is, that the fewer our numbers are, the more land there is yet unoccupied, which, instead of being lavished by the king on his worthless dependants, may be hereafter supplied, not only to the discharge of the present debt, but to the constant support of government. No nation under Heaven hath such an advantage as this.

The infant state of the Colonies, as it is called, so far

from being against is an argument in favor of independence. We are sufficiently numerous, and were we more so we might be less united. 'Tis a matter worthy of observation, that the more a country is peopled, the smaller their armies are. In military numbers the ancients far exceeded the moderns, and the reason is evident, for trade being the consequence of population, men became too much absorbed thereby to attend to any thing else. Commerce diminishes the spirit both of Patriotism and military defence. And history sufficiently informs us, that the bravest achievements were always accomplished in the nonage of a nation. With the increase of commerce England hath lost its spirit. The city of London, notwithstanding its numbers, submits to continued insults with the patience of a coward. The more men have to lose, the less willing are they to venture. The rich are in general slaves to fear, and submit to courtly power with the trembling duplicity of a spaniel.

Youth is the seed-time of good habits as well in nations as in individuals. It might be difficult, if not impossible, to form the Continent into one Government half a century hence. The vast variety of interests, occasioned by an increase of trade and population, would create confusion. Colony would be against Colony. Each being able would scorn each other's assistance, and while the proud and foolish gloried in their little distinctions, the wise would lament that the union had not been formed before. Wherefore the present time is the true time for establishing it. The intimacy which is contracted in infancy, and the friendship which is formed in misfortune, are of all others the most lasting and unalterable. Our present union is marked with both these characters: we are young, and we have been distressed, but our concord hath withstood our trouble, and fixes a memorable *Æra* for posterity to glory in.

The present time likewise, is that peculiar time which never happens to a nation but once, viz. the time of forming itself into a government. Most nations have let slip the opportunity, and by that means have been compelled to receive laws from their conquerors, instead of making laws for themselves. First, they had a king, and then a form of government, whereas the articles or charter of government should be formed first, and men delegated to execute them afterwards. But from the errors of other nations let us learn wisdom, and lay hold of the present opportunity—*To begin Government at the right end.*

When William the Conqueror subdued England, he gave them law at the point of the sword; and, until we consent that the seat of government in America be legally and authoritatively occupied, we shall be in danger of having it filled by some fortunate ruffian, who may treat us in the same manner, and then, where will be our freedom? where our property?

As to religion, I hold it to be the indispensable duty of government to protect all conscientious professors thereof, and I know of no other business which government has to do therewith. Let a man throw aside that narrowness of soul, that selfishness of principle, which the ruggards of all professions are so unwilling to part with, and he will be at once delivered of his fears on that head. Suspicion is the companion of mean souls, and the bane of all good society. For myself, I fully and conscientiously believe, that it is the will of the Almighty that there should be a diversity of religious opinions among us. It affords a larger field for our christian kindness. were we all of one way of thinking, our religious dispositions would want matter for probation, and on this liberal principles I look on the various denominations among us, to be like children of the same family, differing only in what is called their Christian names.

In pages 343 and 344 I threw out a few thoughts on the propriety of a continental charter (for I only presume to offer hints, not plans) and in this place, I take the liberty of re-mentioning the subject, by observing, that a charter is to be understood as a bond of solemn obligation, which the whole enters into, to support the right of every separate part, whether of religion, professional freedom, or property. A right reckoning makes long friends.

I have heretofore likewise mentioned the necessity of a large and equal representation, and there is no political matter which more deserves our attention. A small number of electors, or a small number of representatives, are equally dangerous. But if the number of representatives be not only small, but unequal, the danger is increased. As an instance of this, I mention the following, when the petition of the associates was before the House of Assembly of Pennsylvania, twenty-eight members only were present, all the Bucks county members being eight voted against it, and had seven of the Chester members done the same, this whole province had been governed by two counties only, and this danger it is always exposed to. The unwarrantable stretch

likewise, which the house made in their last sitting, to gain an undue authority over the Delegates of that Province, ought to warn the people at large, how they trust power out of their hands. A set of instructions for their Delegates were put together, which in point of sense and business would have dishonoured a school-boy, and after being approved by a few, a very few, without doors, were carried into the house, and there passed in behalf of the whole Colony, whereas, did the whole Colony know with what ill-will that house had entered on some necessary public measures, they would not hesitate a moment to think them unworthy of such a trust.

Immediate necessity makes many things convenient, which if continued would grow into oppressions. Expedience and right are different things. When the calamities of America required a consultation, there was no method so ready, or at that time so proper, as to appoint persons from the several houses of Assembly for that purpose, and the wisdom with which they have proceeded hath preserved this Continent from ruin. But as it is more than probable that we shall never be without a CONGRESS, every well wisher to good order must own that the mode for choosing members of that body, deserves consideration. And I put it as a question to those who make a study of mankind, whether representation and election is not too great a power for one and the same body of men to possess. When we are planning for posterity, we ought to remember that virtue is not hereditary.

It is from our enemies that we often gain excellent maxims, and are frequently surprised into reason by their mistakes. Mr. Cornwall (one of the Lords of the Treasury) treated the petition of the New-York Assembly with contempt, because *that* house, he said, consisted but of twenty-six members, which trifling number, he argued, could not with decency be put for the whole. We thank him for his involuntary honesty.

40 petition associates, an allusion, apparently, to the Association of 1774, a series of nonimportation, nonconsumption, and nonexportation resolutions adopted by the First Continental Congress. • 77 Mr. Cornwall, Charles Wolfram Cornwall (1735-1789), Lord of the Treasury in North's cabinet, 1774-1780, later speaker of the House of Commons, 1780-1789. • 82 honesty Those who would fully understand of what great consequence a large and equal representation is to a State, should read Burgh's Political Disquisitions.—Paine. The reference is to *Political Disquisitions* (3 vols., 1774-1775) by James Burgh (1714-1775), a British reformer who was friendly to the American colonists.

TO CONCLUDE, however strange it may appear to some, or however unwilling they may be to think so, matters not, but many strong and striking reasons may be given to shew, that nothing can settle our affairs so expeditiously as an open and determined DECLARATION FOR INDEPENDANCE Some of which are,

First—It is the custom of Nations, when any two are at war, for some other powers, not engaged in the quarrel, to step in as mediators, and bring about the Preliminaries of a Peace but while America calls herself the Subject of Great Britain, no power, however well disposed she may be, can offer her Mediation Wherefore, in our present state we may quarrel on for ever

Secondly.—It is unreasonable to suppose, that France or Spain will give us any kind of assistance, if we mean only to make use of that assistance for the purpose of repairing the breach, and strengthening the connection between Britain and America, because, those powers would be sufferers by the consequences

Thirdly.—While we profess ourselves the Subjects of Britain, we must, in the eyes of foreign nations, be considered as Rebels The precedent is somewhat dangerous to *then peace*, for men to be in arms under the name of Subjects we, on the spot, can solve the paradox, but to unite resistance and subjection, requires an idea much too refined for common understanding

Fourthly.—Were a manifesto to be published, and despatched to foreign Courts, setting forth the miseries we have endured, and the peaceful methods which we have ineffectually used for redress, declaring at the same time that not being able any longer to live happily or safely under the cruel disposition of the British court, we have been driven to the necessity of breaking off all connections with her, at the same time, assuring all such Courts of our peaceable disposition towards them, and of our desire of entering into trade with them, such a memorial would produce more good effects to this Continent, than if a ship were freighted with petitions to Britain

Under our present denomination of British Subjects, we can neither be received nor heard abroad the custom of All courts is against us, and will be so, until by an independence we take rank with other Nations

These proceedings may at first seem strange and difficult, but like all other steps which we have already passed over, will in a little time become familiar and agreeable and until an Independance is declared, the Continent will feel itself like a man who continues putting off some unpleasant business from day to day, yet knows it must be done, hates to set about it, wishes it over, and is continually haunted with the thoughts of its necessity

1775-1776

From

The American Crisis

The first Crisis appeared in the *Pennsylvania Journal* for December 19, 1776, and was almost immediately issued as a pamphlet. New Jersey was at the time well-nigh lost and Philadelphia panic-stricken. Washington had even

written to his brother that "if every nerve is not strained to recruit the new army with all possible expedition, I think the game is pretty nearly up" No one would ever guess from Paine's stirring remarks that the situation was so serious His courage, faith, and righteous wrath are here embodied in rhetoric which can yet stir Americans after all these many years The use of alliteration, antithesis, balance, the rhetorical question, Biblical echoes, and other oratorical devices shows how well Paine had learned the first lesson of the propagandist—to aim straight at the apathetic, timid, individual reader Never again, perhaps, did he attain such heights as a phrase-maker The New York legislature made no mistake in giving Paine a farm because "his literary works, and those especially under the signature of Common Sense, and the Crisis, inspired the citizens of this state with unanimity, confirmed their

confidence in the rectitude of their cause, and have ultimately contributed to the freedom, sovereignty, and independence of the United States."

NUMBER I

These are the times that try men's souls. The summer soldier and the sunshine patriot will, in this crisis, shrink from the service of his country; but he that stands it now, deserves the love and thanks of man and woman. Tyranny, like hell, is not easily conquered; yet we have this consolation with us, that the harder the conflict, the more glorious the triumph. What we obtain too cheap, we esteem too lightly—"Tis dearer only that gives everything its value. Heaven knows how to put a proper price upon its goods; and it would be strange indeed, if so celestial an article as FREEDOM should not be highly rated. Britain, with an army to enforce her tyranny, has declared that she has a right (*not only to*) TAX but "to BIND us in ALL CASES WHATSOEVER," and if being *bound in that manner*, is not slavery, then is there not such a thing as slavery upon earth. Even the expression is impious, for so unlimited a power can belong only to GOD.

Whether the Independence of the Continent was declared too soon, or delayed too long, I will not now enter into as an argument; my own simple opinion is, that had it been eight months earlier, it would have been much better. We did not make a proper use of last winter; neither could we, while we were in a dependent state. However, the fault, if it were one, was all our own; we have none to blame but ourselves. But no great deal is lost yet; all that Howe has been doing for this month past, is rather a ravage than a conquest, which the spirit of the Jerseys a year ago would have quickly repulsed and which time and a little resolution will soon recover.

I have as little superstition in me as any man living; but my secret opinion has ever been, and still is, that God Almighty will not give up a people to military destruction, or leave them unsupportedly to perish, who have so earnestly and so repeatedly sought to avoid the calamities of war, by every decent method which wisdom could invent. Neither have I so much of the infidel in me, as to suppose that he has relinquished the government of the world, and given us up to the care of devils,

and as I do not, I cannot see on what grounds the king of Britain can look up to Heaven for help against us: a common murderer, a highwayman, or a house-breaker, has as good a pretence as he.

'Tis surprising to see how rapidly a panic will sometimes run through a country. All nations and ages have been subject to them. Britain has trembled like an ague at the report of a French fleet of flat-bottomed boats, and in the fourteenth century the whole English army, after ravaging the kingdom of France, was driven back like men petrified with fear, and this brave exploit was performed by a few broken forces collected and headed by a woman, Joan of Arc. Would that heaven might inspire some Jersey maid to spirit up her countrymen, and save her fair fellow sufferers from ravage and ravishment! Yet panics, in some cases, have their uses; they produce as much good as hurt. Their duration is always short; the mind soon grows through them, and acquires a firmer habit than before. But their peculiar advantage is, that they are the touchstones of sincerity and hypocrisy, and bring things and men to light, which might otherwise have lain forever undiscovered. In fact, they have the same effect on secret traitors which an imaginary apparition would have upon a private murderer. They sift out the hidden thoughts of man, and hold them up in public to the world. Many a disguised tory has lately shown his head, that shall penitentially solemnize with curses the day on which Howe arrived upon the Delaware.

As I was with the troops at Fort-Lee, and marched with them to the edge of Pennsylvania, I am well acquainted with many circumstances, which those who live at a distance, know but little or nothing of. Our situation there, was exceedingly cramped, the place being a narrow neck of land between the North-River and the Hacken-

Text: an impression dated December 23, 1776, regarded by Professor Peach as the most authentic of its early pamphlet appearances • 27 Howe, William Howe. See note, p. 324 • 29 the Jerseys, East Jersey, whose economic center was New York City, and West Jersey, which looked toward Philadelphia. East Jersey had most of the "spirit" for independence; the western part of the province was predominantly Quaker • 47 a French fleet . . . , assembled at Havre and other ports in 1759, during the Seven Years' War. The projected invasion was halted by British naval victories at Lagos and Quiberon Bay • 48 the fourteenth century Conway remarks that Paine "had no cyclopaedia in his knapsack" and hence placed Joan of Arc (1412-1431) in the wrong century • 68 Fort-Lee, on the western shore of the Hudson, opposite Manhattan Island. It was hastily evacuated on November 20, the Americans even leaving their dinners cooking

sack. Our force was inconsiderable, being not one-fourth so great as Howe could bring against us. We had no army at hand to have relieved the garrison, had we shut ourselves up and stood on our defence. Our ammunition, light artillery, and the best part of our stores, had been removed, on the apprehension that Howe would endeavor to penetrate the Jerseys, in which case Fort Lee could be of no use to us, for it must occur to every thinking man, whether in the army or not, that these
 10 kind of field forts are only for temporary purposes, and last in use no longer than the enemy directs his force against the particular object, which such forts are raised to defend. Such was our situation and condition at Fort-Lee on the morning of the 20th of November, when an officer arrived with information that the enemy with 200 boats had landed about seven miles above. Major General Green, who commanded the garrison, immediately ordered them under arms, and sent express to General Washington at the town of Hackensack, distant
 20 by the way of the ferry, six miles. Our first object was to secure the bridge over the Hackensack, which laid up the river between the enemy and us, about six miles from us, three from them. General Washington arrived in about three-quarters of an hour, and marched at the head of the troops towards the bridge, which place I expected we should have a brush for, however, they did not choose to dispute it with us, and the greatest part of our troops went over the bridge, the rest over the ferry except some which passed at a mill on a small creek.
 30 between the bridge and the ferry, and made their way through some marshy grounds up to the town of Hackensack, and there passed the river. We brought off as much baggage as the wagons could contain, the rest was lost. The simple object was to bring off the garrison, and march them on till they could be strengthened by the Jersey or Pennsylvania militia, so as to be enabled to make a stand. We staid four days at Newark, collected our out-posts with some of the Jersey militia, and marched out twice to meet the enemy, on being informed
 40 that they were advancing, though our numbers were greatly inferior to theirs. Howe, in my little opinion, committed a great error in generalship in not throwing a body of forces off from Staten-Island through Amboy, by which means he might have seized all our stores at Brunswick, and intercepted our march into Pennsylvania, but if we believe the power of hell to be limited,

we must likewise believe that their agents are under some providential control.

I shall not now attempt to give all the particulars of our retreat to the Delaware, suffice it for the present to say, that both officers and man, though greatly harassed and fatigued, frequently without rest, covering, or provision, the inevitable consequences of a long retreat, bore it with a manly and martial spirit. All their wishes centred in one, which was, that the country would turn out and help them to drive the enemy back. *Voltaire* has remarked that King William never appeared to full advantage but in difficulties and in action; the same remark may be made on General Washington, for the character fits him. There is a natural firmness in some minds which cannot be unlocked by trifles, but which when unlocked, discovers a cabinet of fortitude, and I reckon it among those kind of public blessings, which we do not immediately see, that GOD hath blessed him with uninterrupted health, and given him a mind that can even flourish upon care.

I shall conclude this paper with some miscellaneous remarks on the state of our affairs, and shall begin with asking the following question, Why is it that the enemy have left the New-England provinces, and made these middle ones the seat of war? The answer is easy. New England is not infested with tories, and we are. I have been tender in raising the cry against these men, and used numberless arguments to show them their danger, but it will not do to sacrifice a world either to their folly or their baseness. The period is now arrived in which either they or we must change our sentiments, or one or both must fall. And what is a tory? Good God! what is he? I should not be afraid to go with a hundred Whigs against a thousand tories, were they to attempt to get into arms. Every tory is a coward, for servile slavish, self-interested fear is the foundation of Toryism, and a man under such influence, though he may be cruel, never can be brave.

But, before the line of irrecoverable separation be drawn between us, let us reason the matter together.

16 Major General Green, Nathaniel Greene (1742-1793). See Freneau's poem "To the Memory of the Brave Americans," p. 443. • 56
Voltaire (1694-1778) remarked that William III (1650-1702) was "jamais vif que dans un jour de combat," "bright only in a day of battle," see *Le Siècle de Louis XIV* (1751), Chap. 17.

Your conduct is an invitation to the enemy, yet not one in a thousand of you has heart enough to join him. Howe is as much deceived by you as the American cause is injured by you. He expects you will all take up arms and flock to his standard, with muskets on your shoulders. Your opinions are of no use to him, unless you support him personally, for 'tis soldiers, and not Tories, that he wants.

I once felt all that kind of anger, which a man ought to feel against the mean principles that are held by the Tories. A noted one, who kept a tavern at Amboy, was standing at his door, with as pretty a child in his hand, about eight or nine years old, as I ever saw, and after speaking his mind as freely as he thought was prudent, finished with this unfatherly expression, "Well! give me peace in my day." Not a man lives on the continent but fully believes that a separation must some time or other finally take place, and a generous parent should have said, "If there must be trouble, let it be in my day, that my child may have peace:" and this single reflection, well applied, is sufficient to awaken every man to duty. Not a place upon earth might be so happy as America. Her situation is remote from all the wrangling world, and she has nothing to do but to trade with them. A man can distinguish himself between temper and principle, and I am as confident, as I am that God governs the world, that America will never be happy till she gets clear of foreign dominion. Wars, without ceasing, will break out till that period arrives, and the continent must in the end be conqueror, for though the flame of liberty may sometimes cease to shine, the coal can never expire.

America did not, nor does not want force, but she wanted a proper application of that force. Wisdom is not the purchase of a day, and it is no wonder that we should err at the first setting off. From an excess of tenderness we were unwilling to raise an army, and trusted our cause to the temporary defence of a well-meaning militia. A summer's experience has now taught us better, yet with those troops, while they were collected, we were able to set bounds to the progress of the enemy, and, thank God! they are again assembling. I always considered militia as the best troops in the world for a sudden exertion, but they will not do for a long campaign. Howe, it is probable, will make an attempt on this city, should he fail on this side the Delaware, he is ruined. If he succeeds,

our cause is not ruined. He stakes all on his side against a part on ours, admitting he succeeds, the consequences will be, that armies from both ends of the continent will march to assist their suffering friends in the middle states, for he cannot go everywhere, it is impossible. I consider Howe as the greatest enemy the Tories have, he is bringing war into their country, which, had it not been for him and partly for themselves, they had been clear of. Should he now be expelled, I wish with all the devotion of a Christian, that the names of Whig and Tory may never more be mentioned, but should the Tories give him encouragement to come, or assistance if he come, I as sincerely wish that our next year's arms may expel them from the continent, and the Congress appropriate their possessions to the relief of those who have suffered in well-doing. A single successful battle next year will settle the whole. America could carry on a two years' war by the confiscation of the property of disaffected persons, and be made happy by their expulsion. Say not that this is revenge, call it rather the soft resentment of a suffering people, who, having no object in view but the GOOD of ALL, have staked their OWN ALL upon a seemingly doubtful event. Yet it is folly to argue against determined hardness, eloquence may strike the ear, and the language of sorrow draw forth the tear of compassion, but nothing can reach the heart that is steeled with prejudice.

Quitting this class of men, I turn with the warm ardor of a friend to those who have nobly stood, and are yet determined to stand the matter out. I call not upon a few, but upon all—not in THIS state or THAT state, but on EVERY state—up and help us, lay your shoulders to the wheel, better have too much force than too little, when so great an object is at stake. Let it be told to the future world, that in the depth of winter, when nothing but hope and virtue could survive, that the city and country, alarmed at one common danger, came forth to meet and to repulse it. Say not that thousands are gone, turn out your tens of thousands, throw not the burden of the day upon Providence, but "*shew your faith by your works*," that God may bless you. It matters not where you live,

45 this city, Philadelphia. Paine's prediction was borne out in September 1777, but Howe's capture of the city so weakened the British position in the north that the Americans were able to defeat Burgoyne

• 86 "*shew* *works*." See James 2:18

or what rank of life you hold, the evil or the blessing will reach you all. The far and the near, the home counties and the back, the rich and the poor, will suffer or rejoice alike. The heart that feels not now is dead, the blood of his children will curse his cowardice, who shrinks back at a time when a little might have saved the whole, and made *them* happy. I love the man that can smile in trouble, that can gather strength from distress, and grow brave by reflection. 'Tis the business of little minds to shrink, but he whose heart is firm, and whose conscience approves his conduct, will pursue his principles unto death. My own line of reasoning is to myself as straight and clear as a ray of light. Not all the treasures of the world, so far as I believe, could have induced me to support an offensive war, for I think it murder, but if a thief breaks into my house, burns and destroys my property, and kills or threatens to kill me, or those that are in it, and to "*bind me in all cases whatsoever*" to his absolute will, am I to suffer it? What signifies it to me, whether he who does it is a king or a common man, my countryman or not my countryman, whether it be done by an individual villain, or an army of them? If we reason to the root of things we shall find no difference, neither can any just cause be assigned why we should punish in the one case and pardon in the other. Let them call me rebel and welcome, I feel no concern from it, but I should suffer the misery of devils, were I to make a whore of my soul by swearing allegiance to one whose character is that of a sottish, stupid, stubborn, worthless, brutish man. I conceive likewise a horrid idea in receiving mercy from a being, who at the last day shall be shrieking to the rocks and mountains to cover him, and fleeing with terror from the orphan, the widow, and the slain of America.

There are cases which cannot be overdone by language, and this is one. There are persons, too, who see not the full extent of the evil which threatens them, they solace themselves with hopes that the enemy, if he succeed, will be merciful. It is the madness of folly, to expect mercy from those who have refused to do justice, and even mercy, where conquest is the object, is only a trick of war: The cunning of the fox is as murderous as the violence of the wolf, and we ought to guard equally against both. Howe's first object is, partly by threats and partly by promises, to terrify or seduce the people to deliver up their arms and receive mercy. The ministry

recommended the same plan to Gage, and this is what the Tories call making their peace, "*a peace which passeth all understanding*.' indeed! A peace which would be the immediate forerunner of a worse ruin than any we have yet thought of. Ye men of Pennsylvania, do reason upon these things! Were the back counties to give up their arms, they would fall an easy prey to the Indians who are all armed. This perhaps is what some Tories would not be sorry for. Were the home counties to deliver up their arms, they would be exposed to the resentment of the back counties, who would then have it in their power to chastise their defection at pleasure. And were any one state to give up its arms, THAT state must be garrisoned by all Howe's army of Britons and Hessians to preserve it from the anger of the rest. Mutual fear is the principal link in the chain of mutual love, and woe be to that state that breaks the compact. Howe is mercifully inviting you to barbarous destruction, and men must be either rogues or fools that will not see it. I dwell not upon the vapors of imagination, I bring reason to your ears, and in language as plain as A. B. C. hold up truth to your eyes.

I thank God that I fear not. I see no real cause for fear. I know our situation well, and can see the way out of it. While our army was collected, Howe dared not risk a battle, and it is no credit to him that he decamped from the White Plains, and waited a mean opportunity to ravage the defenceless Jerseys, but it is great credit to us, that, with a handful of men, we sustained an orderly retreat for near an hundred miles, brought off our ammunition, all our field-pieces, the greatest part of our stores, and had four rivers to pass. None can say that our retreat was precipitate, for we were near three weeks in performing it, that the coun-

2 the home . . . back, the seaboard and the frontier, already divergent in attitudes and economic interests. • 47 Gage, Thomas Gage (1721-1787), Howe's predecessor, had been commander in chief in North America from 1763 to 1775. He ordered the march on Concord and the attack on Bunker Hill. • 48 "a peace . . . understanding." See Philip Henslow's plan 47. • 61 Hessians, German mercenaries from six states (over half of them from Hesse-Cassel and Hesse-Hanau). About thirty thousand were brought to America by the British. • 73 the White Plains, in Westchester County, New York, where Howe had attacked American positions on October 28-29. On the thirtieth, the Americans withdrew to Newcastle without opposition and were able to cross the Hudson to New Jersey, across which they slowly retreated, to take positions on the western bank of the Delaware. • 80 the country, the militia.

try might have time to come in. Twice we marched back to meet the enemy, and remained out till dark. The sign of fear was not seen in our camp, and had not some of the cowardly and disaffected inhabitants spread false alarms through the country, the Jersies had never been ravaged. Once more we are again collected and collecting, our new army at both ends of the continent is recruiting fast, and we shall be able to open the next campaign with sixty thousand men, well armed and clothed. This is our situation, and who will may know it. By perseverance and fortitude we have the prospect

of a glorious issue, by cowardice and submission, the sad choice of a variety of evils—a ravaged country—a depopulated city—habitations without safety, and slavery without hope—our homes turned into barracks and bawdy-houses for Hessians, and a future race to provide for, whose fathers we shall doubt of. Look on this picture and weep over it! and if there yet remains one thoughtless wretch who believes it not, let him suffer it unlamented.

COMMON SENSE

DECEMBER 23, 1776

1776

Thomas Jefferson

1743 • 1826

Thomas Jefferson, the third President of the United States, remains to this day the chief symbol for what has come to be called the "American way of life." Politicians quote him to lend authority to the most diverse points of view imaginable, to attack Jeffersonian principles would be well-nigh blasphemous. His words are the scriptures of our faith in democracy and the common man ("We hold these truths to be self-evident that all men are created equal, that they are endowed by their creator with certain inalienable rights, that among these are life, liberty, and the pursuit of happiness"), of our abiding trust in popular education ("Religion, morality, and knowledge being necessary to good government and the happiness of mankind, schools and the means of education shall forever be encouraged"), of our deep-rooted individualism ("I have sworn upon the altar of God eternal hostility against every form of tyranny over the mind of man"). Nor is Jefferson's influence merely a matter of words, he has left his mark

upon American political and educational institutions, even upon our public architecture, which reflects his enthusiasm for Greek and Roman models. Yet Jefferson is more than an oracle, more than a builder of the institutional foundations of American society. He himself would have deprecated the use of any man's words or actions to lend credit to any particular political or social program, for he had a sure grasp of the fact that every day is a new day, not merely to be endured but to be lived with as much intelligence and zest as an individual or nation can command. "The earth belongs always to the living generation. They may manage it then and what proceeds from it as they please during their usufruct. They are masters too of their own persons and consequently may govern them as they please."

It would take many pages to describe how Jefferson attained, through painful experience, such wisdom. The outline of his career tells only the outward story, not the inward, mental growth. He was born near Char-

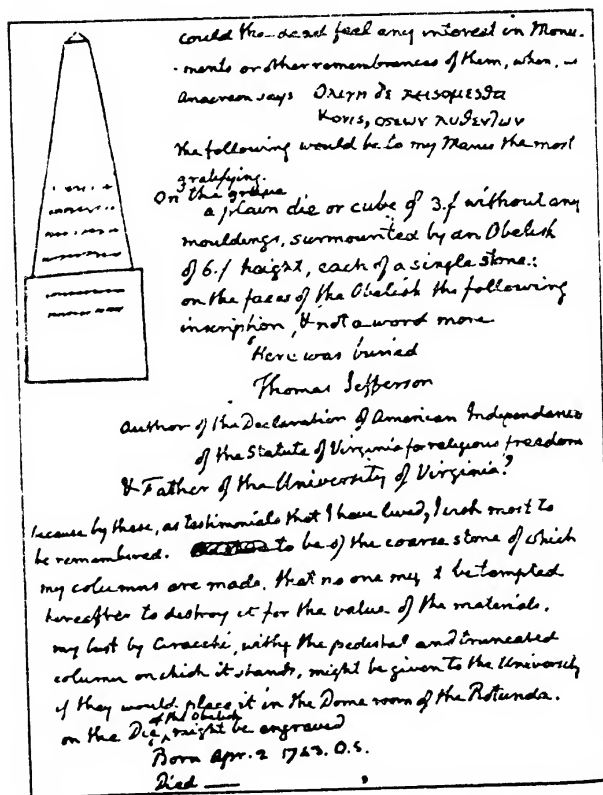

lottesville, Virginia, in 1743, his father being a planter who had married into the famous Randolph family. At fourteen he inherited nearly three thousand acres of land and a considerable number of slaves. He studied hard at William and Mary during 1760-1762, but he was also a social leader, welcome at the dinner table of the colonial governor and other Williamsburg notables. He read law, was admitted to the bar in 1767, and succeeded in combining his profession with the management of large estates. On New Year's Day 1772, he married Martha Wayles Skelton, an attractive widow with whom he was deeply in love. About a year later she inherited forty thousand acres of land and one hundred and thirty-five slaves. Not many revolutionists have come from such a background, and it would no doubt have been easy for Jefferson to spend his energies in plantation and family life of which he was very fond, and to let the world go its own way. The record of his public service is, considering his tastes and his ability to satisfy them, one of the most remarkable in American history.

Member of the Virginia House of Burgesses, 1769-1771, member of the Virginia Conventions of 1774 and 1775, Virginia delegate to the Second Continental Congress, 1775-1776, member of the legislature of the new state of Virginia 1776-1779, governor of Virginia 1779-1781, member of Congress under the Articles of Confederation 1783-1784, American minister to France 1784-1789, secretary of state, 1790-1793, vice-president, 1797-1801, President of the United States, 1801-1809—the list by itself is a thumbnail sketch of the birth and youth of a new nation. Jefferson was in the forefront of most of the great political developments of his age. His *Summary of the Rights of British America* (1774) was one of the notable assertions of the right of the colonists to self-government, he wrote, at thirty-three, the first draft of the *Declaration of Independence*, he led the attack on the state-supported church and the aristocracy-breeding institutions of primogeniture and entail in Virginia, he, more than any other single man, was responsible for the two-party system of government under the Constitution, as Chief Executive he engineered one of the great real-estate deals in history, the Louisiana Purchase, and throughout his life he was an earnest advocate of universal education for citizenship, of generous support of all the arts and sciences, of the emancipation of slaves, and of as large a measure of local self-

government as was compatible with the common good of the whole nation.

Not the least of the many paradoxes in his life is that he should be remembered for the studied sentences of his public papers, for he was inclined to distrust rhetoric and oratory. Behind the words of his great state papers, however, are both the maturing of a great people and a deep faith in the integrity of the common man. Jefferson's dream was of a world wherein reason and justice should prevail over brute force and selfishness. To know his writings is to fortify oneself against any shallow interpretation of the much-abused term "Americanism."

The Works of Thomas Jefferson, ed. P. L. Ford, Federal Edition, 12 vols., New York, 1899-1894. • Gilbert Chinard, *Thomas Jefferson the Apostle of Americanism*, Boston, 1929. • S. K. Padover, *Jefferson*, New York, 1942. • Carl Becker, *The Declaration of Independence*, New York, 1922.

Jefferson's sketch for his tombstone, and the inscription suggested by him.

Autobiography

Between January 6 and July 27, 1821, Jefferson spent some time composing the paper known as the "Autobiography," an account of his life up to 1790, when he arrived in New York to begin his work as secretary of state under President Washington. It was first printed in *Memoirs, Correspondence, and Miscellanies* (1829), edited by his grandson, T. J. Randolph. The portion here reprinted was written many years before, however, perhaps as early as August 1776. It is the most authoritative account of the composition and adoption of the Declaration of Independence, which Jefferson rightly regarded as the contribution for which he was most likely to be remembered by later generations. Neither he nor his contemporaries regarded the Declaration as an original composition; it expressed the philosophy of natural rights which had been everywhere accepted in the colonies, and largely in Great Britain, since the Glorious Revolution of 1688. Jefferson denied, however, that he had turned to any book or pamphlet while writing it, and the similarities to John Locke's *Two Treatises on Government* (1689-1690) and James Otis' *The Rights of the British Colonies Asserted and Proved* (1764) were doubtless coincidental. The tone of its appeal to the high court of world opinion and the ingenious concentration of responsibility upon King George III—always a useful device in propaganda—make it an unexcelled model of skillful rhetoric.

In Congress, Friday June 7, 1776. The delegates from Virginia moved in obedience to instructions from their constituents that the Congress should declare that these United colonies are & of right ought to be free & independent states, that they are absolved from all allegiance

to the British crown, and that all political connection between them & the state of Great Britain is & ought to be, totally dissolved, that measures should be immediately taken for procuring the assistance of foreign powers, and a Confederation be formed to bind the colonies more closely together.

The house being obliged to attend at that time to some other business, the proposition was referred to the next day, when the members were ordered to attend punctually at ten o'clock.

Saturday June 8. They proceeded to take it into consideration and referred it to a committee of the whole, into which they immediately resolved themselves, and passed that day & Monday the 10th in debating on the subject.

It was argued by Wilson, Robert R. Livingston, E. Rutledge, Dickinson and others.

That tho' they were friends to the measures themselves, and saw the impossibility that we should ever again be united with Gr. Britain, yet they were against adopting them at this time.

That the conduct we had formerly observed was wise & proper now, or deterring to take any capital step till the voice of the people drove us into it.

That they were our power, & without them our declarations could not be carried into effect.

That the people of the middle colonies (Maryland, Delaware, Pennsylv., the Jerseys & N. York) were not yet ripe for bidding adieu to British connection, but that they were fast ripening & in a short time would join in the general voice of America.

That the resolution entered into by this house on the

Text: Ford's edition of the *Works*, Vol. 1. • 1 Congress, the Second Continental Congress, which convened in Philadelphia, May 10, 1775, to direct the contest which had already become, with the Battle of Lexington, open war. • 2 moved, by Richard Henry Lee (1732-1794), later one of the first two United States senators from Virginia. The motion was seconded by John Adams. • 21 Wilson, James Wilson (1742-1797) of Pennsylvania, later associate justice of the Supreme Court. • 21 Robert R. Livingston (1746-1813) of New York, as chancellor of New York he administered the first presidential oath of office to George Washington. • 21 E. Rutledge, Edward Rutledge (1749-1800) of South Carolina, later a United States senator. • 22 Dickinson, John Dickinson (1732-1808) of Pennsylvania, author of the popular *Letters from a Farmer in Pennsylvania* (1768). • 37 resolution, declaring that "every kind of authority under the said crown should be totally suppressed."

15th of May for suppressing the exercise of all powers derived from the crown, had shown, by the ferment into which it had thrown these middle colonies, that they had not yet accomodated their minds to a separation from the mother country.

That some of them had expressly forbidden their delegates to consent to such a declaration, and others had given no instructions, & consequently no powers to give such consent.

10 That if the delegates of any particular colony had no power to declare such colony independant, certain they were the others could not declare it for them, the colonies being as yet perfectly independant of each other

That the assembly of Pennsylvania was now sitting above stairs, their convention would sit within a few days, the convention of New York was now sitting, & those of the Jerseys & Delaware counties would meet on the Monday following, & it was probable these bodies would take up the question of Independance & would
20 declare to their delegates the voice of their state.

That if such a declaration should now be agreed to, these delegates must retire & possibly their colonies might secede from the Union.

That such a secession would weaken us more than could be compensated by any foreign alliance

That in the event of such a division, foreign powers would either refuse to join themselves to our fortunes, or, having us so much in their power as that desperate declaration would place us, they would insist on terms
30 proportionably more hard and prejudicial

That we had little reason to expect an alliance with those to whom alone as yet we had cast our eyes

That France & Spain had reason to be jealous of that rising power which would one day certainly strip them of all their American possessions:

That it was more likely they should form a connection with the British court, who, if they should find themselves unable otherwise to extricate themselves from their difficulties, would agree to a partition of our territories, restoring Canada to France, & the Floridas to
40 Spain, to accomplish for themselves a recovery of these colonies

That it would not be long before we should receive certain information of the disposition of the French court, from the agent whom we had sent to Paris for that purpose:

That if this disposition should be favorable, by waiting the event of the present campaign, which we all hoped would be successful, we should have reason to expect an alliance on better terms

That this would in fact work no delay of any effectual aid from such ally, as, from the advance of the season & distance of our situation, it was impossible we could receive any assistance during this campaign

That it was prudent to fix among ourselves the terms on which we should form alliance, before we declared we would form one at all events

And that if these were agreed on, & our Declaration of Independance ready by the time our Ambassador should be prepared to sail, it would be as well to go
into that Declaration at this day

On the other side it was urged by J. Adams, Lee, Wythe, and others

That no gentleman had argued against the policy or the right of separation from Britain, nor had supposed it possible we should ever renew our connection, that they had only opposed its being now declared

That the question was not whether, by a declaration of independance, we should make ourselves what we are not, but whether we should declare a fact which already
exists

That as to the people or parliament of England, we had always been independent of them, their restraints on our trade deriving efficacy from our acquiescence only & not from any rights they possessed of imposing them, & that so far our connection had been federal only & was now dissolved by the commencement of hostilities

That as to the King, we had been bound to him by allegiance, but that this bond was now dissolved by his assent to the late act of parliament, by which he declares us out of his protection, and by his levying war on us a fact which had long ago proved us out of his protection, it being a certain position in law that allegiance & protection are reciprocal, the one ceasing when the other is withdrawn

45 the agent, Silas Deane (1737-1789), who went to Paris under instructions dated March 1776 • 48 present campaign, to defend New York and the Hudson River At the time of these deliberations Washington was busy constructing fortifications commanding New York Harbor • 63 Wythe, George Wythe (1726-1806) of Virginia, in whose office Jefferson had studied law, among his other famous pupils were Chief Justice John Marshall, President James Monroe, and Henry Clay

Interior of Monticello

That James the 1st never declared the people of England out of his protection yet his actions proved it & the parliament declared it

No delegates then can be denied, or ever want, a power of declaring an existing truth

That the delegates from the Delaware counties having declared their constituents ready to join, there are only two colonies Pennsylvania & Maryland whose delegates are absolutely tied up, and that these had by their instructions only reserved a right of confirming or rejecting the measure

That the instructions from Pennsylvania might be accounted for from the times in which they were drawn, near a twelvemonth ago since which the face of affairs has totally changed

That within that time it had become apparent that Britain was determined to accept nothing less than a carte-blanche, and that the King's answer to the Lord Mayor Aldermen & common council of London, which had come to hand four days ago, must have satisfied every one of this point

That the people wait for us to lead the way

That *they* are in favour of the measure, tho' the instructions given by some of their *representatives* are not

That the voice of the representatives is not always consonant with the voice of the people and that this is remarkably the case in these middle colonies

That the effect of the resolution of the 15th has proved this, which, raising the murmurs of so in the colonies of Pennsylvania & Maryland, called forth the opposing voice of the freer part of the people, & proved them to be the majority, even in these colonies

That the backwardness of these two colonies might be ascribed partly to the influence of proprietary power & connections, & partly to their having not yet been attacked by the enemy

That these causes were not likely to be soon removed, as there seemed no probability that the enemy would make either of these the seat of this summer's war

That it would be vain to wait either weeks or months for perfect unanimity, since it was impossible that all men should ever become of one sentiment on any question

That the conduct of some colonies from the beginning of this contest, had given reason to suspect it was their settled policy to keep in the rear of the confederacy, that their particular prospect might be better, even in the worst event

That therefore it was necessary for those colonies who had thrown themselves forward & hazarded all from the beginning, to come forward now also, and put all again to their own hazard

That the history of the Dutch revolution, of whom three states only confederated at first proved that a secession of some colonies would not be so dangerous as some apprehended

That a declaration of Independence alone could render it consistent with European delicacy for European powers to treat with us, or even to receive an Ambassador from us

That till this they would not receive our vessels into their ports, nor acknowledge the adjudications of our courts of admiralty to be legitimate, in cases of capture of British vessels.

That though France & Spain may be jealous of our rising power, they must think it will be much more formidable with the addition of Great Britain; and will therefore see it their interest to prevent a coalition; but should they refuse, we shall be but where we are;

18 King's answer, one of George III's rejections of petitions addressed to him on behalf of the colonies • 53 Dutch revolution, of 1576. The United Netherlands Confederation was formed three years later

whereas without trying we shall never know whether they will aid us or not

That the present campaign may be unsuccessful, & therefore we had better propose an alliance while our affairs wear a hopeful aspect

That to await the event of this campaign will certainly work delay, because during this summer France may assist us effectually by cutting off those supplies of provisions from England & Ireland on which the enemy's
15 armies here are to depend, or by setting in motion the great power they have collected in the West Indies, & calling our enemy to the defence of the possessions they have there

That it would be idle to lose time in settling the terms of alliance, till we had first determined we would enter into alliance

That it is necessary to lose no time in opening a trade for our people, who will want clothes, and will want money too for the payment of taxes

20 And that the only misfortune is that we did not enter into alliance with France six months sooner, as besides opening their ports for the vent of our last year's produce, they might have marched an army into Germany and prevented the petty princes there from selling their unhappy subjects to subdue us

It appearing in the course of these debates that the colonies of N York, New Jersey, Pennsylvania, Delaware, Maryland, and South Carolina were not yet matured for falling from the parent stem, but that they
30 were fast advancing to that state, it was thought most prudent to wait a while for them, and to postpone the final decision to July 1 but that this might occasion as little delay as possible a committee was appointed to prepare a declaration of independence The committee were J Adams, Dr Franklin, Roger Sherman, Robert R. Livingston & myself Committees were also appointed at the same time to prepare a plan of confederation for the colonies, and to state the terms proper to be proposed for foreign alliance The committee for
0 drawing the declaration of Independence desired me to do it. It was accordingly done, and being approved by them, I reported it to the house on Friday the 28th of June when it was read and ordered to lie on the table On Monday, the 1st of July the House resolved itself into a commee of the whole & resumed the considera-

tion of the original motion made by the delegates of Virginia, which being again debated through the day, was carried in the affirmative by the votes of N Hampshire, Connecticut, Massachusetts, Rhode Island, N Jersey, Maryland, Virginia, N Carolina, & Georgia S Carolina and Pennsylvania voted against it Delaware having but two members present, they were divided The delegates for New York declared they were for it themselves & were assured their constituents were for it, but that their instructions having been drawn near a twelvemonth before, when reconciliation was still the general object, they were enjoined by them to do nothing which should impede that object They therefore thought themselves not justifiable in voting on either side, and asked leave to withdraw from the question which was given them The commee rose & reported their resolution to the house Mr Edward Rutledge of S Carolina then requested the determination might be put off to the next day, as he believed his colleagues tho' they disapproved of the resolution, would then join in it for the sake of unanimity The ultimate question whether the house would agree to the resolution of the committee was accordingly postponed to the next day, when it was again moved and S Carolina concurred in voting for it In the meantime a third member had come post from the Delaware counties and turned the vote of that colony in favour of the resolution Members of a different sentiment attending that morning from Pennsylvania also her vote was changed, so that the whole 12 colonies who were authorized to vote at all, gave their voices for it and within a few days, the convention of N York approved of it and thus supplied the void occasioned by the withdrawing of her delegates from the vote

Congress proceeded the same day to consider the declaration of Independance which had been reported & lun

21 six months before The tone here suggests what is generally thought to be the fact that the colonists had received some assurances of secret assistance from France as early as the autumn of 1775 • 24 petty princes The British ministry sent agents to employ mercenary troops from the German princes late in 1775, with the obvious intention of settling the American revolt in 1776 • 35 Roger Sherman (1721-1793), of Connecticut, later United States senator • 36 myself Although he was only thirty-three, Jefferson's reputation as a writer won him more votes for appointment on this committee than any other candidate • 76 few days, July 9 • 79 same day, Monday, July 1

on the table the Friday preceding, and on Monday referred to a commee of the whole. The pusillanimous idea that we had friends in England worth keeping terms with, still haunted the minds of many. For this reason those passages which conveyed censures on the people of England were struck out, lest they should give them offence. The clause too, reprobating the enslaving the inhabitants of Africa, was struck out in complaisance to South Carolina and Georgia, who had never attempted to restrain the importation of slaves, and who on the contrary still wished to continue it. Our northern brethren also I believe felt a little tender under those censures, for tho' their people had very few slaves themselves yet they had been pretty considerable carriers of them to others. The debates having taken up the greater parts of the 2d 3d & 4th days of July were, on the evening of the last, closed the declaration was reported by the commee, agreed to by the house and signed by every member present except Mr Dickinson. As the sentiments of men are known not only by what they receive, but what they reject also, I will state the form of the declaration as originally reported. The parts struck out by Congress shall be distinguished by a black line drawn under them and those inserted by them shall be placed in the margin or in a convenient column

A DECLARATION BY THE REPRESENTATIVES OF THE UNITED STATES OF AMERICA, IN GENERAL CONGRESS ASSEMBLED

When in the course of human events it becomes necessary for one people to dissolve the political bands which have connected them with another and to assume among the powers of the earth the separate & equal station to which the laws of nature and of nature's God entitle them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation

We hold these truths to be self-evident that all men are created equal,

certain

alter

repeated

that they are endowed by their creator 40
with [*inherent and*] inalienable rights;
that among these are life, liberty, & the
pursuit of happiness that to secure
these rights, governments are instituted among men, deriving their just powers from the consent of the governed, that whenever any form of government becomes destructive of these ends, it is the right of the people to alter or to abolish it, & to institute new 50
government, laying its foundation on such principles, & organizing its powers in such form, as to them shall seem most likely to effect their safety & happiness. Prudence indeed will dictate that governments long established should not be changed for light & transient causes, and accordingly all experience hath shewn that mankind are more disposed to suffer while evils 60
are sufferable, than to right themselves by abolishing the form to which they are accustomed. But when a long train of abuses & usurpations [*begin at a distinguished period and*] pursuing invariably the same object, evinces a design to reduce them under absolute despotism, it is their right, it is their duty to throw off such government, & to provide new guards for their future 70
security. Such has been the patient sufferance of these colonies, & such is now the necessity which constrains them to [*expunge*] their former systems of government. The history of the present king of Great Britain is a history of [*unremitting*] injuries &

18 signed . Dickinson Historians are agreed that Jefferson's memory was at fault on this point and that the Declaration was only authenticated by the signatures of the president and the secretary on July 4. The formal signing took place on August 2 • 23 a black line In the present text the excisions are italicized and enclosed within brackets

He has [] endeavored to bring on the inhabitants of our frontiers the merciless Indian savages, whose known rule of warfare is an undistinguished destruction of all ages, sexes, & condition [of existence].

[He has incited treasonable insurrections of our fellow-citizens, with the allurements of forfeiture & confiscation of our property.

43 He has waged cruel war against human nature itself, violating it's most sacred rights of life and liberty in the persons of a distant people who never offended him, captivating & carrying them into slavery in another hemisphere, or to incur miserable death in their transportation thither. This piratical warfare, the opprobrium of IN-

FIDEL powers, is the warfare of the CHRISTIAN king of Great Britain. Determined to keep open a market where MEN should be bought & sold, ⁵⁴ he has prostituted his negative for suppressing every legislative attempt to prohibit or to restrain this execrable commerce. And that this assemblage of horrors might want no fact of distinguished die, he is now exciting those very people to rise in arms against us, and to purchase that liberty of which he has deprived them, by murdering ⁵⁵ the people on whom he also obtruded them: thus paying off former crimes committed against the LIBERTIES of one people, with crimes which he urges them to commit against the LIVES of another]

In every stage of these oppressions we have petitioned for redress in the most humble terms our repeated petitions have been answered only by repeated injuries ⁷

A prince whose character is thus marked by every act which may define a tyrant is unfit to be the ruler of a [] people [who mean to be free. Future ages will scarcely believe that the hardiness of one man adventured, within the short compass of twelve years only, to lay a foundation so broad & so undisguised for tyranny over a people fostered & fixed in principles of freedom].

Nor have we been wanting in attentions to our British brethren We have warned them from time to time of attempts by their legislature to extend [a] jurisdiction over [these our states]. We have reminded them of the circumstances of our emigration & settlement here, [no one of which could warrant so strange a pretension: that ⁹⁰ these were effected at the expense of our own blood & treasure. unassisted

an unwar-
rantable
us

by the wealth or the strength of Great Britain: that in constituting indeed our several forms of government, we had adopted one common king, thereby laying a foundation for perpetual league & amity with them: but that submission to their parliament was no part of our constitution, nor ever in idea, if history may be credited: and,] we [] appealed to their native justice and magnanimity [as well as to] the ties of our common kindred to disavow these usurpations which [were likely to] interrupt our connection and correspondence. They too have been deaf to the voice of justice & of consanguinity, [and when occasions have been given them, by the regular course of their laws, of removing from their councils the disturbers of our harmony, they have, by their free election, re-established them in power. At this very time too they are permitting their chief magistrates to send over not only soldiers of our common blood, but Scotch & foreign mercenaries to fight & destroy us. These facts have given the last stab to agonizing affection, and manly spirit bids us to renounce forever these unfeeling brethren. We must endeavor to forget our former love for them, and hold them as we hold the rest of mankind, enemies in war, in peace friends. We might have been a free and a people together: but a communication of grandeur & of freedom it seems is below their dignity. Be it so, since they will have it. The road to happiness & to glory is open to us too. We will tread it apart from them, and] acquiesce in the necessity which denounces our [eternal] separation []!

We therefore the representatives of the United States of America in General Congress assembled do in the name & by the authority of the good people of these [states reject & renounce all allegiance & subjection to the kings or Great Britain & all others who may hereafter claim by, through or under them] we utterly dissolve all political connection which may heretofore have subsisted between us & the people or parliament of Great Britain: & finally we do assert & declare these colonies to be free & independent states.] & that as free & independent states, they have full power to levy war, conclude peace, contract alliances, establish commerce, & to do all other acts & things which independent states may of right do

And for the support of this declaration we mutually pledge to each other our lives, our fortunes, & our sacred honour

The Declaration thus signed on the 4th, on paper was engrossed on parchment, & signed again on the 2d of August . . .

We therefore the representatives of the United States of America in General Congress assembled, appealing to the supreme judge of the world for the rectitude of our intentions do in the name, & by the authority of the good people of these colonies, solemnly publish & declare that these united colonies are & of right ought to be free & independent states that they are absolved from all allegiance to the British crown, and that all political connection between them & the state of Great Britain is, & ought to be, totally dissolved, & that as free and independent states they have full power to levy war, conclude peace, contract alliances, establish commerce, & to do all other acts & things which independent states may of right do

And for the support of this declaration, with a firm reliance on the protection of divine providence we mutually pledge to each other our lives, our fortunes, & our sacred honor

1776?-1829

• 80 The Declaration This last sentence was added by Jefferson late when he knew that his account of the signing had been called in question

STRUGGLE FOR POLITICAL STABILITY:

Hamilton, Washington, Brackenridge, Jefferson, Jackson

Alexander Hamilton

1757 • 1804

Much of the stability of the government of the United States, as we know it even today, must be attributed to the labors of Alexander Hamilton. Soldier, statesman, lawyer, and practical politician, he was only incidentally a writer. Yet, assisted by James Madison and John Jay, he planned and executed *The Federalist*, which Jefferson called, in a letter to Madison, "the best commentary on the principles of government that ever was written." The broader, more speculative papers in the series, notably No. X, were often Madison's, but Hamilton's shrewd realism helped to give the work the high place which it holds in the political literature of Western civilization.

Hamilton was born in the West Indies in 1757. At

an early age he displayed an amazing talent for business, so that interested elders sent him to the Continent to finish his education. In 1774, when he was an undergraduate at King's College (now Columbia University), he joined the Whig opposition to the British and soon distinguished himself as a speaker and pamphleteer. The first indications of his mastery of constitutional history and the intricacies of political action appeared in *A Full Vindication of the Measures of the Congress from the Calumnies of Their Enemies* (1774) and *The Farmer*

Panel (l. to r.) Thomas Jefferson • Andrew Jackson • Mount Vernon
• A political meeting on the frontier • Hugh Henry Brackenridge •
Alexander Hamilton

Refuted (1775). In March 1776 he joined the Continental army as captain of an artillery company; within a year he was a lieutenant colonel and Washington's aide-de-camp. Despite a temporary break with his commander in chief (Hamilton is supposed to have been offended at what he regarded as an unjust reprimand from Washington), he served brilliantly to the end of the war and thereafter was a nationally known lawyer and public servant. His most important contributions to government were his draft of the call for the Constitutional Convention, his success in obtaining the ratification of the new form of government by New York, his term as first secretary of the treasury in 1789-1795 (usually regarded as having laid the foundations of the fiscal policy, and the chief party issues, of the United States), and his influence as Washington's most trusted adviser, nowhere better illustrated than in the latter's *Farewell Address* (see p. 374). Hamilton's opposition to Aaron Burr, first in the Presidential election of 1800, which was decided in favor of Jefferson in the House of Representatives, and later in the contest of 1804 for the governorship of New York, resulted in the famous duel in which Hamilton was killed.

The inevitable contrast between Hamilton and Jefferson has frequently obscured the former's greatness. The self-made man, relatively narrow in his interests and distrustful of the masses—"The people," he once remarked, "is a great beast"—has suffered by the comparison with a versatile philosopher who, gracefully mini-

mizing his own wealth and family connections, believed that all men are created equal. Men like Washington, however, quite evidently trusted Hamilton more than they did Jefferson, he had a solid quality, a realism which was wholly honest and direct. A comparison of No. 1 of *The Federalist* with Jefferson's *First Inaugural Address* brings the men closer together than might be expected, although it also reveals their mutual suspicions. Hamilton wanted a strong government, safe from attack from without and from disorder within, a political system which would place responsible and efficient men in public office, pay its own way, provide for the public good without partiality, and, above all, work smoothly. A shrewd judge of men's motives and a careful calculator of probabilities, he was more aware of the difficulties of obtaining such a system than was Jefferson, whose aim was, after all, not much different. To Hamilton, however, government was almost an end in itself, to Jefferson, as to most men, it was only a necessary means to other ends.

On political questions Hamilton was always well-informed, and he wrote clearly and effectively for the audience to which he addressed himself. There are few better practitioners of argument in American literature.

Prescott, Cincinnati, 1934. • H. J. Ford, *Alexander Hamilton*, New York, 1925. • Bower Aley, *The Rhetoric of Alexander Hamilton*, New York, 1941.

From

The Federalist

The *Federalist* consists of eighty-five essays, all but the last eight of which originally appeared in New York City newspapers between October 27, 1787, and April 4, 1788. They were at once collected and published in two volumes,

presumably with Hamilton's supervision. There have since been many reprints, some of which incorporate verbal changes of doubtful authenticity. The authorship of some of the essays has long been disputed, but it seems certain that Hamilton wrote at least fifty-one, Jay, five, and Madison, fourteen. Three were written by Hamilton and Jefferson in collaboration, and the authorship of the remaining twelve, long disputed, is now thought to have been Madison's.

The series was begun in answer to newspaper essays and pamphlets in opposition to the ratification of the Constitution (see *Pamphlets on the Constitution of the United States*, 1888, and *Essays on the Constitution of the United States*, 1892, ed. P. L. Ford). In New York, Hamilton was the only delegate to the Constitutional

Convention who supported the proposed new form of government; Robert Yates and John Lansing, joined by Governor George Clinton, vigorously opposed it. The *Federalist* is credited with having carried the issue in New York, and it may have had influence elsewhere. In the course of its creation, however, the series became something more than mere debate, it enabled Hamilton to bring to fruition his thorough study of constitutional problems. Of the three essays here reprinted, No. I shows his realistic philosophy of politics, No. XXIII his skill in logical argument, and No. LXIX his thorough knowledge of the early state constitutions, eleven of which had been adopted between 1776 and 1784.

NO. I

To the People of the State of New York

After an unequivocal experience of the inefficiency of the subsisting federal government, you are called upon to deliberate on a new Constitution for the United States of America. The subject speaks its own importance, comprehending in its consequences nothing less than the existence of the UNION, the safety and welfare of the parts of which it is composed, the fate of an empire in many respects the most interesting in the world. It has been frequently remarked that it seems to have been reserved to the people of this country, by their conduct and example, to decide the important question, whether societies of men are really capable or not of establishing good government from reflection and choice, or whether they are forever destined to depend for their political constitutions on accident and force. If there be any truth in the remark, the crisis at which we are arrived may with propriety be regarded as the era in which that decision is to be made, and a wrong election of the part we shall act may, in this view, deserve to be considered as the general misfortune of mankind.

This idea will add the inducements of philanthropy to those of patriotism, to heighten the solicitude which all considerate and good men must feel for the event. Happy will it be if our choice should be directed by a judicious estimate of our true interests, unperplexed and unbiassed by considerations not connected with the public good. But this is a thing more ardently to be wished than seriously to be expected. The plan offered to our

deliberations affects too many particular interests, innovates upon too many local institutions, not to involve in its discussion a variety of objects foreign to its merits, and of views, passions and prejudices little favorable to the discovery of truth.

Among the most formidable of the obstacles which the new Constitution will have to encounter may readily be distinguished the obvious interest of a certain class of men in every State to resist all changes which may hazard a diminution of the power, emolument, and consequence of the offices they hold under the State establishments, and the perverted ambition of another class of men, who will either hope to aggrandise themselves by the confusions of their country, or will flatter themselves with fairer prospects of elevation from the subdivision of the empire into several partial confederacies than from its union under one government.

It is not, however, my design to dwell upon observations of this nature. I am well aware that it would be disingenuous to resolve indiscriminately the opposition of any set of men (merely because their situations might subject them to suspicion) into interested or ambitious views. Candor will oblige us to admit that even such men may be actuated by upright intentions; and it cannot be doubted that much of the opposition which has made its appearance, or may hereafter make its appearance, will spring from sources, blameless at least, if not respectable—the honest errors of minds led astray by preconceived jealousies and fears. So numerous indeed and so powerful are the causes which serve to give a false bias to the judgment, that we, upon many occasions, see wise and good men on the wrong as well as on the right side of questions of the first magnitude to society. This circumstance, if duly attended to, would furnish a lesson of moderation to those who are ever so much persuaded of their being in the right in any controversy. And a further reason for caution, in this respect, might be drawn from the reflection that we are not always sure that those who advocate the truth are influenced by purer principles than their antagonists. Ambition, avarice, personal animosity, party opposition, and many other motives not more laudable than these, are apt to operate as well upon those who support as those who oppose the right side of a question. Were there not even these inducements to

Text: the Lodge edition of the *Works*, 1904, Vols. XI and XII •
29 The plan, the Constitution

intolerant spirit which has, at all times, characterized political parties. For in politics, as in religion it is equally absurd to aim at making proselytes by fire and sword. Heresies in either can rarely be cured by persecution.

And yet, however just these sentiments will be allowed to be, we have already sufficient indications that it will happen in this as in all former cases of great national discussion. A torrent of angry and malignant passions will be let loose. To judge from the conduct of the opposite parties, we shall be led to conclude that they will mutually hope to evince the justness of their opinions, and to increase the number of their converts by the loudness of their declamations and the bitterness of their invectives. An enlightened zeal for the energy and efficiency of government will be stigmatized as the offspring of a temper fond of despotic power and hostile to the principles of liberty. An over-scrupulous jealousy of danger to the rights of the people, which is more commonly the fault of the head than of the heart, will be represented as mere pretence and artifice, the stale bait for popularity at the expense of the public good. It will be forgotten, on the one hand, that jealousy is the usual concomitant of love, and that the noble enthusiasm of liberty is apt to be infected with a spirit of narrow and illiberal distrust. On the other hand, it will be equally forgotten that the vigor of government is essential to the security of liberty, that, in the contemplation of a sound and well-informed judgment, their interest can never be separated, and that a dangerous ambition more often lurks behind the specious mask of zeal for the rights of the people than under the forbidding appearance of zeal for the firmness and efficiency of government. History will teach us that the former has been found a much more certain road to the introduction of despotism than the latter, and that of those men who have overturned the liberties of republics, the greatest number have begun their career by paying an obsequious court to the people, commencing demagogues, and ending tyrants.

In the course of the preceding observations, I have had an eye, my fellow-citizens, to putting you upon your guard against all attempts, from whatever quarter, to influence your decision in a matter of the utmost moment to your welfare, by any impressions other than those which may result from the evidence of truth. You will, no doubt, at the same time, have collected from the gen-

unfriendly to the new Constitution. Yes, my countrymen, I own to you that, after having given it an attentive consideration, I am clearly of opinion it is your interest to adopt it. I am convinced that this is the safest course for your liberty, your dignity, and your happiness. I affect not reserves which I do not feel. I will not amuse you with an appearance of deliberation when I have decided. I frankly acknowledge to you my convictions, and I will freely lay before you the reasons on which they are founded. The consciousness of good intentions disdains ambiguity. I shall not, however, multiply professions on this head. My motives must remain in the depository of my own breast. My arguments will be open to all, and may be judged of by all. They shall at least be offered in a spirit which will not disgrace the cause of truth.

I propose, in a series of papers, to discuss the following interesting particulars—*The utility of the UNION to your political prosperity—The insufficiency of the present Confederation to preserve that Union—The necessity of a government at least equally energetic with the one proposed to the attainment of this object—The conformity of the proposed Constitution to the true principles of republican government—Its analogy to your own State constitution—and lastly, The additional security which its adoption will afford to the preservation of that species of government, to liberty, and to property.*

In the progress of this discussion I shall endeavor to give a satisfactory answer to all the objections which shall have made their appearance, that may seem to have any claim to your attention.

It may perhaps be thought superfluous to offer arguments to prove the utility of the UNION, a point, no doubt, deeply engraved on the hearts of the great body of the people in every State, and one, which it may be imagined, has no adversaries. But the fact is that we already hear it whispered in the private circles of those who oppose the new Constitution, that the thirteen States are of too great extent for any general system, and that we must of necessity resort to separate confederacies

65 particulars. The outline covers only the first fifty-one essays, the scheme was later expanded to include analyses of the House of Representatives, the Senate, the Executive (see p. 369), and the Judiciary.

all probability, be gradually propagated, till it has varieties enough to countenance an open avowal of it. For nothing can be more evident, to those who are able to take an enlarged view of the subject, than the alternative of an adoption of the new Constitution or a dismemberment of the Union. It will therefore be of use to begin by examining the advantages of that Union, the certain evils, and the probable dangers, to which every State will be exposed from its dissolution. This shall accordingly constitute the subject of my next address.

PUBLIUS

NO. XXIII

to the People of the State of New York

The necessity of a Constitution, at least equally energetic with the one proposed, to the preservation of the Union, is the point at the examination of which we are now arrived.

This inquiry will naturally divide itself into three branches—the objects to be provided for by the federal government, the quantity of power necessary to the accomplishment of those objects, the persons upon whom that power ought to operate. Its distribution and organization will more properly claim our attention under the succeeding head.

The principal purposes to be answered by union are these—the common defence of the members, the preservation of the public peace, as well against internal combinations as external attacks, the regulation of commerce with other nations and between the States, the superintendence of our intercourse political and commercial, with foreign countries.

The authorities essential to the common defence are these—to raise armies, to build and equip fleets, to prescribe rules for the government of both, to direct their operations, to provide for their support. These powers ought to exist without limitation, *because it is impossible to foresee or define the extent and variety of national exigencies, or the correspondent extent and variety of the means which may be necessary to satisfy them.* The circumstances that endanger the safety of nations are infinite, and for this reason no constitutional shackles can wisely be imposed on the power to which the care of

with all the possible combinations of such circumstances, and ought to be under the direction of the same councils which are appointed to preside over the common defence.

This is one of those truths which, to a correct and unprejudiced mind, carries its own evidence along with it, and may be obscured, but cannot be made plainer by argument or reasoning. It rests upon axioms as simple as they are universal, the *means* ought to be proportioned to the *end*; the persons, from whose agency the attainment of any *end* is expected, ought to possess the *means* by which it is to be attained.

Whether there ought to be a federal government intrusted with the care of the common defence, is a question in the first instance, open for discussion, but the moment it is decided in the affirmative, it will follow, that that government ought to be clothed with all the powers requisite to complete execution of its trust. And unless it can be shown that the circumstances which may affect the public safety are reducible within certain determinate limits, unless the contrary of this position can be fairly and rationally disputed, it must be admitted, as a necessary consequence, that there can be no limitation of that authority which is to provide for the defence and protection of the community, in any matter essential to its efficacy—that is, in any matter essential to the *formation, direction, or support* of the NATIONAL FORCES.

Defective as the present Confederation has been proved to be, this principle appears to have been fully recognised by the framers of it, though they have not made proper or adequate provision for its exercise. Congress have an unlimited discretion to make requisitions of men and money, to govern the army and navy, to direct their operations. As their requisitions are made constitutionally binding upon the States, who are in fact under the most solemn obligations to furnish the supplies required of them, the intention evidently was, that the

the whole. The same idea, tracing the arguments to their consequences, is held out in several of the late publications against the new Constitution.—Publius. Madison had dealt with this 'territorial objection' in No. XIV, and Hamilton returns to it briefly in No. XXIII. One conspicuous use of it by the opposition was the popular *Letters from the Federal Farmer to the Republican* (1787) by Richard Henry Lee of Virginia.

United States should command whatever resources were by them judged requisite to the "common defence and general welfare." It was presumed that a sense of their true interests, and a regard to the dictates of good faith, would be found sufficient pledges for the punctual performance of the duty of the members to the federal head.

The experiment has, however, demonstrated that this expectation was ill-founded and illusory, and the observations, made under the last head, will, I imagine, have sufficed to convince the impartial and discerning, that there is an absolute necessity for an entire change in the first principles of the system, that if we are in earnest about giving the Union energy and duration, we must abandon the vain project of legislating upon the States in their collective capacities, we must extend the laws of the federal government to the individual citizens of America, we must discard the fallacious scheme of quotas and requisitions, as equally impracticable and unjust. The result from all this is that the Union ought to be invested with full power to levy troops, to build and equip fleets, and to raise the revenues which will be required for the formation and support of an army and navy, in the customary and ordinary modes practised in other governments.

If the circumstances of our country are such as to demand a compound instead of a simple, a confederate instead of a sole, government, the essential point which will remain to be adjusted will be to discriminate the OBJECTS, as far as it can be done, which shall appertain to the different provinces or departments of power, allowing to each the most ample authority for fulfilling the objects committed to its charge. Shall the Union be constituted the guardian of the common safety? Are fleets and armies and revenues necessary to this purpose? The government of the Union must be empowered to pass all laws, and to make all regulations which have relation to them. The same must be the case in respect to commerce, and to every other matter to which its jurisdiction is permitted to extend. Is the administration of justice between the citizens of the same State the proper department of the local governments? These must possess all the authorities which are connected with this object, and with every other that may be allotted to their particular cognizance and direction. Not to confer in each case a degree of power commensurate to the end,

would be to --- and propriety, and improvidently to trust the great interests of the nation to hands which are disabled from managing them with vigor and success.

Who so likely to make suitable provisions for the public defence, as that body to which the guardianship of the public safety is confided, which, as the centre of information, will best understand the extent and urgency of the dangers that threaten, as the representative of the WHOLE, will feel itself most deeply interested in the preservation of every part, which, from the responsibility implied in the duty assigned to it, will be most sensibly impressed with the necessity of proper exertions and which, by the extension of its authority throughout the States, can alone establish uniformity and concert in the plans and measures by which the common safety is to be secured? Is there not a manifest inconsistency in devolving upon the federal government the care of the general defence, and leaving in the State governments the *effective* powers by which it is to be provided for? Is not a want of co-operation the infallible consequence of such a system? And will not weakness, disorder, an undue distribution of the burdens and calamities of war, an unnecessary and intolerable increase of expense, be its natural and inevitable concomitants? Have we not had unequivocal experience of its effects in the course of the revolution which we have just accomplished?

Every view we may take of the subject, as candid inquirers after truth, will serve to convince us, that it is both unwise and dangerous to deny the federal government an unconfined authority, as to all those objects which are intrusted to its management. It will indeed deserve the most vigilant and careful attention of the people, to see that it be modelled in such a manner as to admit of its being safely vested with the requisite powers. If any plan which has been, or may be, offered to our consideration, should not, upon a dispassionate inspection, be found to answer this description, it ought to be rejected. A government, the constitution of which renders it unfit to be trusted with all the powers which free people *ought to delegate to any government*, would be an unsafe and improper depositary of the NATION.

10 the last head. Nos. XV-XXII deal with the insufficiency and defects of the Confederation

confided, the coincident powers may safely accompany them. This is the true result of all just reasoning upon the subject. And the adversaries of the plan promulgated by the convention ought to have confined themselves to showing, that the internal structure of the proposed government was such as to render it unworthy of the confidence of the people. They ought not to have wandered into inflammatory declamations and unmeaning cavils about the extent of the powers. The POWERS are not too extensive for the OBJECTS of federal administration, or, in other words, for the management of our NATIONAL INTERESTS, nor can any satisfactory argument be framed to show that they are chargeable with such an excess. If it be true, as has been insinuated by some of the writers on the other side, that the difficulty arises from the nature of the thing, and that the extent of the country will not permit us to form a government in which such ample powers can safely be reposed, it would prove that we ought to contract our views, and resort to the expedient of separate confederacies, which will move within more practicable spheres. For the absurdity must continually stare us in the face of confiding to a government the direction of the most essential national interests, without daring to trust it to the authorities which are indispensable to their proper and efficient management. Let us not attempt to reconcile contradictions but firmly embrace a rational alternative.

I trust, however, that the impracticability of one general system cannot be shown. I am greatly mistaken, if anything of weight has yet been advanced of this tendency, and I flatter myself, that the observations which have been made in the course of these papers have served to place the reverse of that position in as clear a light as any matter still in the womb of time and experience can be susceptible of. This, at all events, must be evident, that the very difficulty itself, drawn from the extent of the country, is the strongest argument in favour of an energetic government, for any other can certainly never preserve the Union of so large an empire. If we embrace the tenets of those who oppose the adoption of the proposed Constitution, as the standard of our political creed, we cannot fail to verify the gloomy doctrines which predict the impracticability of a national system pervading the entire limits of the present Confederacy.

PUBLIUS

To the People of the State of New York

I proceed now to trace the real characters of the proposed Executive, as they are marked out in the plan of the convention. This will serve to place in a strong light the unfairness of the representations which have been made in regard to it.

The first thing which strikes our attention is, that the executive authority, with few exceptions, is to be vested in a single magistrate. This will scarcely, however, be considered as a point upon which any comparison can be grounded, for if, in this particular, there be a resemblance to the king of Great Britain, there is not less a resemblance to the Grand Seigneur, to the khan of Tartary, to the Man of the Seven Mountains, or to the governor of New York.

That magistrate is to be elected for *four* years, and is to be reeligible as often as the people of the United States shall think him worthy of their confidence. In these circumstances there is a total dissimilitude between *him* and a king of Great Britain, who is an *hereditary* monarch, possessing the crown as a patrimony descendible to his heirs forever, but there is a close analogy between *him* and a governor of New York, who is elected for *three* years, and is reeligible without limitation or intermission. If we consider how much less time would be requisite for establishing a dangerous influence in a single State, than for establishing a like influence throughout the United States we must conclude that a duration of *four* years for the Chief Magistrate of the Union is a degree of permanency far less to be dreaded in that office, than a duration of *three* years for a corresponding office in a single State.

The President of the United States would be liable to be impeached, tried, and, upon conviction of treason, bribery, or other high crimes or misdemeanors, removed from office; and would afterwards be liable to prosecution and punishment in the ordinary course of law. The person of the king of Great Britain is sacred and inviolable; there is no constitutional tribunal to which he is amenable, no punishment to which he can be subjected without involving the crisis of a national revolution. In this delicate and important circumstance of personal responsibility, the President of Confederated America would

stand upon no better ground than a governor of New York, and upon worse ground than the governors of Maryland and Delaware

The President of the United States is to have power to return a bill, which shall have passed the two branches of the legislature, for reconsideration, and the bill so returned is to become a law, if, upon that reconsideration it be approved by two thirds of both houses. The king of Great Britain, on his part, has an absolute negative upon the acts of the two houses of Parliament. The disuse of that power for a considerable time past does not affect the reality of its existence; and is to be ascribed wholly to the crown's having found the means of substituting influence to authority, or the art of gaining a majority in one or the other of the two houses, to the necessity of exerting a prerogative which could seldom be exerted without hazarding some degree of national agitation. The qualified negative of the President differs widely from this absolute negative of the British sovereign, and tallies exactly with the revisionary authority of the council of revision of this State, of which the governor is a constituent part. In this respect the power of the President would exceed that of the governor of New York, because the former would possess, singly, what the latter shares with the chancellor and judges, but it would be precisely the same with that of the governor of Massachusetts, whose constitution, as to this article, seems to have been the original from which the convention have copied.

The President is to be the "commander-in-chief of the army and navy of the United States, and of the militia of the several States, when called into the actual service of the United States. He is to have power to grant reprieves and pardons for offences against the United States, *except in cases of impeachment*; to recommend to the consideration of Congress such measures as he shall judge necessary and expedient, to convene, on extraordinary occasions, both houses of the legislature, or either of them, and, in case of disagreement between them *with respect to the time of adjournment*, to adjourn them to such time as he shall think proper, to take care that the laws be faithfully executed, and to commission all officers of the United States." In most of these particulars, the power of the President will resemble equally that of the king of Great Britain and of the governor of New York. The most material points of difference are

these.—*First*. The President is to have the personal command of such part of the militia of the nation as by legislative provision may be called into the actual service of the Union. The king of Great Britain and the governor of New York have at all times the entire command of all the militia within their several jurisdictions. In this article, therefore, the power of the President would be inferior to that of either the monarch or the governor. *Secondly*. The President is to be commander-in-chief of the army and navy of the United States. In this respect his authority would be nominally the same with that of the king of Great Britain, but in substance much inferior to it. It would amount to nothing more than the supreme command and direction of the military and naval forces, as first General and admiral of the Confederacy, while that of the British king extends to the *declaring* of war and to the *raising and regulating* of fleets and armies,—all which, by the Constitution under consideration, would appertain to the legislature. The governor of New York, on the other hand, is by the constitution of the State vested only with the command of its militia and navy. But the constitutions of several of the States expressly declare their governors to be commanders-in-chief, as well of the army as navy, and it may well be a question, whether those of New Hampshire and Massachusetts, in particular, do not, in this instance confer larger powers upon their respective governors than could be claimed by a President of the United States. *Thirdly*. The power of the President, in respect to par-

3 Maryland and Delaware. The constitutions of Maryland and Delaware had no specific provision for impeachment: the governor of New York could be impeached • 65 legislature. A writer in a Pennsylvania paper, under the signature of Tamony, has asserted that the king of Great Britain owes his prerogative as commander-in-chief to an annual mutiny bill. The truth is, on the contrary, that his prerogative, in this respect, is immemorial, and was only disputed, 'contrary to all reason and precedent, as Blackstone, vol. i., page 262, expresses it, by the Long Parliament of Charles I., but by the statute the 13th Charles II., chap. 6, it was declared to be in the king alone, 'that the sole supreme government and command of the militia with his Majesty's realms and dominions, and of all forces by sea or land, and of all forts and places of strength, EVER WAS AND IS, the undoubted right of his Majesty and his royal predecessors, kings and queens of England, and that neither of either house of Parliament cannot nor ought to pretend to the same.' —Fustius. The reference to *Commentaries on the Laws of England* (1765) by Sir William Blackstone (1723-1780), one of the chief sources of Hamilton's political philosophy

ment. The governor of New York may pardon in all cases, even in those of impeachment, except for treason and murder. Is not the power of the governor, in this article, on a calculation of political consequences, greater than that of the President? All conspiracies and plots against the government, which have not been matured into actual treason, may be screened from punishment of every kind, by the interposition of the prerogative of pardoning. If a governor of New York, therefore, should be at the head of any such conspiracy, until the design had been ripened into actual hostility he could insure his accomplices and adherents an entire impunity. A President of the Union, on the other hand, though he may even pardon treason, when prosecuted in the ordinary course of law, could shelter no offender, in any degree, from the effects of impeachment and conviction. Would not the prospect of a total indemnity for all the preliminary steps be a greater temptation to undertake and persevere in an enterprise against the public liberty, than the mere prospect of an exemption from death and confiscation, if the final execution of the design, upon an actual appeal to arms, should miscarry? Would this last expectation have any influence at all, when the probability was computed, that the person who was to afford that exemption might himself be involved in the consequences of the measure, and might be incapacitated by his agency in it from affording the desired impunity? The better to judge of this matter, it will be necessary to recollect that, by the proposed Constitution, the offence of treason is limited "to levying war upon the United States, and adhering to their enemies, giving them aid and comfort", and that by the laws of New York it is confined with similar bounds. *Fourthly.* The President can only adjourn the national legislature in the single case of disagreement about the time of adjournment. The British monarch may prorogue or even dissolve the Parliament. The governor of New York may also prorogue the legislature of this State for a limited time, a power which, in certain situations, may be employed to very important purposes.

The President is to have power, with the advice and consent of the Senate, to make treaties, provided two thirds of the senators present concur. The king of Great Britain is the sole and absolute representative of the nation in all foreign transactions. He can of his own

of every other description. It has been insinuated, that his authority in this respect is not conclusive, and that his conventions with foreign powers are subject to the 50 revision, and stand in need of the ratification, of Parliament. But I believe this doctrine was never heard of until it was broached upon the present occasion. Every jurist of that kingdom, and every other man acquainted with its Constitution, knows, as an established fact, that the prerogative of making treaties exists in the crown in its utmost plenitude, and that the compacts entered into by the royal authority have the most complete legal validity and perfection, independent of any other sanction. The Parliament it is true, is sometimes seen em- 60 ploying itself in altering the existing laws to conform them to the stipulations in a new treaty, and this may have possibly given birth to the imagination, that its co-operation was necessary to the obligatory efficacy of the treaty. But this parliamentary interposition proceeds from a different cause— from the necessity of adjusting a most artificial and intricate system of revenue and commercial laws, to the changes made in them by the operation of the treaty, and of adapting new provisions and precautions to the new state of things, to keep the ma- 70 chine from running into disorder. In this respect, therefore, there is no comparison between the intended power of the President and the actual power of the British sovereign. The one can perform alone what the other can do only with the concurrence of a branch of the legislature. It must be admitted, that, in this instance, the power of the federal Executive would exceed that of any State Executive. But this arises naturally from the sovereign power which relates to treaties. If the Confederacy were to be dissolved, it would become a ques- 80 tion, whether the Executives of the several States were not solely invested with that delicate and important prerogative.

The President is also to be authorized to receive ambassadors and other public ministers. This, though it has been a rich theme of declamation, is more a matter of dignity than of authority. It is a circumstance which will be without consequence in the administration of the government, and it was far more convenient that it should

54 jurist. "Vide Blackstone's Commentaries, vol. 1, p. 257"—Publius

be arranged in this manner, that . . .

a necessity of convening the legislature, or one of its branches, upon every arrival of a foreign minister, though it were merely to take the place of a departed predecessor

The President is to nominate and, *with the advice and consent of the Senate*, to appoint ambassadors and other public ministers, judges of the Supreme Court, and in general all officers of the United States established by law, and whose appointments are not otherwise provided for by the Constitution. The king of Great Britain is emphatically and truly styled the fountain of honor. He not only appoints to all offices, but can create offices. He can confer titles of nobility at pleasure; and has the disposal of an immense number of church preferments. There is evidently a great inferiority in the power of the President, in this particular, to that of the British king, nor is it equal to that of the governor of New York, if we are to interpret the meaning of the constitution of the State by the practice which has obtained under it.

20 The power of appointment is with us lodged in a council, composed of the governor and four members of the Senate, chosen by the Assembly. The governor *claims*, and has frequently *exercised*, the right of nomination, and is *entitled* to a casting vote in the appointment. If he really has the right of nominating, his authority is in this respect equal to that of the President, and exceeds it in the article of the casting vote. In the national government, if the Senate should be divided, no appointment could be made, in the government of New York, if the

30 council should be divided, the governor can turn the scale, and confirm his own nomination. If we compare the publicity which must necessarily attend the mode of appointment by the President and an entire branch of the national legislature, with the privacy in the mode of appointment by the governor of New York, closeted in a secret apartment with at most four, and frequently with only two persons, and if we at the same time consider how much more easy it must be to influence the small number of which a council of appointment consists,

40 than the considerable number of which the national Senate would consist, we cannot hesitate to pronounce that the power of the chief magistrate of this State, in the disposition of offices, must, in practice, be greatly superior to that of the Chief Magistrate of the Union.

Hence it appears that, except as to the concurrent

would be difficult to determine whether that magistrate would, in the aggregate, possess more or less power than the Governor of New York. And it appears yet more unequivocally, that there is no pretence for the parallel which has been attempted between him and the king of Great Britain. But to render the contrast in this respect still more striking, it may be of use to throw the principal circumstances of dissimilitude into a closer group.

The President of the United States would be an officer elected by the people for *four* years, the king of Great Britain is a perpetual and *hereditary* prince. The one would be amenable to personal punishment and disgrace, the person of the other is sacred and inviolable. The one would have a *qualified* negative upon the acts of the legislative body, the other has an *absolute* negative. The one would have a right to command the military and naval forces of the nation, the other, in addition to this right possesses that of *declaring* war, and of *raising* and *regulating* fleets and armies by his own authority. The one would have a concurrent power with a branch of the legislature in the formation of treaties, the other is the *sole possessor* of the power of making treaties. The one would have a like concurrent authority in appointing to offices, the other is the sole author of all appointments. The one can confer no privileges whatever the other can make denizens of aliens, noblemen of commoners, can erect corporations with all the rights incident to corporate bodies. The one can prescribe no rules concerning the commerce or currency of the nation; the other is in several respects the arbiter of commerce, and in this capacity can establish markets and fairs, can regulate weights and measures, can lay embargoes for a limited time, can coin money, can authorize or prohibit the circulation of foreign coin. The one has no particle of spiritual jurisdiction, the other is the supreme head and governor of the national church! What answer shall we give to those who would persuade us that things so unlike resemble each other? The same that ought to be given to those who tell us that a government, the whole power of which would be in the hands of the elective and periodical servants of the people, is an aristocracy, a monarchy, and a despotism.

PUBLIUS

1787-1788 • 178

George Washington

1732 • 1799

George Washington, hero of the Revolution, was called the father of his country long before he was chosen as the first President of the United States. The phrase was appropriate to a man who would have been notable in any society for patience, dependability, dignity, and courage. Common sense and the copybook virtues, not brilliance, made Washington a great soldier-leader; it is unfortunate that they also delivered him to the myth-makers, who, with a few inventions such as that of the cherry tree, made him a painful example of perfection.

Recent efforts to humanize Washington, by emphasizing his occasional outbursts of temper, his delight in the company of ladies, and his eighteenth-century overseriousness, represent a reaction which was to be expected. They have not dimmed Washington's reputation perceptibly, however, because it is obvious that he accepted his responsibilities with humility, persevered in adversities which would have crushed a merely ambitious man, and endured both abuse and idolatry with more serenity than Americans had any right to expect.

The chief events in Washington's life were the death of his father in 1743, which meant that his formal

education ended when he was sixteen and that he had, unexpectedly, to make his own way in the world, the frontier war with the French and Indians in which, in 1754 and 1755, he encountered humiliation and defeat, his decision that the Stamp Act was an attack on colonial liberty, his acceptance in 1775 of the invitation of the Continental Congress to assume command of the American army, and his election to the Presidency under the new Constitution in 1788. Always there was sacrifice for a man whose dearest wish was to be a Virginia planter. If ever a man had greatness thrust upon him, that man was Washington.

His forte was action rather than language, yet his collected writings, in the Bicentennial Edition begun in 1932, are expected to run to thirty-seven volumes. Many of his state papers, including the *Farewell Address*, were of course composed in large part by others, and yet Washington was always careful to say what he had in mind as meticulously as possible. He believed in a plain style, pruned of all unnecessary words and closely punctuated. The result was prose which is ordinarily accurate and clear. If it is unpoetic, a trifle plodding and formal rather than lively, it can be defended by the familiar doctrine that style is the man.

The Writings of George Washington, ed. W. C. Ford, 14 vols., New York, 1889-1892. • Washington's Farewell Address, ed. V. H. Paltsits, New York, 1935. • N. W. Stephenson and W. H. Dunn, *George Washington*, 2 vols., New York, 1940. • Dixon Wecter, *The Hero in America: A Chronicle of Hero-Worship*, New York, 1941.

Farewell Address

To the People of the United States
September 17th, 1796

The Farewell Address has long been regarded as the summation of Washington's political and social experience. First published in Claypoole's *American Daily Advertiser*, of Philadelphia, on September 19, 1796, it was reprinted by the end of the year in over one hundred newspapers and in fifty-five separate editions. Its immense influence upon subsequent public policy, particularly in the area of foreign relations, will be apparent to any reader.

Thanks to the careful preservation of Washington's manuscripts, the composition of the Address can be minutely studied. In 1792, when he hoped to retire after his first term as President, Washington discussed with James Madison the proper way of announcing his intention, and Madison drafted for him a "valedictory" address. Four years later, certain this time that he could not be dissuaded, Washington wrote a first draft of nineteen pages, using Madison's draft for about five pages. This he turned over to Alexander Hamilton, asking his suggestions for revision and expansion. Hamilton drew up a list of points which he thought should be considered in the final address, based in part upon Washington's manuscript; he also wrote out in full what he thought should be said. Washington took Hamilton's full draft, which incorporated some of his own paragraphs and some of Madison's, shortened it considerably, changed some words here and there, and sent it to the printer. The ideas of the Farewell Address are largely Washington's, but the form of expression is the result of extensive collaboration, Hamilton's contribution being most important.

Friends, and Fellow-Citizens,

The period for a new election of a Citizen, to administer the Executive Government of the United

States, arrived, when your thoughts must be employed in designating the person, who is to be clothed with that important trust, it appears to me proper, especially as it may conduce to a more distinct expression of the public voice, that I should now apprise you of the resolution I have formed, to decline being considered among the number of those, out of whom a choice is to be made.

I beg you, at the same time, to do me the justice to be assured, that this resolution has not been taken, without a strict regard to all the considerations appertaining to the relation, which binds a dutiful citizen to his country—and that, in withdrawing the tender of service which silence in my situation might imply, I am influenced by no diminution of zeal for your future interest, no deficiency of grateful respect for your past kindness, but act under [and?] am supported by a full conviction that the step is compatible with both.

The acceptance of, and continuance hitherto in, the office to which your suffrages have twice called me, have been a uniform sacrifice of inclination to the opinion of duty, and to a deference for what appeared to be your desire.—I constantly hoped, that it would have been much earlier in my power, consistently with motives, which I was not at liberty to disregard, to return to that retirement, from which I had been reluctantly drawn.—The strength of my inclination to do this previous to the last election, had even led to the preparation of an address to declare it to you, but mature reflection on the then perplexed and critical posture of our affairs with foreign Nations, and the unanimous advice of persons entitled to my confidence, impelled me to abandon the idea.—

I rejoice that the state of your concerns, external as well as internal, no longer renders the pursuit of inclination incompatible with the sentiment of duty, or propriety, and am persuaded, whatever partiality may be retained for my services, that in the present circumstances of our country, you will not disapprove my determination to retire.

The impressions, with which I first undertook this arduous trust, were explained on the proper occasion.—In the discharge of this trust, I will only say, that I have

Text: the original manuscript as established by W. C. Ford in *Writing*
Vol. XIII

with good intentions, contributed towards the organization and administration of the government, the best exertions of which a very fallible judgment was capable—Not unconscious, in the outset, of the inferiority of my qualifications, experience in my own eyes, perhaps still more in the eyes of others, has strengthened the motives to diffidence of myself; and every day the increasing weight of years admonishes me more and more, that the shade of retirement is as necessary to me as it will be welcome.—Satisfied, that, if any circumstances have given peculiar value to my services, they were temporary, I have the consolation to believe, that, while choice and prudence invite me to quit the political scene, patriotism does not forbid it.

In looking forward to the moment, which is intended to terminate the career of my public life, my feelings do not permit me to suspend the deep acknowledgment of that debt of gratitude, which I owe to my beloved country,—for the many honors it has conferred upon me, still more for the steadfast confidence with which it has supported me, and for the opportunities I have thence enjoyed of manifesting my inviolable attachment, by services faithful and persevering, though in usefulness unequal to my zeal.—If benefits have resulted to our country from these services, let it always be remembered to your praise, and as an instructive example in our annals, that under circumstances in which the Passions agitated in every direction were liable to mislead, amidst appearances sometimes dubious, vicissitudes of fortune often discouraging, in situations in which not unfrequently want of success has countenanced the spirit of criticism, the constancy of your support was the essential prop of the efforts, and a guarantee of the plans by which they were effected.—Profoundly penetrated with this idea, I shall carry it with me to the grave, as a strong incitement to unceasing vows that Heaven may continue to you the choicest tokens of its beneficence—that your union and brotherly affection may be perpetual—that the free constitution, which is the work of your hands, may be sacredly maintained—that its administration in every department may be stamped with wisdom and virtue—that, in fine, the happiness of the people of these States, under the auspices of liberty, may be made complete, by so careful a preservation and so prudent a use of this blessing as will acquire to them the glory of recommending it to

the applause, the affection, and adoption of every nation, which is yet a stranger to it.

Here, perhaps, I ought to stop—But a solicitude for your welfare, which cannot end but with my life, and the apprehension of danger, natural to that solicitude, urge me on an occasion like the present, to offer to your solemn contemplation, and to recommend to your frequent review, some sentiments, which are the result of much reflection, of no inconsiderable observation and which appear to me all important to the permanency of your felicity as a People—These will be offered to you with the more freedom, as you can only see in them the disinterested warnings of a parting friend, who can possibly have no personal motive to bias his counsels—Nor can I forget, as an encouragement to it your indulgent reception of my sentiments on a former and not dissimilar occasion.

Interwoven as is the love of liberty, with every ligament of your hearts, no recommendation of mine is necessary to fortify or confirm the attachment—

The Unity of Government which constitutes you one people, is also now dear to you—It is justly so,—for it is a main Pillar in the Edifice of your real independence; the support of your tranquillity at home, your peace abroad, of your safety, of your prosperity in every shape, of that very Liberty, which you so highly prize—But as it is easy to foresee, that, from different causes, and from different quarters, much pains will be taken, many artifices employed, to weaken in your minds the conviction of this truth,—as this is the point in your political fortress against which the batteries of internal and external enemies will be most constantly and actively (though often covertly and insidiously) directed, it is of infinite moment, that you should properly estimate the immense value of your national Union to your collective and individual happiness,—that you should cherish a cordial, habitual, and immovable attachment to it, accustoming yourselves to think and speak of it as of the Palladium of your political safety and prosperity, watching for its preservation with jealous anxiety, discountenancing whatever may suggest even a suspicion that it can in any event be abandoned, and indignantly frowning upon the first dawning of every attempt to alienate any portion of our Country from the rest, or to enfeeble the sacred ties which now link together the various parts.

For this you have every inducement of sympathy and interest.—Citizens by birth or choice of a common country, that country has a right to concentrate your affections—The name of AMERICAN, which belongs to you, in your national capacity, must always exalt the just pride of Patriotism, more than any appellation derived from local discriminations—With slight shades of difference, you have the same Religion, Manners, Habits and political Principles—You have in a common cause fought and triumphed together The Independence and Liberty you possess are the work of joint councils, and joint efforts—of common dangers, sufferings and successes—

But these considerations, however powerfully they address themselves to your sensibility, are greatly outweighed by those, which apply more immediately to your Interest—Here every portion of our country finds the most commanding motives for carefully guarding and preserving the Union of the whole

20 The *North* in an unrestrained intercourse with the *South*, protected by the equal Laws of a common government, finds in the productions of the latter great additional resources of maritime and commercial enterprise—and precious materials of manufacturing industry—The *South*, in the same intercourse, benefiting by the agency of the *North*, sees its agriculture grow and its commerce expand Turning partly into its own channels the seamen of the *North*, it finds its particular navigation invigorated,—and, while it contributes, in
30 different ways, to nourish and increase the general mass of the national navigation, it looks forward to the protection of a maritime strength to which itself is unequally adapted—The *East*, in a like intercourse with the *West*, already finds, and in the progressive improvement of interior communications, by land and water will more and more find, a valuable vent for the commodities which it brings from abroad, or manufactures at home—The *West* derives from the *East* supplies requisite to its growth and comfort,—and what is per-
40 haps of still greater consequence, it must of necessity owe the secure enjoyment of indispensable outlets for its own productions to the weight, influence, and the future maritime strength of the Atlantic side of the Union, directed by an indissoluble community of interest, as *one Nation*.—Any other tenure by which the *West* can hold this essential advantage, whether derived

from its own separate strength, or from an apostate and unnatural connexion with any foreign Power, must be intrinsically precarious

While then every part of our Country thus feels an immediate and particular interest in Union, all the part combined in the united mass of means and efforts cannot fail to find greater strength, greater resource, proportionably greater security from external danger, a less frequent interruption of their Peace by foreign Nations, and, what is of inestimable value! they must derive from Union an exemption from those broils and wars between themselves, which so frequently afflict neighboring countries, not tied together by the same government, which their own rivalships alone would be sufficient to produce, but which opposite foreign alliances, attachments, and intrigues would stimulate and embitter—Hence likewise they will avoid the necessity of those overgrown Military establishments, which under any form of government, are inauspicious to liberty, and which are to be regarded as particularly hostile to Republican Liberty. In this sense it is, that your Union ought to be considered as a main prop of your liberty, and that the love of the one ought to endeavor to you the preservation of the other.

These considerations speak a persuasive language to every reflecting and virtuous mind,—and exhibit the continuance of the UNION as a primary object of Patriotic desire.—Is there a doubt, whether a common government can embrace so large a sphere?—Let experience solve it—To listen to mere speculation in such a case were criminal—We are authorized to hope that a proper organization of the whole, with the auxiliary agency of governments for the respective subdivisions, will afford a happy issue to the experiment—Tis well worth a fair and full experiment. With such powerful and obvious motives to Union, affecting all parts of our country, while experience shall not have demonstrated its impracticability, there will always be reason to distrust the patriotism of those, who in any quarter may endeavor to weaken its bands—

In contemplating the causes which may disturb the Union, it occurs as matter of serious concern, that a ground should have been furnished for characterizing parties by *Geographical* discriminations—*Northern* and *Southern*—*Atlantic* and *Western*; whence designing men may endeavor to excite a belief, that there is

real difference of local interests and views. One of the expedients of Party to acquire influence, within particular districts, is to misrepresent the opinions and aims of other districts.—You cannot shield yourselves too much against the jealousies and heart burnings which spring from these misrepresentations.—They tend to render alien to each other those who ought to be bound together by fraternal affection.—The inhabitants of our Western country have lately had a useful lesson on this head.—They have seen, in the negotiation by the Executive, and in the unanimous ratification by the Senate, of the treaty with Spain, and in the universal satisfaction at that event, throughout the United States, a decisive proof how unfounded were the suspicions propagated among them of a policy in the General Government and in the Atlantic States unfriendly to their interests in regard to the MISSISSIPPI.—They have been witnesses to the formation of two Treaties, that with G. Britain, and that with Spain, which secure to them every thing they could desire, in respect to our Foreign Relations, towards confirming their prosperity.—Will it not be their wisdom to rely for the preservation of these advantages on the UNION by which they were procured?—Will they not henceforth be deaf to those advisers, if such there are, who would sever them from their Brethren, and connect them with Aliens?—

To the efficacy and permanency of your Union, a Government for the whole is indispensable.—No alliances however strict between the parts can be an adequate substitute.—They must inevitably experience the infractions and interruptions which all alliances in all times have experienced.—Sensible of this momentous truth, you have improved upon your first essay, by the adoption of a Constitution of Government, better calculated than your former for an intimate Union, and for the efficacious management of your common concerns.—This government, the offspring of our own choice uninfluenced and unawed, adopted upon full investigation and mature deliberation, completely free in its principles, in the distribution of its powers, uniting security with energy, and containing within itself a provision for its own amendment, has a just claim to your confidence and your support.—Respect for its authority, compliance with its Laws, acquiescence in its measures, are duties enjoined by the fundamental maxims of true Liberty.—The basis of our political

systems is the right of the people to make and to alter their Constitutions of Government.—But the Constitution which at any time exists, 'till changed by an explicit and authentic act of the whole People, is sacredly obligatory upon all.—The very idea of the power and the right of the People to establish Government, presupposed the duty of every individual to obey the established Government

All obstructions to the execution of the Laws, all combinations and associations, under whatever plausible character, with the real design to direct, controul, counteract, or awe the regular deliberation and action of the constituted authorities, are destructive of this fundamental principle, and of fatal tendency.—They serve to organize faction, to give it an artificial and extraordinary force—to put in the place of the delegated will of the Nation, the will of a party,—often a small but artful and enterprising minority of the community;—and, according to the alternate triumphs of different parties, to make the public administration the mirror of the ill-concerted and incongruous projects of faction, rather than the organ of consistent and wholesome plans digested by common councils, and modified by mutual interests.—However combinations or associations of the above description may now and then answer popular ends, they are likely, in the course of time and things, to become potent engines, by which cunning, ambitious, and unprincipled men will be enabled to subvert the Power of the People and to usurp for themselves the reins of Government, destroying afterwards the very engines, which have lifted them to unjust dominion.—

Towards the preservation of your Government and the permanency of your present happy state, it is requisite, not only that you steadily discountenance irregular oppositions to its acknowledged authority, but also that you resist with care the spirit of innovation upon its principles, however specious the prettexts.—One method of assault may be to effect, in the forms of the Constitution, alterations which will impair the energy of the

18 **two Treaties.** The treaty negotiated by John Jay in 1795 provided for the surrender by Great Britain of the Western forts at Mackinac, Detroit, Sandusky, etc., in the same year Thomas Pinckney arranged a treaty with Spain which allowed Americans free navigation of the Mississippi for a three year period and the right to deposit export goods at New Orleans. In the latter case, Washington's hopes proved too high

system, and thus to undermine what cannot be directly overthrown—In all the changes to which you may be invited, remember that time and habit are at least as necessary to fix the true character of Governments, as of other human institutions—that experience is the surest standard, by which to test the real tendency of the existing Constitution of a Country—that facility in changes upon the credit of mere hypothesis and opinion exposes to perpetual change, from the endless
 10 variety of hypothesis and opinion—and remember, especially, that, for the efficient management of your common interests, in a country so extensive as ours, a Government of as much vigor as is consistent with the perfect security of Liberty is indispensable—Liberty itself will find in such a Government, with powers properly distributed and adjusted, its surest Guardian—It is, indeed, little else than a name, where the Government is too feeble to withstand the enterprises of faction to confine each member of the society within the limits
 20 prescribed by the laws, and to maintain all in the secure and tranquil enjoyment of the rights of person and property

I have already intimated to you the danger of Parties in the State, with particular reference to the founding of them on Geographical discriminations—Let me now take a more comprehensive view, and warn you in the most solemn manner against the baneful effects of the Spirit of Party, generally

This Spirit, unfortunately, is inseparable from our
 30 nature, having its root in the strongest passions of the human mind—It exists under different shapes in all Governments, more or less stifled, controuled, or repressed, but, in those of the popular form, it is seen in its greatest rankness, and is truly their worst enemy

The alternate domination of one faction over another, sharpened by the spirit of revenge natural to party dissension, which in different ages and countries has perpetrated the most horrid enormities, is itself a frightful despotism.—But this leads at length to a more formal
 40 and permanent despotism—The disorders and miseries, which result, gradually incline the minds of men to seek security and repose in the absolute power of an Individual and sooner or later the chief of some prevailing faction, more able or more fortunate than his competitors, turns this disposition to the purposes of his own elevation, on the ruins of Public Liberty.

Without looking forward to an extremity of this kind, (which nevertheless ought not to be entirely out of sight), the common and continual mischiefs of the spirit of Party are sufficient to make it the interest and
 duty of a wise People to discourage and restrain it.—

It serves always to distract the Public Councils, and enfeeble the Public administration.—It agitates the community with ill founded jealousies and false alarms, kindles the animosity of one part against another foment occasionally riot and insurrection.—It opens the doors to foreign influence and corruption, which find a facilitated access to the Government itself through the channels of party passions. Thus the policy and the will of one country, are subjected to the policy and will
 of another

There is an opinion that parties in free countries are useful checks upon the Administration of the Government, and serve to keep alive the Spirit of Liberty—This within certain limits is probably true—and in Governments of a Monarchical cast, Patriotism may look with indulgence, if not with favour, upon the spirit of party—But in those of the popular character in Governments purely elective, it is a spirit not to be encouraged—From their natural tendency, it is certain
 there will always be enough of that spirit for every salutary purpose—and there being constant danger of excess, the effort ought to be, by force of public opinion to mitigate and assuage it—A fire not to be quenched, it demands a uniform vigilance to prevent its bursting
 into a flame, lest, instead of warming, it should consume

It is important, likewise, that the habits of thinking in a free country should inspire caution in those entrusted with its administration, to confine themselves within their respective constitutional spheres, avoiding
 in the exercise of the powers of one department to encroach upon another—The spirit of encroachment tends to consolidate the powers of all the departments in one, and thus to create, whatever the form of government
 a real despotism—A just estimate of that love of power, and proneness to abuse it, which predominates in the human heart, is sufficient to satisfy us of the truth of this position—The necessity of reciprocal checks in

27 baneful effects. Washington regarded the development of the party system, a result of conflict between Hamilton and Jefferson, as the most unfortunate aspect of his years in office

the exercise of political power, by dividing and distributing it into different depositories, and constituting each the Guardian of the Public Weal against invasions by the others, has been evinced by experiments ancient and modern; some of them in our country and under our own eyes—To preserve them must be as necessary as to institute them. If in the opinion of the People, the distribution or modification of the Constitutional powers be in any particular wrong, let it be corrected by an amendment in the way which the Constitution designates—But let there be no change by usurpation, for though this, in one instance, may be the instrument of good, it is the customary weapon by which free governments are destroyed.—The precedent must always greatly overbalance in permanent evil any partial or transient benefit which the use can at any time yield—

Of all the dispositions and habits, which lead to political prosperity, Religion and morality are indispensable supports—In vain would that man claim the tribute of Patriotism, who should labour to subvert these great Pillars of human happiness, these firmest props of the duties of Men and Citizens—The mere Politician, equally with the pious man, ought to respect and to cherish them—A volume could not trace all their connexions with private and public felicity—Let it simply be asked where is the security for property, for reputation, for life, if the sense of religious obligation *desert* the oaths, which are the instruments of investigation in Courts of Justice? And let us with caution indulge the supposition, that morality can be maintained without religion—Whatever may be conceded to the influence of refined education on minds of peculiar structure—reason and experience both forbid us to expect, that national morality can prevail in exclusion of religious principle—

It is substantially true, that virtue or morality is a necessary spring of popular government—The rule indeed extends with more or less force to every species of Free Government—Who that is a sincere friend to it can look with indifference upon attempts to shake the foundation of the fabric?—

Promote, then, as an object of primary importance, institutions for the general diffusion of knowledge In proportion as the structure of a government gives force to public opinion, it is essential that public opinion should be enlightened—

As a very important source of strength and security,

cherish public credit—One method of preserving it is, to use it as sparingly as possible—avoiding occasions of expense by cultivating peace, but remembering also that timely disbursements to prepare for danger frequently prevent much greater disbursements to repel it—avoiding likewise the accumulation of debt, not only by shunning occasions of expense, but by vigorous exertions in time of Peace to discharge the debts which unavoidable wars may have occasioned, not ungenerously throwing upon posterity the burthen which we ourselves ought to bear The execution of these maxims belongs to your Representatives, but it is necessary that public opinion should cooperate—To facilitate to them the performance of their duty, it is essential that you should practically bear in mind, that towards the payment of debts there must be Revenue—that to have Revenue there must be taxes—that no taxes can be devised which are not more or less inconvenient and unpleasant—that the intrinsic embarrassment inseparable from the selection of the proper objects (which is always a choice of difficulties) ought to be a decisive motive for a candid construction of the conduct of the Government in making it, and for a spirit of acquiescence in the measures for obtaining Revenue which the public exigencies may at any time dictate—

Observe good faith and justice towards all Nations Cultivate peace and harmony with all—Religion and Morality enjoin this conduct, and can it be that good policy does not equally enjoin it?—It will be worthy of a free, enlightened, and, at no distant period, a great nation, to give to mankind the magnanimous and too novel example of a People always guided by an exalted justice and benevolence—Who can doubt that in the course of time and things, the fruits of such a plan would richly repay any temporary advantages, which might be lost by a steady adherence to it? Can it be that Providence has not connected the permanent felicity of a Nation with its virtue? The experiment, at least, is recommended by every sentiment which ennobles human nature—Alas! is it rendered impossible by its vices?

In the execution of such a plan nothing is more essential than that permanent, inveterate antipathies against particular nations and passionate attachments for others should be excluded, and that in place of them just and amicable feelings towards all should be cultivated—The Nation, which indulges towards another an habitual

hatred or an habitual fondness, is in some degree a slave. It is a slave to its animosity or to its affection, either of which is sufficient to lead it astray from its duty and its interest—Antipathy in one nation against another disposes each more readily to offer insult and injury, to lay hold of slight causes of umbrage, and to be haughty and intractable, when accidental or trifling occasions of dispute occur—Hence frequent collisions, obstinate, envenomed and bloody contests—The Nation

10 prompted by ill-will and resentment sometimes impels to War the Government, contrary to the best calculations of policy—The Government sometimes participates in the national propensity, and adopts through passion what reason would reject,—at other times, it makes the animosity of the Nation subservient to projects of hostility instigated by pride, ambition, and other sinister and pernicious motives—The peace often, sometimes perhaps the Liberty, of Nations has been the victim—

20 So likewise a passionate attachment of one Nation for another produces a variety of evils—Sympathy for the favourite nation, facilitating the illusion of an imaginary common interest in cases where no real common interest exists, and infusing into one the enmities of the other, betrays the former into a participation in the quarrels and wars of the latter, without adequate inducement or justification. It leads also to concessions to the favourite Nation of privileges denied to others, which is apt doubly to injure the Nation making the

30 concessions, by unnecessarily parting with what ought to have been retained, and by exciting jealousy, ill-will, and a disposition to retaliate, in the parties from whom equal privileges are withheld, and it gives to ambitious, corrupted, or deluded citizens, (who devote themselves to the favourite Nation) facility to betray, or sacrifice the interests of their own country, without odium, sometimes even with popularity—gilding with the appearances of a virtuous sense of obligation, a commendable deference for public opinion, or a laudable zeal for

40 public good, the base or foolish compliances of ambition, corruption or infatuation—

As avenues to foreign influence in innumerable ways, such attachments are particularly alarming to the truly enlightened and independent Patriot.—How many opportunities do they afford to tamper with domestic factions, to practise the arts of seduction, to mislead

public opinion, to influence or awe the public councils! Such an attachment of a small or weak, towards a great and powerful nation, dooms the former to be the satellite of the latter.

Against the insidious wiles of foreign influence, I conjure you to believe me, fellow-citizens, the jealousy of a free people ought to be *constantly* awake, since history and experience prove that foreign influence is one of the most baneful foes of republican Government—But that jealousy, to be useful, must be impartial, else it becomes the instrument of the very influence to be avoided, instead of a defence against it.—Excessive partiality for one foreign nation and excessive dislike of another, cause those whom they actuate to see danger only on one side, and serve to veil and even second the arts of influence on the other.—Real Patriots, who may resist the intrigues of the favourite, are liable to become suspected and odious; while its tools and dupes usurp the applause and confidence of the people, to surrender their interests.—

The great rule of conduct for us, in regard to foreign Nations, is, in extending our commercial relations, to have with them as little *Political* connection as possible—So far as we have already formed engagements, let them be fulfilled with perfect good faith—Here let us stop—

Europe has a set of primary interests, which to us have none, or a very remote relation—Hence she must be engaged in frequent controversies, the causes of which are essentially foreign to our concerns—Hence therefore it must be unwise in us to implicate ourselves, by artificial ties in the ordinary vicissitudes of her politics or the ordinary combinations and collisions of her friendships, or enmities

Our detached and distant situation invites and enables us to pursue a different course—If we remain one People, under an efficient government, the period is not far off, when we may defy material injury from external annoyance, when we may take such an attitude as will cause the neutrality we may at any time resolve upon to be scrupulously respected. When belligerent nations, under the impossibility of making acquisition upon us, will not lightly hazard the giving us provocation[;] when we may choose peace or war, as our interest guided by our justice shall counsel.

Why forego the advantages of so peculiar a situa-

tion?—Why quit our own to stand upon foreign ground?—Why, by interweaving our destiny with that of any part of Europe, entangle our peace and prosperity in the toils of European ambition, rivalry, interest, humour, or caprice?—

'T is our true policy to steer clear of permanent alliances, with any portion of the foreign world—so far, I mean, as we are now at liberty to do it—for let me not be understood as capable of patronizing infidelity to existing engagements, (I hold the maxim no less applicable to public than to private affairs, that honesty is always the best policy)—I repeat it therefore let those engagements be observed in their genuine sense—But in my opinion it is unnecessary and would be unwise to extend them.—

Taking care always to keep ourselves, by suitable establishments, on a respectably defensive posture, we may safely trust to temporary alliances for extraordinary emergencies—

Harmony, liberal intercourse with all nations, are recommended by policy, humanity, and interest—But even our commercial policy should hold an equal and impartial hand—neither seeking nor granting exclusive favours or preferences,—consulting the natural course of things,—diffusing and diversifying by gentle means the streams of commerce, but forcing nothing,—establishing with Powers so disposed—in order to give trade a stable course, to define the rights of our Merchants, and to enable the Government to support them—conventional rules of intercourse, the best that present circumstances and mutual opinion will permit, but temporary, and liable to be from time to time abandoned or varied, as experience and circumstances shall dictate—constantly keeping in view that 't is folly in one nation to look for disinterested favours from another,—that it must pay with a portion of its independence for whatever it may accept under that character—that by such acceptance, it may place itself in the condition of having given equivalents for nominal favours and yet of being reproached with ingratitude for not giving more—There can be no greater error than to expect, or calculate upon real favours from Nation to Nation—'T is an illusion which experience must cure, which a just pride ought to discard

In offering to you, my Countrymen, these counsels of an old and affectionate friend, I dare not hope they

will make the strong and lasting impression, I could wish,—that they will controul the usual current of the passions, or prevent our Nation from running the course which has hitherto marked the destiny of Nations—But if I may even flatter myself, that they may be productive of some partial benefit, some occasional good, that they may now and then recur to moderate the fury of party spirit, to warn against the mischiefs of foreign intrigue, to guard against the impostures of pretended patriotism, this hope will be a full recompense for the solicitude for your welfare, by which they have been dictated—

How far in the discharge of my official duties, I have been guided by the principles which have been delineated, the public Records and other evidences of my conduct must witness to You, and to the world—To myself the assurance of my own conscience is, that I have at least believed myself to be guided by them

In relation to the still subsisting War in Europe, my Proclamation of the 22d of April 1793 is the index to my plan—Sanctioned by your approving voice and by that of Your Representatives in both Houses of Congress, the spirit of that measure has continually governed me:—uninfluenced by any attempts to deter or divert me from it

After deliberate examination with the aid of the best lights I could obtain, I was well satisfied that our country, under all the circumstances of the case, had a right to take, and was bound in duty and interest, to take a Neutral position—Having taken it, I determined, as far as should depend upon me, to maintain it, with moderation, perseverance, and firmness—

The considerations which respect the right to hold this conduct, it is not necessary on this occasion to detail. I will only observe, that, according to my understanding of the matter, that right, so far from being denied by any of the Belligerent Powers has been virtually admitted by all—

The duty of holding a neutral conduct may be inferred, without anything more, from the obligation which justice and humanity impose on every Nation, in

65 Proclamation, usually known as the Proclamation of Neutrality. It announced the American intention of dealing fairly with the revolutionary government of France, in accordance with previous treaty obligations so long as those obligations did not involve war

cases in which it is free to act, to maintain inviolate the relations of Peace and Amity towards other Nations.—

The inducements of interest for observing that conduct will best be referred to your own reflections and experience—With me, a predominant motive has been to endeavour to gain time to our country to settle and mature its yet recent institutions, and to progress without interruption to that degree of strength and consistency, which is necessary to give it, humanly speaking, the command of its own fortune

Though, in reviewing the incidents of my Administration, I am unconscious of intentional error—I am nevertheless too sensible of my defects not to think it probable that I may have committed many errors—Whatever they may be, I fervently beseech the Almighty to avert or mitigate the evils to which they may tend—I shall also carry with me the hope that my country will

never cease to view them with indulgence, and that after forty-five years of my life dedicated to its service, with an upright zeal, the faults of incompetent abilities will be consigned to oblivion, as myself must soon be to the mansions of rest

Relying on its kindness in this as in other things, and actuated by that fervent love towards it, which is so natural to a man, who views in it the native soil of himself and his progenitors for several generations,—I anticipate with pleasing expectation that retreat, in which I promise myself to realize, without alloy, the sweet enjoyment of partaking, in the midst of my fellow-citizens, the benign influence of good Laws under a free Government,—the ever favourite object of my heart, and the happy reward, as I trust, of our mutual cares, labours, and dangers

1796

Hugh Henry Brackenridge

1748 • 1816

As farm boy, schoolteacher, divinity student, army chaplain, lawyer, legislator, and judge, Hugh Henry Brackenridge, "our first back-country writer," rubbed shoulders with Americans of many persuasions. He did not find democracy an unmixed blessing, but he believed in it, possibly because it offered opportunity to him. He remains perhaps the best contemporary observer of the true "rising glory" of America in the last quarter of the eighteenth century: the freedom of the individual to choose his own occupation and to improve his condition without the handicap of rigid class distinction.

Brackenridge was born in Scotland in 1748 and came to York County, Pennsylvania, then a frontier region,

when he was five. At fifteen he was teaching school in Maryland; at the age of twenty he entered the College of New Jersey (now Princeton), where he was a classmate of James Madison and Philip Freneau (p. 436). Before his graduation in 1771, he had dabbled in satirical verse and fiction. Although he returned to schoolteaching, he had literary ambitions, and within a few years published *The Rising Glory of America* (1772), a Commencement poem in which Freneau had had a hand, *A Poem on Divine Revelation* (1774), which he read when he took his M.A. degree, and *The Battle of Bunkers-Hill* (1776), a poetic drama supposedly recited by his pupils in a Maryland academy.

Whig by conviction, he turned his theological studies to good use by becoming a chaplain in 1776-1778 and attacking the Tories in *Six Political Discourses Founded on the Scripture* (1778). Then, for a year, he tried magazine publishing in Philadelphia. When *The United States Magazine* folded up, he was reading law, and by 1785 he was settled in Pittsburgh, with the ambition of becoming a legislator and political leader. The move did not bring him tranquillity, but it deposited a thoughtful democrat with literary tastes in a turbulent center of frontier democracy. The result was *Modern Chivalry*, of which the first volume appeared in 1792, the last in 1815. There is no better record of the society which rebelled against Alexander Hamilton's internal revenue measures in the so-called Whiskey Insurrection of 1791-1794.

Brackenridge's political career as state assemblyman and justice of the state Supreme Court was never smooth, because, seeing justice on both sides, he pleased neither for very long. He could never go all the way with either Federalists or Republicans, with national or local interests, and more than once he found himself defeated

at the polls, vilified in the local newspapers, and suspected by his party leaders. His recourse, fortunately, was to satire, both in verse and in prose.

His son remarked that Brackenridge "appeared to live more in the world of books than of men," and there is much evidence of his delight in the classics of all literatures. His particular enthusiasms were Cervantes, Rabelais, Samuel Butler, Swift, Fielding, Le Sage, Smollett, and Sterne—a list which reveals his liking for the earthy and vigorous in fiction and satire. Perhaps because of this taste, *Modern Chivalry* does not seem so weakly imitative as the productions of such men as Timothy Dwight (p. 450), even though it is a picaresque novel obviously modeled on *Don Quixote*, with chapters of author's commentary in the manner of Swift's *The Tale of a Tub* and Fielding's *Tom Jones*. The subject matter dominates the form, and *Modern Chivalry*, though sprawling and uneven, retains vitality.

Modern Chivalry, ed. C. M. Newlin, New York, 1937 • C. M. Newlin, *The Life and Writings of Hugh Henry Brackenridge*, Princeton, 1932 • R. J. Ferguson, *Early Western Pennsylvania Politics*, Pittsburgh, 1938

From

Modern Chivalry

Modern Chivalry: Containing the Adventures of Captain John Farrago, and Teague O'Regan, His Servant was originally published in four installments and six volumes. The first two volumes (Philadelphia, 1792) and the third (Pittsburgh, 1793) describe the frontier's exaltation of the common man, personified by Teague, the ignorant Irish immigrant, without regard to his merits. A fourth volume (Philadelphia, 1797) was based on the Whiskey Insurrection. The fifth and sixth volumes (Carlisle, 1804, 1805) satirize political journalism and the popular distrust of

courts and lawyers. A new complete edition, with still further additions, was printed in four volumes in 1815. The three chapters which follow are from Book I and come at the beginning of the story, after the reader has barely been introduced to Captain Farrago, a "man of about fifty-three years of age, good natural sense, and considerable reading, but in some things whimsical."

CHAP. III

The Captain rising early next morning, and setting out on his way, had now arrived at a place where a number of people were convened, for the purpose of electing persons to represent them in the legislature of the state. There was a weaver who was a candidate for this ap-

Text the 1792 edition • **5 a weaver** William Findley, chosen over Brackenridge as a delegate to the Constitutional Convention in 1787, had been a weaver

pointment, and seemed to have a good deal of interest among the people. But another, who was a man of education, was his competitor. Relying on some talent of speaking which he thought he possessed, he addressed the multitude.

Said he, Fellow citizens, I pretend not to any great abilities, but am conscious to myself that I have the best good will to serve you. But it is very astonishing to me, that this weaver should conceive himself qualified
10 for the trust. For though my acquirements are not great, yet his are still less. The mechanical business which he pursues, must necessarily take up so much of his time, that he cannot apply himself to political studies. I should therefore think it would be more answerable to your dignity, and conducive to your interest, to be represented by a man at least of some letters, than by an illiterate handicraftsman like this. It will be more honourable for himself, to remain at his loom and knot threads, than to come forward in a legislative capacity.
20 because, in the one case, he is in the sphere where God and nature has placed him, in the other, he is like a fish out of water, and must struggle for breath in a new element.

Is it possible he can understand the affairs of government, whose mind has been concentrated to the small object of weaving webs, to the price by the yard, the grist of the thread, and such like matters as concern a manufacturer of cloth? The feet of him who weaves, are more occupied than the head, or at least as much,
30 and therefore the whole man must be, at least, but in half accustomed to exercise his mental powers. For these reasons, all other things set aside, the chance is in my favour, with respect to information. However, you will decide, and give your suffrages to him or to me, as you shall judge expedient.

The Captain hearing these observations, and looking at the weaver, could not help advancing, and undertaking to subjoin something in support of what had been just said. Said he, I have no prejudice against a
40 weaver more than another man. Nor do I know any harm in the trade, save that from the sedentary life in a damp place, there is usually a paleness of the countenance: but this is a physical, not a moral evil. Such usually occupy subterranean apartments, not for the purpose, like Demosthenes, of shaving their heads, and writing over eight times the history of Thucydides,

and perfecting a style of oratory, but rather to keep the thread moist, or because this is considered but as an inglorious sort of trade, and is frequently thrust away into cellars, and damp out-houses, which are not occupied for a better use.

But to rise from the cellar to the senate house, would be an unnatural hoist. To come from counting threads and adjusting them to the splits of a reed, to regulate the finances of a government, would be preposterous there being no congruity in the case. There is no analogy between knotting threads and framing laws. It would be a reversion of the order of things. Not that a manufacturer of linen or woollen, or other stuff, is an inferior character, but a different one, from that which ought to be employed in affairs of state. It is unnecessary to enlarge on this subject, for you must all be convinced of the truth and propriety of what I say. But if you will give me leave to take the manufacturer aside a little I think I can explain to him my ideas on the subject; and very probably prevail with him to withdraw his pretensions. The people seeming to acquiesce, and beckoning to the weaver, they drew aside, and the Captain addressed him in the following words.

Mr Traddle, said he, for that was the name of the manufacturer, I have not the smallest idea of wounding your sensibility, but it would seem to me, it would be more your interest to pursue your occupation, than to launch out into that of which you have no knowledge. When you go to the senate house, the application to you will not be to warp a web, but to make laws for the commonwealth. Now, suppose that the making these laws, requires a knowledge of commerce, or of the interests of agriculture, or those principles upon which the different manufactures depend, what service could you render. It is possible you might think justly enough but could you speak? You are not in the habit of public speaking. You are not furnished with those common place ideas, with which even very ignorant men can pass for knowing something. There is nothing makes

27 grist, size or thickness • 45 Demosthenes (383?-322 B.C.), the Athenian orator, is supposed to have trained himself by building a subterranean study, shaving one side of his head so that his appearance would keep him out of society, and copying and recopying the orations which appear at intervals in the history of the Peloponnesian War by Thucydides (471?-401? B.C.)

a man so ridiculous as to attempt what is above his sphere. You are no tumbler, for instance, yet should you give out that you could vault upon a man's back; or turn head over heels, like the wheel of a cart, the stiffness of your joints would encumber you, and you would fall upon your backside to the ground. Such a squash as that would do you damage. The getting up to ride on the state is an unsafe thing to those who are not accustomed to such horsemanship. It is a disagreeable thing for a man to be laughed at, and there is no way of keeping oneself from it but by avoiding all affectation.

While they were thus discoursing, a bustle had taken place among the crowd. Teague hearing so much about elections, and serving the government, took it into his head, that he could be a legislator himself. The thing was not displeasing to the people, who seemed to favour his pretensions, owing, in some degree, to there being several of his countrymen among the crowd, but more especially to the fluctuation of the popular mind, and a disposition to what is new and ignoble. For though the weaver was not the most elevated object of choice, yet he was still preferable to this tatter-demalion, who was but a menial servant, and had so much of what is called the brogue on his tongue, as to fall far short of an elegant speaker.

The Captain coming up, and finding what was on the carpet, was greatly chagrined at not having been able to give the multitude a better idea of the importance of a legislative trust, alarmed also, from an apprehension of the loss of his servant. Under these impressions he resumed his address to the multitude. Said he, This is making the matter still worse, gentlemen: this servant of mine is but a bog-trotter, who can scarcely speak the dialect in which your laws ought to be written, but certainly has never read a single treatise on any political subject, for the truth is, he cannot read at all. The young people of the lower class, in Ireland, have seldom the advantage of a good education, especially the descendants of the ancient Irish, who have most of them a great assurance of countenance, but little information, or literature. This young man, whose family name is Oregan, has been my servant for several years. And, except a too great fondness for women, which now and then brings him into scrapes, he has demeaned himself in a manner tolerable enough. But he is totally ignorant

of the great principles of legislation, and more especially, the particular interests of the government. A free government is a noble possession to a people, and this freedom consists in an equal right to make laws, and to have the benefit of the laws when made. Though doubtless, in such a government, the lowest citizen may become chief magistrate, yet it is sufficient to possess the right, not absolutely necessary to exercise it. Or even if you should think proper, now and then, to shew your privilege, and exert, in a signal manner, the democratic prerogative, yet is it not descending too low to filch away from me a hireling, which I cannot well spare, to serve your purposes? You are surely carrying the matter too far, in thinking to make a senator of this hostler; to take him away from an employment to which he has been bred, and put him to another, to which he has served no apprenticeship, to set those hands which have been lately employed in currying my horse, to the draughting-bills, and preparing business for the house.

The people were tenacious of their choice, and insisted on giving Teague their suffrages, and by the frown upon their brows, seemed to indicate resentment at what had been said, as indirectly charging them with want of judgment, or calling in question their privilege to do what they thought proper. It is a very strange thing, said one of them, who was a speaker for the rest, that after having conquered Burgoyne and Cornwallis, and got a government of our own, we cannot put in it whom we please. This young man may be your servant, or another man's servant, but if we chuse to make him a delegate, what is that to you? He may not be yet skilled in the matter, but there is a good day a-coming. We will empower him, and it is better to trust a plain man like him, than one of your high flyers, that will make laws to suit their own purposes.

Said the Captain, I had much rather you would send the weaver, though I thought that improper, than to invade my household, and thus detract from me the very person that I have about me to brush my boots, and clean my spurs. The prolocutor of the people gave him to understand that his surmises were useless, for the people

73 Burgoyne and Cornwallis, British generals. John Burgoyne (1723-1792) surrendered his army of nearly six thousand men at Saratoga, New York, in October 1777, Lord Cornwallis (1738-1805) surrendered over seven thousand men at Yorktown, Virginia, in October 1781.

had determined on the choice, and Teague they would have for a representative

Finding it answered no end to expostulate with the multitude, he requested to speak a word with Teague by himself. Stepping aside, he said to him, composing his voice, and addressing him in a soft manner, Teague, you are quite wrong in this matter they have put into your head. Do you know what it is to be a member of a deliberative body? What qualifications are necessary? Do you understand any thing of geography? If a question should be, to make a law to dig a canal in some part of the state, can you describe the bearing of the mountains, and the course of the rivers? Or if commerce is to be pushed to some new quarter, by the force of regulations, are you competent to decide in such a case? There will be questions of law, and astronomy on the carpet. How you must gape and stare like a fool, when you come to be asked your opinion on these subjects? Are you acquainted with the abstract principles of finance, with the funding public securities, the ways and means of raising the revenue, providing for the discharge of the public debts, and all other things which respect the economy of the government? Even if you had knowledge, have you a facility of speaking. I would suppose you would have too much pride to go to the house just to say, Ay, or No. This is not the fault of your nature, but of your education, having been accustomed to dig turf in your early years rather than instructing yourself in the classics, or common school books.

30 When a man becomes a member of a public body, he is like a racoon, or other beast that climbs up the fork of a tree, the boys pushing at him with pitch-forks, or throwing stones, or shooting at him with an arrow, the dogs barking in the mean time. One will find fault with your not speaking, another with your speaking, if you speak at all. They will have you in the news papers, and ridicule you as a perfect beast. There is what they call the caricatura, that is, representing you with a dog's head, or a cat's claw. As you have a red head, they will
40 very probably make a fox of you, or a sorrel horse, or a brindled cow, or the like. It is the devil in hell to be exposed to the squibs and crackers of the gazette wits and publications. You know no more about these matters than a goose, and yet you would undertake rashly, without advice, to enter on the office, nay, contrary to advice. For I would not for a thousand guineas, though

I have not the half of it to spare, that the breed of the Oregans should come to this, bringing on them a worse stain than stealing sheep, to which they are addicted. You have nothing but your character, Teague, in a new country to depend upon. Let it never be said, that you quitted an honest livelihood, the taking care of my horse, to follow the new fangled whims of the times, and to be a statesman.

Teague was moved chiefly with the last part of the address, and consented to give up the object.

The Captain glad of this, took him back to the people and announced his disposition to decline the honour which they had intended him.

Teague acknowledged that he had changed his mind, and was willing to remain in a private station.

The people did not seem well pleased with the Captain, but as nothing more could be said about the matter they turned their attention to the weaver, and gave him their suffrages.

CHAP. IV

Captain Farrago leaving this place, proceeded on his way, and at the distance of a mile or two, met a man with a bridle in his hand, who had lost a horse, and had been at a conjurer's to make enquiry, and recover his property.

It struck the mind of the Captain to go to this conjuring person and make a demand of him, what was the cause that the multitude were so disposed to elevate the low to the highest station. He had rode but about a mile, when the habitation of the conjurer, by the direction and description of the man who had lost the horse had given, began to be in view. Coming up to the door and enquiring if that was not where conjurer Kolt lived they were answered Yes. Accordingly alighting, and entering the domicile, all those things took place which usually happen, or are described in cases of this nature. 112. there was the conjurer's assistant, who gave the Captain to understand that master had withdrawn a little, but would be in shortly.

In the mean time, the assistant endeavoured to draw from him some account of the occasion of his journey.

38 caricatura caricature, an exaggerated likeness

which the other readily communicated; and the conjurer, who was listening through a crack in the partition, overheard. Finding it was not a horse or cow, or a piece of linen that was lost, but an abstract question of political philosophy which was to be put, he came from his lurking place, and entered, as if not knowing that any person had been waiting for him

After mutual salutations, the Captain gave him to understand the object which he had in view by calling on him

Said the conjurer, This lies not at all in my way If it had been a dozen of spoons, or a stolen watch, that you had to look for, I could very readily, by the assistance of my art, have assisted you in the recovery; but as to this matter of men's imaginations and attachments in political affairs, I have no more understanding than another man.

It is very strange, said the Captain, that you who can tell by what means a thing is stolen, and the place where
20 it is deposited, though at a thousand miles distance, should know so little of what is going on in the breast of man, as not to be able to develope his secret thoughts, and the motives of his actions

It is not of our business, said the other, but should we undertake it, I do not see that it would be very difficult to explain all that puzzles you at present There is no need of a conjurer to tell why it is that the common people are more disposed to trust one of their own class than those who may affect to be superior Besides, there
is a certain pride in man, which leads him to elevate the low, and pull down the high. There is a kind of creating power exerted in making a senator of an unqualified person; which when the author has done, he exults over the work, and, like the Creator himself when he made the world, sees that "it is very good" Moreover, there is in every government a patrician class, against whom the spirit of the multitude naturally militates And hence a perpetual war, the aristocrats endeavouring to detrude the people, and the people contending to obtrude themselves And it is right it should be so, for by this fermentation, the spirit of democracy is kept alive

The Captain, thanking him for his information, asked him what was to pay, at the same time pulling out half a crown from a green silk purse which he had in his breeches pocket The conjurer gave him to understand, that as the solution of these difficulties was not within

his province, he took nothing for it The captain expressing his sense of his disinterested service, bade him adieu

CHAP. V

Containing Reflections

A Democracy is beyond all question the freest government because under this, every man is equally protected
50 by the laws, and has equally a voice in making them But I do not say an equal voice, because some men have stronger lungs than others, and can express more forcibly their opinions of public affairs. Others, though they may not speak very loud, yet have a faculty of saying more in a short time, and even in the case of others, who speak little or none at all, yet what they do say containing good sense, comes with greater weight, so that all things considered, every citizen, has not, in this sense of the word, an equal voice But the right being
60 equal, what great harm if it is unequally exercised? is it necessary that every man should become a statesman? No more than that every man should become a poet or a painter The sciences, are open to all, but let him only who has taste and genius pursue them If any man covets the office of a bishop, says St Paul, he covets a good work But again, he adds this caution, Ordain not a novice, lest being lifted up with pride, he falls into the condemnation of the devil It is indeed making a
70 devil of a man to lift him up to a state to which he is not suited A ditcher is a respectable character, with his overalls on, and a spade in his hand, but put the same man to those offices which require the head, whereas he has been accustomed to impress with his foot, and there appears a contrast between the man and the occupation

There are individuals in society, who prefer honour to wealth, or cultivate political studies as a branch of literary pursuits, and offer themselves to serve public bodies, in order to have an opportunity of discovering their knowledge, and exercising their judgment It
80 must be chagrining to these, and hurtful to the public, to see those who have no talent this way, and ought to have no taste, preposterously obtrude themselves upon the government. It is the same as if a brick-layer should

66 St. Paul, in 1 Timothy 3 1 "If a man desireth the office of a bishop, he desireth a good work"

up the office of a taylor, and come with his square perpendicular, to make the measure of a pair breeches

It is proper that those who cultivate oratory, should go to the house of orators. But for an Ay and No man to be ambitious of that place, is to sacrifice his credit to his vanity.

Teague O'Regan

I would not mean to insinuate that legislators are to be selected from the more wealthy of the citizens, yet a man's circumstances ought to be such as afford him leisure for study and reflection. There is often wealth without taste or talent. I have no idea, that because a man lives in a great house, and has a cluster of bricks or stones about his backside, that he is therefore fit for a legislator. There is so much pride and arrogance with those who consider themselves the first in a government, that it deserves to be checked by the populace, and the evil most usually commences on this side. Men associate with their own persons, the adventitious circumstances of birth and fortune: So that a fellow blowing with fat and repletion, conceives himself superior to the poor lean man, that lodges in an inferior mansion.

But as in all cases, so in this, there is a medium. Genius and virtue are independent of rank and fortune, and it is neither the opulent, nor the indigent, but the man of ability and integrity that ought to be called forth to serve his country. And while, on the one hand, the aristocratic part of the government arrogates a right to represent, on the other hand, the democratic contends the point, and from this conjunction and opposition of forces, there is produced a compound resolution, which carries the object in an intermediate direction. When we see therefore, a Teague Oregan lifted up, the philosopher will reflect, that it is to balance some purse-proud fellow, equally as ignorant, that comes down from the sphere of the aristocratic interest.

But every man ought to consider for himself, whether it is his use to be this draw-back, on either side. For as when good liquor is to be distilled, you throw in some material useless in itself to correct the effervescence of the spirit, so it may be his part to act as a sedative. For though we commend the effect, yet still the material retains but its original value.

But as the nature of things is such, let no man, who means well to the commonwealth, and offers to serve it, be hurt in his mind when some one of meaner talents is preferred. The people are a sovereign, and greatly despotic, but, in the main, just.

I have a great mind, in order to elevate the composition, to make quotations from the Greek and Roman history. And I am conscious to myself, that I have read over the writers on the government of Italy and Greece in ancient, as well as modern times. But I have drawn a great deal more from reflection on the nature of things, than from all the writings I have ever read. Nay, the history of the election, which I have just given, will afford a better lesson to the American mind, than all that is to be found in other examples. We have seen here, a weaver a favoured candidate, and in the next instance, a bog-trotter superseding him. Now it may be said, that this is fiction, but fiction, or no fiction, the nature of the thing will make it a reality. But I return to the adventures of the Captain, whom I have upon my hands, and who, as far as I can yet discover, is a good honest man; and means what is benevolent and useful though his ideas may not comport with the ordinary manner of thinking, in every particular.

Thomas Jefferson

1743 • 1826

See page 353 for a biographical account of Jefferson.

First Inaugural Address

Jefferson's program as President was set forth simply and directly in his **First Inaugural Address**, delivered in the Senate chamber on March 4, 1801. His eloquent plea for harmony and unity did not save him from the criticism of the Federalists, but even they could hardly question his list of the essential principles of democratic government. A comparison with Washington's **Farewell Address** (p. 374) will show, indeed, that Jefferson was right in believing that the two parties were not so widely separated in their principles as was commonly thought. The brevity and pointedness of Jefferson's phrases, as compared with those of Washington and Hamilton, make his **First Inaugural** one of the most memorable statements of the American concept of a free, self-governing people. It was immediately printed everywhere in the nation, both in the newspapers and separately.

F riends & Fellow Citizens

Called upon to undertake the duties of the first Executive office of our country, I avail myself of the presence of that portion of my fellow citizens which is here assembled to express my grateful thanks for the favor with which they have been pleased to look towards me, to declare a sincere consciousness that the task is above my talents, & that I approach it with those anxious & awful presentiments, which the greatness of the charge, & the weakness of my powers so justly inspire.

A rising nation spread over a wide & fruitful land, traversing all the seas with the rich productions of their industry, engaged in commerce with nations who feel power and forget right, advancing rapidly to destinies beyond the reach of mortal eye, when I contemplate these transcendent objects, & see the honor, the happiness, & the hopes of this beloved country committed to the issue & the auspices of this day, I shrink from the contemplation, & humble myself before the magnitude of the undertaking.

Text that established by P. L. Ford from the first draft, *Works*, Vol. IX. For the sake of ease in reading, however, most of the many abbreviations have here been spelled out and a few marks of punctuation supplied in brackets.

Utterly indeed should I despair, did not the presence of many whom I here see, remind me, that in the other high authorities provided by our constitution, I shall find resources of wisdom, of virtue & of zeal, on which to rely under all difficulties.

To you then, gentlemen who are charged with the sovereign functions of legislation & to those associated with you, I look with encouragement for that guidance & support which may enable us to steer with safety, the vessel in which we are all embarked amidst the conflicting elements of a troubled sea

During the contest of opinion through which we have passed, the animation of discussions and of exertions, has sometimes worn an aspect which might impose on strangers unused to think freely, & to speak & to write what they think

But this being now decided by the voice of the nation, enounced according to the rules of the constitution, all will of course arrange themselves under the will of the law, & unite in common efforts for the common good All too will bear in mind this sacred principle that though the will of the Majority is in all cases to prevail, that will, to be rightful, must be reasonable that the Minority possess their equal rights, which equal laws must protect, & to violate would be oppression.

Let us then, fellow citizens, unite with one heart & one mind, let us restore to social intercourse that harmony & affection, without which Liberty, & even Life itself, are but dreary things

And let us reflect that having banished from our land that religious intolerance under which mankind so long bled & suffered we have yet gained little, if we countenance a political intolerance, as despotic[,] as wicked[,] & capable of as bitter & bloody persecution

During the throes and convulsions of the antient world, during the agonised spasms of infuriated man, seeking through blood & slaughter his long lost liberty, it was not wonderful that the agitation of the billows should reach even this distant & peaceful shore that this should be more felt & feared by some, & less by others, & should divide opinions as to measures of safety

But every difference of opinion, is not a difference of principle We have called, by different names, brethren of the same principle. We are all republicans: we are

all federalists

If there be any among us who wish to dissolve this union, or to change its republican form, let them stand undisturbed, as monuments of the safety with which error of opinion may be tolerated where reason is left free to combat it.

I know indeed that some honest men have feared that a republican government cannot be strong, that this government is not strong enough But would the honest patriot, in the full tide of successful experiment abandon a government which has so far kept us free & firm on the theoretic & visionary fear that this government, the world's best hope may, by possibility, want energy to preserve itself?

I trust not I believe this, on the contrary, the strongest government on earth

I believe it the only one where every man, at the call of the law, would fly to the standard of the law would meet invasions of public order, as his own personal concern.

Some times it is said that Man cannot be trusted with the government of himself—Can he then be trusted with the government of others? Or have we found angels in the form of kings to govern him?—Let History answer this question

Let us then pursue with courage & confidence our own federal & republican principles[,] our attachment to Union and Representative government

Kindly separated by nature, & a wide ocean, from the exterminating havoc of one quarter of the globe,

Too high-minded to endure the degradations of the others,

Possessing a chosen country, with room enough for our descendants to the thousandth & thousandth generation.

Entertaining a due sense of our equal right, to the use of our own faculties, to the acquisitions of our own industry, to honor & confidence from our fellow citizens resulting not from birth, but from our actions & their sense of them, enlightened by a benign religion, professed indeed & practiced in various forms, yet all of them

35 throes and convulsions. The Federalist editors, anxious to find fault, made much capital of the mixed metaphor in this sentence—the 'agonised spasms' which change so abruptly to 'billows'

inculcating honesty, truth, temperance[,] gratitude, & the love of man, acknowledging & adoring an overruling providence, which by all it's dispensations proves that it delights in the happiness of man here, & his greater happiness hereafter

With all these blessings, what more is necessary to make us a happy and a prosperous people? Still one thing more, fellow citizens[,] a wise & frugal government, which shall restrain men from injuring one another, shall leave them otherwise free to regulate their own pursuits of industry & improvement, and shall not take from the mouth of labor the bread it has earned

This is the sum of good government, & this is necessary to close the circle of our felicities

About to enter[,] fellow citizens[,] on the exercise of duties, which comprehend everything dear & valuable to you, it is proper you should understand what I deem the essential principle of this government and consequently those which ought to shape it's administration

I will compress them in the narrowest compass they will bear, stating the general principle, but not all it's limitations.

Equal & exact justice to all men, of whatever state or persuasion, religious or political

Peace, commerce, & honest friendship with all nations, entangling alliances with none

The support of the State governments in all their rights, as the most competent administrations for our domestic concerns, and the surest bulwarks against anti republican tendencies

The preservation of the General government, in it's whole constitutional vigor, as the sheet anchor of our peace at home, and safety abroad

A jealous care of the right of election by the people, a mild & safe corrective of abuses, which are lopped by the sword of revolution, where peacable remedies are unprovided.

Absolute acquiescence in the decisions of the Majority[,] the vital principle of republics, from which is no appeal but to force, the vital principle & immediate parent of despotism.

A well disciplined militia, our best reliance in peace, & for the first moments of war, till regulars may relieve

them The Supremacy of the Civil over the Military authority

Economy in public expense, that labor may be lightly burthened.

The honest payment of our debts and sacred preservation of the public faith

Encouragement of Agriculture, & of Commerce, as it's handmaid

The diffusion of information, & arraignment of all abuses at the bar of the public reason

Freedom of Religion, freedom of the press, & freedom of Person under the protection of the Habeas corpus And trial by juries, impartially selected

These Principles form the bright constellation which has gone before us, & guided our steps, thro' an age of Revolution and Reformation The wisdom of our Sages, & blood of our Heroes, have been devoted to their attainment they should be the Creed of our political faith, the Text of civic instruction, the Touchstone by which to try the services of those we trust, and should we wander from them, in moments of error or alarm let us hasten to retrace our steps and to regain the road which alone leads to Peace, Liberty & Safety

I repair then, fellow citizens[,] to the post which you have assigned me

With experience enough in subordinate stations to know the difficulties of this the greatest of all, I have learnt to expect that it will rarely fall to the lot of imperfect man to retire from this station with the reputation & the favor which bring him into it

Without pretensions to that high confidence you reposed in our first & greatest revolutionary character whose preeminent services had entitled him to the first place in his country's love, and had destined for him the fairest page in the volume of faithful history, I ask so much confidence only as may give firmness & effect to the legal administration of your affairs.

I shall often go wrong thro' defect of judgment when right, I shall often be thought wrong by those whose positions will not command a view of the whole ground.

I ask your indulgence for my own errors, which will never be intentional & your support against the errors

77 first . . . character, Washington

of others who may condemn what they would not if seen in all its parts.

The approbation implied by your suffrage, is a great consolation to me for the past; and my future solicitude will be to retain the good opinion of those who have bestowed it in advance, to conciliate that of others, by doing them all the good in my power, and to be instrumental to the happiness & freedom of all

Relying then on the patronage of your good will, I advance with obedience to the work, ready to retire from it whenever you become sensible how much better choice it is in your power to make.

And may that infinite power which rules the destinies of the universe lead our councils to what is best, and give them a favorable issue for your peace & prosperity.

1801

Second Inaugural Address

Jefferson's *Second Inaugural* was planned, according to his own notes, as "a *conte rendu*, or a statement of facts," showing that he had conformed to the principles outlined in the address of 1801. That, he said, was "promise: this is performance." His remarks were divided under the heads of Foreign Affairs and Domestic Affairs, the latter comprising Taxes, Debts, Louisiana, Religion, Indians, and the Press "None of these heads," Jefferson noted, "need any commentary but that of the Indians. This is a proper topic not only to promote the work of humanizing our citizens towards these people, but to conciliate to us the good opinion of Europe on the subject of the Indians. This, however, might have been done in half the compass it here occupies. But every respector of science, every friend to political reformation must have observed with indignation the hue & cry raised against philosophy & the rights of man; and it really seems as if they would be overborne & barbarism, bigotry & despotism would recover the ground they have lost by the advance of the public understanding. I have thought the occasion justified some dis-

countenance of these anti-social doctrines, some testimony against them, but not to commit myself in direct warfare on them, I have thought it best to say what is directly applied to the Indians only, but admits by inference a more general extension." The *Second Inaugural*, as a matter of fact, is Jefferson's defense of himself against the charges of his Federalist enemies, particularly the Federalist editors, that he was a demagogue, an enemy of religion, a philosophic dreamer—the kind of man portrayed by such satirists as Washington Irving (p. 538). There is also a pardonable note of pride in the result of the election, in which Jefferson had carried fifteen of the seventeen states and 162 of the 176 votes in the electoral college. The manuscripts show that Jefferson's close friend, secretary of state James Madison, helped in polishing the address. Like the *First Inaugural*, it was probably first printed in the newspapers.

Proceeding, fellow citizens, to that qualification which the constitution requires, before my entrance on the charge again conferred upon me, it is my duty to express the deep sense I entertain of this new proof of confidence from my fellow citizens at large, and the zeal with which it inspires me, so to conduct myself as may best satisfy their just expectations.

On taking this station on a former occasion, I declared the principles on which I believed it my duty to ad-

Text that established by P. L. Ford from the original manuscript Works, Vol. X • 2 the constitution requires. An allusion, apparently to Article II, Section 3, which states that the President "shall from time to time give to the Congress information of the state of the Union."

minister the affairs of our commonwealth. My conscience tells me that I have, on every occasion, acted up to that declaration, according to its obvious import, and to the understanding of every candid mind

In the transaction of your foreign affairs, we have endeavored to cultivate the friendship of all nations, and especially of those with which we have the most important relations. We have done them justice on all occasions, favored where favor was lawful, and cherished mutual interests and intercourse on fair and equal terms. We are firmly convinced, and we act on that conviction, that with nations, as with individuals, our interests soundly calculated, will ever be found inseparable from our moral duties, and history bears witness to the fact, that a just nation is taken on its word, when recourse is had to armaments and wars to bridle others

At home, fellow citizens, you best know whether we have done well or ill. The suppression of unnecessary offices, of useless establishments and expenses, enabled us to discontinue our internal taxes. These covering our land with officers, and opening our doors to their intrusions, had already begun that process of domiciliary vexation which, once entered, is scarcely to be restrained from reaching successively every article of produce and property. If among these taxes some minor ones fell which had not been inconvenient, it was because their amount would not have paid the officers who collected them, and because, if they had any merit, the state authorities might adopt them, instead of others less approved

The remaining revenue on the consumption of foreign articles, is paid cheerfully by those who can afford to add foreign luxuries to domestic comforts, being collected on our seaboard and frontiers only, and incorporated with the transactions of our mercantile citizens, it may be the pleasure and pride of an American to ask, what farmer, what mechanic, what laborer, ever sees a tax-gatherer of the United States? These contributions enable us to support the current expenses of the government, to fulfil contracts with foreign nations, to extinguish the native right of soil within our limits, to extend those limits, and to apply such a surplus to our public debts, as places at a short day their final redemption, and that redemption once effected, the revenue thereby liberated may, by a just repartition among the

states, and a corresponding amendment of the constitution, be applied, *in time of peace*, to rivers, canals, roads, arts, manufactures, education, and other great objects within each state. *In time of war*, if injustice, by ourselves or others, must sometimes produce war, increased as the same revenue will be increased by population and consumption, and aided by other resources reserved for that crisis, it may meet within the year all the expenses of the year, without encroaching on the rights of future generations, by burdening them with the debts of the past. War will then be but a suspension of useful works, and a return to a state of peace, a return to the progress of improvement.

I have said, fellow citizens, that the income reserved had enabled us to extend our limits, but that extension may possibly pay for itself before we are called on, and in the meantime, may keep down the accruing interest, in all events, it will repay the advances we have made. I know that the acquisition of Louisiana has been disapproved by some, from a candid apprehension that the enlargement of our territory would endanger its union. But who can limit the extent to which the federative principle may operate effectively? The larger our association, the less will it be shaken by local passions, and in any view, is it not better that the opposite bank of the Mississippi should be settled by our own brethren and children, than by strangers of another family? With which shall we be most likely to live in harmony and friendly intercourse?

20 taxes Jefferson's financial worries were greatly eased by his choice as secretary of the treasury, the Swiss-born financier Albert Gallatin (1761-1849). Under his careful management the removal of all excise taxes, which had caused such unrest as the Whiskey Insurrection, failed to disturb the pay-as-you-go policy of the Republicans. • 41 native . . . soil. Jefferson's Indian policy was to move the aborigines to reservations in the West, reimbursing the states—especially those of the Southeast—for ceding their claims beyond the Appalachians. This scheme had much to do with his interest in the purchase of Louisiana and led eventually to the establishment of the Indian Territory in what is now Oklahoma. • 42 extend those limits. The territory of Louisiana was ceded by France on April 30, 1803, for a consideration of \$11,250,000 and the assumption by the United States of claims of American citizens against France to the amount of \$3,750,000. • 43 final redemption. The national debt in 1804 was \$86,000,000, but Gallatin had established a sinking fund and was retiring \$8,000,000 of the obligation annually. The War of 1812 interrupted this program, but the debt was wiped out in Andrew Jackson's administration. See note, p. 407

In matters of religion, I have considered that its free exercise is placed by the constitution independent of the powers of the general government. I have therefore undertaken, on no occasion, to prescribe the religious exercises suited to it, but have left them, as the constitution found them, under the direction and discipline of state or church authorities acknowledged by the several religious societies

10 The aboriginal inhabitants of these countries I have regarded with the commiseration their history inspires. Endowed with the faculties and the rights of men, breathing an ardent love of liberty and independence, and occupying a country which left them no desire but to be undisturbed, the stream of overflowing population from other regions directed itself on these shores, without power to divert, or habits to contend against, they have been overwhelmed by the current, or driven before it, now reduced within limits too narrow for the hunter's state, humanity enjoins us to teach them agriculture and
20 the domestic arts, to encourage them to that industry which alone can enable them to maintain their place in existence, and to prepare them in time for that state of society, which to bodily comforts adds the improvement of the mind and morals. We have therefore liberally furnished them with the implements of husbandry and household use, we have placed among them instructors in the arts of first necessity, and they are covered with the ægis of the law against aggressors from among ourselves
30 But the endeavors to enlighten them on the fate which awaits their present course of life, to induce them to exercise their reason, follow its dictates, and change their pursuits with the change of circumstances, have powerful obstacles to encounter, they are combated by the habits of their bodies, prejudice of their minds, ignorance, pride, and the influence of interested and crafty individuals among them, who feel themselves something in the present order of things, and fear to become nothing in any other. These persons inculcate a sanctimonious
40 reverence for the customs of their ancestors, that whatsoever they did, must be done through all time, that reason is a false guide, and to advance under its counsel, in their physical, moral, or political condition is perilous innovation; that their duty is to remain as their Creator made them, ignorance being safety, and knowledge full of danger, in short, my friends, among

them is seen the action and counter-action of good sense and bigotry, they, too, have their anti-philosophers, who find an interest in keeping things in their present state, who dread reformation, and exert all their faculties to maintain the ascendancy of habit over the duty of improving our reason, and obeying its mandates.

In giving these outlines, I do not mean, fellow citizens, to arrogate to myself the merit of the measures; that is due, in the first place, to the reflecting character of our citizens at large, who, by the weight of public opinion, influence and strengthen the public measures, it is due to the sound discretion with which they select from among themselves those to whom they confide the legislative duties, it is due to the zeal and wisdom of the characters thus selected, who lay the foundations of public happiness in wholesome laws, the execution of which alone remains for others, and it is due to the able and faithful auxiliaries, whose patriotism has associated with me in the executive functions.

During this course of administration, and in order to disturb it, the artillery of the press has been levelled against us, charged with whatsoever its licentiousness could devise or dare. These abuses of an institution so important to freedom and science, are deeply to be regretted, inasmuch as they tend to lessen its usefulness, and to sap its safety, they might, indeed, have been corrected by the wholesome punishments reserved and provided by the laws of the several States against falsehood and defamation, but public duties more urgent press on the time of public servants, and the offender have therefore been left to find their punishment in the public indignation.

Nor was it uninteresting to the world, that an experiment should be fairly and fully made, whether freedom of discussion, unaided by power, is not sufficient for the propagation and protection of truth—whether a government, conducting itself in the true spirit of its constitution, with zeal and purity, and doing no act which would be unwilling the whole world should witness, can be written down by falsehood and defamation. The experiment has been tried, you have witnessed the scene, our fellow citizens have looked on, cool and collected, they saw the latent source from which the outrages proceeded, they gathered around their public functionaries, and when the constitution called them to the decision by suffrage, they pronounced their verdict.

honorable to those who had served them, and consolatory to the friend of man, who believes he may be intrusted with his own affairs.

No inference is here intended, that the laws, provided by the State against false and defamatory publications, should not be enforced, he who has time, renders a service to public morals and public tranquillity, in reforming these abuses by the salutary coercions of the law; but the experiment is noted, to prove that, since truth and reason have maintained their ground against false opinions in league with false facts, the press, confined to truth, needs no other legal restraint, the public judgment will correct false reasonings and opinions, on a full hearing of all parties, and no other definite line can be drawn between the inestimable liberty of the press and its demoralizing licentiousness. If there be still improprieties which this rule would not restrain, its supplement must be sought in the censorship of public opinion.

Contemplating the union of sentiment now manifested so generally, as auguring harmony and happiness to our future course, I offer to our country sincere congratulations. With those, too, not yet rallied to the same point, the disposition to do so is gaining strength; facts are piercing through the veil drawn over them, and our doubting brethren will at length see, that the mass of their fellow citizens, with whom they cannot yet resolve to act, as to principles and measures, think as they think, and desire what they desire, that our wish, as well as theirs, is, that the public efforts may be directed honestly to the public good, that peace be cultivated, civil and religious liberty unassailed, law and order preserved, equality of rights maintained, and that state of property, equal or unequal, which results to every man from his own industry, or that of his fathers. When satisfied of these views, it is not in human nature that they should not approve and support them, in the meantime, let us cherish them with patient affection, let us do them justice, and more than justice, in all competitions of interest, and we need not doubt that truth, reason, and their own interests, will at length prevail, will gather them into the fold of their country, and will complete their entire union of opinion, which gives to a nation the blessing of harmony, and the benefit of all its strength.

I shall now enter on the duties to which my fellow

citizens have again called me, and shall proceed in the spirit of those principles which they have approved. I fear not that any motives of interest may lead me astray, I am sensible of no passion which could seduce me knowingly from the path of justice, but the weakness of human nature, and the limits of my own understanding, will produce errors of judgment sometimes injurious to your interests. I shall need, therefore, all the indulgence I have heretofore experienced—the want of it will certainly not lessen with increasing years. I shall need, too, the favor of that Being in whose hands we are, who led our forefathers, as Israel of old, from their native land, and planted them in a country flowing with all the necessities and comforts of life, who has covered our infancy with his providence, and our riper years with his wisdom and power, and to whose goodness I ask you to join with me in supplications, that he will so enlighten the minds of your servants, guide their councils, and prosper their measures, that whatsoever they do, shall result in your good, and shall secure to you the peace, friendship, and approbation of all nations

1805

A Declaration by the Representatives of the UNITED STATES OF AMERICA, in General Congress assembled

When in the course of human events it becomes necessary for one people to dissolve the political bands which have connected them with another, and to assume among the powers of the earth, the separate and equal station to which the laws of nature & of nature's god entitle them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to separate.

We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable rights, that among these are life, liberty, & the pursuit of happiness; that to secure these rights, governments are instituted among men, deriving their just powers from the consent of the governed, that whenever any form of government becomes destructive of these ends, it is the right of the people to alter or to abolish it, & to institute new government, laying its foundation on such principles & organizing its powers in such form, as to them shall seem most likely to effect their safety & happiness.

Prudence indeed will dictate that governments long established should not be changed for light & transient causes; and accordingly all experience hath shewn that mankind are more disposed to suffer while evils are sufferable, than to right themselves by abolishing the forms to which they are accustomed, but

First draft of the Declaration of Independence

Andrew Jackson

1767 • 1845

Although they were accustomed to surprises from Andrew Jackson, the educated men of his day would have been more than ordinarily astonished to come upon anything by "Old Hickory" in an anthology of American literature. No one ever accused the General of being "literary." John Quincy Adams, in fact, was deeply distressed when Harvard conferred an honorary LL.D. in 1833, upon "a barbarian who could not write a sentence of grammar and hardly spell his own name." Even the General's partisans were quite prepared to believe the humorist's quip that, upon receiving the degree with an appropriate Latin address in the best Cambridge manner, he replied "*E pluribus unum, my friends, sine qua non.*" Nevertheless, no one speaks for the Jacksonian era more clearly than Jackson himself. His spelling and grammar were doubtless erratic, and the published result indebted to secretaries, advisers, and friends, but Jackson knew what he thought, and his proclamations and speeches reveal the directness of his nature. Compared with that of Jefferson and even with that of Hamilton, his style is labored and his diction conventional, but there is no circumlocution and the effect is that of forthright conviction.

Jackson's life has fascinated numerous historians, partly because many of its details are still controversial, and partly because it epitomizes the rise of democracy on what was then the frontier. Born in 1767, so close to the border between North and South Carolina that both states have claimed his birthplace, he had almost no formal education except the reading of law in an office at Salis-

bury, North Carolina. He was admitted to the bar when he was twenty, and in 1788 settled in Tennessee, where he was soon a popular lawyer and a political leader. Common sense, native force, and a liking for a good fight counted for more than learning in the frontier environment. Jackson represented Tennessee in the House of Representatives in 1796-1797, in the Senate 1797-1798, and from 1798 until 1804 he was a judge of the Superior Court of the state. He then engaged in business for some years, returning to the center of public attention when war was declared against England in 1812. Although his military experience had been confined to militia trainings and some Indian fighting, he had no difficulty in assembling a large body of volunteers, and with these he conducted a successful campaign against the Creek Indians in 1813-1814. Commissioned as a major general in 1814, he quickly drove the English out of Florida, at that time Spanish territory, and proceeded to New Orleans, where a British fleet was expected. A treaty of peace had been signed at Ghent on December 24, 1814, but the news did not reach New Orleans until after the decisive battle of January 8. The British suffered over two thousand casualties; Jackson's army, seventy-one, with only six men killed in the reengagement. The only land victory of the war, it made General Jackson a national hero and symbolized to the people the coming-of-age of the West.

He was now the people's man, with the strengths and the weaknesses of the fearlessly independent, resourceful, but undisciplined masses. From 1825, w

the House of Representatives chose John Quincy Adams for President after the electoral college failed to bring in a majority, until 1837, when after two terms Jackson turned over the White House to a successor of his own choice, he dominated American politics as few men ever have. No President, perhaps, has ever had a greater personal following. The effects of his actions, some of which were more intuitive than consistent, are still debatable.

but that he spoke and acted for a great era of transition in American life no one has ever questioned.

A Compilation of the Messages and Papers of the Presidents, 1789-1907, ed J. D. Richardson, 11 vols., New York, 1908 • J. S. Bassett, The Life of Andrew Jackson, 2 vols., New York, 1911 • Marquis James, Andrew Jackson, the Border Captain, Indianapolis, 1933 • Marquis James, Andrew Jackson, Portrait of a President, Indianapolis, 1937

Farewell Address

Jackson's remarks upon his retirement from office were, like Washington's, not entirely his own and were composed for publication rather than for delivery. As early as December 1831, before the end of his first term, he mentioned the possibility of a farewell address in a letter to Martin Van Buren. The actual composition seems to have occupied him during the last months of 1836, with Roger B. Taney, recently appointed Chief Justice of the Supreme Court, as his chief adviser. In January 1837 the paper was ready for submission to the Cabinet; Van Buren, other friends, and Jackson had "proofs" two days before Van Buren's inauguration on March 4. It seems likely that the earliest publication was in a newspaper, but it was also printed separately at various places in 1837. Jackson's enemies among the newspaper editors regarded it as an egotistical imitation of Washington; the New York American commented as follows: "Happily it is the last humbug which the mischievous popularity of this illiterate, violent, vain, and iron-willed soldier can impose upon a confiding and credulous people."

The Farewell Address is essentially a summary of Jackson's two administrations. The present-day reader may not feel the weight of his arguments for "strict construction" of the Constitution, nor share his warmth on the forgotten issue of the Bank of the United States. Even

today, however, Jackson's warnings against sectionalism, monopoly and privilege, the money power, and other selfish points of view have their place in political discussion. Throughout the Address, moreover, may be seen that sure faith in the common man which was the basis of Jackson's popularity and strength. The working spirit of democracy is embodied in one of Jackson's sentences: "Never for a moment believe that the great body of the citizens of any State or States can deliberately intend to do wrong."

Fellow Citizens

Being about to retire finally from public life, I beg leave to offer you my grateful thanks for the many proofs of kindness and confidence which I have received at your hands. It has been my fortune, in the discharge of public duties, civil and military, frequently to have found myself in difficult and trying situations, where prompt decision and energetic action were necessary, and where the interests of the country required that high responsibilities should be fearlessly encountered and it is with the deepest emotions of gratitude that I acknowledge the continued and unbroken confidence with which you have sustained me in every trial. My public life has been a long one, and I cannot hope that it has, at all times, been free from errors. But I have the consolation of knowing that, if mistakes have been committed, they have not seriously injured the country I so anxiously endeavored to serve, and, at the moment when I surrender my last public trust, I leave this great people prosperous and happy, in the full enjoyment of liberty and peace, and honored and respected by every nation of the world.

If my humble efforts have, in any degree, contributed to preserve to you these blessings, I have been more than

rewarded by the honors you have heaped upon me, and, above all, by the generous confidence with which you have supported me in every peril, and with which you have continued to animate and cheer my path to the closing hour of my political life. The time has now come, when advanced age and a broken frame warn me to retire from public concerns, but the recollection of the many favors you have bestowed upon me is engraven upon my heart, and I have felt that I could not part from your service without making this public acknowledgment of the gratitude I owe you. And if I use the occasion to offer to you the councils of age and experience, you will, I trust, receive them with the same indulgent kindness which you have so often extended to me, and will, at least, see in them an earnest desire to perpetuate, in this favored land, the blessings of liberty and equal laws.

We have now lived almost fifty years under the constitution framed by the sages and patriots of the Revolution. The conflicts in which the nations of Europe were engaged during a great part of this period, the spirit in which they waged war against each other, and our intimate commercial connections with every part of the civilized world, rendered it a time of much difficulty for the Government of the United States. We have had our seasons of peace and of war, with all the evils which precede or follow a state of hostility with powerful nations. We encountered these trials with our constitution yet in its infancy, and under the disadvantages which a new and untried Government must always feel when it is called upon to put forth its whole strength, without the lights of experience to guide it, or the weight of precedents to justify its measures. But we have passed triumphantly through all these difficulties. Our constitution is no longer a doubtful experiment, and, at the end of nearly half a century, we find that it has preserved unimpaired the liberties of the people, secured the rights of property, and that our country has improved and is flourishing beyond any former example in the history of nations.

In our domestic concerns there is every thing to encourage us; and if you are true to yourselves, nothing can impede your march to the highest point of national prosperity. The States which had so long been retarded in their improvement, by the Indian tribes residing in the midst of them, are at length relieved from the evil, and this unhappy race—the original dwellers in our land—are now placed in a situation where we may well hope

that they will share in the blessings of civilization, and be saved from that degradation and destruction to which they were rapidly hastening while they remained in the States, and while the safety and comfort of our own citizens have been greatly promoted by their removal. The philanthropist will rejoice that the remnant of that ill-fated race has been at length placed beyond the reach of injury or oppression, and that the paternal care of the General Government will hereafter watch over them and protect them.

If we turn to our relations with foreign powers, we find our condition equally gratifying. Actuated by the sincere desire to do justice to every nation, and to preserve the blessings of peace, our intercourse with them has been conducted on the part of this Government in the spirit of frankness, and I take pleasure in saying, that it has generally been met in a corresponding temper. Difficulties of old standing have been surmounted by friendly discussion, and the mutual desire to be just, and the claims of our citizens, which had been long withheld, have at length been acknowledged and adjusted, and satisfactory arrangements made for their final payment, and with a limited, and, I trust, a temporary exception, our relations with every foreign power are now of the most friendly character—our commerce continually expanding and our flag respected in every quarter of the world.

These cheering and grateful prospects, and these multiplied favors, we owe, under Providence, to the adoption of the Federal Constitution. It is no longer a question whether this great country can remain happily united, and flourish under our present form of government. Experience, the unerring test of all human undertakings, has shown the wisdom and foresight of those who formed it, and has proved, that in the union of these States there is a sure foundation for the brightest hopes of freedom and for the happiness of the people. At every hazard and by every sacrifice, this Union must be preserved.

Text Messages of Andrew Jackson with a Short Sketch of His Life, Concord, New Hampshire, 1837. • 19 conflicts, the Napoleonic Wars • 44 the Indian tribes, the Chickasaws, Creeks, and Cherokees. Jackson's policy was to move the tribes in Georgia, Alabama, and Mississippi to new lands in the West. Treaties made with Indian chiefs were seldom long respected, however, and in 1838 the bulk of the Cherokees were forcibly deported to what is now Oklahoma. • 65 Difficulties . . . standing. An allusion, presumably, to the payment of about \$5,500,000 by France in 1836. The payment had been awarded by a commission in 1831, and the slowness of settlement caused a temporary break in diplomatic relations.

The necessity of watching with jealous anxiety for the preservation of the Union, was earnestly pressed upon his fellow-citizens by the Father of his country, in his farewell address. He has there told us, that "while experience shall not have demonstrated its impracticability, there will always be reason to distrust the patriotism of those who, in any quarter may endeavor to weaken its bonds;" and he has cautioned us, in the strongest terms, against the formation of parties, on geographical discriminations, as one of the means which might disturb our Union and to which designing men would be likely to resort

The lessons contained in this invaluable legacy of Washington to his countrymen should be cherished in the heart of every citizen to the latest generation, and, perhaps, at no period of time could they be more usefully remembered than at the present moment. For when we look upon the scenes that are passing around us, and dwell on the pages of his parting address, his paternal counsels would seem to be not merely the offspring of wisdom and foresight, but the voice of prophecy foretelling events and warning us of the evil to come. Forty years have passed since this imperishable document was given to his countrymen. The Federal Constitution was then regarded by him as an experiment, and he speaks of it in his address, but an experiment upon the success of which the best hopes of his country depended, and we all know that he was prepared to lay down his life, if necessary, to secure to it a full and fair trial. The trial has been made. It has succeeded beyond the proudest hopes of those who framed it. Every quarter of this widely extended nation has felt its blessings, and shared in the general prosperity produced in its adoption. But amid this general prosperity and splendid success, the dangers of which he warned us are becoming every day more evident, and the signs of evil are sufficiently apparent to awaken the deepest anxiety in the bosom of the patriot. We behold systematic efforts publicly made to sow the seeds of discord between different parts of the United States, and to place party divisions directly upon geographical distinctions, to excite the *south* against the *north*, and the *north* against the *south*, and to force into the controversy the most delicate and exciting topics,—topics upon which it is impossible that a large portion of the Union can ever speak without strong emotion. Appeals, too, are constantly made to sectional interests, in order to influence the election of the Chief Magistrate,

as if it were desired that he should favor a particular quarter of the country, instead of fulfilling the duties of his station with impartial justice to all; and the possible dissolution of the Union has at length become an ordinary and familiar subject of discussion. Has the warning voice of Washington been forgotten? or have designs already been formed to sever the Union? Let it not be supposed that I impute to all those who have taken an active part in these unwise and unprofitable discussions, a want of patriotism or of public virtue. The honorable feeling of State pride, and local attachments, find a place in the bosom of the most enlightened and pure. But while such men are conscious of their own integrity and honesty of purpose, they ought never to forget that the citizens of other States are their political brethren; and that, however mistaken they may be in their views, the great body of them are equally honest and upright with themselves. Mutual suspicions and reproaches may in time create mutual hostility, and artful and designing men will always be found, who are ready to foment these fatal divisions, and to inflame the natural jealousies of different sections of the country. The history of the world is full of such examples, and especially the history of republics

What have you to gain by division and dissension? Delude not yourselves with the belief that a breach once made may be afterwards repaired. If the Union is once severed, the line of separation will grow wider and wider, and the controversies which are now debated and settled in the halls of legislation, will then be tried in the fields of battle, and determined by the sword. Neither should you deceive yourselves with the hope, that the first line of separation would be the permanent one, and that nothing but harmony and concord would be found in the new associations formed upon the dissolution of this Union. Local interests would still be found there, and unchastened ambition. And if the recollection of common dangers, in which the people of these United States stood side by side against the common foe, the memory of victories won by their united valor, the prosperity and happiness they have enjoyed under the present constitution; the proud name they bear as citizens of this great republic. if all these recollections and proofs of common interests

38 systematic efforts. A hit, probably, at Henry Clay and John C. Calhoun, Jackson's most powerful political enemies, who were notably sectional in their points of view.

re not strong enough to bind us together as one people. What tie will hold united the new division of empire, when these bonds have been broken and this Union lissevered? The first line of separation would not last for a single generation; new fragments would be torn off, new leaders would spring up, and this great and glorious republic would soon be broken into a multitude of petty States, without commerce, without credit, jealous of one another; armed for mutual aggression, loaded with taxes to pay armies and leaders; seeking aid against each other from foreign powers, insulted and trampled upon by the nations of Europe, until harrassed with conflicts, and humbled and debased in spirit, they would be ready to submit to the absolute dominion of any military adventurer, and to surrender their liberty for the sake of repose. It is impossible to look on the consequences that would inevitably follow the destruction of this Government, and not feel indignant when we hear cold calculations about the value of the Union, and have so constantly before us a line of conduct so well calculated to weaken its ties.

There is too much at stake to allow pride or passion to influence your decision. Never for a moment believe that the great body of the citizens of any State or States can deliberately intend to do wrong. They may, under the influence of temporary excitement or misguided opinions, commit mistakes; they may be misled for a time by the suggestions of self-interest, but in a community so enlightened and patriotic as the people of the United States, argument will soon make them sensible of their errors; and, when convinced, they will be ready to repair them. If they have no higher or better motives to govern them, they will at least perceive that their own interest requires them to be just to others, as they hope to receive justice at their hands.

But in order to maintain the Union unimpaired, it is absolutely necessary that the laws passed by the constituted authorities should be faithfully executed in every part of the country, and that every good citizen should at all times stand ready to put down, with the combined force of the nation, every attempt at unlawful resistance, under whatever pretext it may be made, or whatever shape it may assume. Unconstitutional or oppressive laws may no doubt be passed by Congress, either from erroneous views, or the want of due consideration; if they are within the reach of judicial authority, the remedy is easy and peaceful, and if, from the character of the

law, it is an abuse of power not within the control of the judiciary, then free discussion and calm appeals to reason and to the justice of the people will not fail to redress the wrong. But until the law shall be declared void by the courts, or repealed by Congress, no individual, or combination of individuals, can be justified in forcibly resisting its execution. It is impossible that any Government can continue to exist upon any other principles. It would cease to be a Government, and be unworthy of the name, if it had not the power to enforce the execution of its own laws within its own sphere of action.

It is true that cases may be imagined disclosing such a settled purpose of usurpation and oppression, on the part of the Government, as would justify an appeal to arms. These, however, are extreme cases, which we have no reason to apprehend in a Government where the power is in the hands of a patriotic people, and no citizen who loves his country would, in any case whatever, resort to forcible resistance, unless he clearly saw that the time had come when a freeman should prefer death to submission, for if such a struggle is once begun, and the citizens of one section of the country arrayed in arms against those of another in doubtful conflict, let the battle result as it may, there will be an end of the Union, and with it, an end to the hopes of freedom. The victory of the injured would not secure to them the blessings of liberty, it would avenge their wrongs, but they would themselves share in the common ruin.

But the constitution cannot be maintained, nor the Union preserved, in opposition to public feeling, by the mere exertion of the coercive powers confided to the General Government. The foundations must be laid in the affections of the people, in the security it gives to life, liberty, character, and property, in every quarter of the country, and in the fraternal attachment which the citizens of the several States bear to one another as members of one political family, mutually contributing to promote the happiness of each other. Hence the citizen of every State should studiously avoid every thing calculated to wound the sensibility or offend the just pride of the people of other States, and they should frown upon any proceedings within their own borders likely to disturb the tranquility of their political brethren in other portions of the Union. In a country so extensive as the United States, and with pursuits so varied, the internal regulations of the several States must frequently differ from one another in important particulars; and it

difference is unavoidably increased by the varying principles upon which the American colonies were originally planted; principles which had taken deep root in their social relations before the Revolution, and, therefore, of necessity influencing their policy since they became free and independent States. But each State has the unquestionable right to regulate its own internal concerns according to its own pleasure, and while it does not interfere with the rights of the people of other States, or the rights of the Union, every State must be the sole judge of the measures proper to secure the safety of its citizens and promote their happiness; and all efforts on the part of people of other States to cast odium upon their institutions, and all measures calculated to disturb their rights of property, or to put in jeopardy their peace and internal tranquility, are in direct opposition to the spirit in which the Union was formed, and must endanger its safety. Motives of philanthropy may be assigned for this unwarrantable interference, and weak men may persuade themselves for a moment that they are laboring in the cause of humanity, and asserting the rights of the human race, but every one, upon sober reflection, will see that nothing but mischief can come from these improper assaults upon the feelings and rights of others. Rest assured, that the men found busy in this work of discord are not worthy of your confidence, and deserve your strongest reprobation.

In the legislation of Congress, also, and in every measure of the General Government, justice to every portion of the United States should be faithfully observed. No free Government can stand without virtue in the people, and a lofty spirit of patriotism, and if the sordid feelings of mere selfishness shall usurp the place which ought to be filled by public spirit, the legislation of Congress will soon be converted into a scramble for personal and sectional advantages. Under our free institutions, the citizens of every quarter of our country are capable of attaining a high degree of prosperity and happiness, without seeking to profit themselves at the expense of others, and every such attempt must in the end fail to succeed, for the people in every part of the United States are too enlightened not to understand their own rights and interests, and to detect and defeat every effort to gain undue advantages over them, and when such designs are discovered, it naturally provokes resentments which cannot always be easily allayed. Justice, full and ample justice, to every portion of the United States, should be the ruling

principle of every freeman, and should guide the deliberations of every public body, whether it be State or national

It is well known that there have always been those amongst us who wish to enlarge the powers of the General Government, and experience would seem to indicate that there is a tendency on the part of this Government to overstep the boundaries marked out for it by the constitution. Its legitimate authority is abundantly sufficient for all the purposes for which it was created, and its powers being expressly enumerated, there can be no justification for claiming any thing beyond them. Every attempt to exercise power beyond these limits should be promptly and firmly opposed. For one evil example will lead to other measures still more mischievous; and if the principle of constructive powers, or supposed advantages, or temporary circumstances, shall ever be permitted to justify the assumption of a power not given by the constitution, the General Government will before long absorb all the powers of legislation, and you will have, in effect, but one consolidated Government. From the extent of our country, its diversified interests, different pursuits, and different habits, it is too obvious for argument that a single consolidated Government would be wholly inadequate to watch over and protect its interests, and every friend of our free institutions should be always prepared to maintain unimpaired and in full vigor the rights and sovereignty of the States, and to confine the action of the General Government strictly to the sphere of its appropriate duties.

There is, perhaps, no one of the powers conferred on the Federal Government so liable to abuse as the taxing power. The most productive and convenient sources of revenue were necessarily given to it, that it might be able to perform the important duties imposed upon it, and the taxes which it lays upon commerce being concealed from the real payer in the price of the article, they do not so readily attract the attention of the people as smaller sums demanded from them directly by the tax-gatherer. But the tax imposed on goods enhances by so much the price of the commodity to the consumer, and,

55 the constitution Jackson here presents the strict construction view, but he was no die-hard supporter of states rights. His two administrations, indeed, are notable for their extension of the executive authority, and it has been said that Jackson put the will of the people, as he interpreted it, above all constitutional arrangements.

as many of these duties are imposed on articles of necessity, which are daily used by the great body of the people, the money raised by these imposts is drawn from their pockets. Congress has no right, under the constitution, to take money from the people, unless it is required to execute some one of the specific powers intrusted to the Government, and if they raise more than is necessary for such purposes, it is an abuse of the power of taxation, and unjust and oppressive. It may, indeed, happen that
10 the revenue will sometimes exceed the amount anticipated when the taxes were laid. When, however, this is ascertained, it is easy to reduce them; and, in such a case, it is unquestionably the duty of the Government to reduce them, for no circumstances can justify it in assuming a power not given to it by the constitution, nor in taking away the money of the people when it is not needed for the legitimate wants of the Government.

Plain as these principles appear to be, you will yet find that there is a constant effort to induce the General Gov-
20 ernment to go beyond the limits of its taxing power, and to impose unnecessary burdens upon the people. Many powerful interests are continually at work to procure heavy duties on commerce, and to swell the revenue beyond the real necessities of the public service; and the country has already felt the injurious effects of their combined influence. They succeeded in obtaining a tariff of duties bearing most oppressively on the agricultural and laboring classes of society, and producing a revenue that could not be usefully employed within the range of
30 the powers conferred upon Congress; and, in order to fasten upon the people this unjust and unequal system of taxation, extravagant schemes of internal improvement were got up, in various quarters, to squander the money, and to purchase support. Thus, one unconstitutional measure was intended to be upheld by another, and the abuse of the power of taxation was to be maintained by usurping the power of expending the money in internal improvements. You cannot have forgotten the severe and doubtful struggle through which we passed, when
40 the Executive Department of the Government, by its veto, endeavored to arrest this prodigal scheme of injustice, and to bring back the legislation of Congress to the boundaries prescribed by the constitution. The good sense and practical judgment of the people, when the subject was brought before them, sustained the course of the Executive; and this plan of unconstitutional expendi-

ture for the purposes of corrupt influence is, I trust, finally overthrown.

The result of this decision has been felt in the rapid extinguishment of the public debt, and the large accumulation of a surplus in the treasury, notwithstanding the tariff was reduced, and is now very far below the amount originally contemplated by its advocates. But, rely upon it, the design to collect an extravagant revenue, and to burden you with taxes beyond the economical wants of the Government, is not yet abandoned. The various interests which have combined together to impose a heavy tariff, and to produce an overflowing treasury, are too strong, and have too much at stake to surrender the contest. The corporations and wealthy individuals who are engaged in large manufacturing establishments, desire a high tariff to increase their gains. Designing politicians will support it, to conciliate their favor, and to obtain the means of profuse expenditure, for the purpose of purchasing influence in other quarters, and since the people have decided that the Federal Government cannot be permitted to employ its income in internal improvements, efforts will be made to seduce and mislead the citizens of the several States, by holding out to them the deceitful prospect of benefits to be derived from surplus revenue collected by the General Government and annually divided among the States. And if, encouraged by these fallacious hopes, the States should disregard the principles of economy which ought to characterize every republican Government, and should indulge lavish expenditures exceeding their resources, they will before long, find themselves oppressed with debts which they are unable to pay, and the temptation will become irresistible to support a high tariff, in order to obtain surplus for distribution. Do not allow yourselves, fellow-citizens, to be misled on this subject. The Federal Government cannot collect a surplus for such purposes without violating the principles of the constitution, and assuming powers which have not been granted. It is moreover, a system of injustice, and, if persisted in, will inevitably lead to corruption, and must end in ruin. "

26 tariff. Jackson favored a tariff to protect essential industries when he was elected President, his comments here show that he grew wiser with experience. • 41 veto, the Maysville Veto of 1830, which he vetoed federal aid for local improvements. The question at issue was whether or not to appropriate federal funds to buy stock in a Kenton road company.

surplus revenue will be drawn from the pockets of the people, from the farmer, the mechanic, and the laboring classes of society, but who will receive it when distributed among the States, where it is to be disposed of by leading State politicians who have friends to favor, and political partisans to gratify? It will certainly not be returned to those who paid it, and who have most need of it, and are honestly entitled to it. There is but one safe rule, and that is, to confine the General Government rigidly within the sphere of its appropriate duties. It has no power to raise a revenue, or impose taxes, except for the purposes enumerated in the constitution; and if its income is found to exceed these wants, it should be forthwith reduced, and the burdens of the people so far lightened.

In reviewing the conflicts which have taken place between different interests in the United States, and the policy pursued since the adoption of our present form of government, we find nothing that has produced such deep-seated evil as the course of legislation in relation to the currency. The constitution of the United States unquestionably intended to secure to the people a circulating medium of gold and silver. But the establishment of a national bank by Congress, with the privilege of issuing paper money receivable in the payment of the public dues, and the unfortunate course of legislation in the several States upon the same subject, drove from general circulation the constitutional currency, and substituted one of paper in its place.

It was not easy for men engaged in the ordinary pursuits of business, whose attention had not been particularly drawn to the subject, to foresee all the consequences of a currency exclusively of paper, and we ought not, on that account, to be surprised at the facility with which laws were obtained to carry into effect the paper system. Honest, and even enlightened men, are sometimes misled by the specious and plausible statements of the designing. But experience has now proved the mischiefs and dangers of a paper currency, and it rests with you to determine whether the proper remedy shall be applied.

The paper system being founded on public confidence, and having of itself no intrinsic value, it is liable to great and sudden fluctuations, thereby rendering property insecure, and the wages of labor unsteady and uncertain. The corporations which create the paper money

cannot be relied upon to keep the circulating medium uniform in amount. In times of prosperity, when confidence is high, they are tempted, by the prospect of gain, or by the influence of those who hope to profit by it, to extend their issues of paper beyond the bounds of discretion and the reasonable demands of business. And when these issues have been pushed on, from day to day, until public confidence is at length shaken, then a reaction takes place, and they immediately withdraw the credits they have given, suddenly curtail their issues; and produce an unexpected and ruinous contraction of the circulating medium, which is felt by the whole community. The banks, by this means, save themselves, and the mischievous consequences of their imprudence or cupidity are visited upon the public. Nor does the evil stop here. These ebbs and flows in the currency, and these indiscreet extensions of credit, naturally engender a spirit of speculation injurious to the habits and character of the people. We have already seen its effects in the wild spirit of speculation in the public lands, and

20 legislation . . . currency. The First Bank of the United States had been organized in 1791, largely because Hamilton believed that the government ought not to assume the right of issuing its own currency. Although the Bank of the United States did provide a uniform currency, in which there was general confidence, it also seemed to some to foreshadow the concentration of financial power in one place, for that reason Congress refused to renew the Bank's charter when it expired in 1811. Five years later Alexander J. Dallas, secretary of the treasury under President Madison, supported the founding of the Second Bank of the United States, largely because the currency of the state banks, often issued without adequate security, was found unsatisfactory. The Second Bank was chartered for twenty years, or until 1836. The renewing of its charter became the major political issue of Jackson's first term, after he questioned its constitutionality in his first annual message, adding that the Bank had "failed in the great end of establishing a uniform and sound currency." Behind his statement lay the decision of the Bank, in 1818, to redeem its notes only at its central office in Philadelphia—an obvious hardship in the eyes of residents of the hinterland. Jackson vetoed a bill for a new charter in 1832, and the campaign of that year was fought on the Bank issue. The "money power," represented by the Bank and Nicholas Biddle, its president, was soundly beaten. In 1833, after a bitter political battle, Jackson succeeded in ordering the transfer of government funds from the Bank to the larger state institutions, and three years later all banks of deposit were required to furnish security for government moneys in their possession and to redeem any bank notes they might issue in specie, i.e., coin. Nevertheless, at the time Jackson turned over his office to Van Buren, the country was overflowing with poorly secured paper money. . . . 66 wild . . . speculation. Jackson issued the specie circular of July 11, 1836, which ordered all payments for public lands to be in gold or silver.

various kinds of **stock**, which, within the last year or two, seized upon such a multitude of our citizens, and threatened to pervade all classes of society, and to withdraw their attention from the sober pursuits of honest industry. It is not by encouraging this spirit that we shall best preserve public virtue and promote the true interests of our country. But if your currency continues as exclusively paper as it now is, it will foster this eager desire to amass wealth without labor, it will multiply the number of dependants on bank accommodations and bank favors; the temptation to obtain money at any sacrifice will become stronger and stronger, and inevitably lead to corruption, which will find its way into your public councils, and destroy, at no distant day, the purity of your Government. Some of the evils which arise from this system of paper, press with peculiar hardship upon the class of society least able to bear it. A portion of this currency frequently becomes depreciated or worthless, and all of it is easily counterfeited, in such a manner as to
20 require peculiar skill and much experience to distinguish the counterfeit from the genuine note. These frauds are most generally perpetrated in the smaller notes, which are used in the daily transactions of ordinary business and the losses occasioned by them are commonly thrown upon the laboring classes of society, whose situation and pursuits put it out of their power to guard themselves from these impositions, and whose daily wages are necessary for their subsistence. It is the duty of every Government so to regulate its currency as to protect this numerous
30 class as far as practicable from the impositions of avarice and fraud. It is more especially the duty of the United States, where the Government is emphatically the Government of the people, and where this respectable portion of our citizens are so proudly distinguished from the laboring classes of all other nations, by their independent spirit, their love of liberty, their intelligence, and their high tone of moral character. Their industry, in peace, is the source of our wealth, and their bravery, in war, has covered us with glory, and the Government of the United
40 States will but ill discharge its duties if it leaves them a prey to such dishonest impositions. Yet it is evident that their interests cannot be effectually protected, unless silver and **gold are** restored to circulation.

These views alone, of the paper currency, are sufficient to call for immediate reform, but there is another consideration which should still more strongly press it upon your attention.

Recent events have proved that the paper money system of this country may be used as an engine to undermine your free institutions; and that those who desire to engross all power in the hands of the few, and to govern by corruption or force, are aware of its power, and prepared to employ it. Your banks now furnish your only circulating medium, and money is plenty or scarce, according to the quantity of notes issued by them. While they have capitals not greatly disproportioned to each other, they are competitors in business, and no one of them can exercise dominion over the rest, and although, in the present state of the currency, these banks may and do operate injuriously upon the habits of business, the pecuniary concerns, and the moral tone of society, yet, from their number and dispersed situation, they cannot combine for the purposes of political influence; and whatever may be the dispositions of some of them, their power of mischief must necessarily be confined to a narrow space, and felt only in their immediate neighborhoods.

But when the charter for the Bank of the United States was obtained from Congress, it perfected the schemes of the paper system, and gave to its advocates the position they have struggled to obtain, from the commencement of the Federal Government down to the present hour. The immense capital, and peculiar privileges bestowed upon it, enabled it to exercise despotic sway over the other banks in every part of the country. From its superior strength, it could seriously injure, if not destroy the business of any one of them which might incur its resentment, and it openly claimed for itself the power of regulating the currency throughout the United States. In other words, it asserted (and it undoubtedly possessed) the power to make money plenty or scarce, at its pleasure, at any time, and in any quarter of the Union, by controlling the issues of other banks, and permitting an expansion, or compelling a general contraction, of the circulating medium, according to its own will. The other banking institutions were sensible of its strength, and they soon generally became its obedient instruments, ready, at all times, to execute its mandate and with the banks necessarily went, also, that numerous

48 Recent events, the financial distress of 1833-1834, which Jackson supporters believed had been artificially produced by the refusal of the Bank of the United States to lend money. The private correspondence Biddle appears to sustain this charge.

class of persons in our commercial cities, who depend altogether on bank credits for their solvency and means of business, and who are, therefore, obliged, for their own safety, to propitiate the favor of the money power by distinguished zeal and devotion in its service. The result of the ill-advised legislation which established this great monopoly was, to concentrate the whole moneyed power of the Union, with its boundless means of corruption, and its numerous dependants, under the direction and command of one acknowledged head, thus organizing this particular interest as one body, and securing to it unity and concert of action throughout the United States, and enabling it to bring forward, upon any occasion, its entire and undivided strength to support or defeat any measure of the Government. In the hands of this formidable power, thus perfectly organized, was also placed unlimited dominion over the amount of the circulating medium, giving it the power to regulate the value of property and the fruits of labor in every quarter of the Union; and to bestow prosperity, or bring ruin, upon any city or section of the country, as might best comport with its own interest or policy.

We are not left to conjecture how the moneyed power, thus organized, and with such a weapon in its hands, would be likely to use it. The distress and alarm which pervaded and agitated the whole country, when the Bank of the United States waged war upon the people, in order to compel them to submit to its demands, cannot yet be forgotten. The ruthless and unsparing temper with which whole cities and communities were oppressed, individuals impoverished and ruined, and a scene of cheerful prosperity suddenly changed into one of gloom and despondency, ought to be indelibly impressed on the memory of the people of the United States. If such was its power in a time of peace, what would it not have been in a season of war, with an enemy at your doors? No nation but the freemen of the United States could have come out victorious from such a contest, yet, if you had not conquered, the Government would have passed from the hands of the many to the hands of the few, and this organized money power, from its secret conclave, would have dictated the choice of your highest officers, and compelled you to make peace or war, as best suited their own wishes. The forms of your government might, for a time, have remained; but its living spirit would have departed from it.

The distress and sufferings inflicted on the people by

the Bank, are some of the fruits of that system of legislation which is continually striving to enlarge the authority of the Federal Government beyond the limits fixed by the constitution. The powers enumerated in that instrument do not confer on Congress the right to establish such a corporation as the Bank of the United States, and the evil consequences which followed may warn us of the danger of departing from the true rule of construction, and of permitting temporary circumstances, or the hope of better promoting the public welfare, to influence, in any degree, our decisions upon the extent of the authority of the General Government. Let us abide by the constitution as it is written, or amend it in the constitutional mode, if it is found to be defective.

The severe lessons of experience will, I doubt not, be sufficient to prevent Congress from again chartering such a monopoly, even if the constitution did not present an insuperable objection to it. But you must remember, my fellow-citizens, that eternal vigilance by the people is the price of liberty, and that you must pay the price if you wish to secure the blessing. It behooves you, therefore, to be watchful in your State, as well as in the Federal Government. The power which the moneyed interest can exercise, when concentrated under a single head, and with our present system of currency, was sufficiently demonstrated in the struggle made by the Bank of the United States. Defeated in the General Government, the same class of intriguers and politicians will now resort to the States, and endeavor to obtain there the same organization, which they failed to perpetuate in the Union, and with specious and deceitful plans of public advantages, and State interests and State pride, they will endeavor to establish, in the different States, one moneyed institution with overgrown capital, and exclusive privileges sufficient to enable it to control the operations of the other banks. Such an institution will be pregnant with the same evils produced by the Bank of the United States, although its sphere of action is more confined; and in the State in which it is chartered, the money power will be able to embody its whole strength, and to move together with undivided force, to accomplish any object it may wish to attain. You have already had abundant evidence of its power to inflict injury upon the agricultural, mechanical, and laboring classes of society, and over those whose engagements in trade or speculation render them dependant on bank facilities, the dominion of the State monopoly will be absolute, and their obedience unlimited.

th such a bank and a paper currency, the money power
ld, in a few years, govern the State and control its
asures, and if a sufficient number of States can be in-
ed to create such establishments, the time will soon
ne when it will again take the field against the United
tes, and succeed in perfecting and perpetuating its
ganization by a charter from Congress.

It is one of the serious evils of our present system of
aking, that it enables one class of society—and that by
means a numerous one—by its control over the cur-
ncy, to act injuriously upon the interests of all the
ers, and to exercise more than its just proportion of
luence in political affairs. The agricultural, the me-
anical, and the laboring classes, have little or no share
the direction of the great moneyed corporations, and
om their habits and the nature of their pursuits, they
e incapable of forming extensive combinations to act
gether with united force. Such concert of action may
metimes be produced in a single city, or in a small
strict of country, by means of personal communications
ith each other; but they have no regular or active cor-
spondence with those who are engaged in smaller pur-
uits in distant places, they have but little patronage to
ive to the press, and exercise but a small share of in-
uence over it, they have no crowd of dependants about
hem, who hope to grow rich without labor, by their
ountenance and favor, and who are, therefore, always
eady to execute their wishes. The planter, the farmer,
he mechanic, and the laborer, all know that their suc-
cess depends upon their own industry and economy, and
hat they must not expect to become suddenly rich by
he fruits of their toil. Yet these classes of society form
he great body of the people of the United States, they
are the bone and sinew of the country, men who love
liberty and desire nothing but equal rights and equal
laws, and who, moreover, hold the great mass of our
national wealth, although it is distributed in moderate
amounts among the millions of freemen who possess it.
But, with overwhelming numbers and wealth on their
side, they are in constant danger of losing their fair in-
fluence in the Government, and with difficulty maintain
their just rights against the incessant efforts daily made
to encroach upon them. The mischief springs from the
power which the moneyed interest derives from a paper
currency, which they are able to control, from the
multitude of corporations, with exclusive privileges,

which they have succeeded in obtaining in the different
States, and which are employed altogether for their
benefit, and unless you become more watchful in your
States, and check this spirit of monopoly and thirst for
exclusive privileges, you will, in the end, find that the
most important powers of Government have been given
or bartered away, and the control over your dearest in-
terests has passed into the hands of these corporations.

The paper money system, and its natural associates,
monopoly and exclusive privileges, have already struck
their roots deep in the soil; and it will require all your
efforts to check its further growth, and to eradicate the
evil. The men who profit by the abuses, and desire to
perpetuate them, will continue to besiege the halls of
legislation in the General Government as well as in the
States, and will seek, by every artifice, to mislead and
deceive the public servants. It is to yourselves that you
must look for safety, and the means of guarding and
perpetuating your free institutions. In your hands is
rightfully placed the sovereignty of the country, and
to you every one placed in authority is ultimately
responsible. It is always in your power to see that the
wishes of the people are carried into faithful execution,
and their will, when once made known, must sooner
or later be obeyed. And while the people remain, as I
trust they ever will, uncorrupted and incorruptible, and
continue watchful and jealous of their rights, the Gov-
ernment is safe, and the cause of freedom will continue
to triumph over all its enemies.

But it will require steady and persevering exertions
on your part to rid yourselves of the iniquities and
mischiefs of the paper system, and to check the spirit
of monopoly and other abuses which have sprung up
with it, and of which it is the main support. So man-
interests are united to resist all reform on this subject
that you must not hope the conflict will be a short one,
nor success easy. My humble efforts have not been
spared, during my administration of the Government,
to restore the constitutional currency of gold and silver;
and something, I trust, has been done towards the accom-
plishment of this most desirable object. But enough yet
remains to require all your energy and perseverance.
The power, however, is in your hands, and the remedy
must and will be applied, if you determine upon it.

While I am thus endeavoring to press upon your
attention the principles which I deem of vital importan-

n the domestic concerns of the country, I ought not to pass over, without notice, the important considerations which should govern your policy towards foreign powers. It is, unquestionably, our true interest to cultivate the most friendly understanding with every nation, and to avoid, by every honorable means, the calamities of war; and we shall best attain this object by frankness and sincerity in our foreign intercourse, by the prompt and faithful execution of treaties, and by justice and impartiality in our conduct to all. But no nation, however desirous of peace, can hope to escape occasional collisions with other powers; and the soundest dictates of policy require that we should place ourselves in a condition to assert our rights, if a resort to force should ever become necessary. Our local situation, our long line of seacoast, indented by numerous bays, with deep rivers opening into the interior, as well as our extended and still increasing commerce, point to the navy as our natural means of defense. It will, in the end, be found to be the cheapest and most effectual; and now is the time, in a season of peace, and with an overflowing revenue, that we can, year after year, add to its strength, without increasing the burdens of the people. It is your true policy. For your navy will not only protect your rich and flourishing commerce in distant seas, but will enable you to reach and annoy the enemy, and will give to defense its greatest efficiency, by meeting danger at a distance from home. It is impossible, by any line of fortifications, to guard every point from attack against a hostile force advancing from the ocean and selecting its object: but they are indispensable to protect cities from bombardment; dock yards and naval arsenals from destruction, to give shelter to merchant vessels in time of war, and to single ships or weaker squadrons when pressed by superior force. Fortifications of this description cannot be too soon completed and armed, and placed in a condition of the most perfect preparation. The abundant means we now possess cannot be applied in any manner more useful to the country, and when this is done, and our naval force sufficiently strengthened, and our militia armed, we need not fear that any nation will wantonly insult us, or needlessly provoke hostilities. We shall more certainly preserve peace, when it is well understood that we are prepared for war.

In presenting to you, my fellow-citizens, these parting counsels, I have brought before you the leading prin-

ciples upon which I endeavored to administer the Government in the high office with which you twice honored me. Knowing that the path of freedom is continually beset by enemies, who often assume the disguise of friends, I have devoted the last hours of my public life to warn you of the dangers. The progress of the United States, under our free and happy institutions, has surpassed the most sanguine hopes of the founders of the republic. Our growth has been rapid beyond all former example, in numbers, in wealth, in knowledge, and all the useful arts which contribute to the comforts and convenience of man; and from the earliest ages of history to the present day, there never have been thirteen millions of people associated together in one political body who enjoyed so much freedom and happiness as the people of these United States. You have no longer any cause to fear danger from abroad; your strength and power are well known throughout the civilized world, as well as the high and gallant bearing of your sons. It is from within, among yourselves, from cupidity, from corruption, from disappointed ambition, and inordinate thirst for power, that factions will be formed and liberty endangered. It is against such designs, whatever disguise the actors may assume, that you have especially to guard yourselves. You have the highest of human trusts committed to your care. Providence has showered on this favored land blessings without number, and has chosen you as the guardians of freedom to preserve it for the benefits of the human race. May He, who holds in his hands the destinies of nations, make you worthy of the favors he has bestowed, and enable you, with pure hearts and pure hands, and sleepless vigilance, to guard and defend to the end of time the great charge he has committed to your keeping.

My own race is nearly run, advanced age and failing health warn me that before long I must pass beyond the reach of human events, and cease to feel the vicissitudes of human affairs. I thank God that my life has been spent in a land of liberty, and that he has given me a heart to love my country with the affection of a son. And filled with gratitude for your constant and unwavering kindness, I bid you a last and affectionate farewell.

38 abundant means. The national debt of the United States had been paid in full in 1835

EIST, UNITARIAN, REVIVALIST: Paine, Channing, Cartwright

Thomas Paine

1737 • 1809

See page 326 for a biographical account of Paine

From

The Age of Reason

When Paine was arrested in Paris in December 1793, a part of *The Age of Reason* was in the hands of his printer, and on his way to prison he was allowed to turn over the remainder of the manuscript of Part I to Joel Barlow. A few copies were printed in January 1794

Part II, begun under the shadow of the guillotine and finished in the home of James Monroe, was added, and the whole work was published in 1795

Paine's outspoken Deism (see p. 216 for a discussion of Deism) and anticlericalism were tempered by an earnest belief in a benevolent God and the perfectibility of man; he was neither an atheist nor a supporter of such mockery as the worship of an actress as representative of the Goddess of Reason—one of the actual incidents of the French Revolution. His book, indeed, was written partly

Panel (l to r) William Ellery Channing • Last day of a camp meeting in the woods • Peter Cartwright

to protest against the excesses of the Reign of Terror under Robespierre. It appeared, however, almost simultaneously with a new wave of evangelical fervor in America (see Peter Cartwright, pp. 430-435), and was used to embarrass the Jeffersonian Republicans, whose opponents linked infidelity with political radicalism for the purpose of getting votes. To the orthodox, Paine's attack on some of the most cherished doctrines of Christianity was sheer blasphemy.

The modern reader will wonder chiefly at Paine's persistently literal interpretation of the Bible and his unquestioning assumption that human beings wish to be rational in their beliefs. In both respects he was a child of his time, the eighteenth century, which ordinarily demanded order and consistency, and was thoroughly committed to the mathematical world-view of Sir Isaac Newton, who pictured the universe as a smooth-running, rationally conducted machine.

It has been my intention, for several years past, to publish my thoughts upon Religion. I am well aware of the difficulties that attend the subject, and, from that consideration, had reserved it to a more advanced period of life. I intended it to be the last offering I should make to my fellow-citizens of all nations; and that at a time when the purity of the motive that induced me to it could not admit of a question, even by those who might disapprove of the work.

The circumstance that has now taken place in France, of the total abolition of the whole national order of priesthood and of everything appertaining to compulsive systems of religion, and compulsive articles of faith, has not only precipitated my intention, but rendered a work of this kind exceedingly necessary, lest, in the general wreck of superstition, of false systems of government, and false theology, we lose sight of morality, of humanity, and of the theology that is true.

As several of my colleagues, and others of my fellow-citizens of France, have given me the example of making their voluntary and individual profession of faith, I also will make mine, and I do this with all that sincerity and frankness with which the mind of man communicates with itself.

I believe in one God, and no more; and I hope for happiness beyond this life.

I believe in the equality of man, and I believe that religious duties consist in doing justice, loving mercy, and endeavoring to make our fellow-creatures happy.

But, lest it should be supposed that I believe many other things in addition to these, I shall, in the progress of this work, declare the things I do not believe, and my reasons for not believing them.

I do not believe in the creed professed by the Jewish church, by the Roman church, by the Greek church, by the Turkish church, by the Protestant church, nor by any church that I know of. My own mind is my own church.

All national institutions of churches—whether Jewish, Christian, or Turkish—appear to me no other than human inventions set up to terrify and enslave mankind and monopolize power and profit.

I do not mean by this declaration to condemn those who believe otherwise. They have the same right to their belief as I have to mine. But it is necessary to the happiness of man, that he be mentally faithful to himself. Infidelity does not consist in believing, or in disbelieving; it consists in professing to believe what he does not believe.

It is impossible to calculate the moral mischief, if I may so express it, that mental lying has produced in society. When a man has so far corrupted and prostituted the chastity of his mind, as to subscribe his professional belief to things he does not believe, he has prepared himself for the commission of every other crime. He takes up the trade of a priest for the sake of gain, and, in order to *qualify* himself for that trade, he begins with a perjury. Can we conceive anything more destructive to morality than this?

Soon after I had published the pamphlet, *COMMON SENSE*, in America, I saw the exceeding probability that a Revolution in the System of Government would be followed by a revolution in the system of religion. The adulterous connection of church and state, wherever it had taken place, whether Jewish, Christian, or Turkish, had so effectually prohibited, by pains and penalties, every discussion upon established creeds, and upon first principles of religion, that until the system of govern-

Text that established by Professor Peach on the basis of the 1795 edition
• 10 The circumstance, a reference to the acts of the National Convention between 1792 and the time of writing

ment should be changed those subjects could not be brought fairly and openly before the world; but that whenever this should be done, a revolution in the system of religion would follow. Human inventions and priest-craft would be detected, and man would return to the pure, unmixed, and unadulterated belief of one God, and no more.

Every national church or religion has established itself by pretending some special mission from God, communicated to certain individuals. The Jews have their Moses, the Christians their Jesus Christ, their apostles and saints, and the Turks their Mahomet—as if the way to God was not open to every man alike.

Each of those churches show certain books which they call *revelation*, or the word of God. The Jews say that their word of God was given by God to Moses face to face; the Christians say that their word of God came by divine inspiration, and the Turks say that their word of God (the Koran) was brought by an angel from heaven. Each of those churches accuse the other of unbelief; and, for my own part, I disbelieve them all.

As it is necessary to affix right ideas to words, I will, before I proceed further into the subject, offer some observations on the word *revelation*. Revelation, when applied to religion, means something communicated immediately from God to man.

No one will deny or dispute the power of the Almighty to make such a communication, if he pleases. But admitting, for the sake of a case, that something has been revealed to a certain person, and not revealed to any other person, it is revelation to that person only. When he tells it to a second person, a second to a third, a third to a fourth, and so on, it ceases to be a revelation to all those persons. It is a revelation to the first person only, and *hearsay* to every other; and, consequently, they are not obliged to believe it.

It is a contradiction in terms and ideas to call anything a revelation that comes to us at secondhand, either verbally or in writing. Revelation is necessarily limited to the first communication. After this, it is only an account of something which that person says was a revelation made to him, and though he may find himself obliged to believe it, it cannot be incumbent upon me to believe it in the same manner, for it was not a revelation to *me*, and I have only his word for it that it was made to *him*.

When Moses told the children of Israel that he re-

ceived the two tables of the commandments from the hand of God, they were not obliged to believe him, because they had no other authority for it than his telling them so; and I have no other authority for it than some historian telling me so. The Commandments carry no internal evidence of divinity with them. They contain some good moral precepts, such as any man qualified to be a lawgiver, or legislator, could produce himself, without having recourse to supernatural intervention.

When I am told that the Koran was written in heaven, and brought to Mahomet by an angel, the account comes to near the same kind of hearsay evidence and second-hand authority as the former. I did not see the angel myself, and therefore I have a right not to believe it.

When also I am told that a woman, called the Virgin Mary said, or gave out, that she was with child without any cohabitation with a man, and that her betrothed husband, Joseph, said, that an angel told him so, I have a right to believe them or not, such a circumstance required a much stronger evidence than their bare word for it, but we have not even this, for neither Joseph nor Mary wrote any such matter themselves. It is only reported by others that *they said so*. It is hearsay upon hearsay and I do not chuse to rest my belief upon such evidence.

It is, however, not difficult to account for the credulity that was given to the story of Jesus Christ being the Son of God. He was born at a time when the heathen mythology had still some fashion and repute in the world, and that mythology had prepared the people for the belief of such a story. Almost all the extraordinary men that ever lived under the heathen mythology were reputed to be the sons of some of their gods. It was not a new thing, at that time, to believe a man to have been celestially begotten, the intercourse of gods with women was then a matter of familiar opinion. The Jupiter, according to their accounts, had cohabited with hundreds, the story therefore had nothing in it either new, wonderful, or obscene, it was conformable to the opinions that then prevailed among the people called Gentiles, or mythologists, and it was those people that believed it. The Jews, who had kept strictly to the belief of one God and no more, and who had always rejected the heathen mythology, never credited the story

56 supernatural intervention. "It is, however, necessary to except a declaration which says that God visits the sins of the fathers upon children. This is contrary to every principle of moral justice"—Paine

It is curious to observe how the theory of what is called the Christian church sprung out of the tail of the heathen mythology. A direct incorporation took place, in the first instance, by making the reputed founder to be celestially begotten. The trinity of gods that then followed was no other than a reduction of the former plurality, which was about twenty or thirty thousand. The statue of Mary succeeded the statue of Diana of Ephesus. The deification of heroes changed into the canonization of saints. The mythologists had gods for everything, the Christian mythologists had saints for everything. The church became as crowded with the one as the pantheon had been with the other; and Rome was the place of both. The Christian theory is little else than the idolatry of the ancient mythologists, accommodated to the purposes of power and revenue, and it yet remains to reason and philosophy to abolish the amphibious fraud.

Nothing that is here said can apply, even with the most distant disrespect, to the real character of Jesus Christ. He was a virtuous and an amiable man. The morality that he preached and practiced was of the most benevolent kind, and though similar systems of morality had been preached by Confucius, and by some of the Greek philosophers, many years before, by the Quakers since, and by many good men in all ages, it has not been exceeded by any.

Jesus Christ wrote no account of himself, of his birth, parentage, or anything else. Not a line of what is called the New Testament is of his writing. The history of him is altogether the work of other people; and as to the account given of his resurrection and ascension, it was the necessary counterpart to the story of his birth. His historians, having brought him into the world in supernatural manner, were obliged to take him out again in the same manner, or the first part of the story must have fallen to the ground.

The wretched contrivance with which this latter part is told exceeds everything that went before it. The first part, that of the miraculous conception, was not a thing that admitted of publicity; and therefore the tellers of this part of the story, had this advantage, that though they might not be credited they could not be detected. They could not be expected to prove it, because it was not one of those things that admitted of proof, and it was impossible that the person of whom it was told could prove it himself.

But the resurrection of a dead person from the grave, and his ascension through the air, is a thing very different, as to the evidence it admits of, to the invisible conception of a child in the womb. The resurrection and ascension, supposing them to have taken place, admitted of public and ocular demonstration, like that of the ascension of a balloon, or the sun at noonday, to all Jerusalem at least. A thing which everybody is required to believe, requires that the proof and evidence of it should be equal to all, and universal, and as the public visibility of this last related act was the only evidence that could give sanction to the former part, the whole of it falls to the ground because that evidence never was given. Instead of this, a small number of persons, not more than eight or nine, are introduced as proxies for the whole world, to say they *saw it*, and all the rest of the world are called upon to believe it. But it appears that Thomas did not believe the resurrection, and, as they say, would not believe without having ocular and manual demonstration himself. *So neither will I*; and the reason is equally as good for me, and for every other person, as for Thomas.

It is in vain to palliate or disguise this matter. The story, so far as relates to the supernatural part, has every mark of fraud and imposition stamped upon the face of it. Who were the authors of it is as impossible for us now to know, as it is for us to be assured that the books in which the account is related were written by the persons whose names they bear. The best surviving evidence we now have respecting this affair is the Jews. They are regularly descended from the people who lived in the times this resurrection and ascension is said to have happened, and they say, *it is not true*. It has long appeared to me a strange inconsistency to cite the Jews as a proof of the truth of the story. It is the same as if a man were to say, I will prove the truth of what I have told you by producing the people who say it is false.

That such a person as Jesus Christ existed, and that he was crucified, which was the mode of execution at that day, are historical relations strictly within the limits of probability. He preached most excellent morality, and the equality of man, but he preached also against the corruptions and avarice of the Jewish priests; and

8 Diana of Ephesus, whose shrine was one of the seven wonders of the ancient world. See Acts 19 • 24 Confucius, the Chinese philosopher (551-478 B.C.) • 64 Thomas. See John 20:24-29, whence the epithet, "doubting Thomas."

this brought upon him the hatred and vengeance of the whole order of priest-hood. The accusation which those priests brought against him was that of sedition and conspiracy against the Roman government, to which the Jews were then subject and tributary, and it is not improbable that the Roman government might have some secret apprehension of the effects of his doctrine as well as the Jewish priests, neither is it improbable that Jesus Christ had in contemplation the delivery of the Jewish nation from the bondage of the Romans.
10 Between the two, however, this virtuous reformer and revolutionist lost his life.

It is upon this plain narrative of facts, together with another case I am going to mention, that the Christian mythologists, calling themselves the Christian church, have erected their fable, which for absurdity and extravagance is not exceeded by anything that is to be found in the mythology of the ancients

The ancient mythologists tell that the race of Giants
20 made war against Jupiter, and that one of them threw an hundred rocks against him at one throw, that Jupiter defeated him with thunder, and confined him afterwards under Mount Etna, and that every time the Giant turns himself, Mount Etna belches fire. It is here easy to see that the circumstance of the mountain, that of its being a volcano, suggested the idea of the fable, and that the fable is made to fit and wind itself up with that circumstance

The Christian mythologists tell that their Satan made
30 war against the Almighty, who defeated him, and confined him afterwards, not under a mountain, but in a pit. It is here easy to see that the first fable suggested the idea of the second, for the fable of Jupiter and the Giants was told many hundred years before that of Satan

Thus far the ancient and the Christian mythologists differ very little from each other. But the latter have contrived to carry the matter much farther. They have contrived to connect the fabulous part of the story of Jesus Christ, with the fable originating from Mount
40 Etna, and, in order to make all the parts of the story together, they have taken to their aid the tradition of the Jews, for the Christian mythology is made up partly from the ancient mythology and partly from the Jewish traditions.

The Christian mythologists, after having confined Satan in a pit, were obliged to let him out again, to bring on

the sequel of the fable. He is then introduced into the garden of Eden in the shape of a snake, or a serpent, and in that shape he enters into familiar conversation with Eve, who is not in any way surprised to hear a snake talk, and the issue of this *tête-à-tête* is, that he persuades her to eat an apple, and the eating of that apple, damns all mankind

After giving Satan this triumph over the whole creation, one would have supposed that the church mythologists would have been kind enough to send him back again to the pit; or, if they had not done this, that they would have put a mountain upon him (for they say their faith can remove a mountain) or have him put *under* a mountain, as the former mythologists had done, to prevent his getting again among the women and doing more mischief. But instead of this, they leave him at large without even obliging him to give his parole. The secret of which is, that they could not do without him, and after being at the trouble of making him, they bribed him to stay. They promised him ALL the Jews, ALL the Turks by anticipation, nine-tenths of the world beside, and Mahomet into the bargain. After this, who can doubt the bountifulness of the Christian mythology?

Having thus made an insurrection and a battle in heaven, in which none of the combatants could be either killed or wounded—put Satan into the pit—let him out again—given him a triumph over the whole creation—damned all mankind by the eating of an apple, these Christian mythologists bring the two ends of their fable together. They represent this virtuous and amiable man Jesus Christ, to be at once both God and man, and also the Son of God, celestially begotten on purpose to be sacrificed, because they say, that Eve in her longing had eaten an apple

Putting aside everything that might excite laughter by its absurdity, or detestation by its prophaneness, and confining ourselves merely to an examination of the parts, it is impossible to conceive a story more derogatory to the Almighty, more inconsistent with his wisdom, more contradictory to his power, than this story is

In order to make for it a foundation to rise upon, the inventors were under the necessity of giving to the being

44 Jewish traditions, especially as found in the Cabala, or mystical books of the Jews, some of which are related to the Apocrypha. The idea of Satan is largely non-Biblical

whom they call Satan a power equally as great, if not greater, than they attribute to the Almighty. They have not only given him the power of liberating himself from the pit, after what they call his fall, but they have made that power increase afterwards to infinity. Before this fall, they represent him only as an angel of limited existence, as they represent the rest. After his fall, he becomes, by their account, omnipresent. He exists everywhere, and at the same time. He occupies the whole immensity of space.

Not content with this deification of Satan, they represent him as defeating, by stratagem, in the shape of an animal of the creation, all the power and wisdom of the Almighty. They represent him as having compelled the Almighty to the *direct necessity* either of surrendering the whole of the creation to the government and sovereignty of this Satan or of capitulating for its redemption by coming down upon earth and exhibiting himself upon a cross in the shape of a man.

20 Had the inventors of this story told it the contrary way—that is, had they represented the Almighty as compelling Satan to exhibit *himself* on a cross in the shape of a snake, as a punishment for his new transgression, the story would have been less absurd, less contradictory. But, instead of this, they make the transgressor triumph and the Almighty fall.

That many good men have believed this strange fable, and lived very good lives under that belief (for credulity is not a crime) is what I have no doubt of. In the first place, they were educated to believe it, and they would have believed anything else in the same manner. There are also many who have been so enthusiastically enraptured by what they conceived to be the infinite love of God to man in making a sacrifice of himself, that the vehemence of the idea has forbidden and deterred them from examining into the absurdity and prophaneness of the story. The more unnatural anything is, the more is it capable of becoming the object of dismal admiration.

But if objects for gratitude and admiration are our desire, do they not present themselves every hour to our eyes? Do we not see a fair creation prepared to receive us the instant we were born—a world furnished to our hands that cost us nothing? Is it we that light up the sun, that pour down the rain, and fill the earth with abundance? Whether we sleep or wake the vast machinery of the universe still goes on. Are these things,

and the blessings they indicate in future, nothing to us? Can our gross feelings be excited by no other subjects than tragedy and suicide? Or is the gloomy pride of man become so intolerable that nothing can flatter it but the sacrifice of the Creator?

I know that this bold investigation will alarm many, but it would be paying too great a compliment to their credulity to forbear it upon that account. The times and the subject demand it to be done. The suspicion that the theory of what is called the Christian church is fabulous is becoming very extensive in all countries; and it will be a consolation to men staggering under that suspicion, and doubting what to believe and what to disbelieve, to see the subject freely investigated. I therefore pass on to an examination of the books called the Old and the New Testament . . .

[Most of the remainder of Part I, and a large portion of Part II, here omitted, either display the "true theology" which Paine found in the works of creation, or attack the divine authority of the Bible by citation of conflicting texts and "absurd" stories. His chief argument is that mystery, miracle, and prophecy have been used in all ages to impose priesthood upon mankind. His positive Deism is summarized in the "Conclusion" to Part II, the latter part of which follows.]

Of all the systems of religion that ever were invented, there is none more derogatory to the Almighty, more unedifying to man, more repugnant to reason, and more contradictory in itself, than this thing called Christianity. Too absurd for belief, too impossible to convince, and too inconsistent for practice, it renders the heart torpid or produces only atheists and fanatics. As an engine of power, it serves the purpose of despotism, and as a means of wealth, the avarice of priests, but so far as respects the good of man in general, it leads to nothing here or hereafter.

The only religion that has not been invented, and that has in it every evidence of divine originality, is pure and simple Deism. It must have been the first, and will probably be the last, that man believes. But pure and simple Deism does not answer the purpose of despotic governments. They cannot lay hold of religion as an engine, but by mixing it with human inventions, and making their own authority a part, neither does it answer

avarice of priests but by incorporating themselves and their functions with it, and becoming, like the government, a party in the system. It is that that forms the otherwise mysterious connection of church and state; church human, and the state tyrannic.

Were man impressed as fully and strongly as he ought to be with the belief of a God, his moral life would be regulated by the force of that belief, he would stand in awe of God and of himself, and would not do the thing that could not be concealed from either. To give this belief the full opportunity of force, it is necessary that it act alone. This is Deism.

But when, according to the Christian trinitarian scheme, one part of God is represented by a dying man, and another part, called the Holy Ghost, by a flying creature, it is impossible that belief can attach itself to such wild conceits.

It has been the scheme of the Christian church, and of all the other invented systems of religion, to hold man in ignorance of the Creator, as it is of government to hold man in ignorance of his rights. The systems of the one are as false as those of the other, and are calculated for mutual support. The study of theology, as it stands in the Christian churches, is the study of nothing, it is founded on nothing, it rests on no principles, it proceeds on no authorities, it has no data, it can demonstrate nothing, and admits of no conclusion. Not any thing can be studied as a science without our being in possession of the principles upon which it is founded, and as this is not the case with Christian theology, it is therefore the study of nothing.

Instead, then, of studying theology, as is now done, out of the Bible and Testament, the meanings of which books are always controverted, and the authenticity of which is disproved, it is necessary that we refer to the Bible of the creation. The principles we discover there are eternal, and of divine origin, they are the foundation of all the science that exists in the world, and must be the foundation of theology.

We can know God only through his works. We cannot have a conception of any one attribute but by following some principle that leads to it. We have only a confused idea of his powers if we have not the means of comprehending something of its immensity. We can have no idea of his wisdom but by knowing the order and manner in which it acts. The principles of science lead to this knowledge, for the Creator of man is the Creator of

science, and it is through that medium that man can see God, as it were, face to face.

Could a man be placed in a situation, and endowed with the power of vision, to behold at one view, and to contemplate deliberately, the structure of the universe, to mark the movements of the several planets, the cause of their varying appearances, the unerring order in which they revolve, even to the remotest comet; their connection and dependence on each other, and to know the system of laws established by the Creator that governs and regulates the whole, he would then conceive, far beyond what any church theology can teach him, the power, the wisdom, the vastness, the munificence of the Creator. He would then see that all the knowledge man has of science, and that all the mechanical arts by which he renders his situation comfortable here, are derived from that source, his mind, exalted by the scene and convinced by the fact, would increase in gratitude as it increased in knowledge, his religion or his worship would become united with his improvement as a man, any employment he followed that had connection with the principles of the creation, as everything of agriculture, of science, and of the mechanical arts has, would teach him more of God and of the gratitude he owes to him than any theological Christian sermon he now hears.

17 wild conceits. "The book called the book of Matthew says (iii, 1) that the Holy Ghost descended in the shape of a dove. It might as well have said a goose, the creatures are equally harmless, and the one is as much a nonsensical lie as the other. Acts ii, 2, 3, says that he descended in a mighty rushing wind, in the shape of cloven tongue perhaps it was cloven feet. Such absurd stuff is only fit for tales of witches and wizards.—Paine • 31 the study of nothing. The Bible-makers have undertaken to give us, in the first chapter of Genesis an account of the creation, and in doing this they have demonstrated nothing but their ignorance. They make there to have been three days and three nights, evenings, and mornings, before there was any sun when it is the presence or absence of the sun that is the cause of day and night—and what is called his rising and setting, that of morning and evening. Besides it is a puerile and pitiful idea to suppose Almighty to say, 'Let there be light.' It is the imperative manner of speaking that a conjuror uses when he says to his cups and balls, 'Presto! be gone' and most probably has been taken from it, as Magic and his rod are a conjuror and his wand. Longinus calls this expression the sublime, and by the same rule the conjuror is sublime too, for the manner of speaking is expressively and grammatically the same. When authors and critics talk of the sublime, they see not how nearly it borders on the ridiculous. The sublime of the critics, like some part of Edmund Burke's sublime and beautiful, is like a windmill just visible in a fog, which imagination might distort into a flying mountain, or an archangel, or a flock of wild geese."—Paine

Great objects inspire great thoughts, great munificence excites great gratitude, but the groveling tales and doctrines of the Bible and the Testament are fit only to excite contempt

Though man cannot arrive, at least in this life, at the actual scene I have described, he can demonstrate it because he has a knowledge of the principles upon which the creation is constructed. We know that the greatest works can be represented in model, and that the universe can be represented by the same means. The same principles by which we measure an inch or an acre of ground will measure to millions in extent. A circle of an inch diameter has the same geometrical properties as a circle that would circumscribe the universe. The same properties of a triangle that will demonstrate upon paper the course of a ship, will do it on the ocean, and, when applied to what are called the heavenly bodies, will ascertain to a minute the time of an eclipse, though those bodies are millions of miles distant from us. This knowledge is of divine origin, and it is from the Bible of the creation that man has learned it, and not from the stupid Bible of the church that teacheth man nothing

All the knowledge man has of science and of machinery, by the aid of which his existence is rendered comfortable upon earth, and without which he would be scarcely distinguishable in appearance and condition from a common animal, comes from the great machine and structure of the universe. The constant and unwearied observations of our ancestors upon the movements and revolutions of the heavenly bodies, in what are supposed to have been the early ages of the world, have brought this knowledge upon earth. It is not Moses and the prophets nor Jesus Christ, nor his apostles that have done it. The Almighty is the great mechanic of the creation, the first philosopher and original teacher of all science. Let us then learn to reverence our master, and not forget the labor of our ancestors

Had we, at this day, no knowledge of machinery, and were it possible that man could have a view, as I have before described, of the structure and machinery of the universe, he would soon conceive the idea of constructing some at least of the mechanical works we now have, and the idea so conceived would progressively advance in practice. Or could a model of the universe, such as is called orrery, be presented before him and put in motion, his mind would arrive at the same idea. Such an object and such a subject would, whilst it improved him in

knowledge useful to himself as a man and a member of society, as well as entertaining, afford far better matter for impressing him with a knowledge of and a belief in the Creator, and of the reverence and gratitude that a man owes to him, than the stupid texts of the Bible and the Testament, from which, be the talents of the preacher what they may, only stupid sermons can be preached. If man must preach, let him preach something that is edifying, and from the texts that are known to be true.

The Bible of the Creation is inexhaustible in texts. Every part of the science, whether connected with the geometry of the universe, with the systems of animal and vegetable life, or with the properties of inanimate matter, is a text as well for devotion as for philosophy—for gratitude as for human improvement. It will perhaps be said that if such a revolution in the system of religion takes place, every preacher ought to be a philosopher. *Most certainly,* and every house of devotion a school of science

It has been by wandering from the immutable laws of science and the light of reason, and setting up an invented thing called revealed religion, that so many wild and blasphemous conceits have been formed of the Almighty. The Jews have made him the assassin of the human species, to make room for the religion of the Jews. The Christians have made him the murderer of himself, and the founder of a new religion, to supersede and expel the Jewish religion. And to find pretense and admission for these things, they must have supposed his power or his wisdom imperfect, or his will changeable, and the changeableness of the will is the imperfection of the judgment. The philosopher knows that the laws of the Creator have never changed with respect either to the principles of science or the properties of matter. Why, then, is it to be supposed they have changed with respect to man?

I here close the subject. I have shown in all the foregoing parts of this work that the bible and testament are impositions and forgeries, and I leave the evidence I have produced in proof of it to be refuted, if anyone can do it, and I leave the ideas that are suggested in the conclusion of the work to rest on the mind of the reader, certain, as I am, that when opinions are free, either in matters of government or religion, truth will finally and powerfully prevail

1793-1794-1795

William Ellery Channing

1780 • 1842

William Ellery Channing entered Harvard College in 1794, just in time to encounter the unrest which was leading to the conservative reaction against the French Revolution. In later years he recalled that the "old foundations of social order, loyalty, tradition, habit, reverence for antiquity, were everywhere shaken, if not subverted. The authority of the past was gone. The old forms were outgrown, and new ones had not taken their place. The tone of books and conversation was presumptuous and daring. The tendency of all classes was to scepticism." That last decade of the eighteenth century was indeed a trying era. In 1796 the Harvard Corporation thought it wise to provide every student with a copy of Richard Watson's *Apology for the Bible*, ablest of the replies to Paine's *The Age of Reason*, and at New Haven Timothy Dwight (p. 450) discoursed to Yale seniors on *The Nature, and Danger, of Infidel Philosophy* (1798). Religion and politics were poised precariously between old ways and new.

Channing gradually emerged as the spokesman for almost every liberal humanitarian doctrine of his age. More intellectual than Dwight, temperamentally averse to controversy, and for the most of his life an invalid, Channing had leadership thrust upon him, the kind of leadership that comes sometimes to studious, thoughtful men who are also unselfish and fearless. Slowly and coolly he spoke out his convictions—that human values and the moral law laid down by God are essentially the same, that personal liberty and absolute freedom of speech are the basis of political health, that slavery and

war should be abolished, that the working classes should be protected and educated by the state. Fear of the future, in this world or the next, had no place in his thoughts.

To this position Channing came only gradually. He was born at Newport, Rhode Island, in 1780. After his graduation from Harvard in 1798 he spent a year and a half as a tutor in the home of Daniel Meade Randolph of Richmond, Virginia. There he was disturbed by his glimpses of the institution of slavery but impressed by the political preoccupations of John Marshall and other Virginians. Under their influence he read works he had not encountered at Harvard—modern history, the Deistic writers of the early eighteenth century, and the political radicals—Mary Wollstonecraft, Jean Jacques Rousseau and William Godwin. When he returned to New England in July 1800, he was, in his quiet way, a perfectionist with a strong sense of social duty.

At Newport and at Cambridge he studied theology with unusual earnestness and independence. In 1805 he was ordained as minister of the Federal Street Church in Boston, where he was soon renowned for his concern with charity and his willingness to bring controversial topics into his pulpit. In 1810, for example, he denounced the military despotism of Napoleon, and in 1812 he spoke out against the declaration of war against England. Self-defense, however, he regarded as a righteous cause, and he stood for resistance when New England was threatened with invasion in 1814.

As early as 1806 Channing was thinking of himself

as a "liberal" Christian, and he probably did not share the concern of the conservative, orthodox Congregationalists when Henry Ware, a Unitarian, was appointed to the Hollis professorship of divinity at Harvard in 1805. Particularly disturbed by a proposal to erect "ecclesiastical tribunals" for the purpose, presumably, of reading the liberals out of the Congregational Church, Channing, in *The System of Exclusion and Denunciation in Religion Considered* (1815), defended the position of the "Liberal Christians," although he did not like that name. By 1819 he was ready to state his doctrine positively, and *Unitarian Christianity* marks the break with the conservative faction. Channing was thereafter the acknowledged leader of a new church. He helped organize the American Unitarian Association in 1825, preached many ordination sermons before Unitarian societies, and was one of the chief contributors to *The Christian Examiner*, which became one of the most influential religious reviews of the period. In its pages appeared such famous essays as "The Moral Argument Against Calvinism" (1820), "Remarks on the Character and Writings of John Milton" (1826), and "The Importance and Means of a National Literature" (1830).

Channing's literary theories, and his anticipation of many of the fundamental positions of the Transcendentalists, are well expressed in a single paragraph from his private journal, composed at about the time of *Unitarian Christianity*. "Good preaching never enraptures an

audience by beauties of style, elocution, or gesture," he wrote. "An easy, unbalanced, unlabored style should be the common mode of expression. This will give relief and prominence to more important parts, and insure variety. Composition should resemble nature. Dazzling objects soon fatigue the eye. Simple truth, in plain, perspicuous words, should form the body of the discourse, and all appeals of peculiarly solemnizing, melting, invigorating character should be introduced in the way of transition. By simple truth, staleness and tameness are not meant, for there should always be richness of thought. A sermon should never be a barren sand-level of commonplaces, but a fresh, fertile field, verdant and well watered. In style, as in music, there should be a key, which should change with the topic. Let clearness, dignity, unstrained vigor, elevation without turgidness, purity without primness, pathos without whining, characterize my style. Let me study to be filled with the spirit of the truth I am to utter, and I shall speak as I ought. A slow, distinct, and rather low enunciation should form the ground of delivery. It is better to require exertion on the part of the hearer, than to stun him with clamor."

Unitarian Christianity

Discourse at the Ordination of the
Rev. Jared Sparks

The following sermon, delivered at Baltimore in 1819, began a theological controversy in which the chief works were attacks by Moses Stuart and Leonard Woods of the Andover Theological Seminary and defenses by Andrews

Norton and Henry Ware of the liberal faction. Jared Sparks (1789-1866), at whose ordination the discourse was delivered, left the Baltimore pulpit in 1823, and later distinguished himself as an editor, historian, and president of Harvard (1849-1853). It will be observed that Channing does not preach directly upon his text, although he retains a systematic method reminiscent of earlier sermons. The simplicity and clarity are typical of all his best work.

1 THESS. v. 21: "Prove all things, hold fast that which is good."

The peculiar circumstances of this occasion not only justify, but seem to demand a departure from the course

generally followed by preachers at the introduction of a brother into the sacred office. It is usual to speak of the nature, design, duties, and advantages of the Christian ministry, and on these topics I should now be happy to insist, did I not remember that a minister is to be given this day to a religious society, whose peculiarities of opinion have drawn upon them much remark, and may I not add, much reproach. Many good minds, many sincere Christians, I am aware, are apprehensive that the solemnities of this day are to give a degree of influence to principles which they deem false and injurious. The fears and anxieties of such men I respect, and, believing that they are grounded in part on mistake, I have thought it my duty to lay before you, as clearly as I can, some of the distinguishing opinions of that class of Christians in our country, who are known to sympathize with this religious society. I must ask your patience, for such a subject is not to be despatched in a narrow compass. I must also ask you to remember, that it is impossible to exhibit, in a single discourse, our views of every doctrine of Revelation, much less the differences of opinion which are known to subsist among ourselves. I shall confine myself to topics, on which our sentiments have been misrepresented, or which distinguish us most widely from others. May I not hope to be heard with candor? God deliver us all from prejudice and unkindness, and fill us with the love of truth and virtue.

There are two natural divisions under which my thoughts will be arranged. I shall endeavour to unfold, 1st, The principles which we adopt in interpreting the Scriptures. And 2dly, Some of the doctrines, which the Scriptures, so interpreted, seem to us clearly to express.

I regard the Scriptures as the records of God's successive revelations to mankind, and particularly of the last and most perfect revelation of his will by Jesus Christ. Whatever doctrines seem to us to be clearly taught in the Scriptures, we receive without reserve or exception. We do not, however, attach equal importance to all the books in this collection. Our religion, we believe, lies chiefly in the New Testament. The dispensation of Moses, compared with that of Jesus, we consider as adapted to the childhood of the human race, a preparation for a nobler system, and chiefly useful now as serving to confirm and illustrate the Christian Scriptures. Jesus Christ is the only master of Christians, and

whatever he taught, either during his personal ministry or by his inspired Apostles, we regard as of divine authority, and profess to make the rule of our lives.

This authority, which we give to the Scriptures, is a reason, we conceive, for studying them with peculiar care, and for inquiring anxiously into the principles of interpretation, by which their true meaning may be ascertained. The principles adopted by the class of Christians in whose name I speak, need to be explained, because they are often misunderstood. We are particularly accused of making an unwarrantable use of reason in the interpretation of Scripture. We are said to exalt reason above revelation, to prefer our own wisdom to God's. Loose and undefined charges of this kind are circulated so freely, that we think it due to ourselves, and to the cause of truth, to express our views with some particularity.

Our leading principle in interpreting Scripture is this, that the Bible is a book written for men, in the language of men, and that its meaning is to be sought in the same manner as that of other books. We believe that God, when he speaks to the human race, conforms if we may so say, to the established rules of speaking and writing. How else would the Scriptures avail us more, than if communicated in an unknown tongue?

Now all books, and all conversation, require in the reader or hearer the constant exercise of reason; or their true import is only to be obtained by continual comparison and inference. Human language, you well know, admits various interpretations, and every word and every sentence must be modified and explained according to the subject which is discussed, according to the purposes, feelings, circumstances, and principles of the writer, and according to the genius and idioms of the language which he uses. These are acknowledged principles in the interpretation of human writings, and a man, whose words we should explain without reference to these principles, would reproach us justly with a criminal want of candor, and an intention of obscuring or distorting his meaning.

Were the Bible written in a language and style c

Text Works, Vol. III, 8th ed., 1848. • 8 much reproach. Unitarianism although not openly professed by many clergymen, had long been regarded as a dangerous heresy in New England and had been vigorously attacked in *The Panoplist* since 1815.

its own, did it consist of words, which admit but a single sense, and of sentences wholly detached from each other, there would be no place for the principles now laid down. We could not reason about it, as about other writings. But such a book would be of little worth, and perhaps, of all books, the Scriptures correspond least to this description. The Word of God bears the stamp of the same hand, which we see in his works. It has infinite connexions and dependences. Every proposition
 10 is linked with others, and is to be compared with others, that its full and precise import may be understood. Nothing stands alone. The New Testament is built on the Old. The Christian dispensation is a continuation of the Jewish, the completion of a vast scheme of providence, requiring great extent of view in the reader. Still more, the Bible treats of subjects on which we receive ideas from other sources besides itself, such subjects as the nature, passions, relations, and duties of man, and it expects us to restrain and modify its lan-
 15 guage by the known truths, which observation and experience furnish on these topics.

We profess not to know a book, which demands a more frequent exercise of reason than the Bible. In addition to the remarks now made on its infinite connexions, we may observe, that its style nowhere affects the precision of science, or the accuracy of definition. Its language is singularly glowing, bold, and figurative, demanding more frequent departures from the literal sense, than that of our own age and country, and con-
 20 sequently demanding more continual exercise of judgment.—We find, too, that the different portions of this book, instead of being confined to general truths, refer perpetually to the times when they were written, to states of society, to modes of thinking, to controversies in the church, to feelings and usages which have passed away, and without the knowledge of which we are constantly in danger of extending to all times, and places, what was of temporary and local application.—We find, too, that some of these books are strongly marked by the
 25 genius and character of their respective writers, that the Holy Spirit did not so guide the Apostles as to suspend the peculiarities of their minds, and that a knowledge of their feelings, and of the influences under which they were placed, is one of the preparations for understanding their writings. With these views of the Bible, we feel it our bounden duty to exercise our reason upon it per-

petually, to compare, to infer, to look beyond the letter to the spirit, to seek in the nature of the subject, and the aim of the writer, his true meaning, and, in general, to make use of what is known, for explaining what is
 difficult, and for discovering new truths. . . .

II Having thus stated the principles according to which we interpret Scripture, I now proceed to the second great head of this discourse, which is, to state some of the views we derive from that sacred book, particularly those which distinguish us from other Christians.

1 In the first place, we believe in the doctrine of God's UNITY, or that there is one God, and one only. To this truth we give infinite importance, and we feel ourselves bound to take heed, lest any man spoil us of it by vain philosophy. The proposition, that there is one God, seems to us exceedingly plain. We understand by it, that there is one being, one mind, one person, one intelligent agent, and one only, to whom underived and infinite perfection and dominion belong. We conceive, that these words could have conveyed no other meaning to the simple and uncultivated people, who were set apart to be the depositaries of this great truth, and who were utterly incapable of understanding those hair-breadth distinctions between being and person, which the sagacity of later ages has discovered. We find no intimation, that this language was to be taken in an unusual sense, or that God's unity was a quite different thing from the oneness of other intelligent beings. . . .

2 Having thus given our views of the unity of God, I proceed in the second place to observe, that we believe in the unity of Jesus Christ. We believe that Jesus is one mind, one soul, one being, as truly one as we are, and equally distinct from the one God. We complain of the doctrine of the Trinity, that, not satisfied with making God three beings, it makes Jesus Christ two beings, and thus introduces infinite confusion into our conceptions of his character. This corruption of Christianity, alike repugnant to common sense and to the general strain of Scripture, is a remarkable proof of the power of a false philosophy in disfiguring the simple truth of Jesus.

51 truths . . . Seven paragraphs, in defense of human reason, are here omitted. • 74 intelligent beings. . . . Six paragraphs, an argument that the Trinitarian doctrine subverts the unity of God, are omitted.

According to this doctrine, Jesus Christ, instead of being one mind, one conscious intelligent principle, whom we can understand, consists of two souls, two minds; the one divine, the other human, the one weak, the other almighty, the one ignorant, the other omniscient. Now we maintain, that this is to make Christ two beings. To denominate him one person, one being, and yet to suppose him made up of two minds, infinitely different from each other, is to abuse and confound language, and to throw darkness over all our conceptions of intelligent natures. According to the common doctrine, each of these two minds in Christ has its own consciousness, its own will, its own perceptions. They have, in fact, no common properties. The divine mind feels none of the wants and sorrows of the human, and the human is infinitely removed from the perfection and happiness of the divine. Can you conceive of two beings in the universe more distinct? We have always thought that one person was constituted and distinguished by one consciousness. The doctrine, that one and the same person should have two consciousnesses, two wills, two souls, infinitely different from each other, this we think an enormous tax on human credulity.

We say, that if a doctrine, so strange, so difficult, so remote from all the previous conceptions of men, be indeed a part and an essential part of revelation, it must be taught with great distinctness, and we ask our brethren to point to some plain, direct passage, where Christ is said to be composed of two minds infinitely different, yet constituting one person. We find none. Other Christians, indeed, tell us, that this doctrine is necessary to the harmony of the Scriptures, that some texts ascribe to Jesus Christ human, and others divine properties, and that to reconcile these, we must suppose two minds, to which these properties may be referred. In other words, for the purpose of reconciling certain difficult passages, which a just criticism can in a great degree, if not wholly, explain, we must invent an hypothesis vastly more difficult, and involving gross absurdity. We are to find our way out of a labyrinth, by a clue which conducts us into mazes infinitely more inextricable.

Surely, if Jesus Christ felt that he consisted of two minds, and that this was a leading feature of his religion, his phraseology respecting himself would have been colored by this peculiarity. The universal language of

men is framed upon the idea, that one person is one person, is one mind, and one soul, and when the multitude heard this language from the lips of Jesus, they must have taken it in its usual sense, and must have referred to a single soul all which he spoke, unless expressly instructed to interpret it differently. But where do we find this instruction? Where do you meet, in the New Testament, the phraseology which abounds in Trinitarian books, and which necessarily grows from the doctrine of two natures in Jesus? Where does this divine teacher say, "This I speak as God, and this as man, this is true only of human mind, this only of my divine"? Where do we find in the Epistles a trace of this strange phraseology? Nowhere. It was not needed in that day. It was demanded by the errors of a later age.

We believe, then, that Christ is one mind, one being and, I add, a being distinct from the one God. That Christ is not the one God, not the same being with the Father, is a necessary inference from our former head, in which we saw that the doctrine of three persons in God is a fiction. But on so important a subject, I would add a few remarks. We wish, that those from whom we differ, would weigh one striking fact. Jesus, in his preaching, continually spoke of God. The word was always in his mouth. We ask, does he, by this word ever mean himself? We say, never. On the contrary, he most plainly distinguishes between God and himself, and so do his disciples. How this is to be reconciled with the idea, that the manifestation of Christ, as God, was a primary object of Christianity, our adversaries must determine.

If we examine the passages in which Jesus is distinguished from God, we shall see, that they not only speak of him as another being, but seem to labor to express his inferiority. He is continually spoken of as the Son of God, sent of God, receiving all his powers from God, working miracles because God was with him, judged justly because God taught him, having claims on our belief, because he was anointed and sealed by God, and as able of himself to do nothing. The New Testament is filled with this language. Now we ask, what impression this language was fitted and intended to make. Could any, who heard it, have imagined that Jesus was the very God to whom he was so industriously declared to be inferior; the very Being by whom he was so

and from whom he professed to have received his message and power? Let it here be remembered, that the human birth, and bodily form, and humble circumstances, and mortal sufferings of Jesus, must all have prepared men to interpret, in the most unqualified manner, the language in which his inferiority to God was declared. Why, then, was this language used so continually, and without limitation, if Jesus were the Supreme Deity, and if this truth were an essential part of his religion?

o I repeat it, the human condition and sufferings of Christ tended strongly to exclude from men's minds the idea of his proper Godhead, and, of course, we should expect to find in the New Testament perpetual care and effort to counteract this tendency, to hold him forth as the same being with his Father, if this doctrine were, as is pretended, the soul and centre of his religion. We should expect to find the phraseology of Scripture cast into the mould of this doctrine, to hear familiarly of God the Son, of our Lord God Jesus, and to be told, that
20 to us there is one God, even Jesus. But, instead of this, the inferiority of Christ pervades the New Testament. It is not only implied in the general phraseology, but repeatedly and decidedly expressed, and unaccompanied with any admonition to prevent its application to his whole nature. Could it, then, have been the great design of the sacred writers to exhibit Jesus as the Supreme God?

I am aware that these remarks will be met by two or three texts, in which Christ is called God, and by a class
30 of passages, not very numerous, in which divine properties are said to be ascribed to him. To these we offer one plain answer. We say, that it is one of the most established and obvious principles of criticism, that language is to be explained according to the known properties of the subject to which it is applied. Every man knows, that the same words convey very different ideas, when used in relation to different beings. Thus, Solomon *built* the temple in a different manner from the architect whom he employed, and God *repents* different-
40 ly from man. Now we maintain, that the known properties and circumstances of Christ, his birth, sufferings, and death, his constant habit of speaking of God as a distinct being from himself, his praying to God, his ascribing to God all his power and offices, these acknowledged properties of Christ, we say, oblige us to interpret the comparatively few passages which are thought to

make him the Supreme God, in a manner consistent with his distinct and inferior nature. It is our duty to explain such texts by the rule which we apply to other texts, in which human beings are called gods, and are said 50 to be partakers of the divine nature, to know and possess all things, and to be filled with all God's fulness. These latter passages we do not hesitate to modify, and restrain, and turn from the most obvious sense, because this sense is opposed to the known properties of the beings to whom they relate, and we maintain, that we adhere to the same principle, and use no greater latitude, in explaining, as we do, the passages which are thought to support the Godhead of Christ.

Trinitarians profess to derive some important ad- 60 vantages from their mode of viewing Christ. It furnishes them, they tell us, with an infinite atonement, for it shows them an infinite being suffering for their sins. The confidence with which this fallacy is repeated astonishes us. When pressed with the question, whether they really believe, that the infinite and unchangeable God suffered and died on the cross, they acknowledge that this is not true, but that Christ's human mind alone sustained the pains of death. How have we, then, an infinite sufferer? This language seems to us an imposi- 70 tion on common minds, and very derogatory to God's justice, as if this attribute could be satisfied by a sophism and a fiction.

We are also told, that Christ is a more interesting object, that his love and mercy are more felt, when he is viewed as the Supreme God, who left his glory to take humanity and to suffer for men. That Trinitarians are strongly moved by this representation, we do not mean to deny, but we think their emotions altogether founded on a misapprehension of their own doctrines. 80 They talk of the second person of the Trinity's leaving his glory and his Father's bosom, to visit and save the world. But this second person, being the unchangeable and infinite God, was evidently incapable of parting with the least degree of his perfection and felicity. At the

62 infinite atonement. The doctrine of the atonement had long been one of the central problems in New England theology and has always led to wide diversity of opinion. Did Christ suffer death on the cross to expiate the sins of the human race or to satisfy the honor of God? The interpretation of the atonement involves one's whole conception of God and of the processes of salvation.

moment of his taking flesh, he was as intimately present with his Father as before, and equally with his Father filled heaven, and earth, and immensity. This Trinitarians acknowledge, and still they profess to be touched and overwhelmed by the amazing humiliation of this immutable being! But not only does their doctrine, when fully explained, reduce Christ's humiliation to a fiction, it almost wholly destroys the impressions with which his cross ought to be viewed. According to their doctrine, Christ was comparatively no sufferer at all. It is true, his human mind suffered, but this, they tell us, was an infinitely small part of Jesus, bearing no more proportion to his whole nature, than a single hair of our heads to the whole body, or than a drop to the ocean. The divine mind of Christ, that which was most properly himself, was infinitely happy, at the very moment of the suffering of his humanity. Whilst hanging on the cross, he was the happiest being in the universe, as happy as the infinite Father, so that his pains, compared with his felicity, were nothing. This Trinitarians do, and must, acknowledge. It follows necessarily from the immutableness of the divine nature, which they ascribe to Christ, so that their system, justly viewed, robs his death of interest, weakens our sympathy with his sufferings, and is, of all others, most unfavorable to a love of Christ, founded on a sense of his sacrifices for mankind. We esteem our own views to be vastly more affecting. It is our belief, that Christ's humiliation was real and entire, that the whole Saviour, and not a part of him, suffered, that his crucifixion was a scene of deep and unmixed agony. As we stand round his cross, our minds are not distracted, nor our sensibility weakened, by contemplating him as composed of incongruous and infinitely differing minds, and as having a balance of infinite felicity. We recognize in the dying Jesus but one mind. This, we think, renders his sufferings, and his patience and love in bearing them, incomparably more impressive and affecting than the system we oppose.

3 Having thus given our belief on two great points, namely, that there is one God, and that Jesus Christ is a being distinct from, and inferior to, God, I now proceed to another point, on which we lay still greater stress. We believe in the *moral perfection of God*. We consider no part of theology so important as that which treats of God's moral character, and we value our views of

Christianity chiefly as they assert his amiable and venerable attributes.

It may be said, that, in regard to this subject, all Christians agree, that all ascribe to the Supreme Being infinite justice, goodness, and holiness. We reply, that it is very possible to speak of God magnificently, and to think of him meanly; to apply to his person high-sounding epithets, and to his government, principles which make him odious. The Heathens called Jupiter the greatest and the best; but his history was black with cruelty and lust. We cannot judge of men's real ideas of God by their general language, for in all ages they have hoped to soothe the Deity by adulation. We must inquire into their particular views of his purposes, of the principles of his administration, and of his disposition towards his creatures.

We conceive that Christians have generally leaned towards a very injurious view of the Supreme Being. They have too often felt, as if he were raised, by his greatness and sovereignty, above the principles of morality, above those eternal laws of equity and rectitude, to which all other beings are subjected. We believe, that in no being is the sense of right so strong, so omnipotent, as in God. We believe that his almighty power is entirely submitted to his perceptions of rectitude, and this is the ground of our piety. It is not because he is our Creator merely, but because he created us for good and holy purposes, it is not because his will is irresistible, but because his will is the perfection of virtue, that we pay him allegiance. We cannot bow before a being however great and powerful, who governs tyrannically. We respect nothing but excellence, whether on earth or in heaven. We venerate not the loftiness of God's throne but the equity and goodness in which it is established.

We believe that God is infinitely good, kind, benevolent, in the proper sense of these words, good disposition, as well as in act; good, not to a few, but to all, good to every individual, as well as to the general system.

We believe, too, that God is just, but we never forge that his justice is the justice of a good being, dwelling

63 injurious . . . Being. The point made here was expanded by Channing in "The Moral Argument Against Calvinism."

in the same mind, and acting in harmony, with perfect benevolence. By this attribute, we understand God's infinite regard to virtue or moral worth, expressed in a moral government, that is, in giving excellent and equitable laws, and in conferring such rewards, and inflicting such punishments, as are best fitted to secure their observance. God's justice has for its end the highest virtue of the creation, and it punishes for this end alone, and thus it coincides with benevolence, for virtue and happiness, though not the same, are inseparably conjoined.

God's justice thus viewed, appears to us to be in perfect harmony with his mercy. According to the prevalent systems of theology, these attributes are so discordant and jarring, that to reconcile them is the hardest task, and the most wonderful achievement, of infinite wisdom. To us they seem to be intimate friends, always at peace, breathing the same spirit, and seeking the same end. By God's mercy, we understand not a blind instinctive compassion, which forgives without reflection, and without regard to the interests of virtue. This, we acknowledge, would be incompatible with justice, and also with enlightened benevolence. God's mercy, as we understand it, desires strongly the happiness of the guilty, but only through their penitence. It has a regard to character as truly as his justice. It defers punishment, and suffers long, that the sinner may return to his duty, but leaves the impenitent and unyielding, to the fearful retribution threatened in God's Word.

To give our views of God in one word, we believe in his Parental character. We ascribe to him, not only the name, but the dispositions and principles of a father. We believe that he has a father's concern for his creatures, a father's desire for their improvement, a father's equity in proportioning his commands to their powers, a father's joy in their progress, a father's readiness to receive the penitent, and a father's justice for the incorrigible. We look upon this world as a place of education, in which he is training men by prosperity and adversity, by aids and obstructions, by conflicts of reason and passion, by motives to duty and temptations to sin, by a various discipline suited to free and moral beings, for union with himself, and for a sublime and ever-growing virtue in heaven.

Now, we object to the systems of religion, which prevail among us, that they are adverse, in a greater or

less degree, to these purifying, comforting, and honorable views of God, that they take from us our Father in heaven, and substitute for him a being, whom we cannot love if we would, and whom we ought not to love if we could. We object, particularly on this ground, to that system, which arrogates to itself the name of Orthodoxy, and which is now industriously propagated through our country. This system indeed takes various shapes, but in all it casts dishonor on the Creator. According to its old and genuine form, it teaches, that God brings us into life wholly depraved, so that under the innocent features of our childhood is hidden a nature averse to all good and propense to all evil, a nature which exposes us to God's displeasure and wrath, even before we have acquired power to understand our duties, or to reflect upon our actions. According to a more modern exposition, it teaches, that we came from the hands of our Maker with such a constitution, and are placed under such influences and circumstances, as to render certain and infallible the total depravity of every human being, from the first moment of his moral agency, and it also teaches, that the offence of the child, who brings into life this ceaseless tendency to unmingled crime, exposes him to the sentence of everlasting damnation. Now, according to the plainest principles of morality, we maintain, that a natural constitution of the mind, unfailingly disposing it to evil and to evil alone, would absolve it from guilt, that to give existence under this condition would argue unspeakable cruelty, and that to punish the sin of this unhappily constituted child with endless ruin, would be a wrong unparalleled by the most merciless despotism.

This system also teaches, that God selects from this corrupt mass a number to be saved, and plucks them, by a special influence, from the common ruin, that the rest of mankind, though left without that special grace which their conversion requires, are commanded to repent, under penalty of aggravated woe, and that forgiveness is promised them, on terms which their very constitution infallibly disposes them to reject, and in rejecting which they awfully enhance the punishments of hell. These proffers of forgiveness and exhortations of amendment,

51 that system, Calvinism

to beings born under a blighting curse, fill our minds with a horror which we want words to express.

That this religious system does not produce all the effects on character, which might be anticipated, we most joyfully admit. It is often, very often, counteracted by nature, conscience, common sense, by the general strain of Scripture, by the mild example and precepts of Christ, and by the many positive declarations of God's universal kindness and perfect equity. But still we think that we see its unhappy influence. It tends to discourage the timid, to give excuses to the bad, to feed the vanity of the fanatical, and to offer shelter to the bad feelings of the malignant. By shocking, as it does, the fundamental principles of morality, and by exhibiting a severe and partial Deity, it tends strongly to pervert the moral faculty, to form a gloomy, forbidding, and servile religion, and to lead men to substitute censoriousness, bitterness, and persecution, for a tender and impartial charity. We think, too, that this system, which begins with degrading human nature, may be expected to end in pride, for pride grows out of a consciousness of high distinctions, however obtained, and no distinction is so great as that which is made between the elected and abandoned of God.

The false and dishonorable views of God, which have now been stated, we feel ourselves bound to resist unceasingly. Other errors we can pass over with comparative indifference. But we ask our opponents to leave to us a GOD, worthy of our love and trust, in whom our moral sentiments may delight, in whom our weaknesses and sorrows may find refuge. We cling to the Divine perfections. We meet them everywhere in creation, we read them in the Scriptures, we see a lovely image of them in Jesus Christ; and gratitude, love, and veneration call on us to assert them. Reproached, as we often are, by men, it is our consolation and happiness, that one of our chief offences is the zeal with which we vindicate the dishonored goodness and rectitude of God.

4 Having thus spoken of the unity of God, of the unity of Jesus, and his inferiority to God, and of the perfections of the Divine character; I now proceed to give our views of the mediation of Christ, and of the purposes of his mission. With regard to the great object which Jesus came to accomplish, there seems to be no possibility of mistake. We believe, that he was sent by the Father to effect a moral, or spiritual deliverance of

mankind, that is, to rescue men from sin and its consequences, and to bring them to a state of everlasting purity and happiness. We believe, too, that he accomplishes this sublime purpose by a variety of methods; by his instructions respecting God's unity, parental character, and moral government, which are admirably fitted to reclaim the world from idolatry and impiety, to the knowledge, love, and obedience of the Creator, by his promises of pardon to the penitent, and of divine assistance to those who labor for progress in moral excellence; by the light which he has thrown on the path of duty, by his own spotless example, in which the loveliness and sublimity of virtue shine forth to warm and quicken, as well as guide us to perfection, by his threatenings against incorrigible guilt, by his glorious discoveries of immortality, by his sufferings and death; by that signal event, the resurrection, which powerfully bore witness to his divine mission, and brought down to men's senses a future life, by his continual intercession, which obtains for us spiritual aid and blessings, and by the power with which he is invested of raising the dead, judging the world, and conferring the everlasting rewards promised to the faithful.

We have no desire to conceal the fact, that a difference of opinion exists among us, in regard to an interesting part of Christ's mediation; I mean, in regard to the precise influence of his death on our forgiveness. Many suppose, that this event contributes to our pardon, as it was a principal means of confirming his religion, and of giving it a power over the mind; in other words, that it procures forgiveness by leading to that repentance and virtue, which is the great and only condition on which forgiveness is bestowed. Many of us are dissatisfied with this explanation, and think that the Scriptures ascribe the remission of sins to Christ's death, with an emphasis so peculiar, that we ought to consider this event as having a special influence in removing punishment, though the Scriptures may not reveal the way in which it contributes to this end.

Whilst, however, we differ in explaining the connexion between Christ's death and human forgiveness, a connexion which we all gratefully acknowledge, we agree in rejecting many sentiments which prevail

regard to his mediation. The idea, which is conveyed to common minds by the popular system, that Christ's death has an influence in making God placable, or merciful, in awakening his kindness towards men, we reject with strong disapprobation. We are happy to find, that this very dishonorable notion is disowned by intelligent Christians of that class from which we differ. We recollect, however, that, not long ago, it was common to hear of Christ, as having died to appease God's wrath, and to pay the debt of sinners to his inflexible justice, and we have a strong persuasion that the language of popular religious books, and the common mode of stating the doctrine of Christ's mediation, still communicate very degrading views of God's character. They give to multitudes the impression, that the death of Jesus produces a change in the mind of God towards man, and that in this its efficacy chiefly consists. No error seems to us more pernicious. We can endure no shade over the pure goodness of God. We earnestly maintain, that Jesus, instead of calling forth, in any way or degree, the mercy of the Father, was sent by that mercy, to be our Saviour, that he is nothing to the human race, but what he is by God's appointment, that he communicates nothing but what God empowers him to bestow, that our Father in heaven is originally, essentially, and eternally placable, and disposed to forgive, and that his unborrowed, underived, and unchangeable love is the only fountain of what flows to us through his Son. We conceive, that Jesus is dishonored, not glorified, by ascribing to him an influence, which clouds the splendor of Divine benevolence.

We farther agree in rejecting, as unscriptural and absurd, the explanation given by the popular system, of the manner in which Christ's death procures forgiveness for men. This system used to teach as its fundamental principle, that man, having sinned against an infinite Being, has contracted infinite guilt, and is consequently exposed to an infinite penalty. We believe, however, that this reasoning, if reasoning it may be called, which overlooks the obvious maxim, that the guilt of a being must be proportioned to his nature and powers, has fallen into disuse. Still the system teaches, that sin, of whatever degree, exposes to endless punishment, and that the whole human race, being infallibly involved by their nature in sin, owe this awful penalty to the justice of their Creator. It teaches, that this penalty cannot be

*Channing's Church,
Federal Street, Boston*

remitted, in consistency with the honor of the divine law, unless a substitute be found to endure it or to suffer an equivalent. It also teaches, that, from the nature of the case, no substitute is adequate to this work, save the infinite God himself, and accordingly, God, in his second person, took on him human nature, that he might pay to his own justice the debt of punishment incurred by men, and might thus reconcile forgiveness with the claims and threatenings of his law. Such is the prevalent system. Now, to us, this doctrine seems to carry on its front strong marks of absurdity; and we maintain that Christianity ought not to be encumbered with it, unless it be laid down in the New Testament fully and expressly. We ask our adversaries, then, to point to some plain passages where it is taught. We ask for one text, in which we are told, that God took human nature that he might make an infinite satisfaction to his own justice, for one text, which tells us, that human guilt requires an infinite substitute; that Christ's sufferings owe their efficacy to their being borne by an infinite being; or that his divine nature gives infinite value to the sufferings of the human. Not *one word* of this description can we find in the Scriptures; not a text, which even hints at these strange doctrines. They are altogether, we believe, the fictions of theologians. Christianity is in no degree responsible for them. We are astonished at their prevalence. What can be plainer, than that God cannot, in any sense, be a sufferer, or bear a penalty in the room of his creatures? How dishonorable to him is the supposition, that his justice is now so severe, as to exact infinite punishment for the sins of frail and feeble men, and now so easy and yielding, as to accept the limited pains of Christ's human soul, as a full equivalent for the endless woes due from the world? How plain is it also, according to this doctrine, that God, instead of being plenteous in forgive-

ness, never forgives; for it seems absurd to speak of men as forgiven, when their whole punishment, or an equivalent to it, is borne by a substitute? A scheme more fitted to obscure the brightness of Christianity and the mercy of God, or less suited to give comfort to a guilty and troubled mind, could not, we think, be easily framed

We believe, too, that this system is unfavorable to the character. It naturally leads men to think, that Christ came to change God's mind rather than their own; that the highest object of his mission was to avert punishment, rather than to communicate holiness, and that a large part of religion consists in disparaging good works and human virtue, for the purpose of magnifying the value of Christ's vicarious sufferings. In this way, a sense of the infinite importance and indispensable necessity of personal improvement is weakened, and high-sounding praises of Christ's cross seem often to be substituted for obedience to his precepts. For ourselves, we have not so learned Jesus. Whilst we gratefully acknowledge, that he came to rescue us from punishment, we believe, that he was sent on a still nobler errand, namely, to deliver us from sin itself, and to form us to a sublime and heavenly virtue. We regard him as a Saviour, chiefly as he is the light, physician, and guide of the dark, diseased, and wandering mind. No influence in the universe seems to us so glorious, as that over the character, and no redemption so worthy of thankfulness, as the restoration of the soul to purity. Without this, pardon, were it possible, would be of little value. Why pluck the sinner from hell, if a hell be left to burn in his own breast? Why raise him to heaven, if he remain a stranger to its sanctity and love? With these impressions, we are accustomed to value the Gospel chiefly as it abounds in effectual aids, motives, excitements to a generous and divine virtue. In this virtue, as in a common centre, we see all its doctrines, precepts, promises meet, and we believe, that faith in this religion is of no worth, and contributes nothing to salvation, any farther than as it uses these doctrines, precepts, promises, and the whole life, character, sufferings, and triumphs of Jesus, as the means of purifying the mind, of changing it into the likeness of his celestial excellence

5. Having thus stated our views of the highest object of Christ's mission, that it is the recovery of men to virtue, or holiness, I shall now, in the last place, give

our views of the nature of Christian virtue, or true holiness. We believe that all virtue has its foundation in the moral nature of man, that is, in conscience, or his sense of duty, and in the power of forming his temper and life according to conscience. We believe that these moral faculties are the grounds of responsibility, and the highest distinctions of human nature, and that no act is praiseworthy, any farther than it springs from their exertion. We believe, that no dispositions infused into us without our own moral activity, are of the nature of virtue, and therefore, we reject the doctrine of irresistible divine influence on the human mind, moulding it into goodness, as marble is hewn into a statue. Such goodness, if this word may be used, would not be the object of moral approbation, any more than the instinctive affections of inferior animals, or the constitutional amiableness of human beings.

By these remarks, we do not mean to deny the importance of God's aid or Spirit, but by his Spirit, we mean a moral, illuminating, and persuasive influence, not physical, not compulsory, not involving a necessity of virtue. We object, strongly, to the idea of many Christians respecting man's impotence and God's irresistible agency on the heart, believing that they subvert our responsibility and the laws of our moral nature, that they make men machines, that they cast on God the blame of all evil deeds, that they discourage good minds, and inflate the fanatical with wild conceits of immediate and sensible inspiration

Among the virtues, we give the first place to the love of God. We believe, that this principle is the true end and happiness of our being, that we were made for union with our Creator, that his infinite perfection is the only sufficient object and true resting-place for the insatiable desires and unlimited capacities of the human mind, and that, without him, our noblest sentiments, admiration, veneration, hope, and love, would wither and decay. We believe, too, that the love of God is not only essential to happiness, but to the strength and perfection of all the virtues; that conscience, without the sanction of God's authority and retributive justice would be a weak director; that benevolence, unless nourished by communion with his goodness, and encouraged by his smile, could not thrive amidst the selfishness and thanklessness of the world, and that self-government without a sense of the divine inspection, would hardl

extend beyond an outward and partial purity. God, as he is essentially goodness, holiness, justice, and virtue, so he is the life, motive, and sustainer of virtue in the human soul.

But, whilst we earnestly inculcate the love of God, we believe that great care is necessary to distinguish it from counterfeits. We think that much which is called piety is worthless. Many have fallen into the error, that there can be no excess in feelings which have God for their object; and, distrusting as coldness that self-possession, without which virtue and devotion lose all their dignity, they have abandoned themselves to extravagances, which have brought contempt on piety. Most certainly, if the love of God be that which often bears its name, the less we have of it the better. If religion be the shipwreck of understanding, we cannot keep too far from it. On this subject, we always speak plainly. We cannot sacrifice our reason to the reputation of zeal. We owe it to truth and religion to maintain, that fanaticism, partial insanity, sudden impressions, and ungovernable transports, are any thing rather than piety.

We conceive, that the true love of God is a moral sentiment, founded on a clear perception, and consisting in a high esteem and veneration, of his moral perfections. Thus, it perfectly coincides, and is in fact the same thing, with the love of virtue, rectitude, and goodness. You will easily judge, then, what we esteem the surest and only decisive signs of piety. We lay no stress on strong excitements. We esteem him, and him only a pious man, who practically conforms to God's moral perfections and government; who shows his delight in God's benevolence, by loving and serving his neighbour; his delight in God's justice, by being resolutely upright; his sense of God's purity, by regulating his thoughts, imagination, and desires, and whose conversation, business, and domestic life are swayed by a regard to God's presence and authority. In all things else men may deceive themselves. Disordered nerves may give them strange sights, and sounds, and impressions. Texts of Scripture may come to them as from Heaven. Their whole souls may be moved, and their confidence in God's favor be undoubting. But in all this there is no religion. The question is, Do they love God's commands, in which his character is fully expressed, and give up to these their habits and passions? Without this, ecstasy

is a mockery. One surrender of desire to God's will, is worth a thousand transports. We do not judge of the bent of men's minds by their raptures, any more than we judge of the natural direction of a tree during a storm. We rather suspect loud profession, for we have observed, that deep feeling is generally noiseless, and least seeks display.

We would not, by these remarks, be understood as wishing to exclude from religion warmth, and even transport. We honor, and highly value, true religious sensibility. We believe, that Christianity is intended to act powerfully on our whole nature, on the heart as well as the understanding and the conscience. We conceive of heaven as a state where the love of God will be exalted into an unbounded fervor and joy, and we desire, in our pilgrimage here, to drink into the spirit of that better world. But we think, that religious warmth is only to be valued, when it springs naturally from an improved character, when it comes unforced, when it is the recompense of obedience, when it is the warmth of a mind which understands God by being like him, and when, instead of disordering, it exalts the understanding, invigorates conscience, gives a pleasure to common duties, and is seen to exist in connexion with cheerfulness, judiciousness, and a reasonable frame of mind. When we observe a fervor, called religious, in men whose general character expresses little refinement and elevation, and whose piety seems at war with reason, we pay it little respect. We honor religion too much to give its sacred name to a feverish, forced, fluctuating zeal, which has little power over the life.

Another important branch of virtue, we believe to be love to Christ. The greatness of the work of Jesus, the spirit with which he executed it, and the sufferings which he bore for our salvation, we feel to be strong claims on our gratitude and veneration. We see in nature no beauty to be compared with the loveliness of his character, nor do we find on earth a benefactor to whom we owe an equal debt. We read his history with delight, and learn from it the perfection of our nature. We are

29 We . . . excitements. Late in life, asked whether or not he had ever experienced conversion, Channing replied, "I should say not, unless the whole of my life may be called, as it truly has been a process of conversion." He merits comparison in this respect with Edwards, Chauncy, and Cartwright (see pp. 159-184, 184-188, 430-435).

particularly touched by his death, which was endured for our redemption, and by that strength of charity which triumphed over his pains. His resurrection is the foundation of our hope of immortality. His intercession gives us boldness to draw nigh to the throne of grace, and we look up to heaven with new desire, when we think, that, if we follow him here, we shall there see his benignant countenance, and enjoy his friendship for ever.

I need not express to you our views on the subject of
10 the benevolent virtues. We attach such importance to these, that we are sometimes reproached with exalting them above piety. We regard the spirit of love, charity, meekness, forgiveness, liberality, and beneficence, as the badge and distinction of Christians, as the brightest image we can bear of God, as the best proof of piety. On this subject, I need not, and cannot enlarge, but there is one branch of benevolence which I ought not to pass over in silence, because we think that we conceive of it more highly and justly than many of our
20 brethren. I refer to the duty of candor, charitable judgment, especially towards those who differ in religious opinion. We think, that in nothing have Christians so widely departed from their religion, as in this particular. We read with astonishment and horror, the history of the church; and sometimes when we look back on the fires of persecution, and on the zeal of Christians, in building up walls of separation, and in giving up one another to perdition, we feel as if we were reading the records of an infernal, rather than a heavenly kingdom.
30 An enemy to every religion, if asked to describe a Christian, would, with some show of reason, depict him as an idolater of his own distinguishing opinions, covered with badges of party, shutting his eyes on the virtues, and his ears on the arguments, of his opponents, arrogating all excellence to his own sect and all saving power to his own creed, sheltering under the name of pious zeal the love of domination, the conceit of infallibility, and the spirit of intolerance, and trampling on men's rights under the pretence of saving their souls.

40 We can hardly conceive of a plainer obligation on beings of our frail and fallible nature, who are instructed in the duty of candid judgment, than to abstain from condemning men of apparent conscientiousness and sincerity, who are chargeable with no crime but that of differing from us in the interpretation of the Scriptures, and differing, too, on topics of great and acknowledged

obscurity. We are astonished at the hardihood of those, who, with Christ's warnings sounding in their ears, take on them the responsibility of making creeds for his church, and cast out professors of virtuous lives for imagined errors, for the guilt of thinking for themselves. We know that zeal for truth is the cover for this usurpation of Christ's prerogative, but we think that zeal for truth, as it is called, is very suspicious, except in men, whose capacities and advantages, whose patient deliberation, and whose improvements in humility, mildness, and candor, give them a right to hope that their views are more just than those of their neighbors. Much of what passes for a zeal for truth, we look upon with little respect, for it often appears to thrive most luxuriantly where other virtues shoot up thinly and feebly, and we have no gratitude for those reformers, who would force upon us a doctrine which has not sweetened their own tempers, or made them better men than their neighbours.

We are accustomed to think much of the difficulties attending religious inquiries, difficulties springing from the slow development of our minds, from the power of early impressions, from the state of society, from human authority, from the general neglect of the reasoning powers, from the want of just principles of criticism and of important helps in interpreting Scripture, and from various other causes. We find, that on no subject have men, and even good men, ingrafted so many strange conceits, wild theories, and fictions of fancy, as on religion, and remembering, as we do, that we ourselves are sharers of the common frailty, we dare not assume infallibility in the treatment of our fellow-Christians, or encourage in common Christians, who have little time for investigation, the habit of denouncing and contemning other denominations, perhaps more enlightened and virtuous than their own. Charity, forbearance, a delight in the virtues of different sects, a backwardness to censure and condemn, these are virtues which, however poorly practised by us, we admire and recommend, and we would rather join ourselves to the church in which they abound, than to any other communion, however elated with the belief of its own orthodoxy, however strict in guarding its creed, however burning with zeal against imagined error.

I have thus given the distinguishing views of those Christians in whose names I have spoken. We have embraced this system, not hastily or lightly, but after

much deliberation; and we hold it fast, not merely because we believe it to be true, but because we regard it as purifying truth, as a doctrine according to godliness, as able to "work mightily" and to "bring forth fruit" in them who believe. That we wish to spread it, we have no desire to conceal; but we think, that we wish its diffusion, because we regard it as more friendly to practical piety and pure morals than the opposite doctrines, because it gives clearer and nobler views of duty, and stronger motives to its performance, because it recommends religion at once to the understanding and the heart, because it asserts the lovely and venerable attributes of God, because it tends to restore the benevolent spirit of Jesus to his divided and afflicted church, and because it cuts off every hope of God's favor, except that which springs from practical conformity to the life and precepts of Christ. We see nothing in our views to give offence, save their purity, and it is their purity which makes us seek and hope their extension through the world.

My friend and brother,—You are this day to take upon you important duties, to be clothed with an office, which the Son of God did not disdain, to devote yourself to that religion, which the most hallowed lips have preached, and the most precious blood sealed. We trust that you will bring to this work a willing mind, a firm purpose, a martyr's spirit, a readiness to toil and suffer for the truth, a devotion of your best powers to the interests of piety and virtue. I have spoken of the doctrines which you will probably preach; but I do not mean, that you are to give yourself to controversy. You will remember, that good practice is the end of preaching, and will labor to make your people holy livers, rather than skilful disputants. Be careful, lest the desire of defending what you deem truth, and of repelling reproach and misrepresentation, turn you aside from your great business, which is to fix in men's minds a living conviction of the obligation, sublimity, and happiness of Christian virtue. The best way to vindicate your sentiments, is to show, in your preaching and life, their intimate connexion with Christian morals, with a high and delicate sense of duty, with candor towards your opposers, with inflexible integrity, and with an habitual reverence for God. If any light can pierce and scatter the clouds of prejudice, it is that of a pure example. My brother, may

your life preach more loudly than your lips. Be to this people a pattern of all good works, and may your instructions derive authority from a well-grounded belief in your hearers, that you speak from the heart, that you preach from experience, that the truth which you dispense has wrought powerfully in your own heart, that God, and Jesus, and heaven, are not merely words on your lips, but most affecting realities to your mind, and springs of hope and consolation, and strength, in all your trials. Thus laboring, may you reap abundantly, and have a testimony of your faithfulness, not only in your own conscience, but in the esteem, love, virtues, and improvements of your people.

To all who hear me, I would say, with the Apostle, Prove all things, hold fast that which is good. Do not, brethren, shrink from the duty of searching God's Word for yourselves, through fear of human censure and denunciation. Do not think, that you may innocently follow the opinions which prevail around you, without investigation, on the ground, that Christianity is now so purified from errors, as to need no laborious research. There is much reason to believe, that Christianity is at this moment dishonored by gross and cherished corruptions. If you remember the darkness which hung over the Gospel for ages, if you consider the impure union, which still subsists in almost every Christian country, between the church and state, and which enlists men's selfishness and ambition on the side of established error; if you recollect in what degree the spirit of intolerance has checked free inquiry, not only before, but since the Reformation, you will see that Christianity cannot have freed itself from all the human inventions, which disfigured it under the Papal tyranny. No. Much stubble is yet to be burned, more rubbish to be removed; many gaudy decorations, which a false taste has hung around Christianity, must be swept away, and the earth-born fogs, which have long shrouded it, must be scattered, before this divine fabric will rise before us in its native and awful majesty, in its harmonious proportions, in its mild and celestial splendors. This glorious reformation in the church, we hope, under God's blessing, from the progress of the human intellect, from the moral progress of society, from the consequent decline of prejudice and bigotry, and, though last not least, from the subversion of human authority in matters of religion, from the fall of those hierarchies, and other

human institutions, by which the minds of individuals are oppressed under the weight of numbers, and a Papal dominion is perpetuated in the Protestant church. Our earnest prayer to God is, that he will overturn, and overturn, and overturn the strongholds of spiritual usurpation, until HE shall come, whose right it is to rule the minds of men; that the conspiracy of ages against the

liberty of Christians may be brought to an end; that the servile assent, so long yielded to human creeds, may give place to honest and devout inquiry into the Scriptures; and that Christianity, thus purified from error, may put forth its almighty energy, and prove itself, by its ennobling influence on the mind, to be indeed "the power of God unto salvation"

1819

Peter Cartwright

1785 • 1872

About 1800, thanks to the camp meeting, an ingenious new method of bringing religion to the sparsely settled frontier, eastern Tennessee and Kentucky felt the first effects of a great religious revival. In the next few years it attained enormous proportions and probably had a greater effect upon the religious life of America than did the "Great Awakening" (see pp 19-20) sixty years earlier. In tumultuous open-air gatherings, marked by "jerks," "shouting," and other obvious signs of emotional release, what was then the West adopted by acclamation an evangelical faith in which there was much excitement and little subtlety. It dramatized the good life as open battle with sin—drinking, fighting, vice, and unbelief, it promised the repentant sinner rewards appropriate to good behavior.

From the new demand that religion should be exciting and dramatic the Methodists profited most, because they perfected an organization which was the quintessence of drama—the circuit-rider system. Peter Cartwright, perhaps the most colorful of the circuit riders, was converted to Methodism in 1801. He was then a

large-framed and spirited sixteen-year-old, uneducated except in the wiles of card-playing and dance steps. Born in Virginia, he had moved with his family to Kentucky when he was five and had grown up in Logan County, near the Tennessee border. Physically powerful, quick-witted, and, after his conversion, naively certain of what was good and what was evil, he was soon a preacher made for his time and place. "I do not wish," he wrote in later life, "to undervalue education, but really I have seen so many of these educated preachers who forcibly reminded me of lettuce growing under the shade of peach-tree, or like a gosling that had got the straddle by wading in the dew, that I turn away sick and faint. Like many of his fellow workers and successors, Cartwright was a believer in direct methods when sweet persuasion failed; he could fight guile with guile, but rather enjoyed using his fists. "In general," he once remarked, "I have made it a rule not to back down to the devil or his imps, whether he appears in male or female form."

From the time he was eighteen Cartwright traveled

his appointed circuit, in Tennessee or Ohio or Kentucky. In 1824, distressed by slavery, he asked to be transferred to Illinois, where he was a leader in his church and in politics for nearly fifty years. Twice he was elected to the state legislature, in 1846 he was defeated in a campaign for election to the national House of Representatives by an "infidel" opponent, Abraham Lincoln. Methodism he defined as the preaching of the gospel by itinerant preachers, and he distrusted any move toward a settled ministry and any apparent desertion of the Bible. Doctrinally he was unimportant, although he occasionally attacked the theology of competing denomi-

nations, notably in a famous letter "To the Right Honorable, the Devil," whom he pictures as enjoying the predestinarian preaching of the Presbyterians. In practical religion or morality, however, he was a guiding light, famous for his shrewdness and his mother wit. His writing, although far from polished, is direct, vivid, and dramatic.

Autobiography of Peter Cartwright, the Backwoods Preacher, ed. W. P. Strickland, New York, 1856 • *Fifty Years as a Presiding Elder*, ed. Rev. W. S. Hooper, Cincinnati, 1871

From the

Autobiography

Cartwright's autobiography is a long, ill-organized, often ungrammatical book, in which anecdotes are inserted with little apparent art. In the Preface he expressed his regret that he had not kept a journal, as he had once started to do, and thus avoided many imperfections and inaccuracies. Nevertheless, his account of his experiences very probably retains the qualities which made his sermons famous, especially his flair for effective illustration and his use of dialogue, suspense, and climax.

At the close of this conference year, 1806, I met the Kentucky preachers at Lexington, and headed by William Burke, about twenty of us started for conference, which was held in East Tennessee, at Ebenezer Church, Nollichuckie, September 15th. Our membership had increased to twelve thousand six hundred and seventy, our net increase was about eight hundred

This year another presiding-elder district was added to the Western Conference, called the Mississippi District. The number of our traveling preachers increased¹⁰ from thirty-eight to forty-nine. Bishop Asbury attended the Conference. There were thirteen of us elected and ordained deacons. According to the printed Minutes, this was placed in 1807, but it was in the fall of 1806. Two years before there were eighteen of us admitted on trial, that number, in this short space of time, had fallen to thirteen, the other five were discontinued at their own request, or from sickness, or were reduced to suffering circumstances, and compelled to desist from traveling for want of the means of support.

I think I received about forty dollars this year, but many of our preachers did not receive half that amount. These were hard times in those Western wilds; *many*, very *many*, pious and useful preachers, were literally starved into a location. I do not mean that they were starved for want of food, for although it was rough, yet the preachers generally got enough to eat. But they did not generally receive in a whole year money enough to get them a suit of clothes, and if people, and preachers too, had not dressed in home-spun clothing, and the good³⁰

Text the edition of 1856, edited by W. P. Strickland • 2 William Burke (1770-1855), first secretary of the Western Conference of the Methodist Episcopal Church, 1800-1811 • 5 Nollichuckie, a river and settlement in the present Greene County, east of Knoxville • 11 Bishop Asbury, Francis Asbury (1745-1816), the chief organizer of the Methodist Church in America

sisters had not made and presented their preachers with clothing, they generally must retire from itinerant life, and go to work and clothe themselves. Money was very scarce in the country at this early day, but some of the best men God ever made, breasted the storms, endured poverty, and triumphantly planted Methodism in this Western world.

When we were ordained deacons at this Conference, Bishop Asbury presented me with a parchment certifying my ordination in the following words, namely

"Know all by these presents, That I, Francis Asbury, *Bishop of the Methodist Episcopal Church* in America, under the protection of Almighty God, and with a single eye to his glory, by the imposition of my hands and prayer, have this day set apart Peter Cartwright for the office of a DEACON in the said Methodist Episcopal Church, a man whom I judge to be well qualified for that work, and do hereby recommend him to all whom it may concern, as a proper person to administer the ordinances of baptism, marriage, and the burial of the dead, in the absence of an elder, and to feed the flock of Christ, so long as his spirit and practice are such as become the Gospel of Christ, and he continueth to hold fast the form of sound words, according to the established doctrine of the Gospel

"In testimony whereof, I have hereunto set my hand and seal this sixteenth day of September, in the year of our Lord one thousand eight hundred and six.

"FRANCIS ASBURY."

I had traveled from Zanesville, in Ohio, to East Tennessee to conference, a distance of over five hundred miles, and when our appointments were read out, I was sent to Marietta Circuit, almost right back, but still further east. Marietta was at the mouth of the Muskingum River, where it emptied into the Ohio. The circuit extended along the north bank of the Ohio, one hundred and fifty miles, crossed over the Ohio River, at the mouth of the Little Kanawha, and up that stream to Hughes River, then east to Middle Island. I suppose it was three hundred miles round. I had to cross the Ohio River four times every round.

It was a poor and hard circuit at that time. Marietta and the country round were settled at an early day by a colony of Yankees. At the time of my appointment I had never seen a Yankee, and I had heard dismal stories about them. It was said they lived almost entirely on

pumpkins, molasses, fat meat, and bohea tea; moreover, that they could not bear loud and zealous sermons, and they had brought on their learned preachers with them, and they read their sermons, and were always criticising us poor backwoods preachers. When my appointment was read out, it distressed me greatly. I went to Bishop Asbury and begged him to supply my place, and let me go home. The old father took me in his arms, and said

"O no, my son, go in the name of the Lord. It will make a man of you."

Ah, thought I, if this is the way to make men, I do not want to be a man. I cried over it bitterly, and prayed too. But on I started, cheered by my presiding elder, Brother J. Sale. If ever I saw hard times, surely it was this year; yet many of the people were kind, and treated me friendly. I had hard work to keep soul and body together. The first Methodist house I came to, I found the brother a Universalist. I crossed over the Muskingum River to Marietta. The first Methodist family I stopped with there, the lady was a member of the Methodist Episcopal Church, but a thorough Universalist. She was a thin-faced, Roman-nosed, loquacious Yankee, glib of the tongue, and you may depend on it, I had a hard race to keep up with her, though I found it a good school for it set me to reading my Bible. And here permit me to say, of all the isms that I ever heard of, they were here. These descendants of the Puritans were generally educated, but their ancestors were rigid predestinarians, and as they were sometimes favored with a little light on their moral powers, and could just "see men as tripping," they jumped into Deism, Universalism, Unitarianism, etc., etc. I verily believe it was the best school I ever entered. They waked me up on all sides, Methodism was feeble, and I had to battle or run, and I resolved on the former.

There was here in Marietta a preacher by the name of A. Sargent, he had been a Universalist preacher, finding such a motley gang, as I have above mentioned, he thought (and thought correctly too) that they were proper subjects for his imposture. Accordingly, he

47 bohea tea, black tea • 64 Universalist, a believer in the doctrine that all men will eventually repent of their sins, and so all will be saved. Individuals of many denominations (Charles Chauncy, for example) leaned toward this doctrine in the late eighteenth century. After 1779, separate Universalist churches were established in America.

sumed the name of Halcyon Church, and proclaimed himself the millennial messenger. He professed to see visions, fall into trances, and to converse with angels. His followers were numerous in the town and country. The Presbyterian and Congregational ministers were afraid of him. He had men preachers and women preachers. The Methodists had no meeting-house in Marietta. We had to preach in the court-house when we could get a chance. We battled pretty severely. The Congregationalists opened their Academy for me to preach in. I prepared myself, and gave battle to the Halcyons. This made a mighty commotion. In the meantime we had a camp-meeting in the suburbs of Marietta. Brother Sale, our presiding elder, was there. Mr. Sargent came, and hung around and wanted to preach, but Brother Sale never noticed him. I have said before that he professed to go into trances and have visions. He would swoon away, fall, and lay a long time, and when he would come to, he would tell what mighty things he had seen and heard.

On Sunday night, at our camp-meeting, Sargent got some powder, and lit a cigar, and then walked down to the bank of the river, one hundred yards, where stood a large stump. He put his powder on the stump, and touched it with his cigar. The flash of the powder was seen by many at the camp, at least the light. When the powder flashed, down fell Sargent, there he lay a good while. In the meantime, the people found him lying there, and gathered around him. At length he came to, and said he had a message from God to us Methodists. He said God had come down to him in a flash of light, and he fell under the power of God, and thus received his vision.

Seeing so many gathered around him there, I took a light, and went down to see what was going on. As soon as I came near the stump, I smelled the sulphur of the powder, and stepping up to the stump, there

was clearly the sign of powder, and hard by lay the cigar with which he had ignited it. He was now busy delivering his message. I stepped up to him, and asked him if an angel had appeared to him in that flash of light.

He said, "Yes."

Said I, "Sargent, did not that angel smell of brimstone?"

"Why," said he, "do you ask me such a foolish question?"

"Because," said I, "if an angel has spoken to you at all, he was from the lake that burneth with fire and brimstone!" and raising my voice, I said, "I smell sulphur now!" I walked up to the stump, and called on the people to come and see for themselves. The people rushed up, and soon saw through the trick, and began to abuse Sargent for a vile imposter. He soon left, and we were troubled no more with him or his brimstone angels.

I will beg leave to remark here, that while I was battling successfully against the Halcyons, I was treated with great respect by the Congregational minister and his people, and the Academy was always open for me to preach in, but as soon as I triumphed over and vanquished them, one of the elders of the Congregational Church waited on me, and informed me that it was not convenient for me to preach any more in their Academy. I begged the privilege to make one more appointment in the Academy, till I could get some other place to preach in. This favor, as it was only one more time, was granted.

I then prepared myself, and when my appointed day rolled around, the house was crowded, and I leveled my whole Arminian artillery against their Calvinism, and challenged their minister, who was present, to public debate, but he thought prudence the better part of valor, and declined. This effort secured me many friends, and some persecution, but my way was opened, and we raised a little class, and had a name among the living.

I will here mention a special case of wild fanaticism

2 millennial, pertaining to the thousand years of Satan's bondage mentioned in Revelation 20. The pertinent verse is the sixth: "Blessed and holy is he that hath part in the first resurrection: on such the second death hath no power, but they shall be priests of God and of Christ, and shall reign with him a thousand years" • 70 Arminian. See p. 15

that took place with one of these Halcyon preachers while I was on this circuit. He worked himself up into the belief that he could live so holy in this life, that his animal nature would become immortal, and that he would never die, and he conceived that he had gained this immortality, and could live without eating. In despite of all arguments and persuasion of his friends he refused to eat or drink. He stood it sixteen days and nights, and then died a suicidal death. His death put a stop to this foolish delusion, and threw a damper over the whole Halcyon fanaticism.

I will here state something like the circumstances I found myself in, at the close of my labors on this hard circuit. I had been from my father's house about three years, was five hundred miles from my home; my horse had gone blind, my saddle was worn out, my bridle reins had been eaten up and replaced, (after a sort) at least a dozen times, and my clothes had been patched till it was difficult to detect the original. I had concluded to try to make my way home, and get another outfit. I was in Marietta, and had just seventy-five cents in my pocket. How I would get home and pay my way I could not tell.

But it was of no use to parley about it; go I must, or do worse; so I concluded to go as far as I could, and then stop and work for more means, till I got home. I had some few friends on the way, but not many; so I cast ahead.

My first day's travel was through my circuit. At about thirty-five miles' distance there lived a brother, with whom I intended to stay all night. I started, and late in the evening, within five miles of my stopping-place, fell in with a widow lady, not a member of the Church, who lived several miles off my road. She had attended my appointments in that settlement all the year. After the usual salutations, she asked me if I was leaving the circuit.

I told her I was, and had started for my father's.

"Well," said she, "how are you off for money? I expect you have received but little on this circuit."

I told her I had but seventy-five cents in the world. She invited me home with her, and told me she would give me a little to help me on. But I told her I had my places fixed to stop every night till I got to Maysville, and if I went home with her, it would derange all my stages, and throw me among strangers. She then handed

me a dollar, saying it was all she had with her, but if I would go home with her she would give me more. I declined going with her, thanked her for the dollar, bade her farewell, moved on, and reached my lodging-place.

By the time I reached the Ohio River, opposite Mayville, my money was all gone. I was in trouble about how to get over the river, for I had nothing to pay my ferrriage.

I was acquainted with Brother J. Armstrong, a merchant in Maysville, and concluded to tell the ferryman that I had no money, but if he would ferry me over, I could borrow twenty-five cents from Armstrong, and would pay him. Just as I got to the bank of the river, landed, on my side, with a man and a horse, and when the man reached the bank, I saw it was Colonel Shelby, brother to Governor Shelby, of Kentucky. I was a lively exhorter in the Methodist Episcopal Church, and an old acquaintance and neighbor of my father's.

When he saw me he exclaimed

"Peter! is that you?"

"Yes, Moses," said I, "what little is left of me."

"Well," said he, "from your appearance you must have seen hard times. Are you trying to get home?"

"Yes," I answered

"How are you off for money, Peter?" said he

"Well, Moses," said I, "I have not a cent in the world."

"Well," said he, "here are three dollars, and I will give you a bill of the road and a letter of introduction till I get down into the barrens, at the Pilot Knobb."

You may be sure my spirits greatly rejoiced. I passed on very well for several days and nights on Colonel's money and credit, but when I came to the tavern beyond the Pilot Knobb my money was out. What to do I did not know, but I rode up and asked quarters. I told the landlord I had no money, had been three years from home, and was trying to get back to my father's. I also told him I had a little old watch, a few good books in my saddle-bags, and I would compensate him in some way. He bade me alight and be easy.

On inquiry I found this family had lived here from an early day, totally destitute of the Gospel and all

62 Governor Shelby, Isaac Shelby (1750-1826), first governor of Kentucky, 1792-1796

ligious privileges. There were three rooms in this habitation, below—the dining-room, and a back bedroom, and the kitchen. The kitchen was separated from the other lower rooms by a thin, plank partition, set up on an end; and the planks had shrunk and left considerable cracks between them.

When we were about to retire to bed, I asked the landlord if he had any objection to our praying before we laid down. He said, "None at all," and stepped into the kitchen, as I supposed, to bring in the family. He quickly returned with a candle in his hand, and said, "Follow me." I followed into the back bedroom. Whereupon he set down the candle, and bade me good night, saying, "There, you can pray as much as you please."

I stood, and felt foolish. He had completely ousted me, but it immediately occurred to me that I would kneel down and pray with full and open voice, so down I knelt, and commenced praying audibly. I soon found, from the commotion created in the kitchen, that they were taken by surprise as much as I had been. I distinctly heard the landlady say, "He is crazy, and will kill us all this night. Go, husband, and see what is the matter." But he was slow to approach, and when I ceased praying he came in, and asked me what was the cause of my acting in this strange way. I replied, "Sir, did you not give me the privilege to pray as much as I pleased?" "Yes," said he, "but I did not expect you would pray out." I told him I wanted the family to hear prayer, and as he had deprived me of that privilege, I knew of no better way to accomplish my object than to do as I had done, and I hoped he would not be offended.

I found he thought me deranged, but we fell into a free conversation on the subject of religion, and, I think, I fully satisfied him that I was not beside myself, but spoke forth the words of truth with soberness.

Next morning I rose early, intending to go fifteen miles to an acquaintance for breakfast, but as I was getting my horse out of the stable the landlord came out, and insisted that I should not leave till after breakfast. I yielded, but he would not have anything for my fare, and urged me to call on him if ever I traveled that way again. I will just say here, that in less than six months I called on this landlord, and he and his lady were happily converted, dating their conviction from the extraordinary circumstances of the memorable night I spent with them.

I found other friends on my journey till I reached Hopkinsville, Christian County, within thirty miles of my father's, and I had just six and a quarter cents left. This was a new and dreadfully wicked place. I put up at a tavern kept by an old Mr. M'. The landlord knew my father. I told him I had not money to pay my bill, but as soon as I got home I would send it to him. He said, "Very well," and made me welcome. His lady was a sister of the apostate Dr. Allen whom I have elsewhere mentioned.

Shortly after I laid down I fell asleep. Suddenly I was aroused by a piercing scream, or screams, of a female. I supposed that somebody was actually committing murder. I sprung from my bed, and, after getting half dressed, ran into the room from whence issued the piercing screams, and called out, "What's the matter here?" The old gentleman replied, that his wife was subject to spasms, and often had them. I commenced a conversation with her about religion. I found she was under deep concern about her soul. I asked if I might pray for her. "O, yes," she replied, "for there is no one in this place that cares for my soul."

I knelt and prayed, and then commenced singing, and directed her to Christ as an all-sufficient Saviour, and prayed again. She suddenly sprung out of the bed and shouted, "Glory to God! he has blessed my soul." It was a happy time indeed. The old gentleman wept like a child. We sung and shouted, prayed and praised, nearly all night. Next morning the old landlord told me my bill was paid tenfold, and that all he charged me was, every time I passed that way, to call and stay with them.

Next day I reached home with the six and a quarter cents unexpended. Thus I have given you a very imperfect little sketch of the early travel of a Methodist preacher in the Western Conference. My parents received me joyfully. I tarried with them several weeks. My father gave me a fresh horse, a bridle and saddle, some new clothes, and forty dollars in cash. Thus equipped, I was ready for another three years' absence.

1856

55 the apostate Dr. Allen, one of two Baptist ministers mentioned by Cartwright in Chap. 3. One embraced the "blasphemous doctrine" of Universalism, the other "took to open drunkenness, and with him his salvation by water expired." Which one was Allen is not clear.

Philip Freneau

1752 • 1832

Philip Freneau's relatively high rank in American literary history is based upon three different aspects of his work, none of which would by itself justify his being regarded as almost a major writer. Taken together, however, his poems of romantic fancy, his ballads and satires in behalf of American independence, and his work as editor in the interest of Jeffersonian Republicanism reveal a fluent, versatile, and sometimes powerful man of letters. That he never attained the height of genius was perhaps as much an accident of his time as of his talent.

In his youth Freneau had the advantages of wealth, as they were understood at that time in New York and New Jersey. When he entered Princeton at sixteen, he was well grounded in Latin and hoped to prepare for the ministry. In college, as the close friend of James Madison (later the fourth President of the United States), Hugh Henry Brackenridge (see p. 382), and

William Bradford (later second attorney general of United States), Freneau acquired Whig principles and literary ambitions. He began to write, imitating classics and the English poets. In collaboration with Brackenridge he wrote part of a novel, "Father Bom's Pilgrimage to Mecca in Arabia," and a Commencement poem, *The Rising Glory of America*. He had every reason to think the future would hold great things for him.

The next decade, however, brought unusual problems as well as the commonplace one of making a living (Freneau's family resources steadily dwindled after his father's death in 1767). Theology proved unsatisfactory, two ventures at teaching even more so. There was no livelihood in literature, although both the Commencement

Panel (l to r) The Boston, Plymouth, and Sandwich mail stage • a husking bee in New England • Summer scene

ment poem and one other, *The American Village*, were printed in 1772. For the next two years or more Freneau's movements are obscure. He was evidently restless, for, although he turned up in New York in 1775, writing satires against General Gage and the British, he was off the next year to the West Indies. For about two years he lived on Santa Cruz, in the Virgin Islands, writing some of his most fanciful poems: "The Jamaica Funeral," "The Beauties of Santa Cruz," and "The House of Night." In 1778, after several voyages to Bermuda and at least one tour of the lower Gulf of Mexico, he started back for New Jersey. His ship was captured off the Carolinas by the British, but he was permitted to land near his home and promptly enlisted in the militia. Capture, apparently, had brought the war close home to him. The *United States Magazine*, edited by Brackenridge, soon printed some of Freneau's best West Indian poems, together with "King George the Third's Soliloquy," but his work as a propagandist did not become important until 1780. By that time he had left the army to become a blockade runner and had made two more trips to the West Indies. He was starting out on a fourth voyage, this time as third mate, when he was captured and confined for six weeks on prison and hospital ships in New York Harbor. That experience made Freneau a boiling, bitter, hate-marked patriot, and *The British Prison-Ship* (1781) was followed by a flood of propaganda, most of it published in the *Freeman's Journal*, a Philadelphia weekly. In satire and in ballads he expressed the hopes and the hates of his countrymen.

The war over, Freneau turned again to the sea to make his living, and between 1784 and 1790 was engaged chiefly in coastwise shipping, most of the time as ship's captain. In port, at Charleston, Philadelphia, or New York, he occasionally offered a new poem to a newspaper or magazine, and he presumably found some satisfaction in seeing in his cabin *The Poems of Philip Freneau* (Philadelphia, 1786) and *The Miscellaneous Works of Mr. Philip Freneau Containing His Essays and Additional Poems* (Philadelphia, 1788).

In April 1790 Freneau married and settled in New York, to try once more to make his living as a writer. While editing the *Daily Advertiser*, he made plans to establish a country paper of his own in New Jersey. Through the influence of James Madison, however, he was offered a part-time clerkship as translator in the Department of State, under Jefferson. In October 1791,

encouraged by Madison and Jefferson, Freneau founded in Philadelphia the *National Gazette*, designed to rival the strongly Federalist *Gazette of the United States*, and to provide a focal point for the opposition to the policies of Alexander Hamilton. Freneau and his friends regarded the financial measures of Hamilton as favorable to the wealthy and dangerous to the common people, his frankness in saying so soon plunged him into the midst of the bitterest incidents attending the birth of party politics in the United States. He supported Jefferson with all the force of direct attack, satire, and abuse, and came to epitomize to Hamilton and his party the rabble-rousing journalist "That rascal Freneau!" Washington is reported to have exclaimed. In the end Freneau's enthusiasm for the French Revolution and his support of Citizen Genêt, after that gentleman had alienated even Jefferson, lost him support, and the *National Gazette* expired in the fall of 1793. There can be no doubt, however, of Freneau's mighty contribution to the establishment of party government and party journalism.

During the last thirty-nine years of his life, Freneau was in almost constant financial difficulty. His chief editorial ventures were on the *Jersey Chronicle* of Mount Pleasant in 1795-1796, where he published his "Tomo Cheeki" essays and failed to collect from his subscribers, and a New York periodical, *The Time-Piece; and Literary Companion*, in 1797-1798. In 1803-1807 he was forced once more to return to the sea. Before his death in a blizzard in 1832, he published three more collections of his work.

Although Freneau was obviously imitative in his forms and themes—most of the famous English poets of the eighteenth century were among his literary mentors—he is remembered for his discovery of American plants and birds, for his primitivistic idealization of the Indian, for his feeling for the sea, on which he spent so much of his life. As a precursor of Bryant, Emerson, Poe, Whittier, and Longfellow, he has historic interest; but he is memorable also for his revelation of himself—a man who lived in stirring, restless, difficult times, fighting, not always judiciously, for the ways of life in which he believed.

The Poems of Philip Freneau, ed. F. L. Pattee, 3 vols., Princeton, 1902-1907 • *Poems of Freneau*, ed. H. H. Clark, New York, 1929 • Lewis Leary, *That Rascal Freneau: A Study in Literary Failure*, New Brunswick, New Jersey, 1941

The Power of Fancy

"The Power of Fancy" is perhaps the most interesting of the poems which Freneau wrote as an undergraduate at Princeton. The many literary allusions emphasize his reading of the classics, and the delight in distant places exemplifies his romantic tendency. His concept of poetic fancy, which is characteristic of eighteenth-century thought, was probably derived from the "Ode to Fancy" by Joseph Warton (1722-1800), one of the earliest of English "romantic" poets (see H. H. Clark, "Literary Influences on Philip Freneau," *Studies in Philology*, January 1925). Freneau's enthusiasm for Milton, and especially for "Il Penseroso," is more self-evident (see T. P. Haviland, "A Measure for the Early Freneau's Debt to Milton," *Publications of the Modern Language Association*, December 1940)

WAKEFUL, vagrant, restless thing,
Ever wandering on the wing,
Who thy wondrous source can find,
FANCY, regent of the mind;
A spark from Jove's resplendent throne,
But thy nature all unknown.

THIS spark of bright, celestial flame,
From Jove's seraphic altar came,
And hence alone in man we trace,
Resemblance to the immortal race.

Ah! what is all this mighty WHOLE,
These suns and stars that round us roll!
What are they all, where'er they shine,
But *Fancies* of the Power Divine!
What is this *globe*, these *lands*, and *seas*,
And *heat*, and *cold*, and *flowers*, and *trees*,
And *life*, and *death*, and *beast*, and *man*,
And *time*,—that with the *sun* began—
But thoughts on reason's scale combin'd,
Ideas of the Almighty mind?

On the surface of the brain
Night after night she walks unseen,
Noble fabrics doth she raise
In the woods or on the seas,
On some high, steep, pointed rock,

Where the billows loudly knock
And the dreary tempests sweep
Clouds along the uncivil deep.

Lo! she walks upon the moon,
Listens to the chimy tune
Of the bright, harmonious spheres,
And the song of angels hears;
Sees this earth a distant star,
Pendant, floating in the air,
Leads me to some lonely dome,
Where Religion loves to come,
Where the bride of Jesus dwells,
And the deep ton'd organ swells
In notes with lofty anthems join'd,
Notes that half distract the mind.

Now like lightning she descends
To the prison of the fiends,
Hears the rattling of their chains,
Feels their never ceasing pains—
But, O never may she tell
Half the frightfulness of hell.

Now she views Arcadian rocks,
Where the shepherds guard their flocks,
And, while yet her wings she spreads,
Sees chrystal streams and coral beds,
Wanders to some desert deep,
Or some dark, enchanted steep,
By the full moon light doth shew
Forests of a dusky blue,
Where, upon some mossy bed,
Innocence reclines her head.

SWIFT, she stretches o'er the seas
To the far off Hebrides,
Canvas on the lofty mast

Text: the 1786 edition. In the 1795 edition and thereafter Freneau printed ll. 1-20 and 141-154 as "Ode to Fancy," using the remainder in a much-revised form, for a poem entitled "Fancy's Ramble" (ll. 20 *Ideas* . . . *mind*). The notion here, essentially Platonic, was common in the eighteenth-century philosophy. The emphasis on reason in line 19 and the implications of the line preceding are evidence of Freneau's Deistic ideas (p. 216). • 30 *chimy* . . . *spheres*. The Aristotelian and Ptolemaic systems conceived of the universe as a succession of concentric spheres, something like the layers of an onion, which as they rubbed together, produced a mighty musical harmony. • 33 *st* "Milton's *Paradise Lost*, B. II, v. 1052."—Freneau. • 47 *Arcadian*, pastoral, from a mountainous area in ancient Greece, praised by the poets for its idyllic simplicity. • 58 *Hebrides*, islands off the coast of Scotland.

Could not travel half so fast—
 Swifter than the eagle's flight
 Or instantaneous rays of light!
 Lo' contemplative she stands
 On Norwegia's rocky lands—
 Fickle Goddess, set me down
 Where the rugged winters frown
 Upon Orca's howling steep,
 Nodding o'er the northern deep,
 Where the winds tumultuous roar,
 Vext that *Ossian* sings no more.
 Fancy, to that land repair,
 Sweetest *Ossian* slumbers there;
 Waft me far to southern isles
 Where the soften'd winter smiles,
 To Bermuda's orange shades,
 Or Demarara's lovely glades;
 Bear me o'er the sounding cape,
 Painting death in every shape,
 Where daring *Anson* spread the sail
 Shatter'd by the stormy gale—
 Lo' she leads me wide and far,
 Sense can never follow her—
 Shape thy course o'er land and sea,
 Help me to keep pace with thee,
 Lead me to yon chalky cliff,
 Over rock and over reef.
 Into Britain's fertile land,
 Stretching far her proud command.
 Look back and view, thro' many a year,
 Cæsar, Julius Cæsar, there
 Now to Tempe's verdant wood,
 Over the mid ocean flood
 Lo' the islands of the sea
 —Sappho, Lesbos mourns for thee
 Greece, arouse thy humbled head,
 Where are all thy mighty dead,
 Who states to endless ruin hurl'd
 And carried vengeance through the world?—
 Troy, thy vanish'd pomp resume,
 Or, weeping at thy Hector's tomb,
 Yet those faded scenes renew,
 Whose memory is to *Homer* due.
 Fancy, lead me wandering still
 Up to *Ida's* cloud-topt hill;
 Not a laurel there doth grow

60 But in vision thou shalt show,—
 Every sprig on *Virgil's* tomb
 Shall in livelier colours bloom,
 And every triumph Rome has seen
 Flourish on the years between. 110
 Now she bears me far away
 In the east to meet the day,
 Leads me over *Ganges* streams,
 Mother of the morning beams—
 O'er the ocean hath she ran,
 70 Places me on *Timan*;
 Farther, farther in the east,
 Till it almost meets the west,
 Let us wandering both be lost
 On *Taitis* sea-beat coast, 120
 Bear me from that distant strand,
 Over ocean, over land,
 To *California's* golden shore—
 Fancy, stop, and rove no more
 Now, tho' late, returning home,
 80 Lead me to *Belinda's* tomb.

67 *Orca's*, perhaps a reference to the Orchades or Orkney Islands, to the north of Scotland. In the later version of the poem, 'Fancy's Ramble,' Freneau substituted *Hecla*, a mountain in Iceland. In either case *Fancy's* flight is somewhat erratic. • 70 *Ossian*, a legendary Gaelic poet who celebrated the deeds of his father, Finn, or Find, who lived, presumably, in the third century. The Ossianic poems exist in fifteenth-century manuscripts, but their fame rests upon the attempt of James MacPherson (1736-1796) to create a Gaelic epic. His *Fingal* (1762) is now known to have been based largely upon forged manuscripts, but in Freneau's time it was accepted as authentic. • 76 *Demarara's*, now the name of both a county and a river in British Guiana, it was once also the name for Georgetown, the capital of that South American colony. • 79 *Anson*, George Anson (1697-1762), leader of a British naval expedition to the South Pacific, 1740-1744, which, after raiding Peru and a Spanish treasure ship off Acapulco in Mexico, continued westward around the world. • 90 *there*, i.e., in Britain, where Caesar landed in 55 B.C. • 91 *Tempe's*, an allusion to the valley in Thessaly whose beauty was often celebrated by the classical poets. • 94 *Sappho*, Lesbos. Sappho (fl. 630-570 B.C.), most famous of the women poets of antiquity, was supposedly born on the island of Lesbos or Mytilini, off the coast of Asia Minor. • 95 *humbled head*. From 1715 until 1821 Greece was occupied by the Turks. An insurrection in 1770 may have suggested Freneau's phrase. • 104 *Ida's*. The gods watched the battles around Troy, described in Homer's *Iliad*, from the summit of Mount Ida. • 116 *Timian*, an island in the Marianas, now well-known to Americans through its occupation in World War II. Anson was there for two months in 1742. • 120 *Taitis*, Tahiti, in the Society Islands, well-known to eighteenth-century readers through the expedition of Captain James Cook, who observed the Transit of Venus of 1769 at that spot. • 126 *Belinda's*, a common name in Neoclassical poetry.

Let me glide as well as you
Through the shroud and coffin too,
And behold, a moment, there,
All that once was good and fair—
Who doth here so soundly sleep?
Shall we break this prison deep?—
Thunders cannot wake the maid,
Lightnings cannot pierce the shade,
And tho' wintry tempests roar,
Tempests shall disturb no more.

YET must those eyes in darkness stay,
That once were rivals to the day?—
Like heaven's bright lamp beneath the main
They are but set to rise again

FANCY, thou the muses' pride,
In thy painted realms reside
Endless images of things,
Fluttering each on golden wings,
Ideal objects, such a store,
The universe could hold no more:
Fancy, to thy power I owe
Half my happiness below,
By thee Elysian groves were made,
Thine were the notes that Orpheus play'd;
By thee was Pluto charm'd so well
While rapture seiz'd the sons of hell—
Come, O come—perceiv'd by none,
You and I will walk alone.

1770-1786

George the Third's Soliloquy

As "King George the Third's Soliloquy," this poem first appeared in the *United States Magazine* for May 1779, and was reprinted almost at once in the *Pennsylvania Packet* for June 5. Freneau revised it extensively for the 1786 edition of his *Poems*, changing the order of the lines, omitting some passages, and adding others. He then entitled it "George III. His Soliloquy for 1779." The present title and text first appeared in 1795. The 1809 edition shows minor variations in spelling, but no further changes. In its combination of bitterness, ridicule, and confidence in the ultimate triumph of the American cause, it probably

typifies the attitude and methods of the Whig leaders. It was good politics, of course, to picture the Revolution as caused entirely by a tyrannical and unscrupulous monarch.

What mean these dreams, and hideous forms that rise
Night after night, tormenting to my eyes—
No real foes these horrid shapes can be,
But thrice as much they vex and torture me.

How cursed is he—how doubly curs'd am I—
Who lives in pain, and yet who dares not die;
To him no joy this world of Nature brings,
In vain the wild rose blooms, the daisy springs.
Is this a prelude to some new disgrace,
Some baleful omen to my name and race—!
It may be so—ere mighty Cesar died
Presaging Nature felt his doom, and sigh'd;
A bellowing voice through midnight groves was heard,
And threatening ghosts at dusk of eve appear'd—
Ere Brutus fell, to adverse fates a prey,
His evil genius met him on the way,
And so may mine!—but who would yield so soon
A prize, some luckier hour may make my own?—
Shame seize my crown, ere such a deed be mine—
No—to the last my squadrons shall combine,
And slay my foes, while foes remain to slay,
Or *heaven* shall grant me one successful day.

Is there a robber close in Newgate hemm'd,
Is there a cut-throat, fetter'd and condemn'd?
Haste, loyal slaves, to George's standard come,
Attend his lectures when you hear the drum;
Your chains I break—for better days prepare,
Come out, my friends, from prison and from care,
Far to the west I plan your desperate sway,

Power of Fancy • 149 Elysian groves, the abode of the blessed in classical mythology, a land of eternal spring and happiness • **Orpheus**, a mythical Greek poet who, by petitioning Pluto with song and lyre, won back his wife Eurydice from Hades, only to lose her again by disobeying the injunction not to look at her until they reached upper air

George the Third's Soliloquy • **Text:** the 1795 edition • 12 **Presaging Nature**. Plutarch and Strabo, Roman historians, tell of wonders seen before Caesar's death, these among them • 16 **His evil genius**. According to Plutarch, Brutus was visited one night by an apparition, who identified himself as "Thy evil genius. We shall again at Philippi." On the eve of the second battle of Philippi the apparition reappeared, next day, defeated, Brutus fell upon his sword • 23 **Newgate**. See note, p. 99

There 'tis no sin to ravage, burn, and slay.
 There, without fear, your bloody aims pursue,
 And show mankind what English thieves can do.
 That day, when first I mounted to the throne,
 I swore to let all foreign foes alone
 Through love of peace to terms did I advance,
 And made, they say, a shameful league with France
 But different scenes rise horrid to my view,
 I charg'd my hosts to plunder and subdue—
 At first, indeed, I thought short wars to wage
 And sent some jail-birds to be led by Gage
 For 'twas but right, that those we mark'd for slaves
 Should be reduc'd by cowards, fools, and knaves.
 Awhile, directed by his feeble hand,
 Those *troops* were kick'd and pelted through the land,
 Or starv'd in Boston, curs'd the unlucky hour
 They left their dungeons for that fatal shore
 France aids them now, a desperate game I play,
 And hostile Spain will do the same, they say;
 My armies vanquish'd, and my heroes fled,
 My people murmuring, and my commerce dead,
 My shattered navy pelted, bruis'd, and clubb'd,
 By Dutchmen bullied, and by Frenchmen drubb'd,
 My name abhorr'd, my nation in disgrace,
 How should I act in such a mournful case!
 My hopes and joys are vanish'd with my coin,
 My ruin'd army, and my lost Burgoyne!
 What shall I do—confess my labours vain,
 Or whet my tusks, and to the charge again!
 But where's my force—my choicest troops are fled,
 Some thousands crippled, and a myriad dead—
 If I were own'd the boldest of mankind,
 And hell with all her flames inspir'd my mind,
 Could I at once with Spain and France contend,
 And fight the *rebels*, on the world's green end?—
 The pangs of *parting* I can ne'er endure,
 Yet *part* we must, and part to meet no more!
 Oh! blast this *Congress*, blast each upstart STATE,
 On whose commands ten thousand captains wait,
 From various climes that dire *Assembly* came,
 True to their trust, as hostile to my fame,
 'Tis these, ah these, have ruin'd half my sway,
 Disgrac'd my arms, and led my slaves astray—
 Curs'd be the day, when first I saw the sun,
 Curs'd be the hour, when I these wars begun:
 The fiends of darkness then possess'd my mind,

And powers unfriendly to the human kind.
 To wasting grief, and sullen rage a prey,
 To *Scotland's* utmost verge I'll take my way,
 There with eternal storms due concert keep
 And while the billows rage, as fiercely weep—
 Ye highland lads, my rugged fate bemoan,
 Assist me with one sympathizing groan,
 For late I find the nations are my foes,
 I must submit, and that with bloody nose,
 Or, like our James, fly basely from the state,
 Or share, what still is worse—old *Charles's* fate

1779-1795

On the Memorable Victory

Obtained by the Gallant Captain
 John Paul Jones, of the *Bon Homme Richard*,
 over the *Seraphis*, under the command of
 Captain Pearson

This poem was first published in the *Freeman's Journal*, August 8, 1781. It relates the action of September 23, 1779, within sight of the east coast of England, in which John Paul Jones (1747-1792) won his greatest victory. The *Bon Homme Richard*, named for Benjamin Franklin, "Poor Richard," was a converted merchantman; only her officers were Americans. The raiding force of which it was the flagship encountered, off Scarborough, a large convoy from the Baltic, guarded by the *Serapis*, under the command of Richard Pearson (1731-1806). Jones, handicapped by inferior arms and equipment, was skillful in placing his deck guns and directing his boarding party, but his triumph came largely from the fact that he never thought of

36 a shameful . . . France Shameful because, in making peace with France, the Earl of Bute, King George's teacher and first prime minister, deserted Frederick the Great of Prussia, who had been fighting the three great absolutist monarchies Austria, Russia, and France. • 40 Gage, Thomas Gage. See note, p. 352. In the 1786 edition, this line read "And sent a scoundrel by the name of Gage." • 56 Burgoyne. John Burgoyne (see note, p. 385) arrived in Boston to reinforce Gage in September 1774. • 67 Oh! . . . Congress. In the 1779 version, this line began the poem. Freneau's chief addition in 1786 consisted of ll. 1-22, but there was considerable rearrangement. • 86 old Charles's fate, an allusion to the execution of Charles I in 1649.

accepting defeat. Freneau, curiously enough, does not use exactly Jones' classic reply to Pearson's demand that he strike his colors "I have not," he said, "begun to fight."

O'ER the rough main, with flowing sheet,
The guardian of a numerous fleet,
 Seraphis from the Baltic came;
A ship of less tremendous force
Sail'd by her side the self-same course,
 Countess of Scarb'ro' was her name.

And now their native coasts appear,
Britannia's hills their summit rear
 Above the German main.
Fond to suppose their dangers o'er,
They southward coast along the shore,
 Thy waters, gentle Thames, to gain.

Full forty guns *Seraphis* bore,
And *Scarb'ro's* Countess twenty-four,
 Mann'd with Old England's boldest tars—
What flag that rides the Gallic seas
Shall dare attack such piles as these,
 Design'd for tumults and for wars!

Now from the top-mast's giddy height
A seaman cry'd—"Four sail in sight
 "Approach with favouring gales,"
Pearson, resolv'd to save the fleet,
Stood off to sea, these ships to meet,
 And closely brac'd his shivering sails.

With him advanc'd the Countess bold,
Like a black tar in wars grown old:
 And now these floating piles drew nigh;
But, muse, unfold, what chief of fame
In the other warlike squadron came,
 Whose standards at his mast head fly.

'Twas JONES, brave JONES, to battle led
As bold a crew as ever bled
 Upon the sky-surrounded main;
The standards of the western world
Were to the willing winds unfurl'd,
 Denying Britain's tyrant reign.

The *Good-Man-Richard* led the line;
The *Alliance* next: with these combine
 The Gallic ship they *Pallas* call,
The *Vengeance*, arm'd with sword and flame;
These to attack the Britons came—
 But *two* accomplish'd all.

Now Phoebus sought his pearly bed:
But who can tell the scenes of dread,
 The horrors of that fatal night!
Close up those floating castles came;
The Good-Man-Richard bursts in flame;
 Seraphis trembled at the sight.

She felt the fury of *her* ball.
Down, prostrate, down the Britons fall;
 The decks were strew'd with slain:
JONES to the foe his vessel lash'd;
And, while the black artillery flash'd,
 Loud thunders shook the main.

Alas! that mortals should employ
Such murdering engines, to destroy
 That frame by heaven so nicely join'd;
Alas! that e'er the god decreed
That brother should by brother bleed,
 And pour'd such madness in the mind.

But thou, brave JONES, no blame shalt bear;
The rights of men demand your care—
 For *these* you dare the greedy waves—
No tyrant, on destruction bent,
Has plann'd thy conquests—thou art sent
 To humble tyrants and their slaves.

See!—dread *Seraphis* flames again—
And art thou, JONES, among the slain,
 And sunk to Neptune's caves below—

Text. the 1795 edition • 42 *two* accomplish'd all. The Bon Homme Richard took the *Serapis*, the *Pallas*, the *Countess of Scarborough*. The *Vengeance* had no part in the action, and the *Alliance*, commanded by Captain Landis (d. 1818), who was later judged insane, not only failed to help but also fired occasionally, so Jones said, at the Bon Homme Richard • 43 Phoebus, the sun. The battle raged for several hours after sunset

He lives—though crowds around him fall,
Still he, unhurt, survives them all;
Almost alone he fights the foe.

And can thy ship these strokes sustain?
Behold thy brave companions slain,
All clasped in ocean's dark embrace.
STRIKE, OR BE SUNK—the Briton cries—
SINK IF YOU CAN—the chief replies,
Fierce lightnings blazing in his face.

Then to the side three guns he drew,
(Almost deserted by his crew)
And charg'd them deep with woe.
By *Pearson's* flash he aimed hot balls;
His main-mast totters—down it falls—
O'erwhelming half below.

Pearson had yet disdain'd to yield,
But scarce his secret fears conceal'd,
And thus was heard to cry—
"With hell, not mortals, I contend;
"What art thou—human or a fiend,
"That dost my force defy?

"Return, my lads, the fight renew!"—
So call'd bold Pearson to his crew;
But call'd, alas, in vain,
Some on the decks lay maim'd and dead;
Some to their deep recesses fled,
And more were shrouded in the main.

Distress'd, forsaken, and alone,
He haul'd his tatter'd standard down,
And yielded to his gallant foe;
Bold *Pallas* soon the *Countess* took,—
Thus both their haughty colours struck,
Confessing what the brave can do.

But, JONES, too dearly didst thou buy
These ships possess so gloriously,
Too many deaths disgrac'd the fray:
Thy barque that bore the conquering flame,
That the proud Briton overcame,
Even she forsook thee on thy way;

70

For when the morn began to shine,
Fatal to her, the ocean brine
Pour'd through each spacious wound;
Quick in the deep she disappear'd,
But JONES to friendly *Belgia* steer'd,
With conquest and with glory crown'd.

110

Go on, great man, to scourge the foe,
And bid the haughty Britons know
They to our *Thirteen Stars* shall bend;
The *Stars* that, veild in dark attire,
Long glimmer'd with a feeble fire,
But radiant now ascend

80

120

Bend to the Stars that flaming rise
On western worlds, more brilliant skies.
Fair Freedom's reign restor'd—
So when the Magi, come from far,
Beheld the God-attending Star,
They trembled and ador'd.

To the Memory

Of the Brave Americans,
under General Greene, in *South Carolina*,
Who Fell in the Action of September 8, 1781

Since its appearance in the *Freeman's Journal* of November 21, 1781, and in the edition of 1786, this has been one of Freneau's best-known poems. It combines the patriotic theme with that gentle melancholy which is most familiar through Gray's "Elegy Written in a Country Churchyard." The skirmish on which the poem is based was an attack by General Nathanael Greene (1742-1786) and his force upon a British outpost, commanded by Georgia-born General John Stuart (1759-1815). Retreating to another position, the British re-formed their line and this time repulsed

100

113 *Belgia*, here *Holland* Jones took his prizes to *Texel*, largest of the West Frisian Islands • 124 the *Magi*, the wise men from the East who found the child Jesus in *Bethlehem*

the overanxious Americans, killing and wounding an estimated five to seven hundred men. Greene's attack was one of many which contributed to the failure of the British to hold South Carolina.

The Wild Honey Suck

At EUTAW springs the valiant died
Their limbs with dust are cover'd o'er—
Weep on, ye springs, your tearful tide;
How many heroes are no more!

If in this wreck of ruin, they
Can yet be thought to claim a tear,
O smite thy gentle breast, and say
The friends of freedom slumber here!

Thou, who shalt trace this bloody plain,
If goodness rules thy generous breast,
Sigh for the wasted rural reign,
Sigh for the shepherds, sunk to rest!

Stranger, their humble graves adorn;
You too may fall, and ask a tear.
'Tis not the beauty of the morn
That proves the evening shall be clear—

They saw their injur'd country's woe;
The flaming town, the wasted field;
Then rush'd to meet the insulting foe;
They took the spear—but left the shield,

Led by thy conquering genius, GREENE,
The Britons they compell'd to fly.
None distant view'd the fatal plain,
None griev'd, in such a cause, to die—

But, like the Parthian, fam'd of old,
Who, flying, still their arrows threw,
These routed Britons, full as bold,
Retreated, and retreating slew.

Now rest in peace, our patriot band;
Though far from Nature's limits thrown,
We trust, they find a happier land,
A brighter sun-shine of their own.

"These stanzas," writes Professor Leary, "placed Freneau beyond the reach of calumny or special pleading, chronologically at the head of America's procession of poets. They were first printed over the signature "K" in the *Columbian Herald*, July 6, 1786. Other printings follow in the *Pennsylvania Packet*, the *Freeman's Journal*, and the *Massachusetts Centinel*. There is no better evidence of Freneau's independence of the classical tradition and his fresh perception of nature.

Fair flower, that dost so comely grow,
Hid in this silent, dull retreat,
Untouch'd thy honey'd blossoms blow,
Unseen thy little branches greet
No roving foot shall crush thee here,
No busy hand provoke a tear

By Nature's self in white array'd,
She bade thee shun the vulgar eye,
And planted here the guardian shade,
And sent soft waters murmuring by;
Thus quietly thy summer goes,
Thy days declining to repose.

Smit with those charms, that must decay,
I grieve to see your future doom;
They died—nor were those flowers less gay,
The flowers that did in Eden bloom;

To the Memory • Text the 1795 edition • 1 *Eutaw springs*, on the Santee River, midway between Charleston and Columbia, South Carolina • 19 *Then rush'd* Professor Pattee has noted that Sir Walter Scott borrowed this and the following line for the introduction to Canto III of *Marmion*: "When Prussia hurried to the fire And snatch'd the spear, but left the shield" • 25 *the Parthian*. The horsemen of Parthia, a region in ancient Persia, used the stratagem of pretended retreat, when their enemies were scattered, they turned to the attack

The Wild Honey Suckle • Text the 1795 edition, with changes of diction indicated on the basis of Professor Leary's text of the original printing (That Rascal Freneau, p. 144). Variations in punctuation have not all been described • 5 *crush*. 1786, find • 15 *They died*. In the 1786 version the following two lines are in parentheses • 15 *le* 1786, more

Unpitying frosts, and Autumn's power
Shall leave no vestige of this flower.

From morning suns and evening dew
At first thy little being came
If nothing once, you nothing lose,
For when you die you are the same,
The space between, is but an hour.
The frail duration of a flower

1786

The Indian Burying-Ground

"Lines occasioned by a visit to an old Indian burying ground" appeared in the *American Museum* for November 1787 and in Freneau's *Miscellaneous Works* (1788). This poem is usually regarded as one of the earliest idealizations of the Indian.

In spite of all the learn'd have said,
I still my old opinion keep,
The *posture*, that *we* give the dead,
Points out the soul's eternal sleep.

Not so the ancients of these lands—
The Indian, when from life releas'd,
Again is seated with his friends,
And shares again the joyous feast.

His imag'd birds, and painted bowl,
And ven'son, for a journey dress'd,
Bespeak the nature of the soul,
ACTIVITY, that knows no rest.

10

His bow, for action ready bent,
And arrows, with a head of stone,
Can only mean that life is spent,
And not the finer essence gone.

Thou, stranger, that shalt come this way,
No fraud upon the dead commit—
Observe the swelling turf, and say
They do not *lie*, but here they *sit*.

20

Here still a lofty rock remains,
On which the curious eye may trace
(Now wasted, half, by wearing rains)
The fancies of a ruder race.

Here still an aged elm aspires,
Beneath whose far-projecting shade
(And which the shepherd still admires)
The children of the forest play'd'

There oft a restless Indian queen
(Pale *Shebab*, with her braided hair)
And many a barbarous form is seen
To chide the man that lingers there.

30

By midnight moons, o'er moistening dew,
In habit for the chase array'd,
The hunter still the deer pursues,
The hunter and the deer, a shade!

And long shall timorous fancy see
The painted chief, and pointed spear,
And Reason's self shall bow the knee
To shadows and delusions here.

1787

Lines by H. Salem, On His Return from Calcutta

No representative selection from Freneau would be complete without some poem of the sea, where he spent so many years of his life. There is no evidence that Freneau ever visited Calcutta, but this poem leaves no doubt of how he felt about the mariner's life. It first appeared as "A

The Wild Honey Suckle • 24 frail duration. 1786, empty image
The Indian Burying-Ground • Text the 1795 edition • 8 joyous feast. "The North American Indians bury their dead in a sitting posture, decorating the corpse with wampum, the images of birds, quadrupeds, &c. And (if that of a warrior) with bows, arrows, tomahawks, and other military weapons"—Freneau • 16 finer essence. 1809, old ideas • 36 The hunter . . . shade! Professor Pattee points out that the English poet Thomas Campbell borrowed this line in the fourth stanza of "O'Connor's Child" Now o'er the hills in chase he flits, The hunted and the deer a shade!"

Mistake Rectified" over the signature of "Sinbat the Sailor," in the *National Gazette*, and was soon reprinted in the *Philadelphia Daily Advertiser* and the *Charleston City Gazette*. In the 1795 edition it was called "Epistle to a Desponding Sea-man." Hezekiah Salem appears as a character or spokesman in several other poems by Freneau.

Your men of the land, from the king to Jack Ketch,
All join in supposing the sailor a wretch,
That his life is a round of vexation and woe,
With always too much or too little to do.
In the dead of the night, when other men sleep,
He, starboard and larboard, his watches must keep,
Imprisoned by Neptune, he lives like a dog,
And to know where he is, must depend on a LOG,
Must fret in a calm, and be sad in a storm,
In winter much trouble to keep himself warm 10

Through the heat of the summer pursuing his trade,
No trees, but his topmasts, to yield him a shade.
Then, add to the list of the mariner's evils,
The water corrupted, the bread full of weevils,
Salt-junk to be eat, be it better or worse,
And, often bull beef of an Irishman's horse.
Whosoever is free, he must still be a slave,
(Despotic is always the rule on the wave,)
Not relished on water, your lords of the main
Abhor the republican doctrines of PAINE, 20
And each, like the despot of Prussia, may say
That his crew has no right, but the right to obey
Such things say the lubbers, and sigh when they've said 'em,
But things are not so bad as their fancies persuade 'em:
There ne'er was a task but afforded some ease,
Nor a calling in life, but had something to please
If the sea has its storms, it has also its calms.
A time to sing songs and a time to sing psalms.—
Yes—give me a vessel well timbered and sound,
Her bottom good plank, and in rigging well found, 30
If her spars are but staunch, and her oakham swelled tight,
From tempests and storms I'll extract some delight—
At sea I would rather have Neptune my jailor,
Than a lubber on shore, that despises a sailor.
Do they ask me what pleasure I find on the sea?—
Why, absence from land is a pleasure to me.
A hamper of porter, and plenty of grog,
A friend, when too sleepy, to give me a jog,

A coop that will always some poult[r]y afford,
Some bottles of gin, and no parson on board,
A crew that is brisk when it happens to blow,
One compass on deck and another below,
A girl, with more sense than the girl at the head,
To read me a novel, or make up my bed—
The man that has these, has a treasure in store
That millions possess not, who live upon shore:
But if it should happen that commerce grew dull,
Or Neptune, ill-humoured, should batter our hull,
Should damage my cargo, or heave me aground,
Or pay me with farthings instead of a pound. 5
Should I always be left in the rear of the race,
And this be forever—forever the case,
Why then, if the honest plain truth I may tell,
I would clew up my topsails, and bid him farewell.

179

On Passing by an Old Church-Yard

This poem first appeared as "Melancholy reflections in passing by a burying place in the neighbourhood of Philadelphia" in the *Time-Piece*, September 15, 1797. It is a good example of the republicanism which sustained Freneau's distrust of pomp and aristocracy throughout the period of the French Revolution.

Pensive, on this green turf I cast my eye,
And almost feel inclined to muse and sigh:
Such tokens of mortality so nigh

But hold,—who knows if these who soundly sleep,
Would not, alive, have made some orphan weep,
Or plunged some slumbering victim in the deep.

Lines . . . • Text the 1809 edition • 15 Salt-junk, salt meat used on long voyages • 16 bull beef, the flesh of bulls, exceedingly tough, also a term of abuse • 20 Paine Freneau admired Thomas Paine, as appears from a poem "On Mr. Paine's Rights of Man" (1795) Paine had left Philadelphia before Freneau had many associations there • 21 the despot of Prussia, probably Frederick the Great (1712-1786), famous for his reluctance to delegate his powers • 31 oakham, oakum, loose fiber from old rope, used to caulk ships' seams • 43 the girl . . . head, the figurehead at the bow of the ship

On Passing by an Old Church-Yard • Text: the 1815 edition

There may be here, who once were virtue's foes,
A curse through life, the cause of many woes,
Who wrong'd the widow, and disturb'd repose.

There may be here, who with malicious aim
Did all they could to wound another's fame,
Steal character, and filch away good name. 10

Perhaps yond' solitary turf invests
Some who, when living, were the social pests,
Patrons of ribands, titles, crowns and crests.

Can we on such a kindred tear bestow?
They, who, in life, were every just man's foe,
A plague to all about them!—oh, no, no

What though sepultured with the funeral whine;
Why, sorrowing on such tombs should we recline, 20
Where truth, perhaps, has hardly penn'd a line

—Yet, what if here some honest man is laid
Whom nature of her best materials made,
Who all respect to sacred honor paid

Gentle, humane, benevolent and just,
(Though now forgot and mingled with the dust,
There may be such, and such there are we trust)

Yes—for the sake of that one honest man
We would on knaves themselves bestow a tear,
Think nature form'd them on some crooked plan, 30
And say *peace rest on all that slumber here.*

1797

Stanzas to an Alien,

Who After a Series of Persecutions
Emigrated to the South Western
Country.—1799.—

Freneau and his friends of Jefferson's party were thoroughly suspicious of the conservative reaction to the French Revolution, exemplified by the Alien and Sedition Acts of 1798. This poem, first published as "To an Alien" in the *Time-Piece* for July 13, 1798, shows Freneau's party

spirit as well as his sympathy with political exiles. The "alien" has been identified by Professor Leary as John Daly Burk (1775?-1808), an Irishman who arrived in the United States in 1796. He had some reputation as an editor and dramatist and, after some trouble in New York, settled in Petersburg, Virginia.

Remote, beneath a sultry star
Where Mississippi flows afar
I see you rambling, God knows where.

Sometimes, beneath a cypress bough
When met in dreams, with spirits low,
I long to tell you what I know

How matters go, in this our day,
When monarchy renews her sway,
And royalty begins her play

I thought you wrong to come so far
Till you had seen our western star
Above the mists ascended clear. 10

I thought you right, to speed your sails
If you were fond of loathsome jails,
And justice with uneven scales

And so you came and spoke too free
And soon they made you bend the knee,
And lodged you under lock and key

Discharged at last, you made your peace
With all you had, and left the place
With empty purse and meagre face.— 20

You sped your way to other climes
And left me here to teaze with rhymes
The worst of men in worst of times

Where you are gone the soil is free
And freedom sings from every tree,
"Come quit the crowd and live with me!"

Text, the 1815 edition

Where I must stay, no joys are found;
Excisemen haunt the hateful ground,
And chains are forged for all around

The scheming men, with brazen throat,
Would set a murdering tribe afloat
To hang you for the lines you wrote

If you are safe beyond their rage
Thank heaven, and not our *ruling sage*,
Who shops us up in jail and cage.

Perdition seize that odious race
Who, aiming at distinguish'd place,
Would life and liberty efface,

With iron rod would rule the ball
And, at their shrine, debase us all,
Bid devils rise and angels fall

Oh wish them ill, and wish them long
To be as usual in the wrong
In scheming for a chain too strong.

So will the happy time arrive
When coming home, if then alive,
You'll see them to the devil drive.

30

All the day you nothing said:
Half the night your cheery tongue
Revell'd out its little song,
Nothing else but *Caty-did*.

From your lodgings on the leaf
Did you utter joy or grief—?
Did you only mean to say,
*I have had my summer's day,
And am passing, soon, away
To the grave of Caty-did:—*
Poor, unhappy *Caty-did*!

But you would have utter'd more
Had you known of nature's power—
From the world when you retreat,
And a leaf's your winding sheet,
Long before your spirit fled,
Who can tell but nature said,
Live again, my *Caty-did*!
Live, and chatter *Caty-did*.

Tell me, what did *Caty* do?
Did she mean to trouble you?—
Why was *Caty* not forbid
To trouble little *Caty-did*?—
Wrong, indeed at you to fling,
Hurting no one while you sing
Caty-did! Caty-did! Caty-did!

40

1798

To a Caty-Did

In a branch of a willow hid
Sings the evening *Caty-did*
From the lofty locust bough
Feeding on a drop of dew,
In her suit of green array'd
Hear her singing in the shade
Caty-did, Caty-did, Caty-did!

While upon a leaf you tread,
Or repose your little head,
On your sheet of shadows laid,

Why continue to complain?
Caty tells me, she again
Will not give you plague or pain:—
Caty says you may be hid
Caty will not go to bed

4

Stanzas to an Alien • 35 our ruling sage, John Adams, the President One of the acts relating to aliens gave him, for two years, the power to deport any aliens he deemed dangerous

To a *Caty-Did* • Text the 1815 edition, apparently the first printing of this poem In the table of contents it is entitled "Stanzas to a *Caty Did*, the precursor of winter" *Caty-Did*. "A well-known insect, when full grown, about two inches in length, and of the exact color of a green leaf It is of the genus cicada, or grasshopper kind, inhabiting the green foliage of trees and singing such a note as *Caty-did* in the evening, towards autumn"—Freneau

While you sing us *Caty-did*.
Caty-did! *Caty-did!* *Caty-did!*

But, while singing, you forgot
 To tell us what did *Caty not*:
Caty-did not think of cold,
 Flocks retiring to the fold,
 Winter, with his wrinkles old,
 Winter, that yourself foretold
 When you gave us *Caty-did*

Stay securely in your nest,
Caty now, will do her best,
 All she can, to make you blest;
 But, you want no human aid—
 Nature, when she form'd you, said,
 Independent you are made,
 My dear little *Caty-did*.
 Soon yourself must disappear
 With the verdure of the year."—
 And to go, we know not where
 With your song of *Caty-did*

60

1815

On the Uniformity and Perfection of Nature

Freneau's views of God, man, and nature are fairly well summarized in this poem. The reference to the "great first cause" and the acceptance of an uninterrupted order of nature are Deistic in tendency, and it is possible to regard

Freneau as philosophically akin to Franklin, Paine, and Jefferson. He had perhaps less faith in man than they; as Professor Leary says, his philosophy is one of "optimistic resignation."

On one fix'd point all nature moves,
 Nor deviates from the track she loves,
 Her system, drawn from reason's source,
 She scorns to change her wonted course.

Could she descend from that great plan
 To work unusual things for man,
 To suit the insect of an hour—
 This would betray a want of power,

Unsettled in its first design
 And erring, when it did combine
 The parts that form the vast machine,
 The figures sketch'd on nature's scene.

10

Perfections of the great first cause
 Submit to no contracted laws.
 But all-sufficient, all-supreme,
 Include no trivial views in them

Who looks through nature with an eye
 That would the scheme of heaven descry,
 Observes her constant, still the same,
 In all her laws, through all her frame.

20

No imperfection can be found
 In all that is, above, around,—
 All, nature made, in reason's sight
 Is order all, and *all is right*.

1815

Text the 1815 edition • 24 *all is right* See the last lines of the first Epistle of Pope's *Essay on Man* (1732)

All Nature is but Art, unknown to thee,
 All Chance, Direction, which thou canst not see,
 All Discord, Harmony not understood,
 All partial Evil, universal Good
 And, spite of Pride, in erring Reason's spite,
 One truth is clear, *Whatever is, is right.*

Timothy Dwight

1752 • 1817

The solid rock of orthodoxy in the generation of the Connecticut Wits was Timothy Dwight, president of Yale College from 1795 until his death in 1817. Self-assured, immensely industrious, and a forthright warrior against all forms of religious infidelity, Dwight was the ideal college leader of his day. In conversation and in the pulpit he seemed the very fount of wisdom, and despite having ruined his eyesight by his college studies he managed to publish more than twenty-five items, including a ten-thousand-line epic poem, *The Conquest of Canaan* (1785). Later generations have wondered at the veneration in which he was held by his contemporaries, because, as V. L. Parrington put it, his "mind was closed as tight as his study windows in January." Yet there can be no doubt of Dwight's claim to attention as the chief spokesman of conservative opinion in his period.

Dwight was an extraordinarily precocious student. Entering Yale at thirteen, he was graduated in 1769 and returned as tutor two years later, after some teaching experience in a New Haven grammar school. An exceedingly popular tutor, he helped to turn undergraduate attention to public speaking and belles-lettres and was the students' choice for president when that post fell vacant in 1777. But he was only twenty-five and was not thought experienced enough by the governing board.

By that time Dwight had decided upon theology in preference to law, and late in 1777 he resigned his tutorship to become an army chaplain. He did well in that capacity, writing patriotic songs as well as sermons, among them "Columbia, Columbia, to Glory Arise." Family responsibilities forced him to leave the army

early in 1779, and for the next fifteen years he worked feverishly, first as farm manager, preacher, teacher, a legislator at Northampton, Massachusetts, and after 1787 as pastor of the Congregational Church at Greenfield, Connecticut. His preaching did not keep him from conducting one of the most famous schools of the day, an academy which accepted both boys and girls and drew pupils from Charleston and Jamaica as well as from close at hand. Meanwhile he found time to complete his long-projected epic, *The Conquest of Canaan* (1785), to loose a verse satire against the Deists, *The Triumph of Infidelity* (1788), and to finish *Greenfield Hill: A Poem, in Seven Parts* (1794).

Dwight was appointed to the Yale presidency in 1795. There his influence proved strong enough to check Deistic tendencies. He preached twice each Sunday, as well as on special occasions, and reviewed for each student generation the Calvinistic system as it was then understood. Although he emphasized practical ethics, he was no great thinker; his power was evangelical. Thanks to him, Yale and Connecticut shared in the widespread revival of religion at the turn of the century, and Yale-trained ministers continued to hold conspicuous places in the religious life of the nation. *The Nature, and Danger, of Infidel Philosophy* (1798) and *Theology: Explained and Defended* (5 vols, 1811-1819) are the record of a contribution seldom equaled by either theologians or college executives. The practical bent of Dwight's mind is also evident in his posthumous *Travels: in New-England and New-York* (4 vols, 1821-1822), a vast mine of information for the historian.

of the early years of the nineteenth century. His prose, however, is somewhat more diffuse than his poetry and is difficult to present in limited space.

Not since Cotton Mather had there been such an indefatigable, universally curious New England clergyman. The two were much alike in their defense of the *status quo*, their flashes of foresight, and the derivative quality of their minds. Dwight never sensed that he

might be fighting a losing battle. Those who cannot accept his theological, political, or literary principles must perforce marvel at the certainties by which he lived.

The Connecticut Wits, ed. V. L. Parrington, New York, 1926 • Charles F. Cunningham, Timothy Dwight, 1752-1817, A Biography, New York, 1942

Columbia, Columbia, to Glory Arise

Although this song is believed to have been written in 1778, while Dwight was a chaplain in the army, it was first printed in 1793. The tune, probably composed by Dwight himself, was first printed in Andrew Wright's *The American Musical Miscellany* (Northampton, 1798). There is considerable evidence that the song was most popular in the 1830's, when Americans were all thinking in terms of their "manifest destiny."

Columbia, Columbia, to glory arise,
The queen of the world, and child of the skies!
Thy genius commands thee; with rapture behold,
While ages on ages thy splendors unfold
Thy reign is the last, and the noblest of time
Most fruitful thy soil, most inviting thy clime,
Let the crimes of the east ne'er encrimson thy name,
Be freedom, and science, and virtue, thy fame

To conquest, and slaughter, let Europe aspire;
Whelm nations in blood, and wrap cities in fire; 10
Thy heroes the rights of mankind shall defend,
And triumph pursue them, and glory attend.
A world is thy realm. for a world be thy laws.
Enlarg'd as thine empire, and just as thy cause,
On Freedom's broad basis, that empire shall rise,
Extend with the main, and dissolve with the skies.

Fair Science her gates to thy sons shall unbar,
And the east see thy morn hide the beams of her star.
New bards, and new sages, unrival'd shall soar
To fame, unextinguish'd, when time is no more; 20

To thee, the last refuge of virtue design'd,
Shall fly from all nations the best of mankind,
Here, grateful to heaven, with transport shall bring
Their incense, more fragrant than odours of spring.

Nor less shall thy fair ones to glory ascend,
And Genius and Beauty in harmony blend,
The graces of form shall awake pure desire,
And the charms of the soul ever cherish the fire,
Their sweetness unmingled, their manners refin'd
And virtue's bright image, instamp'd on the mind, 30
With peace, and soft rapture, shall teach life to glow,
And light up a smile in the aspect of woe

Thy fleets to all regions thy pow'r shall display,
The nations admire, and the ocean obey,
Each shore to thy glory its tribute unfold,
And the east and the south yield their spices and gold,
As the day-spring unbounded, thy splendor shall flow,
And earth's little kingdoms before thee shall bow,
While the ensigns of union, in triumph unfurl'd,
Hush the tumult of war, and give peace to the world. 40

Thus, as down a lone valley, with cedars o'erspread,
From war's dread confusion I pensively stray'd—
The gloom from the face of fair heav'n retir'd,
The winds ceas'd to murmur, the thunders expir'd;
Perfumes, as of Eden, flow'd sweetly along,
And a voice, as of angels, enchantingly sung
"Columbia, Columbia, to glory arise,
The queen of the world, and the child of the skies."

1793

Text: the first printing, in *American Poems, Selected and Original*, Litchfield, Connecticut, 1793, an anthology prepared by Dr. Elihu Hubbard Smith (1771-1798), one of the minor members of the Connecticut group

From

Greenfield Hill

Greenfield Hill was published at New York in 1794, with a dedication to John Adams, then vice-president "The greater part of it," Dwight says in his introduction, "was written seven years ago." His original intention was to imitate one of the great English poets in each of the seven sections; but that scheme was abandoned, and Dwight characteristically sought to "contribute to the innocent amusement of his countrymen, and to their improvement in manners, and in economical, political, and moral sentiments." Those who read his book doubtless found more improvement than innocent amusement. Among Dwight's favorite poems were Sir John Denham's *Cooper's Hill* (1642), Alexander Pope's *Windsor Forest* (1713), James Thomson's *The Seasons* (1730), and Oliver Goldsmith's *The Deserted Village* (1779). The last of these is admittedly the model for "The Flourishing Village," Part II of *Greenfield Hill*, of which about one fourth is here reprinted. The amazing slavishness of Dwight's imitation is obvious from his own notes, his didactic aims are apparent both there and in the "Argument" which preceded this and each of the other sections. There is enough detail in his description to show his knowledge and genuine liking for New England rural life, comparable to Whittier's as displayed over seventy years later in *Snow-Bound*. Dwight's lengthy note to his first line indicates, however, that he had other things on his mind than an account of rural delights.

Part II

THE FLOURISHING VILLAGE

Fair Verna! loveliest village of the west,
Of every joy, and every charm, possess'd,
How pleas'd amid thy varied walks I rove,
Sweet, cheerful walks of innocence, and love,
And o'er thy smiling prospects cast my eyes,
And see the seats of peace, and pleasure, rise,

And hear the voice of Industry resound,
And mark the smile of Competence, around!
Hail, happy village! O'er thy cheerful lawns,
With earliest beauty, spring delighted dawns;
The northward sun begins his vernal smile;
The spring-bird carols o'er the cressy rill.
The shower, that patters in the ruffled stream,
The ploughboy's voice, that chides the lingering team,
The bee, industrious, with his busy song,
The woodman's axe, the distant groves among,
The waggon, rattling down the rugged steep,
The light wind, lulling every care to sleep,
All these, with mingled music, from below,
Deceive intruding sorrow, as I go.

2

How pleas'd, fond Recollection, with a smile,
Surveys the varied round of wintry toil!
How pleas'd, amid the flowers, that scent the plain,

Text, the original edition (1794) • 1 Fair Verna. "Sweet Auburn, loveliest village of the plain!" Goldsmith.—Dwight • 1 village . . . west "This part of the poem, although appropriated to the parish of Greenfield, may be considered as a general description of the towns and villages of New England, those only excepted, which are either commercial, new, or situated on a barren soil. Morose and gloomy persons and perhaps some others may think the description too highly coloured. Persons of moderation and candour may possibly think otherwise. In its full extent, the writer supposes it applicable to the best inhabitants only but he believes the number of these to be great to others he thinks it partially applicable. Poetical representations are usually esteemed flattering, possibly this is as little so, as most of them. The inhabitants of New England notwithstanding some modern instances of declension, are, at least in the writer's opinion, a singular example of virtue and happiness.

It will be easily discovered by the reader, that this part of the poem is designed to illustrate the effects of a state of property, which is the counter part to that, so beautifully exhibited by Dr. Goldsmith, in the *Deserted Village*. That excellent writer, in a most interesting manner, displays the wretched condition of the many, where enormous wealth, splendour, and luxury, constitute the state of the few. In this imperfect attempt, the writer wished to exhibit the blessings, which flow from an equal division of property, and a general competence.

Whenever an equal division of property is mentioned, in this Work, the Reader is requested to remember, that that state of things only is intended in which every citizen is secured in the avails of his industry and prudence, and in which property descends, by law, in equal shares, to the proprietor's children.—Dwight. The Connecticut law that all children should share equally in the family estate was passed in 1699 • 12 spring-bird. "A small bird, called, in some parts of New England, by that name, which appeared, very early in the spring, on the banks of brooks and small rivers, and sings a very sweet and sprightly note"—Dwight • 12 cressy, abounding in watercress or similar plants

Recalls the vanish'd frost, and sleeted rain,
The chilling damp, the ice-endangering street,
And treacherous earth that slump'd beneath the feet.

Yet even stern winter's glooms could joy inspire
Then social circles grac'd the nutwood fire,
The axe resounded, at the sunny door,
The swain, industrious, trimm'd his flaxen store, 30
Or thresh'd, with vigorous flail, the bounding wheat,
His poultry round him pilfering for their meat,
Or slid his firewood on the creaking snow,
Or bore his produce to the main below,
Or o'er his rich returns exulting laugh'd,
Or pladg'd the healthful orchard's sparkling draught.
While, on his board, for friends and neighbours spread,
The turkey smook'd, his busy housewife fed,
And Hospitality look'd smiling round,
And Leisure told his tale, with gleeful sound. 40

Then too, the rough road hid beneath the sleigh,
The distant friend despis'd a length of way,
And join'd the warm embrace, and mingling smile,
And told of all his bliss, and all his toil,
And, many a month elaps'd, was pleas'd to view
How well the household far'd, the children grew;
While tales of sympathy decerv'd the hour,
And Sleep, amus'd, resign'd his wonted power.

Yes! let the proud despise, the rich deride,
These humble joys, to Competence allied 50
To me, they bloom, all fragrant to my heart,
Nor ask the pomp of wealth, nor gloss of art.
And as a bird, in prison long confin'd,
Springs from his open'd cage, and mounts the wind,
Thro' fields of flowers, and fragrance, gaily flies,
Or re-assumes his birth-right, in the skies
Unprison'd thus from artificial joys,
Where pomp fatigues, and fussful fashion cloy,
The soul, reviving, loves to wander free
Thro' native scenes of sweet simplicity,
Thro' Peace' low vale, where Pleasure lingers long,
And every songster tunes his sweetest song,
And Zephyr hastes, to breathe his first perfume,
And Autumn stays, to drop his latest bloom.
'Till grown mature, and gathering strength to roam,
She lifts her lengthen'd wings, and seeks her home. 60

But now the wintry glooms are vanish'd all;
The lingering drift behind the shady wall;
The dark brown spots, that patch'd the snowy field,
The surly frost, that every bud conceal'd; 70
The russet veil, the way with slime o'erspread,
And all the saddening scenes of March are fled

Sweet-smiling village! loveliest of the hills!
How green thy groves! How pure thy glassy rills!
With what new joy, I walk thy verdant streets!
How often pause, to breathe thy gale of sweets,
To mark thy well-built walls' thy budding fields!
And every charm, that rural nature yields,
And every joy, to Competence allied,
And every good, that Virtue gains from Pride! 80

No griping landlord here alarms the door,
To halve, for rent, the poor man's little store
No haughty owner drives the humble swain
To some far refuge from his dread domain
Nor wastes, upon his robe of useless pride,
The wealth, which shivering thousands want beside;
Nor in one palace sinks a hundred cots,
Nor in one manor drowns a thousand lots,
Nor, on one table, spread for death and pain,
Devours what would a village well sustain 90

O Competence, thou bless'd by Heaven's decree,
How well exchang'd is empty pride for thee!

26 slump'd This word, said, in England, to be of North Country original, is customarily used in New England, to denote the sudden sinking of the foot in the earth, when partially thawed, as in the month of March. It is also used to denote the sudden sinking of the earth under the foot.—Dwight • 28 nutwood, Hickory.—Dwight • 45 And . . . view And, many a year elapsed, return'd to view. Goldsmith.—Dwight • 49 Yes! . . . proud Yes, let the rich deride, the proud disdain Goldsmith.—Dwight • 52 gloss of art. Goldsmith.—Dwight • 63 Zephyr, the west wind • 68 The lingering drift And parting summer's lingering blooms delayed Goldsmith.—Dwight • 73 Sweet-smiling village! Sweet-smiling village! loveliest of the lawn Goldsmith.—Dwight • 75 streets. "In several parts of this country, the roads through the villages are called streets."—Dwight • 79 And every joy . . . And every want, to opulence allied, And every pang that folly pays to pride Goldsmith.—Dwight • 87 cots, cottages • 91 O Competence. "O luxury! thou curst by heaven's decree Goldsmith Men in middling circumstances appear greatly to excel the rich, in piety, charity, and public spirit, nor will a critical observer of human life, hesitate to believe, that they enjoy more happiness."—Dwight

Oft to thy cot my feet delighted turn,
 To meet thy chearful smile, at peep of morn;
 To join thy toils, that bid the earth look gay,
 To mark thy sports, that hail the eve of May;
 To see thy ruddy children, at thy board,
 And share thy temperate meal, and frugal hoard;
 And every joy, by winning prattlers giv'n,
 And every earnest of a future Heaven

100

There the poor wanderer finds a table spread,
 The fireside welcome, and the peaceful bed.
 The needy neighbour, oft by wealth denied,
 There finds the little aids of life supplied;
 The horse, that bears to mill the hard-earn'd grain;
 The day's work given, to reap the ripen'd plain;
 The useful team, to house the precious food,
 And all the offices of real good.

There too, divine Religion is a guest,
 And all the Virtues join the daily feast.
 Kind Hospitality attends the door,
 To welcome in the stranger and the poor;
 Sweet Chastity, still blushing as she goes;
 And Patience smiling at her train of woes;
 And meek-eyed Innocence, and Truth refin'd,
 And Fortitude, of bold, but gentle mind.

110

Thou pay'st the tax, the rich man will not pay;
 Thou feed'st the poor, the rich man drives away.
 Thy sons, for freedom, hazard limbs, and life,
 While pride applauds, but shuns the manly strife
 Thou prop'st religion's cause, the world around,
 And shew'st thy faith in works, and not in sound.

120

Say, child of passion! while, with idiot stare,
 Thou seest proud grandeur wheel her sunny car;
 While kings, and nobles, roll bespangled by,
 And the tall palace lessens in the sky,
 Say, while with pomp thy giddy brain runs round,
 What joys, like these, in splendour can be found?
 Ah, yonder turn thy wealth-inchanted eyes,
 Where that poor, friendless wretch expiring lies!
 Hear his sad partner shriek, beside his bed,
 And call down curses on her landlord's head,
 Who drove, from yon small cot, her household sweet,
 To pine with want, and perish in the street.

130

See the pale tradesman toil, the livelong day,
 To deck imperious lords, who never pay!
 Who waste, at dice, their boundless breadth of soil,
 But grudge the scanty meed of honest toil.
 See hounds and horses riot on the store,
 By HEAVEN created for the hapless poor!
 See half a realm one tyrant scarce sustain,
 While meagre thousands round him glean the plain!
 See, for his mistress' robe, a village sold,
 Whose matrons shrink from nakedness and cold!
 See too the Farmer prowls around the shed,
 To rob the starving household of their bread;
 And seize, with cruel fangs, the helpless swain,
 While wives, and daughters, plead, and weep, in vain
 Or yield to infamy themselves, to save
 Their sire from prison, famine, and the grave.

There too foul luxury taints the putrid mind,
 And slavery there imbrutes the reasoning kind.
 There humble worth, in damps of deep despair,
 Is bound by poverty's eternal bar.
 No motives bright the etherial aim impart,
 Nor one fair ray of hope allures the heart.

But, O sweet Competence! how chang'd the scene,
 Where thy soft footsteps lightly print the green!
 Where Freedom walks erect, with manly port,
 And all the blessings to his side resort,
 In every hamlet, Learning builds her schools,
 And beggars' children gain her arts, and rules;
 And mild Simplicity o'er manners reigns,
 And blameless morals Purity sustains

From thee the rich enjoyments round me spring,
 Where every farmer reigns a little king;
 Where all to comfort, none to danger, rise;
 Where pride finds few, but nature all supplies;
 Where peace and sweet civility are seen,
 And meek good-neighbourhood endears the green.
 Here every class (if classes those we call,

145 the Farmer. "Farmer of revenue. A superior kind of tax-gatherer in some countries of Europe."—Dwight • 154 poverty's eternal bar. "By poverty's unconquerable bar. Beattie."—Dwight The l appears in the first stanza of "The Minstrel" (1771) by James Bea (1735-1803)

Where one extended class embraces all,
 All mingling, as the rainbow's beauty blends,
 Unknown where every hue begins or ends)
 Each following, each, with uninvincible strife,
 Wears every feature of improving life.
 Each gains from other comeliness of dress,
 And learns, with gentle meek to win and bless,
 With welcome mild the stranger to receive,
 And with plain, pleasing decency to live;
 Refinement hence even humblest life improves;
 Not the loose fair, that form and frippery loves;
 But she, whose mansion is the gentle mind.
 Is thought, and action, virtuously refin'd
 Hence, wives and husbands act a lovelier part,
 More just the conduct, and more kind the heart,
 Hence brother, sister, parent, child, and friend,
 The harmony of life more sweetly blend,
 Hence labour brightens every rural scene,
 Hence cheerful plenty lives along the green,
 Still Prudence eyes her hoard, with watchful care,
 And robes of thrift and neatness, all things wear.

Thrice bless'd the life, in this glad region spent,
 In peace, in competence, and still content,
 Where bright, and brighter, all things daily smile,
 And rare and scanty, flow the streams of ill,
 Where undecaying youth sits blooming round,
 And Spring looks lovely on the happy ground,
 Improvement glows, along life's cheerful way,
 And with soft lustre makes the passage gay
 Thus oft, on yonder Sound, when evening gales
 Breath'd o'er th' expanse, and gently fill'd the sails,
 The world was still, the heavens were dress'd in smiles,
 And the clear moon-beam tipp'd the distant isles,
 On the blue plain a lucid image gave,
 And capp'd, with silver light, each little wave;
 The silent splendour, floating at our side,
 Mov'd as we mov'd, and wanton'd on the tide,
 While shadowy points, and havens, met the eye,
 And the faint-glittering landmark told us home was
 nigh.

Ah, dire reverse! in yonder eastern clime,
 Where heavy drags the sluggish car of time;
 The world unalter'd by the change of years,

Age after age, the same dull aspect wears;
 On the bold mind the weight of system spread,
 Resistless lies, a cumbrous load of lead,
 One beaten course, the wheels politic keep,
 And slaves of custom, lose their woes in sleep;
 Stagnant is social life, no bright design.
 Quickens the sloth, or checks the sad decline.
 The friend of man casts round a wishful eye,
 And hopes, in vain, improving scenes to spy,
 Slow o'er his head, the dragging moments roll,
 And damp each cheerful purpose of the soul.

Thus the bewilder'd traveler, forc'd to roam
 Through a lone forest, leaves his friends, and home;
 Dun evening hangs the sky, the woods around
 Join their sad umbrage o'er the russet ground;
 At every step, new gloom inshrouds the skies,
 His path grows doubtful, and his fears arise
 No woodland songstress soothes his mournful way;
 No taper gilds the gloom with cheering ray,
 On the cold earth he lays his head forlorn,
 And watching, looks, and looks, to spy the lingering morn.

And when new regions prompt their feet to roam,
 And fix, in untrod fields, another home,
 No dreary realms our happy race explore,
 Nor mourn their exile from their native shore.
 For there no endless frosts the glebe deform,
 Nor blows, with icy breath, perpetual storm.
 No wrathful suns, with sickly splendour glare,
 Nor moors impoison'd, taint the balmy air,
 But medial climates change the healthful year,
 Pure streamlets wind, and gales of Eden cheer;
 In misty pomp the sky-topp'd mountains stand,
 And with green bosom humbler hills expand
 With flowery brilliance smiles the woodland glade;
 Full teems the soil, and fragrant twines the shade.

192 all things wear According to Dwight's *Argument* the next 445 lines, omitted here, contain the following matter Africa appears—State of Negro Slavery in Connecticut—Effects of Slavery on the African, from his childhood through life—Slavery generally characterized—West-Indian Slavery—True cause of the calamities of the West-Indies—Church—Effects of the Sabbath—Academic School—Schoolmaster—House of Sloth—Female Worthy—Inferior Schools—Female Visit—What is not, and what is, a social female visit As may be imagined, the trend is highly moral and didactic

There cheaper fields the numerous household charm,
 And the glad sire gives every son a farm,
 In falling forests, Labour's axe resounds,
 Ope's the new field, and winds the fence's bounds;
 The green wheat sparkles, nods the towering corn;
 And meads, and pastures, lessening wastes adorn
 Where howl'd the forest, herds unnumber'd low;
 The fleecy wanderers fear no prowling foe,
 The village springs, the humble school aspires,
 And the church brightens in the morning fires! 700
 Young Freedom wantons, Art exalts her head,
 And infant Science prattles through the shade
 There changing neighbours learn their manners mild;
 And toil and prudence dress th' improving wild
 The savage shrinks, nor dares the bliss annoy,
 And the glad traveller wonders at the joy.

All hail, thou western world! by heaven design'd
 Th' example bright, to renovate mankind
 Soon shall thy sons across the mainland roam;
 And claim, on far Pacific shores, their home; 710
 Their rule, religion, manners, arts, convey,
 And spread their freedom to the Asian sea.
 Where erst six thousand suns have roll'd the year
 O'er plains of slaughter, and o'er wilds of fear.
 Towns, cities, fanes, shall lift their towery pride;
 The village bloom, on every streamlets side,
 Proud Commerce' mole the western surges lave,
 The long, white spire lie imag'd on the wave,
 O'er morn's pellucid main expand their sails.
 And the starr'd ensign court Korean gales 720
 Then nobler thoughts shall savage trains inform;
 Then barbarous passions cease the heart to storm
 No more the captive circling flames devour,

Through the war path the Indian creep no more;
 No midnight scout the slumbering village fire;
 Nor the scalp'd infant stain his gasping sire:
 But peace, and truth, illume the twilight mind,
 The gospel's sunshine, and the purpose kind.
 Where marshes teem'd with death, shall meads unfold;
 Untrodden cliffs resign their stores of gold;
 The dance refin'd on Albion's margin move,
 And her lone bowers rehearse the tale of love
 Where slept perennial night, shall science rise,
 And new-born Oxfords cheer the evening skies;
 Miltonic strains the Mexic hills prolong,
 And Louis murmur to Sicilian song.

Then to new climes the bliss shall trace its way,
 And Tartar desarts hail the rising day,
 From the long torpor startled China wake;
 Her chains of misery rous'd Peruvia break;
 Man link to man; with bosom bosom twine;
 And one great bond the house of Adam join:
 The sacred promise full completion know,
 And peace, and piety, the world o'erflow.

Philanthropist, statesman, philosopher, poet—such is the order in which his biographer ranks the various capacities in which Joel Barlow distinguished himself. There can be little objection to the judgment; but it records the failure of a great ambition, for Barlow wanted above all things to be an epic poet. Later generations have regretted that the hours and years he spent on *The Columbiad* did not go instead into more prose such as the vigorous *Advice to the Privileged Orders* or, if he had to express himself in poetry, to such unpretentious portrayals of life and manners as *The Hasty-Pudding*.

Barlow was born at Redding, Connecticut, in 1754, and was graduated from Yale College with the Class of 1778. His college career was distinguished chiefly by at least one vacation spent in the army, of all places, and a Commencement poem, *The Prospect of Peace*. Settling down in the atmosphere of revolution proved somewhat difficult. He studied law for a time, then served as an unordained chaplain from September 1780 until the end of the war. Choosing Hartford for his home, he then tried his hand at teaching and editing before being admitted to the bar in 1786. In the year following he helped organize the Scioto Company, which planned to buy lands in Ohio and sell them at a large profit to European immigrants. Going abroad as a promoter in 1788, Barlow found London apathetic, but with the aid of enticing circulars he created a speculative flurry in Ohio real estate in Paris. Unfortunately the titles which he sold were not clear, and the Frenchmen who occupied Gallip-

olis in 1790 found that they had been swindled. The guilt, however, lay more with others than with Barlow, if not, indeed, with the French themselves, who were gulled by dreams of a Utopia in the wilderness.

Barlow was caught in Paris by the French Revolution. Somewhat surprisingly for a son of Federalist Connecticut who had collaborated in *The Anarchiad* (1786), an attack on populist tendencies in government, Barlow emerged in 1792 as an ardent radical. He expected a general revolution in the political and social structure of Europe along the lines of the American system. *Advice to the Privileged Orders*—a pamphlet attack on monarchy, an established church, inequalities in taxation and access to the courts, and standing armies—helped precipitate the conservative reaction in England, of which Edmund Burke was leader. A poem entitled *The Conspiracy of Kings* made him anathema to cautious Englishmen. Another pamphlet, *A Letter to the National Convention of France*, won him the honor of French citizenship. Barlow lived through the Terror without inconvenience and was able to befriend Thomas Paine in one serious crisis (see p 408). From 1795 to 1797 he served as American consul in Algiers, engineering a treaty with the pirates there, he then returned to Paris and by judicious speculation in securities made a comfortable fortune. From 1805 until 1811 he lived in considerable splendor near Washington, D. C., polishing what he regarded as his great epic and entertaining his wide circle of friends. President Madison sent him once more to

France in 1811, as ambassador, and in the following year Barlow died in Poland, where he had gone to confer with Napoleon on matters of state.

Barlow spent a large part of his life planning, composing, and revising a long philosophical poem on the importance of American history. Some of it was written in 1780; two years later he was taking subscriptions for its publication. It appeared as *The Vision of Columbus* in 1787, and the final version, *The Columbiad*, was published in 1807, nearly thirty years after Barlow had con-

ceived it. All that can be said for it is that it is a better epic than Timothy Dwight's *The Conquest of Canaan*. Barlow is now read almost exclusively in *The Hasty Pudding*, tossed off in a few days in a nostalgic mood.

The Connecticut Wits, ed. V. L. Parrington, New York, 1926 • C. E. Todd, *Life and Letters of Joel Barlow*, New York, 1886 • T. A. Zundel, *The Early Days of Joel Barlow, a Connecticut Wit*, New Haven, 1934 • V. C. Miller, *Joel Barlow. Revolutionist*, London, 1791-1792; Hamburg, 1932

The Hasty-Pudding

A Poem, in Three Cantos,
Written at Chambéry in Savoy,
January, 1793

In January 1793, the month of the execution of Louis XVI, Barlow was in Savoy, apparently hoping to become a deputy to the National Convention from a new department or election district being organized there. In a spell of homesickness, brought on by encountering unexpectedly the most familiar porridge of his New England boyhood, he composed *The Hasty-Pudding*, which imitates the mock-heroic and pastoral veins of the age of Pope. The burlesque of the traditional epic invocation to the Muse, the rhetorical passages on exceedingly homely subjects, the numerous allusions—all reveal Barlow's familiarity with literature. Yet the poem, typical of the productions of the Connecticut group in its backward-looking tendencies, has a verve and an abundant local reference which save it from dullness. One might argue, indeed, that Barlow's democratic sympathies are as well expressed in his praise of simplicity as in his radical pamphlets. At any rate, to remember the most popular of Barlow's work is not wholly, as V. L. Parrington's remarks tend to suggest, to "make a mush" of an "honest thinker."

Omne tulit punctum qui miscuit utile dulci.
*He makes a good breakfast who mixes pudding
with molasses.*

PREFACE

A simplicity in diet, whether it be considered with reference to the happiness of individuals or the prosperity of a nation, is of more consequence than we are apt to imagine. In recommending so important an object to the rational part of mankind, I wish it were in my power to do it in such a manner as would be likely to gain their attention. I am sensible that it is one of those subjects in which example has infinitely more power than the most convincing arguments or the highest charms of poetry. Goldsmith's *Deserted Village*, though possessing these two advantages in a greater degree than any other work of the kind, has not prevented villages in England from being deserted. The apparent interest of the ruined individuals, who form the taste as well as the laws in the country, has been against him; and with that interest has been vain to contend.

Text that which appeared in the January 1796 issue of the *New-York Magazine*. The first separate publication was apparently at New Haven, it contains an "advertisement" dated in April. The *New Haven* edition reveals several changes: the Preface became a dedication to Martha Washington, greater particularity was obtained by making "our sires" "my sire" throughout, four lines (following 264) were added, a prose note was appended and numerous changes made in punctuation, spelling, and italics. Possibly Barlow sent back two manuscripts; it is also possible that the dedication to Mrs. Washington was someone else's idea. • Omne . . . dulce. He has gained all approval which has mingled the useful with the agreeable • apparent interest. A distinction between the "interests" of privileged groups and the interests of the masses is the basis of Barlow's argument in *Advice to the Privileged Orders*. He sought to appeal to the enlightened self-interest of all readers.

The vicious habits which in this little piece I endeavor to combat, seem to me not so difficult to cure. No class of people has any interest in supporting them, unless it be the interest which certain families feel in vying with each other in sumptuous entertainments. There may indeed be some instances of depraved appetites, which no arguments will conquer; but these must be rare. There are very few persons but what would always prefer a plain dish for themselves, and would prefer it likewise for their guests, if there were no risk of reputation in the case. This difficulty can only be removed by example; and the example should proceed from those whose situation enables them to take the lead in forming the manners of a nation. Persons of this description in America, I should hope, are neither above nor below the influence of truth and reason, when conveyed in language suited to the subject.

Whether the manner I have chosen to address my arguments to them be such as to promise any success is what I cannot decide. But I certainly had hopes of doing some good, or I should not have taken the pains of putting so many rhymes together.—The example of domestic virtues has doubtless a great effect. I only wish to rank simplicity of diet among the virtues. In that case I should hope it will be cherished and more esteemed by others than it is at present.

THE AUTHOR

CANTO I

Ye Alps audacious, thro' the heav'ns that rise,
To cramp the day and hide me from the skies;
Ye Gallic flags, that o'er their heights unfurl'd,
Bear death to kings, and freedom to the world,
I sing not you A softer theme I chuse,
A virgin theme, unconscious of the Muse,
But fruitful, rich, well suited to inspire
The purest frenzy of poetic fire

Despise it not, ye Bards to terror steel'd,
Who hurl your thunders round the epic field,
Nor ye who strain your midnight throats to sing
Joys that the vineyard and the still-house bring,
Or on some distant fair your notes employ,
And speak of raptures that you ne'er enjoy.
I sing the sweets I know, the charms I feel,

10

My morning incense, and my evening meal,
The sweets of Hasty-Pudding Come, dear bowl,
Glide o'er my palate, and inspire my soul.
The milk beside thee, smoking from the kine,
Its substance mingled, married in with thine,
Shall cool and temper thy superior heat,
And save the pains of blowing while I eat.

20

Oh! could the smooth, the emblematic song
Flow like thy genial juices o'er my tongue,
Could those mild morsels in my numbers chime,
And, as they roll in substance, roll in rhyme,
No more thy aukward unpoetic name
Should shun the Muse, or prejudice thy fame;
But rising grateful to th' accusom'd ear,
All Bards should catch it, and all realms revere.

30

Assist me first with pious toil to trace
Thro' wrecks of time thy lineage and thy race;
Declare what lovely squaw, in dayes of yore,
(Ere great Columbus sought thy native shore)
First gave thee to the world, her works of fame
Have liv'd indeed, but liv'd without a name.
Some tawny Ceres, goddess of her days
First learn'd with stones to crack the well dry'd maise,
Thro' the rough seive to shake the golden show'r,
In boiling water stir the yellow flour
The yellow flour, bestrew'd and stir'd with haste,
Swells in the flood and thickens to a paste,
Then puffs and wallops, rises to the brim,
Drinks the dry knobs that on the surface swim;
The knobs at last the busy ladle breaks,
And the whole mass its true consistence takes.

40

Could but her sacred name unknown so long,
Rise, like her labors, to the son of song,
To her, to them, I'd consecrate my lays,
And blow her pudding with the breath of praise.
If 'twas Oella, whom I sang before,

50

3 Gallic flags, French standards At the beginning of the French Revolution, Savoy was a part of the Kingdom of Sardinia, it was invaded and taken by the French in 1792 • 12 still-house, distillery • 37 Ceres, goddess of grain • 43 wallops, bubbles (dialect) • 51 Oella . . . before. In Bks II and III of *The Vision of Columbus and The Columbiad*, Barlow made great use of the legend that the Incas of Peru originated with two children of the Sun, Manco Capac and his sister-wife, Mama Oella This legend, derived from the history of Peru by Garcilaso de la Vega (1540-1616), made Oella the originator of spinning and other useful arts

I here ascribe her one great virtue more.
Not thro' the rich Peruvian realms alone
The fame of Sol's sweet daughter should be known,
But o'er the world's wide clime should live secure,
Far as his rays extend, as long as they endure.

Dear Hasty-Pudding, what unpromis'd joy
Expands my heart, to meet thee in Savoy!
Doom'd o'er the world thro' devious paths to roam,
Each clime my country, and each house my home, 60
My soul is sooth'd, my cares have found an end,
I greet my long-lost, unforgotten friend.

For Thee thro' Paris, that corrupted town,
How long in vain I wandered up and down,
Where shameless Bacchus, with his drenching hoard,
Cold from his cave usurps the morning board
London is lost in smoke and steep'd in tea,
No Yankey there can lisp the name of thee;
The uncouth word, a libel on the town,
Would call a proclamation from the crown. 70
For climes oblique, that fear the sun's full rays,
Chill'd in their fogs, exclude the generous maize;
A grain whose rich luxuriant growth requires
Short gentle showers, and bright ethereal fires.

But here, tho' distant from our native shore,
With mutual glee we meet and laugh once more.
The same! I know thee by that yellow face,
That strong complexion of true Indian race.
Which time can never change, nor soil impair,
Nor Alpine snows, nor Turkey's morbid air; 80
For endless years, thro' every mild domain,
Where grows the maize, there thou art sure to reign.

But man, more fickle, the bold licence claims,
In different realms to give thee different names.
Thee the soft nations round the warm Levant
Polanta call, the French of course *Polante*.
Ev'n in thy native regions, how I blush
To hear the Pennsylvanians call thee *Mush*!
On Hudson's banks, while men of Belgic spawn
Insult and eat thee by the name *Suppawn*. 90
Thy name is *Hasty-Pudding*! thus our sires
Were wont to greet thee fuming from their fires,
And while they argu'd in thy just defence
With logic clear, they thus explain'd the sense:—
"In *haste* the boiling cauldron, o'er the blaze,
"Receives and cooks the ready-powder'd maize;
"In *haste* 'tis served, and then in equal *haste*,

"With cooling milk, we make the sweet repast.
"No carving to be done, no knife to grate
"The tender ear, and wound the stony plate;
"But the smooth spoon, just fitted to the lip,
"And taught with art the yielding mass to dip,
"By frequent journeys to the bowl well stor'd,
"Performs the hasty honors of the board."
Such is thy name, significant and clear,
A name, a sound to every Yankey dear,
But most to me, whose heart and palate chaste
Preserve my pure hereditary taste.

There are who strive to stamp with disrepute
The luscious food, because it feeds the brute;
In tropes of high-strain'd wit, while gaudy prigs
Compare thy nursling man to pamper'd pigs;
With sovereign scorn I treat the vulgar jest,
Nor fear to share thy bounties with the beast.
What though the generous cow gives me to quaff
The milk nutritious. am I then a calf?
Or can the genius of the noisy swine,
Though nurs'd on pudding, thence lay claim to mine?
Sure the sweet song, I fashion to thy praise,
Runs more melodious than the notes they raise.

My song resounding in its grateful glee,
No merit claims: I praise myself in thee.
My father lov'd thee thro' his length of days;
For thee his fields were shaded o'er with maize;
From thee what health, what vigor he possesst,
Ten sturdy freemen from his loins attest;
Thy constellation rul'd my natal morn,
And all my bones were made of Indian corn.
Delicious grain! whatever form it take,
To roast or boil, to smother or to bake,
In every dish 'tis welcome still to me,
But most, my *Hasty-Pudding*, most in thee
Let the green Succatash with thee contend,

65 Bacchus, god of wine • 70 crown. "A certain king, at the time when this was written, was publishing proclamations to prevent American principles from being propagated in his country"—Barlow. The allusion is probably to a royal proclamation against seditious publications issued in England in May 1792, which forced Barlow to publish Part II of *Advice to the Privileged Orders* (1793) in Paris • 85 Levant countries of the eastern Mediterranean • 89 Belgic spawn, the Dutch • 90 Suppawn, supawn, a word of American Indian origin • 126 Ten sturdy freemen. Only nine Barlow children are accounted for. "Still says Professor Zunder, 'Joel must have known the truth'"

Let beans and corn their sweetest juices blend,
 Let butter drench them in its yellow tide,
 And a long slice of bacon grace their side,
 Not all the plate, how fam'd soe'er it be,
 Can please my palate like a bowl of thee
 Some talk of Hoe-Cake, fair Virginia's pride,
 Rich Johnny-Cake this mouth has often tri'd; 140
 Both please me well, their virtues much the same;
 Alike their fabric, as allied their fame,
 Except in dear New-England, where the last
 Receive a dash a pumpkin in the paste,
 To give it sweetness and improve the taste.
 But place them all before me, smocking hot,
 The big, round dumplin rolling from the pot,
 The pudding of the bag, whose quivering breast,
 With suet lin'd, leads on the Yankey feast;
 The Charlotte brown, within whose crusty sides 150
 A belly soft the pulpy apple hides;
 The yellow bread, whose face like amber glows,
 And all of Indian that the bake-pan knows—
 You tempt me not, my fav'rite greets my eyes,
 To that lov'd bowl my spoon by instinct flies.

CANTO II

To mix the food by vicious rules of art,
 To kill the stomach and to sink the heart,
 To make mankind to social virtue sour,
 Cram o'er each dish, and be what they devour;
 For this the kitchen Muse first fram'd her book, 160
 Commanding sweat to stream from every cook;
 Children no more their antic gambols tri'd,
 And friends to physic wonder'd why they died.
 Not so the Yankey—his abundant feast,
 With simples furnish'd, and with plainness drest,
 A numerous offspring gathers round the board,
 And cheers alike the servant and the lord;
 Whose well-bought hunger prompts the joyous taste,
 And health attends them from the short repast
 While the full pail rewards the milk-maid's toil, 170
 The mother sees the morning cauldron boil,
 To stir the pudding next demands their care,
 To spread the table and the bowls prepare,
 To feed the children, as their portions cool,
 And comb their heads, and send them off to school
 Yet may the simplest dish some rules impart,

For nature scorns not all the aids of art.
 Ev'n Hasty-Pudding, purest of all food,
 May still be bad, indifferent, or good,
 As sage experience the short process guides, 180
 Or want of skill, or want of care presides.
 Whoever would form it on the surest plan,
 To rear the child and long sustain the man;
 To shield the morals while it mends the size,
 And all the powers of every food supplies,
 Attend the lessons that the Muse shall bring,
 Suspend your spoons, and listen while I sing
 But since, O man! thy life and health demand
 Not food alone, but labour from thy hand,
 First in the field, beneath the sun's strong rays, 190
 Ask of thy mother earth the needful maize;
 She loves the race that courts her yielding soil,
 And gives her bounties to the sons of toil
 When now the ox, obedient to thy call,
 Repays the loan that fill'd the winter stall,
 Pursue his traces o'er the furrow'd plain,
 And plant in measur'd hills the golden grain.
 But when the tender germe begins to shoot,
 And the green spire declares the sprouting root,
 Then guard your nursling from each greedy foe, 200
 Th' insidious worm, the all-devouring crow.
 A little ashes, sprinkled round the spire,
 Soon steep'd in rain, will bid the worm retire,
 The feather'd robber with his hungry maw
 Swift flies the field before your man of straw,
 A frightful image, such as school-boys bring
 When met to burn the Pope, or hang the King
 Thrice in each season, through each variant row
 Wield the strong plow-share and the faithful hoe;
 The faithful hoe, a double task that takes, 210
 To till the summer corn, and roast the winter cakes.
 Slow springs the blade, while check'd by chilling rains,
 Ere yet the sun the seat of Cancer gains,

150 *Charlotte*, a sweet enclosed in cake, crust, or crumbs, such as *charlotte russe*. Barlow probably picked up the word in Europe, although he may have been describing a kind of apple pie. • 207 *burn* . . . *King*. The allusion is probably to the traditional celebration of Guy Fawkes Day, November 5, the anniversary of the discovery of the Gunpowder Plot in 1605. English children still ask "a penny for the Guy", American boys probably cared little for distinctions between Fawkes, Pope, and King. • 213 *Cancer*, the sign of the zodiac marking the summer solstice or longest day in the year, about June 21.

But when his fiercest fires emblaze the land,
 Then start the juices, then the roots expand;
 Then, like a column of Corinthian mould,
 The stalk struts upward, and the leaves unfold;
 The busy branches all the ridges fill,
 Entwine their arms, and kiss from hill to hill
 Here cease to vex them, all your cares are done; 220
 Leave the last labors to the parent sun,
 Beneath his genial smiles, the well-drest field,
 When autumn calls, a plenteous crop shall yield

Now the strong foliage bears the standards high,
 And shoots the tall top-gallants to the sky,
 The suckling ears their silky fringes bend,
 And pregnant grown, their swelling coats distend,
 The loaded stalk, while still the burthen grows,
 O'erhangs the space that runs between the rows;
 High as a hop-field waves the silent grove, 230
 A safe retreat for little thefts of love,
 When the pledg'd roasting-ears invite the maid,
 To meet her swain beneath the new-form'd shade;
 His generous hand unloads the cumbrous hill,
 And the green spoils her ready basket fill;
 Small compensation for the two-fold bliss,
 The promis'd wedding and the present kiss.

Slight depredations these, but now the moon
 Calls from his hollow tree the sly raccoon,
 And while by night he bears his prize away, 240
 The bolder squirrel labors thro' the day.
 Both thieves alike, but provident of time,
 A virtue rare, that almost hides their crime.
 Then let them steal the little stores they can,
 And fill their gran'ries from the toils of man;
 We've one advantage where they take no part,—
 With all their wiles they ne'er have found the art
 To boil the Hasty-Pudding, here we shine
 Superior far to tenants of the pine,
 This envy'd boon to man shall still belong, 250
 Unshar'd by them in substance or in song

At last the closing season browns the plain,
 And ripe October gathers in the grain,
 Deep loaded carts the spacious corn-house fill,
 The sack distended marches to the mill;
 The lab'ring mill beneath the burthen groans,
 And show'rs the future pudding from the stones;
 Till the glad house-wife greets the powder'd gold,
 And the new crop exterminates the old.

The days grow short; but tho' the falling sun
 To the glad swain proclaims his day's work done,
 Night's pleasing shades his various tasks prolong,
 And yield new subjects to my various song
 For now, the corn-house fill'd, the harvest home,
 Th' invited neighbors to the *Husking* come,
 A frolic scene, where work, and mirth, and play,
 Unite their charms, to chace the hours away.

Where the huge heap lies center'd in the hall,
 The lamp suspended from the cheerful wall,
 Brown corn-fed nymphs, and strong hard-hand-
 beaux,

Alternate rang'd, extend in circling rows,
 Assume their seats, the solid mass attack;
 The dry husks rustle, and the corn-cobs crack;
 The song, the laugh, alternate notes resound,
 And the sweet cider trips in silence round.

The laws of Husking every wight can tell;
 And sure no laws he ever keeps so well
 For each red ear a general kiss he gains,
 With each smut ear he smuts the luckless swains;
 But when to some sweet maid a prize is cast,
 Red as her lips, and taper as her waist,
 She walks the round, and culls one favor'd beau,
 Who leaps, the luscious tribute to bestow.
 Various the sport, as are the wits and brains
 Of well-pleas'd lasses and contending swains;
 Till the vast mound of corn is swept away,
 And he that gets the last ear, wins the day.

Meanwhile the house-wife urges all her care,
 The well-earn'd feast to hasten and prepare.
 The sifted meal already waits her hand.
 The milk is strain'd, the bowls in order stand,
 The fire flames high; and, as a pool (that takes
 The headlong stream that o'er the mill-dam breaks)
 Foams, roars, and rages, with incessant toils,

216 Corinthian mould, the most ornamental of the Greek ca-
 orders • 259 the old. New Haven ed inserts

Ah, who can sing what every wight must feel,
 The joy that enters with the bag of meal,
 A general jubilee pervades the house,
 Wakes every child and gladdens every mouse.

So the vext cauldron rages, roars and boils
 First with clean salt she seasons well the food,
 Then strews the flour, and thickens all the flood.
 Long o'er the simmering fire she lets it stand;
 To stir it well demands a stronger hand;
 The husband takes his turn and round and round 300
 The ladle flies, at last the toil is crown'd,
 When to the board the thronging huskers pour.
 And take their seats as at the corn before.

I leave them to their feast. There still belong
 More copious matters to my faithful song
 For rules there are, tho' ne'er unfolded yet,
 Nice rules and wise, how pudding should be ate.

Some with molasses grace the luscious treat,
 And mix, like Bards, the useful with the sweet.
 A wholesome dish, and well deserving praise, 310
 A great resource in those bleak wintry days,
 When the chill'd earth lies buried deep in snow,
 And raging Boreas dries the shivering cow

Blest cow! thy praise shall still my notes employ,
 Great source of health, the only source of joy,
 Mother of Egypt's God,—but sure, for me,
 Were I to leave my God, I'd worship thee.
 How oft thy teats these pious hands have prest!
 How oft thy bounties proved my only feast!
 How oft I've fed thee with my fav'rite grain! 320
 And roar'd, like thee, to find thy children slain!

Ye swains who know her various worth to prize,
 Ah! house her well from Winter's angry skies
 Potatoes, pumpkins, should her sadness cheer,
 Corn from your crib, and mashes from your beer,
 When spring returns she'll well acquit the loan,
 And nurse at once your infants and her own

Milk then with pudding I should always chuse;
 To this in future I confine my Muse,
 Till she in haste some farther hints unfold, 330
 Well for the young, nor useless to the old
 First in your bowl the milk abundant take,
 Then drop with care along the silver lake
 Your flakes of pudding, these at first will hide
 Their little bulk beneath the swelling tide,
 But when their growing mass no more can sink,
 When the soft island looms above the brink,
 Then check your hand; you've got the portion's due,
 So taught our sires, and what they taught is true.

There is a choice in spoons. Tho' small appear 340

The nice distinction, yet to me 'tis clear.
 The deep-bowl'd Gallic spoon, contriv'd to scoop
 In ample draughts the thin diluted soup,
 Performs not well in these substantial things,
 Whose mass adhesive to the metal clings;
 Where the strong labial muscles must embrace,
 The gentle curve, and sweep the hollow space.
 With ease to enter and discharge the freight,
 A bowl less concave but still more dilate,
 Becomes the pudding best The shape, the size, 350
 A secret rests unknown to vulgar eyes.
 Experienc'd feeders can alone impart
 A rule so much above the lore of art.
 These tuneful lips, that thousand spoons have tried,
 With just precision could the point decide.
 Tho' not in song, the muse but poorly shines
 In cones, and cubes, and geometric lines,
 Yet the true form, as near as she can tell,
 Is that small section of a goose-egg shell,
 Which in two equal portions shall divide 360
 The distance from the centre to the side

Fear not to slaver, 'tis no deadly sin
 Like the free Frenchman, from your joyous chin
 Suspend the ready napkin, or, like me,
 Poise with one hand your bowl upon your knee;
 Just in the zenith your wise head project,
 Your full spoon, rising in a line direct,
 Bold as a bucket, heeds no drops that fall,
 The wide-mouth'd bowl will surely catch them all!

1793•1796

362 slaver, drool, slobber • 369 catch them all. New Haven ed inserts a note 'There are various ways of preparing and eating it, with molasses, butter, sugar, cream, and fried Why so excellent a thing cannot be eaten alone? Nothing is perfect alone, even man who boasts of so much perfection is nothing without his fellow substance In eating, beware of the lurking heat that lies deep in the mass, dip your spoon gently, take shallow dips and cool it by degrees It is sometimes necessary to blow This is indicated by certain signs which every experienced feeder knows They should be taught to young beginners I have known a child's tongue blistered for want of this attention, and then the school-dame would insist that the poor thing had told a lie. A mistake the falsehood was in the faithless pudding A prudent mother will cool it for her child with her own sweet breath The husband, seeing this, pretends his own wants blowing too from the same lips A sly deceit of love She knows the cheat, but feigning ignorance, lends her pouting lips and gives a gentle blast, which warms the husband's heart more than it cools his pudding'

William Cullen Bryant

1794 • 1878

When William Cullen Bryant was born, during Washington's second term as President, there were fifteen states in the Union, with Kentucky the only one west of the Alleghenies. When Bryant died, twenty-two of the thirty-eight states were "western," and the first transcontinental railroad had been in operation for nearly a decade. In this period of unparalleled expansion, Bryant, as a public-spirited citizen and the editor of an influential newspaper, had a conspicuous place and would be remembered even had he not written poetry. Sober, dignified, earnest in urging principles and policies in which he believed, he was recognized as a great liberal, and it is likely that he will command respect, for one reason or another, from each succeeding generation of Americans.

As a poet, Bryant has suffered from being called the American Wordsworth, or a belated representative of

New England Puritanism, or a cold child of the nineteenth century, only slightly affected by the warm influences of the Romantic movement. That there is some justice in each of these judgments cannot be denied, but Bryant may be better understood against the background of American expansion. His love of nature was typical of an age which was discovering the vastness and variety of American scenery, his moral earnestness was shared by the vast majority of his countrymen, although few of them, perhaps, were as untouched by denominational bigotry; and his conservative taste in the arts was in large part the result of the uncertainty of his generation toward standards and traditions. In Bryant's poetry, moreover, we can observe

Panel (l to r) "Monument Mountain" • William Cullen Bryant
• Broadway in 1840 • Bryant's birthplace, Cummington, Massachusetts

two magnetic poles of his time: the past, Europe, and the idea of continuity on the one hand, and on the other the future, the manifest destiny of America, and the hope of a new start toward a more perfect world.

Bryant was born at Cummington, in western Massachusetts, November 3, 1794. Brought up in a Calvinistic and Federalist environment, he took himself and the world very seriously as soon as he knew anything about them. His first verses appeared in a newspaper when he was ten, and he saw his first book in print five years later, when his father arranged for the publication of *The Embargo*, an attack on Jefferson's methods of avoiding entanglement in the Napoleonic conflict. He had only one year of college, at Williams, and then, because there was no livelihood in poetry, he turned to the study of law. Admitted to the bar in 1814, he practiced in several Massachusetts towns with moderate success, occasionally using his leisure for composing poems. After 1817, when his father sent some of his poems to a Boston friend and "Thanatopsis" came out in the *North American Review*, he became known as poet and reviewer for that periodical and others. In 1821 he married Fanny Fairchild, the "fairest of the rural maids"; theirs was an unusually happy marriage. During a visit to Boston in that same year, to read "The Ages" before the Phi Beta Kappa society at Harvard, Bryant arranged for the first collection of his poems. Thin volume though it was—it contained only eight pieces—the *Poems* of 1821 remains a landmark in American literary history.

Then, in 1825, Bryant had the courage to give up the law for the uncertainties of a literary life and deserted Massachusetts for New York City. Within a few months he formed a connection with the *Evening Post*, a daily newspaper which had been founded by Alexander Hamilton, in 1829 he became its editor-in-chief. Thereafter until his death in 1878 he was first of all the editor of the *Evening Post*; as a part owner he grew wealthy and was able to afford much European travel for himself and his family, as well as to establish a comfortable home at Roslyn on Long Island. His liberalism was most marked in his lifelong devotion to free trade, it may also be followed in his treatment of both national and local politics. In editorials, travel letters, and public discourses he persistently and fearlessly spoke out for

what he regarded the best interests of the American people, upholding the right of workingmen to organize, the abolition of slavery, and the rejected plans of Lincoln and Johnson for reconstruction of the South. A recital of his public services would be lengthy, and would include recognition of his part in the establishment of New York City's Central Park and Metropolitan Museum of Art, as well as his close connections with the National Academy of Design and the Century Association.

Busy as he was, Bryant continued to write poetry throughout his life, although not in great quantity. After 1821, the chief editions of his poems were those of 1832, 1836, 1847, 1854, 1871, and 1876. Other volumes of importance included *The Fountain and Other Poems* (1842), *The White Footed Deer and Other Poems* (1844), and *Thirty Poems* (1864). He also translated the *Iliad* and the *Odyssey* and published three volumes of travel letters as well as numerous commemorative discourses.

Bryant's poetry, although apparently simple, presents some very complicated problems, inadequately suggested by the familiar terms "classical" and "romantic." Lowell's famous description in *A Fable for Critics* ("... Bryant, as quiet, as cool, and as dignified, / As a smooth, silent iceberg, that never is ignifed") hints at the "classic" qualities of Bryant: his concern for form and clarity, harmony and serenity. That Bryant owed much to such English poets as James Thomson and William Cowper is clear. Yet his poetic theories and, more particularly, his themes—the past, death, freedom, nature—have much in them that is ordinarily called "romantic." Thoughtful consideration of his work will show how largely a matter of degree is the distinction between the classical and the romantic, and, for most readers, will bring respect for the mind of a man who was much more than a transition figure in the growth of American literature.

Bradley, *William Cullen Bryant*, English Men of Letters Series, New York, 1905.

Thanatopsis

Bryant's best-known poem, "Thanatopsis" (meaning "view of death"), was in large part written in 1811, when he was only sixteen. Six years later, without his knowledge, his father sent it and other pieces to the *North American Review*. The story goes that Richard Henry Dana, later one of Bryant's closest friends, remarked on seeing the manuscript that no one in America was capable of writing such verses. Thinking that another poem on death, consisting of four stanzas in iambic tetrameter rhyming *abab*, was a part of "Thanatopsis," the editors of the *North American* published both under one title in the issue for September 1817. When Bryant prepared the *Poems* of 1821, he added lines 1-17 (to "Yet a few days") as an introduction, and sixteen lines at the end (beginning with "As the long train").

The poem should be read in the light of both literary tradition and Bryant's own religious background. From the English poets (notably Henry Kirke White, Robert Blair, Bishop Beilby Porteus, Robert Southey, and William Cowper) he learned of the possibilities of blank verse and the themes of the "graveyard school" of writers. Even had he not read these poets, however, he would have had, from his Puritan background, a predilection for the funeral. Note, however, that Bryant's concept of Man's long sleep is more Stoic than Christian, with no hint of the resurrection or immortality of the soul

To him who in the love of Nature holds
Communion with her visible forms, she speaks
A various language, for his gayer hours
She has a voice of gladness, and a smile
And eloquence of beauty, and she glides
Into his darker musings, with a mild
And healing sympathy, that steals away
Their sharpness, ere he is aware. When thoughts
Of the last bitter hour come like a blight
Over thy spirit, and sad images
Of the stern agony, and shroud, and pall,
And breathless darkness, and the narrow house,
Make thee to shudder, and grow sick at heart;—

Go forth, under the open sky, and list
To Nature's teachings, while from all around—
Earth and her waters, and the depths of air—
Comes a still voice—Yet a few days, and thee
The all-beholding sun shall see no more
In all his course, nor yet in the cold ground,
Where thy pale form was laid, with many tears,
Nor in the embrace of ocean, shall exist
Thy image. Earth, that nourished thee, shall claim
Thy growth, to be resolved to earth again,
And, lost each human trace, surrendering up
Thine individual being, shalt thou go
To mix for ever with the elements,
To be a brother to the insensible rock
And to the sluggish clod, which the rude swain
Turns with his share, and treads upon. The oak
Shall send his roots abroad, and pierce thy mould.

Yet not to thine eternal resting-place
Shalt thou retire alone, nor couldst thou wish
Couch more magnificent. Thou shalt lie down
With patriarchs of the infant world—with kings,
The powerful of the earth—the wise, the good,
Fair forms, and hoary seers of ages past,
All in one mighty sepulchre. The hills
Rock-ribbed and ancient as the sun,—the vales
Stretching in pensive quietness between;
The venerable woods—rivers that move
In majesty, and the complaining brooks
That make the meadows green, and, poured round all
Old Ocean's gray and melancholy waste,—
Are but the solemn decorations all
Of the great tomb of man. The golden sun,
The planets, all the infinite host of heaven,
Are shining on the sad abodes of death,
Through the still lapse of ages. All that tread
The globe are but a handful to the tribes
That slumber in its bosom.—Take the wings
Of morning, pierce the Barcan wilderness,
Or lose thyself in the continuous woods

Text: here, as in the poems which follow, is the 1876 edition • 51 p
. . . wilderness *North American* and the Borean desert p

desert sands, present reading, 1871 Barca is the ancient name of
part of Libya east of Tripoli, its capital being Benghazi. Bryant seem
have had the idea, common in his time, that there was a Sahara
desert west of the Mississippi

Where rolls the Oregon, and hears no sound,
 Save his own dashings—yet the dead are there.
 And millions in those solitudes, since first
 The flight of years began, have laid them down
 In their last sleep—the dead reign there alone.
 So shalt thou rest, and what if thou withdraw
 In silence from the living, and no friend
 Take note of thy departure? All that breathe 60
 Will share thy destiny. The gay will laugh
 When thou art gone, the solemn brood of care
 Plod on, and each one as before will chase
 His favorite phantom; yet all these shall leave
 Their mirth and their employments, and shall come
 And make their bed with thee. As the long train
 Of ages glide away, the sons of men,
 The youth in life's green spring, and he who goes
 In the full strength of years, matron and maid,
 The speechless babe, and the gray-headed man— 70
 Shall one by one be gathered to thy side,
 By those, who in their turn shall follow them

So live, that when thy summons comes to join
 The innumerable caravan, which moves
 To that mysterious realm, where each shall take
 His chamber in the silent halls of death,
 Thou go not, like the quarry-slave at night,
 Scourged to his dungeon, but, sustained and soothed
 By an unfaltering trust, approach thy grave,
 Like one who wraps the drapery of his couch
 About him, and lies down to pleasant dreams
 1811-1817-1821

Inscription for the Entrance to a Wood

Nowhere, perhaps, does Bryant express more happily the romantic view of nature than in "A Fragment," which first appeared in the *North American Review* for September 1817 with "Thanatopsis." In the *Poems* of 1821 it was entitled "Inscription for the Entrance into a Wood." Note that nature is a joy and a solace to man, not, as the post-Darwinians tell us, an arena for the struggle to survive.

Stranger, if thou hast learned a truth which needs
 No school of long experience, that the world
 Is full of guilt and misery, and hast seen
 Enough of all its sorrows, crimes, and cares,
 To tire thee of it, enter this wild wood
 And view the haunts of Nature. The calm shade
 Shall bring a kindred calm, and the sweet breeze
 That makes the green leaves dance, shall waft a balm
 To thy sick heart. Thou wilt find nothing here 10
 Of all that pained thee in the haunts of men,
 And made thee loathe thy life. The primal curse
 Fell, it is true, upon the unsinning earth,
 But not in vengeance. God hath yoked to guilt
 Her pale tormentor, misery. Hence, these shades
 Are still the abodes of gladness, the thick roof
 Of green and stirring branches is alive
 And musical with birds, that sing and sport
 In wantonness of spirit; while below
 The squirrel, with raised paws and form erect,
 Chirps merrily. Throngs of insects in the shade 20
 Try their thin wings and dance in the warm beam
 That waked them into life. Even the green trees
 Partake the deep contentment, as they bend

Thanatopsis • 53 *Where . . . and* NA That veil Oregon, where he, 1821 *Where rolls the Oregon, and* The Oregon is Bryant's name for the Columbia River • 58 *withdraw* NA, 1821, 1832 shalt fall • 59 *In silence from* NA, 1821 Unnoticed by, 1832, 1847 Unheeded by • 60 *All that breathe.* NA Thousands more • 61 *The gay . . . care.* NA The titting world Dance to the grave The busy brood of care • 63 *as . . . chase* NA chases as before 1821 The bow'd with age, the infant in the smiles, 1832, 1847, 1854 And the sweet babe, and the gray-headed man • 74 *which* 1821, 1832, 1847 that • 75 *that mysterious realm* 1821 the pale realms of shade

To guilt Hence in these shades we still behold
 The abodes of gladness, here from tree to tree
 And through the rustling branches flit the birds
 In wantonness of spirit,—theirs are strains
 Of no dissembled rapture—while below
 The squirrel with rais'd paws and form erect
 Chirps merrily In the warm glade the throngs
 Of dancing insects sport in the mild beam
 That wak'd them into life

1821 Misery is wed
 To guilt And hence the shades are still the abodes
 Of undissembled gladness, the thick roof

which is followed by the present version except for the use of "glade" instead of "shade" in line 20 By 1832 Bryant had come to the present reading

To the soft winds, the sun from the blue sky
 Looks in and sheds a blessing on the scene
 Scarce less the cleft-born wild-flower seems to enjoy
 Existence, than the wingèd plunderer
 That sucks its sweets The mossy rocks themselves,
 And the old and ponderous trunks of prostrate trees
 That lead from knoll to knoll a causey rude 30
 Or bridge the sunken brook, and their dark roots,
 With all their earth upon them, twisting high,
 Breathe fixed tranquillity The rivulet
 Sends forth glad sounds, and tripping o'er its bed
 Of pebbly sands, or leaping down the rocks,
 Seems, with continuous laughter, to rejoice
 In its own being Softly tread the marge,
 Lest from her midway perch thou scare the wren
 That dips her bill in water The cool wind,
 That stirs the stream in play, shall come to thee, 40
 Like one that loves thee nor will let thee pass
 Ungreeted, and shall give its light embrace.

1817

To a Waterfowl

This poem, which Matthew Arnold believed the finest of its length in the English language, was composed by Bryant after a walk from Cummington to Plainfield, Massachusetts, in December 1815. It was first published in the *North American Review* for March 1818 and collected in the *Poems* of 1821. The clarity of the central image and the aptness and simplicity of the moral analogy have always been admired, even by those who dislike "preaching" in poetry. The effect of the stanza form has been described as "gliding," appropriate to the visual image of the second stanza.

Whither, midst falling dew,
 While glow the heavens with the last steps of day,
 Far, through their rosy depths, dost thou pursue
 Thy solitary way?

Vainly the fowler's eye
 Might mark thy distant flight to do thee wrong,

As, darkly seen against the crimson sky,
 Thy figure floats along

Seek'st thou the plashy brink
 Of weedy lake, or marge of river wide,
 Or where the rocking billows rise and sink
 On the chafed ocean-side?

There is a Power whose care
 Teaches thy way along that pathless coast—
 The desert and illimitable air—
 Lone wandering, but not lost

All day thy wings have fanned,
 At that far height, the cold, thin atmosphere,
 Yet stoop not, weary, to the welcome land,
 Though the dark night is near

And soon that toil shall end,
 Soon shalt thou find a summer home, and rest,
 And scream among thy fellows; reeds shall bend,
 Soon, o'er thy sheltered nest

Thou'rt gone, the abyss of heaven
 Hath swallowed up thy form, yet, on my heart
 Deeply hath sunk the lesson thou hast given,
 And shall not soon depart

He who, from zone to zone,
 Guides through the boundless sky thy certain flight,
 In the long way that I must tread alone,
 Will lead my steps aright

1815·1

A Forest Hymn

"A Hymn" first appeared in the *United States Literary Gazette* for April 1, 1825, over the signature of "B." It was reprinted as "Forest Hymn" in the *Poems* of 1832.

Inscription • 25 *Looks*. 1817 *Peeps* • 28 *mossy*. Until 1854 *moss*
 30 *causey* 1817 *causeway* • 31 *brook* 1817 *stream* • 39 *in we*
 The 1817 version ends with these words

To a Waterfowl • 5 *fowler's*, *hunter's* • 9 *plashy*, *marshy*

cept for minor changes in capitalization, punctuation, and spelling, Bryant left the poem pretty well alone down through the years. Thought to have been composed at Great Barrington early in 1825, it has always been praised for the simplicity and sincerity of its quiet love of the revelation of God in external nature

The groves were God's first temples Ere man learned
To hew the shaft, and lay the architrave,
And spread the roof above them—ere he framed
The lofty vault, to gather and roll back
The sound of anthems, in the darkling wood,
Amid the cool and silence, he knelt down,
And offered to the Mightiest solemn thanks
And supplication For his simple heart
Might not resist the sacred influences
Which, from the stilly twilight of the place 10
And from the gray old trunks that high in heaven
Mingled their mossy boughs, and from the sound
Of the invisible breath that swayed at once
All their green tops, stole over him, and bowed
His spirit with the thought of boundless power
And inaccessible majesty Ah, why
Should we, in the world's riper years, neglect
God's ancient sanctuaries, and adore
Only among the crowd, and under roofs
That our frail hands have raised? Let me, at least, 20
Here, in the shadow of this aged wood,
Offer one hymn—thrice happy, if it find
Acceptance in His ear

Father, thy hand
Hath reared these venerable columns, thou
Didst weave this verdant roof. Thou didst look down
Upon the naked earth, and, forthwith, rose
All these fair ranks of trees They, in thy sun,
Budded, and shook their green leaves in thy breeze,
And shot toward heaven The century-living crow 30
Whose birth was in their tops, grew old and died
Among their branches, till, at last, they stood,
As now they stand, massy, and tall, and dark,
Fit shrine for humble worshipper to hold
Communion with his Maker These dim vaults
These winding aisles, of human pomp or pride
Report not. No fantastic carvings show
The boast of our vain race to change the form

Of thy fair works But thou art here—thou fill'st
The solitude Thou art in the soft winds 40
That run along the summit of these trees
In music, thou art in the cooler breath
That from the inmost darkness of the place
Comes, scarcely felt, the barky trunks, the ground,
The fresh moist ground, are all instinct with thee
Here is continual worship,—Nature, here,
In the tranquillity that thou dost love,
Enjoys thy presence Noiselessly, around,
From perch to perch, the solitary bird
Passes, and yon clear spring, that, midst its herbs, 50
Wells softly forth and wandering steep the roots
Of half the mighty forest, tells no tale
Of all the good it does Thou hast not left
Thyself without a witness, in these shades,
Of thy perfections Grandeur, strength, and grace,
Are here to speak of thee This mighty oak—
By whose immovable stem I stand and seem
Almost annihilated—not a prince,
In all that proud old world beyond the deep,
E'er wore his crown as loftily as he 60
Wears the green coronal of leaves with which
Thy hand has graced him Nestled at his root
Is beauty, such as blooms not in the glare
Of the broad sun That delicate forest flower,
With scented breath and look so like a smile,
Seems, as it issues from the shapeless mould,
An emanation of the indwelling Life,
A visible token of the upholding Love,
That are the soul of this great universe

My heart is awed within me when I think 70
Of the great miracle that still goes on,
In silence, round me—the perpetual work
Of thy creation, finished, yet renewed
Forever Written on thy works I read
The lesson of thy own eternity

2 shaft, column • 2 architrave, in classical architecture, that part of the entablature, or lintel, lying between the capital and the frieze Bryant was thinking first of the Greek temple and then (1 lofty vault, 1 4) of the Gothic cathedral • 30 century-living crow The long life of the crow, or raven, is traditional, there are said to be instances of captive ravens that have lived nearly a hundred years • 37 fantastic carvings At this period of his life, Bryant apparently cared little for Gothic architecture

Lo! all grow old and die—but see again,
 How on the faltering footsteps of decay
 Youth presses—ever-gay and beautiful youth
 In all its beautiful forms These lofty trees
 Wave not less proudly that their ancestors
 Moulder beneath them Oh, there is not lost
 One of earth's charms upon her bosom yet,
 After the flight of untold centuries,
 The freshness of her far beginning lies
 And yet shall lie. Life mocks the idle hate
 Of his arch-enemy Death—yea, seats himself
 Upon the tyrant's throne—the sepulchre,
 And of the triumphs of his ghastly foe
 Makes his own nourishment For he came forth
 From thine own bosom, and shall have no end

I Cannot Forget With What Fervid Devotion

Nine "Stanzas" by "X. X." appeared in the *New-Review and Atheneum Magazine* for February 1832. When Bryant prepared the 1832 edition of his poem, he condensed this piece to seven stanzas. The poem is thought to have been written at Cummington in 1825, when Bryant was only twenty-one, but the nostalgia for the dreams of his early youth was recurrent throughout his life.

There have been holy men who hid themselves
 Deep in the woody wilderness, and gave
 Their lives to thought and prayer, till they outlived
 The generation born with them, nor seemed
 Less aged than the hoary trees and rocks
 Around them—and there have been holy men
 Who deemed it were not well to pass life thus.
 But let me often to these solitudes
 Retire, and in thy presence reassure
 My feeble virtue Here its enemies,
 The passions, at thy plainer footsteps shrink
 And tremble and are still Oh, God! when thou
 Dost scare the world with tempests, set on fire
 The heavens with falling thunderbolts, or fill,
 With all the waters of the firmament,
 The swift dark whirlwind that uproots the woods
 And drowns the villages, when, at thy call,
 Uprises the great deep and throws himself
 Upon the continent, and overwhelms
 Its cities—who forgets not, at the sight
 Of these tremendous tokens of thy power,
 His pride, and lays his strifes and follies by?
 Oh, from these sterner aspects of thy face
 Spare me and mine, nor let us need the wrath
 Of the mad, unchained elements to teach
 Who rules them Be it ours to meditate,
 In these calm shades, thy milder majesty,
 And to the beautiful order of thy works
 Learn to conform the order of our lives.

110

1825

I cannot forget with what fervid devotion

I worshipped the visions of verse and of fame,
 Each gaze at the glories of earth, sky, and ocean,
 To my kindled emotions, was wind over flame

And deep were my musings in life's early blossom
 'Mid the twilight of mountain-groves wandering
 How thrilled my young veins, and how throbbed
 full bosom,

When o'er me descended the spirit of song!

'Mong the deep-cloven fells that for ages had listened
 To the rush of the pebble-paved river between,
 Where the kingfisher screamed and gray precipice
 glistened,

All breathless with awe have I gazed on the scene

Till I felt the dark power o'er my reveries stealing,
 From the gloom of the thickets that over me hung
 And the thoughts that awoke, in that rapture of feeling
 Were formed into verse as they rose to my tongue

Bright visions! I mixed with the world, and ye faded
 No longer your pure rural worshipper now,
 In the haunts your continual presence pervaded,
 Ye shrink from the signet of care on my brow.

9 fells, mountains, rocky uplands 1832

From his throne in the depth of that stern solitude,
 And he breathed through my lips, in that tempest of feeling,
 Strains warm with his spirit, though artless and rude.

In the old mossy groves on the breast of the mountain,
 In deep lonely glens where the waters complain,
 By the shade of the rock, by the gush of the fountain,
 I seek your loved footsteps, but seek them in vain

Oh, leave not forlorn and forever forsaken,
 Your pupil and victim to life and its tears!
 But sometimes return, and in mercy awaken
 The glories ye showed to his earlier years

1815?-1826

A Meditation on Rhode Island Coal

Humor and awareness of the technological advances of the age are pleasantly combined in "A Meditation on Rhode Island Coal," first published in the *New-York Review and Atheneum Magazine* for April 1826

*Decolor, obscurus, vilis, non ille repexam
 Cesariem regum, non candida virginis ornat
 Colla, nec insigni splendet per cingula morsu
 Sed nota si nigri videas miracula saxi.
 Tunc superat pulchros cultus et quicquid Eois
 Indus litoribus rubra scrutatur in alga*—CLAUDIAN

I sit beside the glowing grate, fresh heaped
 With Newport coal, and as the flame grew bright
 —The many-colored flame—and played and leaped,
 I thought of rainbows, and the northern light,
 Moore's Lalla Rookh, the Treasury Report,
 And other brilliant matters of the sort

And last I thought of that fair isle which sent
 The mineral fuel, on a summer day
 I saw it once, with heat and travel spent,
 And scratched by dwarf-oaks in the hollow way 10
 Now dragged through sand, now jolted over stone—
 A rugged road through rugged Tiverton.

And hotter grew the air, and hollower grew
 The deep-worn path, and horror-struck, I thought,
 Where will this dreary passage lead me to?

This long dull road, so narrow, deep, and hot?
 I looked to see it dive in earth outright;
 I looked—but saw a far more welcome sight.

Like a soft mist upon the evening shore,
 At once a lovely isle before me lay, 20
 Smooth, and with tender verdure covered o'er,
 As if just risen from its calm inland bay,
 Sloped each way gently to the grassy edge,
 And the small waves that dallied with the sedge

The barley was just reaped, the heavy sheaves
 Lay on the stubble-field, the tall maize stood
 Dark in its summer growth, and shook its leaves,
 And bright the sunlight played on the young wood—
 For fifty years ago, the old men say,
 The Briton hewed their ancient groves away 30

I saw where fountains freshened the green land,
 And where the pleasant road, from door to door,
 With rows of cherry-trees on either hand,
 Went wandering all that fertile region o'er—
 Rogue's Island once—but when the rogues were dead,
 Rhode Island was the name it took instead

Beautiful island! then it only seemed
 A lovely stranger, it has grown a friend

Claudian • The message is from a poem on the magnet, by Claudianus (365?-408), to be found among his *Carminum Minorum Corpusculum* (XXIX, ll 10-15). The sense is: Black, dull, and common, it does not adorn the braided hairs of kings nor the snowy necks of girls, nor shine in the jewelled buckles of warriors' belts. But consider the marvelous properties of this dull-looking stone and you will see that it is of more worth than lovely gems and any pearl sought of Indian amid the seaweed on the Red Sea's shore • 2 **Newport coal**. Rhode Island coal was actually mined near Portsmouth on the northern part of the island in Narragansett Bay called Aquidneck by the Indians, on which Newport is located • 5 **Lalla Rookh**. Part III of the poem by Thomas Moore (1779-1852) deals with Oriental fire worshippers • 5 **the Treasury Report**. Since 1800, the law has required that the secretary of the treasury make an annual report of the state of the finances • 12 **Tiverton**, on the mainland north and east of Rhode Island proper • 29 **fifty years ago**, during the British occupation of Newport, between 1776 and 1779, when much timber was cut for firewood • 31 **fountains, springs** • 35 **Rogue's Island**. Bryant's etymology is not admitted by Rhode Island folk, who attribute the name Rhode Island to Giovanni da Verrazano, a Florentine sailing under the flag of France, who visited Narragansett Bay in 1524 and thought it looked like the extensive harbors of the island of Rhodes in the Mediterranean

I gazed on its smooth slopes, but never dreamed
How soon that green and quiet isle would send 40
The treasures of its womb across the sea,
To warm a poet's room and boil his tea

Dark anthracite! that reddenest on my hearth.
Thou in those island mines didst slumber long,
But now thou art come forth to move the earth,
And put to shame the men that mean thee wrong.
Thou shalt be coals of fire to those that hate thee,
And warm the shins of all that underrate thee

Yea, they did wrong thee foully—they who mocked
Thy honest face, and said thou wouldst not burn, 50
Of hewing thee to chimney-pieces talked.

And grew profane, and swore, in bitter scorn,
That men might to thy inner caves retire,
And there, unsinged, abide the day of fire

Yet is thy greatness nigh I pause to state,
That I too have seen greatness—even I—
Shook hands with Adams, stared at La Fayette,
When, barehead, in the hot noon of July,
He would not let the umbrella be held o'er him,
For which three cheers burst from the mob before him 60

And I have seen—not many months ago—
An Eastern Governor in chapeau bras
And military coat, a glorious show!
Ride forth to visit the reviews, and ah!
How oft he smiled and bowed to Jonathan!
How many hands were shook and votes were won!

'Twas a great Governor; thou too shalt be
Great in thy turn, and wide shall spread thy fame
And swiftly, farthest Maine shall hear of thee. 70
And cold New Brunswick gladden at thy name,
And, faintly through its sleets, the weeping isle
That sends the Boston folks their cod shall smile

For thou shalt forge vast railways, and shalt heat
The hissing rivers into steam, and drive
Huge masses from thy mines, on iron feet,
Walking their steady way, as if alive,
Northward, till everlasting ice besets thee.
And South as far as the grim Spaniard lets thee.

472 Bryant

Thou shalt make mighty engines swim the sea,
Like its own monsters—boats that for a guinea
Will take a man to Havre—and shalt be
The moving soul of many a spinning-jenny,
And ply thy shuttles, till a bard can wear
As good a suit of broadcloth as the mayor.

Then we will laugh at winter when we hear
The grim old churl about our dwellings rave:
Thou, from that "ruler of the inverted year,"
Shalt pluck the knotty sceptre Cowper gave,
And pull him from his sledge, and drag him in,
And melt the icicles from off his chin

1

To Cole, the Painter Departing for Europe

Thomas Cole (1801-1848), lionized in New York City in 1820's for his discovery of native subjects for landscape paintings, was one of Bryant's numerous friends in world of art. The two men, companions on walking trips in the Catskills, were remarkably similar in their tastes and accomplishments. From the Hudson River scenes which gave him reputation Cole turned to allegories and myths.

43 *anthracite* Rhode Island coal is so compressed that it is much difficult to ignite than ordinary hard coal, it is no longer commercially mined • 57 *Shook* . . . *La Fayette*. Bryant probably saw Lafayette when he took part in the Fourth of July celebration at New York in 1825, the end of his triumphal tour of the United States, the other reference is probably to John Adams, still living in Quincy, Massachusetts, the poem was written • 62 *Eastern* . . . *chapeau bras*, that is three-cornered hat, of the late-eighteenth-century fashion. The go was perhaps De Witt Clinton (1769-1828) • 71 *weeping isle*, Newfoundland, notorious for its fogs • 87 "ruler . . . year," from Bk. IV, "The Winter Evening," of Cowper's *The Task* (1790) his chin. In the *New-York Review* there was an additional somewhat more convivial and topical than those Bryant retains refers to the famous punch of Newport and the "Lunch"—the Lemon and Cheese Club in which James Fenimore Cooper was the leading member. Heat will be cheap—a small consideration. Will put one in a way to raise his punch, Set lemon-trees, and have a cane plantation—'Twill be a pretty saving to the Lunch. Then the West India Negroes may go play The banjo and keep endless holiday

izing in such series of paintings as "The Course of Empire" and "The Voyage of Life," both remarkably like Bryant's "The Flood of Years." Cole, born in England, came to the United States at eighteen, and in later life is said to have remarked that he would give his left hand to have been a native American. The nationalistic tone of Bryant's tribute is therefore quite appropriate.

Thine eyes shall see the light of distant skies,
 Yet, COLE! thy heart shall bear to Europe's strand
 A living image of our own bright land,
 Such as upon thy glorious canvas lies,
 Lone lakes—savannas where the bison roves—
 Rocks rich with summer garlands—solemn streams—
 Skies, where the desert eagle wheels and screams—
 Spring bloom and autumn blaze of boundless groves
 Fair scenes shall greet thee where thou goest—fair,
 But different—everywhere the trace of men, 10
 Paths, homes, graves, ruins, from the lowest glen
 To where life shrinks from the fierce Alpine air—
 Gaze on them, till the tears shall dim thy sight,
 But keep that earlier, wilder image bright

1829

The Prairies

About 1830, two of Bryant's younger brothers went west to take up land, eventually settling at Princeton, Illinois. Visiting them in the summer of 1832, the poet rode on horseback northward a hundred miles from Jacksonville "The Prairies," in which he combined his impressions on this trip with his well-tried themes of the ruins of empire and the transience of human life, was first published in the Knickerbocker for December 1833. The last lines suggest that he believed it was the "manifest destiny" of the United States to occupy the entire North American continent.

These are the gardens of the Desert, these
 The unshorn fields, boundless and beautiful,
 In which the speech of England has no name—
 The Prairies. I behold them for the first,

And my heart swells, while the dilated sight
 Takes in the encircling vastness. Lo! they stretch
 In airy undulations, far away,
 As if the Ocean, in his gentlest swell,
 Stood still, with all his rounded billows fixed,
 And motionless for ever Motionless'— 10
 No—they are all unchained again The clouds
 Sweep over with their shadows, and, beneath,
 The surface rolls and fluctuates to the eye,
 Dark hollows seem to glide along and chase
 The sunny ridges Breezes of the South!
 Who toss the golden and the flame-like flowers,
 And pass the prairie-hawk that, poised on high,
 Flaps his broad wings, yet moves not—ye have played
 Among the palms of Mexico and vines
 Of Texas, and have crisped the limpid brooks 20
 That from the fountains of Sonora glide
 Into the calm Pacific—have ye fanned
 A nobler or a lovelier scene than this?
 Man hath no part in all this glorious work—
 The hand that built the firmament hath heaved
 And smoothed these verdant swells, and sown their slopes
 With herbage, planted them with island-groves,
 And hedged them round with forests Fitting floor
 For this magnificent temple of the sky—
 With flowers whose glory and whose multitude 30
 Rival the constellations' The great heavens
 Seem to stoop down upon the scene in love,—
 A nearer vault, and of a tenderer blue,
 Than that which bends above our Eastern hills

As o'er the verdant waste I guide my steed,
 Among the high rank grass that sweeps his sides

To Cole . . . • 3 our own bright Bryant seems not to have known that Cole was English-born until he delivered a funeral oration on Cole before the National Academy of Design in 1848

The Prairies • 3 no name. "Prairie," French in origin, seems to have come into general use in American English late in the eighteenth century • 13 The surface . . . eye "The prairies of the West, with an undulating surface, rolling prairies, as they are called, present to the unaccustomed eye a singular spectacle when the shadows of the clouds are passing rapidly over them. The face of the ground seems to fluctuate and toss like billows of the sea"—Bryant • 17 the prairie-hawk . . . not I have seen the prairie-hawk balancing himself in the air for hours together, apparently over the same spot, probably watching his prey"—Bryant • 21 Sonora, a state in the northwestern part of Mexico

The hollow beating of his footstep seems
 A sacrilegious sound I think of those
 Upon whose rest he tramples Are they here—
 The dead of other days?—and did the dust
 Of these fair solitudes once stir with life
 And burn with passion? Let the mighty mounds
 That overlook the rivers, or that rise
 In the dim forest crowded with old oaks.
 Answer. A race, that long has passed away,
 Built them, a disciplined and populous race
 Heaped, with long toil, the earth, while yet the Greek
 Was hewing the Pentelicus to forms
 Of symmetry, and rearing on its rock
 The glittering Parthenon These ample fields
 Nourished their harvests, here their herds were fed,
 When haply by their stalls the bison lowed,
 And bowed his manèd shoulder to the yoke.
 All day this desert murmured with their toils,
 Till twilight blushed, and lovers walked, and wooed
 In a forgotten language, and old tunes,
 From instruments of unremembered form,
 Gave the soft winds a voice The red-man came—
 The roaming hunter-tribes, warlike and fierce,
 And the mound-builders vanished from the earth.
 The solitude of centuries untold
 Has settled where they dwelt The prairie-wolf
 Hunts in their meadows, and his fresh-dug den
 Yawns by my path The gopher mines the ground
 Where stood their swarming cities All is gone,
 All—save the piles of earth that hold their bones.
 The platforms where they worshipped unknown gods,
 The barriers which they builded from the soil
 To keep the foe at bay—till o'er the walls
 The wild beleaguers broke, and, one by one,
 The strongholds of the plain were forced, and heaped
 With corpses The brown vultures of the wood
 Flocked to those vast uncovered sepulchres,
 And sat, unscared and silent, at their feast.
 Haply some solitary fugitive,
 Lurking in marsh and forest, till the sense
 Of desolation and of fear became
 Bitterer than death, yielded himself to die
 Man's better nature triumphed then. Kind words
 Welcomed and soothed him; the rude conquerors
 Seated the captive with their chiefs; he chose
 A bride among their maidens, and at length

40

50

60

70

80

Seemed to forget—yet ne'er forgot—the wife
 Of his first love, and her sweet little ones,
 Butchered, amid their shrieks, with all his race.

Thus change the forms of being Thus arise
 Races of living things, glorious in strength,
 And perish, as the quickening breath of God
 Fills them, or is withdrawn. The red-man, too,
 Has left the blooming wilds he ranged so long.
 And, nearer to the Rocky Mountains, sought
 A wilder hunting-ground. The beaver builds
 No longer by these streams, but far away,
 On waters whose blue surface ne'er gave back
 The white man's face—among Missouri's springs,
 And pools whose issues swell the Oregon,
 He rears his little Venice In these plains
 The bison feeds no more Twice twenty leagues
 Beyond remotest smoke of hunter's camp,
 Roams the majestic brute, in herds that shake
 The earth with thundering steps—yet here I meet
 His ancient footprints stamped beside the pool.

Still this great solitude is quick with life
 Myriads of insects, gaudy as the flowers
 They flutter over, gentle quadrupeds,
 And birds, that scarce have learned the fear of man,
 Are here, and sliding reptiles of the ground,
 Startlingly beautiful The graceful deer
 Bounds to the wood at my approach The bee,

42 mighty mounds. In the forty-two lines which follow, Bryant is upon the theory, common in his time but now generally rejected, the burial, ceremonial, and earthwork mounds of the Mississippi Valley were not constructed by the ancestors of the Indians, but by an earlier race, the Mound Builders. There are said to be ten thousand mounds in Illinois alone, Bryant's letters reveal that he had excavated some near St. Louis. • 48 Pentelicus, a mountain range some northeast of Athens, where an unusually white marble was quarried. 50 Parthenon, a temple dedicated to Athena Parthenos on the Acropolis in Athens. Completed about 435 B.C., it is still one of the great monuments of the ancient world. • 50 These . . . harvests. "The size and extent of the mounds in the valley of the Mississippi indicate the existence, at a remote period, of a nation at once populous and industrious, and therefore probably subsisting by agriculture."—Bryant. 52 bison. There is little evidence that the American buffalo was domesticated. • 80 the rude . . . chiefs. Instances are not wanting of generosity like this among the North American Indians toward a captive or survivor of a hostile tribe on which the greatest cruelties had been exercised."—Bryant

A more adventurous colonist than man, 110
 With whom he came across the eastern deep,
 Fills the savannas with his murmurings,
 And hides his sweets, as in the golden age,
 Within the hollow oak. I listen long
 To his domestic hum, and think I hear
 The sound of that advancing multitude
 Which soon shall fill these deserts. From the ground
 Comes up the laugh of children, the soft voice
 Of maidens, and the sweet and solemn hymn
 Of Sabbath worshippers The low of herds 120
 Blends with the rustling of the heavy grain
 Over the dark-brown furrows All at once
 A fresher wind sweeps by, and breaks my dream.
 And I am in the wilderness alone

1832-1833

Earth

When Bryant first visited Europe in 1834-1836, most of Italy was under Austrian rule, and the liberation movement led by Mazzini was only slowly gathering strength. Although he was impressed by the grandeur of Italian scenery, Bryant was evidently deeply disturbed by first-hand acquaintance with the bloody history of the Old World. He wrote "Earth" at Pisa in 1834, sending it back to be printed in the *New-York Mirror* for March 28, 1835. In the poem he approaches bitter pessimism, he cannot be entirely happy even in his hope for America. Man is not merely insignificant, in the light of European history, he is evil. Like Whitman, Bryant perceived that for the United States, too, greatness was not to be easily achieved.

A midnight black with clouds is in the sky,
 I seem to feel, upon my limbs, the weight
 Of its vast brooding shadow All in vain
 Turns the tired eye in search of form, no star
 Pierces the pitchy veil, no ruddy blaze,
 From dwellings lighted by the cheerful hearth,
 Tinges the flowering summits of the grass
 No sound of life is heard, no village hum,
 Nor measured tramp of footstep in the path,
 Nor rush of wind, while, on the breast of Earth, 10

I lie and listen to her mighty voice
 A voice of many tones—sent up from streams
 That wander through the gloom, from woods unseen
 Swayed by the sweeping of the tides of air,
 From rocky chasms where darkness dwells all day,
 And hollows of the great invisible hills,
 And sands that edge the ocean, stretching far
 Into the night—a melancholy sound!

O Earth! dost thou too sorrow for the past
 Like man thy offspring? Do I hear thee mourn 20
 Thy childhood's unreturning hours, thy springs
 Gone with their genial airs and melodies,
 The gentle generations of thy flowers,
 And thy majestic groves of olden time,
 Perished with all their dwellers? Dost thou wail
 For that fair age of which the poets tell,
 Ere yet the winds grew keen with frost, or fire
 Fell with the rains or spouted from the hills,
 To blast thy greenness, while the virgin night
 Was guiltless and salubrious as the day? 30
 Or haply dost thou grieve for those that die—
 For living things that trod thy paths awhile,
 The love of thee and heaven—and now they sleep
 Mixed with the shapeless dust on which thy herds
 Trample and graze? I too must grieve with thee,
 O'er loved ones lost. Their graves are far away
 Upon thy mountains, yet, while I recline
 Alone, in darkness, on thy naked soil,
 The mighty nourisher and burial-place
 Of man, I feel that I embrace their dust 40

Ha! how the murmur deepens! I perceive
 And tremble at its dreadful import Earth
 Uplifts a general cry for guilt and wrong,
 And heaven is listening The forgotten graves
 Of the heart-broken utter forth their plaint
 The dust of her who loved and was betrayed,
 And him who died neglected in his age,

The Prairies • 111 came . . . deep Although the point is disputed, most authorities agree that the honeybee was not native to North America
Earth • 22 Gone . . . melodies *Mirror* brief time of genial airs and melody • 36 loved ones lost Bryant's grief for his father, who died in 1820, and his favorite sister, who died in 1824, is also expressed in "The Past," "The Death of the Flowers," and "Consumption"

The sepulchres of those who for mankind
 Labored, and earned the recompense of scorn,
 Ashes of martyrs for the truth, and bones
 Of those who, in the strife for liberty,
 Were beaten down, their corpses given to dogs,
 Their names to infamy, all find a voice
 The nook in which the captive, overtoiled,
 Lay down to rest at last, and that which holds
 Childhood's sweet blossoms, crushed by cruel hands,
 Send up a plaintive sound From battle-fields,
 Where heroes madly drave and dashed their hosts
 Against each other, rises up a noise,
 As if the armed multitudes of dead
 Stirred in their heavy slumber Mournful tones
 Come from the green abysses of the sea—
 A story of the crimes the guilty sought
 To hide beneath its waves The glens, the groves,
 Paths in the thicket, pools of running brook
 And banks and depths of lake, and streets and lanes
 Of cities, now that living sounds are hushed,
 Murmur of guilty force and treachery

Here where I rest, the vales of Italy
 Are round me, populous from early time,
 And field of the tremendous warfare waged
 Twixt good and evil Who, alas! shall dare
 Interpret to man's ear the mingled voice
 That comes from her old dungeons yawning now
 To the black air, her amphitheatres,
 Where the dew gathers on the mouldering stones,
 And fenes of banished gods, and open tombs,
 And roofless palaces, and streets and hearths
 Of cities dug from their volcanic graves?
 I hear a sound of many languages,
 The utterance of nations now no more,
 Driven out by mightier, as the days of heaven
 Chase one another from the sky The blood
 Of freemen shed by freemen, till strange lords
 Came in their hour of weakness, and made fast
 The yoke that yet is worn, cries out to Heaven

What then shall cleanse thy bosom, gentle Earth,
 From all its painful memories of guilt?
 The whelming flood, or the renewing fire,
 Or the slow change of time?—that so, at last,

The horrid tale of perjury and strife,
 Murder and spoil, which men call history,
 May seem a fable, like the inventions told
 By poets of the gods of Greece O thou,
 Who sittest far beyond the Atlantic deep,
 Among the sources of thy glorious streams,
 My native Land of Groves! a newer page
 In the great record of the world is thine,
 Shall it be fairer? Fear, and friendly Hope,
 And Envy, watch the issue, while the lines,
 By which thou shalt be judged are written down

1834-18:

The Antiquity of Freedom

As an editor Bryant had a constant and direct conce
 with politics The Antiquity of Freedom should be rei
 with the recollection that Bryant was deeply interested
 political developments in Europe between the revolutio
 of 1830 and those of 1848 In that period the rise of socie
 ism and the continuous struggle against despotic rule
 kept most of the Continent in turmoil, and thousands fle
 to the United States World War II has brought me
 Americans than ever before to a realization of the tru
 of Bryant's conception of freedom

Here are old trees, tall oaks and gnarlèd pines,
 That stream with gray-green mosses, here the ground
 Was never trenched by spade, and flowers spring up
 Unsown, and die ungathered It is sweet
 To linger here, among the flitting birds
 And leaping squirrels, wandering brooks, and winds
 That shake the leaves, and scatter, as they pass,
 A fragrance from the cedars, thickly set
 With pale-blue berries In these peaceful shades—
 Peaceful, unpruned, immeasurably old—
 My thoughts go up the long dim path of years,
 Back to the earliest days of liberty

O FREEDOM! thou art not, as poets dream,
 A fair young girl, with light and delicate limbs,

And wavy tresses gushing from the cap
 With which the Roman master crowned his slave
 When he took off the gyves A bearded man,
 Armed to the teeth, art thou, one mailed hand
 Grasps the broad shield, and one the sword, thy brow,
 Glorious in beauty though it be, is scarred 20
 With tokens of old wars, thy massive limbs
 Are strong with struggling Power at thee has launched
 His bolts, and with his lightnings smitten thee,
 They could not quench the life thou hast from heaven,
 Merciless Power has dug thy dungeon deep,
 And his swart armorers, by a thousand fires,
 Have forged thy chain, yet, while he deems thee bound,
 The links are shivered, and the prison-walls
 Fall outward, terribly thou springest forth,
 As springs the flame above a burning pile, 30
 And shoutest to the nations, who return
 Thy shoutings, while the pale oppressor flies

Thy birthright was not given by human hands
 Thou wert twin-born with man In pleasant fields,
 While yet our race was few, thou sat'st with him,
 To tend the quiet flock and watch the stars,
 And teach the reed to utter simple airs
 Thou by his side, amid the tangled wood,
 Didst war upon the panther and the wolf,
 His only foes, and thou with him didst draw 40
 The earliest furrow on the mountain-side,
 Soft with the deluge Tyranny himself,
 Thy enemy, although of reverend look,
 Hoary with many years and far obeyed,
 Is later born than thou, and as he meets
 The grave defiance of thine elder eye,
 The usurper trembles in his fastnesses

Thou shalt wax stronger with the lapse of years,
 But he shall fade into a feeble age—
 Feebler, yet subtler He shall weave his snares, 50
 And spring them on thy careless steps, and clap
 His withered hands, and from their ambush call
 His hordes to fall upon thee He shall send
 Quaint maskers, wearing fair and gallant forms
 To catch thy gaze, and uttering graceful words
 To charm thy ear; while his sly imps, by stealth,
 Twine round thee threads of steel, light thread on thread,
 That grow to fetters; or bind down thy arms

With chains concealed in chaplets Oh! not yet
 Mayst thou unbrace thy corslet, nor lay by 60
 Thy sword, nor yet, O Freedom! close thy lids
 In slumber, for thine enemy never sleeps,
 And thou must watch and combat till the day
 Of the new earth and heaven But wouldst thou rest
 Awhile from tumult and the frauds of men,
 These old and friendly solitudes invite
 Thy visit They, while yet the forest-trees
 Were young upon the unviolated earth,
 And yet the moss-stains on the rock were new,
 Beheld thy glorious childhood and rejoiced 70
 1842

--

"Oh Mother of a Mighty Race"

Although Bryant was decidedly lukewarm about the Mexican War, he shared the nationalistic feeling of the Polk administration His patriotic emotions were doubtless accentuated by his trips to Europe, where he met sharp criticism of American democracy The sentiment in this poem should be compared with that in the last lines of "The Prairies" and with the much milder feeling of "Earth"

Oh mother of a mighty race,
 Yet lovely in thy youthful grace!
 The elder dames, thy haughty peers,
 Admire and hate thy blooming years
 With words of shame
 And taunts of scorn they join thy name

For on thy cheeks the glow is spread
 That tints thy morning hills with red,
 Thy step—the wild-deer's rustling feet,

15 cap Bryant had in mind the liberty cap of the French Revolution, adapted from the Roman pilæus, given to a slave when he was freed • 37 reed The allusion is to the syrinx, or Panpipe, a primitive musical instrument made of reeds • 40 His Knickerbocker Thine • 41 furrow Until 1854 furrows • 43 reverend, venerable • 49 feeble. In all other editions feebler, probably, in 1876, an error • 54 wearing forms Until 1847 forms of fair and gallant mien • 60 nor K or • 63 the day heaven, the millennium See Revelation 21 1 • 65 the frauds of men K from treachery

Within thy woods are not more fleet,
Thy hopeful eye
Is bright as thine own sunny sky

10

Robert of Lincoln

Ay, let them rail—those haughty ones,
While safe thou dwellest with thy sons
They do not know how loved thou art,
How many a fond and fearless heart
Would rise to throw
Its life between thee and the foe

They know not, in their hate and pride,
What virtues with thy children bide,
How true, how good, thy graceful maids
Make bright, like flowers, the valley-shades,
What generous men
Spring, like thine oaks, by hill and glen

What cordial welcomes greet the guest
By thy lone rivers of the West,
How faith is kept, and truth revered,
And man is loved, and God is feared
In woodland homes,
And where the ocean-border foams

There's freedom at thy gates and rest
For Earth's down-trodden and oppressed,
A shelter for the hunted head,
For the starved laborer toil and bread,
Power, at thy bounds,
Stops and calls back his baffled hounds.

Oh, fair young mother! on thy brow
Shall sit a nobler grace than now
Deep in the brightness of thy skies
The thronging years in glory rise,
And, as they fleet,
Drop strength and riches at thy feet

Thine eye, with every coming hour,
Shall brighten, and thy form shall tower,
And when thy sisters, elder born,
Would brand thy name with words of scorn,
Before thine eye,
Upon their lips the taunt shall die

20

Merrily swinging on brier and weed,
Near to the nest of his little dame
Over the mountain-side or mead
Robert of Lincoln is telling his name
Bob-o'-link, bob-o'-link,
Spink, spank, spink,
Snug and safe is that nest of ours,
Hidden among the summer flowers
Chee, chee, chee

30

Robert of Lincoln is gayly drest,
Wearing a bright black wedding-coat,
White are his shoulders and white his crest.
Hear him call in his merry note
Bob-o'-link, bob-o'-link,
Spink, spank, spink
Look, what a nice new coat is mine.
Sure there was never a bird so fine
Chee, chee, chee

40

Robert of Lincoln's Quaker wife,
Pretty and quiet with plain brown wings,
Passing at home a patient life,
Broods in grass while her husband sings
Bob-o'-link, bob-o'-link,
Spink, spank, spink,
Brood, kind creature, you need not fear
Thieves and robbers while I am here
Chee, chee, chee

Modest and shy as a nun is she,
One weak chirp is her only note
Braggart and prince of braggarts is he,
Pouring boasts from his little throat.

1846-1847

Bob-o'-link, bob-o'-link,
Spink, spank, spink,
Never was I afraid of man,
Catch me, cowardly knaves, if you can'
Chee, chee, chee

Six white eggs on a bed of hay,
Flecked with purple, a pretty sight'
There as the mother sits all day,
Robert is singing with all his might
Bob-o'-link, bob-o'-link,
Spink, spank, spink,
Nice good wife, that never goes out,
Keeping house while I frolic about
Chee, chee, chee

Soon as the little ones chip the shell
Six wide mouths are open for food,
Robert of Lincoln bestirs him well,
Gathering seeds for the hungry brood
Bob-o'-link, bob-o'-link,
Spink, spank, spink,
This new life is likely to be
Hard for a gay young fellow like me.
Chee, chee, chee.

Robert of Lincoln at length is made
Sober with work, and silent with care,
Off is his holiday garment laid,
Half forgotten that merry air.
Bob-o'-link, bob-o'-link,
Spink, spank, spink,
Nobody knows but my mate and I
Where our nest and our nestlings lie.
Chee, chee, chee

Summer wanes, the children are grown,
Fun and frolic no more he knows,
Robert of Lincoln's a humdrum crone.
Off he flies, and we sing as he goes
Bob-o'-link, bob-o'-link,
Spink, spank, spink,
When you can pipe that merry old strain,
Robert of Lincoln, come back again.
Chee, chee, chee.

Godwin informs us that "The Poet," the expression of Bryant's conviction that poetry depends primarily upon emotion, was written in 1863. As early as 1826, in his lectures on poetry before the American Atheneum Society, Bryant had asserted that "the great spring of poetry is emotion," although he also acknowledged the importance of appealing to the imagination and the understanding. His theories are similar to but somewhat less mystical than those of Emerson (see p. 873) and Whitman. The extent to which he followed his own advice about revision is debatable, for textual study reveals that he often changed his mind about his diction. Textual revisions are indicated in the footnotes for "Thanatopsis," "Inscription for the Entrance to a Wood," and "The Antiquity of Freedom."

Thou, who wouldst wear the name
Of poet mid thy brethren of mankind,
And clothe in words of flame
Thoughts that shall live within the general mind!
Deem not the framing of a deathless lay
The pastime of a drowsy summer day.

But gather all thy powers,
And wreak them on the verse that thou dost weave,
And in thy lonely hours,
At silent morning or at wakeful eve,
While the warm current tingles through thy veins,
Set forth the burning words in fluent strains.

No smooth array of phrase,
Artfully sought and ordered though it be,
Which the cold rhymers lays

Robert of Lincoln • 49 Gathering seeds John Burroughs, in an essay on "Nature and the Poet," challenged Bryant's natural history. The bobolink, he said, is an insectivorous bird in the North, or until its brood has flown. • 66 crone, a withered old woman. Bryant refers to the fact that the male bobolink (the rice-bird of the South) annually loses his glossy black, buff, and white plumage, together with his song, and at the summer's end is almost indistinguishable from the female. The Poet • 8 wreak them on, let them play upon

Upon his page with languid industry,
Can wake the listless pulse to livelier speed,
Or fill with sudden tears the eyes that read

The Flood of Years

The secret wouldst thou know

To touch the heart or fire the blood at will?
Let thine own eyes o'erflow.

Let thy lips quiver with the passionate thrill,
Seize the great thought, ere yet its power be past
And bind, in words, the fleet emotion fast

Then, should thy verse appear

Halting and harsh and all unaptly wrought
Touch the crude line with fear,

Save in the moment of impassioned thought,
Then summon back the original glow, and mend
The strain with rapture that with fire was penned

Yet let no empty gust

Of passion find an utterance in thy lay,
A blast that whirls the dust

Along the howling street and dies away
But feelings of calm power and mighty sweep,
Like currents journeying through the windless deep.

Seek'st thou, in living lays,

To limn the beauty of the earth and sky?
Before thine inner gaze

Let all that beauty in clear vision lie,
Look on it with exceeding love, and write
The words inspired by wonder and delight.

Of tempests wouldst thou sing,

Or tell of battles—make thyself a part
Of the great tumult, cling

To the tossed wreck with terror in thy heart,
Scale, with the assaulting host, the rampart's height,
And strike and struggle in the thickest fight

So shalt thou frame a lay

That haply may endure from age to age.
And they who read shall say

"What witchery hangs upon this poet's page!
What art is his the written spells to find
That sway from mood to mood the willing mind!"

1863-1864

Many of Bryant's poems express a humanistic sense of the stream of life. "The Flood of Years," written in his eighty-first year, is one of the few places where he indicated a belief in the doctrine of personal immortality. One can understand the motive of the reader who wrote to ask if the closing lines represented Bryant's real convictions. He was answered as follows: "Certainly I believe all that is said in the lines you have quoted; otherwise I could not have written them. I believe in the everlasting life of the soul, and it seems to me that immortality would be but an imperfect gift without the recognition in the life to come of those who are dear to us here."

The central figure is remarkably similar to Addison's "The Vision of Mirza," *The Spectator*, No. 159.

A mighty Hand, from an exhaustless Urn,
Pours forth the never-ending Flood of Years,
Among the nations How the rushing waves
Bear all before them! On their foremost edge
And there alone, is Life The Present there
Tosses and foams and fills the air with roar
Of mingled noises There are they who toil,
And they who strive, and they who feast, and they
Who hurry to and fro The sturdy swain—
Woodman and delver with the spade—is there,
And busy artisan beside his bench,
And pallid student with his written roll
A moment on the mounting billow seen,
The flood sweeps over them and they are gone
There groups of revellers whose brows are twined
With roses, ride the topmost swell awhile,
And as they raise their flowing cups and touch
The clinking brim to brim, are whirled beneath
The waves and disappear I hear the jar
Of beaten drums, and thunders that break forth
From cannon, where the advancing billow sends
Up to the sight long files of armed men.
That hurry to the charge through flame and smoke
The torrent bears them under, whelmed and hid
Slayer and slain, in heaps of bloody foam.

Down go the steed and rider, the plumed chief
 Sinks with his followers, the head that wears
 The imperial diadem goes down beside
 The felon's with cropped ear and branded cheek
 A funeral-train—the torrent sweeps away
 Bearers and bier and mourners By the bed
 Of one who dies men gather sorrowing,
 And women weep aloud, the flood rolls on.
 The wail is stifled and the sobbing group
 Borne under Hark to that shrill, sudden shout,
 The cry of an applauding multitude,
 Swaved by some loud-voiced orator who wields
 The living mass as if he were its soul!
 The waters choke the shout and all is still
 Lo! next a kneeling crowd, and one who spreads
 The hands in prayer, the engulfing wave o'ertakes
 And swallows them and him A sculptor wields
 The chisel, and the stricken marble grows
 To beauty, at his easel, eager-eyed,
 A painter stands, and sunshine at his touch
 Gathers upon his canvas, and life glows,
 A poet, as he paces to and fro,
 Murmurs his sounding lines Awhile they ride
 The advancing billow, till its tossing crest
 Strikes them and flings them under, while their tasks
 Are yet unfinished See a mother smile
 On her young babe that smiles to her again,
 The torrent wrests it from her arms, she shrieks
 And weeps, and midst her tears is carried down
 A beam like that of moonlight turns the spray
 To glistening pearls, two lovers, hand in hand,
 Rise on the billowy swell and fondly look
 Into each other's eyes The rushing flood
 Flings them apart the youth goes down, the maid
 With hands outstretched in vain, and streaming eyes,
 Waits for the next high wave to follow him
 An aged man succeeds, his bending form
 Sinks slowly Mingling with the sullen stream
 Gleam the white locks, and then are seen no more
 Lo! wider grows the stream—a sea-like flood
 Saps earth's walled cities, massive palaces
 Crumble before it, fortresses and towers
 Dissolve in the swift waters, populous realms
 Swept by the torrent see their ancient tribes
 Engulfed and lost, their very languages
 Stifled, and never to be uttered more.

I pause and turn my eyes, and looking back
 Where that tumultuous flood has been, I see
 The silent ocean of the Past, a waste
 Of waters weltering over graves, its shores
 Strewn with the wreck of fleets where mast and hull
 Drop away piecemeal, battlemented walls
 Frown idly, green with moss, and temples stand
 Unrooted, forsaken by the worshipper
 There lie memorial stones, whence time has gnawed
 The graven legends, thrones of kings o'erturned,
 The broken altars of forgotten gods,
 Foundations of old cities and long streets
 Where never fall of human foot is heard,
 On all the desolate pavement I behold
 Dim glimmerings of lost jewels, far within
 The sleeping waters, diamond, sardonyx,
 Ruby and topaz, pearl and chrysolite,
 Once glittering at the banquet on fair brows
 That long ago were dust, and all around
 Strewn on the surface of that silent sea
 Are withering bridal wreaths, and glossy locks
 Shorn from dear brows, by loving hands, and scrolls
 O'er written, haply with fond words of love
 And vows of friendship, and fair pages flung
 Fresh from the printer's engine There they lie
 A moment, and then sink away from sight

I look, and the quick tears are in my eyes,
 For I behold in every one of these
 A blighted hope, a separate history
 Of human sorrows, telling of dear ties
 Suddenly broken dreams of happiness
 Dissolved in air, and happy days too brief
 That sorrowfully ended, and I think
 How painfully must the poor heart have beat
 In bosoms without number, as the blow
 Was struck that slew their hope and broke their peace.

Sadly I turn and look before, where yet
 The Flood must pass, and I behold a mist
 Where swarm dissolving forms, the brood of Hope.
 Divinely fair, that rest on banks of flowers,
 Or wander among rainbows, fading soon
 And reappearing, haply giving place

26 plumed chief Bryant perhaps had in mind James G. Blaine, the
 plumed knight Blaine was so named when he was nominated for the
 presidency in 1876 by Col. Robert G. Ingersoll

To forms of grisly aspect such as Fear
 Shapes from the idle air—where serpents lift
 The head to strike, and skeletons stretch forth
 The bony arm in menace Further on
 A belt of darkness seems to bar the way
 Long, low, and distant, where the Life to come
 Touches the Life that is. The Flood of Years 120
 Rolls toward it near and nearer It must pass
 That dismal barrier. What is there beyond?
 Hear what the wise and good have said Beyond
 That belt of darkness, still the Years roll on
 More gently, but with not less mighty sweep.
 They gather up again and softly bear
 All the sweet lives that late were overwhelmed
 And lost to sight, all that in them was good,
 Noble, and truly great, and worthy of love—
 The lives of infants and ingenuous youths, 130
 Sages and saintly women who have made
 Their households happy, all are raised and borne
 By that great current in its onward sweep,

Wandering and rippling with caressing waves
 Around green islands fragrant with the breath
 Of flowers that never wither. So they pass,
 From stage to stage along the shining course
 Of that bright river, broadening like a sea.
 As its smooth eddies curl along their way
 They bring old friends together, hands are clasped 14
 In joy unspeakable, the mother's arms
 Again are folded round the child she loved
 And lost Old sorrows are forgotten now,
 Or but remembered to make sweet the hour
 That overpays them, wounded hearts that bled
 Or broke are healed forever. In the room
 Of this grief-shadowed present, there shall be
 A Present in whose reign no grief shall gnaw
 The heart, and never shall a tender tie
 Be broken; in whose reign the eternal Change 1
 That waits on growth and action shall proceed
 With everlasting Concord hand in hand

18

From • Lectures on Poetry

On the Nature of Poetry

In April 1826 Bryant delivered a series of four lectures before the New York Atheneum. The lecture here reprinted was followed by one on the value and uses of poetry, one on poetry "in Relation to Our Age and Country" which is another reflection of Bryant's nationalism, and one on originality and imitation. The critical questions which crop out in this first lecture are ageless, and the ideas which Bryant expresses can best be described as a complex patchwork of Neoclassical and romantic theories. His remarks here should be compared with "The Poet" and, for further study, with his introduction to *A Library of Poetry and Song* (1871). See, also, William Charvat, *Origins of American Critical Thought, 1810-1835* (Phila-

delphia, 1935), and William Palmer Hudson, "Archibald Alison and William Cullen Bryant," *American Literature* XII (March 1940), 59-68.

In treating of the subject which has been assigned it is obvious that it will be impossible for me to compress into four lectures anything like a complete view of it. I am to speak of one of the most ancient of arts, of the very earliest and most venerable branch of literature—one which even now exists in many countries that have no other, one, which although it has in every period been cultivated with the same degree of success, has yet in no age of the world ceased to attract a large degree of the attention of mankind. Not only have the writers of poetry been exceedingly numerous—more so, perhaps, than those of any other class—but poetry has shot forth another branch of literature, her handmaid and satellite, and raised up a large body of authors, who speculate upon what the poets have written, who define the elements and investigate the principles of the art, and fix the degrees of estimation in which its several productions should be held.

only has the poetry of one age been exceedingly different from that of another, but different styles of poetry have prevailed at the same time in different nations, different schools of poetry have arisen in the same nation, and different forms of poetical composition have been preferred by the several writers of the same school. So much poetry has been written, and that poetry has been the subject of so much criticism, so much matter for speculation has been collected, and so many reasonings and theories have been framed out of it, that the subject has grown to be one of the most comprehensive in the whole province of literature.

If I were to treat of either of its great subdivisions—if, for example, I were to attempt its history from its earliest origin, through its various stages, to the present time, if I were to analyze the several forms of poetical composition, or to point out the characteristics of the various kinds of poetry that have prevailed at different periods, or to compare the genius of the most illustrious poets—in either case, I could do little more than pass rapidly over the principal topics. The view would be so brief that it would seem like a dry table of the contents of a large work and would become tedious from its very brevity. I shall, therefore, in the short course of lectures which I have undertaken, attempt no entire view of the subject assigned to me, but shall only endeavor to select a few of the topics which seem to me among the most interesting, and on which I may imagine that I shall weary you the least.

Of the nature of poetry different ideas have been entertained. The ancient critics seemed to suppose that they did something toward giving a tolerable notion of it by calling it a mimetic or imitative art, and classing it with sculpture and painting. Of its affinity with these arts there can be no doubt, but that affinity seems to me to consist almost wholly in the principles by which they all produce their effect, and not in the manner in which those principles are reduced to practice. There is no propriety in applying to poetry the term *imitative* in a literal and philosophical sense, as there is in applying it to painting and sculpture. The latter speak to the senses, poetry speaks directly to the mind. They reproduce sensible objects, and, by means of these, suggest the feeling or sentiment connected with them; poetry, by the symbols of words, suggests both the sensible object and the association. I should be glad to learn how a

poem descriptive of a scene or an event is any more an imitation of that scene or that event than a prose description would be. A prose composition giving an account of the proportions and dimensions of a building, and the materials of which it is constructed, is certainly, so far as mere exactness is concerned, a better imitation of it than the finest poem that could be written about it. Yet who, after all, ever thought of giving such a composition the name of an imitation? The truth is, painting and sculpture are, literally imitative arts, while poetry is only metaphorically so. The epithet as applied to poetry may be well enough, perhaps, as a figure of speech, but to make a metaphor the foundation of a philosophical classification is putting it to a service in which it is sure to confuse what it professes to make clear.

I would rather call poetry a suggestive art. Its power of affecting the mind by pure suggestion, and employing, instead of a visible or tangible imitation, arbitrary symbols, as unlike as possible to the things with which it deals, is what distinguishes this from its two sister arts. It is owing to its operation by means of suggestion that it affects different minds with such different degrees of force. In a picture or a statue the colors and forms employed by the artist impress the senses with the greatest distinctness. In painting, there is little—in sculpture, there is less—for the imagination to supply. It is true that different minds, according to their several degrees of cultivation, will receive different degrees of pleasure from the production of these arts, and that the moral associations they suggest will be variously felt, and in some instances variously interpreted. Still, the impression made on the senses is in all cases the same, the same figures, the same lights and shades, are seen by all the beholders alike. But the creations of Poetry have in themselves nothing of this precision and fixedness of form, and depend greatly for their vividness and clearness of impression upon the mind to which they are presented. Language, the great machine with which her miracles are wrought, is contrived to have an application to all possible things, and wonderful as this contrivance is, and numerous and varied as are its combinations, it is still limited and imperfect, and, in point of com-

31 ancient critics, notably Aristotle, whose ideas on imitation appear in the first part of the *Poetics*. See also Bk. X of Plato's *Republic*.

prehensiveness, distinctness, and variety, falls infinitely short of the mighty and diversified world of matter and mind of which it professes to be the representative. It is, however, to the very limitation of this power of language as it seems to me, that Poetry owes her magic. The most detailed of her descriptions, which, by the way, are not always the most striking, are composed of a few touches, they are glimpses of things thrown into the mind, here and there a trace of the outline, here a gleam of light, and there a dash of shade. But these very touches act like a spell upon the imagination and awaken it to greater activity, and fill it, perhaps, with greater delight than the best defined objects could do. The imagination is the most active and the least susceptible of fatigue of all the faculties of the human mind, its more intense exercise is tremendous, and sometimes unsettles the reason, its repose is only a gentle sort of activity, nor am I certain that it is ever quite unemployed, for even in our sleep it is still awake and busy, and amuses itself with fabricating our dreams. To this restless faculty—which is unsatisfied when the whole of its work is done to its hands, and which is ever wandering from the combination of ideas directly presented to it to other combinations of its own—it is the office of poetry to furnish the exercise in which it delights. Poetry is that art which selects and arranges the symbols of thought in such a manner as to excite it the most powerfully and delightfully. The imagination of the reader is guided, it is true, by the poet, and it is his business to guide it skilfully and agreeably, but the imagination in the mean time is by no means passive. It pursues the path which the poet only points out, and shapes its visions from the scenes and allusions which he gives. It fills up his sketches of beauty with what suits its own highest conceptions of the beautiful, and completes his outline of grandeur with the noblest images its own stores can furnish. It is obvious that the degree of perfection with which this is done must depend greatly upon the strength and cultivation of that faculty. For example, in the following passage, in which Milton describes the general mother passing to her daily task among the flowers

"With goddess-like demeanor forth she went
Not unattended, for on her as queen
A pomp of winning graces waited still."

The coldest imagination on reading it, will figure to

itself, in the person of Eve, the finest forms, attitudes and movements of female loveliness and dignity, which after all, are not described, but only hinted at by the poet. A warmer fancy, kindling at the delicate allusions in these lines, will not only bestow these attractions on the principal figure, but will fill the air around her with beauty, and people it with the airy forms of the graces, it will see the delicate proportions of their limbs, the lustre of their flowing hair, and the soft light of their eyes. Take, also, the following passage from the same poet, in which, speaking of Satan, he says

"His face
Deep scars of thunder had entrenched, and care
Sat on his faded cheek—but under brows
Of dauntless courage and considerate pride
Waiting revenge, cruel his eye but cast
Signs of remorse and passion to behold
The fellows of his crime, the followers rather,
(Far other once beheld in bliss), condemned
For evermore to have their lot in pain"

The imagination of the reader is stimulated by the hints in this powerful passage to form to itself an idea of the features in which reside this strong expression of malignity and dejection—the brow, the cheek, the eye of the fallen angel, bespeaking courage, pride, the settled purpose of revenge, anxiety, sorrow for the fate of his followers, and fearfully marked with the wrath of the Almighty. There can be no doubt that the picture which this passage calls up in the minds of different individuals will vary accordingly as the imagination is more or less vivid, or more or less excited in the perusal. It will vary, also, accordingly as the individual is more or less experienced in the visible expression of strong passion, and as he is in the habit of associating the idea of certain emotions with certain configurations of the countenance.

There is no question that one principal office of poetry

14 The imagination. Bryant's notion is deeply influenced by eighteenth century thought as developed by Addison in Nos. 411-414 of *The Spectator* and by the followers of the association psychology of David Hartley (1735-1757). Among the books which Bryant read and which elaborate on the nature and function of the imagination is Archibald Alison's *Essays on the Nature and Principles of Taste* (1790).

is to excite the imagination, but this is not its sole, nor perhaps its chief province, another of its ends is to touch the heart, and, as I expect to show in this lecture, it has something to do with the understanding. I know that some critics have made poetry to consist solely in the exercise of the imagination. They distinguish poetry from pathos. They talk of pure poetry, and by this phrase they mean passages of mere imagery, with the least possible infusion of human emotion. I do not know by what authority these gentlemen take the term poetry from the people, and thus limit its meaning.

In its ordinary acceptation, it has, in all ages and all countries, included something more. When we speak of a poem, we do not mean merely a tissue of striking images. The most beautiful poetry is that which takes the strongest hold of the feelings, and, if it is really the most beautiful, then it is poetry in the highest sense. Poetry is constantly resorting to the language of the passions to heighten the effect of her pictures, and, if this be not enough to entitle that language to the appellation of poetical, I am not aware of the meaning of the term. Is there no poetry in the wrath of Achilles? Is there no poetry in the passage where Lear, in the tent of Cordelia, just recovered from his frenzy, his senses yet firm and unassured, addresses his daughter as she kneels to ask his blessing?

"Pray do not mock me,
I am a very foolish, fond old man,
Fourscore and upward
Not an hour more or less, and to deal plainly
I fear I am not in my perfect mind."

Is there no poetry in the remorse of Othello, in the terrible consciousness of guilt which haunts Macbeth, or the lamentations of Anthony over the body of his friend, the devoted love of Juliet, and the self-sacrificing affection of Cleopatra? In the immortal work of Milton, is there no poetry in the penitence of Adam, or in the sorrows of Eve at being excluded from Paradise? The truth is, that poetry which does not find its way to the heart is scarcely deserving of the name, it may be brilliant and ingenious, but it soon wears the attention. The feelings and the imagination, when skilfully touched, act reciprocally on each other. For example, when the poet introduces Ophelia, young, beautiful, and unfortunate, the wildness of frenzy in her eye, dressed with

fantastic garlands of wild flowers, and singing snatches of old tunes, there is a picture for the imagination, but it is one which affects the heart. But when, in the midst of her incoherent talk, she utters some simple allusion to her own sorrows, as when she says,

50

"We know what we are, but know not what we may be,"

this touching sentence, addressed merely to our sympathy, strongly excites the imagination. It sets before us the days when she knew sorrow only by name, before her father was slain by the hand of her lover, and before her lover was estranged and makes us feel the heaviness of that affliction which crushed a being so gentle and innocent and happy.

Those poems, however, as I have already hinted, which are apparently the most affluent of imagery, are not always those which most kindle the reader's imagination. It is because the ornaments with which they abound are not naturally suggested by the subject, not poured forth from a mind warmed and occupied by it, but a forced fruit of the fancy, produced by labor, without spontaneity or excitement.

The language of passion is naturally figurative, but its figures are only employed to heighten the intensity of the expression, they are never introduced for their own sake. Important, therefore, as may be the office of the imagination in poetry, the great spring of poetry is emotion. It is this power that holds the key of the storehouse where the mind has laid up its images, and that alone can open it without violence. All the forms of fancy stand ever in its sight, ready to execute its bidding. Indeed, I doubt not that most of the offences against good taste in this kind of composition are to be traced to the absence of emotion. A desire to treat agreeably or impressively a subject by which the writer is himself little moved, leads him into great mistakes about the means of effecting his purpose. This is the origin of cold conceits, of prosing reflections, of the minute painting of uninteresting circumstances, and of the opposite extremes of tameness and extravagance. On the other hand, strong feeling is always a sure guide. It rarely offends against good taste, because it instinctively chooses the most effectual means of communicating itself to others. It gives a variety to the composition it inspires, with which the severest taste is delighted. It may sometimes transgress arbitrary rules, or offend against

80

90

local associations, but it speaks a language which reaches the heart in all countries and all times. Everywhere are the sentiments of fortitude and magnanimity uttered in strains that brace our own nerves, and the dead mourned in accents that draw our tears.

But poetry not only addresses the passions and the imagination, it appeals to the understanding also. So far as this position relates to the principles of taste which lie at the foundation of all poetry, and by which
10 its merits are tried, I believe its truth will not be doubted. These principles have their origin in the reason of things, and are investigated and applied by the judgment. True it is that they may be observed by one who has never speculated about them, but it is no less true that their observance always gratifies the understanding with the fitness, the symmetry, and the congruity it produces. To write fine poetry requires intellectual faculties of the highest order, and among these, not the least important, is the faculty of reason. Poetry is the
20 worst mask in the world behind which folly and stupidity could attempt to hide their features. Fitter, safer, and more congenial to them is the solemn discussion of unprofitable questions. Any obtuseness of apprehension or incapacity for drawing conclusions, which shows a deficiency of want of cultivation of the reasoning power, is sure to expose the unfortunate poet to contempt and ridicule.

But there is another point of view in which poetry may be said to address the understanding—I mean in
30 the direct lessons of wisdom that it delivers. Remember that it does not concern itself with abstract reasonings, nor with any course of investigation that fatigues the mind. Nor is it merely didactic, but this does not prevent it from teaching truths which the mind instinctively acknowledges. The elements of moral truth are few and simple, but their combinations with human actions are as innumerable and diversified as the combinations of language. Thousands of inductions resulting from the application of great principles to human
40 life and conduct lie, as it were, latent in our minds, which we have never drawn for ourselves, but which we admit the moment they are hinted at, and which, though not abstruse, are yet new. Nor are these of less value because they require no laborious research to discover them. The best riches of the earth are produced on its surface, and we need no reasoning to teach us

the folly of a people who should leave its harvest un-gathered to dig for its ores. The truths of which I have spoken, when possessing any peculiar force or beauty, are properly within the province of the art of which I am treating, and, when recommended by harmony or numbers, become poetry of the highest kind. Accordingly, they abound in the works of the most celebrated poets. When Shakespeare says of mercy,

"it is twice blessed—

It blesses him that gives and him that takes,"

does he not utter beautiful poetry as well as unquestionable truth? There are passages also in Milton of the same kind, which sink into the heart like the words of an oracle. For instance

'Evil into the mind of God or man
May come and go so unapproved, and leave
No spot or blame behind."

Take, also, the following example from Cowper, in which he bears witness against the guilt and folly of princes

"War is a game which were their subjects wise,
Kings should not play at. Nations would do well
To extort their truncheons from the puny hands
Of heroes whose infirm and baby minds
Are gratified with mischief, and who spoil,
Because men suffer it, their toy—the world."

I call these passages poetry, because the mind instantly acknowledges their truth and feels their force, and is moved and filled and elevated by them. Nor does poetry refuse to carry on a sort of process of reasoning by deducing one truth from another. Her demonstration differ, however, from ordinary ones by requiring that each step should be in itself beautiful or striking, and that they all should carry the mind to the final conclusion without the consciousness of labor.

All the ways by which poetry affects the mind are open also to the prose-writer. All that kindles the

64 from Cowper. The passage is from *The Winter Morning, Walk*, Bk. V of *The Task*.

imagination, all that excites emotion, all those moral truths that find an echo in our bosoms are his property as well as that of the poet. It is true that in the ornaments of style the poet is allowed a greater license, but there are many excellent poems which are not distinguished by any liberal use of the figures of speech from prose writings composed with the same degree of excitement. What, then, is the ground of the distinction between prose and poetry? This is a question about which there has been much debate, but one which seems to me of easy solution to those who are not too ambitious of distinguishing themselves by profound researches into things already sufficiently clear. I suppose that poetry differs from prose, in the first place, by the employment of metrical harmony. It differs from it, in the next place, by excluding all that disgusts, all that tasks and fatigues the understanding, and all matters which are too trivial and common to excite any emotion whatever. Some of these, verse cannot raise into dignity; to others verse is an encumbrance: they are, therefore, all unfit for poetry: put them into verse, and they are prose still.

A distinction has been attempted to be made between poetry and eloquence, and I acknowledge that there is one: but it seems to me that it consists solely in metrical arrangement. Eloquence is the poetry of prose, poetry is the eloquence of verse. The maxim that the poet is born and the orator made is a pretty antithesis: but a moment's reflection will convince us that one can become neither without natural gifts improved by cultivation. By eloquence I do not mean mere persuasiveness: there are many processes of argument that are not susceptible of eloquence, because they require close and painful attention. But by eloquence I understand those appeals to our moral perceptions that produce emotion as soon as they are uttered. It is in these that the orator is himself affected with the feelings he would communicate, that his eyes glisten, and his frame seems to dilate, and his voice acquires an unwonted melody, and his sentences arrange themselves into a sort of measure and harmony, and the listener is chained in involuntary and breathless attention. This is the very enthusiasm that is the parent of poetry. Let the same man go to his closet and clothe in numbers conceptions full of the same fire and spirit and they will be poetry.

In conclusion, I will observe that the elements of poetry make a part of our natures and that every indi-

vidual is more or less a poet. In this 'bank-note world,' as it has been happily denominated, we sometimes meet with individuals who declare that they have no taste for poetry. But by their leave I will assert they are mistaken, 50 they have it, although they may have never cultivated it. Is there any one among them who will confess himself insensible to the beauty of order or to the pleasure of variety—two principles, the happy mingling of which makes the perfection of poetic numbers? Is there any one whose eye is undelighted with beautiful forms and colors, whose ear is not charmed by sweet sounds, and who sees no loveliness in the returns of light and darkness, and the changes of the seasons? Is there any one for whom the works of Nature have no associations 60 but such as relate to his animal wants? Is there any one for whom her great courses and operations show no majesty, to whom they impart no knowledge, and from whom they hide no secrets? Is there any one who is attached by no ties to his fellow-beings, who has no hopes for the future and no memory of the past? Have they all forgotten the days and the friends of their childhood, and do they all shut their eyes to the advances of age? Have they nothing to desire and nothing to lament, and are their minds never darkened with the 70 shadows of fear? Is it, in short, for these men that life has no pleasures and no pains, the grave no solemnity, and the world to come no mysteries? All these things are the sources of poetry and they are not only part of ourselves, but of the universe, and will expire only with the last of the creatures of God.

1826-1884

So much debate. Coleridge's *Biographia Literaria* (1817) gave much space to the difference between poetry and prose, building upon Wordsworth's remarks in the Preface to the second edition (1800) of the *Lyrical Ballads*.

Hannah Foster

1758 • 1840

Mrs. Hannah Webster Foster was born in Salisbury, Massachusetts, in 1758 the daughter of a merchant. As numerous learned and literary allusions in her writings attest, she was "highly educated for the times." In 1785 she married a minister, John Foster, a cousin of the woman upon whose sad story her best-known novel, *The Coquette, or, the History of Eliza Wharton* (1797), was based. Her only other book, another epistolary work, was *The Boarding School* (1798).

The excerpts which follow typify a group of fictional works produced by the hundreds and read widely in this country between 1789 and 1860. These "sentimental novels" were important as a literary form which influenced in various ways such famous narrative writers as Henry Wadsworth Longfellow, Harriet Beecher Stowe,

Edgar Allan Poe, and Nathaniel Hawthorne. *The Coquette* is one of the best of these narratives of sensibility.

The title page of *The Coquette*, like that of many novel of the time, proclaimed that it was "founded on fact." To some extent this proclamation, like the moralizing which dotted its pages, helped overcome a widespread prejudice against fiction. In addition, its many tempestuous emotional scenes, centering around a seduction, were sure to touch the heart of sensibility. Mr. Foster told her story in a way then much admired, using the letter method which had been made famous by the great Samuel Richardson.

Panel (l. to r.) Samuel Woodworth • Sentiment • "Eliza Wharton" *The Coquette* • Sentimental belle and beau • Richard Henry Wilde

The plot, typical of this kind of novel, tells how the Rev J Boyer, a good and sincere (but rather dull) man, tries to win the hand of Eliza Wharton. Eliza, too fond for her own good of "the scenes of festive mirth and the dissipating amusements of the gay world, is more taken with dashing Major Sanford, a rake whose dangerousness is enhanced by both his shrewdness and his charm. Eliza loses her chance to marry Boyer by showing too much

interest in the Major. Even after Sanford marries, she continues to see him, and eventually he seduces her. The following letters take up the story at this point, but the letters describing Eliza's pathetic death and the moralizing about it are not included.

R. L. Shurter. *Mrs. Hannah Webster Foster and the Early American Novel*, *American Literature*, Nov. 1932, IV • H. R. Brown, *Introduction*. *The Coquette*, Folsom: Text Society Edition, New York, 1939.

From

The Coquette

LETTER LXV

To Mr. Charles Deighton

Hartford

Good news, Charles, good news! I have arrived to the utmost bounds of my wishes, the full possession of my adorable Eliza! I have heard a quotation from a certain book, but what book it was I have forgotten: if I ever knew. No matter for that, the quotation is, that "stolen waters are sweet, and bread eaten in secret is pleasant." If it has reference to the pleasures, which I have enjoyed with Eliza, I like it hugely, as Tristram Shandy's father said of Yorick's sermon, and I think it fully verified.

I had a long and tedious siege. Every method which love could suggest, or art invent, was adopted. I was sometimes ready to despair, under an idea that her resolution was unconquerable, her virtue impregnable. Indeed, I should have given over the pursuit long ago, but for the hopes of success I entertained from her parlying with me, and in reliance upon her own strength, endeavoring to combat, and counteract my designs. Whenever this has been the case, Charles, I have never yet been defeated in my plan. If a lady will consent to enter the lists against the antagonist of her honor, she

may be sure of losing the prize. Besides, were her delicacy genuine, she would banish the man at once, who presumed to doubt, which he certainly does, who attempts to vanquish it!

But, far be it from me to criticise the pretensions of the sex. If I gain the rich reward of my dissimulation and gallantry, that you know is all I want.

To return then to the point. An unlucky, but not a ³⁰ miraculous accident, has taken place, which must soon expose our amour. What can be done? At the first discovery, absolute distraction seized the soul of Eliza, which has since terminated in a fixed melancholy. Her health too is much impaired. She thinks herself rapidly declining, and I tremble when I see her emaciated form!

My wife has been reduced very low, of late. She brought me a boy a few weeks past, a dead one though.

These circumstances give me neither pain nor pleasure. I am too much ingrossed by my divinity to take ⁴⁰ an interest in any thing else. True, I have lately suffered myself to be somewhat engaged here and there, by a few jovial lads, who assist me in dispelling the anxious thoughts, which my perplexed situation excites. I must, however, seek some means to relieve Eliza's distress. My finances are low, but the last fraction shall be expended in her service, if she need it.

Julia Granby is expected at Mr. Wharton's every hour. I fear that her inquisitorial eye will soon detect our intrigue, and obstruct its continuation. Now there's ⁵⁰ a girl, Charles, I should never attempt to seduce, yet she is a most alluring object, I assure you. But the dignity of her manners forbid all assaults upon her virtue.

¹⁰ Tristram Shandy, a character in *The Life and Opinions of Tristram Shandy* (1760), an English sentimental novel, the fictional masterpiece of Laurence Sterne (1713-1768).

Why, the very expression of her eye, blasts in the bud, every thought, derogatory to her honor, and tells you plainly, that the first insinuation of the kind, would be punished with eternal banishment and displeasure! Of her there is no danger! But I can write no more, except that I am &c

PETER SANFORD

LETTER LXVI

To Miss Lucy Sumner

Hartford

Oh, my friend! I have a tale to unfold, a tale which
10 will rend every nerve of sympathizing pity, which will rack the breast of sensibility, and unspeakably distress your benevolent heart! Eliza—oh, the ruined, lost Eliza!

I want words to express the emotions of indignation, and grief which oppress me. But I will endeavor to compose myself, and relate the circumstances as they came to my knowledge

After my last letter, Eliza remained much in the same gloomy situation as I found her. She refused to go, agreeably to her promise, to visit your mamma, and
20 under one pretext or another, has constantly declined accompanying me any where else, since my arrival

Till last Thursday night she slept in the same bed with me, when she excused herself, by saying she was restless, and should disturb my repose. I yielded to her humor of taking a different apartment, little suspecting the real cause! She frequently walked out, and though I sometimes followed, I very seldom found her. Two or three times, when I happened to be awake, I heard her go down stairs, and on inquiry in the morning, she told
30 me that she was very thirsty, and went down for water. I observed a degree of hesitancy in her answers, for which I could not account. But last night, the dreadful mystery was developed! A little before day, I heard the front door opened with great caution. I sprang from my bed, and running to the window, saw by the light of the moon, a man going from the house. Soon after I perceived a footstep upon the stairs which carefully approached and entered Eliza's chamber

Judge of my astonishment, my surprise, my feelings,
40 upon this occasion! I doubted not but Major Sanford was the person I had seen, and the discovery of Eliza's

guilt, in this infamous intrigue, almost deprived me of thought and recollection! My blood thrilled with horror at this sacrifice of virtue! After a while I recovered myself, and put on my clothes. But what to do, I knew not, whether to go directly to her chamber and let her know that she was detected, or to wait another opportunity

I resolved on the first. The day had now dawned. I tapped at her door, and she bid me come in. She was sitting in an easy chair by the side of her bed. As I entered she withdrew her handkerchief from her face and looking earnestly at me, said, what procures me the favor of a visit, at this early hour, Miss Granby? I was disturbed, said I, and wished not to return to my bed. But what breaks your rest, and calls you up so unseasonably, Eliza? Remorse, and despair, answered she, weeping. After what I have witnessed, this morning, rejoined I, I cannot wonder at it! Was it not Major Sanford whom I saw go from the house some time ago? She was silent but tears flowed abundantly. It is too late, continued I to deny, or evade. Answer my question sincerely, for believe me, Eliza, it is not malice, but concern for you which prompts it. I will answer you, Julia, said she. You have discovered a secret, which harrows up my very soul! A secret which I wished you to know, but could not exert resolution to reveal! Yes! It was Major Sanford, the man who has robbed me of my peace who has triumphed in my destruction, and who will cause my sun to sit at noon!

I shudder, said I, at your confession! Wretched, deluded girl! Is this a return for your parent's love, and assiduous care, for your friends' solicitude, and premonitory advice? You are ruined, you say! You have sacrificed your virtue to an abandoned, despicable profligate. And you live to acknowledge and bear your infamy! do, said she, but not long shall I support this burden. See you not, Julia, my decaying frame, my faded cheek and tottering limbs? Soon shall I be insensible to censure and reproach! Soon shall I be sequestered in the mansion, "where the wicked cease from troubling, and where the weary are at rest!" Rest! said I, can you expect to find rest either in this world, or another, with such a weight of guilt on your head? She exclaimed with great emotion, add not to the upbraidings of wounded spirit! Have pity upon me, Oh! my friend have pity upon me!

Could you know what I suffer, you would think me sufficiently punished! I wish you no other punishment

said I, than what may effect your repentance and reformation. But your mother, Eliza! She cannot long be ignorant of your fall, and I tremble to think of her distress! It will break her widowed heart! How has she loved, how has she doated upon you! Dreadful is the requital which you have made! My mother, rejoined she—Oh, name her not! The very sound is distraction to me! Oh! my Julia, if your heart be not shut against mercy and compassion towards me, aid me through this trying scene! Let my situation call forth your pity, and induce you, undeserving as I am, to exert it in my behalf!

During this time, I had walked the chamber. My spirits had been raised above their natural key, and were exhausted. I sat down, but thought I should have rained, till a copious flood of tears gave me relief. Eliza was extremely affected. The appearance of calamity which she exhibited would have softened the most obdurate anger. Indeed, I feared some immediate and fatal effect. I therefore seated myself beside her, and assuming an air of kindness, compose yourself, Eliza, said I, I repeat what I told you before, it is the purest friendship, which thus interests me in your concerns. This, under the direction of charity, induces me again to offer you my hand. Yet you have erred against knowledge and reason, against warning and counsel. You have forfeited the favor of your friends, and reluctant will be their forgiveness. I plead guilty, said she, to all your charges. From the general voice I expect no clemency. If I can make my peace with my mother, it is all I seek or wish on this side the grave.

In your benevolence I confide for this. In you I hope to find an intercessor. By the remembrance of our former affection and happiness, I conjure you, refuse me not. At present, I entreat you to conceal from her this distressing tale. A short reprieve is all I ask. Why said I, should you defer it? When the painful task is over you may find relief in her lenient kindness. After she knows my condition, I cannot see her, resumed she, till I am assured of her forgiveness. I have not strength to support the appearance of her anger and grief. I will write to her what I cannot speak. You must bear the melancholy message, and plead for me, that her displeasure may not follow me to the grave, whither I am rapidly hastening. Be assured, replied I, that I will keep your secret as long as prudence requires. But I must leave you now, your mamma will wonder at our being thus closetted

together. When opportunity presents, we will converse further on the subject. In the mean time, keep yourself as composed as possible, if you would avoid suspicion.⁵⁰ She raised her clasped hands, and with a piteous look, threw her handkerchief over her face, and reclined in her chair, without speaking a word. I returned to my chamber, and endeavored to dissipate every idea which might tend to disorder my countenance, and break the silence I wished to observe, relative to what had happened.

When I went down, Mrs. Wharton desired me to step up, and inform Eliza that breakfast was ready. She told me she could not yet compose herself sufficiently to see her mamma. she begged me to excuse her absence as I⁶⁰ thought proper. I accordingly returned for answer to Mrs. Wharton, that Eliza had rested but indifferently, and being somewhat indisposed, would not come down, but wished me to bring her a bowl of chocolate, when we had breakfasted. I was obliged studiously to suppress even my thoughts concerning her, lest the emotions they excited might be observed. Mrs. Wharton conversed much of her daughter, and expressed great concern about her health and state of mind. Her return to this state of dejection, after having recovered her spirits and cheer-⁷⁰fulness, in a great degree, was owing, she feared, to some cause unknown to her, and she entreated me to extract the secret, if possible. I assured her of my best endeavors, and doubted not, I told her, but I should be able in a few days to effect what she wished.

Eliza came down and walked in the garden before dinner, at which she commanded herself much better than I expected. She said that a little ride might, she imagined, be of service to her, and asked me if I would accompany her a few miles in the afternoon. Her mamma⁸⁰ was much pleased with the proposition, and the chaise was accordingly ordered.

I observed to Eliza, as we rode, that with her natural and acquired abilities, with her advantages of education, with her opportunities of knowing the world, and of tracing the virtues and vices of mankind to their origin, I was surprised at her becoming the prey of an insidious libertine, with whose character she was well acquainted, and whose principles she was fully apprised would prompt him to deceive and betray her. Your surprise is very natural, said she. The same will doubtless be felt and expressed by every one to whom my sad story is related. But the cause may be found in that unrestrained levity of disposition, that fondness for

dissipation and coquetry which alienated the affections of Mr Boyer from me This event fatally depressed, and enfeebled my mind I embraced with avidity the consoling power of friendship, ensnaringly offered by my seducer, vainly inferring from his marriage with a virtuous woman, that he had seen the error of his ways, and forsaken his licentious practices, as he affirmed, and I, fool that I was, believed it!

It is needless for me to rehearse the perfidious arts, by which he insinuated himself into my affections, and gained my confidence Suffice it to say, he effected his purpose! But not long did I continue in the delusive dream of sensual gratification I soon awoke to a most poignant sense of his baseness, and of my own crime and misery I would have fled from him, I would have renounced him forever, and by a life of sincere humility and repentance, endeavored to make my peace with heaven, and to obliterate, by the rectitude of my future conduct, the guilt I had incurred, but I found it too late! My circumstances called for attention, and I had no one to participate my cares, to witness my distress, and to alleviate my sorrows, but him I could not therefore prevail on myself, wholly to renounce his society At times I have admitted his visits, always meeting him in the garden or grove adjoining, till of late, the weather, and my ill health induced me to comply with his solicitations, and receive him into the parlor

Not long, however, shall I be subject to these embarrassments Grief has undermined my constitution My health has fallen a sacrifice to a disordered mind But I regret not its departure! I have not a single wish to live Nothing which the world affords can restore my former serenity and happiness!

The little innocent I bear, will quickly disclose its mother's shame! God Almighty grant it may not live as a monument of my guilt, and a partaker of the infamy and sorrow, which is all I have to bequeath it! Should it be continued in life, it will never know the tenderness of a parent, and, perhaps, want and disgrace may be its wretched portion! The greatest consolation I can have, will be to carry it with me to a state of eternal rest, which, vile as I am, I hope to obtain, through the infinite mercy of heaven, as revealed in the gospel of Christ

I must see Major Sanford again It is necessary to converse further with him, in order to carry my plan of operation into execution What is this plan of opera-

tion, Eliza? said I. I am on the rack of anxiety for your safety Be patient, continued she, and you shall soon be informed Tomorrow I shall write my dreadful story to my mother She will be acquainted with my future intentions, and you shall know, at the same time, the destination of your lost friend I hope, said I that you have formed no resolution against your own life God forbid rejoined she My breath is in his hands, let him do what seemeth good in his sight! Keep my secret one day longer, and I will never more impose so painful a silence upon you

By this time we had reached home She drank tea with composure, and soon retired to rest Mrs Wharton eagerly inquired whether I had found out the cause of Eliza's melancholy I have urged her, said I, on the subject but she alleges that she has particular reasons for present concealment She has, notwithstanding, promised to let me know, the day after to-morrow Oh, said she, I shall not rest till the period arrives Dear good woman, said to myself, I fear you will never rest afterwards!

This is our present situation Think what a scene rises to the view of your Julia! She must share the distresses of others, though her own feelings, on this unhappy occasion, are too keen to admit a moment's serenity! My greatest relief is in writing to you, which I shall do again by the next post In the mean time, I must beg leave to subscribe myself, sincerely yours,

JULIA GRANBY

LETTER LXV

To the same

Hartford

All is now lost, lost, indeed! She is gone! Yes, my dear friend, our beloved Eliza, is gone! Never more shall we behold this once amiable companion, this once innocent and happy girl She has forsaken, and, as she says, bid an everlasting adieu to her home, her afflicted parent and her friends! But I will take up my melancholy story where I left it in my last

She went, as she told me she expected, into the garden and met her detestable paramour In about an hour she returned, and went directly to her chamber At about six o'clock I went up, and found her writing, and weeping I begged her to compose herself, and go down to dinner No, she said, she could not eat, and was not fit to at-

pear before any body I remonstrated against her immoderate grief, represented the injury she must sustain by the indulgence of it, and conjured her to suppress the violence of its emotions

She entreated me to excuse her to her mamma, said she was writing to her, and found it a task too painful to be performed with any degree of composure, that she was almost ready to sink under the weight of her affliction, but hoped and prayed for support, both in this, and another trying scene, which awaited her In compliance with her desire, I now left her, and told her mamma that she was very busy in writing, wished not to be interrupted at present, but would take some refreshment, an hour or two hence I visited her again about four o'clock, when she appeared more calm and tranquil

It is finished, said she, as I entered her apartment, it is finished What said I, is finished? No matter, replied she, you will know all to-morrow, Julia She complained of excessive fatigue, and expressed an inclination to lie down, in which I assisted her, and then retired Some time after, her mamma went up, and found her still on the bed She rose, however, and accompanied her down stairs I met her at the door of the parlor, and taking her by the hand, inquired how she did? Oh, Julia, miserably indeed, said she How severely does my mother's kindness reproach me! How insupportably it increases my self-condemnation! She wept, she wrung her hands, and walked the room in the greatest agony! Mrs Wharton was exceedingly distressed by her appearance Tell me, Eliza, said she, tell me the cause of your trouble? Oh, kill me not by your mysterious concealment! My dear child, let me, by sharing, alleviate your affliction! Ask me not, madam, said she, O my mother, I conjure you not to insist on my divulging to night, the fatal secret which engrosses and distracts my mind! To-morrow I will hide nothing from you I will press you no further, rejoined her mamma Chuse your own time, my dear, but remember, I must participate your grief, though I know not the cause

Supper was brought in, and we endeavored to prevail on Eliza to eat, but in vain She sat down, in compliance with our united importunities, but neither of us tasted food It was removed untouched For a while, Mrs Wharton and I gazed in silent anguish upon the spectacle of woe, before us! At length, Eliza rose to retire Julia, said she, will you call at my chamber as you pass to your own? I assented She then approached her mamma, fell

upon her knees before her, and clasping her hand, said, in broken accents, Oh madam! can you forgive a wretch, who has forfeited your love, your kindness, and your compassion? Surely, Eliza, said she, you are not that being! No, it is impossible! But however great your transgression, be assured of my forgiveness, my compassion, and my continued love! Saying this, she threw her arms about her daughter's neck, and affectionately kissed her Eliza struggled from her embrace, and looking at her with wild despair, exclaimed, this is too much! Oh, this unmerited goodness is more than I can bear! She then rushed precipitately out of the room, and left us overwhelmed in sympathy and astonishment!

When Mrs Wharton had recovered herself a little, she observed, that Eliza's brain was evidently disordered Nothing else, continued she, could impel her to act in this extraordinary manner At first she was resolved to follow her, but I dissuaded her from it, alledging, that as she had desired me to come into her chamber, I thought it better for me to go alone She acquiesced, but said she should not think of going to bed, but would, however, retire to her chamber, and seek consolation there I bade her good night, and went up to Eliza, who took me by the hand and led me to the toilet, upon which she laid the two inclosed letters, the one to her mamma, and the other to me These, said she, contain what I had not resolution to express Promise me, Julia, that they shall not be opened till to-morrow morning I will, said I I have thought and wept, continued she, till I have almost exhausted my strength, and my reason I would now obtain a little respite, that I may prepare my mind for the account I am one day to give at a higher tribunal than that of earthly friends For this purpose, what I have written, and what I shall yet say to you, must close the account between you and me. I have certainly no balance against you, said I In my breast you are fully acquitted Your penitential tears have obliterated your guilt, and blotted out your errors with your Julia. Henceforth, be they all forgotten Live, and be happy Talk not, said she, of life It would be a vain hope, though I cherished it myself.

That I must die, it is my only comfort,
Death is the privilege of human nature,
And life without it were not worth our taking
Thither the poor, the prisoner and the mourner
Fly for relief, and lay their burden down!"

You have forgiven me, Julia, my mother has assured me of her forgiveness, and what have I more to wish? my heart is much lightened by these kind assurances, they will be a great support to me in the dreadful hour which awaits me! What mean you, Eliza? said I. I fear some dreadful purpose labors in your mind. Oh, no, she replied, you may be assured your fear is groundless. I know not what I say. my brain is on fire, I am all confusion! Leave me, Julia, when I have had a little rest.

10 I shall be composed. These letters have almost distracted me, but they are written, and I am comparatively easy. I will not leave you, Eliza, said I, unless you will go directly to bed, and endeavor to rest. I will, said she, and the sooner the better. I tenderly embraced her, and retired, though not to bed. About an hour after, I returned to her chamber, and opening the door very softly, found her apparently asleep. I acquainted Mrs. Wharton with her situation, which was a great consolation to us both, and encouraged us to go to bed. Having suffered

20 much in my mind, and being much fatigued, I soon fell asleep, but the rattling of a carriage, which appeared to stop a little distance from the house, awoke me. I listened a moment, and heard the door turn slowly on its hinges. I sprang from my bed, and reached the window just in time to see a female handed into a chaise by a man who hastily followed her, and drove furiously away! I at once concluded they could be no other than Eliza and Major Sanford. Under this impression I made no delay, but ran immediately to her chamber. A candle

30 was burning on the table, but Eliza was not there! I thought it best to acquaint her mamma with the melancholy discovery, and stepping to her apartment for the purpose, found her rising. She had heard me walk, and was anxious to know the cause. What is the matter, Julia, said she, what is the matter? Dear madam, said I, arm yourself with fortitude! What new occurrence demands it? rejoined she. Eliza has left us! Left us! what mean you? She is just gone! I saw her handed into a chaise, which instantly disappeared!

40 At this intelligence she gave a shriek, and fell back on her bed! I alarmed the family, and by their assistance soon recovered her. She desired me to inform her of every particular relative to her elopement, which I did, and then delivered her the letter which Eliza had left for her. I suspect, said she, as she took it, I have long suspected, what I dared not believe! The anguish of my mind has been known only to myself, and my God! I

could not answer her, and therefore withdrew. When I had read Eliza's letter to me, and wept over the sad fall, and, as I fear the total loss of this once amiable and accomplished girl, I returned to Mrs. Wharton. She was sitting in her easy chair, and still held the fatal letter in her hand. When I entered, she fixed her streaming eyes upon me, and exclaimed, O Julia, this is more than the bitterness of death! True, madam, said I, your affliction must be great, yet that all-gracious Being, who controls every event, is able, and I trust, disposed to support you! To Him, replied she, I desire humbly to resign myself, but I think I could have borne almost any other calamity with greater resignation and composure than this. With how much comparative ease could I have followed her to the grave, at any period since her birth! Oh, my child, my child! dear, very dear hast thou been to my fond heart! Little did I think it possible for you to prepare so dreadful a cup of sorrow for your widowed mother! But where, continued she, where can the poor fugitive have fled? Where can she find that protection and tenderness, which, notwithstanding her great apostacy, I should never have withheld. From whom can she receive those kind attentions, which her situation demands.

The agitation of her mind had exhausted her strength, and I prevailed on her to refresh, and endeavor to compose herself to rest, assuring her of my utmost exertions to find out Eliza's retreat, and restore her to mother's arms.

I am obliged to suppress my own emotions, and to bend all my thoughts towards the alleviation of Mr. Wharton's anxiety and grief.

Major Sanford is from home, as I expected, and I am determined, if he return, to see him myself, and extort from him the place of Eliza's concealment. Her flight in her present state of health, is inexpressibly distressing to her mother, and unless we find her soon, I dread the effects!

I shall not close this, till I have seen or heard from the vile miscreant who has involved a worthy family in wretchedness!

Friday morning.—Two days have elapsed without affording us much relief. Last evening, I was told that Major Sanford was at home. I immediately wrote him a billet, entreating and conjuring him to let me know where the hapless Eliza had fled. He returned me the following answer.

Miss Granby need be under no apprehensions, respecting the situation of our beloved Eliza. She is well provided for, conveniently accommodated, and has every thing to make her happy, which love or affluence can give.

Major Sanford has solemnly sworn not to discover her retreat. She wishes to avoid the accusations of her friends, till she is better able to bear them.

Her mother may rest assured of immediate information, should any danger threaten her amiable daughter, and also of having seasonable notice of her safety."

Although little dependence can be placed upon this man, yet these assurances have, in a great degree, calmed our minds. We are, however, contriving means to explore the refuge of the wanderer and hope, by tracing his steps, to accomplish our purpose. This we have engaged a friend to do.

I know, my dear Mrs. Sumner, the kind interest you will take in this disastrous affair. I tremble to think what the event may be! To relieve your suspense however, I shall write you every circumstance, as it occurs. But at present, I shall only enclose Eliza's letters to her mamma, and me, and, subscribe myself your sincere and obliged friend,

JULIA GRANBY

LETTER LXVIII

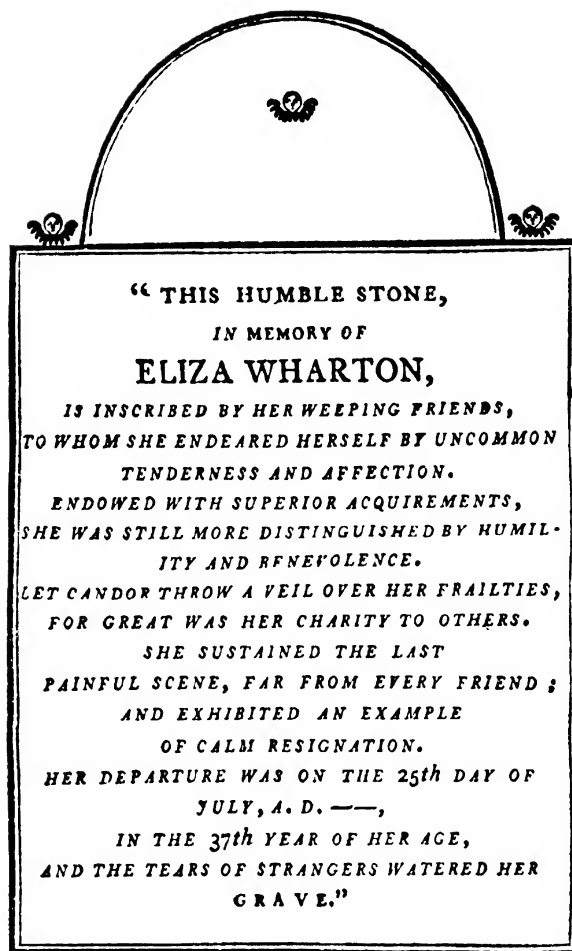

To Mrs. M. Wharton

Tuesday

My Honored and Dear Mamma,

In what words, in what language shall I address you? What shall I say on a subject which deprives me of the power of expression? Would to God I had been totally deprived of that power before so fatal a subject required its exertion? Repentance comes too late, when it cannot prevent the evil lamented. For your kindness, your more than maternal affection towards me, from my infancy to the present moment, a long life of filial duty and unerring rectitude could hardly compensate. How greatly deficient in gratitude must I appear then, while I confess, that precept and example, counsel and advice, instruction and admonition, have been all lost upon me!

Your kind endeavors to promote my happiness have been repaid by the inexcusable folly of sacrificing it. The various emotions of shame, and remorse, penitence and regret, which torture and distract my guilty breast,

exceed description. Yes, madam, your Eliza has fallen, fallen, indeed! She has become the victim of her own indiscretion, and of the intrigue and artifice of a designing libertine, who is the husband of another! She is polluted, and no more worthy of her parentage! She flies from you, not to conceal her guilt, that she humbly and penitently owns; but to avoid what she has never experienced, and feels herself unable to support, a mother's frown, to escape the heart-rending sight of a parent's grief, occasioned by the crimes of her guilty child!

I have become a reproach and disgrace to my friends. The consciousness of having forfeited their favor, and incurred their disapprobation and resentment, induces me to conceal from them the place of my retirement, but, lest your benevolence should render you anxious for my comfort in my present situation, I take the liberty to assure you that I am amply provided for.

I have no claim even upon your pity, but from my

long experience of your tenderness, I presume to hope it will be extended to me. Oh, my mother, if you knew what the state of my mind is, and has been, for months past, you would surely compassionate my case! Could tears efface the stain, which I have brought upon my family, it would, long since have been washed away! But, alas, tears are vain, and vain is my bitter repentance! It cannot obliterate my crime, nor restore me to innocence and peace! In this life I have no ideas of happiness
 10 These I have wholly resigned! The only hope which affords me any solace, is that of your forgiveness. If the deepest contrition can make an atonement, if the severest pains, both of body and mind, can restore me to your charity, you will not be inexorable! Oh, let my sufferings be deemed a sufficient punishment, and add not the insupportable weight of a parent's wrath! At present, I cannot see you. The effect of my crime is too obvious to be longer concealed, to elude the invidious eye of curiosity. This night, therefore, I leave your hospitable
 20 mansion! This night I become a wretched wanderer from thy paternal roof! Oh, that the grave were this

night to be my lodging! Then should I lie down and be at rest! Trusting in the mercy of God, through the mediation of his son, I think I could meet my heavenly father with more composure and confidence, than my earthly parent!

Let not the faults and misfortunes of your daughter oppress your mind. Rather let the conviction of having faithfully discharged your duty to your lost child, support and console you in this trying scene.

Since I wrote the above, you have kindly granted me your forgiveness, though you knew not how great, how aggravated was my offence! You forgive me, you say, Oh, the harmonious, the transporting sound! It has revived my drooping spirits, and will enable me to encounter, with resolution, the trials before me!

Farewell, my dear mamma! pity and pray for your ruined child, and be assured that affection and gratitude will be the last sentiments, which expire in the breast of your repenting daughter.

ELIZA WHARTON

179

Richard Henry Wilde

1789 • 1847

From the time it was first printed about 1815, without the author's consent, "The Lament of the Captive" (sometimes titled "Stanzas") was well liked by nineteenth-century Americans. It was frequently reprinted, not only in the United States but in Scotland and Ireland as well, and at least six composers wrote musical settings for it. It is a fine example of the self-pity which characterizes much sentimental writing.

Wilde was borne in Dublin, Ireland, the son of an Irish merchant and of Mary Newitt Wilde, whose Tory family had left America at the beginning of the Revolution.

The Wildes came to this country when Richard was a boy of eight, lived in Baltimore for five years, and then in Georgia. Wilde became a lawyer, then turned politics and served several terms in the United States Congress. He spent a number of years in Italy, studying the lives of Tasso and Dante. Though he wrote a great deal, he is remembered chiefly for the poem which follows.

C. C. Jones, *The Life, Literary Labors, and Neglected Grave of Richard Henry Wilde, 1887* • T. W. Koch, *Dante in America*

The Lament of the Captive

My life is like the summer rose,
That opens to the morning sky,
But, ere the shades of evening close,
Is scattered on the ground—to die!
Yet on the rose's humble bed
The sweetest dews of night are shed,
As if she wept the waste to see—
But none shall weep a tear for me!

My life is like the autumn leaf
That trembles in the moon's pale ray
Its hold is frail—its date is brief,
Restless—and soon to pass away!

10

Yet, ere that leaf shall fall and fade,
The parent tree will mourn its shade,
The winds bewail the leafless tree—
But none shall breathe a sigh for me!

My life is like the prints which feet
Have left on Tampa's desert strand,
Soon as the rising tide shall beat,
All trace will vanish from the sand,
Yet, as if grieving to efface
All vestige of the human race,
On that lone shore loud moans the sea—
But none, alas! shall mourn for me!

20

1814²·1815²

18 *Tampa's desert strand* The poem, written as a part of a larger piece, was supposedly the song of a captive in Florida

Samuel Woodworth

1785 • 1842

Scituate, Massachusetts, was the birthplace of Samuel Woodworth and the scene of a childhood which, contrary to the claims of his most famous poem, was a rather unhappy one. After somewhat scanty formal schooling, Woodworth became a printer, then a literary man, well-known in his day as editor, playwright, fictionist, and poet.

His most famous song, originally called "The Bucket," published in the *New York Republican Chronicle*, June 3, 1818, was immediately reprinted widely and hailed as a masterpiece. The poem was written to be sung to the melody of "The Flower of Dunblane," but another musical setting by George Kiallmark (1781-1835) became

popularly associated with it and helped spread and maintain its fame.

William Leggett's criticism of this piece, written in 1828, indicated the contemporary appeal of the song: "Its merit consists in the graphic accuracy of the description, the simplicity and nature of its sentiments, and the melodious flow of the versification. It appeals to feelings cherished in every human bosom . . . and forms around us, with the delusive power of a dream, a chain of young and heart-boarded circumstances. . . ."

S. J. Kunitz and Howard Haycraft, *American Authors 1600-1900*, New York, 1938 • A. H. Quinn, *A History of the American Drama from the Beginning to the Civil War*, New York, 1943

The Old Oaken Bucket

How dear to this heart are the scenes of my childhood,

When fond recollection presents them to view'
The orchard, the meadow, the deep-tangled wild-wood,

And every loved spot which my infancy knew'
The wide-spreading pond, and the mill that stood by it,
The bridge, and the rock where the cataract fell,
The cot of my father, the dairy-house nigh it,

And e'en the rude bucket that hung in the well—
The old oaken bucket, the iron-bound bucket,
The moss-covered bucket which hung in the well 10

That moss-covered vessel I hail'd as a treasure,

For often at noon, when return'd from the field,
I found it the source of an exquisite pleasure,

The purest and sweetest that nature can yield
How ardent I seized it, with hands that were glowing
And quick to the white-pebbled bottom it fell,
Then soon, with the emblem of truth overflowing,

And dripping with coolness, it rose from the well—
The old oaken bucket, the iron-bound bucket,
The moss-covered bucket, arose from the well 2

How sweet from the green mossy brim to receive it,

As poised on the curb it inclined to my lips'
Not a full blushing goblet could tempt me to leave it

The brightest that beauty or revelry sips
And now, far removed from the loved habitation,

The tear of regret will intrusively swell,
As fancy reverts to my father's plantation,
And sighs for the bucket that hangs in the well—
The old oaken bucket, the iron-bound bucket,
The moss-covered bucket that hangs in the well' 18

EARLY PORTRAYERS OF AMERICAN TYPES: Thomas, Neville, Tyler

Robert Bailey Thomas

1766 • 1846

The first number of *The Farmer's Almanack*, later called *The Old Farmer's Almanack*, was the issue of 1793, the publication is still flourishing. Founder of this long-lived publication and its chief genius during the years when farmers bought 100,000 copies of it each winter was Robert Bailey Thomas. Thomas was born in Massachusetts in 1766, the son of a New Englander who had a varied career as schoolmaster, tradesman, soldier, and farmer. Having inherited some of his father's

versatility, Thomas, after a moderate amount of schooling, became a schoolmaster, then a bookbinder, the bookseller, then a Boston publisher and author.

As a publisher, he made the annual issuance of almanac an important and highly profitable task. He compiled its astronomical predictions, its calendars, various useful charts, he selected and edited contributions sent in by clever readers, and he wrote a large amount of copy himself. "A man," as a co-worker t

ned, of strong practical good sense, Thomas early began to include in each issue a column for every month called 'Farmer's Calendar.' Here using and displaying his sound horse sense he handed out seasonable advice, sometimes in proverb form, sometimes in the form of sketches or fables. A selection from these direct and apparently artless little pieces will show that, incidentally and quite unpretentiously, Thomas achieved in them a

surprisingly inclusive portrait of New England life and manners. (The titles have been supplied by the editors.)

Fitts, 'The Thomas Almanacs,' *Historical Collections of the Essex Institute*, October 1874, XII, 243-270 • G. L. Kittredge, *The Old Farmer and His Almanack*, Boston, 1904

From

The Farmer's Almanack

NEIGHBOR BRAGGADOCIA

I have more pork in my cellar, said neighbor Braggadocia, than all the Almanack makers in Christendom lie on your lawn and all that stuff. I want none of your nonsense. No man shall teach me faith. Now I forbore to dispute with this great man, for the proverb says you cannot make a silken purse out of a sow's ear.

July 1807

BREAD AND CHEESE

Cut your early winter grain while the blades are yellow and the joints are green. Gather herbs. About five o'clock let the boy carry out some bread and cheese. It is the most agreeable time in the whole day to eat, and such a rural repast, which needs not take but a few moments, will do your workmen more good than a barrel of flip. I would not however have you be sparing of your liquor.

July 1807

FARMER-SOLDIERS

Now if you have been a good husband and kept your sheep well thro' the winter, you may wash and shear them about this time. Let spring calves go to grass and

Panel II to I. Captain Sam Brady, Indian fighter • Flatboat on the Mississippi River

salt them well "Every farmer," says my old friend Tom, "should be soldier enough to understand the word attention"

May 1809

THE HAPPY FARMER

The farmer now must be as busy as a woman with twins See daddy Spriggins' he considers the importance of strict attention to business He is up at the peep of the dawn—the boys are called, and Tabathy has long ago been at milking' What pleasure exceeds that of the farmer? Now he exultingly beholds the fair fruits of
10 his labour He picks his apples, he gathers his corn, he digs his potatoes, and dances around the cider mill with a delight that kings and emperors cannot enjoy with all their pompous parade and tinsel splendor

October 1809

NOVEMBER CHORES

The maltsters are calling for your barley—so make haste to thresh it Breed horses and fat cattle It will do to thresh all your grain You may set fruit trees Secure cellars from frost Rack off cydet—put it into clean casks See that your loose boards are nailed Take care of your bees by sheltering them Do not let geese, turkeys, &c suffer for want of food Be not impatient to
20 get away to the grog shop

November 1809

MINDING THE MAIN CHANCE

"There, there! run, John, the hogs are in the cornfield," cried old lady Lookout, as she stood slipshod over the cheese-tub "I told your father, John, that this would be the case, but he would rather go day after day up to 'Squire Plunker's to drink grog and swap horses, than go to a little pains to stop the gap in the wall, by which he might prevent the destruction of our beautiful cornfield, and then, Jonny, you know if we have corn to sell we
30 can afford to rig up a little and go and see your aunt Winnypucker's folks"

"Aye, aye, mother, let us mind the main chance, as our minister told us the other day. You look to your cheese-tubs, I'll see to the hogs, and with a little good

luck, by jinks, mother, we may be able to hold up our heads yet"

July 1812

SLIPPERY TIMES

"Slippery times, slippery times," cried father Simpkins when he saw his neighbor's mare fall and break her leg for want of shoeing

A blacksmith is of great use to a neighborhood Farmer Heedless acknowledges this, yet he seldom employs one 'Tis but a few days since I visited him. When I entered the house the good woman was complaining to him of his negligence

"There," said she, "it is going on five years since you broke the crane in heating water to scald the hogs, and all this time I have had to set my kettle on the coals Look at these tongs—they have been broke ever since Caleb was born' And as for the andirons, you have soaked them so much in your flip-pitcher that they have been useless this long time John, take the mare over to Captain Smite's and have her shod all over, for the poor creature ha'n't had but a piece of a shoe on since last June, when I rode her up to your uncle Clumpet's As for him when he can shoe the oxen O, by jingo! I wish I was a man—I would make business fly, like a hornet's nest in a pair of breeches, as the saying is," &c, &c, &c

February 1811

MY NEIGHBOR FREEPORT

My neighbor Freeport had a knack at telling a story cracking a joke and singing a song, and these talents made him a favourite of his townsmen Every town meeting and training was sure to gather round him a crowd of jovial fellows, and my neighbour pretty soon added to his other acquisitions that of handsomely swinging a glass of grog The demands for stories, jokes and songs encreased with the reward he received for them and Freeport had not a heart to refuse either, till the tavern became his common resort But while Freeport was so musical at the tavern his affairs got out of tune at home His wife took a high pitch, and often gave him an unwelcome solo Her stories had much of pith, and his sarcasms were of the keenest sort She insisted that the affairs were going to rack and ruin. Sometimes the neigh

bour's cattle had broken into the corn—the iver had been ruined by laying out in the storm—the hogs had broken in and rooted up the garden—the hay was half lost for want of attention—the fences were broken down &c. &c. And then the children—

Alas! the poor children were shoeless, cottless and heartless, for they had become the scott and sport of their little companions by reason of their father's neglect to provide them with decent and comfortable apparel. They were unable to read, for they had no books. The sheep—here the poor woman sorely wept—were sold by the collector to pay taxes. So there was no chance for any wool to knit the children's stockings. No flax had been raised, and of course they could have no shirts. To hear all this and ten times more was not very welcome to the ears of Freeport whose heart was naturally tender and humane, so to get rid of it, he used to return to the tavern like a sow to her wallowing. His shop bills run up fast while his character was running down. In this way he went on about two years, till old Scrapewell and Screw-penny got his farm, for all this time these usurers had been lending him money, and thus encouraging him to pursue this dreadful course.

Old Capt. Gripe also came in for a share of poor Freeport's estate, and there was Plinkett, the cobbler, he had lent him nine pence several times and now had cobbled it up to a court demand. Bob Raikins had swapped wretches with him, and came in for the boot. The widow Nippet had lent him her mare twice to mill and once to a funeral, and had sold the boys an old tow jacket for a peck of whortleberries, and also given them a mess of turnips, and so she made out her account and got a writ. Tom Teazer, well known at the grog shops for a stabster at shoemaker loo, old Jeremiah Jenkins, the Jew Stephen Staball, the butcher, and all the village moon-cursers came in for their portion of the wreck. So poor Freeport gave up vessel and cargo to these land pirates sent his disconsolate wife again to her father with one of their babes, the rest were provided for by the town—and as for himself, miserable wretch, he became an outcast, a vagabond, and died drunk in the highway.

October-December 1813

TURBULENT MARCH

'Tis almost as much as any one can do to keep his hat upon his head, and his head upon his shoulders, during

this turbulent month! See old aunt Betty Beeswax half leg deep in splash combating a gust of wind that has laid seige to her petticoat! Alas, poor Betty! These are searching, saucy and pitiless winds. Take heed from this and have mercy on those poor wretches whose characters you have a thousand times thus belabored and writhed and twisted and turned topsyturvy. Perhaps you are now on some *backbiting* expedition.

Take no alarm, ladies. Every fair dairy maid is not as Betty Beeswax, but lest some of you should wax warm and with a vengeance tear up my Calendar, I will change to a sweeter theme and sing of Maple Sugar. *Come thou sweet delicious juice and from the pregnant maple pour and fill our cullidons. The sweat and tears of sorrowing slaves shall ne'er impair thy charming flavour!*

March 1815

TOM TWILIGHT

Through drifting snow and cutting sleet
I've trudged and toiled my friends to greet,
And tug'd beneath my lumbering gear,
To wish you all a *happy* year.
Ye, gentle folks, shall I unpack,
The precious store upon my back,
My wallet, crowded to the brim
And all the wealth of *Pecky Tim*!
I've books of various sorts and sizes,
Come buy just as your fancy prizes!

Walk up, gemmen! Now's your time to make a fortune! Come, who takes this? Here is Thatcher's Orchard-
ist, a book that ought to be in the possession of every
farmer. The price one dollar, and Capt. Thrifty says he
would give five dollars rather than be without one. Here's
another excellent work, a Treatise on Gardening, by Wil-
liam Cobbett the great Porcupine! Be not afraid of his
quills. The tiger is softened to the lamb. He was once
as fierce as a bull, but now he is as calm as a sheep.
His arrows were as sharp as a pitchfork, but now they
are as blunt as a beetle! Now, my friends, is the time to
read books, crack nuts and tell stories—so here's another
of my Almanacks, which contains as much as the former
ones, and is, I hope, as entertaining.

January 1824

34 shoemaker loo, a round game of cards • 35 moon-cursers, wreckers

THE PREMIUMS

This is the month for cattle shows, and other agricultural exhibitions—Premiums are offered by various societies for the greatest crops, the best stock, and the best domestic manufactures, and thousands are pulling away for the prize, with all their might

The great Bull of farmer Lumpkins is a nonsuch'

Peter Nibble has raised a monstrous field of white beans'

Jo Lucky's acre of corn has seven stout ears to the stalk'

Dolly Dilligence has outstript all in the bonnet line'

Tabitha Twistem's hearth rug is up to all Market-street'

The Linsey-Woolsey Manufacturing Company have made the finest piece of satinet that ever mortals set eyes on'

There is the widow Clacker's heifer, she is to be driven'

And, O if you could only see, Squire Trulliber's great boar' They say it is as big as a full grown rhinoceros'

Huzza huzza for the premiums' Here's to the girl that can best darn a stocking, and to the lad that shall raise the biggest pumpkin'

October 1824

Morgan Neville

1783 • 1840

The first fictionist of note to hail from west of the Alleghenies, Morgan Neville was born in Pittsburgh in 1783. He was the descendant of a family which for many years had been important in western Pennsylvania and which had included two Revolutionary War heroes. After studying at the Pittsburgh Academy, he began a varied career typical of the West of the day. At various times he was a lawyer, a bank cashier, a sheriff, a business secretary, a journalist, and an editor.

Neville's writings included—in addition to newspaper editorials and lyric poems, happily forgotten—a number of sketches and tales. One of these still remembered, is "Reminiscence of Pittsburgh" (1831), a story of a French *émigré* who wandered to Pittsburgh in the days of the French Revolution and became the proprietor of a confectionery shop there. His most famous story is "The

Last of the Boatmen," published in a Cincinnati giftbook *The Western Souvenir* in 1828.

"The Last of the Boatmen" is a portrayal of the famed Mike Fink (1770?-1823). Mike had been one of the keelboatmen on the Ohio and Mississippi rivers and later one of the trappers operating in the country far to the west of St. Louis. He became a representative, in popular thought, of the frontier, and during his lifetime and after his death he was the hero of much lore retailed by word of mouth up and down the rivers. Young Abe Lincoln and young Sam Clemens were destined to hear traditional yarns about him, and Clemens was to consider putting a passage about him in *Huckleberry Finn*.

Mike's story, as Neville told it, was transitional in the way much fiction of the 1820's and 1830's was—a con-

bination of the elegant and leisurely method of the essay with the salty materials of the campfire yarn. Despite its stiffness and its embroidered elegance, it pointed the way for later writers who were to portray more and more indigenous American characters in a style like that of the fireside storyteller. Neville's work, in other words

was preparatory for that of some of the best humorists of the prewar period.

Walter Blair and F. J. Monahan, *Mike Fink, King of Mississippi Keelboatmen*, New York, 1933 • J. T. Flanagan, *Morgan Neville, Early Western Chronicler*, *Western Pennsylvania Historical Magazine*, December 1938, XXI, 255-266

The Last of the Boatmen

I embarked a few years since, at Pittsburgh, for Cincinnati, on board of a steam boat—more with a view of realising the possibility of a speedy return against the current, than in obedience to the call of either business or pleasure. It was a voyage of speculation. I was born on the banks of the Ohio, and the only vessels associated with my early recollections were the canoes of the Indians, which brought to Fort Pitt their annual cargoes of skins and bear's oil. The flat boat of Kentucky, destined only to float with the current, next appeared, and after many years of interval, the keel boat of the Ohio, and the barge of the Mississippi were introduced for the convenience of the infant commerce of the West.

At the period, at which I have dated my trip to Cincinnati, the steam boat had made but few voyages back to Pittsburgh. We were generally skeptics as to its practicability. The mind was not prepared for the change that was about to take place in the West. It is now consummated, and we yet look back with astonishment at the result.

The rudest inhabitant of our forests,—the man whose mind is least of all imbued with a relish for the picturesque—who would gaze with vacant stare at the finest painting—listen with apathy to the softest melody—and turn with indifference from a mere display of ingenious mechanism, is struck with the sublime power

and self-moving majesty of a steam boat,—lingers on the shore where it passes—and follows its rapid, and almost magic course with silent admiration. The steam engine in five years has enabled us to anticipate a state of things, 30 which, in the ordinary course of events, it would have required a century to have produced. The art of printing scarcely surpassed it in its beneficial consequences.

In the old world, the places of the greatest interest to the philosophic traveller are ruins, and monuments, that speak of faded splendour, and departed glory. The broken columns of Tadmor—the shapeless ruins of Babylon, are rich in matter for almost endless speculation. Far different is the case in the western regions of America. The stranger views here, with wonder, the 40 rapidity with which cities spring up in forests, and with which barbarism retreats before the approach of art.

7 Flat boat, a boat used by pioneers in moving downriver. These were flat bottomed, boxlike structures of green oak fastened with wooden pins to timber frames, averaging about forty feet long, twelve feet wide, and eight feet deep. • 11 Keel boat, a vessel used for transporting cargoes not only downstream but upstream as well. These boats, averaging about fifty feet in length and nine feet or less in width, were built on a keel covered with planks. They had a draught of only twenty or thirty inches, and could be poled, bushwhacked, rowed, sailed, or cordelled—by manpower—upstream. • 12 Barge, a long boat, similar to a keelboat, sixty feet long, propelled by fifty oars.

and civilization. The reflection possessing the most intense interest is—not what has been the character of the country, but what shall be her future destiny.

As we coasted along this cheerful scene, one reflection crossed my mind to diminish the pleasure it excited. This was caused by the sight of the ruins of the once splendid mansion of Blennerhassett. I had spent some happy hours here, when it was the favourite residence of taste and hospitality. I had seen it when a lovely and accomplished woman presided—shedding a charm around, which made it as inviting, though not so dangerous, as the island of Calypso,—when its liberal and polished owner made it the resort of every stranger, who had any pretensions to literature or science. I had beheld it again under more inauspicious circumstances—when its proprietor, in a moment of visionary speculation, had abandoned this earthly paradise to follow an adventurer—himself the dupe of others. A military banditti held possession, acting "by authority." The embellishments of art and taste disappeared beneath the touch of a band of Vandals, and the beautiful domain which presented the imposing appearance of a palace, and which had cost a fortune in the erection, was changed in one night, into a scene of devastation. The chimneys of the house remained for some years—the insulated monument of the folly of their owner, and pointed out to the stranger the place where once stood the temple of hospitality. Driftwood covered the pleasure grounds, and the massive, cut stone, that formed the columns of the gateway, were scattered more widely than the fragments of the Egyptian Memnon.

When we left Pittsburgh, the season was not far advanced in vegetation. But as we proceeded, the change was more rapid than the difference of latitude justified. I had frequently observed this in former voyages, but it never was so striking, as on the present occasion. The old mode of travelling, in the sluggish flat boat seemed to give time for the change of season, but now a few hours carried us into a different climate. We met spring with all her laughing train of flowers and verdure, rapidly advancing from the south. The buck-eye, cottonwood, and maple, had already assumed, in this region, the rich livery of summer. The thousand varieties of the floral kingdom spread a gay carpet over the luxuriant bottoms on each side of the river. The thick woods resounded with the notes of the feathered tribe—each striving to

out-do his neighbor in noise, if not in melody. We had not yet reached the region of paroquets, but the clear-toned whistle of the cardinal was heard in every bush, and the cat-bird was endeavouring, with its usual zeal to rival the powers of the more gifted mocking-bird.

A few hours brought us to one of those stopping points, known by the name of "wooding places." It was situated immediately above Letart's Falls. The boat obedient to the wheel of the pilot, made a graceful sweep towards the island above the chute, and rounding it, approached the wood pile. As the boat drew near the shore, the escape steam reverberated through the forest and hills, like the chafed bellowing of the caged tiger. The root of a tree, concealed beneath the water, prevented the boat from getting sufficiently near the bank, and it became necessary to use the paddles to take a different position.

"Back out! Mannee—and try it again!" exclaimed a voice from the shore. "Throw your pole wide—and brace off—or you'll run against a snag!"

This was a kind of language long familiar to us on the Ohio. It was a sample of the slang of the keel boatmen.

The speaker was immediately cheered by a dozen voices from the deck, and I recognized in him the person of an old acquaintance, familiarly known to me from my boyhood. He was leaning carelessly against a large beech, and as his left arm negligently pressed his rifle to his side, presented a figure, that *Salvator* would have chosen from a million, as a model for his wild and gloomy pencil. His stature was upwards of six feet in proportions perfectly symmetrical, and exhibiting the

7 *mansion of Blennerhassett*. On an island on the Ohio, about fifteen miles below Marietta, the rich Irish emigrant, Harman Blennerhassett, built his expensive and showy mansion. Blennerhassett joined Aaron Burr in his conspiracy and was arrested with him in 1806. At the arrest, the mansion, deserted and neglected, became a picturesque ruin. • 12 *island of Calypso*. Calypso was a sea nymph visited by Ulysses during his wanderings. She fell in love with the Greek hero and tried to make him stay with her forever. • 30 *Egyptian Memnon*. A huge statue erected on the banks of the Nile to honor the son of Aurora and Tithonus—the king of the Ethiopians. • 64 *Mannee*, a slang term for crew member. • 65 "Throw your pole wide" refers to the manipulation of keelboats with long poles. None was used, of course, on steamboats. • 66 *snag*, an uprooted tree wilying upon river shoals, menaced river traffic. • 75 *Salvator*, *Salvator Rosa* (1615-1673), an Italian painter famed for his heroic portraits.

evidence of Herculean powers To a stranger, he would have seemed a complete mulatto Long exposure to the sun and weather on the lower Ohio and Mississippi had changed his skin, and, but for the fine European cast of his countenance, he might have passed for the principal warrior of some powerful tribe Although at least fifty years of age, his hair was as black as the wing of the raven. Next to his skin he wore a red flannel shirt, covered by a blue capot, ornamented with white fringe On his feet were moccasins, and a broad leathern belt, from which hung, suspended in a sheath, a large knife, encircled his waist.

As soon as the steam boat became stationary, the cabin passengers jumped on shore On ascending the bank, the figure I have just described advanced to offer me his hand

"How are you, MIKE?" said I

How goes it?" replied the boatman—grasping my hand with a squeeze, that I can compare to nothing, but that of a blacksmith's vice.

"I am glad to see you, Mannee!"—continued he in his abrupt manner "I am going to shoot at the tin cup for a quart—off hand—and you must be judge"

I understood Mike at once, and on any other occasion, should have remonstrated, and prevented the daring trial of skill But I was accompanied by a couple of English tourists, who had scarcely ever been beyond the sound of Bow Bells, and who were travelling post over the United States to make up a book of observations, on our manners and customs There were, also, among the passengers, a few bloods from Philadelphia and Baltimore, who could conceive of nothing equal to Chestnut or Howard streets, and who expressed great disappointment at not being able to find terrapins and oysters at every village—marvelously lauding the comforts of Rubicum's. My tramontane pride was aroused, and I resolved to give them an opportunity of seeing a Western Lion—for such Mike undoubtedly was—in all his glory The philanthropist may start, and accuse me of want of humanity I deny the charge, and refer for apology to one of the best understood principles of human nature

Mike, followed by several of his crew, led the way to a beech grove, some little distance from the landing I invited my fellow passengers to witness the scene On arriving at the spot, a stout bull-headed boatman, dressed in a hunting shirt—but bare-footed—in whom I recognised a younger brother of Mike, drew a line with

his toe, and stepping off thirty yards—turned round fronting his brother—took a tin cup, which hung from his belt, and placed it on his head Although I had seen this feat performed before, I acknowledge, I felt uneasy, whilst this silent preparation was going on But I had not much time for reflection, for this second Albert exclaimed—

"Blaze away, Mike! and let's have the quart."

My "compagnons de voyage, as soon as they recovered from the first effect of their astonishment, exhibited a disposition to interfere But Mike, throwing back his left leg, levelled the rifle at the head of his brother In this horizontal position the weapon remained for some seconds as immovable, as if the arm which held it, was affected by no pulsation

"Elevate your piece a little lower, Mike! or you will pay the corn," cried the imperturbable brother

I know not if the advice was obeyed or not, but the sharp crack of the rifle immediately followed, and the cup flew off thirty or forty yards—rendered unfit for future service There was a cry of admiration from the strangers, who pressed forward to see, if the fool-hardy boatman was really safe He remained as immovable, as if he had been a figure hewn out of stone He had not even winked, when the ball struck within two inches of his skull

"Mike has won!" I exclaimed, and my decision was the signal which, according to their rules, permitted him of the target to move from his position No more sensation was exhibited among the boatmen, than if a common wager had been won The bet being decided, they hurried back to their boat, giving me and my friends an invitation to partake of "the treat" We declined, and took leave of the thoughtless creatures In a few minutes afterwards, we observed their "Keel" wheeling into the current,—the gigantic form of Mike, bestriding the large steering oar, and the others arranging themselves in their places in front of the cabin, that extended nearly the whole length of the boat, covering merchandize of immense value As they left the shore, they gave the Indian yell, and broke out into a sort of unconnected chorus—commencing with—

8 red . capot, parts of the boatman's typical costume • 27 Bow Bells, the bells of Bow Church (St Mary in Arcubus) in Cheapside

"Hard upon the beech oar!—
She moves too slow!—
All the way to Shawneetown,
Long while ago."

In a few moments the boat "took the chute" of Letart's Falls, and disappeared behind the point, with the rapidity of an Arabian courser

Our travellers returned to the boat, lost in speculation on the scene, and the beings they had just beheld, and, no doubt, the circumstance has been related a thousand times with all the necessary amplifications of finished tourists

Mike Fink may be viewed, as the correct representative of a class of men now extinct, but who once possessed as marked a character, as that of the Gipsies of England, or the Lazaroni of Naples. The period of their existence was not more than the third of a century. The character was created by the introduction of trade on the Western waters, and ceased with the successful establishment of the steam boat.

20 There is something inexplicable in the fact, that there could be men found, for ordinary wages, who would abandon the systematic, but not laborious pursuits of agriculture, to follow a life, of all others, except that of the soldier, distinguished by the greatest exposure and privation. The occupation of a boatman was more calculated to destroy the constitution, and to shorten life, than any other business. In ascending the river, it was a continued series of toil, rendered more irksome by the snail like rate, at which they moved. The boat was
30 propelled by poles, against which the shoulder was placed, and the whole strength, and skill of the individual were applied in this manner. As the boatmen moved along the running board, with their heads nearly touching the plank on which they walked, the effect produced on the mind of an observer was similar to that, on beholding the ox, rocking before an overloaded cart. Their bodies, naked to their waist for the purpose of moving with greater ease, and of enjoying the breeze of the river, were exposed to the burning suns of summer, and
40 to the rains of autumn—After a hard day's push, they would take their "fillee," or ration of whiskey, and having swallowed a miserable supper of meat half burnt, and of bread half baked, stretch themselves, without covering, on the deck, and slumber till the steersman's call invited them to the morning "fillee." Notwithstanding this, the

boatman's life had charms as irresistible, as those presented by the splendid illusion of the stage. Some abandoned the comfortable farms of their fathers, and apprentices fled from the service of their masters. There was a captivation in the idea of "going down the river," and the youthful boatman who had "pushed a keel from New Orleans, felt all the pride of a young merchant, after his first voyage to an English sea port. From an exclusive association together, they had formed a kind of slang peculiar to themselves; and from the constant exercise of wit, with "the squatters" on shore, and crew of other boats, they acquired a quickness, and smartness of vulgar retort, that was quite amusing. The frequent battles they were engaged in with the boatmen of different parts of the river, and with the less civilized inhabitants of the lower Ohio, and Mississippi, invested them with that ferocious reputation, which has made them spoken of throughout Europe.

On board of the boats thus navigated, our merchant entrusted valuable cargoes, without insurance, and with no other guarantee than the receipt of the steersman, who possessed no property but his boat, and the confidence so reposed was seldom abused.

Among these men, Mike Fink stood an acknowledged leader for many years. Endowed by nature with the qualities of intellect, that give the possessor influence, he would have been a conspicuous member of any society in which his lot might have been cast. An acute observer of human nature has said—"Opportunity alone makes the hero. Change but their situations, and Caesar would have been but the best wrestler on the green." With a figure cast in a mould that added much of the symmetry of an Apollo to the limbs of a Hercules, he possessed gigantic strength, and accustomed from an early period of life to brave the dangers of a frontier life, his character was noted for the most daring intrepidity. At the court of Charlemagne, he might have been a Roland with the Crusaders, he would have been the favourite of the Knight of the Lion-heart, and in our revolution, would have ranked with the Morgans and the Putnams.

56 "the squatters," settlers who occupied land without paying for it.
82 Roland, a hero of the army of Charlemagne which invaded Spain in 778. • 84 Knight of the Lion-heart, Richard Coeur de Lion, King of England, 1189-1199. • 85 Morgans and Putnams. Daniel Morgan (1736?-1802) and Israel Putnam (1718-1790) were Revolutionary War heroes.

of the day. He was the hero of a hundred fights, and the leader in a thousand daring adventures. From Pittsburgh to St. Louis, and New Orleans, his fame was established. Every farmer on the shore kept on good terms with Mike; otherwise, there was no safety for his property. Wherever he was an enemy, like his great prototype Rob Roy, he levied the contribution of Black Mail for the use of his boat. Often at night when his tired companions slept, he would take an excursion of five or six miles, and return before morning, rich in spoil. On the Ohio, he was known among his companions by the appellation of the "Snapping Turtle," and on the Mississippi, he was called "The Snag."

At the early age of seventeen, Mike's character was displayed, by enlisting himself in a corps of Scouts—a body of irregular rangers, which was employed on the North-western frontiers of Pennsylvania, to watch the Indians, and to give notice of any threatened inroad.

At that time, Pittsburgh was on the extreme verge of white population, and the spies, who were constantly employed, generally extended their explorations forty or fifty miles to the west of this post. They went out, singly, lived as did the Indian, and in every respect, became perfectly assimilated in habits, taste, and feeling, with the red men of the desert. A kind of border warfare was kept up, and the scout thought it as praiseworthy to bring in the scalp of a Shawnee as the skin of a panther. He would remain in the woods for weeks together, using parched corn for bread, and depending on his rifle for his meat—and slept at night in perfect comfort, rolled in his blanket.

In this corps, whilst yet a stripling, Mike acquired a reputation for boldness and cunning far beyond his companions. A thousand legends illustrate the fearlessness of his character. There was one, which he told himself, with much pride, and which made an indelible impression on my boyish memory. He had been out on the hills of Mahoning, when, to use his own words, 'he saw signs of Indians being about. —He had discovered the recent print of the moccasin on the grass, and found drops of the fresh blood of a deer on the green bush. He became cautious, skulked for some time in the deepest thickets of hazel and briar, and, for several days, did not discharge his rifle. He subsisted patiently on parched corn and jerk, which he had dried on his first coming into the woods. He gave no alarm to the settlements, because he

discovered with perfect certainty, that the enemy consisted of a small hunting party, who were receding from the Alleghany.

As he was creeping along one morning, with the stealthy tread of a cat, his eye fell upon a beautiful buck, browsing on the edge of a barren spot, three hundred yards distant. The temptation was too strong for the woodsman, and he resolved to have a shot at every hazard—Re-priming his gun, and picking his flint, he made his approaches in the usual noiseless manner. At the moment he reached the spot, from which he meant to take his aim, he observed a large savage, intent upon the same object, advancing from a direction a little different from his own. Mike shrunk behind a tree, with the quickness of thought, and keeping his eye fixed on the hunter, waited the result with patience. In a few moments, the Indian halted within fifty paces, and levelled his piece at the deer. In the meanwhile, Mike presented his rifle at the body of the savage, and at the moment the smoke issued from the gun of the latter, the bullet of Fink passed through the red man's breast. He uttered a yell, and fell dead at the same instant with the deer. Mike re-loaded his rifle, and remained in his covert for some minutes to ascertain whether there were more enemies at hand. He then stepped up to the prostrate savage, and having satisfied himself, that life was extinguished, turned his attention to the buck, and took from the carcass those pieces suited to the process of jerking.

In the meantime the country was filling up with a white population, and in a few years the red men, with the exception of a few fractions of tribes, gradually receded to the Lakes and beyond the Mississippi. The corps of Scouts was abolished, after having acquired habits, which unfitted them for the pursuits of civilized society. Some incorporated themselves with the Indians, and others, from a strong attachment to their erratic mode of life, joined the boatmen, then just becoming a distinct class. Among these was our hero, Mike Fink, whose talents were soon developed, and for many years, he was as celebrated on the rivers of the West, as he had been in the woods.

7 Rob Roy, says Walter Scott, was "the Robin Hood of Scotland—the dread of the wealthy and the friend of the poor."

I gave to my fellow travellers the substance of the foregoing narrative, as we sat on deck by moonlight, and cut swiftly through the magnificent sheet of water between Letart and the Great Kanhawa. It was one of those beautiful nights, which permitted every thing to be seen with sufficient distinctness to avoid danger,—yet created a certain degree of illusion, that gave reins to the imagination. The outline of the river hills lost all its harshness, and the occasional bark of the house dog from the shore, and the distant scream of the solitary loon, gave increased effect to the scene. It was altogether so delightful, that the hours till morning flew swiftly by, whilst our travellers dwelt with rapture on the surrounding scenery, which shifted every moment like the capricious changes of the kaleidoscope—and listening to tales of border warfare, as they were brought to mind, by passing the places where they happened. The celebrated Hunter's Leap, and the bloody battle of Kanhawa, were not forgotten.

The afternoon of the next day brought us to the beautiful city of Cincinnati, which, in the course of thirty years, has risen from a village of soldiers' huts to a town,—giving promise of future splendour, equal to any on the sea-board.

Some years after the period, at which I have dated

my visit to Cincinnati, business called me to New Orleans. On board of the steam boat, on which I had embarked, at Louisville, I recognized, in the person of the pilot, one of those men, who had formerly been a patrolman, or keel boat captain. I entered into conversation with him on the subject of his former associates.

"They are scattered in all directions," said he, "a few, who had capacity, have become pilots of steam boats. Many have joined the trading parties that cross the Rocky mountains; and a few have settled down as farmers."

"What has become," I asked, "of my old acquaintance Mike Fink?"

"Mike was killed in a skirmish," replied the pilot. "He had refused several good offers on steam boats. He said he could not bear the hissing of steam, and he wanted room to throw his pole. He went to the Missouri and about a year since he was shooting the tin cup, when he had corned too heavy. He elevated too low, and shot his companion through the head. A friend of his, who was present, suspecting foul play, shot Mike through the heart, before he had time to reload his rifle."

With Mike Fink expired the spirit of the Boatmen.

1826

Royall Tyler

1757 • 1826

The most sophisticated of the early portrayals of American types was probably Royall Tyler, soldier, lawyer, dramatist, essayist, novelist, poet, now known almost exclusively as the author of *The Contrast*, the first comedy by an American to achieve production by a professional theatrical company. Colonel Manly, the hero of *The*

Contrast, is both a Federalist and a "100% American." His waiter-orderly, Jonathan, is acknowledged to be the first "stage Yankee," a rural New Englander with the peculiar mixture of ignorance and horse sense which wary outlanders have often found a snare and a delusion.

Tyler was born in Boston in 1757. Despite a youth

predilection for mischief he was graduated as valedictorian of the Harvard Class of 1776. He then turned to the study of law, and was admitted to the bar in 1780. He practiced in Falmouth (now Portland), Maine, for a time; then at Braintree, Massachusetts, where he became engaged to Abigail, the daughter of John Adams. In 1785, after Abigail had joined her father in England and had broken the engagement, he practiced in Boston. He took an active part in the suppression of Shays' Rebellion in the latter part of 1786, and in March of the following year visited New York on a mission related to that uprising. There he saw his first play and, within three weeks, was himself a successful playwright. In 1791 he left Boston to settle in Vermont, where he lived the rest of his life. He was Chief Justice of the Supreme Court of Vermont from 1807 until 1813, and in 1811-1814 was professor of jurisprudence in the university of that state.

Tyler wrote at least eight other plays besides *The Contrast*, among them an opera and three "sacred dramas" in blank verse. A considerable number of poems and essays may be found in the various periodicals edited by Joseph Dennie (1768-1812), the foremost of the Federalist essayists, with whom Tyler occasionally collaborated. Two works of fiction (*The Algerine Captive*, 1797, and *The Yankee in London*, 1809) express more elaborately the same ardent nationalism which may be seen in *The Con-*

trast. *The Algerine Captive* is particularly worth reading (it merits a modern edition), for its narrator, Doctor Uplike Underhill, is even more the enemy of false pretensions than Colonel Manly and Jonathan, his rambling comments on New England history, medical practice, Benjamin Franklin, Thomas Paine, religion, law, slavery, and other matters make an excellent picture of Tyler's times.

In a number of ways—his nationalism, his Federalistic political views, his pursuit of literature as an avocation, and his easy mastery of the dominant literary types of his day—Tyler was akin in spirit to the Connecticut Wits. The preface to *The Algerine Captive* is the key, perhaps, to his literary credo. That the common people should read novels he found pleasing even if they were bad ones.

He believed, however, that Americans should write their own novels, and that they should not "excite a fondness for false splendor" in the young female mind. His didacticism, so evident in the character of Manly, was part of the sentimental tradition of his age.

Quinn, *A History of the American Drama from the Beginning to the Civil War*, Revised Edition, New York, 1936.

The Contrast

The Contrast, advertised as written by a citizen of the United States, was first performed by the American Company at the John Street Theatre, New York, on April 16, 1787. Colonel Manly and Dimple were played by the partners who managed the company, John Henry and Lewis Hallam, Jonathan by Thomas Wignell, the popular

comedian. The play was, for the times, successful; there are records of about a dozen performances within a few years, half of them in New York, the others in Baltimore, Philadelphia, Richmond, and Boston.

Tyler is said to have written *The Contrast* within three weeks of seeing his first play, *The School for Scandal* (1777) by the English playwright Richard Brinsley Sheridan (1751-1816). It is obvious, however, that he not only attended the performances of the American Company with some regularity while he was writing it, but that he was also well-read in the English literature of the eighteenth century. The character of Dimple is much like that of Joseph Surface in *The School for Scandal*; the name of Manly and to some extent the character and situation appear to be based upon *The Provoked Husband* (1702) by the Englishman Sir John Vanbrugh (1666?-1726), which the American Company may have performed during

Tyler's New York stay, part of Jonathan's entertainment at the "hocus pocus" place was clearly *The Poor Soldier*, a farce by the Irish playwright John O'Keefe (1747-1833), presented frequently as an after-piece by the Henry-Hallam company. Other parallels are less conspicuous, but it may be said, in general, that *The Contrast* owes much to the famous *Spectator* (1711-1712, supplementary numbers, 1714), by Joseph Addison (1671-1719) and Sir Richard Steele (1671-1729), the novels of Samuel Richardson (1689-1761), founder of the sentimental school of English fiction, and to the *Letters* (1774) of Philip Dormer Stanhope, fourth Earl of Chesterfield (1694-1773). The play, in fact, is very largely an attack on the advice of Chesterfield, designed to instruct his illegitimate son in the social graces of a man of the world.

Nevertheless, derivative as the play is and despite its frequent awkward dialogue (the best of actresses would be hard put to it to manage such a line as 'Spare me, sprightly friend!'), *The Contrast* is reasonably well localized and, as an expression of Tyler's nationalistic ideas, better perhaps in the reading than on the stage. At the time the play was produced New York was a city of about twenty-five thousand—a city on which the fashions and morals of London sat somewhat absurdly, as Tyler clearly saw.

Prologue

WRITTEN BY A YOUNG GENTLEMAN OF
NEW-YORK, AND SPOKEN BY MR WIGNELL

Exult each patriot heart!—this night is shewn
A piece, which we may fairly call our own,
Where the proud titles of "My Lord! Your Grace!"
To humble *Mr* and plain *Sir* give place
Our Author pictures not from foreign climes
The fashions or the follies of the times,
But has confin'd the subject of his work

To the gay scenes—the circles of New-York.
On native themes his Muse displays her pow'rs,
If ours the faults, the virtues too are ours.
Why should our thoughts to distant countries roam,
When each refinement may be found at home?
Who travels now to ape the rich or great.
To deck an equipage and roll in state,
To court the graces, or to dance with ease,
Or by hypocrisy to strive to please?
Our free-born ancestors such arts despis'd,
Genuine sincerity alone they priz'd,
Their minds, with honest emulation fir'd,
To solid good—not ornament—aspir'd,
Or, if ambition rous'd a bolder flame,
Stern virtue throve, where indolence was shame.

But modern youths, with imitative sense,
Deem taste in dress the proof of excellence,
And spurn the meanness of your homespun arts,
Since homespun habits would obscure their parts,
Whilst all, which aims at splendour and parade,
Must come from Europe, *and be ready made*
Strange! we should thus our native worth disclaim,
And check the progress of our rising fame
Yet *one*, whilst imitation bears the sway,
Aspires to nobler heights, and points the way,
Be rous'd, my friends! his bold example view,
Let your own Bards be proud to copy *you*!
Should rigid critics reprobate our play,
At least the patriotic heart will say,
'Glorious our fall, since in a noble cause
"The bold *attempt alone* demands applause"
Still may the wisdom of the Comic Muse
Exalt your merits, or your faults accuse
But think not, 'tis her aim to be severe,—
We all are mortals, and as mortals err
If candour pleases, we are truly blest
Vice trembles, when compell'd to stand confess'd
Let not light Censure on your faults offend
Which aims not to expose them but amend
Thus does our Author to your candour trust,
Conscious, the *free* are generous, as just

Text the 1790 edition, with the stage directions revised to be consistent with other plays in this anthology. *A Young Gentleman*, never identified. **Mr Wignell**, Thomas Wignell (1753?-1803), English-born comedian who first appeared in America in 1785.

ACT I

SCENE 1 An Apartment at Charlotte's. Charlotte and Letitia discovered

LETITIA. And so, Charlotte, you really think the pocket-hoop unbecoming

CHARLOTTE. No, I don't say so. It may be very becoming to saunter round the house of a rainy day, to visit my grand-mamma, or go to Quakers' meeting, but to swim in a minuet, with the eyes of fifty well-dressed beaux upon me, to trip it in the Mall, or walk on the battery, give me the luxurious, jaunty, flowing, bell-hoop. It would have delighted you to have seen me the last evening, my charming girl! I was dangling o'er the battery with Billy Dimple, a knot of young fellows were upon the platform, as I passed them I faltered with one of the most bewitching false steps you ever saw, and then recovered myself with such a pretty confusion, flitting my hoop to discover a jet black shoe and brilliant buckle. Gad! how my little heart thrilled to hear the confused raptures of—"Demme Jack what a delicate foot!" "Ha! General what a well-turn'd—"

LETITIA. Fie! fie! Charlotte [*stopping her mouth*], I protest you are quite a libertine

CHARLOTTE. Why, my dear little prude, are we not all such libertines? Do you think, when I sat tortured two hours under the hands of my friseur, and an hour more at my toilet, that I had any thoughts of my aunt Susan, or my cousin Bersey? though they are both allowed to be critical judges of dress

LETITIA. Why, who should we dress to please, but those who are judges of its merit?

CHARLOTTE. Why, a creature who does not know *Buffon* from *Soufflee*—Man!—my Letitia—Man! for whom we dress, walk, dance, talk, lisp, languish, and smile. Does not the grave Spectator assure us that even our much-bepraised diffidence, modesty, and blushes are all directed to make ourselves good wives and mothers as fast as we can? Why, I'll undertake with one flirt of this hoop to bring more beaux to my feet in one week than the grave Maria, and her sentimental circle, can do, by sighing sentiment till their hairs are grey

LETITIA. Well, I won't argue with you, you always out-talk me, let us change the subject. I hear that Mr Dimple and Maria are soon to be married

CHARLOTTE. You hear true. I was consulted in the

choice of the wedding clothes. She is to be married in a delicate white satin, and has a monstrous pretty brocaded lutestring for the second day. It would have done you good to have seen with what an affected indifference the dear sentimentalist turned over a thousand pretty things, just as if her heart did not palpitate with her approaching happiness, and at last made her choice and arranged her dress with such apathy as if she did not know that plain white satin and a simple blond lace would shew her clear skin and dark hair to the greatest advantage

LETITIA. But they say her indifference to dress, and even to the gentleman himself, is not entirely affected

CHARLOTTE. How?

LETITIA. It is whispered that if Maria gives her hand to Mr Dimple, it will be without her heart

CHARLOTTE. Though the giving the heart is one of the last of all laughable considerations in the marriage of a girl of spirit, yet I should like to hear what antiquated notions the dear little piece of old-fashioned prudery has got in her head
